I said I didn't see what harm that could do and he whipped out a paper and a fat fountain pen and said, "We're getting up a series of little messages to the men of America, 'Things Young Husbands Should Know.'" "I'm an old husband," I said. "We just want permission to quote you as saying that you think it is a good thing to save money," he said. "Here's where you sign. It's just a formality."

After all my years in business, I should have known that, when a fellow says, "It's just a formality," you ought to lock yourself in the safe till your lawyer gets there; but I felt careless that day because the time had come when I could stop working and not stop eating, though I didn't intend to stop doing either as I am fond of both. I signed.

"And now," this Higby said, "I'd like a picture of you." "Printing my pan might queer some sales for you," was my reply. "Folks might think that paying your premiums gave me these right-angle ears."

He argued, so I got out the only picture I had, taken in '28, when I had the new front put in my shop. I'm sitting in the window among the fixtures. Higby said no—it did not look very retired. "I'd like a recent one of you in your fishing togs," he said. "I don't have any fishing togs," I told him. "How soon are you going home?" he asked. "Not till six," I said. "I'll be back," he said.

Pretty soon he was back with a big bundle. In the bundle were a rod and reel and a complete outfit of fishing clothes—everything from hip boots to a hat with flies on it. "Now, just slip them on," he said, "so I can get a shot of you fishing." "What? On Main Street?" I said. "Don't worry about the background," he said. "Just put on this rig and I'll do the rest."

ONE reason I've made out so well is that I'm obliging. I put on the khaki britches, and checkerboard shirt. I'm tubby; but the man they were made for was tubbier. Higby got me out into the back yard, boosted me up on a packing box and began snapping his little camera at me.

I heard some titters. The boys in the barbershop next door were watching through the window. As I'm not a hard-drinking man, they thought I'd gone buggity. There I stood, yanking at the rod for dear life, with this Higby yelling, "I'm a big one! Don't give me any slack. Fight me, Mr. Darling, fight me!" He had tied the end of the line to his belt.

"Now start reeling me in!" he hollered. I reeled until my thumb got caught in the reel. Then he stopped taking pictures of me. I climbed down off the packing case and out of the clothes and I handed them to this Higby and he said, "Keep them. Compliments of Frugality." I said, "What'll I do with them?" and he said, "Why, wear them when you go fishing," and I said, "I never caught a fish in my life." He said, "You certainly must have had a lot of bad luck," and I said, "It wasn't so much bad luck as the fact that I've never gone fishing."

He slapped his head as if a thought had bitten him. He said, more to the ceiling than to me, "*The man who couldn't go fishing till he was fifty!*" "That's not me," I said. "I could have gone but I didn't want to." "Oh!" was all he said, and he gave my hand another jacking and hurried away. I tossed the rod and togs into the stockroom and went home. I thought so little of it I didn't even mention it to Doll. That's my wife. Her name is Doretta, but I call her Doll, because that is what she reminds me of.

It was mighty nice, I can tell you, to see that fifty per coming in; but I had plenty of plumbing, so I just put the checks in the bank and let 'em lay.

COUPLE of months went by and, one evening after supper, I lit up my pipe and was getting ready to settle down for a quiet evening when there came one of those little homemade thunderstorms which blow up in the lives of all married folks. We haven't had many, Doll and me, in our twenty-five years. Sometimes I do something that makes her sore. I don't mean good and sore or even real sore, just sore. I've got a way of telling when my wife is sore that most husbands haven't. When she calls me One-Trip or, maybe, Popsy, I know everything is all right; but when she calls me Darling, I get ready to duck. By and large, though, we're what they call a "devoted couple." One of Doll's girl friends, who bridges at our house every other Wednesday, nicknan

way, ■ony look in her eyes. I said, "I ■n't ■ieve you heard a word I said," ■d sh said, "What?" I said, "I bet ■u've allen for some other fellow." ■ course, I said it just to tease her. ■he di■'t smile and say, "Where could find ■etter one than you, One-Trip?" ■he l■ced waspy and said, "I wish ou'd ■e that incinerator where it be■ings, ■arling."

So I ■ent out on the back porch and ■t the puffing my pipe, with my feet ■n the ■il and my suspenders showing. ■retty ■oon Doll came out and said, Sorry, was cross, One-Trip." That's Doll. ■e don't stay cross. "Let's go ■ a m■ie," she said. "It's so nice and ool o■ here," I said, "and not a single nosqu■ has come near me." And Doll aid, "■ey've gone home to get their as m■s." But I let that pass. "Now e an ■gel and get out the sedan," she aid. "There's a wonderful picture at he E■u-Dream, The Loves of a Prince "Has it got cowboys or Indians? "No," she said, "it's the kind of picture *I* like." I made a snoot. "I bet Greasy Gus is in it." She said, "For the last time, Darling, I'm going to ask you *not* to refer to Ramon Valcour as Greasy Gus." "I'll try to remember," I said, and got out the sedan.

WE STARTED down Clinton Street. "Doll," I said, "I'll have to leave you at the theater. Meet you after the show. Got to see a guy about ■ deal." Doll said, "I know the man; and I know the business. You seem to prefer guzzling beer with Ed Stutz to my society." I said, "Aw, Doll, I'd much rather be with you, even though Ed is, without a doubt, the second-best plumber in Ashtabula. But," I said, "a lot of good my society does you when you're sitting with your mouth open watching this Toothy Tony making passes at girls which they don't mind from him, but if I tried them I'd get ■ slap in the kisser."

"Hmm," remarked Doll, "so you want to chase girls—at your age!" "Now, Doll," I said, "you know perfectly well that from the time I got one look at you I never took a look at any other woman. Though," I said, "I can't deny that I've been looked at once or twice. Little do *you* know," I said, "what temptations we plumbers have; but I'm no Valcour. I've behaved. Though on some jobs I've had ■ chance to do otherwise and at one-fifty an hour and time and a half overtime."

"I know you're no Valcour," she remarked. "I can hardly wait for Thanksgiving," I said. "Aw, now, Doll, let's not battle over that cheap ham." "Ramon Valcour is ■ polished aristocrat," she said in a voice fit to freeze ■ radiator. "On rye toast with mustard," I said. "What is he but ■ boiled shirt that blondes get flattened against?" Mrs. D. sighed. "I'm afraid it's too late," I said, sarcastic, "for me to turn into a wop or spig with large, loose eyes. But, if it will please you, Doll, I'll make the moths give me back my dress suit and wear it every day—to work even. But don't forget," I said, "that the last time I wore it to that Community Chest ball, I spent half the time going back and forth to the kitchen because I was too polite to tell people I wasn't ■ waiter. And don't forget," I said, "that when you egged me into kissing the hand of the governor's wife, she let out a yip and claimed I was trying to bite her."

Doll shuddered and said, "It would be a good idea for you, Darling, to spend more time watching Ramon Valcour than playing duckpins with an oaf like Ed Stutz who sleeps in his underwear." "And how do you know that, Doretta Phelps Darling?" I barked. Then we had it hot and heavy.

I accused her of this, and she accused me of that, and then we turned off Clinton into West Adams and Doll stopped in the middle of ■ word and let out a squeal. I looked, and there, on a billboard, is myself. There I am, bigger than life-size, with those fishing togs on my body and a goofy look on my puss, fishing away like I liked it.

FEET FIRST

By Henry L. Jackson

Black lightweight town shoes with plain toecap for spring business wear; the suit is of lightweight w

Perforated shoes are recommended for hot weather wear, these a lightweight calf suitable for business; worn with lightweight lisle hose, tropical worsted suit

rown wing-tip brogue shoe—a semi-sports style suitable for town, travel or country; green lisle hose and striped flannel suit. The monk-front shoe on the floor has been adopted as correct dress for Army officers

IN THE Army you hold a fifty-pound sack of sand in your right hand while they measure your right foot; then you shift it to your left hand and they measure your left foot. It represents the amount of weight that goes on each foot with every step you take with a full pack on your back. Uncle Sam isn't taking any chances with your shoes not fitting.

No one should have to "break in" a new pair of shoes. If they're fitted properly in the first place they're comfortable the first time you wear them. Get the best shoes you can afford—you'll find you have a better-constructed, longer-wearing pair. From there on the care and feeding of shoes is up to you. You can save up to $30 a year in shoe bills with proper handling.

First rule is to change your shoes every day, which gives the worn pair a day to let perspiration evaporate and to spring back into shape. If you own two pairs of shoes and wear them alternately you'll be surprised at how much longer they'll last.

It's a good idea to wear rubbers in wet weather. They've been streamlined to the point where even a confirmed hater of rubbers can find no objection to them. The newest types simulate your own shoes so closely that it's almost impossible to tell they're rubbers. Wet leather becomes soft and gets out of shape and even after drying is inclined to be somewhat lifeless.

However, if you've been caught in a downpour, the thing to do is to wash any mud off with tepid water and go over the whole shoe lightly with castor oil. Then straighten out the shoe and stuff with crumpled paper. This speeds drying and helps to retain the shape. But don't put them up against the radiator—the heat will dry and crack the leather. Let them dry slowly, polish, and they're almost as good as new.

Frequent polishing, in addition to being a point in grooming, actually keeps leather soft and pliable, thereby lengthening its life. Don't stint on the shoe-shine boy or, if you take care of your shoes yourself, don't spare the brush.

Grease spots on shoes seem to stump the average guy—you get rid of them by coating the grease spo with a thick solution of rubber in some solvent. stationery store, should be applied to the spot, lowed to dry partially and then peeled off; the gre comes off with it. If it's a particularly bad spot may have to repeat the operation, but it gets it

When you're not wearing your shoes don't them under the bed or throw them on the floor. You can take your pick of several typ shoe wardrobes on the market, but the poin use one. Always put your shoes on trees wh take them off—it preserves their shape.

If you've put your shoes into a damp corne where it's possible that you'll find them with mildew. You don't have to throw th if this has happened—just wash them off and warm water. It works wonders.

The easiest way to clean reverse calf rub them with sandpaper, which remove brings the nap up. The sides of the sole gone over with black or red enamel, w buy in any shoe repair shop. Since shoes are never polished the sides of soon develop a scrubby look without process.

In general, brown shoes may be color suit but black, but for busine dish-brown shade is best. Known bootmaker finish, you get it by ap polish to the shoes. Any number ishes are available in the market ber-soled or heavy brogue sh clothes; and don't wear dressy h odd slacks and tweed jackets. F sports clothing, which include and Glen Urquharts, semi-brog calf shoes may be worn in to

We don't want you to pla of shoes, but you owe it to yo are straight and laces tidy.

Christine Redfern sprang lightly from stone to stone and her husband was never far from her

The Story Thus Far:

IN NEED of a rest, Hercule Poirot, noted Belgian criminal investigator, goes to the Jolly Roger, a simple old hotel on an island off the southern coast of England. A short time after he arrives, one of the guests—Arlena Marshall, wife of Captain Kenneth Marshall—is found dead, strangled, on the beach at Pixy Cove, which is not far from the hotel.

Because Mrs. Marshall and another guest—Christine Redfern's husband, Patrick—had been giving Marshall plenty of cause for jealousy, the Captain is an obvious suspect. *But he has an alibi.* . . . Among the Jolly Roger's guests, in addition to those already mentioned, are: Linda Marshall, Kenneth's daughter by his first wife; Miss Emily Brewster, an old maid—seemingly harmless; the Reverend Stephen Lane, a religious fanatic; an American couple, Mr. and Mrs. Odell Gardener; Major Barry, a veteran of the Indian Service; Rosamund Darnley, who had once been in love with Marshall—and probably still is; and Horace Blatt, a hail fellow well met with quite a bit of money.

Assisted by Poirot, Inspector Colgate and Chief Constable Weston go to work on the case. They interrogate everyone at the hotel. Then they go to a cavern—Pixy's Cave—not far from the scene of the crime. There, in the cave, they find a box. The box contains heroin!

By this time, Poirot has a number of excellent clues. Returning to the hotel, he questions everyone he meets in the hope of learning *who had taken a bath, a short time before the killing.* He is likewise interested in the kind of perfume the various women guests use.

He interviews Christine Redfern. She astounds him by asserting that, shortly before Arlena had been murdered, Linda Marshall (who had hated her stepmother) had purchased some candles. Leaving Christine, Poirot finds Linda. But when he mentions *candles,* the girl—terror in her eyes—turns and leaves him. . . . The three investigators learn that the Reverend Stephen Lane had once been in a home for mental patients—that he had suspected the devil of snooping about in the guise of a "scarlet woman." . . . Taking with him some reports on the recent operations of a strangler, in England, Poirot goes to Pixy Cove. There he reads the reports; and, as he reads, he begins to wonder if—well, Hercule Poirot feels that he is on the right trail, at last.

X

TO HERCULE POIROT, sitting on the ledge overlooking the sea, came Inspector Colgate.

Poirot liked Inspector Colgate. He liked his rugged face, his shrewd eyes, and his slow, unhurried manner.

Inspector Colgate sat down. He said, glancing down at the typewritten sheets in Poirot's hands: "Done anything with those cases, sir?"

"I have studied them—yes."

Colgate got up, he walked along and peered into the next niche. He came back, saying: "One can't be too careful. You know we don't want to be overheard."

Poirot said: "You are wise."

"I don't mind telling you, M. Poirot," Colgate said, "that I've been interested in those cases myself—though, perhaps, I shouldn't have thought about them if you hadn't asked for them." He paused. "I've been interested in one case in particular."

"Alice Corrigan?"

"Alice Corrigan." He paused. "I've been on to the Surrey police about that case—wanted to get all the ins and outs of it."

"Tell me, my friend. I am interested—very interested."

"I thought you might be. Alice Corrigan was found strangled in Caesar's Grove on Blackridge Heath—not ten miles from Marley Copse where Nellie Parsons was found—and both those places are within twelve miles of Whiteridge where Mr. Lane was vicar."

Poirot said, "Tell me more about the death of Alice Corrigan."

"The Surrey police didn't at first connect her death with that of Nellie Parsons," Colgate said. "That's because they'd pitched on the husband as the guilty party. Don't quite kno cept that he was a bit of wha calls a 'mystery man'—not m about him—who he was or came from. She'd married h her people's wishes, she'd a bi of her own—and she'd insurec his favor—all that was enou suspicion, as I think you'll

Poirot nodded.

"But when it came dow tacks the husband was washe of the picture. The body was by one of these women hik young woman in shorts. She solutely competent and reliat —games mistress at a schoc cashire. She noted the time found the body—it was ex fifteen—and gave it as her o the woman had been dead qu time—not more than ten min fitted in well enough with the geon's view when he examine at 5:45. She left everything and tramped across country t police station where she re death.

"Now from three o'clock t

ILLUSTRATED BY GEORGE HOWE

The German officer made a mistake in his estimate of the men of Ballymoran. Why? They were Irishmen

IT WAS a gray day. The sky was the color of stale cigarette smoke; the air was damp and smelled of fog. Snow still clung to a few places in the green of the Irish countryside. But there was none left on the hilltop where the two men were.

Ryan, lying flat, put his hat down on the damp ground beside him, and placed the field glasses on the hat. He looked at his watch and swore. He turned his head and looked at Hubie McMurrough.

Hubie, his back comfortable against a tree trunk, was watching the road behind them. He had his hands stuck up his sleeves for warmth, but the submachine gun lay across his lap. Hubie's trench coat was buttoned high around his neck, and the long, lean face under the brown beret was expressionless.

"Well?" said Ryan. It was the third day of waiting.

Hubie shrugged. "The day's young. We've time, man."

"Maybe." It was you they contacted in Dublin, thought Ryan. You with your beret and having fought with the Francos in Spain. We've got a whole unit of the I.R.A. out here on the hills because you talked to some man in a Dublin pub. It better be good, Hubie, my lad. He rolled over and glanced down at the road. "Who's covering the road?"

"Timmy and O'Malley. With the old Vickers gun."

"And the other gun?" Ryan waved toward the valley. "Beyond?"

"Coyne."

Then they both heard it, a low buzz in the distance. Ryan whirled, picked up his glasses. He swept them in a slow arc, searching. If they had any sense they'd come in from the west. In the glasses he saw a darker spot against the smoke-gray clouds. It grew bigger. Suddenly, it was clear, the dropping fast in a long dive.

"Looks like it," Ryan said.

Hubie lifted the machine gun. He took out the clip, slid it back in with a click. He did it again, and a third time. Each time the clip clicked home Hubie's eyes got brighter.

Ryan took his rifle from against the tree, and worked the bolt, sending a cartridge into the chamber.

They knelt together, watching the plane come low over the hills to the west.

"A Stuka," said Hubie.

rue. Lily remembered what a hectic,
ife it had been for her mother before her
died. She remembered the constant
e threats, the pleading. She remembered how her mother had finally gone to work in the department store because her father had never managed to make ends meet. And when he'd died, he'd left no insurance, nothing. It was easy to see why her mother felt so bitter about Pike Burdett.

Yet there was something about the way Pike touched her feelings—it was hard for Lily to explain, even to herself. . . .

The clock on the dressing table said ten minutes of seven. Suddenly, Lily got up and walked into the living room again and faced her mother with a tight, troubled expression on her face.

"I want to ask you something important, Mother. And I don't want a mother-to-daughter answer. I want it woman-to-woman."

"I'll answer it that way, Lily," her mother said.

Lily frowned. "I think Kenneth is going to ask me to marry him tonight. I guess I could be happy with him, Mother. Only, little things stick in my mind about Pike that don't about Kenneth."

"I see."

"I've been thinking, Mother. I know that if I ever married Pike, I'd be terribly happy—for a little while. Then I'd probably fight and plead and have to get a job in a store, as you did. But if I married Kenneth, everything would last. I wouldn't ever be terribly happy but I'd never be *unhappy*."

Her mother nodded.

"You were terribly happy with Father for a little while, weren't you? It was the way I feel about Pike, wasn't it?"

"Yes, it was, Lily."

"Well, what I want to know, Mother—and, gee, this is hard to ask you—was it really worth it? If you had it to do over again, would you honestly do it over?"

Lily waited, her eyes fastened on her mother's. Finally her mother said, "You asked me, so—well, it *was* wonderful for a little while, yes. But it was grief and misery for so much longer. I don't want you to make a mistake tonight, Lily." Her mother paused. "No. No, I wouldn't do it over again."

IT WAS a nice evening. Lily knew that Kenneth's mother and father liked her very much. Around eleven, Kenneth took her home. He drove straight to her house, but when she made a move to get out of the car he touched her arm and drew her back.

"Lily," he said earnestly, "I want to marry you. I love you. Will you marry me, Lily?"

She felt suddenly calm. All evening she'd been nervous, thinking about it, but now that he'd said it, she felt calm.

"I'm sorry, Kenneth. I like you so much. But—"

Five minutes later she opened the door of her house and walked in, ready to face her mother. She dropped her coat and hat on a chair and walked into the kitchen, quietly defiant. But her mother wasn't sitting at the table. Pike was. Sipping a beer.

"Pike!" she said. "Pike—where's Mother?"

"She went out to a movie," Pike said. He took a gulp of his beer. "She phoned me to come over. Said you'd be in early."

Lily sat down. "She phoned *you* to come over?"

Pike grunted. "Figure it out, kid, I can't. I know she hates me and—oh! She left this for you."

He handed her a sealed envelope. She ripped it open and read: "Lily, I meant what I said—I wouldn't do it *over again*. But I'd still do it *once*. So should you or you'll feel thwarted all your life. Even when you asked me, I knew if you really loved Pike you'd marry him anyway, no matter what I said. And I know you really do love him, Lily. So get him. You'll always feel that you missed the boat if you don't."

Lily glanced up. Pike was saying, ". . . and the party will be going until all hours. Let's look in, kid."

"Let's," Lily said. Pike got up, grinning, crooked his arm with elaborate politeness and said, "So here goes Mr. and Mrs. Joe Baloney." And Lily had to smile. Crazy, but she knew she'd remember—always—just the way Pike looked when he said that.

Lily's voice suddenly softened. "I'm sorry about tonight, Pike," she said. "I'd love to go. If you'd only told me sooner—"

The Man at the D

By Roark Bradford

ILLUSTRATED BY RONALD McLEOD

This is the story of a visitor who called but once. Even that was too much

ON SATURDAY morning the wind was blowing straight in from the lake. My boss said, "George, you get some stuff together. We're going to spend the night at the camp."

"Yes, sir," I said. "How many are we going to be?"

"Well, let's see," he said. "There's me and Hobson and what's that man with the pointed beard named?"

"You mean Dr. Stone?"

"That's him. And J. Leonard Brownlye."

"Who, sir?" I asked.

My boss laughed. "Never mind," he said. "You'll see." Then he quit laughing and got serious: "George, do you believe in ghosts?"

My name is Booker but my boss is the kind of white man that thinks all colored people who cook and wait on them are named George.

"I never thought much about ghosts, one way or the other," I told him. "My old grandmamma used to tell me if I kept my place and minded my own business, nobody, flesh or spirit, would bother me. So I never thought much about ghosts."

My boss hired me one time when he went to New Orleans to see the Mardi Gras, and brought me up here to Chicago to show people what good, old-fashioned Creole cooking is. I don't like my boss but he pays me eighty a month and keep, and that beats fighting off the dogs with a WPA shovel.

"I'm going to let you in on the joke, George," my boss said, "because I don't want you to get scared and run off."

"Yes, sir," I said. I don't care much for jokes, especially when my boss plays them on other people, but I mind my own business and draw that eighty a month.

"Lincoln is coming," my boss said.

"That'll make five, not counting me," I said. "You and Mr. Hobson and Dr. Stone and Mr. Brownlye and the last gentleman you named."

My boss laughed. "You know who Lincoln is?" he asked me. "Abraham Lincoln?"

A man had better not answer too many questions about what he knows until he finds out why the questions are asked.

"I heard the name spoke," I told my boss.

"You bet you have, you dumbbell," my boss said, still laughing. "Abraham Lincoln set you colored people free. I thought every coon in the country knew that."

The man at the door said, "Son, don't try to make a god out of me. The Almighty is still doing pretty well"

"It must have been be[fore] I said. I still didn't know [what] was going to be about, [so] to let on.

"And he's dead, too."

"Shot and killed seve[ral] ago."

"Yes, sir," I said.

"But he's going to sh[ow] camp about midnight, to[night]."

"Yes, sir."

My boss studied that [a] Then he said, "I don't [be]derstand at all. I said Ab[e] —he's been dead seven[ty] going to walk right up to [a] midnight, tonight. You u[n]

I knew he wanted me t[o] I rolled my eyes a little [to] teeth chatter some, and I [was] ing to be a mighty cold [night] to be walking about in the [cold] dead and all."

My boss laughed big, [and] don't you get scared. Ge[orge] "It's just a joke. If you [are a] good cook I wouldn't tell [you] scare the fire out of you, to[o] want you running off in [the] ter and getting lost an[d] dumes."

"I won't run off," I said.

"This man—J. Leonar[d] ever hear of him?"

I KNEW him when he wa[s a] Brown and we were [in] High School in New Orle[ans] before he got started writ[ing] winning prizes and sch[ool] parting his name in the [mid]dle was all right, I guess. I [had] ill feelings toward him.

"No, sir," I told my bos[s] lieve I know a man by [the] name."

"J. Leonard Brownlye [is a] man who is an intellect[ual]," said. "He is, in a manner [of] leader of your race. I'm [sure] you don't know him."

"Yes, sir," I said. "Bu[t I] been so hard I don't have [to] circulate amongst the [high]

"Not only that," my b[oss] got a money gift from so[me] to do an epic poem on the [life] ham Lincoln."

"Yes, sir," I said. For [so] I have been applying to [him] to get some money so I [can] what some of the white pe[ople] and not doing for the col[ored] six years after Lincoln's [death] foundation turns me down."

"So we are going to g[et] him," my boss said. "Som[e] down at the university th[ink] ting a little too big for his [britches] are going to get him over [here] and take him down a few [pegs]."

"You-all are not doing [this] I said, putting on a big, [dumb] "I'm against lynching. I [pay] four dollars a year to the [NAACP]."

My boss laughed out [loud] lynching," he said. "We [are] to scare the pants off Mr. [J.] Brownlye. That's all."

"Yes, sir," I said, and m[y] had been a big load taken [off]

OUR NEW ARMY

PHOTOGRAPHS BY CHARLES KERLEE

Here, Collier's special correspondents continue with high lights from camps in which the new American Army is being trained. This week there are items from the South, the Pacific Northwest, the Great Lakes; and about Army food and other things. In the next issue, other sections and subjects will be covered.

ARMY FOOD: The Army may be prejudiced, but it says it is giving a majority of trainees better food than they got at home. Everything is bought under specifications: diets are balanced scientifically. Here's some interesting information from Lieut. Col. S. C. Dildine, who buys a million pounds of meat products a month for boys from Pacific Northwest states in training at Fort Lewis, Washington.

The Army buys Grade-B beef because it's high quality and hasn't so much "waste fat" as Grade-A. It sticks to steer beef, banning heifers. Heifer meat is tender, all right, but has a higher moisture content and more waste. "Medium cured" cheese gets the Army's nod, instead of the green variety—less moisture, more digestible. Ever do any thinking about large eggs and small ones? The Army did: it buys large ones. The proportion of shell to egg is less.

Ninety score butter is what the soldiers get—and every batch is sampled by expert tasters. In salmon—romantically known to the A.E.F. as "goldfish"—the Army insists nowadays on high grade chinook and sockeye varieties. Milk standards are higher than in most cities. The Army rejects huge offerings of food on occasion because they don't come up to specifications.

Standards are so rigid because one piece of bad food can spread sickness through a regiment. Army experience is that it takes the services of four men to make one sick man well. Before he buys oysters, Lieut. Col. Dildine goes out and inspects the oyster beds. The Army's *that* careful.

●

PACIFIC NORTHWEST: New men at Fort Lewis, Washington, are acquiring the hobbies long indulged in by veterans. Many old-line soldiers, for example, collect insignia pins of various regiments: some of the crests marked with the dragons of China for oriental service; others with mementoes of Civil War battles. Some soldiers have 400 or 500 insignias in their collections. Private David Schaffer of Chicago, who enlisted for three years a few months ago, already has 20. One of his companions, John Dore of Milwaukee, who worked on a railroad before enlisting, has a collection of railroad timetables.

In one barracks at the Reception Center, Leroy Hampton of Manti, Utah, a new soldier now assigned to the 99th Field Artillery, started a fad of soap carving. Already his carvings of horses, battle scenes, and statuary are prized possessions in other barracks, and Derral Mecham of Salina, Utah, a 21-year-old blond little lad, also has carved a statue or two of soap. From all this sprung the hobby of Howard Lee, first draftee to be inducted from Oregon. He has devised a game called "Blitzkrieg" which he is trying on fellow soldiers in the barracks. It was pawns made of soap—in the shapes of soldiers, tanks, artillery pieces and airplanes. Four people—representing the mythical nations of Hati, Gillopea, Vernonia and Eeland, play. They move across squares representing waterworks, factories, airports, taking "out" the enemy like chess. Goal is the enemy capital in the center of the board. Lee hopes to sell his game.

●

SOUTH: New Army concentrations are creating boom towns and boomtown problems. The Army figures that each soldier added to a camp brings in one new civilian to the area near by. The United States Public Health Service figures one new civilian to every two soldiers. Taking the Health Service figures this means that the 13,000 inhabitants of Brownwood, Texas, probably will be increased to 28,000—the 30,000 troops will bring in 15,000 new civilians.

Hinesville, Georgia, had 800 population late in 1939—and will have to absorb 7,500 more when 15,000 troops move in. Around the little town of Starke, near Camp Blanding, Florida, will be 60,000 soldiers. Starke's 1,400 citizens will be invaded by 30,000 more men, women and children. Tullahoma has a normal population of 4,500. Around 28,000 troops are being concentrated at Camp Peay, near by. That means nearly 15,000 new inhabitants for the town. Alabama's Anniston will have to provide for 10,000 newcomers; Hattiesburg, Mississippi, for more than 25,000. Fort Bragg, North Carolina, will have 66,000 men.

●

LAKES: The Army's putting a lot of its recruits through school. At Fort Custer, Michigan, the post command is very proud of the good report cards brought home by thirty-two men of the Second Infantry, who are learning shorthand and typing at Argubright College in Battle Creek. The cards are all above average. The Army sends its scholars to school in trucks every morning, feeds them a hot lunch at noon and trucks them home evenings.

●

GENERAL: New soldiers can't always be given the jobs they want or are best fitted for, in the Army—and here's why: There are some 29,000 different occupations in civil life, but only 272 are needed in the fighting force. That's why a lot of square pegs have to be rounded off before they'll fit into the Army's circular holes.

Many trainees are discovering unsuspected opportunities in the Army. For instance, there's Lawrence Perez of Los Angeles. He was on the stage and in radio with a flock of about forty bird calls, mostly Californian. Always wanted to travel around and find new birds to imitate; never could afford it. Now he's in the Pacific Northwest, hunting up new birds; hopes to go to some Rocky Mountain post in the spring—and find other sets of warblers. Incidentally, he finds the Army's chow and exercise are building out his chest and giving him more lung power.

In many camps there's a shortage of new uniforms—and so some of the recruits have to make out with the old

CHINA SKY

By Pearl S. Buck

ILLUSTRATED BY MARTHA SA

"Father," she said gently, not to startle him. "Eh!" He looked up and put down his paper. "You are late"

The Story Thus Far:

SECRETLY in love with her chief—Dr. Gray Thomison, head of a hospital in the Chinese city of Chen-li—young Dr. Sara Durand eagerly awaits his return from America, where he has gone to raise funds for his work.

The war is raging, and at frequent intervals the hospital is a target for Japanese bombers. Getting the patients into shelters, when the sirens blow, is difficult and at times perilous. But, with the assistance of two Chinese—Dr. Chung and Dr. Siu-mei—Sara manages to protect her little flock fairly well.

Weeks pass. Sara receives a cablegram. It is from Gray Thomison. It informs her that he will soon be back with "Louise"—*his bride!*

Stunned, Sara tries bravely to repress her emotions. But there are moments when she is wretchedly unhappy. . . . One day a seriously wounded Japanese is brought to the hospital by his captor—Chen-ta, a famous guerrilla, who is known as "the Eagle." Chen-ta says that he himself has wounded the Japanese. And he urges Sara to make every possible effort to save the man's life. *Why?* Chen-ta will not discuss the matter.

Assisted by Dr. Chung (who donates some of his blood), Sara operates; and the Japanese does not die. . . . The Thomisons arrive. Sara gives them as cordial a welcome as she can, under the circumstances. She notes that Louise is young and very beautiful. Louise likewise notes *that Dr. Sara Durand is very beautiful.* . . .

Gray has a Chinese cook—Siao Fah—who adores him. Siao Fah, watching this woman who has just come from America, dislikes and mistrusts her. But, despite the bombings (which terrify Louise), everything goes along smoothly, for a time.

Then, one day, a short time later—after an unusually severe bombing—Gray goes to Louise's bedroom. There he finds her, badly frightened, in tears. Louise astounds her husband by demanding that he take her home. Feeling sure that, once she has grown accustomed to life in China, she will be glad to stay in Chen-li, he refuses to drop his vitally important work and return to America.

In his arms, Louise implores him to take her home. Gray holds her close. "No, Louise," he says firmly.

III

AM I recovering?"

Yasuda, who had gone through the Chinese doctor's examination without a word of speech now asked this question. His voice was calm and without weakness.

"You are," Chung replied.

"If my captor comes today, am I well enough to be returned to him?"

"In my judgment, yes," Chung replied.

The two men spoke in English and equally well, and yet upon their tongues the language could have passed for two, had English been unfamiliar to the listening ear. The Japanese spoke with the guttural intonation of the German-taught. The Chinese had learned from an English missionary, educated in Oxford. But there was no one in the room to hear them.

Chung straightened himself and covered his patient. He began to put away his stethoscope, his delicate, supple hands moving without a fumble. He had purposely come into this room alone, without the usual nurse. One of the nurses, Ya-ching, had been lingering near him waiting to be called, but he had not noticed her. Half the nurses in the hospital were in love with him, he thought scornfully, and why should he pay Ya-ching any heed? She was pale and pock-marked. Why pay any nurse heed when Siu-mei was beginning to yield? Siu-mei's family was rich.

"Why do you work when you need not?" he had asked her one day.

"I wish to work," she had replied with a proud look.

He himself worked because he desperately wanted money. His family was poverty-stricken, his father an idle son of a silk merchant who had used up the last of his small inheritance, and as if that were not enough had now begun to smoke opium because of kidney pains. The large family of his you and his parents hung upor an intolerable burden. H pelled by tradition to take but the years abroad had feeling for his family. Here's Why Young Folks Go For MERCURY

MERCURY performs differently because it's built according to aviation principles . . . with more power per pound than most other cars. It's a lot like a race horse in the pink of condition—trim, balanced—no superfluous weight—but plenty of alert and responsive drive. Naturally, young people of all ages like the "get-up-and-go" of this young kind of car. In a little more than two years Mercury has won over 175,000 new owners, and—have you ever known *one* who wasn't enthusiastic?

More Rubber On The Road. New larger tires and wider tread, combined with scientific springing give the 1941 Mercury more grip—more road-hugging security, plus better anchorage on the turns.

More Room And Comfort. The new Mercury is a surprisingly large car. Body lines and doors flare out over the running boards to gain extra width inside where big people and big families can use it.

t Out In Front With This One !

There's plenty of room for ...ily's ...ggage in Mercury's spacious ...tment ...pare wheel and tire are stowed ...inst ... wall. Tools, automatic light

FOLKS WHO buy Mercury are proud of their car because it gets out in front and usually stays there. It's mighty fleet, plenty mule-footed in hard going. The smooth, restful ride on slow-motion springs scores a new high in comfort. We think Mercury is pretty as a picture, inside and out. A bit restrained, of course—not too much dazzle, but clean, flowing lines and a perky "let's go" look. Here's a car without a single "super" something. Just a modern, well-conceived, honestly-built automobile that we believe is the best you can buy for the money. Mercury is amazingly economical too—costs less to own than you probably realize. We'd like to have you drive one and see that we really have brought some new thinking into the automobile business.

Most Everybody Likes A Convertible, and here's a fine new Mercury that we think is about the last word in this type of car. Automatic top is electrically operated. White sidewall tires extra

MERCURY 8

"Lady, you may know calic
...but I know tobacco!

"And I know Luckies pay the price for finer leaf!"
says F. L. Warren, independent tobacco buyer of Danville a.

"In buyin' tobacco, you get what you pay for. Right be e my eyes, I see Luckies pay the price to buy tobacco th 's finer, lighter and milder. I figure that's why most tob o men like me smoke Luckies. I've smoked them 15 yea "

Yes, Luckies pay higher prices to get the finer, lighter, n l- rally milder tobaccos. If you're smoking more today, *al mildness* is important. So take a tip from the independen - bacco experts—the buyers, auctioneers and warehousen l.

With men who know tobacco best_it's LUCKIES

knew what he meant. "Yes.

When they came to the abandoned barn that was headquarters, Coyne was there, wrapping the tripod of his gun in oily rags. He glanced at the stranger; looked away politely.

"I saw the plane," said Coyne. "But neither hide nor hair of anything else passed, till Hubie came."

Ryan nodded. He led the lieutenant into the barn. The roof had caved at one end but the other had the semblance of a room. A roll of blankets in a corner, three boxes and a bench. A brazier, with a few blocks of peat beside it, stood, cold, in the middle of the floor.

Ryan propped his gun in a corner and dug a bottle and two mugs out of the ancient hay in the manger. He waved the other toward the bench, clinking the mugs in his hand. "Usquebaugh," he said, pouring. "The wine of the country."

The lieutenant stretched his legs out. He took the mug and raised it. "Ireland," he said. "Her kings, her people and her whisky."

"And don't forget, gentlemen, if it weren't for my client you'd all be home shoveling snow off your sidewalks!"

REAMER KELLER

Ryan felt the warmth of the drink spread down his throat, and munched to keep the taste of it. He sat on a box, facing the German. Ryan cupped both hands about his mug and sipped.

"You sleep here?"

"Not often," said Ryan. "Never two nights running. Nor anywhere else."

"Ah, yes. Even in Berlin we have heard of Ryan."

GET on with it, thought Ryan. You'll catch no cows that way. He said: "Thanks."

"Yes," said the lieutenant. "The riot in Belfast, that was Ryan. And the railroad yards in Liverpool. And the affair of the Arsenal."

"You're well informed," said Ryan. There were voices outside, and he put down his cup, listening.

Timmy came in first, the old Vickers over his shoulder, and Ryan saw Kuhel's stare at the round little man. Timmy was a barrel with bow legs beneath, and a globe for a face on top. A brown knit shawl was draped around Timmy, bunched in front with a wide safety pin. Timmy plunked down the gun, took off his cap and mopped his face with it.

As usual, saw Ryan, Timmy was three sheets to the wind. Wanting no mistake about it, Ryan said: "This is Timmy. A first-class fighting man."

The lieutenant bowed, frowning.

Hell, said Ryan to himself, this is the I.R.A., not the Storm Troopers. Timmy's worth the lot.

HUBIE came in, and O'Malley. Hubie sat down on the floor, his gun beside him. "Coyne's on watch," said Hubie. He glanced from Ryan to the officer. "What goes?"

Kuhel took a map from a breast pocket and spread it on the floor. It was dark in the barn, and O'Malley lit a candle end. They grouped themselves about the map. Ryan stayed on his box, looking down at them.

"First," said the lieutenant. "You can talk for the organization?" He went on at Ryan's nod. "You know this section of the country?" His finger ran down the west coast of Ireland.

"Like the palm of his hand," said Timmy.

"And this—the northwest corner?"

"Wait!" exploded Timmy. "That's Donegal. You'll have the whole north at your throat!"

"Shut up!" Hubie snapped the words.

"But the man's talking nonsense."

"I'm talking of a blow at England."

That got them. Ryan could see it pass from face to face like a breeze rippling across a lake. Even Timmy wet his lips. England. The old enemy. And these were the outlaws, the die-hards. This Franz Kuhel was a good man, and smart. He'd press his advantage.

"Isn't that why you're here? The Free State after you—the police? Because you're still against England. You're the ones know that Ireland isn't Ireland until you've brought the lion to his knees. How much can you do with your bomb throwing and your gun stealing? But with us—"

"Get on with it," said Ryan.

Kuhel frowned. "You're for it?"

Hubie laughed. "You're talking to Conn Ryan, man. His father went down in Easter Week. And there were Ryans with Emmet and Wolfe Tone."

"Before that," said Timmy. "Before that. There were Ryans with Shane O'Neill in Elizabeth's time."

"Sure," said Ryan. "All the lost causes. We're thick."

"Look," said the lieutenant. "I'm not asking you to do anything but hold a bridgehead for us. There. In Ulster. Just till we get troops landed."

"And how will you do that?"

"Quick and quiet. The whole submarine fleet carrying a special division. Putting into that northwest coast. The I.R.A. to cover the landing—and take care of any arteries leading toward us."

"But the south—" began Timmy.

The lieutenant interrupted: "The south is where they expect us. The leader is too smart for that."

"You can get through the British navy?" O'Malley spoke for the first time.

"Leave that to us. It's a good plan. And there'll be planes, too. As soon as we've a base established. We'll roll the English to the Irish Sea. To their back gate."

RYAN looked at the lieutenant. "It's Roger Casement's plan magnified. And seventy times as daft. You don't know this country. Every old woman would have the whole thing in gossip before your submarines were out of the water. And what would DeValera be doing? And the English?"

"Wait." Lieutenant Kuhel was calm. "Wait. We've figured that. We could race them to the Shannon. And keep them back with planes."

"It's a fine gift you bring us," said Ryan, with bitterness. "Bombers in the Shannon Valley. Germans in the north, and the English in the south. A fine gift."

"I bring you a free Ireland," said the officer. "And the smashing of England. They told in the old tales that Irishmen would fight for that." Kuhel sneered. "That was long ago."

"Not so long ago," said Hubie. His voice was cold. "Not so long."

"Well, then?" the German said. "Well, then?"

"Hell!" said Hubie. "What have we got to lose?"

"It would put the fear of God in them anyway," said O'Malley.

Timmy pounded the floor with his big fist. "It would that. Win or lose."

They were all looking up at Ryan, and they didn't see the flicker of triumph in the lieutenant's eyes. Ryan saw it. You've got them, he thought. Got them because it's so crazy, and so big. Make big dreams for the Irish always, and wild plans. And these men of mine are hunted, tired. They're drunk now with the thought of being out in the open again, driving men in front of them.

"Put a name to it, Conn," said Timmy.

"Yes," said the lieutenant. "Put a name to it, Ryan."

"Maybe," said Ryan. I could put a name to you, Herr Lieutenant, he was thinking, with your special division by submarine. You're likely to leave us all cut off there in Donegal. A lot you or your leader cares if this succeeds or not. Even alone the organization would

frighten England. And that's your ace, and you know it. Most of us would sell our souls to give on uneasy night to the English and a tight-lipped man in Dublin. "Maybe," he said, again.

Hubie said: "Malone's hiding in Donegal now. And there's fifty guns will come out of holes when I take this down to Dublin."

"Whist!" said Timmy, and blew out the candle.

Ryan heard the drumming of the horse a heartbeat later. Then, he was on his feet, rifle in hand, and backing toward the loose plank in the rear wall. He heard the lieutenant's rifle scrape along the bench. The others were just dark shapes, motionless in the gloom.

They waited. The galloping came closer.

"All right," said Timmy. "All right. That's Finn McCool."

"Who?" The German's voice was sharp.

Hubie laughed. "The horse. That's his name. Finn McCool."

"And all horse, that one," said O'Malley, relighting the candle.

"You're sure it—"

"Timmy never misses, Lieutenant." Ryan put his rifle back in the corner. He looked at Timmy. "How did *he* know we were here?"

Franz Kuhel looked bewildered. "The horse?" He straightened stiffly when they all laughed.

"The rider," said Ryan. "That's Father Nolan's horse. No one else ever rides him."

"A priest? You let a priest come here?"

"Let?" Timmy chuckled. "Let's a small word for Father Nolan."

The horse had stopped running. They could hear the murmur of voices.

"I don't understand," said Kuhel. "Are the clergy with you?"

Ryan's smile was bitter. "No fear. I'm one who likes the clergy to keep to their side of the altar rail, myself. But Nolan's from Timmy's parish. Local. Timmy—how did he know?"

"Don't look at me," said Timmy. "There ain't much he don't know."

A BOARD snapped in the wrecked end of the barn. A man came toward them out of the shadows. "Greetings, Conn Ryan," said a soft voice.

Ryan spoke harshly: "Coyne let you by? The—"

"Any fault is mine, Conn Ryan," said the priest.

Ryan looked at him. Father Nolan was a small man, slender. His face was broad, high-cheeked, with a hook of a nose that was twisted to one side. He wore a black suit, the trousers tucked into riding boots, and carried his derby in one thin hand. In the candlelight Father Nolan's hair was mixed red and gray, like steel gone rusty. But the blue eyes in their nests of wrinkles were as cold as Ryan's own.

"I've business here, Conn Ryan," said Father Nolan.

"And I," said Ryan.

"Mine's the more important. I've come for Timothy." Father Nolan smiled at Timmy. "It's your wife, son."

"Norah?" said Timmy. "Bad, Father?"

The priest's smile was tender. "I've anointed her, lad. But she wants you. Your place is there, Timothy." He looked at Ryan.

"Of course," said Ryan. This was priest's business and Ryan used a friendly tone. He put a hand on Timmy's shoulder. "She'll be all right, Timmy. Once you're there."

Timmy's fingers plucked at the safety pin in his shawl. "I'll—I'll meet you in Ballymoran."

Hubie said: "You'll get him through safely, Father?"

Father Nolan nodded. "Finn McCool can carry us both. They won't catch Timothy." He looked about the barn; his glance held the lieutenant's for a moment. "Though I wish St. Patrick would find better work for all of you."

"I'm ready," said Timmy.

"A word, Conn Ryan," said the priest. He inclined his head toward Lieutenant Kuhel, but his eyes held Ryan's. "A word. We brought invaders in once to settle a private fight. And we've been centuries since trying to get them out. Think of that, Conn Ryan." He sighed for Timmy to proceed him, and they turned to go out.

"Wait," commanded the lieutenant.

Father Nolan stopped. Ryan saw Hubie reach down and take the submachine gun up into his lap. Hubie's face was blank. He smells trouble, thought Ryan, suddenly wary.

"Yes?" asked Father Nolan.

But the German looked at Ryan. "You're letting him go?"

"Why not?"

O'Malley scowled, puzzled. Timmy, his head lowered, was gazing at the floor. Father Nolan watched the lieutenant and waited.

"He knows why I'm here," said Kuhel.

"And who you're from," said Father Nolan quietly.

"How?"

The priest smiled. He shrugged. "A little bird told me."

Kuhel brought the automatic rifle level at his hip, putting the butt firmly on the wall behind him. "I do not like this," he said.

"Nor I," said Hubie. The candlelight made his glance at the priest very bright and hard.

FRANZ KUHEL looked across at Hubie and said something in Spanish. Hubie answered in the same language.

"Stop that," said Ryan, angry. "Talk English." They both fought in Spain, he thought. A priest's life was cheap in that war. "This isn't Spain," he said to Hubie.

Hubie stared back, unblinking. He sat cross-legged on the floor, but the hands on the machine gun were properly placed and steady.

"War is war," said Kuhel. "And the priest is not with you."

Father Nolan said: "No. I am not."

The German nodded. "I do not trust the clergy when they are not with you. In my country they stay in the pulpit. Or we put them where they are safe."

"I have heard of that," said Father Nolan. "But the man's wife is dying and needs him."

"That's right," said Ryan. "I'm not one to lick the doorknobs off the church either. But he's here on priest's business. That makes a difference." He

Bashful Brenda

Continued from page 13

agreed. They suggested a scene from The Perfect Specimen. She turned it down scornfully because she would have nothing to do with light comedy. They suggested Golden Boy. That was all right. On the morning of the day she was to make the test, she was offered a role in the Federal Theater production of Bernard Shaw's On the Rocks. She called up MacMullin.

"That test is off," she said loftily. "I'm being an actress again."

Being a gentleman, MacMullin refrained from going around and braining her but it was plain that his patience was tried. During the run of On the Rocks, she made two screen tests for M-G-M, one for Paramount and one for 20th Century-Fox. Informed of this, MacMullin got on the job again and Warners' made an offer.

"That's when I really made a dope of myself," says Brenda. "I sent a lawyer around to make exorbitant demands. I figured they'd either laugh or think I was worth big money. They laughed."

The Actress is Never Right

Paramount still showed interest and wanted some still photographs of her in a bathing suit. They turned out badly. Brenda insisted with asperity that it was the photographer's fault; Paramount suggested politely that it might be hers. It was a losing battle because Paramount had the last word. She didn't like the photographer; they didn't like the legs. Let us part as friends, said Paramount, and hastily withdrew.

Then, just to show how irrational Hollywood can be, her agent took the Paramount test and the same still pictures over to Warners' and they promptly went mad and began wiring frantically to New York to get her on a plane and rush her out there. They wanted her for Espionage Agent with Joel McCrea. This was pleasing enough but when she landed in Burbank she was not thinking of Mr. McCrea and her future career. She was still mad at Paramount.

"Get me a photographer," she cried. "Get me a bathing suit." The press-department boys could scarcely believe their ears because most new arrivals are coy about their attractions and prefer to speak of their Art. They had her swinging from the steps of a swimming pool almost before one could say Edward Everett Horton. "Um-m, not bad," they murmured sagely, when the negatives were developed.

This took away the memory of the Paramount insult and she threw herself into her screen career with ardor, but that was the last independent gesture she enjoyed in some time. Acting upon the old Warners' principle that those who can't swim deserve to drown, they shot Espionage Agent, wrung her hand with gratitude when it was finished, and then hurled her into the arms of the magnificent Errol Flynn in The Sea Hawk.

The speed of all this was not good for her and things were not bettered by the fact that her first shot with Flynn was to be a love scene. To make it worse she was confined with the great man in a horse-drawn coach, with no chance to move around and nothing to do but act like one filled to the ear lobes with amorous affection. As a wife and mother (the little one had been born in Peterboro three years before), that should have been easy for her, but Flynn was obviously not one to be taken lightly. He looked at her possessively. He gave her an ogle whic ing less than an All-Am She cringed and trembled. shake.

"You know what?" said ently. "You're the second I ever knew."

"Wh-o-o-o is the f-f-firs aged to stammer.

"I am," cried the big, jo a big, jolly laugh, and ev dandy thereafter.

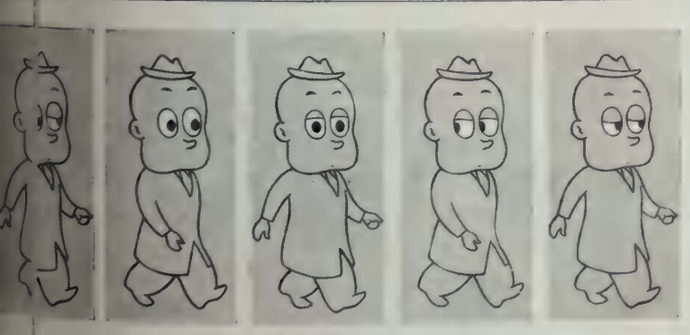
"...atura...y, I pretended not to know ...Brow... and he looked past me as ...gh h... as not in the world. Link was ...ng t... Dr. Stone when they came ...of th... house, and when they got in ...car ... kept right on talking. He talked about nothing but Abraham Lincoln. I believe he had memorized everything that had ever been written about the martyred President, and was practicing at putting it into epic poetry form. By the time we got to Gary, Indiana, he was reshaping some of Walt Whitman's lines to make them fit his own idea of poetry, and I began to see what my boss meant when he said some of the boys thought J. Leonard Brownlye needed taking down a few pegs.

The boss' camp is not really a camp. It is more a rustic mansion with all the conveniences of the city. But I understand it was once a camp during prohibition days, when my boss used it for a storage place for whisky that he hauled from Canada. But when prohibition ended and my boss took up other interests such as traveling about and meeting intellectual people, he got sentimental about the place. He had logs hauled in over the dunes and built around the sheet-iron storeroom and then took the sheet-iron walls down and made a real attractive place of it.

Things went about as my boss had planned. We almost got stuck in the snow three or four times before we finally got to the camp but we made it. I was turning on the automatic oil heater switch and building a fire in the big fireplace while the boss opened up the whisky, and nobody suffered from the cold. Then I broiled the steaks and made a sort of stew out of the shrimp and tomato paste, and French fried some potatoes and set the table. But before I poured that sauce over that fine steak, I trimmed me a good-sized piece from the short side of the bone, and then I served dinner.

DURING dinner, I noticed that the wind had died down and it began snowing in huge wet flakes. While I was cleaning up the dishes, J. Leonard Brownlye finished his interpretation of Dr. Barton's attitude toward Lincoln and came in the kitchen pretending to get a drink of water.

"How am I doin', Book?" Link said.



"Okay," I said.

"It's one way to live," Link said. "And I really am doing a great epic poem on the life of Lincoln. Our Deliverer has never been interpreted—"

I put my finger to my mouth and said, "Shh," and nodded my head toward the room where my boss and his guests were. Link stopped talking and nodded his head. Then he whispered, "I just didn't want you to think I was a phony."

When he went back to the living room I almost wished I had told him about the trick they were going to play on him but it was no business of mine, no more than it was any of my business that he was a phony intellectual living on the sympathy and ignorance of other people.

When I finished up in the kitchen, my

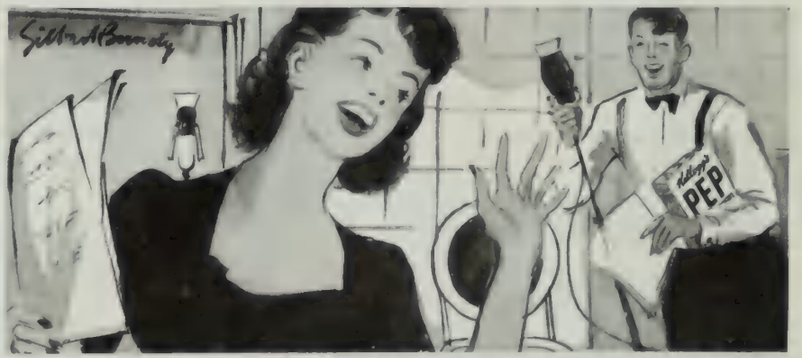
CROCKETT JOHNSON

How's your "Pep Appeal"? —by Bundy

Radio Director: No! No! You're going on the air for PEP! Where's that old "oomph" —you know—that zip-zip, that "pep appeal."



Radio Director: Now! Now! Don't feel so bad about it. I know you can rock 'em when you're feeling right. And—say!—that reminds me. Why don't we take time out to *try* a little KELLOGG'S PEP?

Radio Director: Here in the script it says that none of us can have pep without getting all his vitamins. And right in this crisp, toasted wheat-flake cereal KELLOGG'S PEP are extra-rich sources of two of the most important vitamins, B_1 and D.

The Singer: Hey! Hold on a minute! This is the best doggone cereal I've tasted in a month of Sundays. Zowie! What a flavor! Why haven't I known about *this* before?

The Singer: Hot diggety! If getting all my vitamins can be as much fun as eating PEP, just watch me! Before long I'll become the pep girl of the air.

Radio Director: Atta girl! Where there's pep there's hope!

Vitamins for pep! Kellogg's Pep for vitamins!

Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

MADE BY KELLOGG'S IN BATTLE CREEK

COPYRIGHT, 1941, BY KELLOGG COMPANY

boss made me come into the living room. "This discussion will improve your mind," my boss said. "The subject is Abraham Lincoln. You know who he is?"

"I heard his name spoke," I said.

Everybody laughed. They already were getting pretty high. "Abraham Lincoln set you colored people free," my boss said.

"It must have been before my time," I said, and they laughed at that, too.

"He's the best cook in the country," my boss said. "But outside of cooking, he hasn't got a brain in his head. Have a drink, George."

I took a stiff drink and sat back down. Then Link opened up on me. About Lincoln. He was feeling the liquor, some, and his tongue didn't really need much oiling anyway. He spouted facts and dates for a while. My boss took three stiff drinks during that time. Professor Hobson sat and dozed and Dr. Stone twirled his thumbs and watched me. Out of the corner of my eye I could see he thought I was a laboratory specimen.

It may have been that drink I took or the drinks Link had taken, or it may have been something else. I don't know and it is not any of my business, but all at once J. Leonard Brownlye—old Link Brown, I mean—stopped spouting and began talking. Beautifully. He was saying something but I have no idea what he was saying. Maybe he was just making sounds instead of saying words. I don't know.

ALL at once there came a sharp rap-rap-rap on the front door. That pulled us all back to reality. After a minute, Link said, "I thought I heard somebody knocking at the door."

"I didn't hear anybody," my boss said. "Did any of you gentlemen hear?"

Dr. Stone shook his head. Professor Hobson didn't say anything.

"Did you hear anybody at the door, George?" my boss said.

"I wasn't listening," I said.

The knock came again, three more sharp raps, no louder or fainter than the first time.

"There it is again," Link said. "Didn't you hear it?" He looked right at me and I had to say something. One thing I won't do is lie. But on the other hand I get eighty dollars a month and keep, for doing practically nothing, so long as I please my boss. And as Link said to me out in the kitchen, it is one way to live.

So I turned to my boss. "Do you want me to open the door, sir?" I said.

My boss shook his head. "Never mind, George," he said. "It must have been the wind he heard."

I sat and stared at the floor. In a few minutes the knocks came again exactly the same as before. "I know damned well I heard somebody knocking," Link said.

"You're drunk," my boss said.

"Do you mind if I open the door, anyway?" Link said.

"Go to it," my boss said.

Link opened the door. There was no wind and the snow was falling straight down in great, big, soft wet flakes.

The man was there, all right. He stood framed in the doorway against the snow-night background. He looked exactly like the pictures I have seen of Abraham Lincoln.

When the man spoke his voice was high-pitched and slow and soft, just like all the books said Lincoln's voice was.

The man at the door said, "Son, don't try to make a god out of me. The Almighty is still doing pretty well." He laughed a little. "And besides, I heard an old fellow up the creek say, one time, that human beings are right noble creatures, once you get on to their fine points."

"Shut the door, Brownlye," my boss said. "Do you want to freeze everybody?"

Link shut the door and turned around. I looked at him. His skin was the color of ashes and his eyes almost bulged out of their sockets. I felt sorry for him. Dr. Stone studied him with all the coolness of a scientist. My boss winked at Professor Hobson. And then Link's eyes asked the question of each of the white men and his eyes read the answer in their faces.

When Link looked at me, I had my head turned and was studying the open fire. I can't lie, even with my eyes.

After a while, Link said, "It must have been the wind," then he sat down.

Everybody was quiet. My boss and Professor Hobson looked as ashamed as I felt, but Dr. Stone looked excited. I could tell he wanted to ask a heap of questions but he just stared at Link and didn't say anything.

Then my boss said everybody ought to go to bed and we did. It stopped snowing before I got to bed. I stood by my window and looked out while the snow thinned and finally stopped. And then I watched the clouds drift away and saw the moon come out cold and clear and still. There was no snow falling and no wind blowing when I crawled under the blankets that night.

"How long do you think she'll be able to combine marriage and a career?" JOHN GROTH

I am not used to drinking and the drink of Scotch made me feel queer and kept me awake for a while. I wasn't exactly thinking but I let things pass through my mind. Once I laughed because it seemed very funny that Link had fooled the white gentlemen. For all he knew, Link saw a ghost and when a colored man sees a ghost he is supposed to be very scared. But Link wasn't frightened. Then I wondered if Dr. Stone would write a paper explaining Link's psychological reaction. We did not study psychology at McDonogh High, but I thought I understood why Link had not been frightened. Here he was surrounded by men who wished him evil and along comes a ghost with a friendly word. A man in trouble does not get scared at anybody, flesh or spirit, who offers a friendly word.

THEN I dropped off to sleep. I did not sleep sound but whether I woke up, actually, I cannot say. I remember hearing my boss snore very loud, but I know I dreamed that; because the master bedroom and the guest rooms were over the living room in the front part of the house, and my room was over the kitchen, too far away to hear anybody snoring. I remember hearing the wind blow through the trees but whether that was real or only a dream, I don't know. I just know the wind was not blowing when I went to bed and it was not blowing when I woke up in the morning.

By the time I got the fire in the living room going again, and a few bottles of tomato juice opened, they began waking up. Everybody looked pretty sour. They drank the tomato juice before anybody spoke a word.

My boss said, "You look all tuckered out, Brownlye. Didn't you sleep well last night?"

Link shook his head. "I'm afraid I was pretty drunk," he said.

"Not at all," my boss said. "You were swell. Just oiled enough to loosen up your tongue a little." He winked at Dr. Stone. "You said you heard funny sounds, somebody knocking or something. You finally decided it was just the wind."

Link looked down at his dish of cereal. "The wind," Link said. "Yes, it was the wind."

MY BOSS looked over his shoulder at me and winked. "Did you hear the wind last night, George?" my boss said.

"The wind stopped blowing before I went to bed and it stopped snowing, too," I said.

Link looked at me like he was thinking hard. "Are you sure of that?" Link said.

"Like I said," I told Link. "I stood by my window and watched the snow thin out and stop and there was not a bit of wind."

Link studied a little more and then got to his feet, suddenly. "Wait!" Link said, and he rushed to the front door.

It did not take me long to figure out what was going on in Link's mind. If it had stopped snowing and there had been no wind blowing during the night, there ought to be tracks in the snow.

Link opened the door, and there, spread out before us, was the whitest, smoothest snow you ever saw. Not a track, not a bump in that cold white stretch that waved over the dunes. Link breathed deep and it seemed like his inside nervousness relaxed a little.

Professor Hobson got worried about it first. Naturally he had seen a man at the door and he realized what it meant when he didn't see any footprints. Actors make tracks.

"Give me a drink," Professor Hobson said.

"Hair of the dog?" my boss said, still trying to have fun.

"Don't you see, you idiot?" Professor Hobson said, pointing out the door. "There aren't any tracks!"

Dr. Stone began to get the idea. He jumped to the door to look for himself. He backed away and rubbed his hands over his eyes.

Link and my boss were the only people who ate much breakfast. My boss kept up what he thought was pleasant conversation and Link ate steady and silent but I could tell he had certain things on his mind. Profe

You Can Fly with This Team!

The "West Point of the Air" offers you the world's best aviation training — and pays you as you learn

You've seen the faces of some of these U. S. Army Flying Cadets before — under football helmets, on college gridirons. Look at them again. Keen, rugged, humorous faces — "All-American" in the truest sense of the word.

There's a place for you among these young-men-with-a-future. The U. S. Army's program of pilot training offers you an extraordinary opportunity to get the finest possible preparation for a civilian or military career in aviation.

You will earn as you learn. The Flying Cadet receives $75 a month, plus uniforms, equipment, board and lodging. Upon graduation, he is commissioned a Second Lieutenant in the U. S. Army Air Reserve, and placed on active duty with the Regular Army Air Corps with pay ranging from $205.50 to $245.50 per month.

To qualify, you must be not less than 20 and not more than 26 years of age, unmarried, sound physically. You must have completed two years of college, or pass a written examination covering equivalent work.

You can fly with this team! Your first step toward a career in the air is to apply at one of the addresses below — today!

China Sky

Continued from page 14

"What more do you need?" the boy inquired innocently, food and shelter being all he strove for.

"I have a position." Chung said haughtily. "I am a Western-educated man with many degrees. I have my friends to consider. It shames me to be so poverty-stricken that I cannot give them a feast when it is my turn or pay my share of a little pleasure."

It was true that he had a small circle of ten or eleven men, educated abroad like himself, who clung to one another and looked up to him. They lived in the old Chinese city, alien and contemptuous of it. They discussed bitterly, though always in secret, the filth and poverty and helplessness of their own people, though they had loudly denied these things before white men in foreign countries. In secret, behind the closed doors of a room in a restaurant, they even told one another that it might be better if the Japanese took China under their control and made a modern nation of the huge, shambling, old country.

"Then afterward we could take it back again," they said, and felt themselves patriots.

Still, they enjoyed certain ancient vices, as for instance, the pretty courtesans they hired for a night's feast, one to stand behind each man's chair. At such times how could Chung say that he had no money? Was he alone to endure the shame of having no one to stand behind his chair and for so mean a cause as poverty? Unfortunately, in order to add to their respect for him as a leader among them he had told his fellows that his salary was three times as large as it was, though it was good enough. As for giving up their amusements, all the young men would have felt it impossible. In these miserable times, when death threatened them daily, a few hours of amusement was all that made their lives endurable.

So, therefore, though he had no definite purpose when he came alone this morning into the room where the Japanese lay, nevertheless, certain thoughts had come into his anxious mind. This Japanese had money, even though he was a captive. He wrote checks weekly on a Shanghai bank, now in Japanese control.

"It is necessary for me to remain in the hospital," Yasuda said.

CHUNG was surprised but he did not at once answer. He had been prepared to hear that Yasuda might wish to be helped down the river to a point where the Japanese army might find him.

"The hospital can scarcely keep one of its rooms needlessly occupied in such times, I fear," Chung said. His voice was entirely colorless. He went on rearranging and rearranging his stethoscope parts while Yasuda considered this.

"Your hospital needs money, doubtless, for its good work."

"No," Chung replied in the same colorless voice, "no, we are fortunate. Doctor Thomison's father is a very rich man. And I hear that Doctor Thomison's wife is also of a rich American family."

So sure was the touch of his hands that there had not been the clink of one metal part against another. Now he closed his bag swiftly and turned to his patient.

"I congratulate you on being so nearly well, Mr. Yasuda. Today there is no reason why you cannot get up for a little while, especially if we have no raids, and go out into the sunshine."

"I have no wish to ge[t]," replied.

Chung sat down. "Th[e]," he remarked softly. He [l]ooked the door, and Yasuda caught [h]is breath.

"Lock the door," he sa[id].

Chung obeyed noiselessly.

"You are no ordinary [m]an," said abruptly.

Chung inclined his head [i]n assent.

"Therefore I will speak [t]o you as one intelligent man to a[n]other."

CHUNG did not answer. He bowed his head and gazed at Yasuda's strongly lined face with the [i]nnocent gaze of a Buddha.

"We Japanese and C[hinese] hate each other," Yasuda [s]aid. "There is no reason why [we] should be friends in spite of [wh]at myself deplore."

"I also," Chung murmured.

"Myself, I advised against [war]," said. "At the time when [it was] discussed, though I am a [soldier] the Japanese army, I said [it was] to attack the Chinese would [be to] make them our allies against [the] man."

"How wise!" Chung agreed.

"You hate white men," [Yasuda] quired with energy.

"Entirely," Chung said [quickly]. hate the white-faced mis[sionaries] had heaped favors upon [them] reproached him because [of] their religion? Would he [ever] the reluctance he felt in [his] when he asked them to [dine]. Where among those raw [young] college boys had there [been] was his equal? And yet [the] couth could find his partner not, fastidiously as he [would] pear his best. He had [seen] America sore with many [years]. The clamor of admiration [for] his country did not deceive [him]. Americans considered [themselves] perior to him, putting him [far] above the black men they [had] from African jungles to be [sold], be, the son of a civilization [four] sand years old! When he [said] all this he said with more [than] he had yet spoken.

"I do hate them, indeed."

"Good," Yasuda said. "[Then] agree with me when I say [that] common task of Japanese [and] to drive the white man out [of]

"Entirely," Chung agreed. About this he could even [speak]. This hospital, for instance, [where] people were compelled to [treat] Chinese, would be its best [proof] to see the usefulness of [the] Alone China could scarcely [drive] out the white man. But [with] them out in the name of [the] of China, the difficult [deed] done. It would then only [remain] the Chinese to drive out [each] and there would be left China [free] country. It seemed easy and [very] clear. Anything which led [to] clusion it would be his duty [to] "Japan regrets this war," [Mr.] Yasuda said. "But she [has] now except to go on. To [withdraw] out victory would be unbearable. people would be disgraced [before] world. Our honor is concerned."

"Certainly," Chung murmured.

Through the mists of [pain] the two men began to discern [each other]. Yasuda cleared his throat.

"In short," he said, "[since] here, at a price decided [by] someone in authority. [It]

ter, but containing certain
ords. To tell all the truth, I
d with a code already, pos-
se in several foreign lan-
s part of our foresightedness.

Knowing the great prestige and power of the white man in your country, we foresaw that there might be times when we might need to use, say, an English code, in order to gain at least the respect of censors. This code may be expressed in business letters. In the letters of a pupil to an old teacher, of two friends or even of two lovers. Love letters would perhaps be the least suspicious between two white people. White men and women are always writing love letters to one another, or so I am told."

"I do not doubt it," Chung agreed politely.

"But it is a pity we have only these two white people—one rich and so beyond temptation, one single-minded and so without imagination," Yasuda said and sighed. "Otherwise it would be simple. For instance, I am sure that my colleagues are daily expecting such a letter from me. We have in our employ a young White Russian, who speaks all the necessary languages, whose sole duty it is to appear as a white man of a name already arranged, Henry Brown, and receive any letters I may send, under whatever name."

"Can you not pretend a name?" Chung asked.

"You know yourself I cannot in so small a place as this," Yasuda returned. "Your post-office officials are too shrewd. They know every white person in the town. No, it must be a letter from a known person, whose servant, bringing the letter among others, would be unquestioned."

"I fear it is impossible," Chung said rising. His mind was in a ferment of excitement.

"It is too bad," Yasuda said. "I would have paid a very large sum monthly to such a person."

"How much?"

"Half as much in a month as you earn in a year."

Chung's heart leaped like a fish in a pool. Thus might all his troubles cease!

"It is unfortunate there is no one," he said.

"I will increase it—as much in a single month as you earn in a year."

Before the steady gaze of Yasuda's deep-set eyes Chung's own handsome almond-shaped eyes flickered.

"Tch! Tch! I forgot! I was supposed to scare you away!"

PIPER POINTS THE WAY TO

Your Pilot "Ticket"

AND AN AIRPLANE OF YOUR OWN!

DOWN PAYMENTS START AS LOW AS $333 EASY MONTHLY INSTALLMENTS

YOUR own airplane . . . one that you can fly easily and inexpensively. That's what Piper offers YOU this year! The planes are the same safe, easy-to-fly Piper ships which comprise more than 75% of all the planes used in the U. S. Civilian Pilot Training Program and to which the greater part of Piper Aircraft Corporation's production is pledged in the interest of national defense. You have a choice of several models—moderate in cost, dependable and economical to operate. In your own Piper airplane you can learn to fly quickly, safely and without instruction cost, for the purchaser of a new Piper plane is offered a free flying course.

FREE FLYING COURSE: Consists of eight hours of dual flight instruction by a government-licensed instructor . . . take-offs, landings, taxiing and fundamental air maneuvers. At the completion of instruction the average person is ready to solo. The Piper Dealer at your airport will gladly tell you more about the free flying course and give you a free flight demonstration . . . Piper airplanes are priced as low as $995 for the famous Piper Cub Trainer—as little as $333 down; the comfortable Piper Coupe is priced at $2395 and the three-place Piper Cruiser at only $1995. All prices are F.A.F. Lock Haven, Pennsylvania, U. S. A.

FREE FOLDER: An attractive folder, showing the new Piper airplanes and giving complete specifications, will be gladly sent you *free* on request, together with details of the free flying course and the name of your Piper Dealer. Piper Aircraft Corporation, Dept. R21, Lock Haven, Pa., U. S. A.

Tune in "Wings of Destiny" NBC Every Friday 10 P.M. E. S. T.)
Continental "65" Piper Cub Given Away Each Week

FLYING FACTS YOU SHOULD KNOW

You get as much as 25 miles to a gallon of gasoline in a Piper plane!

One light-plane engine in a Piper airplane can continuously in flight for 726 hours, or more than 60,000 miles!

Grandfathers of 65 and children as young as eight years have mastered the flying of Piper airplanes!

You learn to fly *in the plane . . . at the controls . . .* right from the start!

You require only 35 solo hours to be eligible to apply for a private pilot's certificate!

Any small field or haylot is a landing field for a Piper airplane!

Light-plane engines require no servicing for periods as long as 500 hours or 40,000 to 50,000 miles!

Anyone sixteen years of age or above in normal health and with normal judgment can learn to fly!

More of today's pilots learned to fly in Piper airplanes than in any other make!

You use fewer controls to guide a light plane in flight than you do to drive your car!

For as little as $13.32 each, 25 persons can buy a Piper airplane and form a flying club, and dues of only $2.67 per month per person will pay for the ship!

PIPER OUTSELLS ALL OTHER LIGHT PLANES COMBINED!

NATURE'S PROTECTIVE BLENDING PROTECTS THE CINNAMON BEAR

LEFT: In her tangle of timber, the Cinnamon Bear relies on Nature's Protective Blending to elude her enemies. Her heavy coat, ranging from rich chestnut to very light tans, blends perfectly with foliage and fallen boughs.

RIGHT: She's too wary to take chances in the open like this. Keen-eyed hunters, as well as grizzlies and cougars, would spot her instantly. First hint of danger, she stands stock-still in cover, hidden by Nature's Protective Blending.

CALVERT'S PROTECTIVE BLENDING makes possible the most highly refined form of Whiskey

JACK: The Cinnamon Bear is a perfect example of Nature's Protective Blending. Here is Mother Nature at her best.

MACK: Nature's not the only one, Jack. Calvert's Protective Blending makes possible the *most highly refined form of whiskey*. Here! Taste *whiskey* at its best.

JACK: Sa-a-ay, this is *exactly* what I been looking for—a whiskey that rea *tastes good!* Your own discovery?

MACK: Wish I could say so. But millio of other people have "discovered" Calvert is America's best-tasting wh key—any way you take it!

First to f Siu-mei, and then he would the possibility shaping in his normous possibility, but it g into the form of a small, erican woman, whose terror had moved him to contempt. He had not told Yasuda of Louise Thomison. But he had thought of her instantly. She could be tempted.

The door opened and Siu-mei came in.

"You sent for me?" she asked. Under her pale, golden skin a deep rose color crept up from the high collar of her long Chinese robe of dark green brocade. She was dressed to go out. She was off duty for the afternoon, and the messenger coolie had caught her as she was leaving her room next to Sara's. Her beauty and his own excitement made Chung hot, and a faint sweat broke out on his smooth upper lip.

"I wanted to show you these X-rays," he said. He picked up the photographs from his desk. Then he flung them down again. "Why do I pretend? I sent for you for one purpose."

Often enough he had seen upon American picture screens the approach of man and woman as lovers. But something in her kept him from that approach, the lovely dignity of a Chinese woman. He stood before her, not touching her.

"I wish to ask you—to invite you—to be my wife."

Her pretty face was all a rose now, but her eyes were brave.

"I—I thank you," she said, "but I—my family—I must speak with my father."

He interrupted her: "Naturally, but tell me first if you yourself can so consider me. You and I are what are called 'new' people. We are modern. Let us decide for ourselves."

She longed to say to him at once that she loved him. She knew she loved him, but she could not speak. The reserve of generations of separation between men and women still made a wall around her. She could not break it down alone to step outside. And he did not help her enough. The handsome face that she had come to look upon as the ideal face of a man, now that it was near, was suddenly remote in the very changelessness of its bland beauty. Her love shrank back.

"Let me think of it for a day," she said. "Let me tell you tomorrow."

His eyes flickered. "Tonight," he said. "Come, let us compromise. The night is hours away. I shall not sleep if you leave me uncertain."

Her heart yielded to his smile. "Tonight, then," she promised, and shut the door between them quickly.

And he, left alone, rubbed his soft, supple hands together. Then he looked at his watch. It was nearly three o'clock. Dr. Thomison would most certainly not be at home at this hour. His wife would be alone. He went to a mirror that hung on the wall of his office and examined his face, smiled and looked grave. He took a small, bright green comb out of his pocket and parted his hair freshly and combed it down smoothly and straightened his collar. Then he strolled out of the hospital door into the still sunshine of the autumn afternoon and sauntered toward the bungalow, stopping once or twice to admire a particularly fine chrysanthemum in the flower border that ran along the bottom of the compound wall. He glanced at the sky. For once he would not mind an air raid. An air raid might help him. Since it did not come this morning it was quite likely to come this afternoon. It would be a pleasant thing if in a raid the hospital could be an island of peace.

"A noble thing," he murmured, "very fine for the patients."

He went lightly up the stone steps of Gray's house and knocked at the door.

SIU-MEI, swaying gracefully in her ricksha to the curve of the cobbled street, gazed about her. Once a week on her day off duty at the hospital she passed along this street and each time it looked different. Certain homes and shops were gone, each time, but others were being built, some solidly of brick again as though the war were over, some of makeshift mats and bamboos. This week the changes were greater than ever. The raiding had been heavy. She was lucky to be going home instead of spending hours in the shelter. If she had had to take her secret into that long, dim quiet today she could not have borne it. She wanted to get out into air and sunshine. She wanted above all to talk with her father.

"Every seven days Chen-li is a new city," she said to her ricksha coolie. She knew him well. For years he had kept his ricksha at the stand in front of the hospital.

He laughed and wiped his face on the end of the strip of blue cotton cloth that hung over his shoulder.

"Yes, but the city is still here," he answered. "Our children and our grandchildren are still being born."

"Are you lucky?" she inquired.

"I had a grandson yesterday," he replied, as though he had given birth to it himself.

"And you did not send your daughter-in-law to the hospital to have the child properly born!" Siu-mei cried at him.

The old coolie did not stop trotting. He flung another laugh over his shoulder.

"That son's wife of mine—she drops them like eggs!" he shouted.

They both laughed at that and by now they were at the end of the long street and he let down the shafts of the ricksha with a flourish between two stone lions on either side of the big black wooden gate studded with heavy brass nails set in a pattern upon its two leaves. It was the gate of her father's house. Siu-mei stepped down and paid him and added the copper coins he expected;

"It's a very important message—he's putting it in italics"

How we answered our

Questions about Home Ownership

For years we'd wanted a home of our own. But we couldn't answer many questions. Because we weren't sure about so much, we were afraid to act.

Then we sent for "*How to Have the Home You Want.*" *It answered our questions.* It showed us why a home was a good investment for us. It helped us avoid mistakes; it helped us save money. *Its sound advice has been worth many dollars to us.*

From its pages we were able to decide whether building or buying was better for us. We learned the function of architect, builder and dealer. We learned about property restrictions, contracts, lien laws, and other details.

Over 200,000 Families Have Already Helped Themselves by Reading This Book . . . What do *you* want to know about building or buying a home? Understand home mortgages and home financing, plumbing and heating equipment, fire protection, insulation. Learn how to plan living rooms — get tips on decoration. For only 10c you may have these *120* pages of valuable information.

"*How to Have the Home You Want*" is published by the United States Gypsum Company—for 40 years a maker of better, safer, more economical building materials.

MAIL THIS COUPON FOR YOUR COPY OF THIS BOOK

BURLINGAME

Why JUDSON MISSED THE 8:15

"This coffee's cold. This orange juice isn't. For Pete's sake, where's the toast? Burnt again, I suppose.... Say, what's that gadget?"

"John Judson, be quiet! I'm not making toast in the oven any more—I'm a free woman! How do you like your Toastmaster toast?"

"Not bad, not bad. I mean... best I ever tasted. What's in those little covered dinguses? Jam or marmalade? That's what I call service, darling."

"Good grief, I've missed the 8:15! What of it—what of it? Toast like this...feel like celebrating, for a change! Could I have another slice?"

HERE'S a happy combination that we dedicate to wives who think breakfast should be a peace-feast—not a scramble. The *Toastmaster* DeLuxe Toast 'n Jam Set—with its rich-grained walnut tray, gay-hued Franciscan Ware jam jars and toast plate... and that friend of mankind, the *Toastmaster* automatic toaster!

You know how it works. Just drop in the bread, press down the lever, and relax. The patented Flexible Timer takes complete charge...tick, tick, tick...then up pop the piping-hot slices, toasted to your liking. No watching, turning, or burning!

The complete set, $17.95; toaster alone, $16.00. See them, and other *Toastmaster** products ($7.50 to $23.95), wherever fine appliances are sold. And ask your dealer (or write McGraw Electric Co., Dept. B, Elgin, Ill.) for your copy of "Entertaining Hints on How to Entertain," by Henrietta Ripperger.

then she pushed open the gate. Nowhere in the world did she feel the peace and security she felt always when she stepped into these courts. Even the war had not disturbed them. By chance the huge house of many courtyards lay at the foot of a hill, and her father had built a deep shelter far into the bowels of it. He had lined it with brick and furnished it comfortably and bought a foreign oil stove to burn against dampness. Here the whole enormous family of sons and daughters and their wives and children and the servants went always at the instant when the last air warning sounded.

A servant saw Siu-mei and cried, "Shall I tell the mistress of your coming, little mistress?"

"No." Siu-mei replied, "I will go myself to my parents. Where are they?"

"In their own court," the servant replied. But she hurried off for fresh tea.

THROUGH three courtyards Siu-mei walked, nodding here and there to someone working. It was very quiet. Her family was sleeping after last night's long raid. Well, if her father was sleeping he must wake at what she had to tell.

She stepped over the high threshold of a round gate and into her parents' own living place. It was very still. The afternoon sunshine drifted down through bamboo upon the square tiles of the court. In the corner, beds of chrysanthemums blazed and a pool, shaped as a flower, was set in the middle of it. The water was blue under the sky and shot with the flashing gold of small fish. She crossed the court and saw her father in a long bamboo chair, reading, his white beard on his bosom.

"Father," she said gently, not to startle him.

"Eh!" He looked up and put down his paper. "You are late."

"I was delayed a few moments at the hospital." She sat down on the edge of a chair. She greatly loved her father. When she was three years old, at a time when girls' feet were still being bound he had not allowed his old-fashioned mother to bind hers, and at a time when it was considered strange to educate girls he had sent her to school with her brothers. He was a man independent of times. She was glad now she had found him alone.

"Where is my mother?" she asked.

"She is asleep, but she wished to be waked when you came in." He was about to clap his hands for a servant when she stopped him.

"No, wait, Father. I had rather speak to you alone. Father, you have always said you wanted me to please myself, and yet that you hoped it would please me to be a man's wife."

"Yes, I have," her father replied. "Men and women are best when they are married to each other."

"But you have never chosen me a husband."

"No, because it is one of the good things about the new times that the young may choose each other and lift this responsibility from the old. My parents agitated themselves for years over choosing your mother for me. Before they decided they asked continually, was she the right one for me? After she was my wife they continued to agitate themselves asking, now that it was too late, whether they had done well and looking with long wishes at other young women. It was I who said, 'Comfort yourselves. This one is as good as any other, and for all I shall ever know, better.'"

His beard wagged mildly while he spoke and his clear, dark eyes sparkled. She laughed. Her parents loved each other well and all the house knew it.

"I have chosen, Father," she said.

He looked instantly alarmed and sat up. "No, now, if you have ... may be another matter!"

e dr ed herself rather carefully
thin ark blue wool with a wide white collar and went into the room where her visitor waited. Then she put out her soft, narrow, little hand.

"How do you do," she said gently. She said it timidly, scarcely aware of her wish to please even a Chinese man.

He looked down into her pretty face. She was very young, he thought, and very pretty—prettier, even, than Siu-mei. The old hurt that American girls like this had once dealt him came alive. If he had been in her country she would perhaps not have put out her hand. He disliked intensely shaking hands with a man, but this little hand was pleasant.

Louise drew her hand away. His hand was very warm and the palm was damp. His grasp was at once soft and powerfully strong. She felt a little afraid of him.

"Will you sit down? My husband—"

"I know your husband is not in, Mrs. Thomison. I came to see you—on a private matter."

"Yes?" Her eyebrows lifted slightly.

He leaned toward her and she smelled a faint perfume. He was immaculately clean and his American clothes made him seem not quite Chinese.

"Mrs. Thomison, I will be frank with you if I may be sure I can speak to you in confidence—in absolute confidence."

"You mean—not tell my husband?"

AT THE keyhole Siao Fah's small black eyes noted the lean of the man's body, the startled interest on the woman's face.

"Now he says something to her in that foreign tongue which he should not," he thought with great satisfaction.

"I cannot speak otherwise," Chung said.

Louise drew back. Was this the Oriental intrigue which she had seen in so many stories and pictures? She began to stammer:

"I don't think—I couldn't, I'm afraid."

"It will save many lives," he said, "many, many lives."

This, he saw at once, was the wrong thing. Her face did not soften.

"You are so frightened," he said gently. He had a voice that he could

Your Guarantee of "Like-New" Performance

WHEN YOUR CAR NEEDS REPAIRS GO WHERE ORIGINAL FACTORY PARTS ARE ALWAYS USED

YOU'LL save money and get top performance from your car by following this simple rule: Always go to an authorized service station for repair work, a motor check-up or tune-up. This is particularly important in having repairs made on electrical units, the car's vital "nervous system." The Auto-Lite sign is your assurance that only original factory parts will be used in your car. It also guarantees expert workmanship and a fair price.

Auto-Lite service men are trained specialists in this field. They carry a stock of original Auto-Lite service parts.

shape to the tones of music. "This life is too hard for you."

Ah, now he was right. Her lips quivered. He went on:

"Let us forget what I came to say, Mrs. Thomison. Do you know you are not looking well? You stay in the house too much, but who can blame you?"

At the keyhole Siao Fah pursed his underlip. Ah, if only he understood English! And yet who needed to understand the words between a man and woman who looked like this?

"I—it's just I'm not used to—to—everything," Louise said faintly. This morning in a letter to her mother she had said, "The only real understanding word I have had has been from a Japanese—of course I can't say such a thing even to Gray, but the truth is I think I'd like them."

"Of course not," Chung said pityingly. "I have lived for years in America. I know everything that shocks you—the poverty, the dirty streets, the lack of ordinary conveniences in your home, the beggars."

"It is wonderful of you to understand," Louise murmured gratefully.

"I do understand—and I do not blame. And on top of all else, these fearful raids. But they at least could be prevented. At least your life could be safe," Chung said earnestly.

"How?" She was not afraid of him now.

"This Japanese gentleman in the hospital—Mr. Yasuda—if he could get word through to the Japanese army that he was here, their planes would not bomb the hospital. Of course they do not know he is here."

"Then—why doesn't he just tell them, a telegram or something?"

"Our censorship is very strict," Dr. Chung said. "Every telegram, every letter to the enemy is blocked. But you could help, Mrs. Thomison."

"How could I?"

"If your name were signed to a letter, a short, ordinary letter about something else, an American name, and Dr. Thomison is very well known here. Of course I do not ask you to sign his name—only your own. It might be you would have to sign a letter or two every week, merely to let them know Mr. Yasuda is still here. Then the hospital would be safe—your husband, yourself—"

He watched her closely.

"But why shouldn't my husband do it?" she asked.

Chung shook his head. "Dr. Thomison is so generous toward my people. He hates all Japanese. B you and I, that not all Japar even if they are our enemi suda is a gentleman and a

s own ourse.
"All board, my son!" He spoke
oftly. Where do we go from here?"
The y's voice came back exultantly:
"Due outh, sir—to Dunkirk."

DESMOND calculated in silence. Dunkirk rom where they lay, must be about irty miles. On this glassy sea ezebel ould make it by daybreak—if e pus d her to it. But he wasn't go-ng to . He had his own plans.
Pete was talking freely now—almost gaily a o a trusted comrade. His voice, omin ut of that black smother, had the ring of high-tempered metal. It forced Desmond to listen. There were thirty thousand men, Peter told him, herded together over there, with their backs to the sea, with death raining on them from the sky and the land, fighting and waiting. He talked as though it were up to Desmond and himself to bring those thirty thousand home.

DESMOND grinned sardonically. Things like that didn't happen—outside ■ Hollywood studio. He was goaded into a snarl and heard Peter's good-natured laugh answer him:

"Oh, I don't know, sir. They used to happen—quite often—in the Bible, for instance. Take the Red Sea. I bet that gave Pharoah a jolt."

Desmond shrugged. The boy was making a fool of himself—a fine fool. The phrase repeated itself in the man's mind. It evoked a memory. In medieval days they spoke of God's Fool, meaning a man inspired by God to be different from other men. Such men were freaks who made history. There was no rhythm or reason to them—just an absurd faith.

Desmond glanced back uneasily over his shoulder. He was conscious of having lost his own secret direction—of having been caught in a tide that was running against him. And they were no longer alone. Unseen yet sensed were fellow travelers streaming with them through the darkness. Sometimes he thought he heard their voices. And suddenly a lean, black shape, monstrous as a nightmare, tore past them, churning the water to a backwash that threatened to engulf them. It took all his skill to bring the boat out of the trough and back onto an even keel. He cursed. The boy was shouting to him.

"One of our destroyers, sir!"

"Oh, damn you! Damn you!" Desmond said. But in that tumultuous moment, hanging between life and death, he had changed his course. He had swung south. "I must have gone mad too," he thought. But in fact he was sober enough now to know what he could not do. Let Peter make a fool of himself. He would have no hand in fooling him. Let the boy run himself onto the rocks of human futility.

After that he drove Jezebel in silence, watchful and tense, toward a brightening radiance that was not that of morning. He recognized it. He had seen cities in flames. When dawn came it was livid and cheerless as death. It broke on a blasted shore line, on a flat gray sea on which floated strange craft, unco-ordinated and haphazard as the survivors of a wrecked fleet. The stern of something that had been a freighter lay offshore, thrusting up out of the water like a submerged rock, and shapes that had been men floated past, grimly serene, outbound on their own.

Desmond felt for his pocket—for the half-empty bottle. His hand dropped away helplessly. He was bleakly, bitterly sober. But somewhere in the long night, that line of escape had been cut. Young Peter turned his face to him. It struck Desmond as strange that in ■ few hours young, unformed features could have been fined down to ■ man's lean, hard-bitten maturity.

In their fight the boy's glasses had been smashed and his eyes had a brave, defenseless look. Kathy's eyes had had that look. But then she had had nobility in her too—she had thought nobly of the human soul, as he had told her once, mocking her in his growing scorn of himself and of all human endeavor. He had defeated her—dragged her faith down

Where a "powder puff" could slow **DEFENSE**

IT is ticklish business at best, trundling explosives around in a powder plant. To reduce the chance of explosion from a stray spark, workmen are put in rubber-soled shoes; and rubber-tired trucks, propelled by storage batteries, carry the explosives about the plant. For this purpose many powder plants employ the safe and dependable motive power of Exide Batteries.

If plants engaged in the National Defense can entrust such a vital service to Exide Batteries, surely you can rely on Exide to start your car. But before you buy *any* battery, have your present one tested on the Exide Sure-Start Tester. This scientific instrument will reveal its true condition. The test is free—wherever you see an Exide Dealer Sign.

WAKE UP YOUR LIVER BILE— WITHOUT CALOMEL

—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pints of liquid bile onto the food you swallow every day. If this bile is not flowing freely, your food may not digest. You get constipated. You feel sour, sunk and the world looks punk.

It takes those good, old Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Take as directed. Amazing in making bile flow freely. Ask for Carter's Little Liver Pills. 10¢ and 25¢.

into the dust with his—but not, it seemed, finally. This was her son. Under that familiar, steady gaze Desmond felt something in himself that he had thought dead and buried shocked back to life.

"Peterkins!" he thought wryly. "What a mess you've made of me!"

Peter was laughing.

"Look at that old tub, sir! She's the Gypsy Belle. Used to ferry from Margate to Boulogne—ten and six return, and your lunch thrown in. Mother took me once. I was awfully seasick. I never even saw Boulogne—" He stood up, shouting and waving: "Good for you, old girl!"

The steamer lay offshore, leaning slightly to starboard like a blowsy, drunken harridan. Her decks were black with men—crazily overcrowded. If someone didn't take care, Desmond thought angrily, she'd turn turtle. A man leaning over the rail yelled to Desmond through a megaphone as he chugged past under her stern:

"There's a packet of boys on the east beach—cut off. All our boats are smashed. Maybe you could pick up a few—"

Overhead a covey of huge birds swooped and sang. One of them dived out from their midst, skimming the ship's decks, and where there had been cheering and laughing men there were unsightly, struggling heaps that screamed and then subsided slowly into silence. The plane came so close that Desmond thought he saw a white, grinning face. He yelled at Peter, "Keep down! Keep down!" But he himself, thinking suddenly of Kathy, stood up covering her son's body. Something struck him between the shoulders—a light almost negligent blow. It scarcely hurt.

"They've got me!" he thought, mildly astonished that he should have been caught a second time. But he saw that Peter had been unaware of the death that had brushed past him. His face was turned shoreward, alert and questing.

"I think I see them, sir. Over there to the left—in that little cove. We can make it—"

THERE was a brief interval of time in which Desmond stood poised on the brink of a gulf that had divided him securely from his own past. He could still turn back from this reunion. He could still escape, return to the waiting ship, climb on board (wasn't he decently and legitimately wounded?), and drink himself blind again. Tomorrow he would be safe back in his isolation, cut off finally from those heroic illusions that took men to a futile death.

"Listen, sir! They've seen us! They're shouting to us!"

Desmond scowled into the growing light, his teeth set. Yes, they were there all right. They were wading out into the water, making a chain, holding one another's hands like lost children. A plane swooped again. And the chain broke. They reformed it, patient and quiet.

Desmond saw Peter, crouched like a young panther in the bow, making ready. Kathy's son, riding no doubt to his death, with his damned and drunken father at the helm. What would Kathy have to say to him? "Have you killed him too?" What had the boy said in that first bitter encounter? "I had to tell you—what you did was great—it was worth while—it *is*—"

Belief like that—that shining faith in some far-off victory, perhaps that in itself was enough, justifying death, justifying even a mangled life. Cripes, what a fuss he'd made about *that!* About a pretty face spoiled and a twopenny-halfpenny career. Now he'd stopped one between the shoulders. He guessed it was one of those small deep wounds that didn't bleed much. It didn't hurt. He didn't feel like dying, but strangely, exultantly alive.

They were in shallow water. The first men scrambled on board without haste. Disreputable, scarecrow figures. One of them said good-naturedly, "Thanks. You've had a rough trip. You'll come back for our chums, won't you?"

"Sure," Peter said.

They made the journey between the shore and the Gypsy Belle twice. The last time they were curtly warned: "We've got a hole in us the size of a house. We may not be able to wait for you. Maybe you'd better come on board—"

"You can go to hell," Desmond yelled back.

He swung shoreward. For a second time he knew that there were tears in his son's eyes.

"Well played, sir—well played!"

They had left five men waiting for them. Now only one was left. He knelt at the water's edge, in the midst of his quiet friends, his arms limp at his sides, his head bowed in an attitude of resignation. A machine-gun section must have crept up on their flank. Desmond recognized that malignant chatter. The water in front of the kneeling man kicked up in little jets of spray. The boat's keel grated against the shore and Desmond lurched over to Peter's side and held him again.

"My turn, Peterkin!" he said.

The boy looked up at him, grinning. "Fair enough. Carry on, sir!"

Lifting the wounded man brought something hot and sticky and bitter-tasting into his mouth. He held his burden as a mother might hold a sick child. "That's all, Peterkins. The others—we can't help them now."

But Jezebel had coughed her last.

"We're out of juice, Peterkins. Got to make sail, my hearty."

Peter might be a landlubber, but he could obey orders.

Desmond turned the boat for the last time seaward. The Gypsy Belle had become a smudge melting into the summer haze. They were one among a thousand craft, beating their way home under a hail of death—white, lordly pleasure yachts from Cowes, chubby, unseaworthy rowboats in tow of motor launches, wallowing under their dangerous overload, the riffraff and the butterflies of the water front, with their sails set to catch t suddenly risen breeze. Perha all, Desmond thought grimly, a heart for His Englishmen and His good wind to blow them i In the wind he imagined that Drake's homeric laughter.

The wounded soldier lay outs at Desmond's feet. He was d uncomplainingly, his grimed, w hands clasped meekly over t wound in his breast. It was co to look down into the stranger and graying face and to feel su kinship.

Peter had stumbled over to h —you're hurt—and I didn't kn

A HANDFUL of men saved. (brought home to sleep among his people. And somethi attained—something beyond spe and the dead and the living and born had joined hands. His fut merged into significance. A years from now, in some gol they would remember of him had held his little bit of grou chain had not broken. Not with

That he would be nameless matter.

The breeze freshened. It blew ning. So strong was the joy o him that he held death off, telli how to keep his course, his vo ing a clear, authoritative ring. A the failing light he saw the w miliar cliffs come out to meet hi were no longer hostile. They w low countrymen welcoming hir and he raised himself up and l hand to them for the last time and happy salutation.

"It was ironic. He organized a home-defense unit and three weeks later his landlord evicted him"

SMOKE MEANS TROUBLE!

In smoking lamps — and "smoking" cars — there is a lesson all motorists should heed!

Whenever you see a car that smokes the chances are this is due to excessive wear. Then a costly repair job is the only sure cure.

So *before* your car becomes a smoker — help safeguard your engine from these three sources of *wear* that so often make cars smoke:

Wear due to heat: Insulated Havoline Motor Oil stands up under today's higher engine heats, which break down ordinary oils — accelerate wear.

Wear due to cold: Insulated Havoline flows freely at low temperatures, sparing your engine the grinding wear of cold starts.

Wear due to oil impurities: Insulated Havoline is *distilled* to remove carbon-forming impurities that are the allies of wear.

Steer clear of trouble before it's too late for anything but repair bills. Drive in and change to Insulated Havoline Motor Oil *now!* At Texaco and other good dealers.

DISTILLED AND INSULATED

...AGAINST HEAT ...AGAINST COLD

DON'T WAIT UNTIL IT'S TOO LATE!

Your car was never designed to "smoke." Help reduce excessive wear in *your* motor before you join America's caravan of 3,000,000 "smokers." Change *now* to distilled Insulated Havoline Motor Oil.

TEXACO DEALERS INVITE YOU TO ENJOY

easy t quit plumbing, One-Trip, or
you h e to wrench yourself away?"
ve hin snarl and dared him to come
tside a I say that again. . . .

The first piece of retiring I did consisted of a little trip to Chi. We took it slow and easy as we was breaking in the new sedan and we had a nice enough journey but it would have been nicer if we hadn't passed so many billboards on which were I and the fish. Those insurance fellows had certainly spread themselves—and me—all over the country.

We stayed in Chi just a day and a night. I went to a picture show with Doll. It was the same as the last one. Valcour kissed and dueled until it was time to marry the blonde and call it a day.

Next morning we shoved off in the sedan; but not east. We took in the Grand Canyon, and when you get that far you might as well go a little farther and see Boulder Dam and Las Vegas, and, when you get *that* far, you might as well go the whole hog and keep on till the Pacific Ocean stops you. At least that was Doll's point of view.

Next thing I knew I was walking up and down Hollywood Boulevard, and Doll was trying to get a look at some movie stars; but all we see was other folks like us doing the same thing. After a few days this sort of began to pall on yours truly.

"Doll," I remarked, "let's go home."

"One-Trip," my wife replied, "we *are* home—or very near it. Tomorrow we move to our new ranch in the San Fernando Valley. And *that's* final."

"Since when have we had a ranch in San Fernando or any other valley?" I inquired.

"Since an hour ago when I signed a lease for one," Doll informed me.

"All right," I said. "But I warn you, Doretta Phelps Darling, I'll be no use at all as a lone cowhand. I never rode a horse in my life and I have no wish, at fifty, to do so."

"This is a walnut ranch," said Doll.

We moved out to the ranch next day. On the way there I bought me a sombrero. If Doll had set her heart on living in the great open spaces, I might as well see it through, I figured.

We drove out into the country about nine miles from Hollywood, and stopped at a bungalow and Doll said, "Well, here we are."

"Where?" I asked.

"This is it," she said. "Rancho el Darling."

"It looks like what back home we'd call a big back yard with a few nut trees in it," I said.

"It is called here a junior estate," said Doll. "Now stop standing there gawking and carry in the grips."

I must say that raising walnuts is not backbreaking work. We belonged to some sort of association which planted the trees, took care of them, picked the nuts and sold them and gave us a share in the profits, if any. All we had to do is sit and watch the nuts grow. It seemed to me a rather poor way for an able-bodied man with a born talent for plumbing to spend his time; but Doll seemed so happy I didn't kick. Before we got settled in, she went to a drive-in beauty shop, and came back all frizzled and with a new paint job. She put on some blue shorts and wandered out among the walnut trees looking awful pretty and not a day over thirty-five. I could tell there was something going on inside her, but I did not have any idea what it was.

Next day she had to drive into Hollywood to open a bank account, and I stayed home and watched the walnuts grow. I went over the plumbing in the bungalow hoping it was busted so I could fix it, but it was in good shape. Doll had warned me I must keep dressed up at all times but I sneaked into the greasy old pants I clean the car in, and moped down to the back wall of the ranch, and sat there smoking my pipe, with my shoes off and my suspenders showing. A retired man has a right to have some fun.

I WAS sitting there, feeling unnecessary, and then I heard, on the other side of the wall, a tap-tap-tap. It was as sweet a sound as I ever heard. Somebody was tapping a pipe with a hammer. Up I jumped and stuck my head over the wall and there was a fellow installing a washbowl in a small workshop at the rear of the next property. He was a rough-looking fellow of about my age who needed a shave, a bath and a clean pair of pants. He looked up at me and grinned. He was sort of shy of hair and teeth.

"Hi, neighbor," he said.

"Hi, neighbor," I replied. "Excuse me, but you're trying to put that pipe in upside down. Mind if I give you a hand?"

"Glad to have you help me," he said, with another grin. "Know anything about plumbing?"

"Brother," I said, as I climbed over the wall, "I was born with a soldering-iron in my mouth."

It certainly felt good to have tools in my hand again and the smell of putty in my nose.

"Gosh," he said, as he watched me work, "I wish I had your touch."

"Amateur, ain't you?" I inquired.

"Yep," he said, with a sigh.

"Well, some of this work ain't bad for an amateur," I said, just to cheer him up.

He looked tickled.

"Gimme a fill of that tobacco you're smoking," he said. "It smells grand."

"My wife claims that when I smoke it, nice people think I'm cremating a polecat," I said.

"Nice people give me a pain somewhere," he said, and stuffed his pipe, and started to puff. "Thanks—"

"Darling's the name," I told him. "I didn't pick it out myself. Call me One-Trip like they do back home in Ashtabula."

"Shake, One-Trip," he said, and stuck out a paw like a hunk of coal. "I'm an old Ohio boy myself. Yep, Upper Sandusky. My name's Ray Johnston; but the folks in Ohio always called me Buster."

"Glad to know you, Buster," I said. "Hand me that wrench."

I did some plumbing, with Buster Johnston watching. He knew enough to appreciate the fine points. I never had a better audience.

"The folks you work for have got a mighty nice piece of property here," I remarked. "That's a swellelegant house. How many bathrooms has it got?"

"Six and a half," my neighbor said.

I gave a whistle.

"That's a lot for a residence of that

Out of every 1,000 hard-to-please pipe smokers, a high percentage won't smoke *anything* but BOND STREET once they discover it.

So we know that 123,232 pipe-smoking readers of this magazine *still* have this exciting discovery to make.

Different—genuinely aromatic—BOND STREET contains *a rare aromatic tobacco not hitherto used in a popular priced mixture.* Rich and bite-free as a custom blend. Leaves no tobacco odors in the room—*even the ladies* like the aroma. Try BOND STREET *today.*

size," I said. "Offhand, I'd say those folks are overbathroomed."

"*I'm* the folks who live there," Buster Johnston said. "I told the builder to leave space for as many bathrooms as possible. I installed the plumbing myself."

"Far be it from me to pass a remark," I said, "but does it work?"

Buster grinned a large grin.

"Nope," he said. "All of 'em get out of kilter at least once a month. Only last night I had to bail out my bedroom."

"I'll fix 'em for you, Bus," I said.

He shook his baldish head.

"I'll do it free, gratis and for nothing," I said.

"Thanks, One-Trip," he said, "but I'd rather let 'em leak. Fixing 'em is the most, if not the only, fun I have these days."

"Don't you get a kick out of your real work?" I asked.

He looked like he had a mouth full of sour caterpillars.

"Not any more," he said. "Same old stuff, day in, day out. I'd a darn' sight rather be a plumber."

"Than what?"

"Than anything," he said, plenty gruff. "So let's plumb."

We plumbed.

"You married, One-Trip?"

"Yep. Pass the putty. Are you?"

"Yep. Got a boy of twenty."

"What does he do, Bus?"

"Eats and sleeps." Bus replied. "Mind you, he's not a no-good. Just hasn't clicked yet. Ray, Junior, is handy with his hands and likes to tinker. He's got the makings of a crackerjack mechanic, and what do you think his mother is trying to make out of him? An actor!"

He made another sour face.

"Now, mind you," he went on, "I'm not knocking Margie, or the movies, or anything. The movies are all right, if you like 'em, and so are wives. But wives are women, and women just naturally are people who want a man to do something else."

JUST then from my nut grove came Doll's voice: "Oh, yooooo-hooooo, One-Trip. Come here and help me carry in the groceries."

"See what I mean about women?" remarked Bus.

A lady with a loud voice hollered from his house. "Oh, Ray—Raaaaaaay. It's nearly dinnertime, and I bet you need a bath."

"I see what you mean," I said.

Bus hollered toward his house, "Be up in a few minutes, Margie."

Then he turned to me and said, "Suppose I didn't go?"

Doll paged me some more. "Oh, One-Trip, I know you're around somewhere. I can smell that glue factory you smoke. Come out, come out, wherever you are."

"Suppose," said Bus, in a low, stubborn voice, "neither of us went! Suppose we just set here and let 'em wait till we got good and ready."

"I'm game," I whispered back.

We smoked a minute, maybe a minute and a quarter.

Then I said, "I guess I'd better go. When you got somebody to worry about you it's sort of mean to worry her. Don't you think so?"

"Glad you said it first," said Bus. "Well, guess that was about the shortest sit-down strike in history."

Doll stuck her head over the wall and saw us. "Oh, there you are, you little rascal," she said, playful enough. Then she saw Bus, and looked none too pleased. I said, "Doll, shake hands with my new pal, Buster Johnston."

She said, "Howdodo," without opening her lips.

"Glad to know you, Mrs. Darling," said Bus. His smile was polite but gummy.

I could tell Doll did not care for his looks. He could, too.

"If I'd 've known I was going to meet a lady," he said, "I'd 've worn my teeth. They're up in the house. So is my hair."

He meant it comical, so Doll smiled; but I've seen bigger, warmer smiles on frozen mice.

"So long, Bus," I said.

"Howz about coming over here tomorrow morning—'bout seven—so we can do some plumbing and gabbing before I go to the treadmill?" Bus asked.

Before I could say "Swell," Doll said, "Sorry, but I have some very important work I want my husband to do for me. It will keep him busy indefinitely. Good night."

I shrugged and followed her into the bungalow. "Say, what's the important work?" I asked. "What do you want me to do?"

"I want you *not* to hang around with that frowsy bum of an odd-job man next door," said Doll. "I don't want our new neighbors to get the idea that you prefer low company, even if you do."

"Doretta Phelps Darling," I said, and was I stern, "Mr. Johnston is, and will remain, I hope, my good friend. He is positively not a bum."

"I've got eyes," wasped back Doll. "If that dirty, disreputable-looking, toothless, bald old bum is not a bum, I never saw a bum."

"Mr. Johnston is a well-to-do gentleman with a weakness for plumbing," I retorted. "He may not be a Ramon Valcour, but he's a right guy, and I intend to go over to his house and plumb with him any time I see fit—"

"What do you mean—his house?" said Doll, in a peculiar voice. "Does *he* live there—?"

"Sure. Him and his wife and his son."

"Oh, dear, oh, dear, oh, dear, oh, dear," said Doll in a sort of long moan. "Oh, dear."

"What ails you?" I asked.

"I should 've known him by his eyes," she said.

"Who?" I asked.

"Ramon Valcour."

"Now what in the hell has that pantywaist got to do with Buster Johnston?" I asked.

"He *is* Buster Johnston," said my wife. "Oh, dear, oh, dear, oh, dear."

"That," I said, "is a slander, a libel and a lie."

"I wish it was," said Doll, "but it's true. I know for a fact that that is Ramon Valcour's residence. The real-estate man showed it to me on the map.

"Ah-ha," I cried. "So you inviggled me all the way out here to this nut ranch just so you could mee

"One-Trip," said Doll, ried to a silly, simple-mi town goose—I'm awful sor

"Don't be, baby," I sai one who ought to apologiz all wrong. Why, he's regul folks, like us."

Doll didn't say anythin spell. Then she said:

"Maybe I haven't a lot o Trip, but I've got a lot knew what she meant so and snuggled her to me ar and said, "*I've* got a lot of most of it is sitting right knee this very minute."

Pretty soon she said, "W getting your supper ready, "What are we having?" "Ham" and we both enjo laugh.

Next morning I went plumbed some with Buster. was he really Valcour and a snarl, "Yeah. Want to thing out of it?" I said I di laid off the subject.

We had a lot of fun, work Bus and me, and then, af weeks, one night, at suppe "You homesick, One-Trip?

"Sure. Sometimes," I re not as much as formerly. A you can't expect me to get and the old shop out of my couple or three months—"

"We *did* have fun in Ash Doll, and she hove a sigh.

"Now don't sigh for me," be hunky-dory."

"But you wouldn't *mind* would you?" Doll asked.

"Great Caesar's goats, d to, Doll?" I exclaimed in surprise. "I thought living a certain party tickled you

"I'm not ticklish any more

STRANGER in Ashtabul Mister? Well, if it's pl want, you're in the right sho back at the old stand an happy as a pup with a slip junior partner now. He's green, but learning fast. Swift proficiency is the idea in Fritz Loosli's unorthodox ski instruction: his pupils ski from the start. Here he demonstrates a knee bend

Ski UPSET

By Bill Kno

Here's good news for ski novices—Fritz Loosli will teach you the sport in half the time. You may never be a champ but you'll have fun trying

THE stocky Swiss at the foot of the big slope watched with a poker face that deceived no one. As the last novice sped down at maybe thirty miles an hour, slid around in a Christiania and stopped, still standing, he nodded his bulldog head. In ten days, more or less, he had scientifically demonstrated that the revolution in ski learning was an accomplished fact.

Less than a week before, Fritz Loosli had watched his cheerful guinea pigs on the nursery slope. They had been going downhill a little faster each time, bobbing up and down, sliding first one ski ahead, then the other, shifting weight rhythmically from side to side. In the fifth lesson he broke all the rules and gave them the Christiania.

At this crucial point in his experiment, he prompted his assistant in a hoarse stage whisper: "Not showy, please. Dey lose hope ven you do it too perfect. Discreet, modest simplicity—dot's de way."

And the aide obediently glided down the baby incline, skidding at the bottom into a discreet and modest Christie. It looked easy, so easy that one after another the pupils followed him down. Nine out of ten got it on the first try.

This was unheard-of on the American slopes, teaching the Christie to novices who had never learned the snowplow. A high-speed turn, the Christie is a deliberate skid, done with a shift of weight and a swing of the body—what you see the experts do when they turn or stop in a swirl of snow.

But in this part of the world the favorite teaching system up to now has been the slow-speed Arlberg method, and the snowplow—the stop—is the A of its ABC. Toes together, the ski tails forced wide apart, your skis form a V like the cowcatcher on a prestreamlined locomotive—whereby you slow up and, if you want to, halt.

The snowplow is one of the fundamentals that Hannes Schneider, the grand old man of skiing, evolved at St. Anton am Arlberg when he had thousands of green Austrian ski troops to train for the first World War. He lowered their center of gravity by putting them into a deep crouch, taught them to stop or brake with the snowplow, and gave them the stem turn, a slow-speed turn in which the outside ski is pushed the way you want to go and the other drags after it. That way he got them and their sixty pounds of soldier stuff from Alp to Alp without falling down and piling up the regiment behind them.

But this, says Loosli, is like learning to ride a bicycle by riding a tricycle. The way to learn to ride a bicycle is to ride it. The way to ski is to learn balance and stability on the hickory runners just as you are going to ride on them thereafter. An accomplished skier keeps his runners parallel; his trail through the snow is like a railroad track. When he turns, the track turns, still parallel. He wouldn't use the snowplow at his speed, for if he did, chances are he would finish the run on his face—you'd get the same effect if you put brakes only on the front wheels of your car. Nor does he stem, unless he is slowed down by deep snow or the nature of the terrain.

So it comes to this: once you've learned the snowplow, you have to forget it. And the majority never get beyond the snowplow stage.

A Hint from the Kibitzers

In his fourteen years of teaching in Canada, and before that at Lausanne and St. Moritz, Loosli had seen youngsters who hadn't the cash to join a class watching the experts and aping them. They seldom bothered about a snowplow and didn't miss it. They learned to run on parallel skis from the start, and very soon they outdistanced the tenderly nursed pupils in Fritz's own classes.

So two winters ago at the Toronto Ski Club, the world's largest, he conducted an experiment. He took twenty new pupils and divided them at random into two classes. One class h

MORE MILES PER GALLON THAN ANY OTHER CAR THEY'VE DRIVEN

Illustrated: Studebaker Champion Custom Club Sedan $730 delivered at factory—contrasting-color belt $5 extra

Lowest priced 6-cylinder sedan in America!

Big, roomy, high quality

STUDEBAKER CHAMPION

...oo stratoliner style!

You have nine different body colors to choose from in this Studebaker Champion. It's richly upholstered in canda cloth or bedford cord.

illion-dollar ride!

Studebaker's exclusive self-stabilizing Planar Suspension pads every road with velvet—keeps car free from swerving and sidesway.

...selom use the clutch!

That's due to Studebaker's gas-saving Economatic Shift with Overdrive—available on all Studebaker Champion models at added cost.

Warm floors—clear windows!

Studebaker's exclusive filtered-air Climatizer with Windshield Defroster is optional on your Champion. Costs only slightly more than an old-style heater.

...Snug safety on curves!

Studebaker's exclusive Variable Ratio Steering holds your Champion as steady on the turns as in straight-ahead driving—and you park with less effort.

And besides you get:

Automatic choke . . . angle-set ventilating vanes . . . finest hydraulic shock absorbers . . . twin tail lights . . . non-slam door latches . . . bumper guards . . . 'cross-continent trunk . . . glove compartment lock . . . steering wheel shift . . . automatic hood lock . . . front seat ash tray . . . foot-regulated hydraulic brakes—all at no extra cost. Automatic hill holder, for safety

PRICES BEGIN AT

$690

for a Champion business coupe

Champion Club Sedan with trunk, $730
Champion Cruising Sedan with trunk, $770

These are delivered prices at factory South Bend Ind as of January 15, 1941—subject to change without notice—Federal tax included

See your local Studebaker dealer now and go for a revealing 10-mile trial drive in this sensationally economical Studebaker Champion—the high quality car of the lowest price field that's driving ahead to brilliant new sales triumphs, week after week. Use your present car as part payment on a Champion—C.I.T. terms.

Studebaker craftsmen build up your Champion's trade-in value—because they build with exacting care. They average 44 years of age, 13 years on their jobs. Pictured is Robert Beck with 24 Studebaker years to his credit.

curls flying, as though her skis were part of her feet. But until he saw the forty- to sixty-year novices take to parallel skiing, he hadn't realized that he was offering such a boon to the older generation.

I took a chemical engineer, father of three children, out skiing for the first time last winter. An average fellow, near fifty, he takes no more exercise than most busy Americans. He sailed down the hill a bit stiffly, and at the bottom he stopped with a Christie! When I told him what he'd done, he said, "Christie, hell! That's the way I stop on skates!"

That just gives you an idea how natural skiing can be. No one pretends it is such a cinch to learn as that. Ski teachers like Loosli know the snags that give us our come-uppance. He once had a week to teach a company of actors who were making a film in the St. Bernard Pass, which ought to give him some kind of championship among the ski fraternity.

Speed from the Beginning

Loosli keeps his pupils going down the nursery slope, bobbing up and down like parallel rulers opening and closing, to learn how to shift their weight. He has them put their weight well forward, backs straight, with the bend at the knees and ankles. Next comes the skating motion, pushing first the right, then the left ski ahead. After that they get to swaying from side to side, making ready to swing into a Christie.

All this time they have been gaining speed. He says you can start your Christies when you feel comfortable skiing downhill as fast as you could run at top speed. He goes further and says you are wasting your time practicing turns at any lesser speeds.

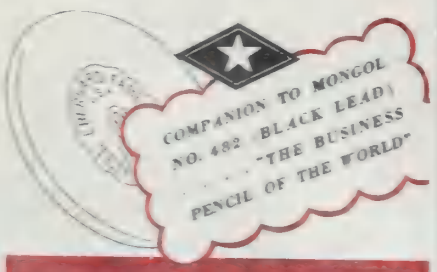
With this charm alone parallel skiing could win America. We like speed. We're used to it. When ski beginners complain, it's against the slow going. They are frustrated by drills and setting-up exercises, as though skiing were unlike any other sport and needed special conditioning. What most people want to do, once they get out on the hill, is ski. Fritz says, go ahead and ski.

Solemn fellow that he seems, he knows the intoxication of the fast downhill run and the lasting happiness of winged flight across snow-mantled hills. He lectures his aides daily, "Dese peoples are here for fun, not vork." Fun is what parallel skiing seems to give from the first day out, not just the promise of it later on, when you have climbed out of the snowplow class.

What you have been doing before you discovered skiing makes a difference. If you've been skating, rowing, riding horses, you're in luck, because those sports aren't right- or left-handed. If you are markedly one-sided, the skiing medico, Dr. Edwin Grace, suggests you walk on the curb with your left shoulder hanging off, traffic permitting. Also walk Indian-footed, one foot directly in front of the other, for balance.

Go out in the back yard, he further proposes, and kick a ball against the house with your left foot. If anyone makes a crack, just look over your shoulder—your left shoulder—and ask, "How's your Christie?"

Buying your skis, you ought to look into the laminated variety. They were introduced in Europe five years ago and have about taken over the Continental slopes still peaceful enough for skiing. Built of strips of hickory and other woods with crosspieces to hold them firm, they have tested seventy per cent stronger and more resistant to warping than hickory skis, and they are thirty-five per cent lighter on the feet. Steel edges are a good idea, but they are up in the graduation class. If you get them, you will want also the new sealskins which fasten with a tape waxed into the groove of your runners, instead of tying over the edges—the steel will cut the old-style tapes.



For parallel skiing, here is the kind of ski and binding Fritz says you need. You don't have to understand it, because the salesman will. The skis should be stiff at the upturn, and the toe iron should be placed an inch or two ahead of the point of balance, giving you a trailing ski. The bend of the upturn should be as near as possible to the tip to allow the longest running surfaces. The peak of the camber—that arch you see between the ski bottom and the floor—should be at the front of the toe iron and not at the heel.

Later on you'll want a cable binding, so you might as well get it at the start. And your ski poles, when you're standing on your skis with the poles resting on the snow, should come no more than an inch or two above your hips, instead of the more usual armpit height.

And now that we've got that settled, how *is* your Christie?

NO need now to put up with colored leads that break. You can trust MONGOL in a pencil sharpener, without waste. Its thin, super-strong lead takes a fine point. Try it to check records, rule lines or shade map areas; 'twill stand the gaff. *3 degrees of hardness*, for office use. ... The artists' choice, too, for pencil and wash effects. 26 colors ... 10¢ everywhere. "Say MONGOL to your Stationer."

all found roosting places. epartment arrested them re accepted as "hostesses" or as residents in outlying s or in the rooms over the

l department came around m.
g the Army called for the help of the United States Public Health Service, and they sent an investigator. The American Social Hygiene Society also sent one. They reported:

"Vice is wide open both in Columbus and Phenix City. No effort at control is being made."

This startled staid Columbus, which had always drawn its skirts away from the bawdy, poor little town across the river. Columbus cleaned up.

The girls were all brought in and given two days to leave town. Some went over the river to Phenix, already crowded. Others moved on to other cities. For two days the roads were rather well populated with girls standing beside their suitcases thumbing rides. Taxi drivers hauled them to the county line and deposited them there to wait for rides.

Columbus found out, and laughed ruefully, that one "place" had been across the street from the courthouse; another upstairs next door to the chief's office. The system was different in Columbus. There houses and streetwalkers, the latter using cheap hotels and rooming houses, were the problem. Columbus could—and did—clean house.

But Phenix City had its dives and its jukes and its joints. There most of the girls worked as "waitresses" and as "hostesses."

There were about six joints in Phenix City where it was dangerous for a stranger to go and show any money. Phenix City had more than its share of killings, slashing and stabbings. Not more than half of them were reported.

There were other joints not so tough. There were still others where officers could go to gamble. These places were crooked and no one ever won.

Phenix City has many good citizens. They make up the majority. But Phenix City is broke. It is in receivership. It has few taxable values. So, Phenix City deliberately has lived off vices, gambling and other lawlessness. It did so during the prohibition days.

Now that the Secretary of War has pointed the accusing finger and now that alarmed mothers over the nation have read of it, something is being done. Mayor Elmer E. Reese has proposed a curtailment of municipal revenues obtained from "liberal amusements."

The most famous city of vice in America actually is a tawdry, poor, struggling town of a few mills and a few businesses.

The town always has had those who worked to make it better. Chief among them is Father James Salway, pastor of St. Patrick Church:

"The people are poor, but they are good people. They worship God and go their own way. They do not patronize the honky-tonks. They only tolerate them because it cannot be helped. But some day they will throw them off. It is the outsiders who give Phenix City a bad name."

Now, the Reverend Father may see his dream come true.

THE shortage of uniforms for the expanding army is already a problem. One private came to complain to his lieutenant.

"Sir, this stand-up collar is driving me crazy. It has chafed and irritated my throat till it's all raw."

Before the officer could reply, another private broke out.

"If you'd hold your head up like you're supposed to in the Army, you wouldn't get hurt," he cried. "Quit dragging your chin on your chest!"

The Prisoners of Riom

By Hans Habe

Gamelin and Reynaud and those other men of the France of yesterday are at the Castle of Chazeron—living ghosts who await judgment day, each in his own way. An intimate glimpse into their lives as prisoners of the state they once served

BRITISH PRESS COMBINE

France's destiny lay in the hands of Premier Daladier and Commander in Chief Gamelin when they met in Paris in March, 1940, to discuss a war that was about to blaze into action. Now both are prisoners awaiting the day when they must justify their conduct of that war to the French people. Gamelin will probably be acquitted, Daladier banished. Below, another of France's ex-statesman prisoners, ex-Premier Reynaud and his eighteen-year-old daughter

BLACK STAR

A MAN cried out in the night. Two steel-helmeted soldiers walking the walls of the castle looked at each other.

"Daladier!" one of them said.

The other cleared his throat and said nothing. They shook the snow from their shoes and continued their patrol.

Lights burned in two windows of the solitary castle. Gamelin was awake and Mandel worked. The only difference between the Castle of Chazeron and an ordinary prison is that prisoners are allowed to work at night if they can't sleep.

But who among them can sleep?

The Castle of Chazeron, situated in the heart of France, today houses five important men. Not so long ago each lived in his own mansion. Today each is assigned one room, austere and unfriendly though spacious. In front of each room an armed guard paces. All night long the prisoners can hear the heavy tramp of the guards' boots.

For many months the castle has sheltered France's former rulers. They await their trials behind its high walls. Marie Gustave Gamelin, former commander in chief of the French army, on whose word every Frenchman's life depended for nine months, occupies a damp, unheated room—as does former Premier Daladier, who during the first months of the war was regarded as France's coming dictator. The castle is large enough so that the prisoners can be kept separated from one another, and a special organization of *Gardes Mobiles* sees to it that all communication between the five men is made impossible.

This organization has been particularly alert since a zealous policeman discovered a note Reynaud was trying to smuggle to Daladier. The commander of the guards, persuaded that the note contained an important state secret, sent it to Vichy. There, government officials solemnly opened it and read the following significant words: "Please send me a new toothbrush, if possible." The policemen and politicians were somewhat disappointed. Nevertheless the guard was reinforced.

Men Who Walk Alone

The Château de Chazeron, for many centuries the home of French aristocrats—it was once owned by the La Rochefoucaulds—is situated near Riom, not far from Vichy, midway between the seat of the government and the court. Its very geographical position symbolizes the road from power to prison. For many years the castle was uninhabited. At the beginning of the war it was requisitioned by the state authorities. The original plan was to use it as a refuge for children, but the course of events has transformed the children's home into an internment camp for the former leaders of France.

A glance across the high walls of the castle reveals an ancient, austere building in the midst of a vast, neglected park. Every morning between nine and ten, and every afternoon between four and five, solitary men can be seen walking up and down separate paths bordered by lime trees. The men are absorbed in their own thoughts or exchange a few words with their wary guards.

Of the eighty rooms in the castle only ten are occupied. Each of the former masters of France must content himself with one room. To those who remember Reynaud's suite in the premier's mansion in Paris, his book-filled room in the castle seems particularly sad. The contrast is more striking than if these rooms were real prison cells, for Chazeron is full of objects that evoke its former splendor. It is true that the rooms are unfriendly and almost impossible to heat, but they are furnished with antiques from the castle, so that sometimes the prisoners must forget momentarily where they are. The unceasing tramp of the heavy steps in front of their doors soon brings them back to reality.

Discipline but no Luxuries

The prisoners must wash in their rooms and are allowed only one bath a week. There is only one bathroom in the entire castle.

The food is rationed and is about equal in quality and quanity to that served in a small restaurant. Reynaud wanted to have a chef come from Paris but his request was refused. The army chef who cooks for the guards—a former restaurant owner of Vichy—cooks also for Their Excellencies. The prisoners of Riom have ration cards like all French citizens, and regularly receive allotted portions of sugar and soap. They are allowed to receive one extra parcel a week from outside.

Until recently the guard consisted of 24 police officials and 150 *Gardes Mobiles*. The entire personnel has been changed twice. Every one of the guards was once a French voter. One of the guards was severely reprimanded and later dismissed for allowing Gamelin to paint the portrait of his three-year-old daughter. Painting is Gamelin's avocation.

The French commander in chief was dismissed from his office after the German offensive began. At that time he was at the front, near the Belgian border. I remember the deep impression made on us soldiers by the removal of Gamelin. The day before, in the marching line, we had listened to Gamelin's order of the day, which repeated the once given by General Pétain at Verdun: "All troops unable to advance must die where they stand: they must not retreat." And the next day Gamelin was dismissed.

A few weeks later, the general was arrested. After his dismissal he lived with Monsieur L. A. Gaboriaud, editor of the patriotic weekly *Epervelle*. While Gaboriaud was host his friend the censor would not allow a word in defense of Gamelin to appear in Gaboriaud's publication.

During the days that saw the completion of France's defeat many wondered what had happened to the generalissimo. Some asserted that he had committed suicide, like Scipio after the disaster of Tannenberg. Others maintained that he had taken boat to America under a false name and in disguise. None of these rumors did justice to the disciple of Foch and Joffre. With

TO EVERY PARENT WITH A SON *in the Draft!*

THE AMERICAN ARMY of 1941 is the cleanest, healthiest army in our history. And wise heads are working day and night to keep it so.

No man with a social disease is accepted but the army is being completely realistic about the "camp-followers" surrounding our army posts—seasoned harpies and sweet young things all determined that the boys will not be lonely; in addition to the juke-joints, dives and honky tonks.

There is no disposition among army men to hush-hush these conditions. Whatever is vicious is being fought openly, and offset by building up our fighting men's morale so that they will not turn to vice for recreation.

In the March American Magazine, Clarence Woodbury tells you how he saw the encouraging progress of this great campaign.

It is an important, reassuring article that every parent, every man of draft age should read. It is not printed to provide sensational reading but to let good honest sunlight strike at a very real problem.

Out- and a favorite of the ud was in reality a frus- man who spent every free his daughter or his mother

fifteen years of his career as a statesman Reynaud had many affairs with women, but only one love: his daughter. Only during the last two years did a woman succeed in dominating him. She was the Countess Hélène de Portès, an adventuress in the grand manner. The Countess de Portès was born Mademoiselle Rebuffet in Paris. For the past fifteen years she has served various masters. After the pact of Munich, her favorites were German. Reynaud was infatuated with her and clung to her desperately.

On that day last June she was going with him to St. Maxime. In circumstances that remain unexplained his car became involved in an accident. The countess was killed and Reynaud injured. He was brought to Barcelonette, and his daughter was summoned. When the police arrived they found Reynaud in the care of his mother and daughter. The *Gardes Mobiles* took him directly to the Castle of Chazeron.

It has recently become known that Reynaud had an opportunity to escape before he was taken to prison. The British government was ready to dispatch a warship for him to Marseille. One of the strongest points in Reynaud's defense is that he rejected this offer.

Hans Habe, the author of The Prisoners of Riom, is only 29 years old. But few men have packed into so young a life the excitement and experiences of Hans Habe. A member of an old Hungarian family, he was foreign editor of the Viennese newspaper "Morgen" and later, as foreign correspondent for the "Prague Tageblatt," traveled continuously all over Europe to satisfy a double appetite for adventure and news. He became intimately acquainted with most of Europe's leaders—the big men and the little men whose personalities and convictions shaped the Continent's destiny.

Habe's novels, two of which have been published successfully in this country, were publicly burned in Germany and the author blacklisted. Viennese Nazis tried to kill Habe, but he escaped, went to France. At the war's outbreak he volunteered for service in the 21st Regiment Infantry and was captured by the Germans after one of the futile battles on the Belgian frontier. To hide his real identity, he persuaded a French soldier to give him part of his papers and the two were fortunately sent to different concentration camps by the Germans. Habe escaped in a junked ambulance, assumed successively the identities of a wine salesman, a railway employee and a secret agent. He swam the River Doubs between occupied and unoccupied France, made his way to America across Spain and Portugal after visiting Riom, where the men who are accused of having betrayed France are prisoners in the Castle of Chazeron.

He asked for some light reading to supplement his juridical and political books and was permitted to have a number of detective stories, including several by Agatha Christie. Every Thursday the former premier is the cause of a series of quarrels. Only relatives and lawyers are admitted to Chazeron. But regularly, every visiting day, many other persons, among them ladies, throng into the château to try to see Reynaud.

For a short time Chazeron also harbored Guy La Chambre, former air minister who, accompanied by his charming and famous wife, one of the most fascinating actresses of Paris, flew directly from New York to jail. Like Pierre Cot, his predecessor in office, Guy La Chambre was living in New York when the Riom court was constituted. But whereas I saw Pierre Cot with his beautiful Venezuelan wife dining in a Russian restaurant in New York only a few days ago, Guy La Chambre took the first available Clipper to report to his government. Vichy has little use for such chivalrous gestures—the former minister was promptly taken to Chazeron. La Chambre tried in vain to obtain an audience with Pétain. Later he was transferred to the Castle of Bourassol, which shelters the "second-class" former "excellencies."

Solitude that Hurts

When you speak with the guards of Chazeron—day and night eighteen of them patrol the high gray walls of the castle—you can feel that what most impresses these simple men is not their prisoners' downfall but their solitude. Formerly, their antechambers were crowded daily with hundreds of distinguished visitors; thousands of beautiful women competed for their favors; scientists, writers, army commanders and financiers flattered their vanity. It comes as a shock to learn that Daladier, the "bull of Vaucluse," who, people feared, might become an all-powerful dictator, has not received a single visit since his imprisonment. The only person who asked for permission to see him was his son, Jean Daladier, but his request was refused because of his previous political activities.

No other visitor appeared. After three months of solitude Daladier asked, for the first time, for the Marquise de Crussol. For many years the marquise had been Daladier's friend and adviser; in Paris she was known as "Madame Lucifer." The difference between the two men, Daladier and Reynaud, is clearly revealed by their women. The two men came from the middle classes, both had a secret respect for names, titles and society. Both were attracted by the life of the salons. But whereas Reynaud, an educated and witty man, chose an adventuress with great intellectual qualities, Daladier was attracted by the Marquise de Crussol, who was noted for her aristocratic elegance. Reynaud's "Lady of Catastrophe" remained at his side after the little man had lost the great game. The marquise left Daladier with a smile after his fall. For months Daladier had been desperately asking for a letter, a word. His guards can hardly bear to tell him the truth. Not a line, not a word has come from the marquise.

Of all the prisoners of Chazeron, Daladier is most adept at handling his guards. He knows the language of the people. His guards have been replaced three times, because the government discovered that they had become too friendly with their prisoner.

What Daladier misses most in his prison is his beloved *Pastis*, a liquor high in alcoholic content, similar to Pernod, of which his enemies never failed to mention that he used to drink

seven or eight glasses a day. Today, beverages containing more than 12 per cent alcohol are banned in France, and the prisoners of Chazeron are allowed but one liter of red wine a day.

Daladier is a great letter writer. The prisoners of Riom may write as much as they please, but mail leaves only once a week. It goes without saying that it is censored many times. First the letters are read by police officials in Chazeron, then they are sent to Vichy where they are examined again, photographed and copied. Daladier writes mostly to his son. In the first letter to him, opened by the censor, there were these beautiful words: "Never forget that it was not your father who lost the war." This single sentence speaks volumes for Daladier's intentions. The former Premier will not be satisfied with merely defending himself. He intends to show who *did* lose the war. That is the reason why the trials of Riom present so many difficulties, why they have been postponed time and again. That is why the court formed to judge the ex-masters of France has already changed its own presiding judge twice, before the trials have even begun.

During his years in office Daladier never wore a uniform, although he distinguished himself as an officer in the World War and returned from the front with the rank of captain and numerous decorations. During the speech that he intends to make before the trial court, however, the former president of the council will probably wear his uniform. His great oratorical powers will doubtless count for much. Frenchmen still remember Daladier's speech at the outbreak of the war, in which he said that if France lost she would inevitably fall into "the most abject slavery." It is doubtful, however, whether rhetoric will be enough to save a broken man.

Five Men—Five Problems

Every prisoner of Riom presents a different psychological problem. Gamelin became famous against his will. He is almost happy to have been removed from the spotlight. Reynaud never took himself nor the world seriously. He remains as he was. Daladier is going through the tragedy of a little man first exalted and then destroyed by fate. This man never trusted himself. He was filled with a sense of inferiority. And it is not to be wondered at that the silent Castle of Chazeron is often roused in the night by the terrible cries uttered by Daladier in his dreams. They are the dreams of a man whose high position was more than he could bear.

Whereas Daladier has been abandoned by his friends, the opposite is true of the man who during his years in power always acted on his own—Georges Mandel.

The former Minister of the Post Office, Colonies and Interior is the man whose conduct in prison is the most dignified. Of all the accused, Mandel is the only one whose life is at stake. The maximum penalty for the other imprisoned ministers is deportation for life. But Mandel is charged not with responsibility for measures dangerous to the state, but with high treason, the same crime for which de Gaulle was sentenced to death. Mandel is accused of having intended to form a new government in Meknès, Africa, and of continuing the war with the help of the undefeated African forces and the undefeated fleet.

There are other reasons why so much hatred is concentrated on Mandel. Mandel, a Jew, was once the favorite and disciple of Clemenceau. The French conservatives and especially the army officers cannot forgive this man for having gained the "Old Tiger's" absolute confidence. Mandel is also the man most hated by the Germans. From the very beginning Germany has demanded the death of this "warmonger."

Despite all this, no one has yet seen Mandel despair. In his long, black coat, with his high white collar and carefully parted, oily black hair, he still has a challenging and inspiring air. He has changed neither his habits nor his manner of speaking. He treats his guards with cool friendliness, as if they were clerks in his ministry.

Here, too, character plays an enormous role. Gamelin was a victim of politics, Daladier of overestimation, Reynaud of a world poor in heroes, Mandel is not a victim. He was not the object, but the subject of politics. He was never a pawn in other people's game—he was a passionate gambler himself.

Imprisonment is a true measure of character. The black-clad man with the pointed head has not changed even in Chazeron.

$50,000,000

in American money has been poured into Puerto Rico—so far.

IN NEXT WEEK'S COLLIER'S

Like all things political, Mandel's bearing has, to a great extent, personal causes. One is clear to everybody. As Minister of the Post Office, Colonies and Interior, Mandel acquired an astounding knowledge of people. No one is more dangerous than this man who was thrice refused permission to have his dossiers transferred from his residence, who asserts that his "head is France's greatest dossier," and whose appearance in Paris often caused people to whisper: "That's Mandel! He knows everything!"

Mandel's visitors are surprised at his knowledge of what is going on in the world. Though he was refused a radio—whereas, several other prisoners are allowed to listen to broadcasts—the great, silent man seems well informed. "My memoirs are my defense," he once said to one of his visitors. He often makes coffee at night on a small stove, precious coffee sent to him by friends. And he works steadily at the memoirs that will perhaps prevent the trials of Riom from being held at all. Unlike Napoleon banished at Elba, Mandel does not trust history to judge him.

But Mandel's excellent bearing has still another, more intimate cause.

slowly: "You have a word guage—*slick*. This crime e a very slick crime! It nder if, perhaps, it was not pt."

spector Colgate said.

t on: "I said to myself, 'Let ast crimes of a similar kind is a crime that closely re- one—*eh bien*, we shall have valuable clue.' "

"You mean using the same method of death, sir?"

"No, no. I mean more than that. The death of Nellie Parsons, for instance, tells me nothing. But the death of Alice Corrigan—tell me, Inspector Colgate, do you not notice one striking form of similarity to this crime?"

Inspector Colgate turned the problem over in his mind. He said at last, "No, sir, I can't say that I do really. Unless it's that in each case the husband has got a cast-iron alibi."

Poirot said softly, "Ah, so you *have* noticed that?"

"HA, POIROT. Glad to see you. Come in. Just the man I want."

Hercule Poirot responded to the invitation.

The chief constable pushed over a box of cigarettes, took one himself and lighted it. Between puffs he said: "I've decided, more or less, on a course of action. But I'd like your opinion on it before I act decisively."

"Tell me, my friend," Hercule Poirot said.

"I've decided to call in Scotland Yard and hand the case over to them," Weston said. "In my opinion, although there have been grounds for suspicion against one or two people, the whole case hinges on dope smuggling. It seems clear to me that that place, Pixy's Cave, was a definite rendezvous for the stuff."

Poirot nodded. "I agree."

"Good man. And I'm pretty certain who our dope smuggler is. Horace Blatt."

Again Poirot assented. "That, too, is indicated," he said.

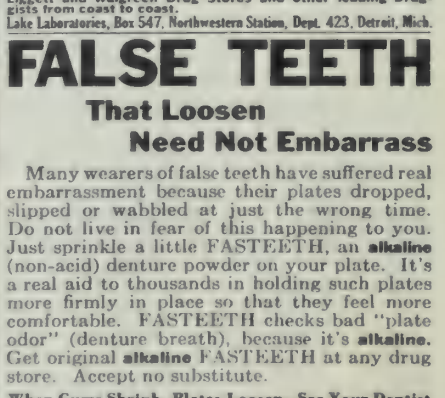
"I see our minds have both worked the same way. Blatt used to go sailing in that boat of his. Sometimes he'd invite people to go with him, but most of the time he went out alone. He had some rather conspicuous red sails on that boat but we've found that he had some white sails as well stowed away. I think he sailed out on a good day to an appointed spot, and was met by another boat—sailing boat or motor yacht—something of the kind and the stuff was handed over. Then Blatt would run ashore into Pixy Cove at a suitable time of day—"

Hercule Poirot smiled.

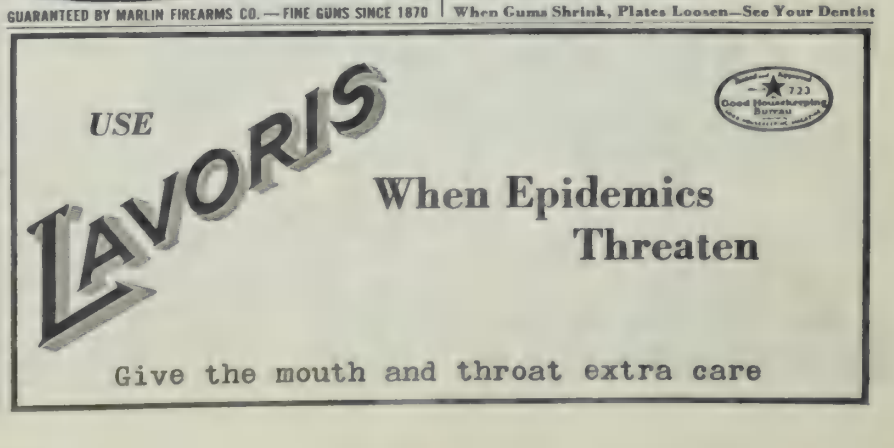
"Yes, yes, at half past one. The hour of the British lunch when everyone is quite sure to be in the dining room. The island is private. It is not a place where outsiders come for picnics. People take their tea sometimes from the hotel to Pixy Cove in the afternoon when the sun is on it, or if they want a picnic they would go somewhere far afield, many miles away."

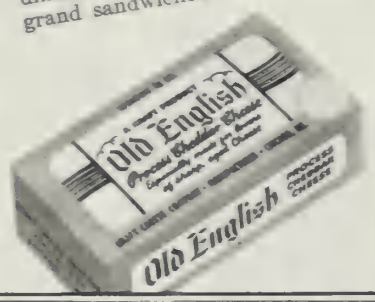
THE chief constable nodded. "Quite," he said. "Therefore Blatt ran ashore there and stowed the stuff on that ledge in the cave. Somebody else was to pick it up there in due course."

Poirot murmured: "There was a couple, you remember, who came to the island for lunch on the day of the murder? That would be a way of getting the stuff. Some summer visitors from a hotel on the moor or at St. Loo, come over to Smugglers' Island. They announce that they will have lunch. They walk around the island first. How easy to descend to the beach, pick up the sandwich box, place it, no doubt, in Madame's bathing bag which she carries—and return for lunch to the hotel—a little late, perhaps, say at ten minutes to two, having enjoyed their walk while everyone else was in the dining room."



"Yes," Weston said, "it all sounds





"Old English" sir! It's ver-ry SHARP

● For the select circle who like their cheddar mellow, rich, with a *nip!* Kraft has seen to it that you can get that same delectable sharpness *every time*—and in a cheese that always toasts and melts perfectly! Taste "Old English" Pasteurized Process Cheddar — as appetizer, after-dinner savoury, in Welsh Rabbits, grand sandwiches. It's a triumph!

practicable enough. Now these dope organizations are pretty ruthless. If anyone blundered in and got wise to things they wouldn't make any bones about silencing that person. It seems to me that that is the right explanation of Arlena Marshall's death. It's possible that on that morning Blatt was actually at the cove stowing the stuff away. His accomplices were to come for it that very day. Arlena arrives on her float and sees him going into the cave with the box. She asks him about it and he kills her then and there and sheers off in his boat as quick as possible."

"You think definitely," Poirot said, "that Blatt is the murderer?"

"It seems the most probable solution. Of course, it's possible that Arlena might have got onto the truth earlier, said something to Blatt about it and some other member of the gang fixed a fake appointment with her and did her in. As I say, I think the best course is to hand the case over to Scotland Yard. They've a far better chance than we have of proving Blatt's connection with the gang."

Hercule Poirot nodded thoughtfully.

Weston said: "You think that's the wise thing to do—eh?"

Poirot was thoughtful. He said at last: "It may be."

"Dash it all, Poirot, have you got something up your sleeve, or haven't you?"

"If I have," Poirot said gravely, "I am not sure that I can prove it."

Weston said, "Of course, I know that you and Colgate have other ideas. Seems a bit fantastic to me but I'm bound to admit there may be something in it. But even if you're right, I still think it's a case for the Yard. We'll give them the facts and they can work in with the Surrey police. What do you think, Poirot? What do you feel ought to be done about it?"

Poirot seemed lost in thought. At last he said: "I know what I should like to do."

"Yes?"

Poirot murmured, "I should like to go for a picnic."

Colonel Weston stared at him.

"A PICNIC, M. Poirot?"

Emily Brewster stared at him as though he were out of his senses.

Poirot said engagingly: "It sounds to you, does it not, very outrageous? But indeed it seems to me a most admirable idea. We need something of the every day, the usual, to restore life to the normal. I am most anxious to see something of Dartmoor, the weather is good. It will—how shall I say, it will cheer everybody up! So aid me in this matter. Persuade everyone."

The idea met with unexpected success. Everyone was at first dubious and then grudgingly admitted it might not be such a bad idea after all.

It was not suggested that Captain Marshall should be asked. He had himself announced that he had to go to Plymouth that day. Mr. Blatt was of the party, enthusiastically so. He was determined to be the life and soul of it. Besides him, there was Emily Brewster, the Redferns, Stephen Lane, the Gardeners, who were persuaded to delay their departure by one day, Rosamund Darnley and Linda.

Poirot had been eloquent to Rosamund and had dwelt on the advantage it would be to Linda to have something to take her out of herself. To this Rosamund agreed. She said: "You're quite right. The shock has been very bad for a child of that age. It has made her terribly jumpy."

"That is only natural, Mademoiselle. But at that age one soon forgets. Persuade her to come. You can, I know."

Major Barry had refused firmly. He said he didn't like picnics. "Lots of baskets to carry," he said. "And darned uncomfortable. Eating my food at a table's good enough for me."

The party assembled at ten o'clock. Three cars had been ordered. Mr. Blatt was loud and cheerful, imitating a tourist guide:

"This way, ladies and gentlemen—this way for Dartmoor. Heather and bilberries, Devonshire cream and convicts. Bring your wives, gentlemen, if you wish! Everyone welcome! Scenery guaranteed. Walk up. Walk up."

At the last minute Rosamund Darnley came down, looking concerned.

She said: "Linda's not coming. She says she's got a frightful headache."

"But," Poirot cried, "it will do her good to come. Persuade her, Mademoiselle."

Rosamund said firmly: "It's no good. She's absolutely determined. I've given her some aspirin and she's gone to bed."

FUNNY-BUSINESS MEN

Self-Portraits of Collier's Cartoonists
No. 26

A dyed-in-the-cactus Texan, Tom Holloway was born in Ennis, educated at the University, and later hired by a San Antonio advertising agency. In Manhattan for the past decade he has done promotional layouts for a publishing company, with cartoons (sample on facing page) as a side line; and enjoys the distinction of being the only person in the world who likes to sit through double-feature movies twice.

She hesitated and said: "I think, perhaps, I won't go, either."

"Can't allow that, dear lady, can't allow that," cried Mr. Blatt seizing her facetiously by the arm. "No refusals!"

He led her firmly to the first car. Rosamund threw a black look at Hercule Poirot.

"I'll stay with Linda," said Christine Redfern. "I don't mind a bit."

"Oh, come on, Christine," Patrick said.

"No, no," Poirot said, "you must come, Madame. With a headache one is better alone. Come, let us start."

THE three cars drove off. They went first to the real Pixy's Cave on Sheepstor and had a good deal of fun looking for the entrance and at last finding it, aided by a picture post card.

It was precarious going on the big boulders, and Hercule Poirot did not attempt it. He watched indulgently while Christine Redfern sprang lightly from stone to stone and observed that her husband was never far from her. at re silent—waiting. . . .

The door opened and Dr. Neasdon came in. He said curtly, "I've done all I can. She may pull through—but I'm bound to tell you that there's not much hope."

He paused. Marshall, his face stiff, his eyes a cold, frosty blue asked: "How did she get hold of the stuff?"

Neasdon opened the door again and beckoned. The chambermaid came into the room. She had been crying.

Neasdon said: "Just tell us again what you saw."

Sniffing, the girl said:

"I never thought—I never thought for a minute there was anything wrong—though the young lady did seem rather strange about it." A slight gesture of impatience from the doctor started her off again: "She was in the other lady's room. Mrs. Redfern's. Your room. Madam. Over at the washstand and she took up a little bottle. She did give a bit of a jump when I came in and I thought it was queer her taking things from your room, but then, of course, it might be something she'd lent you. She just said: 'Oh, this is what I'm looking for,' and went out."

Christine said almost in a whisper: "My sleeping tablets."

"How did she know about them?" the doctor said brusquely.

"I gave her one," Christine said. "The night after it happened. She told me she couldn't sleep. She—I remember her saying: 'Will one be enough?'—and I said: 'Oh, yes, they are very strong—I've been cautioned never to take more than two at most.' "

Neasdon nodded. "She made pretty sure," he said. "Took a lot of them."

Christine sobbed again. "Oh, dear, I feel it's my fault. I should have kept them locked up."

The doctor shrugged his shoulders. "It might have been wiser, Mrs. Redfern."

Christine said despairingly: "She's dying—and it's my fault. . . ."

Kenneth Marshall stirred in his chair. "No, you can't blame yourself," he said. "Linda knew what she was doing. She took them deliberately. Perhaps—perhaps it was best."

He looked down at the crumpled note

There has been a mistake somewhere; this is a private rumpus room"

in his hand—the note that Poirot had silently handed to him.

The door opened and Colonel Weston came in. "What's all this I hear?" he said.

Dr. Neasdon took the note from Marshall's hand and handed it to the chief constable. The latter read it. He exclaimed incredulously: "What? But this is nonsense—absolute nonsense! It's impossible." He repeated with assurance: "Impossible! Isn't it, Poirot?"

Hercule Poirot moved for the first time. He said in a slow, sad voice: "No, I'm afraid it is not impossible."

"But I was with her, M. Poirot," Christine Redfern said. "I was with her up to a quarter to twelve. I told the police so."

Poirot said: "Your evidence gave her an alibi—yes. But what was your evidence based on? It was based on *Linda Marshall's own wrist watch*. You do not know *of your own knowledge* that it was a quarter to twelve when you left her—you only know that she told you so. You said yourself the time seemed to have gone very fast."

She stared at him stricken.

"Now think, Madame," he said, "when you left the beach, did you walk back to the hotel fast or slow?"

"I—well, fairly slowly, I think."

"Do you remember much about that walk back?"

"Not very much. I'm afraid. I—I was thinking."

POIROT said. "I am sorry to ask you this, but will you tell just what you were thinking about during that walk?"

Christine flushed. "I suppose—if it is necessary—I was considering the question of—of leaving here. Just going away without telling my husband. I—I was very unhappy just then, you see."

Patrick Redfern cried: "Oh, Christine! I know . . . I know . . ."

Poirot's precise voice cut in: "Exactly. You were concerned over taking a step of some importance. You were, I should say, deaf and blind to your surroundings. You probably walked very slowly and occasionally stopped for some minutes while you puzzled things out."

Christine nodded. "How clever you are. It was just like that. I woke up from a kind of dream just outside the hotel and hurried in thinking I should be very late but when I saw the clock in the lounge I realized I had plenty of time."

"Exactly," Hercule Poirot said again. He turned to Marshall.

"I must now describe to you certain things I found in your daughter's room after the murder. In the grate was a large blob of melted wax, some burnt hair, fragments of cardboard and paper and an ordinary household pin. The paper and the cardboard might not be relevant but the other three things were suggestive—particularly when I found tucked away in the bookshelf a volume from the local library here dealing with witchcraft and magic. It opened very easily at a certain page. On that page were described various methods of causing death by molding in wax a figure supposed to represent the victim. This was then slowly roasted till it melted away—or alternatively you would pierce the wax figure to the heart with a pin. Death of the victim would ensue.

"I later heard from Mrs. Redfern that Linda Marshall had been out early that morning and had bought a packet of candles and had seemed embarrassed when her purchase was revealed. I had no doubt what had happened after that. Linda had made a crude figure of the candle wax—possibly adorning it with a snip of Arlena's red hair to give the magic force—had then stabbed it to the heart with a pin and finally melted the figure away by lighting strips of cardboard under it.

"It was crude, childish, superstitious, but it revealed one thing: the desire to kill.

"Was there any possibility that there had been more than a desire? Could Linda Marshall have *actually* killed her stepmother?

"At first sight it seemed as though she had a perfect alibi—but in actuality, as I have just pointed out, the time evidence was supplied *by Linda herself*. She could easily have declared the time to be a quarter of an hour later than it really was.

"It was quite possible, once Mrs. Redfern had left the beach, for Linda to follow her up and then strike across the narrow neck of land to the ladder, hurry down it, meet her stepmother there, strangle her and return up the ladder before the boat containing Miss Brewster and Patrick Redfern came in sight. She could then return to Gull Cove, take her bath and return to the hotel at her leisure.

"But that entailed two things: She must have definite knowledge that Arlena Marshall would be at Pixy Cove and she must be physically capable of the deed.

"Well, the first was quite possible—if Linda Marshall had written a note to Arlena herself in someone else's name. As to the second, Linda has very large, strong hands. They are as large as a man's. As to the strength, she is at the age when one is prone to be mentally unbalanced. Mental derangement often is accompanied by unusual strength. There was one other small point. Linda Marshall's mother had actually been accused and tried for murder."

Kenneth Marshall lifted his head. He said fiercely: "She was also acquitted."

"She was acquitted," Poirot agreed.

"And I'll tell you this, M. Poirot," Marshall said, "Ruth—my wife—was innocent. That I know with complete and absolute certainty. In the intimacy of our life I could not have been deceived. She was an innocent victim of circumstances."

He paused. "And I don't believe that Linda killed Arlena. It's ridiculous—absurd!"

Poirot said: "Do you ter, then, to be a forger

Marshall held out hi Weston gave it to him. it attentively. Then he

"No," he said unwill Linda did write this."

It was ten years ago that Jim Wilson sat down with his Prudential agent and planned the protection that now means so much to his widow and daughter.

Jim wasn't making a great deal of money. But he found—just as so many others have —that it costs surprisingly little to give your family the safety and security of Prudential life insurance protection.

DO YOU KNOW *THIS* ABOUT LIFE INSURANCE?

Q: How will The Prudential pay my beneficiary?

A: Under your Prudential Ordinary policy, you may select any one of the following ways, or leave the choice to your beneficiary.

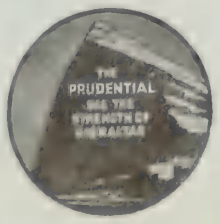
*

Cash payment in one lump sum.

*

A monthly income of a definite amount continuing for life.

*



Installment payments of a definite amount for a limited number of years.

*

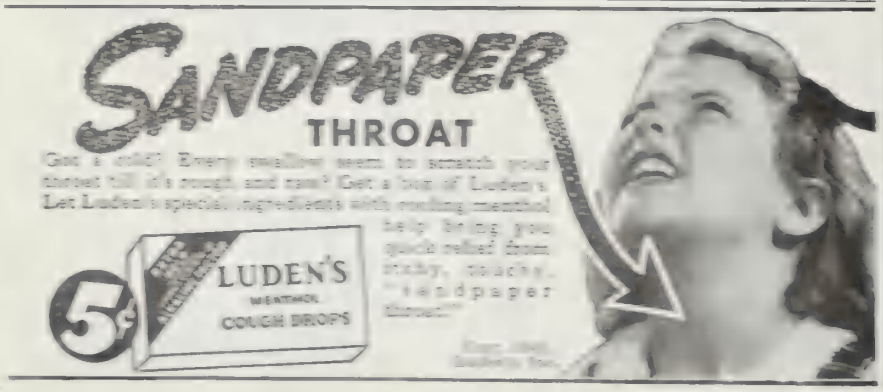
Or the insurance money can be left with the company and the interest paid to the beneficiary. Withdrawal of all or part of the principal may be arranged for as desired.

The Prudential

HOME OFFICE: NEWARK, N. J.

INSURANCE COMPANY OF AMERICA

"Ma Says It Tastes of Coal Oil!"



MA IS probably right. The clerk who had to fit shoes and horse collars, measure out nails and putty, and draw kerosene couldn't always stop to wash his hands before he handled the butter and crackers. And every so often the pecans on the spout of the oil can would joggle off.

Today, for most of us, the mixture of food and kerosene odor has ceased to be a problem. More and more of our food, packed by electric machines, comes to us in sanitary containers. Electricity does the work, too, of washboard and carpet beater. Automobiles and good roads have shortened distances to town and work. And because so many of the unpleasant jobs which occupied our parents' time are now only memories, we have more opportunities for enjoying life.

Practically every industry in America has helped to bring about this progress. And every industry, in doing so, has made use of the economies and manufacturing improvements that electricity brings. General Electric scientists, engineers, and workmen have been, for more than 60 years, finding ways for electricity to help raise American living standards—to create More Goods for More People at Less Cost. Today their efforts are helping further to build and strengthen the American way of life.

G-E research and engineering have saved the public from ten to one hundred dollars for every dollar they have earned for General Electric

sor, or failing to select a man who can pass the administration's stern requirements, the administration has its own nomination—Mr. Lowell Mellett, at present Director of the Office of Government Reports and administrative assistant to the President of the United States. Whether the publishers can fix upon a better censor than Mr. Mellett we don't know; it is unlikely that anyone could nominate an abler journalist or a man more passionately devoted to the democratic ideal.

However, we'll come to Mr. Mellett later. Before we go further you ought to know what the plan is in its present outlines—and how it will be introduced. It won't be necessary for Congress to bless it with permissive legislation. The National Defense Act of 1916 still exists and therein are the enabling clauses for censorship. That much for the press. The radio is already in the President's hands, the law stipulating that he may take broadcasting over at any time he deems that an emergency warrants it. All he has to do is to speak to the Federal Communications Commission and the nation's broadcasting stations will be told precisely what not to do.

All Ready with the Plan

To begin with, then, the President will call to Washington certain publishers representing the American Newspaper Publishers Association, publishers of magazines, representatives of radio broadcasting stations and chains and, so that a delicate job be done as tidily as possible, a few Washington correspondents. The talk will be general, the guests being warned that the problem is all theirs. A few of the bolder ones will pay tribute to the traditions of the American press, to its Constitutional guarantees, to the right of the people to know the truth. And they will cite horrible examples of censorship's past. And no one present will applaud this louder than Mr. Roosevelt himself. Presently the conference will dissolve, the participants having agreed to appoint a working committee that will proceed without much delay to evolve a voluntary censorship plan.

As we've told you, a plan already exists. By the time the publishers meet it will be on paper. In its present form it is a compromise between a censorship and a sales campaign—a campaign to sell the war to the halfhearted, the fearful and the doubtful. Washington is almost unanimous in that never in the memory of the oldest militarist has there been less enthusiasm for war. There is none of the spirit of high adventure that swept the country in 1917. In 1917 America viewed war as a lark. American arms hadn't fired a gun in anger since 1865, the affair in Cuba having been a mere skirmish fought by a few volunteers. There is none of 1917's exhilaration around these days. The ballyhoo has a banshee motif.

Therefore, an important part of the present plan is to sell the war to the masses. What can be said in the praise thereof will be mortised neatly into what may not be said that the praise be not tarnished. The sales campaign will glorify ship launchings, military parades, camp festivities, naval displays. But revelations of strikes, sabotage and laggard production will be discouraged—at best minimized. If the spirit that Washington hopes to see prevails, the radio will ring with soldiers' choruses, workers' glee clubs and patriotic talks by mothers whose sons are in uniform.

That gives you a hint. And the movies will thrill you with m and doughboy humor. The and magazines will regale y brilliance of victories, sad heroisms and the misfortu enemy. Our own reverses battled and failures ignored. shouters may be missing fro forums of 1917, but not beca not exist. The radio has cha indoors.

In conjunction with Holl government proposes to resu ing movies. Films as ambiti impressive, they hope) as The Plow that Broke the The Fight for Life three ma produced by Pare Lorenz f ernment under the auspic Mellett, will be attempted. ong r. Roosevelt's private infor-
n ar number of reports on cen-sorship as it is operated in England. Among them is one telling of England's chowderhead setup in the early days of the current war. England's censorship woes were traceable then to the record-threatening stupidity of the men she entrusted with censorship's functions—most of them dullards whose experience in journalism had not extended beyond writing windy mumbles to The Times. If Mr. Roosevelt's wishes are respected (and it shouldn't be surprising if they are) none but experienced newspapermen and radiomen will fill any important position in the office of the Director of Public Information. Moreover, it is upon these reports that much of the idea of a comprehensive and all-inclusive office is based.

There is considerable argument as to whether the central office of Public Information should have authority over the Army Intelligence and the Navy Intelligence services insofar as news releases, broadcasts and pictures—still and movie—are concerned. The central office won't, if the Army and Navy have anything to say about it. Not that they are not sympathetic to censorship, but neither does publicity of the more flattering variety nauseate them. Each will continue to maintain its own intelligence service, set up its own listening posts within its own organization and apply the reports of its intelligence officers to the military problem immediately at hand. But it is yet to be decided whether the Army, Navy and Air Force will announce results of their operations independently to the press or through the office of the Director of Public Information—the censor.

These are merely a few of the aspects of censorship that are now being considered. Others will present themselves. It is our private suspicion that nothing quite as comprehensive or anything so closely related to efficiency will happen—certainly not at first. Or if such hard-boiled centralization is attempted at the beginning, it is not unlikely that it will either buckle under its own weight or that Congress, nagged into action by an outraged press, interdepartmental resentments and lack of co-operation, will say it's Nazi and the hell with it.

Both the Army and the Navy have efficient intelligence sections. Both have and will assign to these sections officers who have either made a specialty of intelligence work or reserve officers who have had newspaper, publicity, advertising or kindred training. If censorship

becomes as tough as some of its current enthusiasts hope, a number of these officers may be assigned to field offices to keep their wise eyes on the publications within the region of the field offices.

Advocates of this idea do not put it that bluntly; they'll tell you that such officers will be there merely to "advise" editors. What would happen if the editor, perplexed though he may be, rejects the deputy censor's "advice" we don't know. It is likely that most of such regional work will consist of observing the pages of foreign-language publications and standing by with lid in hand lest the more radical press let go with a few unpatriotic remarks.

Housecleaning Begins at Home

In the beginning—perhaps at the preliminary conference at the White House—the press and radio will be asked to be sure their own houses are clean. The Federal Bureau of Investigation is reported to have made a rather wide inspection of the American press and to have compiled an interesting mass of dossiers on editors and writers. The F.B.I. denies that such members of the community have been given any particularly searching going-over—no more, that is, than any other group nor half as much as such chronic nuisances as the German-American Bund and the various malcontent mobs and "shirt" racketeers.

Nevertheless, we have it on authority that we trust that journalism has had quite an inspection by the F.B.I. lads, with particular attention being lavished upon editors and writers who do not always regard the status quo as holy. Anyway, the publishers and broadcasters who will be asked to set up a censorship of their own devising will be asked to make sure that their staffs do not include men and women who have un-American affiliations or who are not wholeheartedly opposed to the German, Italian and Russian ways of life.

American information services maintained in this country by foreign governments will be closed as a matter of course. This will not apply to offices financed by England or any other ally we may pick up. It is expected that the British Intelligence Service, which has been exceedingly active here for years, will co-operate with our Bureau of Public Information.

At the offices of the Defense Commission they'll tell you that as far as they know there are few men in the United States who aren't convinced that they could do a better job of rearming the country and simultaneously aiding Britain. But as far as we've found out the country is populated exclusively by men and women who know precisely what to do about censoring the newspapers. Moreover, there's not one of them who isn't sure that, at the lift of a finger, he or she could run a newspaper and magazine far better than the beef-witted rabble who are doing it now.

But Washington is going to do its best to keep the office of the Public Information Service out of the rodeo class. At the moment there are those who would set up a censorship that would make Mr. Stalin's seem democratic and Mr. Hitler's a liberty-loving thing, the only aim of which was to furnish the masses with the ultimate syllable of truth. The job of making censorship in America airtight would be just a little more than democracy could bear. For example, there's Congress itself.

Since the creation of the Defense Commission, several members of Congress have introduced resolutions demanding that the whole truth of munitions production be made public, or at least given to Congress where such reports are regarded as a constitutional right.

Probably the resolution t

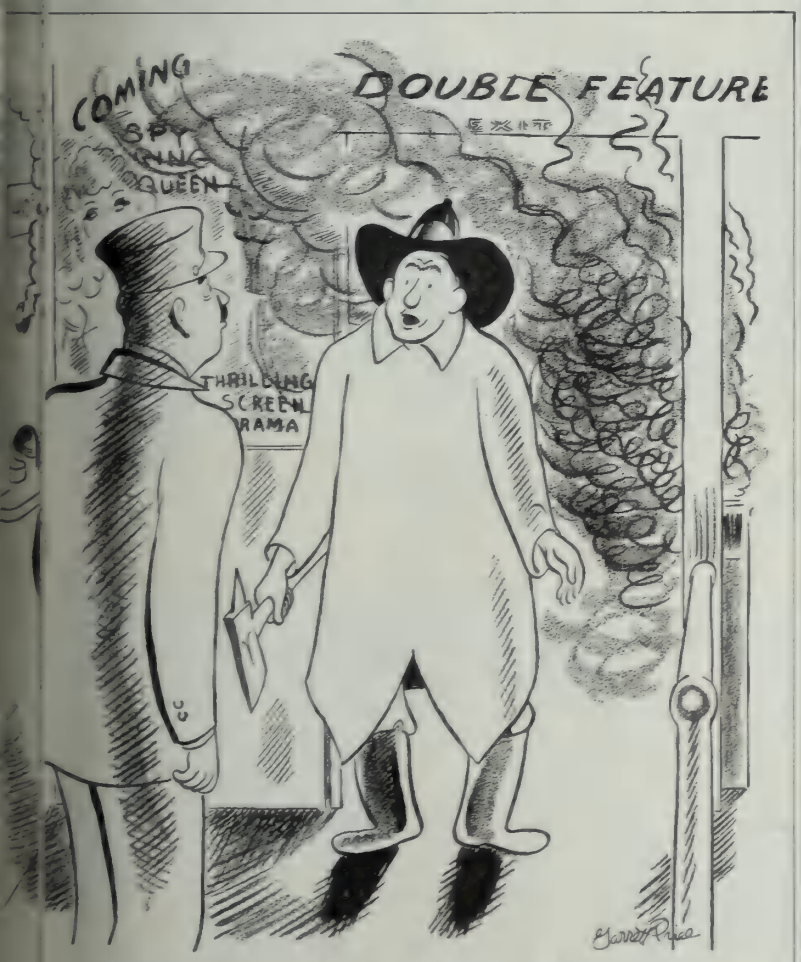
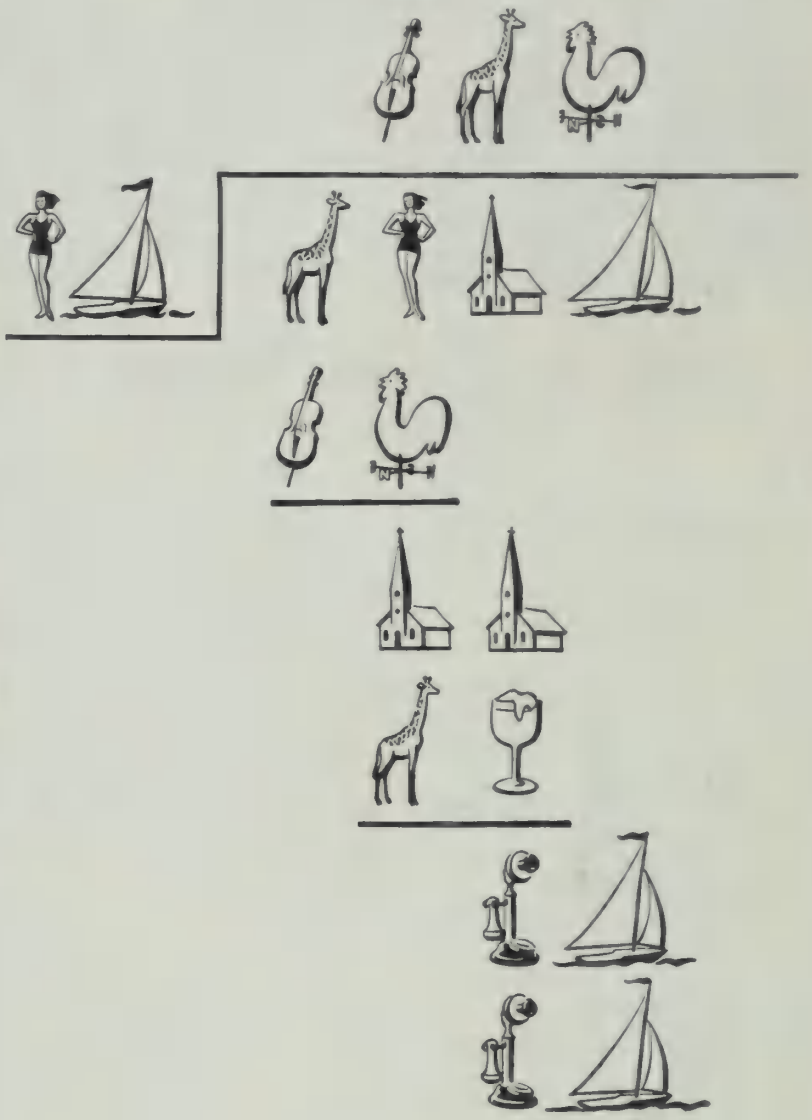
Nev- en the bitter Mr. Dirksen Mr. Mellett as "a man of an of capacity."



tt got $10,000 a year and his ed upward of a million dol- ly from Congress until it million and a half for 1940 elf hamstrung by a fed-up Senate. But Mr. Mellett had done a rather large job in his quiet way. He had set up machinery to co-ordinate relief and recovery agencies throughout the country although the machine never quite got going. He organized state lobbies to promote New Deal legislation in legislatures and guide the same to adoption. He did a lot of wire pulling in congressional committee rooms for the White House and was a painstaking researcher for members of Congress. That gives you an idea—but only an idea.

Not a minor part of his job was to whoop it up for new New Deal projects and enterprises—the Wage and Hour Act, the Home Owners Loan and the like. His "confidential reports" to Mr. Roosevelt are still confidential in spite of many vigorous and frequently angry demands by congressmen that they be made public. As a propaganda-film producer, Mr. Mellett was unable to finish what would have been his masterpiece and which Mr. Roosevelt wanted more than any other. It was to be called Ecce Homo, to cost $165,000 and in Mr. Mellett's own words to be a "documentary film designed to dramatize certain aspects of the unemployed problem—man in the machine age." Congress refused to appropriate the money.

When the National Emergency Council withered for the want of appropriation, it reappeared, considerably abbreviated, as the Office of Government Reports with somewhat similar but less expensive duties to discharge. And to keep Mr. Mellett busy at his work on Capitol Hill, he was made Administrative Assistant to the President—one of those jobs for men with a passion for anonymity.



Thus Mr. Mellett—the very capable gentleman who will very likely be the American censor should the United States slip into this war. Some time ago Mr. Roosevelt assigned Mr. Mellett to work up a plan. He is still working on it. He says that drafting such a plan is simple enough.

"But the administrator," he adds, "is going to win no popularity contests."

"The men won't leave the women, and the women can't get their shoes on" GARRETT PRICE

SIMPLE ARITHMETIC

4152 divided by 12 is a very simple problem in arithmetic.

It looks a bit confusing, of course, if you use a bathing beauty as a symbol for one, a sailboat for two, a fiddle for three, and so on—though there's no reason except convenience and convention why you shouldn't. (They're much more interesting than the symbols "1," "2," "3," etc.)

We're not advocating the reform, of course . . . merely making the point that figures, as employed by Business and Industry, *are* symbols, abstract and meaningless except in terms of dollars, or customers, or carloads, or what have you.

And, in this modern blitzworld, the validity of yesterday's figures is almost as questionable as the validity of yesterday's headlines. Management needs *accurate, up-to-the-minute, intelligently interpreted* figures if its decisions are to be sound and profitable.

That's where "Comptometer Economy" comes into the picture. For, with modern Comptometer adding-calculating machines, and modern Comptometer methods, Management is able to command *more figure work* in *less time* at *lower cost.*

Churchill was Right

THE more we ponder Italy's misfortune in this war, the wiser seems Winston Churchill's advice to Italy to get out of it—even if that entails booting Benito Mussolini out to some new St. Helena for life.

We feel this way in spite of the loud howls of loyalty going up from the wheel horses of the Fascist party, and the echoes of same emitted in this country by Italians who don't chew Fascist propaganda long enough before swallowing it.

It has been an open secret since Italy entered the war that the Italian masses' hearts weren't in it. It has been an even opener secret that the Germans despise their Italian ally, and hope after a German victory in the main war to cut Italy down rapidly to vassal status.

Benito Mussolini hasn't done anything at this writing to sell his people on the war or to sell the Germans on Italy's power and prestige.

He attempted a blitzkrieg in Greece, and by the time that fight was a month old was making big victory speeches to the Italians with his mouth but wigwagging behind his back to Adolf to do something for heaven's sake to stop those Greeks. The last we heard, Adolf wasn't falling all over himself to oblige.

As if this wasn't grief enough for one Invincible in one winter, the British fleet's air arm knifed into Taranto one night and cut down three of Benito's six battleships. The British navy followed this one up by sending light units into Mussolini's own personal Adriatic to toss 100 1-ton shells into Valona, his main Albanian base.

At the same time, Mussolini's greatest tragedy of the war to date was warming into its first act in Egypt. Marshal Rodolfo Graziani had taken Sidi Barrani from the British long since, and had made it into a strong advance base for a drive on Cairo, Alexandria and the Suez Canal. The British in Egypt had been looking pretty sick all fall.

Came a day in December, though, and the British sickness turned out to have been faked. Gen. Sir Archibald Wavell, commanding the British and Imperial Army of the Nile, cut loose on Nibeiwa and Sidi Barrani with a full-dress blitzkrieg, in the latest approved German style and then some. And whereas Benito's blitz had backfired on him in Greece, Wavell's blitz all but blew the shirt off Graziani's back in North Africa.

Sidi Barrani was down in almost no time, and so was Buqbuq, or Bagbag. Solum and Sidi Omar cracked five days later, with Fort Capuzzo going capoot and the British storming across the Libyan border to take their first piece of enemy territory captured in this war.

A 30-day, long-range, man-saving siege of the big port and base of Bardia followed, with Wavell's artillery and dive bombe ing the town from the land side warships showing up periodically erything but their gun turrets into sea.

And proceedings paused with t of the Anzacs into Bardia, singing ing to See the Wizard, the Wonde of Oz." They didn't find the wizar manding general, who went by th name and nickname of Gen. Annib Whiskers) Bergonzoli, had done a t like vanishing act. Bardia was do The British reckoned the total pa from Graziani as 94,000 men kille or captured, plus mountains of loot struck for Tobruk, 70 miles west.

Well, as we started out to say, ca people afford to stand much more and what he is doing to them? He and picturesque before the shootin we'd hate to live in a country head liability as he has become since th the generals and politicians he h power, we mean, of course.

It does seem that Churchill, tho against Italy with every weapon t from his war against Germany, ga ians the best and friendliest adv when he counseled them to give boot and tell Adolf to finish his ow

Stand by the President

Let us say to the democracies: "We Americans are vitally concerned in your defense of freedom. We are putting forth our energies, our resources and our organizing powers to give you the strength to regain and maintain a free world. We shall send you, in ever-increasing numbers, ships, planes, tanks, guns . . ."

In fulfillment of this purpose we will not be intimidated by the threats of dictators . . .

The nation's hands must not be tied. We must prepare to make the sacrifices that the emergency—as serious as war itself—demands. Whatever stands in the way . . . must give way to the national need. —*President Franklin D. Roosevelt.*

In the words above quoted, we believe President Roosevelt spoke the majority American mind with regard to this war.

For better or for worse, most Americans have decided that this nation cannot and will not stand idly by while the dictators knock out the remaining free nations of the world.

One reason for this decision is that this nation cannot be happy, and may not be able to remain free, in a world of slave nations.

Another and probably more potent reason is the inborn American sympathy for anybody who will stand up and fight for freedom.

The illimitable courage of the British—the fatalistic doggedness of the Chinese—the heroism of the Greeks—the grim and dauntless sabotage known to be going forwa day in conquered Holland, Belgi Czechia, Norway and Denmark things have fired anew the ancien determination to help the underdo

That is the way this people is m ter or for worse. Dictators who d stand this cardinal American t understand us at all. It may be a Certainly in this war democracy odds. But so we are made; and these lights the majority of us are act, come what may.

The word for Americans, we Stand by the President.

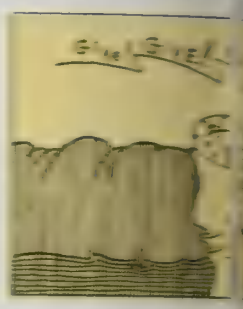
ANY WEEK

BEING a patriot of the more vociferous and ground-pawing school, we hate to mention this, but we've recently been told by a group of high-ranking Army officers that there are lads in this new Army of ours who are not completely virtuous. In fact, one or two of them are going to be court-martialed unless, haply, they should mend their ways. To remove us from the dismals into which this news cast us, one of the officers told us about a young warrior—a Filipino, by the way—whom he defended before a court-martial in Manila. Juan, as all Filipino soldiers are named, had shot and killed an escaping prisoner. You are permitted to shoot escaping prisoners, but afterward you must stand trial for murder. It's a formality whereby your record is kept clean. Questioned by the court, Juan told a straightforward story, demonstrating, incidentally, that he knew his regulations. "What did you do first?" the court asked. "I shouted to halt," said Juan. "They do not halt." The court looked shocked. "Then what?" Juan replied: "According to regulations, I fire a warning shot." This time the court nodded approval. "Quite right. And then?" Juan looked apologetic. "I missed," confessed he.



ALSO we got to talking to a German propagandist, a jovial fellow who does not deal in apologetic literature nor condemnation of Britain. He just doesn't believe that democracy can survive and scoffs at our contention that he really means plutocracy and that democracy will survive all the Hitlerian political racketeers to the end of time. "Anyway," we said, "we don't like Nazis. They're arrogant, cruel, stupid, humorless and—" But there he stopped us. "Not humorless," he protested. "Perhaps you do not know that in Berlin there are followers of the Fuehrer who even now speak of eventually invading the United States to save you from invasion by the British." Which explains why he's our pet Nazi.

WE'RE notified by Miss Eugenia Borrells of Washington, D. C., that several obscure but probably subversive citizens are thinking of launching an Aid-America movement. Personally we don't think it will be successful in times like these. Nevertheless, its obviously selfish promoters propose to go ahead, hopeful of raising a fund and enlisting the patronage of a group of influential citizens who will have the courage to let their names be printed on the Aid-America stationery. Influential as we are we nevertheless refuse to become a sponsor. We are not to be caught in a pro-Nazi trap so easily. "Briefly," writes Miss Borrells, "this unique organization's purpose is to urge that a part of the munitions manufactured in America be kept in America—just in case. Furthermore, Aid America hopes to convince the country that there are still people here who need overcoats, socks, vitamin pills and a few kind words. Are you listening?" But maybe we'd better turn the letter over to the F.B.I.

OR MAYBE we'd do better to pay no further attention to it. Anyway, we have something to do that's worth while doing. Something we'll understand. We've been invited to go to Florida to watch the Yankees train. Here's something that needs no donation-seeking propagandists. In more than half the states in this emotional Union it is a more serious crime to bribe a baseball player than it is to bribe a legislator. And that is as it should be. It's harder to replace a good second baseman, and we'd give you the entire legislatures of New York, Pennsylvania, Illinois and California for one good southpaw pitcher. Or aren't you that easily gypped? Anyway, we're going to sneak off to Florida if we can, and swap profundities with Joe DiMaggio, Joe Gordon, Gerald Priddy, that Rumatic boy, Red Rolfe and Bill Dickey. And get grunted at by Joe McCarthy.

AND we're warned by Mr. Joseph J. Holden of Yonkers, New York, that if this country is forced to fight we may possibly lose before firing a gun. "Frankly," sighs Mr. Holden, "we're likely to be so emotionally exhausted that we won't have anything left. The way things are going now, actual hostilities will be an anticlimax." And to prove it Mr. Holden had just returned exhausted from Redding, Connecticut. Under the direction of his host he spent the week end digging bomb shelters, being drilled in the arts of home defense and galloping two miles to an open field where he and seven others fired shotguns at the sky—antiparachute exercises. Once they routed him out at two in the morning to shoot parachutists. When he complained they asked him to think of what his plight would be were parachute troops to appear some time and catch him untrained. Mr. Holden got home in a pretty depleted condition. Although it was late Sunday night he had no sooner fallen into a fitful slumber than his telephone rang. A woman was calling. "Give, give, give for England and democracy," she said in a tone which Mr. Holden describes as unearthly. "It is later than you think," he replied. "I was accosted by a woman—" demanded [illegible] "Speaking," said Mr. Holden, [illegible] has purchased a [illegible] shoots horizontally.

WE'VE just been told [illegible] we buy our early [illegible] that, due to the war [illegible] shortage of spinach [illegible] seed comes from Holland [illegible] or some such place. A [illegible] night, because he's a [illegible] man and he's having [illegible] he's "setting them as [illegible] that's what ought to be [illegible] seed anyway. But the [illegible] letter that warms us [illegible] planting spinach this [illegible] the seed shortage is [illegible] the large growers are [illegible] from your vegetable [illegible] we've either paying [illegible] being told sadly that [illegible] ach on the market." All of [illegible] makes a nice timely [illegible] letter we've just got [illegible] Blankridge of Nash[illegible] Mr. Blankridge is a [illegible] reads seven a day—e[illegible] that, he reads ten we[illegible] cluding this one. Bl[illegible] spinach. "However, [illegible] nine journalists serve [illegible] be. "You comfort m[illegible] edge that I'm not the [illegible] in this country."

MR. WHEATLEY [illegible] Santa Cruz, California, [illegible] enously volunteered t[illegible] his section. He promis[illegible] "pressives, both sub [illegible] pop up in Santa Cruz [illegible] accompanied by a [illegible] which we learn, must [illegible] him, that something [illegible] the Santa Cruz lighth[illegible] tablished in 1868." re[illegible] "when schooners ma[illegible] rail. Ten years later [illegible] railroads. The Coast [illegible] this out and says w[illegible] along with an [illegible] light on a fifty-five-f[illegible] tower without anyon[illegible] two of the 15,000 [illegible] have had for the pa[illegible] years."

Where does he put it?

NGSTERS, as they reach their teens, often
p at xtraordinary capacity for food. Many
zled other has said, "I don't know where he
t!"

s im rtant for parents to realize that in the
rity cases, such an appetite is normal
houl be encouraged. One important excep-
of c rse, is the child who shows a tendency
esity and in such a case a doctor should be
lted

ring he teen age, a normal child is excep-
ily tive. Each year he is adding 2 or 3
s to s height and as much as 10 pounds or
to h weight. Therefore, a youngster has to
larg amount. Too little food, or the wrong
can nder normal development at this time
s tr as in infancy.

ur c tor will tell you that an adolescent
's ac vities can be as strenuous as a manual
er's ometimes requiring from 50% to 75%
foo than is needed by the average adult.
's wi it may be perfectly proper for Junior to
awa lots more dinner than his office-work-
Dad!

Three generous meals a day should include milk, cereals, vegetables, fruits, meat, and eggs—all so necessary for growth and good health. Furthermore, these meals should include wholesome desserts to satisfy the "sweet tooth" that boys and girls usually develop.

▶ This doesn't mean, of course, that the youngster should be free to gobble anything at any time. Simple, sensible snacks may be given to the child at appropriate times if they do not affect the child's appetite at regular meals. Good, satisfying foods like milk, bread and butter, and fruits are usually easy to keep on hand for the hungry young one.

In between times—right after school, for instance, but not too close to the next regular meal—such wholesome foods tend to discourage round-the-clock "nibbling."

To help you satisfy youthful appetites, and also to avoid one-sided or indigestible diets, Metropolitan offers a helpful, free leaflet, "When You Are In Your Teens."

▶ "THE PROOF OF THE PUDDING"—a ten-minute, Technicolor movie on food and health—has just been released by the United States Public Health Service and the Metropolitan Life Insurance Company. When it is shown in your neighborhood, it will be worth your while to see it.

You'll like yeast  this new way

HARRY: What a good idea, smarty! I had that up-and-coming feeling, just like now, when I was eating yeast. But I didn't like the taste. BETH: Well, you'll like *this* taste! It's like oven-fresh bread! Millions of old yeast-eaters like you are going to fall for it. Twice a day for me . . . and it *does* make a difference.

HARRY: I'd give it a work-out if I thought I could stick with it. I believe what the authorities say. "Yeast is one of the richest natural sources of the amazing vitamin B complex." BETH: Believe it! I know it! And maybe you aren't getting enough of these vitamins. Drink it first thing in the morning, last thing at night . . . See if there isn't a boom in your personal pep!

MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's *Fresh* Yeast

DRINK IT . . . TO YOUR HEALTH!

WING TALK

ALTHOUGH foundations for our modern air-travel system were poured in 1926 with the Air Commerce Act, hardened in May of the following year by Lindbergh's journey to Paris and by the ensuing heroic age of ocean flights throughout the late twenties, it wasn't until 1930 that scheduled air transportation really started to take form.

That year began the decade that can be fitted to Rudyard Kipling's famous aviation reference: "The opening verse of the opening page of the chapter of endless possibilities." It was a rich and confused decade and in view of present criticisms it is reassuring not to forget its glorious high lights.

It saw the disappearance of the barnstormer (peace to his hay-wired struts), the Air Mail Scandal, the introduction of high-speed planes, stewardesses and blind or instrument flying; the scheduling of both the Atlantic and the Pacific; the establishment of many safety records, including the first wholly safe year, and the recognition of scheduled air-travel safety in your ordinary life-insurance policies.

Engineers' libraries are filled with books that list the technical gains of this decade. However, for lay folks like you and me its real importance was two-fold:

First, aviation became a "business," providing commonplace daily transportation.

Second, aviation ceased to be a rich man's sport and became a pleasure that anyone in normal health and moderate circumstances might enjoy.

In 1930, 374,935 passengers were carried by domestic scheduled airlines. In 1939, the tenth year, 1,876,051. About 3,000,000 in 1940. In 1930 the cheapest new private-type plane cost $3,500. In 1939 you could buy a better and safer one for about $1,000.

All that is why airmen call the decade just ended the "Thrilling Thirties."

Also it is why Pat (W. A.) Patterson and Tom Braniff, among other well-known operators, are probably not too far out on the limb when they enthusiastically tell everybody that aviation soon will be so integrated into your private business lives, that the decade we are now in will be historically known as the "Flying Forties—"

VIGNETTES of Growing Up:

More passengers go through New York's airline terminal every *two days* than flew on all lines in all parts of the United States during the whole first year of regularly scheduled air service, 1927.

It took one typical company, American Airlines, 8 years to reach its first-millionth passenger—two more and a couple of months to count its second millionth. And less than one year for the third millionth to walk aboard. . . .

A dozen years ago scheduled air traveling cost you about 12 cents a mile—$400 from coast to coast, and like as not you sat on a mail sack. Nowadays, it costs you an average of under 6 cents, or $149.95 across the continent in feathered and pillowed luxury.

There is no way of estimating precisely the total number of Americans who have flown as passengers since the days of the Wright brothers. Count the "distinguished guests" of Curtiss, the Wrights, other pioneers, add the guinea pigs carried by the barn- cow pastures or fair grou friends of plane owners of the splendid charter available all over the nati sum up, in the opinion of S. Gorrell, president of Transport Association, to present total population o

It is of record that sche alone have carried about equivalent to the popul York State plus Oregon.

Why you should start young fingers thinking early

's MIND is a storehouse of unfinished
ess.
v the great, fleeting thoughts it con-
se soaring sparks of imagination, could
t in mid-air . . . *put down on paper!* But
ping progress of his pencil lags far
youngster's impatient mind. And the
is often lost in its laborious execution.

That's one reason psychologists and modern educators advise a Portable for your child. Many tests in the nation's schools have shown that "typewriter" children think faster, better, and clearer than those who do their work the old-fashioned way.

One such test disclosed that they get 10% to 30% higher grades in many subjects. Another, that use of a typewriter decreased English errors by 75%—cut spelling mistakes in half—increased volume of work *by 17%!*

Why? Because the greater speed and ease of typing release your youngster's mind for thinking—enable his fingers to keep pace with his racing thoughts—help him to concentrate—develop accuracy—stimulate his imagination.

*Trademarks Reg. U. S. Pat. Off. Copyright 1941, Royal Typewriter Co., Inc.

gs a youngster can learn will pay higher dividends in
the typing. For typing can be an immense asset in
pressions . . . or a career *in itself*. And it's easy to
perom the "Self Teacher," shown below. This pat-
ecomes with every Royal Portable. With it, even a
hool child can learn the touch system in short order.

Why do teachers recommend the Royal Portable for home use? Because the Royal Portable has a keyboard just like that on a full-sized office machine. In fact, this Royal Portable is almost an exact *replica* of a standard typewriter. It has the same famous features which have helped make the full-sized Royal the World's Number 1 Typewriter.

Such as: *MAGIC* Margin* (just flick the lever, to change and set margins) . . . *Touch Control** (with which the user can adjust key tension to his particular touch) . . . *Bob-less shift* (the carriage doesn't clatter or jump up when the shift key is struck). And these are only *a few!*

Yet the Royal costs no more than other Portables! In fact, you can *own* an easy-writing Royal for about the cost of *renting one*. Your dealer is authorized to sell you a Royal for as little as *$2 down and $3 a month*—including the small carrying charge. See your local dealer or write to Royal, 2 Park Ave., N. Y. C., for *a free trial in your home.*

ROYAL ARROW MODEL—$54.50. OTHER MODELS—$34.50 TO $64.50

Royal Portable

THE STANDARD TYPEWRITER IN PORTABLE SIZE

TEST RESULTS HAVE SHOWN

Listerine's amazing ability to fight colds!

Year after year, evidence from painstaking research with test groups continues to pile up supporting this impressive fact:

Those who use Listerine Antiseptic had fewer colds, milder colds, and colds of shorter duration than those who did not use it. Moreover, Listerine Antiseptic users contracted fewer sore throats.

Kills Associated Germs

The reason for Listerine Antiseptic's success, we believe, must be this:

That it kills millions of surface germs associated with colds, known as the threatening "secondary invaders," some of which are shown above.

These prevalent types of germs, unless combated, may invade the tissue and accelerate infection. Many an authority gives them credit for causing most of the distress of the common cold.

How thoroughly Listerine Antiseptic attacks them has been recorded by tests that showed that even 15 minutes after the Listerine Antiseptic gargle, germ reductions on mouth and throat surfaces ranged as high as 96.7%—an hour after, as high as 80%. Yet Listerine Antiseptic is so safe, so gentle in its action, that it does not irritate the tissue.

Fight Colds Intelligently

Get the habit of using Listerine Antiseptic night and morning as a precaution against catching cold, and if you feel a cold coming on, increase the frequency of the gargle. This emergency treatment may spare you a nasty siege.

Buddhism teaches that there are only three cardinal sins—stupidity, ill-will and sensuality—and symbolizes them, in religious drawings, by the hog, the snake and the dove. —*By Alfreda Sill, New York, New York.*

El Salvador in Central America, which surpasses all other countries in the number of volcanoes that have erupted in modern times, is the only country where a person, regardless of his location, can always see one, if not several, volcanic peaks. The chief one is Izalco, whose almost daily activity has earned for it the title of "The Lighthouse of the Pacific."

Many business definitions differ from those in the dictionaries. A piece of furniture is not an antique unless it was made before 1830. A fire is not a conflagration until it "spreads over a wide area and destroys numbers of buildings under a diversity of ownership."

America's foremost "fire fan" is Dr. Harry M. Archer who, during the past forty-four years, has rendered medical aid, without pay, to about 50,000 firemen and civilians injured in fires in New York City. In reward, the fire department has given him his own uniform, three medals, the rank of deputy commissioner and has purchased for his use a $17,000 ambulance equipped with twenty-five portable beds, which he takes to all important fires.

The Cambridge Bibliography of English Literature, recently completed in four large volumes after ten years' work by two hundred literary authorities, lists forty thousand books by sixteen thousand authors, or every work written over a period of 1,300 years that can be regarded as a contribution to English literature.

STYLED AHEAD BUILT TO LAST

WHEN I WAS 28, I thought I'd probably never get married.

I'd always been over-tall, and my hands and feet were always getting in my way, and my clothes never looked nice on me the way clothes looked on other girls.

It seemed pretty certain that no knight would ever come along on his big white charger and carry me away.

But a man did come along. Everett wasn't the masterful kind you dream about when you're sixteen, but a shy and awkward sort of fellow who didn't exactly know what to do with *his* hands and *his* feet, either.

He saw something in me that I didn't know I had myself. I actually began to feel like somebody. In fact, both of us did. Pretty soon, we got so used to each other that we felt lost when we weren't together, so we figured it probably was the sort of love you read about in the story books, and we got married.

It was a day in April, and the apple trees were in blossom, and the whole earth smelt sweet. That was nearly 30 years ago and it's been that way almost every day since.

I can't believe so many years have gone by. They just carried Ev and me along so peacefully, like a canoe on a quiet river, that you didn't realize you were moving. We never went to Europe. We never even went to California. I guess we didn't need to, for home was big enough for us.

I wish we'd had children. But we couldn't. I was like Sarah in the Bible, only the Good Lord didn't work a miracle for me.

Perhaps He thought that Ever[illegible] was [illegible]

Well, Ev died two years ago la[illegible] April. Q[illegible] and smilingly, just as he had l[illegible]d. The [illegible] trees were in blossom and the ea[illegible]h again [illegible] sweet. I felt too numb to cry.

When my brother came in to h[illegible] me s[illegible] out Ev's affairs, I found he'd bee[illegible] thoug[illegible] I suppose men built like him al[illegible]ys are [illegible] wasn't a great deal in the bank, i[illegible] there w[illegible] insurance policy that will take [illegible]re of [illegible] needs as long as I live.

I'm as content as a woman ca[illegible] she really loved has gone.

o as ee fit," Marcel Denis said. "I simply want you to un-
and y position. I expect nothing from you but your work"

hains from France

W liam A. Krauss

TRATD BY RONALD McLEOD

sideng the circumstances of his
riag it was not surprising that young
cel Denis should hate his bride

AT SIX o'clock in the morning of a day already brilliant with tropic sun, Marcel Denis, his hair drawn loosely back in the contour of fashion, his pantaloons fresh from the tub, left his house and started afoot for Cayona to find himself a woman and take her for a wife.

His mind was not entirely at ease as he picked his way along the stony path that followed the ridges toward the glorious east. One half of him debated the other half, sometimes warmly; his attention was wholly absorbed. He did not feel the sun. If birds sang, he did not hear them. His eyes were fixed upon the path, straying neither to the ocean that spread like a fine dark blue blanket in the north nor to the narrow and turbulent windward channel separating Tortuga from the main island of Hispaniola. This was assuredly no morning for the idle admiring of West Indian scenery; the immediate problem of acquiring a wife—and the still debatable wisdom of such a step—occupied all his thoughts.

The women would be at Cayona at nine o'clock.

The time and place had been announced a week ago by the governor, a most precise, most punctual man. And now, only a little past six, there was no need to hurry. Yet Marcel Denis walked briskly, as was his custom; and it is worth observing that when his foot caught in a root and he tumbled headlong in the path, the deep preoccupation of his mind was scarcely disturbed. He simply picked himself up and went on walking and went on thinking. Such was his concentration. It was a full hour later, as he stood in the hibiscus grove on the steep green hill above the governor's house, that he reached his clear decision—and sufficiently justified it to himself.

This was necessary and this was good.

This he would do: He would pick a woman that morning, marry her at noonday, and in the afternoon, when the trade-wind clouds tempered the sun's heat, take her up the sharp trail to his two-room log house and say to her, "This is your home. There is work to do." He murmured the phrases half aloud, trying them. They were sound; they explained his position.

For Marcel Denis had no romantic notions chasing about in his brown young head. He told himself—simply, sternly—that he was taking a wife in the same spirit, and for much the same reasons, that he would buy a mule. That is to say, for practical reasons. He needed help to grow his tobacco, he needed a woman to cook his food. Very well, he'd find a woman. And a proper one.

HE SAT on a stone, stretching his legs, and his eyes rested for a minute or two on the stout wooden residence of Governor Ogeron, in whom the authority of the West India Company was established. It was a gaunt, bare house, half fortress—unattractive but strong. Close by were the barracks of the soldiers; the town was still farther down, on the water's edge. Marcel Denis could see, far below, the roofs of the storehouses, the uniformly brown dwellings of the merchants.

To the east, on the curve of the blue bay, lay the ramshackle collection of saloons and dives that catered to the special requirements of the cutthroat filibustering crews. Cayona was a brawling, roistering town in 1668; if Marcel Denis did not entirely approve of it his reasons had nothing to do with moral judgments. He was by instinct and training a countryman; he mistrusted towns; he disliked neighbors peering in his windows and plucking at his sleeves. He had found what he wanted on the high, lonely, wind-swept hillside in the west of Tortuga, where, in ground made wonderfully fertile by sun and rain, he grew tobacco to sell in France.

He drew a deep breath; he arose and started down the trail to Cayona. Now, ahead of him, was the roadstead of the town, with a dozen ships swinging lightly at anchor, poles bare, sails drying on deck; there was a quick flurry of activity in the harbor. Boats were being put over from the French frigate that had carried fifty women of Paris to the unruly small island of Tortuga. They moved skittishly in toward the landing stage. Seen from above, their oars scraped the water like black fingers, a spidery movement. Marcel Denis watched, and was not unaware of a flush of excitement.

THE fifty women of Paris were wholly the idea of Governor Ogeron.

Tortuga was first a colony of pirates—or freebooters, filibusters, buccaneers, as you please—their activity was directed especially, though not exclusively, against the ships of the Spaniards. They cruised the coasts of Cartagena and Caracas, sacked the maritime settlements of Campeche and Maracaibo, impudently attacked Santiago and San Cristobal de la Habana, the queen cities of Cuba. Their fast fly-boats hid behind the headlands of Cape Saint Anthony and Cape de Catoche, or lay in waiting under Cape Corientes, prepared to scurry out and defy ships of thirty guns. Tortuga was fat with plundered riches; but the filibusters poured their money into the gro

spri and summer you'll meet uch nvoys on the highways as ar p rs along—so come along he 2th and see what it's like the ide, as a new regiment fro ts home town to a faraway for t ning.

260 is a lineal descendant of 60t Artillery of the World War. , un federalized, a National out with headquarters in a e-do building in downtown ngto Most of its officers and are n at the game, but there are enough old-timers to handle it effectively.

Because the regiment was a Guard unit, the Regular Army paid little attention to it as it rolled along. When it camped for the night at military posts, it got along as best it could. At Fort Bragg, outside Fayetteville, North Carolina, it was sent to unfloored shacks, bitterly cold, without any sanitary facilities. At Camp Jackson, near Columbia, South Carolina, things were a little better.

It was the little towns and the folks along the highways that really welcomed the convoy and did things for it and went out of their way to help. They had known for some time that the regiment was to pass by because its route had been published.

"And," said Colonel Walter W. Burns, the commander, "if we'd accepted all the come-and-set-and-stay-awhile invitations we got by mail, phone and wire, we'd have been eleven weeks on the way. Our schedule is seventeen days."

"And Quitman feels proud to be chosen as host to the soldiers for a night," said Edna Cain Daniel, who owns and edits the Free Press.

What Quitman did is typical of the other small towns: Mrs. Daniel ran off a small extra of her paper, telling the folks of Brooks County to come in and

The Man for Aurora

By Jack Macmurragh

ILLUSTRATED BY HARRY MORSE MEYERS

"If you weren't an old man," I said, "I'd haul you out of there and beat a hole in the fender with your head"

A stubborn man's only conqueror is the woman who loves him stubbornly

IF HE were to come to me tomorrow and say, "Silver, I want a leg," I think I'd have to lean up against the switch shanty and start butchering one of mine off.

That first morning when I saw him swinging along beside the yardmaster, I thought: There's the man for Aurora! As plain as though she were really there, I could see Aurora Fynn beside him. That isn't so funny when you stop to think of it.

The yardmaster said, "Silver, this's Larry Sleeman. Break him in gentle." To Sleeman, he said, "Don't let Silver's white hair fool you."

Larry Sleeman was the prettiest man ever in the Michigan iron country. His teeth were flashing white, and the hair under the hat on the back of his head was black and curly. He had big shoulders, and he carried them high, like a man who knows he has good shoulders. Because I'm an ugly man myself, I notice fine-looking people. Shoulders I have, but my face, not exactly pretty to start with, has been kicked around a bit.

Most men—even us boomers—are a little subdued the first morning on a new job. But not Larry Sleeman. He said, "Ever switch anywhere else but here, Silver?"

I laughed. "Name a railroad north, south, east or west, and if I haven't thought of workin' for it, I've been fired from it."

"That's fine," he said. "I was afraid that the Jack O'Brien'd put me with some shuffle-footed local monkey to show him a little fancy switchin'."

The engine came out of the roundhouse. "Get on her back," I said to Sleeman, and waved good morning at Old Dynamite Fynn, the hogger. "I been here three summers, so I'm practically a home guard. Get on her back, and get fancy."

He turned out to be a good enough switchman, and a pretty man to watch. He'd get on or off a car with the flourish of a skater. But a lot of the boys in those days were Fancy Dans. Sleeman was a good man on his feet, though. You could see that even when he walked.

I watched him come across the red iron-ore street from the Bannerman House that night after supper. I was sitting on the ledge in front of Rogan's saloon, and he sat down beside me. We just sat there with the evening sun warm on our faces, resting, waiting for bedtime.

I remember I was watching an ant haul a chunk of bread along the planks of the sidewalk, when I heard Sleeman say, "Oh! . . . Oh! . . . Oh! . . ." with a pause between each word, as though an angel had stuck its head around the corner, looking for him.

Before I looked up, I knew he'd seen her. There was that in his voice.

SHE was across the street. She was walking along with her notebook under her arm, and a pencil stuck in her dark hair. She looked across then, and saw me, and waved. I stood up and tipped my hat, and she went on down the street.

Larry Sleeman just sat there with his hands on his knees and his eyes wide. "Who is she?" he said. "Silver, who is she?"

"That's Miss Aurora Fynn," I said. "The daughter of the engineer we had today. She's the lady reporter on The Diamond Drill."

He just sat there looking after her. I don't think there was ever another girl like Aurora Fynn. She always reminded me of a deer, the easy, proud way she carried herself, and t
legged sleekness of her—

ig Saturday. I'd planned on
gh times for me and Gracie
s the three dollars and sev-
s I'd saved could buy us. But
nted on what would happen
day morning before that fine

iler trouble, of course. Al-
ver, since the first set of Bas-
steaded our farm at Valley
e been plagued with the
ghbor trouble over dogs and
stray hogs and fence lines, a nagging and a jowering down the generations. Though there's never been any real rifle feuding, the young ones like me and Earl Luther have done a heap of downright scrapping. Earl Luther was a boy who liked to lurk. He was the deadest sort of shot with rocks. When I'd pass along unbeknowing, he'd hop up and let fly a volley, then make off racketysplat. Even after I'd reached my manhood size, I still used a careful eye when I had to pass by thick bushes, gullies, and such.

This latest Friday sample of the old trouble was when Fonzo Siler, Earl Luther's pap, had missed his new-bought rastus plow. He claimed he'd left it setting near our fence line. Happened also that Fonzo'd run out of bust-head whisky and was just wild, crazy sober. So he stormed over to where Pap and me were working in our bottom field. He accused Pap of thieving that plow. It was just too many for Pap. His temper got loose and he gave Fonzo's long, bristly jaw a good polishing and then warned him off our land.

Silerlike, Fonzo had Pap arrested and Squire Porterfield held a justice-of-the-peace session on it that same Friday morning.

Pap didn't deny he'd whanged on Fonzo, so Squire Porterfield did sentence and condemn him for disturbing of the peace. It was either a fifteen-dollar fine or thirty days on the county's disgraceful road.

Now, our main crop was sorghum. Cutting time and molasses making were closing in. Pap's a master molasses maker, and without him to oversee the stirring and taste every making as it ran through the boiling pans, we'd be sure to scorch or ruin anyhow a third of it. The squire knew as much, and he gave Pap a week's grace to scrape up the fine money. After that was settled, squire warned us, Fonzo Siler aimed to law Pap over the rastus plow.

Just before harvest, money is scarce. My three dollars and seventeen cents I'd saved for Big Saturday was the only cash on the place. We figgered together and Mommy said, "Son Ovid, it's up to you. Seeing as Pap himself can't be spared from the crop, you must get a week's job of town work and make fifteen dollars." I said, "I can live on my three dollars and seventeen cents enduring while I'm earning it."

So in the gray of the morning on Big Saturday I began tramping Dukedom over asking for jobs. Nobody needed me, nobody gave me hope. Now I was wondering if Gracie's daddy could maybe point me to some work.

(Continued on page 43)

Again he dropped his arm way back, got set and started to let fly. I must have forgotten to make my squinchy face, for Gracie was squealing, "It's Ovid!"

Evil Under the Sun

By Agatha Christie

ILLUSTRATED BY MARIO COOPER

The Story Thus Far:

HERCULE POIROT, noted Belgian criminal investigator, goes to the Jolly Roger, an unpretentious old hotel on an English south-coast island. A short time after he arrives, one of the guests—Captain Kenneth Marshall's wife, Arlena, who has been having an "affair" with Christine Redfern's husband, Patrick—is found dead, strangled, on the beach at Pixy Cove, which is not far from the hotel.

Naturally, Marshall is decidedly suspect. But, interrogated by Poirot, Inspector Colgate and Chief Constable Weston, he produces what appears to be a perfect alibi. Among the Jolly Roger's guests are Linda Marshall, Kenneth's daughter by his first wife; Miss Emily Brewster, an old maid—seemingly harmless; the Reverend Stephen Lane, a religious fanatic; an American couple, Mr. and Mrs. Odell Gardener; Major Barry, an old bore who had served in India; Rosamund Darnley, who had once been in love with Marshall—and probably still is; and Horace Blatt, a prosperous "life of the party" fellow.

Everyone is questioned. The one person who is known to have hated Arlena—Linda Marshall—has an alibi that is fully as good as her father's: At the time of the murder, she had been with Christine Redfern at Gull Cove, where Christine had spent most of the time sketching. So Linda is eliminated from the list of possible killers.

Colgate, Weston and Poirot go to a cavern—Pixy's Cave—not far from the scene of the crime. There, in the cave, they find a box. The box contains heroin! . . . Working with the greatest care, Poirot gradually accumulates a collection of clues. Among other interesting data he picks up is this: The Reverend Stephen Lane had once been in a home for mental patients—he had, it appears, felt quite sure that the devil went about in the guise of a "scarlet woman."

Linda Marshall tries to commit suicide—after writing a note in which she confesses that she had killed her stepmother! While she is unconscious, Poirot has a talk with Kenneth Marshall. The Belgian is by no means sure that Linda is guilty. He does not accuse the captain of the crime. But, after reviewing the case, he says: "It is impossible that you should have killed your wife—if you were acting alone. But . . . *supposing someone helped you?*"

Conclusion

MARSHALL stared at Poirot. "What the devil do you mean?" The quiet man was roused at last. He half rose from his chair. His voice was menacing. There was a hard, angry light in his eyes.

Poirot said, "I mean that this is not a crime that was committed single-handed. Two people were in it. It is quite true that you could not have typed that letter and at the same time gone to the cove—but there would have been time for you to have jotted down that letter in shorthand—and for *someone else* to have typed it in your room while you yourself were absent on your murderous errand."

Hercule Poirot looked toward Rosamund Darnley. He said, "Miss Darnley states that she left Sunny Ledge at ten minutes past eleven and sa in your room. But just ab Mr. Gardener went up to fetch a skein of wool for h did not meet Miss Darnle That is rather remarkable. though either Miss Darnle Sunny Ledge, or else she much earlier and was in yo ing industriously.

"Another point, you stat Miss Darnley looked into at a quarter past eleven yo *the mirror*. But on the da der your typewriter and pa on the writing desk across the room, whereas the mi tween the windows. So th was a deliberate lie. Later your typewriter to the tab mirror so as to substantiate but it was too late. I wa both you and Miss Darnle

Rosamund Darnley spok was low and clear: "How genious you are!"

Hercule Poirot said, rais "But not so devilish and so the man who killed Arle Think back for a moment. think—who did everybody Arlena Marshall had gone morning? We all jumped conclusion: *Patrick Redf* not to meet a blackmailer t Her face alone would have Oh, no, it was a lover she meet—or thought she was g

"Yes, I was quite sure of Marshall was going to m Redfern. But a minute Redfern appeared on the b obviously looking for he then?"

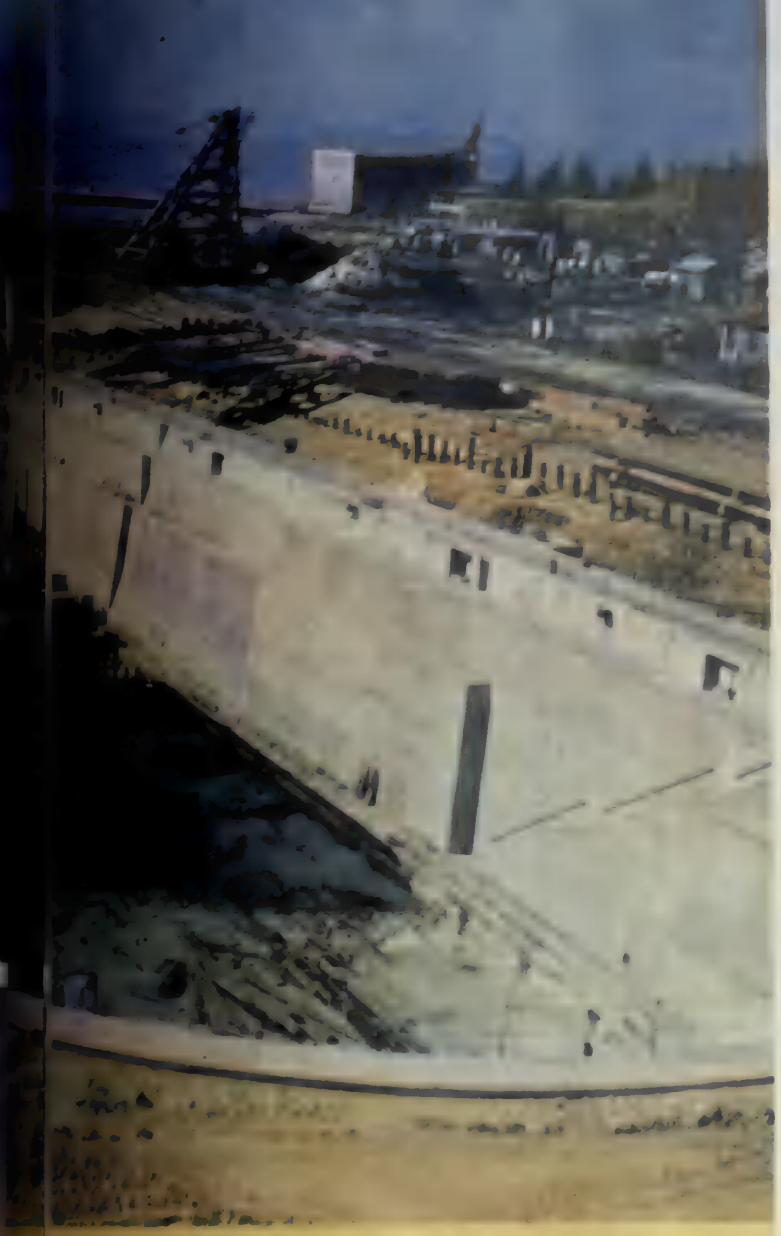
Mechanics overhaul a bomber at the Army's new Punta Borinquen base. The nearly completed hangars (see inset at right) are among the world's largest

Strictly defensive are the maneuvers of this crack native machine-gun detachment, stationed at San Juan. They are part of the 65th U. S. Infantry



Our Gibraltar on Sand

By Frank Gervasi

Down on Puerto Rico we're building the most important base in our Caribbean defense system. So far we've spent fifty million dollars on it. That's nice for the Puerto Ricans, but our island is no Rock—and our fortress will be open to attack from the skies

Isla Grande dry dock in San Juan harbor is here rapidly nearing completion. It is 672 feet long and will handle biggest American cruisers

Puerto Rico strategically important even in Spain's heyday, as its fortifications testify. From here, enemy ships were intercepted

FRAGRANT piles of lumber walled the road along the water front of Puerto Rico's San Juan under the overhanging bows of ships. Blockhouses of bagged cement, mounds of soil pipe, small mountains of oil drums, tar barrels and roofing materials, beer and nail kegs rose on the docks. Through the sun-drenched day and the flare-lighted night there was the grind of winches and the thump and crash of cargo. Laborers swore in Spanish and marines in whatever came handy.

Freight cars waited at sidings to take away the goods. Fleets of trucks butted through stagnant traffic and backed to the docks. But boxcars and trucks seemed as futile as the puny trucks of the stevedores. They could never reduce those heaps of materials, segregate them, route them to a hundred construction camps all over the island. But they did, somehow.

Freighters debouched tanks, cannon, trucks, armored cars, tractors. The half-open doors of guarded warehouses disclosed khaki-uniformed men checking rows of small artillery pieces, antitank guns and cases of ammunition.

The water front vibrated with the visible and invisible effort of men working against a dead line. You couldn't hear it in San Juan, but it was there—a clock tick, the beat of a metronome, or the rhythmic clang of a hidden gong that paced the men at work.

Twenty-seven thousand Puerto Ricans on WPA pay rolls and thousands of others privately employed labored with American engineers, soldiers, sailors and marines to build the key base of the U. S. A. in the Lesser Antilles of the West Indies. Fifty million dollars' worth of airplane hangars, gasoline tanks, airfields, a dry dock, barracks were taking form. And more will be built at this important segment of the arc of American defenses east of Panama.

Puerto Rico Rides the Boom

And all that because of a man named Adolf Hitler. He swung the figurative hammer against that imaginary gong and paced the sweating men who cursed him, war and one another. But they worked and on payday they cursed no one. For the war has brought a boom to Puerto Rico, an island paradox where fields lie fallow and the chimneys of industry are cold but where the artificial stimulus of defense pay rolls has generated a wave of prosperity that's flipped the calendar back to 1929. The deluge will recede by the end of 1942, but Puerto Ricans don't care about that. *Mañana*, to them, is always in the future and 1942 is still a lot of *mañanas* away.

By every law of economics Puerto Rico, its sugar industry depressed and its coffee markets—Italy and Germany—wrecked by the war and its needlework industry wiped out by New Deal legislation which tried to make employers pay wages they couldn't afford, ought to be in the slough of depression. But it isn't. Puerto Rico imported more lavender-colored convertible coupés, more whisky, champagne, perfumes, breakfast cereals in 1940 than it did in 1939, which already was a good year for the merchants who import and sell goods. The reason for this is that every day the defense projects pay $50,000 in pay checks and this money is spent as quickly as it is earned.

The Puerto Rican paradox only begins there. Its flag is American, its folkways and language and to a degree its loyalties are Spanish. The island goes about the job of preparing to defend democracy with a whoop and a holler louder than any other equivalent area anywhere under the American flag, but despite this and despite waste, it gets things done.

Projects somehow take shape—everything is "ahead of schedule"—despite the undisputed indolence of Puerto Ricans and notwithstanding a growing friction between the "continentals" from the United States and the islanders. Every day their drunken brawls land marines, soldiers, sailors and battered Puerto Ricans in the police courts. The Army officially admits the thing has gotten to be a major "problem."

Never Mind the Cost

Nevertheless, there's a vitality about the manner in which Puerto Rico is being converted, from a heap of ruined fortifications the Spaniards built there centuries ago, into an air, sea and land base—a vitality I didn't find in England, France, Holland in the days when they called it a phony war. It's the American way. Hurry and to hell with the cost. That there has been wastefulness and mismanagement in the haste nobody denies down in Puerto Rico.

But what was a coconut palm forest on Punta Borinquen on the northwestern corner of the quadrilateral island in July, 1939, was an airfield three months later with Boeings landing and taking off regularly on patrol duty from a 3,500 foot runway.

A year ago last September there were but 1,000 airmen, marines and infantry stationed in Puerto Rico. Today there are 12,000 men of these services. The U. S. Army alone has 600 officers, 4,500 enlisted men and those who haven't yet barracks—because there is still a time lag between defense requirements and congressional appropriations—live in camps, and you find them bivouacked all over the island.

What Puerto Rico means to U. S. A. Caribbean defense can be measured by the fact that the estimated cost of the island base rose from $16,300,000 before the war in Europe began, to $50,000,000 when Germany invaded the Low Countries. Since the fall of France estimates of what the finished plant will cost start at $100,000,000.

The hub of America's Puerto Rican defense wheel is on the Atlantic side of the island at Isla Grande, a reclaimed mud flat in San Juan harbor. There engineers are building the biggest naval and naval air base in the Caribbean. The Navy's Isla Grande dry dock is 672 feet long, 273 feet wide and will accommodate warships up to and including heavy cruisers.

The Isla Grande airport, being used now by Pan American Airways, will provide hangar space for fifty heavy bombers and at least 100 pursuit ships. At least 100 structures—warehouses

*** Includes Normal Tax, Surtax and Defense Tax. The minimum earned income credit, $300 (10% of $3,000), is used in these calculations.**

**** After net income reaches this point the 10% defense tax is taken on the difference between net income (including personal exemption) and the total income tax and surtaxes, instead of merely on the income tax and surtaxes alone.**

ONE of the mystery stories of the day is the great so-called sit-down strike of the American dollar. There are about 21 billion dollars of good American money in commercial banks alone that are not invested in any kind of business. And the great question is, why not?

The formidable mass of figures published here may look very complicated. But as a matter of fact they are not. Once you have the key they are as simple as ABC. And they tell far more plainly than a volume of words why so many American dollars are lying around idle—why no one wants to invest money.

If people are in want, if business is going to the bowwows, if the farmers are busted, the remedy is to give them money. Who'll give it? Why, Uncle Sam. And where will he get it? Why, from taxes, Stupid. Just soak the rich some more.

But, unfortunately, it is not so simple as that. If you push down on one potato in a barrel of potatoes, you will exert some kind of pressure on all the potatoes in the barrel. When you commit an economic act—that is, when you spend money, or collect money, or save money—you produce consequences that are felt all over the community. When you tax, you do the same thing. This does not mean you should not tax. But it does mean you should be aware of the kind of pressure you will exert on all the other factors in the great economic barrel when you push down on the taxpayer.

Now nothing could tell the story of what our present taxes do to business—and through business to the nation—better than the seemingly complicated tables of figures published here. They seem difficult. But when you know the key to them you will see that they are simple. You will see clearly one of the reasons why the great American dollar is out of a job.

Four Fundamentals of Prosperity

To understand this you must understand first just a few fundamental and simple facts:

Fact Number One is this: Americans save billions every year. Not only big, rich Americans, but little Americans with modest incomes.

Fact Number Two is as follows: These savings are the force that builds the factories, equips the railroads, opens the new stores, expands the utilities of the nation. They put millions to work building these things. They put millions to work operating them thereafter. They are the great dynamic element of the capitalistic system.

Fact Number Three is that at the present time savings are *not* being invested. Hence that vast branch of industry that makes buildings, factories, machinery, utilities, locomotives, etc., is not working.

Fact Number Four: The man with savings—whether they be a hundred dollars or a million—wants a profit on his investment.

Now with these very plain facts in mind we can proceed to what the table of figures has to tell us. Before a man invests his money he wants to know how much profit he can look forward to. There are, generally speaking, two kinds of profits on investments. There is the more or less reliable return upon safe and sound stocks and bonds. It is not high. People are willing to accept a low return for safety. The only kind of business in which that can be found is in companies with long histories of financial success. The investor is very lucky if he can get four per cent on his bonds and five or six per cent on his stocks.

The second kind of investment is called *risk investment*. And in our system this is by far the most important. For it is the *risk money* that goes into new industries. And it is the new industries that are so essential to good times. But risk money is precisely what the word implies. There is a chance of loss—and maybe complete loss. You put your money into a new plant making some new article, or you invest in a new store in some new field or territory. It may be two or three years before you will see any profit at all. Meantime the adventure may blow up. And so no investor can be enticed to put his money into such a business without the prospects of a very much larger return some day—larger than the four or five per cent on Grade A bonds and blue-chip stocks. He will hope for ten or twelve or twenty per cent return. Otherwise he will not take the risk. New business is a gamble, but it is the thing that makes this immense economic machine go.

Now, before you consult the chart, let us take an example. Take a man, Mr. B, with an annual income of $100,000. He has $50,000 lying in the bank—saved from that large income. He would like to invest it. A man who knows how to make money does not like to see it idle. He wants a safe, sound, conservative investment with little risk. Now suppose he buys some corporate bonds or stocks that promise a return of as little as three per cent. Do you imagine he will get that much return on them? At the end of the year he collects his interest—$1,500. [Ie has a] added $1,500 to his $100,000-a-year in[come] not forget that he has a partner—a[n] partner—to collect his share: good old [Uncle] soon as Mr. B's income rises above $ [the] come tax jumps. And on that $1,500 i[ncrease] have to pay his partner, Uncle Sam, $1, [or 66.6] cent. This will leave for Mr. B just $47 [Mr. B] knows how to figure interest, will see t[hat he has] ten a yield on his $50,000 investment o[f less than] per cent—.954 to be exact. And so, as a [practical] before he makes such an investment h[e will ask] self why he should do it when he can [get a perfect] good government bond yielding, perha[ps 1½ per cent] and tax-free. Mr. B is not crazy and so [does not] vest in the corporate bonds. If he we[re to lend] money on a mortgage at six per cent, [the income] would drive his yield down to 1.908 per [cent. There] plenty of risk in a mortgage—too muc[h for 1.908] cent interest, particularly when the g[entleman] buy a government bond tax-free at ne[arly twice] yield. What is the result of this situatio[n. The new] table result is that almost all the func[tions of men] have incomes of $100,000 a year and ove[r are not] to be invested in conservative private[investment] If Mr. B wants to get an investment [he will] him three per cent after taxes he will ha[ve to find] that will pay him 10 per cent. If he wa[nts a yield] four per cent, he will have to find one [that will]

THESE FIGURES WERE PREPARED BY L. ROBERT DRIVER OF WASHINGTON, D. C.

per cent, because he will have to split with his partner, Uncle Sam.

...is the right thing to do—to tax Mr. B at ...te. It when you do so you must be consistent ...asonable. You must be prepared to accept one ...inevitable consequences of your action. This ...e to drive him out of the market as an investor. ...when investment lags and Mr. B's money is lying ...idle or is put into government bonds, do denounce him for making unprofitable invest-...s.

...ow suppose we have another man with $100,000 ...income and $50,000 to invest—Mr. X. He is ...g to get his money into a new venture—and how ...such money is needed! He is willing to gamble ...new manufacturing business. But he doesn't ...three per cent because, as we have seen, he may ...all his investment and he expects a correspond-...large return if he does make a profit. He will not ...this investment on a chance of making six or seven per cent. But even if he were willing he would again have to figure on his not-too-silent partner, Uncle Sam. In order to get for himself between six per cent and seven per cent, he would have to make a profit of 20 per cent or $10,000. On this, Uncle Sam would take $6,820, leaving $3,180 for Mr. X. This would be a yield on his $50,000 investment of 6.36 per cent. No man is going to risk the loss of his principal for this. Therefore, all the income in the United States in the hands of men with incomes over $100,000 must be considered as completely out of the market for investment in either new or old industries.

Before the last war the automobile industry was a new one. It was full of peril, but the chance to win large profits drew the money in. The manufacturers and investors who succeeded not only made fortunes for themselves but created an industry which today accounts for added millions of employed. If the present tax laws were then in existence and this chart could have been made then, there would be no automobile industry today to speak of.

There is about a billion dollars a year in incomes above the $100,000 mark and it is all lost to investment—driven out of it by the act of the government that makes private investment unprofitable while at the same time offering a premium on investment in government tax-exempt bonds.

But what is true of the $100,000-a-year man is true, in a different degree, of all sorts of people who

have saved money and who would like to invest it. In a greater or lesser degree it applies to incomes of all sorts—particularly of $10,000 and over. The $20,000-a-year man who wants to invest his savings must figure on paying 30.8 per cent tax on the next $2,000. Therefore, to net four per cent on an investment he will have to find one paying six per cent, but the six per cent incomes are very scarce and are not safe and the four per cent man wants safety. Thus at least four billion dollars of income—the kind that is most available for investment—is driven out of the investment market.

Now with this in mind, study the collection of figures printed herewith. It will give you in one column various incomes from $4,000 to $5,000,000. It will show you the tax that must be paid on those incomes. Then it will solve for you the problem of profit or yield that confronts the man with any of these incomes who wants to invest money.

Thirty Per Cent for Uncle Sam

As an example, let us take the man with $20,000 income after his exemptions are deducted, who has some money to invest. He wants to know how much profit he can collect as shown by the chart. Run your finger down to $20,000 in Column 1. In Column 2 will appear the income taxes, including both surtax and defense tax, he must pay on that income. It is $2,934.80. Now if this $20,000 man has money to invest and invests it, his income will be increased by the amount of interest or profit he receives. Column 3 will show the amount of such income that is included in the next tax bracket—$2,000 in this case. And Column 4 will show the rate of tax he will have to pay on this added income up to $2,000. It will be 30.8 per cent. Now suppose the added income is $1,000. The government will take $308 of that, leaving $692 for the taxpayer. He will get $692 actual cash yield on his money. Now the question is—how large a return on his money will he have to get, how much interest or dividend, in order to get the yield he desires? Columns 5 to 8 will answer that question. Column 5 shows that if he gets 20 per cent interest, his own share in that interest after taxes are paid—therefore his own actual yield on the investment—will be 13.84 per cent. Column 6 shows that if he gets a dividend of 10 per cent his own yield after taxes will be 6.92 per cent. And so on—these columns show how much a man with that $20,000 taxable income will get in percentage yield for himself where the profit before taxes is anywhere from 3 to 20 per cent.

Thus you can determine just how much per cent profit you must have on your new investment in order to have for yourself—after sharing with Uncle Sam—the interest or dividend return you seek.

Important as this is as information for the individual taxpayer, it is, of course, far more important for the nation as a whole.

Let us assume the national income will be what it was in 1929—$78,000,000,000. Let us assume that the division of income will be about the same. Then for all people with incomes of $20,000 a year, four per cent on a safe investment is impossible, because to get four per cent they must actually collect from six to 20 per cent. Therefore, all persons looking for this conservative return and whose incomes are $20,000 or over are driven out of the investment market. This means that *ten billion dollars* of income each year—the most-available for investment—is, practically by government fiat, driven away from private investment. It means that practically all income is driven out of the risk investment market.

Knowing this, you can understand some simple figures.

In 1929, investment in new securities for new businesses or expansion of old businesses was $8,000,000,000. Last year it was $382,000,000 or between four and five per cent of the 1929 total. In 1929 bank loans were $41,000,000,000. In 1939 they were only $22,000,000,000.

People who say the American economic system is dying are kidding themselves. It is committing suicide.

And we have just begun to tax.

China Sky

By Pearl S. Buck

ILLUSTRATED BY MARTHA SAWYERS

The Story Thus Far:

HOPING to raise funds for his work in China, Dr. Gray Thomison, head of a hospital in the city of Chen-li, sails for America. He leaves a woman—Sara Durand, an American physician—in charge of the hospital.

The war is raging. Although Japanese bombers attack the hospital at frequent intervals, Sara carries on courageously. Soon the man she loves—*Gray Thomison*—will be back. And then—ah, then she will be happy! . . . Weeks pass. Sara receives a cablegram from Doctor Thomison. It informs her that the doctor will soon be back in Chen-li with "Louise"—his bride!

Wretchedly unhappy, Sara tries to repress her emotions. . . . A badly wounded Japanese officer—"Mr. Yasuda"—is brought to the hospital. He is accompanied by his captor—Chen-ta, a famous guerrilla who is known as "the Eagle." To Sara's amazement, Chen-ta implores Sara to save the prisoner's life, if it is humanly possible to save it. He will not say why he wants the man to live.

Sara operates. Her assistant—Dr. Chung—donates some of his blood; and the Japanese does not die. . . . The Thomisons arrive. Louise, Sara notes, is young and very beautiful. Sara—not so good a judge of human nature as Gray's Chinese cook, Siao Fah—reserves judgment on the girl from America. Siao Fah dislikes her from the moment he sets eyes on her.

And Siao Fah is right—Louise Thomison is a spoiled, too-rich weakling. She does not like China, or the Chinese. And the bombings terrorize her. After every attack (and they are terrific) she implores her husband to drop his work and take her home. But Gray is adamant—he will not take her back to America. . . .

Yasuda, a convalescent, has a long, confidential talk with Dr. Chung. Appealing to the Chinese's love of money, he offers the fellow a large sum (to be paid in monthly installments) if he will find someone—someone whose mail will not be opened and inspected—who will send out messages, in the Japanese code, for him.

Chung knows of only one person who may be inveigled into undertaking the hazardous task. That person is—*Mrs. Gray Thomison!* Going to her home, he has a long talk with her. He tells her that, if she will write and sign certain letters in which she says that Mr. Yasuda is convalescing at the hospital, the hospital will not be bombed! As they talk, Siao Fah (his ear close to a keyhole) is listening.

Unable to understand what is said (Mrs. Thomison and the Chinese speak in English), Siao Fah "gets" what is going on. He resolves to say nothing to "the Thomison doctor" until the opportune moment.

IV

THE raid was over again.

Gray looked at Sara haggardly over the dead body of Lao Wang on the operating table. The old man had delayed too long in his garden. Sara looked back at Gray sadly. He turned away abruptly and stripping off his rubber gloves he began to wash his hands. Sara covered the still form on the table with the sheet and then stood looking at Gray's broad shoulders and at his dark, bent head. A new pas

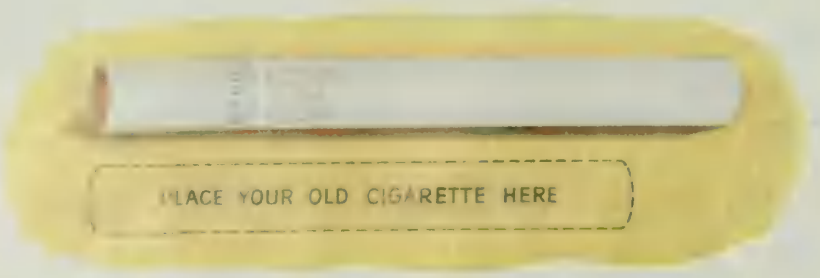
"Here's a basic improvement in cigarette design!"

● Look around—America. Look in the Service. Look wherever you see young people. A basic improvement in cigarettes is here.

It's Pall Mall—a cigarette deliberately designed for better smoking! Pall Mall is over 20 per cent longer than the ordinary cigarette. And this additional length is important.

It travels the smoke further—so the smoke reaches you cooler. It filters the smoke through more tobacco—so the smoke is definitely milder.



Important, too, is BULKING.

For this careful, time-taking process mellows tobaccos as nothing else can.

In BULKING, the traditionally fine Pall Mall tobaccos acquire a new character. The delicate flavors blend together. All harshness is gradually softened. Pall Mall becomes a noticeably smoother cigarette.

The smoke of these fine tobaccos—enriched by BULKING, traveled and filtered through Pall Mall's greater length—gives you a combination of advantages no other cigarette can offer.

Prove it! Yourself, try Pall Mall critically.

This is not "A Man's World" by a long sho!

IT MAY BE ENGINEERS with their blue-prints who make the plans to which we build our cars. But more and more it is the women of this country who determine what needs the engineers must meet.

Their influence, of course, is not new to us. It merely grows more and more pronounced.

Women took a hand in car design early in this century, when we shifted the steering wheel from right side to left where it is now. Women hurried the change along, because until we changed, they sat at the left and had to get out into the street instead of on the curb.

Today more than ten million women in this country have licenses to drive. And it seems fair to state that most of what you see as you walk toward a new car—and much of what you feel as you ride in it or drive—was put there for women, or put there sooner than it would have been without their influence.

It is certain that the changes ments made for this year in our the influence of women very

Most happily quartered of California's rookies are those at the Old Pacific house, once a Spanish hotel. Here boys from Fort Ord and the Presidio play table tennis, use the barbecue pit in the rear and, below, line up at the soft-drink bar

It's Your Life

By Curt Riess

A SHORT SHORT STORY COMPLETE ON

PERHAPS it was only minutes, perhaps it was much longer since she had awakened. Next to her she heard Joe's regular breathing.

Finally Mary Stokes opened her eyes. The little watch on the night table, with its illuminated dial, said two o'clock. She got up, shivering, for the winter air filled the room. She took her heavy, dark blue robe, and left the room as quietly as possible. Almost automatically, she went to Anne's room. And she knew, before switching on the light, that her daughter was not there.

Slowly she walked into the room. Every time she looked at the white-enameled furniture, it made her feel as though Anne were still a little girl. A little impatiently, she picked up a blouse here, straightened a blanket there, opened the closet to put in the shoes that had been lying in the middle of the floor. Anne simply would never learn.

Five minutes past two. Why, the dance at the club must have been over hours ago! If Anne's father found out, he would be furious.

Mary smiled. After all, he didn't have to find out. The best thing was to wait for Anne downstairs. Mary's hand brushed lightly across the little table in front of the mirror. Dust. She made a mental note to tell Lucy tomorrow.

She went downstairs. It wasn't necessary to switch on the light; the living room was well lighted by the full moon. She found her favorite easy chair in the corner and lit a cigarette. She stretched a little, closed her eyes, smoked and thought of nothing. It was good sometimes not to think of anything. It happened too rarely; there were so many things to think about. It was also good to be alone once in a while.

Suddenly, she sat up. There was something strange about this night—something she couldn't explain. She felt as though she had lived through all this once before. A queer feeling—one she had every now and then. She thought back, through all those twenty-odd years, to her own youth, to the time when she was Anne's age and lived with her parents in Illinois.

IT HAD been a very small town. Fleetingly she wondered if anything had changed in the last ten years, since mother's death. Mother . . . Of course, now she knew. That was what had been in her mind all this time. Every Saturday night when she had been invited to a dance her mother sat in the living room downstairs until she came back. Just the way she was sitting now and waiting. Of course, she never had been allowed to stay out until two o'clock. Nobody in Danforth ever stayed up that late. And mother had been particularly strict. She used to say that she knew much better what was good for her daughter than Mary herself.

She got up and went to the window. The small, suburban street was covered with snow. It was very quiet. And then the car came. It arrived with almost no noise at all, so that she saw it only at the last minute. Th fore the house, but nc

Mary went back to b didn't like it. And she Not that she wasn't pe daughter—still . . .

And then, after a fe Anne appeared in t noiselessly went upst so swiftly that she see a shadow gliding by Mary thought, "so she go to bed. I don't wan spying on her."

She waited. She wa than she had intende twenty minutes from Anne's footsteps. She of walking about. Ma

Then, suddenly, Ma had not moved. The still standing before was strange.

And the faint steps continued. What co Again she had the fee was familiar, that she all this once before. A mother waiting for he pleading with her moth "But I love him, moth man I'll ever love." mother had replied: know what love is. Y What do you know man? How can he sup

Joe would find it the morning. He would s blame her . . . She wipe that filled her eyes wit it. She went into he heard Joe's regular bre not forget to tell Lucy ful about dust.

She moved so swiftly that she seemed to Mary like a shadow gliding by. "I'll wait a while," Mary thought. "I don't want her to think I'm spying"

BIG DODGE GOES TARPON FISHING IN THE GULF

WHERE good times are at their gayest, this big new 1941 Dodge is a proud and magnificent companion. Here, where the Gulf of Mexico's sun-bathed waters lure the nation's sportsmen, Dodge is a notable and much talked-about car. Smart Americans love it for many reasons—for its many pleasing luxury touches ...for being a "big fellow" in size and comfort ...for the miracle of Fluid Drive* that gives new smoothness and handling ease. And not the least of its charms is the famous Dodge economy. Here is a car that saves motorists money 3 ways...on first cost, on low upkeep, and on higher resale value. And Dodge delivers for just a few dollars more than smaller, low-priced cars. Prices subject to change without notice.

RUGGED BEAUTY! The handsomest you ever saw...and under the hood, the "powerhouse" Dodge ever built! This engine ...by the new Oil Bath Air Cleaner that protects ...rings from grit—prolongs engine life.

WIDE AS A DIVAN! Generous pillow-type cushions stretch their luxurious softness the whole width of the spacious Dodge interior. Loads of head room, leg room, elbow room invite you to glorious comfort hour after hour, without tiring.

BIG-CAR LUXURY COSTS SO LITTLE IN DODGE! Only brilliant engineering could give motorists such expensive-car luxury for so little money. The huge, V-type windshield literally makes a panorama of the view ahead. To the rear, safer vision is increased nearly half by the new larger rear window. Wide, straight doors of sedans permit easier, safer entrance and exit.

DODGE LUXURY LINER

WITH OR WITHOUT FLUID DRIVE*

*FLUID DRIVE OPTIONAL AT SLIGHT EXTRA COST

WAYS ROOM FOR MORE! You'll be astonished how the Dodge trunk compartment ...swallows luggage—seemingly always with room for more! Note: the new lid is "sprung" so it raises or lowers ...just a touch of the finger—stays in position *safely*.

Enjoy the Triple Thrill of Fluid Drive*

1. Shift or Not, As You Like! Nothing new to learn. Simply less to do. Greater comfort—added safety.
2. Great in Traffic! You start and stop as smoothly as with electric power. No jerk or jar. And when you want fast getaway, a flick of your finger into the getaway gear gives you a burst of speed.
3. The Smoothness of Oil! Power from the engine is transmitted to rear wheels through a shock-absorbing cushion of oil. Combined with Floating Power, Dodge Fluid Drive* gives unbelievable smoothness, ease of handling, longer car-life and this, of course, means famous Dodge economy.

Tune in Major Bowes, CBS, Thursdays, 9 to 10 P. M., E. S. T.

Chains from France

Continued from page 12

plank platform, long and deep, that had been carried by many hands into the square.

"Great excitement," the merchant said, recapturing Marcel Denis' straying attention.

"Yes."

The merchant's tone was cold and severe. "More wickedness for what is already the wickedest town on earth."

Marcel Denis regarded him in astonishment. "I beg your pardon?"

"Wickedness," the merchant said. He pursed his mouth and spat copiously on the arid ground. "Stupid and sinful—you've heard?"

"Heard what?"

"About the women."

"Of course I've heard. You mean the governor's plan to give wives to the settlers, to attach them more permanently to this land—"

"Nonsense!" the merchant Ajax Soule exploded. "I was at the wharf. I've seen the women and I've heard the crew of the frigate. Wives! Base wenches from the Salpétrière, picked out of the mud, brazen hussies from all the foul quarters of Paris, with language and manners so dissolute—"

"But surely not! Why should Governor Ogeron—"

"He had no choice. He asked in France for wives for his colonists—and this is what they sent him." He shook his head bitterly. He touched Marcel Denis' sleeve. "It's what both parties deserve. But it's uncommonly hard on you and me—"

"You intended to take a woman?" Marcel Denis asked.

"Naturally. Didn't you?"

MARCEL DENIS nodded. "I need a wife," he said seriously. His heavy eyebrows drew together. "Perhaps not all the women fit your unflattering description. There should be a few virtuous—"

"Have you heard the marriage vow that's been composed to grace this morning's situation?" the merchant asked.

"I've talked to no one but yourself."

"Listen to me: This is the marriage vow approved by the governor—" The older man narrowed his eyes and recited in a low voice, emotionally: "'I take you without knowing or caring who you are. If anybody from whence you come would have had you, you would not have come in quest of me. But no matter; I do not desire you to give me an account of your past conduct, because I have no right to be offended at it at the time when you were at liberty to behave either ill or well according to your own pleasure, and because I shall have no reason to be ashamed of anything you were guilty of when you did not belong to me—'"

"Heavens!" exclaimed Marcel Denis. "Now really—"

The older man droned on: "'Give me only your word for the future; I acquit you of the past.'" He made a motion of lifting a gun to the level of his chest and striking his hand upon the barrel. "'This,'" he cried, "'will avenge me of any breach of faith; if you should prove false, this will surely be true to my aim.'"

There was perspiration on his forehead; the sun was increasingly hot in the square. He gazed quizzically at Marcel Denis. "A nice marriage vow, eh? One of the filibuster chiefs is said to have drawn it up; and the governor has approved it. And you still hope to find a good woman—"

"I hope nothing," Marcel Denis said, almost curtly. "But I shall stay and see what there is to see."

The merchant shrugged. "They'll be leading the cattle out soon."

"I've not heard how the selection is to be made."

"By lot. The women will be assigned numbers. If you draw a certain number—do you see?—you get the woman whose number that is."

"With privilege to reject."

"No. Not at all. There is no privilege to reject; that has been stressed. You take what you get."

"It would seem," Marcel Denis said dourly, "a considerable risk."

"Too considerable!" said the merchant. "For my part, I'm out of it." He spat again. "No pig in a poke for me."

"Look," said Marcel Denis. "Here they come."

THEY came, walking in single file; and they mounted the platform next the fountain in the center of the sun-scarred *place*. Soldiers walked with them, directing their passage through the throng of simpering, coarse-mouthed filibusters.

Marcel Denis' eyes traveled down the line of women as they arranged themselves on the platform. Some stared boldly into the crowd before them, some laughed, showing their teeth, answering coarse quips with coarser sallies in the Paris argot. They were—save for a very few—completely unabashed. Marcel Denis was suddenly aware that he was blushing; a warmth of blood flooded his face.

"Isn't it awful?" cried Ajax Soule, and did not wait for an answer. "It's exactly as I told you, you'll agree. Look, friend; why not come to my house for a small drink, a toast to Brittany—"

"Thanks. I'm staying here."

The merchant looked at Marcel Denis in surprise. "You don't mean that you're going through with this? You're not going to enter the drawing of lots?"

"That's what I came for." He lifted a hand wearily. "Since you press the point, I would have preferred a peasant girl from Brittany for a wife; but there is no schoolboy sentimentalism lodged in my head. I want a woman to work with me and keep my house and I'll take what I can get."

"Then God help you," said the merchant, grinning crookedly.

Marcel Denis nodded absently; the merchant had already been shut out of his mind. Governor Ogeron, splendid in lace, had mounted the platform. A hush fell over the crowd and the voice of the governor rang out: "The numbers are prepared for the drawing." He indicated with a nod of his head a basket that had been carried to the edge of the platform. "In the basket are many blank slips, and fifty bearing numbers. The men who draw the numbered slips will"—he permitted himself an austere smile—"win themselves brides. Any disputing," he added grimly, "will be settled by me according to my judgment."

He stepped back; two soldiers moved up to hold the basket. Several of the women applauded noisily; and the crowd pressed forward.

"Say, will you call back and ask for our objective? I was half dopey when I answered the phone this morning"

CARL ROSE

Marcel Denis mingled with the crowd—pressed steadily forward. His mind was again a wild tumult of conflicting emotions, but his jaw was rigidly set and his dark-rimmed eyes were hard. He intended that no one should understand what he was thinking; and no one did.

His turn came. He reached into the basket. His fingers closed upon a slip of white paper, and he opened it impassively and read aloud a number.

"WHAT is your name?" Marcel Denis asked.

"Yolande Nazon."

"Where do you come from?"

"I am from Paris."

"Yes," said Marcel Denis coldly. "From what part?"

"I am not obliged to discuss myself," the girl said. "I am here. I did not ask to come, but I am here. You have picked me in a lottery and I am told that that is final, the end of the road. Very well; it's final. I think there is nothing to talk about."

Cut-ups cut down unpleasant breath with one fell swoop of a WINT-O-GREEN LIFE SAVER. Try Wint-O-Greens today—they take your breath away.

Love is like a CRYST-O-MINT—sweet and flavory . . . a fragrant breath of Spring . . . something that you hope will last forever!

Little girls with big appetites need something to freshen their mouths after eating. That something: cool, refreshing WINT-O-GREEN LIFE SAVERS.

Everybody's breath offends sometimes after eating, drinking, or smoking. Let LIFE SAVERS save yours. 13 delicious mint and fruit flavors. Sold everywhere. 5¢.

$2500.00 IN CASH PRIZES!

Just tell us why you like WINT-O-GREEN Life Savers . . . in 10 words or less.

1. Each week for *10 separate weekly contests,* 26 cash prizes will be awarded. 1st Prize: $100.00 cash; 5 prizes of $10.00 each; 20 prizes of $5.00.
2. Enter each weekly contest as many times as you wish. Contests end March 29th, 1941. Send entries to Life Savers Contest Editor, Port Chester, N. Y.
3. Include a Wint-O-Green Life Savers wrapper (5¢ package) or reasonable facsimile with *each* entry.
4. Wint-O-Green counts one word, Life Savers count two.
5. Prizes are awarded for answers best for advertising purposes, in opinion of the judges.
6. In case of tie, duplicate prizes will be given. Decisions of judges will be final. Contest open to residents of U. S. and Canada. All entries become property of Life Savers.
7. Each week's contest closes Saturday midnight. The date your entry is received at post office in Port Chester, N. Y., is official date of entry. Prize winners will be notified by mail.
8. Employees of Life Savers or their advertising agency, or their families may NOT enter.

dered slightly, and glanced at the girl out of the corner of his eye. She was plodding upward with uneven steps, her shoulders hunched grimly. Her face lacked any expression. Her mood transferred itself—a dull weight—to Marcel Denis; and at that moment he knew that he hated the girl he had married. It was a mistake—a heedless, stupid blunder. He clenched his hands and walked silently on. The heat of the sun was a hard, pointed thing. In the distant west, where Cuba lay, the storm clouds were piled in shapeless mounds of dirty white, motionless.

HE BUILT a bed for Yolande Denis in the small west room and moved everything that was his into the east room. He showed her the corn bin and the pots and ladles, the store of charcoal, in the manner he would have used in informing a servant of her duties. She listened without comment, following him with her eyes.

"This is your home. There is work to do," he said, and found no satisfaction in the words.

It was late afternoon then, and while there was still light he went into the field and turned a patch of ground. But his mind was torn and the awkwardness of his hands reflected the distress he felt. He worked badly, and realized it.

The sun dropped rapidly in the west, like a hot copper coin behind the gauze of motionless clouds; and Marcel Denis threw down his hoe and walked slowly home. He arrived in darkness. At the doorsill he paused uncertainly; he listened for a minute to the sea that pounded, far below, on the black north shore. His indecision drained away from him. He pushed the door before him.

Two tapers were lit on the rough plank table. Two places were set. The woman Yolande—his wife, her hair bound with a brown ribbon—knelt before the charcoal brazier. There were rice cakes on the table, and a pot of mint tea. She looked up at him as if a little startled.

"Your supper's ready," she said.

Marcel Denis nodded briefly. He glanced at the two plates on the table. "I prefer to eat alone," he said in a flat voice. "You have your things, I have mine. You may eat before I do or afterward, as you please."

The girl made no sound. The quick flush of passion in her face changed to a sort of impersonal hardness; and she rose to her feet and moved to the table, taking away the second plate. She put it on the shelf in the corner next the fireplace. Then she went to her room and closed the door softly behind her.

Marcel Denis rinsed out his mouth and washed his hands and sat down alone to his rice cakes, his pot of mint tea, keeping his eyes steadily away from the door of the west room.

Afterward he filled his pipe and walked to the knoll above the cabin; he listened to the crying sea below and observed how clouds encroached upon the stars. There was a little wind moving over the dark land. Then he returned to the cabin, extinguished the tapers and lay down on his bed. He slept heavily.

His breakfast—three eggs and bread made of ground corn—was ready for him when he awoke, though he had not heard the girl moving in the room; his luncheon was ready for him when he came in from the burning fields. For dinner he had half a chicken and a goblet of wine. The girl left the room as soon as his food was on the table; she had not spoken to him through the day, and he had found nothing that demanded comment. He ate silently; he went to his bed early. If the girl was awake in the darkness of her room, he was not aware of it. The cabin was still: but it seemed to Marcel Denis that there was an air of cold expectancy in the silence, and he was cons uneasiness.

Two days later the "We need more oil you have no more win "The Cayona trader things comes into the Saturday. Today is here tomorrow mornir "I have no money to comes."

told you—"

"Stay awake—force yourself; keep your arm raised, hold the cloth—"

The girl was gone through the doorway and Marcel Denis dropped his head and knew that he did not care whether she went or stayed. The room whirled giddily; he closed his eyes. The cut no longer pained; he thought this very odd and found that he was laughing nervously. He pressed the wet cloth tightly.

WHEN Marcel Denis opened his eyes again the doctor said, "Be still; be very still. Hold your arm firmly." This was Roumain, the swart old man who lived in the rue Livarde in Cayona. His fingers gripped a threaded surgeon's needle and he was busy with it.

"What time is it?" Marcel Denis murmured. There was much he did not understand. He knew that his arm throbbed and he remembered the falling bottle, the shattering— "How did you come here?"

"It's one o'clock or thereabout," the doctor said, keeping his eyes on what he was doing with the needle. "Your wife came for me. She led me back. Those narrow ledges—at night it isn't a pleasant trip for a woman."

"Yes," Marcel Denis said, low. He made an effort to hold his arm still; but now he could not feel his arm, he was no longer aware of it, and he turned his head and saw the girl slumped in the chair. She was watching him closely, and it seemed to him—a singularly clear impression—that her eyes were dark with pain. Details forced themselves upon him: her dress was torn, a long scratch ran in a livid curve on the brown flesh of her ankle.

He smiled at her.

"Thanks," he said, hardly above a whisper. "It was kind of you—but rather foolish—"

"Please be quiet," the doctor said.

In time the doctor was through. "What have you to say about me?" Marcel Denis asked. The doctor said, "You'll be weak for a while, Marcel Denis. But the bleeding is over. You'll live to work again." He expelled a deep breath. "I give you my word, it was a narrow thing."

"Spare me the details," Marcel Denis said, his lips moving slowly. "You're tired. You need sleep. Tell me in the morning." He paused, and for an instant was very still; then he inclined his head toward the door of the west room. "There's a bed there for you," he said. "My wife's bed—I think you'll find it a comfortable one—"

The doctor raised his hand. "I'll not agree to inconveniencing your wife. I can stretch out in a chair—"

"You'll inconvenience no one," Marcel Denis said. "My wife will sleep here with me—beside me. I've room enough."

He looked toward the girl in the chair. "Won't you?" he said.

Her hands had gone to her face and she was sobbing.

"You see, doctor—she's upset; I'm afraid she's very tired. The accident was a frightful shock to her." Marcel Denis smiled faintly at the doctor. "She'll be fit in the morning. Good night."

"Good night," the doctor said.

After he'd gone and the door was closed, Marcel Denis lay for a minute staring at the beams of the ceiling. Then he spoke softly:

"I think you'd better blow out the tapers—Yolande. Come—there's room enough here."

She stood up and blew out the candles one by one, until the room was dark. Marcel Denis could hear the quickness of her breathing, and he knew then, from the sound, without seeing, that the black, brooding sorrow was gone from her face; and his mind was instantly at peace and in a moment he was sleeping.

"The Tougher They Come . . ."

J. RICHARD ROCKJAW is a man of determined purpose. "When you get into a difficulty, take the short way out," says he. And he praises to his weaker half the merits of "a good strong purge."

BUT THE WEAKER HALF has ideas too. "You and your caveman cures! 'Give old constipation a right to the jaw,' says you. Did it ever occur to you to get at the *cause* and *correct* it?"

"FOR INSTANCE, my dear?"

"For instance, this crisp, toasty, delicious cereal, KELLOGG'S ALL-BRAN. It has just what it takes to get at the cause of constipation due to lack of proper 'bulk' in the diet."

"SAY! WHAT DO YOU KNOW? Darn it, it *does* taste good! If ALL-BRAN can make you 'Join the Regulars,' make way for a place in the front rank!"

"Not so fast, my bold one," says she. "It takes a little time. You must eat ALL-BRAN every morning, and drink plenty of water."

The Man for Aurora

Continued from page 14

the iron-ore road was deep red all the way down the hill to the river, and the hill on the other side was green. It made you forget that the buildings on the street were mostly saloons with false fronts and that they were so new the lumber, some of it, still oozed pitch.

I remember the first evening I saw it, the raw, tough town, where you could sit on the street, a stranger, and the passers-by spoke to you in friendliness. And the way the sun set through the smoke, the soft color of it all over everything—the street, and the buildings, and the hill across the river, and on people's faces. And in the dark, over on the hill across the river, you could see lights bobbing along. They were the lights in the miners' hats, as the miners walked from the dry house to the shaft house to go to work. But they looked like a religious procession. Or a string of jewels someone was pulling through the dark up there.

I remember it was like that the evening I first saw Aurora Fynn.

Old Dynamite Fynn was running the engine the day I hired out here, and he almost got me. He knocked me down with the hind drawbar.

I had given him a go-ahead signal when we'd finished taking water at the tank, and then walked around behind the engine—like a fool. He picked that moment to clear his stack. He whuffed the crut out of the stack, and reefed the engine over backward to keep the crut from falling on the boiler. And when he did, he caught me.

I CRAWLED out from under the tender, lucky to be alive, and while Old Dynamite sat up in the cab with his big red face all wrinkled up with sorrow, I called him everything I could lay tongue to. "If you weren't an old man," I said, "I'd haul you out of there and beat a hole in the tender with your head. Are all your children idiots, too?"

"That's enough," he said, and his face got redder. "That's enough, by the Glorified Creator! I'll show you something tonight, you battered-mugged young ape!"

And so that night I sat on the ledge in front of Rogan's saloon, and Old Dynamite came along and hauled me over to the graduation exercises at the Opery House, and I saw her.

She was the whole show. She had a piece to speak, and she spoke it well. She wore a white dress, all frilly and flouncy, that hung to the floor, and in her hair a blue ribbon that just matched her eyes. I just sat there in that front seat, and watched her face. Her piece was The Modern Woman: Does She Deserve A Career? Aurora said she did.

When it was all over, and we came out, Old Dynamite said, "Well?"

I looked in my mind for words, but I couldn't find them. I just said, "God's good to some men. You must have led a good life to deserve a daughter like that."

We were under the white, shadow-flecked light of the swinging arc lamps, and I could see Old Dynamite's face soft in the middle and stiff around the edges, as though he was going to cry with the pride that was in him. "It's been good," he said. "It's been good. . . . And now it's almost over. She's grown up, I guess."

She went away to school a couple of years, and then she was the lady reporter on The Diamond Drill.

In the wintertime, I'd go booming, as I had before—railroading, south or west, wherever they needed railroad men. But in the spring, when the gan shipping again, I'd used to see her summer I'd drop in on Dynamite

2 GREAT RADIO PROGRAMS

FRED ALLEN and a great cast in the lively full-hour Texaco Star Theatre Program every Wednesday Night—CBS—9:00 E.S.T., 8:00 C.S.T., 10:00 M.S.T., 9:00 P.S.T.

METROPOLITAN OPERA. Complete broadcasts of great operas with famous stars every Saturday afternoon. Consult newspapers for time and stations.

Yes, Sky Chief will snap your car into action on the coldest mornings

Here's a gasoline noted for quick winter starting.

Even in the iciest weather *SKY CHIEF* gets a quick answer from a stone cold engine . . . warms it up rapidly . . . makes it forget to stutter and buck.

You'll notice these things at once. You'll also enjoy its smooth stride as it *floats* your car up the hills.

In *SKY CHIEF*, instant volatility and high anti-knock work together to give you both surging power and the smoothness of flying.

And here's a "pay-off" you'll appreciate! By *saving* the miles that slow-starting gasolines sputter away and waste, *SKY CHIEF* returns you a generous *mileage-bonus*. Yet *SKY CHIEF* costs no more than other premium gasolines. Enjoy luxury driving . . . try *SKY CHIEF* today.

TEXACO DEALERS

SKY CHIEF sells for about half the price you paid in 1920 for the then regular gasoline, illustrating the continued success of the petroleum industry in providing the public with better products at lower prices. ++ *Sky Chief* is available in all 48 States and in every Province in the Dominion of Canada.

NATIVE AMERICAN TRIBES

THE HOTTENTOT. Doesn't know that soaking his hair to comb it is taboo. Water dries out natural oils—makes hair wild, woolly. Kreml civilizes Hottentot hair and helps correct dryness.

THE BEDOUIN SHEIK. But that sticky mat of plastered hair gets no place with girls. Non-greasy Kreml not only brings out the natural good looks of hair — it also removes ugly dandruff scales.

THE TIBETAN. Hides his hairlessness in a lamaserai. But even prayer can't bring hair back, once it's gone. Kreml and proper care might have helped him keep his hair. Too bad it's too late!

"NATURALIZED" CITIZEN. His hair looks *naturally* well-groomed and lustrous with Kreml—the trusted tonic-dressing. Beneficial oils in Kreml keep your hair "just right" in softness, appearance, and feel.

USE Kreml every day as so many men do. Your hair will be *greaselessly* well-groomed.

You'll be helping your hair with Kreml, too. For Kreml actually checks excessive falling hair. It also removes dandruff scales, relieves itching scalp.

Women say Kreml works wonders for coiffures. It conditions hair *before* a permanent—keeps it lovely and lustrous *after* a permanent.

Ask for Kreml at your drugstore and barber shop.

And Kreml Hair Tonic has a coworker to keep your hair handsome. Try Kreml Shampoo. Its 80% olive oil base leaves your hair more thoroughly cleansed, more easily manageable.

KREML

REMOVES DANDRUFF SCALES — CHECKS EXCESSIVE FALLING HAIR

NOT GREASY—MAKES THE HAIR BEHAVE

needle in the other. The thread must have been bigger than the needle, because he had to jerk on it.

I'd have sunk my teeth in his ear, but Sleeman just sat there and got mad. He'd forgot all about dying. That's the trouble with those doctors: a man's sick or in trouble and those damn' doctors walk all over him.

The doctor's wife stuck her head in the door. She was a prominent member of all the antiwhisky leagues in existence, and she looked it. She had a face like a moldy pickle, and her hair was all up in curlers. She squirted the sour juice of disapproval all over us with her eyes, and then made a show of looking at a card in her hand. "There's an A. Fynn out here that wants to see these . . . these . . ."

Sleeman let out a bellow. "A Finlander? I'll kill the dirty, dirty, dirty . . ." And he made a dive at the door, grabbing the doctor's walking stick from the hatrack as he passed.

The doctor's wife let out an awwk! and hiked for the back of the house.

But not Old Dynamite's daughter. You'd have thought that at least once a day a man waving a club charged at her, blood all over him, thread and needle dancing on his chest. She said, "Put that club down, you drunken hooligan, or I'll have you run out of town."

SLEEMAN stopped with his mouth open and the stick over his head. "Holy smoke," he said. "Holy smoke, I didn't know it was you. Silver, introduce us."

That got under my skin, and him without an undershirt on! I gave him a shove back in the office, and hustled Aurora out of there toward home. "What's your father thinking of," I said, "to let you out this time of night?"

"He wasn't home," she said, "and I'm a journalist. I heard there was a knifing on Main Street."

"That's no excuse," I said. "They're common enough."

"Were you hurt, Silver?"

"Me? I wasn't in it."

"Oh," she said. "I heard you were. What started it?"

"Lord, Aurora, I don't know. What's the difference? But isn't that Sleeman a handsome devil?"

"A perfect gentleman, too," she said.

"I've no doubt he could be trained," I said. "A girl would have a handsome piece of goods to start with."

And then she said the first unladylike thing she ever said to me. She said, "Oh, shut up!" and walked into the house.

Sleeman was laid up for a couple of days; in a week or so he was good as new again. As I said, the Finns didn't cut very deep.

While he was laid up, I used to go into his room at the Bannerman after work; but he acted funny. Usually, when two men get mixed up together in anything like a fight, it seems to make them better friends. But not with Larry. I figured he was ashamed of letting Aurora see him like that; and I liked him better for it.

And something was bothering Aurora. When I'd go over to see Dynamite, some evenings after work, she'd hardly speak to me. Chances were she'd get up and move away.

At noon one day I said to Dynamite, "What's the matter with that girl of yours?"

"Maybe she thinks you're down on her for goin' down to the doctor's that night."

"I'm down on you for that," I said. "I know how kids are about their first jobs. Why, Dynamite, I'm as crazy about that child as if she were—well, not exactly my own daughter, but . . ."

"That's about what I tell her," he said, and stood looking at me. "I'll tell her again. But I hope it don't sound as crazy as the way you put it."

That evening after st Sleeman was sitting on the of Rogan's saloon, and I and sat down with him. I anything; so I didn't eithe

In a little while, Auror walking down the other street, and when she saw us a come-here signal.

I went across and walk street with her. You didn' to a lady on the street in said, "That's a pretty dr on, Aurora." I don't re what it was; I just reme pretty.

She said, "Thank you, been asking where you've yourself lately."

"That foolish old wallop knew he never recognized I thought that some time d he'd recognize the man g worked with him today."

"He didn't mean that," meant you didn't drop by nings. You should get out Are you going to the Dance?"

I knew Old Dynamite ha thing to her, and she was nice to me. "No," I said. I learned to dance. I was alw moving around.

She said, "Neither am I.

Just then I saw Larry S ing toward us. He must ha one side of the street, and and come up to meet us. I Larry. Miss Aurora Fyn Larry Sleeman. I'll bet I than glad to take you to th

They both stood there and then Aurora said, "Hov And Larry said politely, meet you, I'm sure. I'd b delighted to escort you to And he smiled hard.

They just stood there, a get itchy. A man that's ha he can introduce two peopl thing is smooth and easy do it. And then we just st the street, almost in fron Daudet's saloon. Which w

... mite got down off the engine, and came over to me. "Silver, when you goin' to hand that lad a slap in the mouth?"

"Oh," I said, "he's just a kid. I can't figure what's wrong with him."

"You can't, eh? You're the only man in the yards that can't, then."

"Meaning what?"

"Meaning nothin' if you can't understand. What did you do to Aurora?"

"Do to Aurora?" I said. "What would I do to her?"

"She's sayin' the damnedest things about you. I had to threaten to slap her last night."

"Slap her?" I said. I stood there looking at him, and I began to shake. He was my friend. He was her father. But I began to shake. "Dynamite," I said. "Dynamite, you hurt her, and I'll kill you."

"Hurt her?" he said, and looked at me hard. "Hurt her? I ought to break her neck! Or yours. Is there a brain in that thick head of yours at all?" He climbed back on the engine.

At night, the foreman and the engineer must check the quitting time. I stood by the cab and said, "Five fifty-five."

"Check," Dynamite said. "I didn't mean to hurt your feelings, you dog-faced dodo."

"It's all right," I said. "But that's not a way for a man to talk about his daughter."

"No?" he said. "No? How d'you expect a man to talk when his daughter's goin' to a dance with a drunk?"

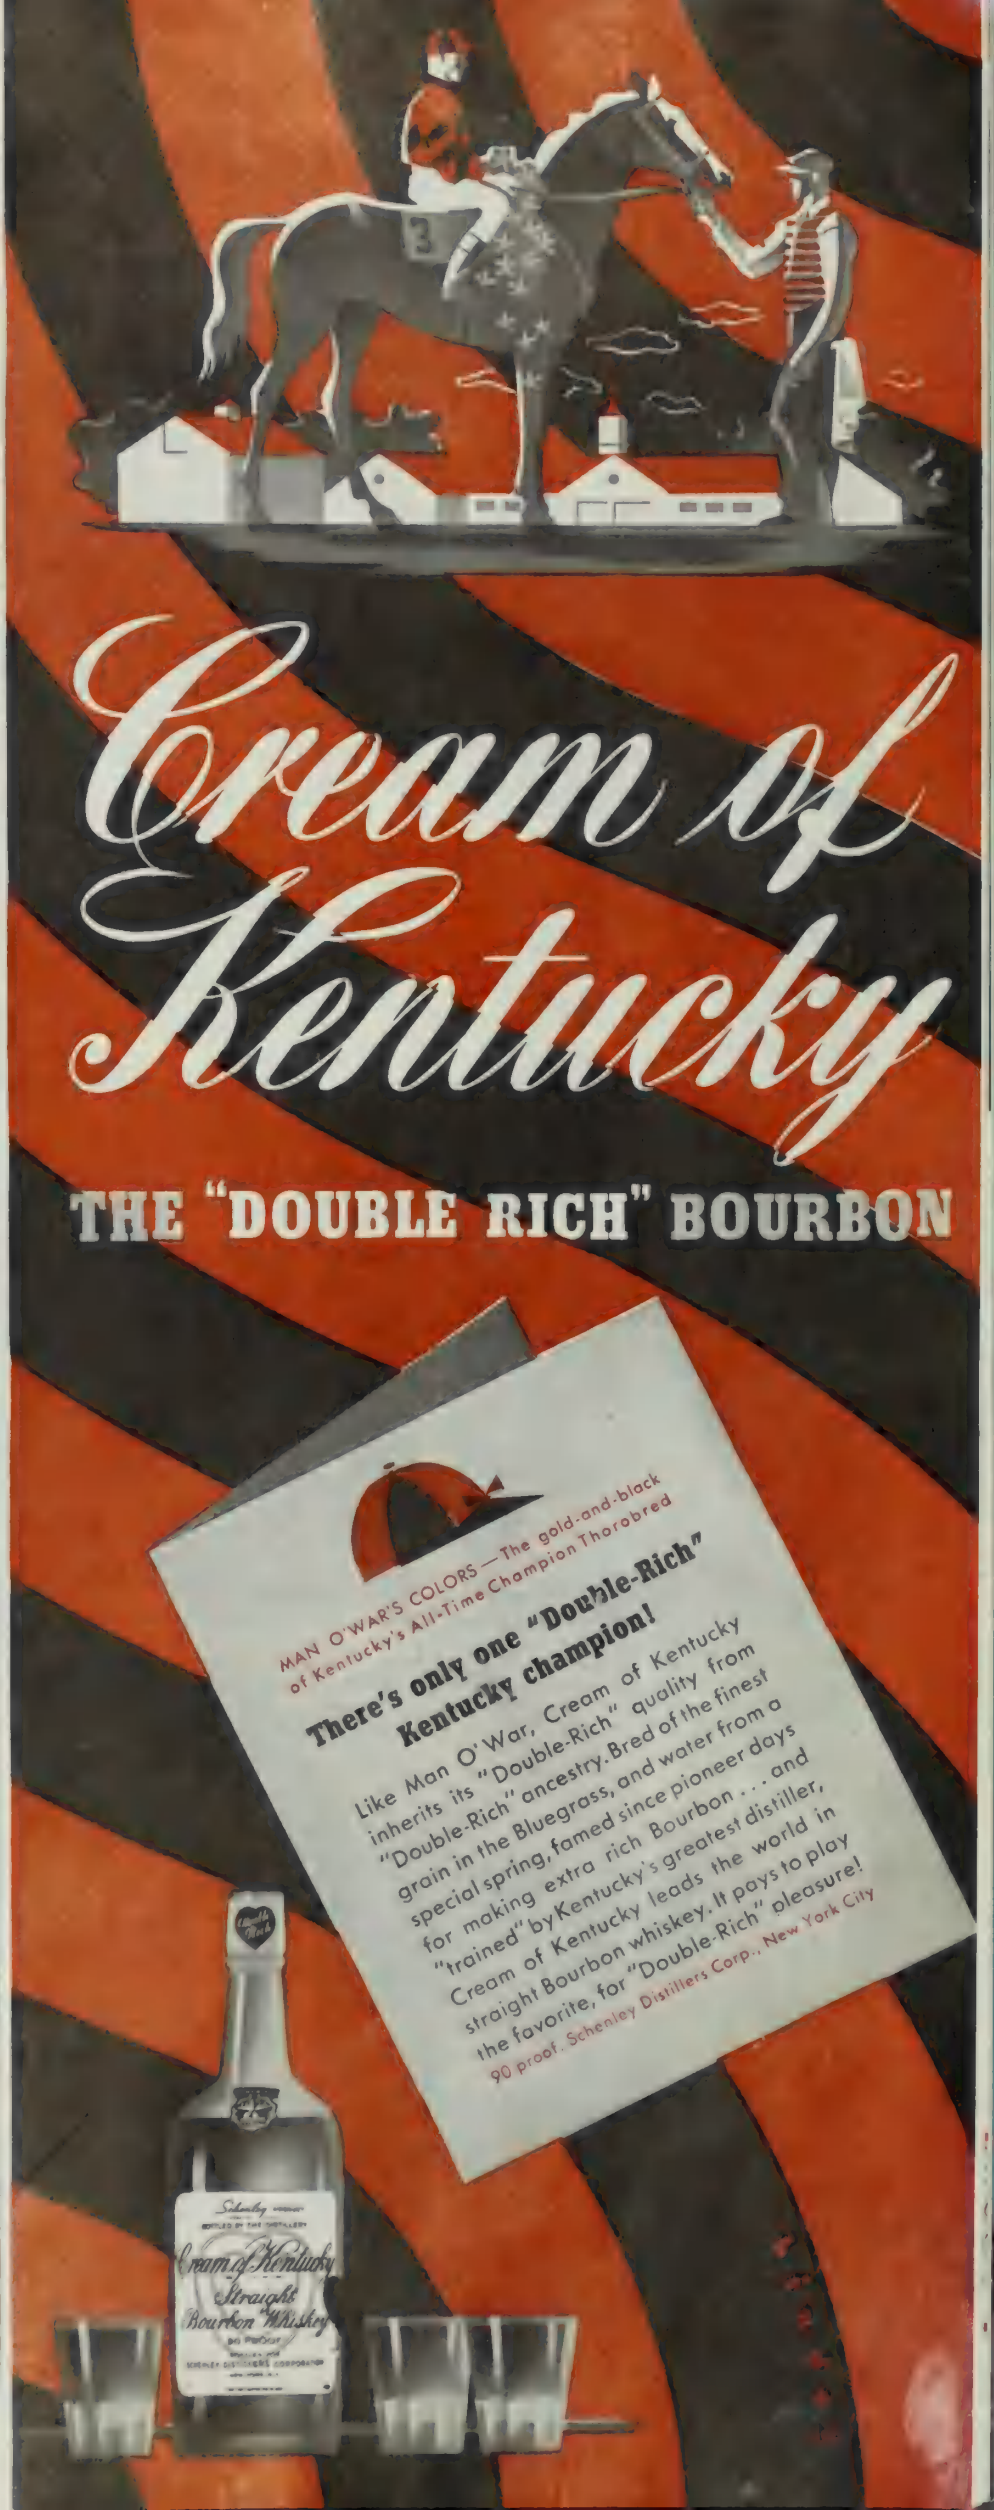
"She's goin' with Larry," I said.

"She is. She told him yesterday she'd go with him—to get even with someone else. And he's drunk right now."

"Drunk?"

"Drunk! If you had an eye in your head at all, there'd be a lot of things you could see. He's had a bottle with him all day."

"Say, Dynamite," I said. "You can't let her go to that dance with a man that's drinking."



That's something that just wasn't done in our town. A man that would do that showed he didn't have any respect for the girl. It was just calling her the cheapest thing he could think of.

"What can I do?" he said, and the engine moved away. "I'm only her father."

Larry had dropped off at the crossing to go to the hotel and get ready for the dance that night. I hurried with my time slip, and headed for town on the run. But I couldn't find Larry. He

"Don't look now, but something tells me we're going to have to contest Uncle Jim's will"

Here's a soup recipe that made a president smile!

Quaint Notes From Thomas Jefferson's Old Rule For Making Fine Vegetable Soup.

TAKE A SHIN OF BEEF. Cut fine, fry to a light brown in 2 tablespoons of butter, stir frequently to prevent burning. Cover entirely with water and let it come to a boil. Skim the foam that rises and boil slowly until meat is tender and falls apart. Take as many vegetables as you have and cut in small even pieces. Melt 3 tablespoonfuls of butter in a pan, add the vegetables and turn them over and over in the butter till well coated. Cover with the remaining broth. Season with salt and very little pepper and cook slowly until thoroughly done.

***Today**—Heinz gives you this old-fashioned soup with hearty beef stock and choice vegetables—minus the toil and trouble*

1. JEFFERSON kept a Garden Book—noted the time of ripening and the "pedigree" of vegetables grown on his estate. Often he got seeds from neighboring plantations or from abroad . . . Heinz also exercises painstaking care. Blue Ribbon vegetables are specially grown, tended and harvested under Heinz supervision.

2. RIGHT OFF the grocer's shelves (in a hurry) comes Heinz Vegetable Soup—all ready for you to serve. Try the same wholesome kind of soup that once graced the hospitable table at Monticello. It's one of America's favorite quick, economical dishes. You don't add a thing to Heinz Home-style Soups. Just heat and eat!

3. THERE'S practically a whole meal in a bowl of Heinz lusty, robust Vegetable Soup! And it's made in that careful old-style way which, as Jefferson once wrote, "draws all the virtue out of the herbs and vegetables and gives the soup a different flavor!" A finer, richer, better flavor! You'll truly enjoy Heinz Home-style Soup.

Heinz *Home-Style Vegetable* Soup

wasn't at the hotel. He wasn't at any of the saloons. I visited every place in town at least twice.

Aurora answered the door when I knocked. "Silver!" she said. She was dressed all in white, like she was that first time I saw her. Her eyes were so big.

"Is Larry here?" I said.

"Not yet," she said.

"You can't go to the dance with him, Aurora. I'm sorry, but you've got to stay home."

"Stay home?" she said.

"I'm sorry," I said. "But you've got to. When Larry comes, you tell him you're sick or something."

"Yes, I will!" she said, and banged the door on me.

I sat on the porch swing and waited. When Larry came up the walk, he was moving steady, but I could smell it on him. He looked elegant: he had on a fancy necktie, and a high collar, and his hat was tilted just right.

I said, "Go home, Larry. She ain't goin' with you."

He said, "Who the hell are you?"

I got up and walked over to him. "You can't take her any place when you're drinkin'."

"You're so damn' smart," he said. "You're so damn' smart."

He hit me then—hard.

Funny, it didn't make me mad. I said, "That ain't goin' to do you any good, Larry."

Aurora came out the door then. I heard her say, "Silver! Oh, Silver!"

Larry grabbed her. He said, "Stay outa this!" and pushed her. I heard her bump against the house.

I felt it coming then.

I felt it coming through my hands and my arms into my chest. It ran through my muscles like fire, and it made me sick. Like prickly fire it came crawling through my blood, and I was sick until it got to my heart and my brain. And then I didn't care.

I hit him twice in the head and then banged him in the middle. When he doubled, I threw a headlock on him, pulled him over my hip, and got my wrist on his jawbone. I was going to dislocate his jawbone before I threw him, and when I threw him, my knees would be on his chest. When I got up from him, he wouldn't have a whole rib left. I knew how to do it.

And then I saw her standing there against the wall. Her hands were down beside her, pressed against the building, and the white light from the street lamp on the corner near by was moving over her face, and her eyes helc

Her eyes were wide, And I knew she'd seen wh wanted her to see, what hide from her. She kne wasn't the man I had tri She had seen the kind of was, the kind of a man I'c saw her that night on th white dress.

I just stood there holdi my hip, jammed against ing, with his breath slidir the top of his open m power was frozen in my thighs.

Her eyes were still wide was moving back and fo face. "Is it me?" she sa cause of me you look lil Shaunnessy?"

"Forgive me," I said. " me, Aurora."

"It's beautiful," she beautiful, Silver."

"*Me?*" I said. "Look at at my hair. It's snow-whi

"How long has it bee Silver?"

"Ten years," I said.

She said, as though sh me to something, "And you when it turned snow-

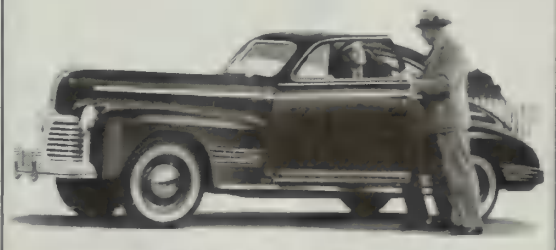
"Glub?"



Here's a customer for you, George ...*I've sold him a* Pontiac"

"IT ALL STARTED when I told him about a trip I made in my new Pontiac the other day. He knows the road I traveled and he doesn't like it. I told him how my new 'Torpedo' with its Tri-Flex-Cushioned Ride nestled down to that washboard road and sailed along like it was skimming the smoothest highway. When I told him I felt fresh enough that night to go out boating, he hardly believed me. He was impressed, all right, and I knew it.

"THEN I TOLD HIM about the size of the Pontiac and the roominess inside the big Fisher Body. We're both big men and we like space enough to be comfortable. I pointed out the solid construction of the body, the firm feel of the doors and the over-all appearance of a well-finished job. And I showed him the smart upholstery, and the body hardware, the good looking instrument panel and the many extra conveniences which Pontiac provides—all things that men and women both like.

"ABOUT THAT TIME I put him behind the wheel . . . and you should have seen the smile come over his face. The ease and sureness of Pontiac's Tru-Arc steering made a hit right away. But after a few minutes of driving he started to get money-conscious. That's when I told him that my Pontiac costs very little more to operate than the lowest-priced cars. And I told him, too, that I expect to get back every extra penny I'd invested in lower upkeep and greater trade-in value.

"THAT'S WHAT CLINCHED HIM. And I'll tell you this: Even more people will be owning Pontiacs when they learn how little a Pontiac costs to buy and drive."

PONTIAC PRICES BEGIN AT **$828** FOR THE DELUXE "TORPEDO" SIX BUSINESS COUPE

put his arm about her shoulder. It was the sort of thing that men did to women anywhere, often, these days. He had seen it so in New York over and over again, always recoiling from it nevertheless, or himself stiffening under a woman's lingering touch upon him. He had lived so long here where men and women never touched each other.

"If there is no more to be done, I'll go home," he said brusquely. "Louise will be back from the shelter now. It's pretty hard on her, all this."

"It must be," Sara agreed listlessly.

He caught the tone of her voice. "Better go to bed early."

"I will—if nothing turns up," she said.

"If it does, send for me." But he regretted the words instantly. Louise did not like him to be sent for in the evening.

"Can't Sara take the evenings?" she had once inquired sharply. "What else has she to do?"

"I suppose she'd like a little rest," he had said.

"She looks as strong as a horse," Louise had said contemptuously.

"She isn't," he said, knowing while he did that Louise would go into silence for the rest of the evening if he took Sara's part. But truth was instinct in him, and so he spoke it.

. . . "I won't need to call you," Sara said.

THEY went out and he closed the door, and side by side they walked down the corridor of the hospital, quiet for the night. He thought of her lonely rooms and longed to say, "Come home with me—Louise will be glad to see you." But he did not. Louise would not be glad to see her. He knew that because he had tried it. He had taken Sara home with him and sat through an evening whose strangeness he could not to this day comprehend. Louise had been polite to Sara and more than usually demonstrative to him. She had looked very pretty that night. More than once he had caught Sara looking at Louise with bewildered eyes, half admiring, half hurt. But he himself was too bemused with Louise then. She was, that night, more like the girl he had fallen in love with in New York than he had seen her in months. And Sara had grown more and more silent and at last she had got to her feet to say in her simple, frank way:

"I must go home. I must leave you to yourselves. After all, you see so little of each other."

"Don't go, Sara," he had said, but there was the warmth of Louise's hand in his, of her blond head leaning against his shoulder, of her amber eyes. And then after Sara had gone Louise had turned into her ordinary self instantly.

"Three's a stupid number," she had said. "You can't play bridge or do anything."

From the open window he had caught a glimpse of Sara walking solitary through the moonlight.

. . . "Well, good night, Sara," he said now. They had reached the stairs.

"Good night, Gray."

"Got anything to read?"

She shook her head. "Nothing new. But I shan't read much."

He nodded, and, opening the door of his house, went in.

GRAY thought, "I have never seen Louise so lovely."

He had dreaded coming home. He was late and, after the operation which had not saved Lao Wang, exhausted. And Louise, after an air raid was sometimes hysterical and always ready for tears and comforting. He wante himself tonight.

But he saw immediatel thing had happened to her the living room, reading drawn up to the small iron mass of Chinese coals a fringe of blue flames. S dress of soft yellow silk wit ing sleeves and a low bo bright hair shone. Behind doors into the dining roo table set with a white c chrysanthemums and red dles. She had not taken as as that for a long time. Le Siao Fah never put flowers Why, he reasoned, when t to be eaten? And why c there was the lamp? Siao ing Louise arrange the ta fectly understood all she d the yellow dress. "She i thought with pleasure.

She looked anything b Gray bent over her to kiss sweet perfume was in her

"Darling, you grow prett all the hardship," he said. you prettier even at a New party. Sure you don't mind me to see you?"

"If I minded, I wouldn't said, smiling. She loved h it. She would not have stay she not loved him. But s. live with him in her own there was ease and securit and people to admire her cessful marriage to Gray T only son of the Thomisons and half a dozen other plac see the sort of home she w York, the house that she a used to and could afford. —saved them all. She felt
gay for the first time since she had come to Chen-li.

. . . As for Dr. Chung, he was at this moment watching for the hospital gate to open. It was a new gate, and the pillars were repaired and the sign put up again, *The House of Mercy*. Siu-mei was late, but he was too triumphant to be tired. He had the letter in his pocket and he would, as soon as he had seen Siu-mei, take it to Yasuda to prove that he had done what he said he would.

A little before midnight the gate opened and Siu-mei's ricksha came in. In the light of the lanterns by the gate he saw her step down and pay the man, and then come into the hospital. He went down the steps, timing himself so that she might see him gracefully descending them. She saw him and stood at their foot, waiting for him. There was no one near to be seen, but he chose to speak in English, lest there be ■ waiting ear. Siu-mei knew English and spoke it with a pretty, faltering accent.

"Did you talk with your father?"

"Yes," she said, smiling at him.

"So he knows!"

"Yes," she said.

"And approves?"

She was about to say, "Of course," and then hesitated. "Strangely, the air raid began just as he was about to answer me," she said.

"And you did not speak of it afterward?"

"I forgot he had not—approved," she said, ashamed. And then when she saw his face she said, "But *I* approve—and that is enough for him."

He took her hand at that and she let it lie in his. He lifted it, palm upward and smelled it delicately in caress.

"Your hand is like a lotus bud," he said.

They had stood for a quivering moment when they heard ■ cough. There stood Ya-ching, the pock-marked nurse. Her face was blank.

"The Japanese says he cannot sleep," she said.

"I will come," Chung said coldly.

And though Siu-mei would have pulled her hand away he had held it and now he pressed it as if in Western parting.

"Good night," he said distinctly.

"Good night," Siu-mei replied.

Behind him the nurse Ya-ching turned and gave her ■ look so full of hate that she stood still for a long mo-

12,000,000 SUCCESSFUL SNAPSHOTS AT NIGHT

Taken by average picture takers last winter

JUST a little while ago, the average snapshooter was only half a snapshooter . . . all his pictures were outdoor pictures. But now, thousands of average picture takers are shooting indoors as well as out.

Using Kodak Super-XX Film—it's about four times as fast as ordinary film—they're getting as good snapshots indoors at night as they ever got outdoors in the sun.

MAKE YOUR DEBUT TONIGHT

Make your indoor picture-taking debut tonight. Remember, any camera at all will do—just so long as it takes Kodak Super-XX Film—even a $1 Baby Brownie. Depend on it, in a few days you'll be passing around as fine a batch of snapshots as you've ever taken.

Night Snapshots simple as A.B.C. with

KODAK SUPER-XX FILM

A . . . Load your present camera with Kodak Super-XX Film.

B . . . Use a couple of inexpensive Mazda Photoflood lamps in Kodak Handy Reflectors. (You keep your Reflectors, folded flat, in their attractive box. Kodak Handy Measure included.)

C . . . Follow the few simple directions in the FREE booklet. Like shooting with an expert at your elbow. Brief, easy-to-follow instructions and diagrams, exposure table, picture suggestions. At your dealer's . . . Eastman Kodak Company, Rochester, N. Y.

Coffee Enchantment

TO MAKE YOUR FLAVOR DREAMS COME TRUE WE PAY A PREMIUM FOR RARER, RICHER, MELLOWER BEANS

Lift your cup of Chase & Sanborn. Its aroma floats on the air—intriguing, intoxicating, foretelling flavor. Sip its flavor—deep, rich, pungent, wholly satisfying. Smooth yet enchanting. At once exhilarating and restful. We offer it as an inspiration to wit and charm . . . a silent pledge to friendship . . . a kindler of kindness and happiness—the New Blend CHASE & SANBORN.

Listen to the Chase & Sanborn Radio Program every Sunday on the NBC Red Network

CHASE & SANBORN COFFEE

ment, as though she had been stabbed, and later in her bed, lay sleepless, the look still sharp in her as a knife.

. . . She could not forget the look until the next day when in the maternity ward she looked up startled at a tall young man in a faded blue uniform. Then her pretty face turned severe in the instant and she forgot herself. He was Chen-ta Eagle and she recognized him and felt no less severe.

"What are you doing here, you man?" she demanded. "This is a place for women only."

"By my mother, I have no wish to be here," he replied, "but where am I? I came in the door and walked and walked and here I am."

"You should have announced yourself to someone, or asked for Thomison doctor or Chung doctor."

THEY missed Lao Wang who, puttering in the garden, had seen all who came and went. She had thought of him only a few minutes ago as she looked out of a window in passing. A frost had killed the chrysanthemums during the night. It had been always the saddest day of the year when that happened. Lao Wang gave up the garden until spring. But this year he did not know its coming, nor would he know the return of spring.

"Why should I announce myself to anyone I chanced to see?" Chen-ta asked.

His bold black eyes rested with pleasure on Siu-mei. She was the prettiest girl he had ever seen, and he had remembered her from the night the white woman had sewed up the ripped belly of his prisoner.

"What is your name?" he asked.

She pretended not to hear him. "What do you want?" she demanded.

"Your name."

The women in the ward laughed. Everybody was cheerful. This was the third day that there had been no planes above the hospital. There were raids, but the planes soared high over these buildings and dropped their bombs on the far side of the city.

"O-mi-to-fu," old Chinese men and women murmured. "Buddha wakes at last."

Sick people slept more easily and ate their food with gratitude for peace of any kind, even though it must end.

"My name is my own," Siu-mei said, her face grave at the Eagle's impudence. "I give it to no man."

"You will force me to take it, then," he replied with unmoved good humor; "it is my rule to take what I want if it is not given me."

"Be silent," she commanded him, "and follow me." She led him away from the laughing women into the corridor. "Stop your joking and tell me why you are here."

"Why? To take back my captive, of course," he cried. "Is he cured?"

"How should I know?" she replied. "I have nothing to do with the men."

"Here is one over whom you may have anything to do that you will," he said instantly.

She tried not to laugh and failed. "Will you cease jesting?" she cried, covering her smiling mouth with her hand. "Come with me to Thomison doctor. He decides everything here."

She turned without giving him a chance for more impudence and he followed admiring her slender shape and swift, sure tread.

"You could climb the hills as well as any man," he exclaimed.

She did not answer this. She marched along, her head high and laughter in her heart.

"Here is Thomison doctor's office," she said. "I will tell him. Wait here."

She went in to find Gray at his desk, sitting unusually idle, a frown upon his face. He stared at some She turned and found th her. She stamped her f

e opened the door of Yasu- m, Siu-mei was standing be- d. On the other side stood his watch in his hand, his finger upon Yasuda's wrist. f yourself," he told Siu-mei. ve a reason for this relapse." one side behind him stood a-ching. Under her immo- face her mind was moiling of Siu-mei. She had been iu-mei from the day Siu-mei hospital, not to become a a doctor, since she was the a rich man. From Siu-mei each year to take more and orders and requests. It made ce that Siu-mei's voice was and soft, and that she was , or that she ignored Ya- odiness. Ya-ching hated her very reasons as she hated , peach-colored cheeks and ack eyes. Long before Chung that he loved Siu-mei, Ya- it would come about be- s the thing she feared above hat one feared always came hought savagely. She went le and burned incense to the of th and prayed for Siu-mei's

Siu-mei did not die. One after a-ching gave gifts to the gods x and leprosy and decay of nd liver and of broken bones , but Siu-mei continued to . Then in her despairing pas- handsome young doctor she t him know her secret. In all ways that a desperate, hungry roaches a man, Ya-ching ap- Chung and laid bare her heart careless of anything except Her face was pock-marked in pallid and thick and her features were coarse and her eyebrows sparse. But despite this ugly face, her body was beautiful, a shapely thing, the skin smooth and untouched by pox. Yet what was this body to her if it must remain forever unseen?

And then she knew herself repulsed. The man she loved so that her love ate up her heart and her thoughts, ignored that which he could not fail to see. He did not see her hand when it must touch his, her eyes speaking what her lips yearned to tell, nor care that the body nearer his than need be was beautiful.

She had had a last faint joy when he bade her take care of the Japanese who was his patient. But the joy had soon passed. For it only gave her the chance to see him more often, and in him the shaping of love never for her, but for Siu-mei. Thus she stood, watching these two, seemingly aware only of what they did, but she saw their eyes and the warm color of Siu-mei's cheeks.

"The pulse is certainly too swift," Siu-mei said. "And the heartbeat is strangely faint. Was he as usual last night?"

"He seemed almost entirely well," Chung said.

Yasuda lay, looking from one to the other, panting. He felt very ill indeed and a little frightened. Now that he had swallowed the pills he was confused as to whether he had not taken too many. Four, Chung had said if he put his hand to his mouth when he came in the door. That signified haste. Surely he had said four? Or was it only three? He felt weak and breathless and the two faces near him dimmed in his eyes.

"Water," he whispered.

"Water," Chung repeated to Ya-ching.

She poured a bowl full from a clay jug on the table. But when Chung lifted the sick man's head he could not drink. He had fainted.

"What is this?" Siu-mei cried.

"Who can tell?" Chung replied, laying Yasuda down. He handed the still brimming cup back to Ya-ching.

And at that moment Gray came to the door. "I have been looking for you, Chung," he began. Then he caught sight of Yasuda. "What's wrong?"

"We don't know," Chung replied.

"But the man's dying!" Gray cried. "Quick, a hypodermic!"

Chung turned to Ya-ching and she left the room. Gray looked impatiently at her slow, heavy tread. "You go, Siu-mei —minutes count."

Siu-mei went, passing Ya-ching in the hall. "Never mind," she called. "I have one here in my office."

Ya-ching paused and stood still, her

"Huh! Smitty's gettin' up in th' world. I can remember when they used t' make 'im walk!" JAY IRVING

"We've been trying to get him to go home for weeks, but he won't believe it's night since we put in the new G-E Fluorescent Lighting!"

THE picture, we admit, is a trifle far-fetched. But it *is* hard to realize it's night outside when you have G-E Fluorescent Lighting *inside!*

Once this new kind of light has been properly installed in your plant or office, nobody can help feeling happier, making fewer mistakes, doing better, faster work with less fatigue . . . from the General Manager on down!

Scientists could give a dozen reasons for this. But the fact is, *our eyes were built for outdoor seeing.* And Fluorescent Lighting is the *closest practical approach yet to real daylight.*

The evidence is overwhelming

Mills, factories, machine shops are enjoying increased production, fewer rejects, better morale under this cooler, more abundant light. In offices, gloom goes out the window. Clerks get less tired, typists make fewer errors. Even the boss does better work in less time.

If you're in retail business

Stores of every size and type are finding that G-E Fluorescent Lighting can result in better sales, fewer exchanges, and happier clerks. Its higher-level illumination makes merchandise more attractive, more *visible.*

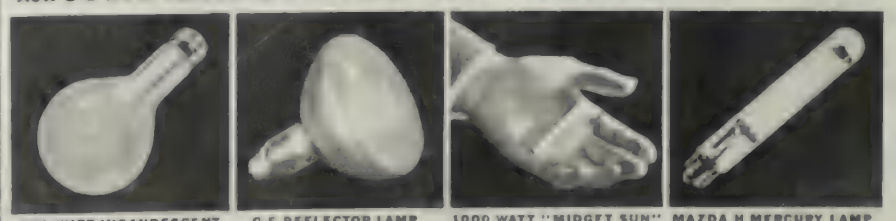
Where to go for best results

Call your G-E lamp man. Or see your G-E lamp distributor. He can show you certified fixtures, styled to fit *any* requirement of your business, complete with G-E MAZDA F (fluorescent) lamps, ready to hang up and turn on. He can draw on all the experience of General Electric to give you the best possible fluorescent lighting *properly engineered* to your needs—at *low cost!* Your lighting company is also ready to give you valuable up-to-the-minute advice.

1. ***Be sure you get certified fixtures*** with certified ballasts and starters to provide good power factor. General Electric does not make fixtures, but is glad to recommend Certified Fixtures bearing the Fleur-O-Lier or RLM tag.

2. ***Be sure you order G-E MAZDA F lamps*** ...not just "fluorescent tubes". Benefit from the latest achievements of G-E Research and Development, which already, since 1938, have increased light output of G-E MAZDA F lamps as much as 40% and reduced prices as much as 45%! Like all other G-E lamps, they are *made to stay brighter longer... give maximum light for current consumed!*

For new free illustrated booklet, "How to Speed Sales with Fluorescent Lighting," write General Electric Co., Dept. 166-COB, Nela Park, Cleveland, Ohio.



NEW LOW PRICES announced January 1st, 1941, on G-E MAZDA "F" lamps. New 5 foot 100 watt size is latest addition to the complete line.

Half a million new faces say...

"FASTEST, SMOOTHEST SHAVE WE EVER HAD!"

SCHICK SHAVER'S NEW 2-M HEAD SHEARS OFF THE WHISKERS 30% QUICKER—CLEAN AND CLOSE!

JUST a few months ago, Schick Shaver came out with the new 2-M Hollow-Ground Head.

Half a million men took it on the chin —*and liked it*. Men in all walks of life and with all kinds of beards liked it.

They join the happy millions of men that Schick has introduced to electric shaving in the last ten years.

They're getting *quicker* shaves—*30% quicker*—smoother shaves, closer shaves. All with no fuss, muss or bother —no nicks, cuts, razor pull or burn!

Maybe *you're* a skeptic—think it all sounds a little *too* good. So here's your "out." Get yourself a Schick Shaver with the new 2-M Head. Try it for 30 days. Don't take anything but quick, smooth, perfect shaves for an answer. If you don't get them your dealer will gladly refund your money.

SCHICK DRY SHAVER, INC., STAMFORD, CONN., U.S.A.

Only Schick offers all this!

• **NEW 2-M SHEARING HEAD**—hollow-ground to arch the skin surface—makes the whiskers stand up to be cut off. That's why it gives close shaves 30% quicker, easier, *better*. • **FLYING SHUTTLE SHEARER**—powered by an improved, faster motor—performing more than 14,000 shaving operations per minute. • **WHISK-ITS**—to catch all beard clippings. No other shaver offers this feature. • **BRAND-NEW STYLING** by Raymond Loewy—world-famous designer.

Schick prices now start as low as $9.95 *—for the popular* SCHICK CAPTAIN *complete with straight Speed King Head and Whisk-Its.*

NEW SCHICK FLYER—*styled in handsome burgundy plastic with silver-colored Whisk-Its and packed in genuine leather case, $12.50. This model is standard equipment on many leading airlines.*

NEW SCHICK COLONEL—*executed in rich ivory plastic, with gold-colored Whisk-Its. Packed in simulated alligator case, $15.00* (or, *packed in de luxe Dress Kit, $17.50*).

Many dealers offer easy payment terms!

Born in February? *Drop a birthday hint for a new Schick shaver!*

ATTENTION, SCHICK OWNERS!... *Get this 2-M Head for your shaver!*

We made this marvelous new 2-M Head so that it can be used on any of the millions of Schick Shavers now in use!

And it's yours for only $3.00! You get the new head expertly fitted, and the whole shaver inspected, cleaned, lubricated, and adjusted free of charge. Simply take your shaver to your nearest dealer—or send it to the factory in Stamford—or take it to a Schick Shaver Service Office in:

face a mask of hate, and then went back to the room.

There Gray was throwing questions at Chung and Chung shrugged his shoulders.

"It is as you see it," he said. "I know nothing. Some internal complication—"

"Did he know that his captor had come?" Gray asked.

Chung shook his head. "Who had told him? I have not spoken a word to him."

"Strange," Gray was muttering, "strange—strange!"

Siu-mei came back in an instant with the hypodermic and Gray plunged it into Yasuda's arm. They stood and watched the ashen face. It remained perfectly still. Then at last the lips quivered, the eyelids moved and Yasuda's opaque gray-black eyes saw returning shapes of faces about him.

"Water," he whispered hoarsely. "Water."

"Give him all he can drink," Gray commanded abruptly. He waited while Ya-ching held the bowl to his lips. Then he tested Yasuda's pulse and heart and examined his eyelids. "This man is certainly too sick to be moved now," he declared. "Chung, I would not leave him yet if I were you."

"I will not," Chung agreed.

"Call me if you need me," Gray continued.

"I think there will be no need," Chung replied.

When Gray had gone away, he turned to Siu-mei. "Do not wait," he said. "I will come to your office and tell you how he is."

She gave him a warm, quick look as she went and Ya-ching caught it as she passed. She stood until Siu-mei had gone. She waited in silence while Chung walked to the window and lit a cigarette.

"Arrange the patient's bed," he ordered her, and stood with his back to her, scanning the sky. It was a bright blue day, the air still and the heavens cloudless. Even as he stood the warning siren shrieked across the silence. An air raid, he thought, but without terror in him. This was the third day of peace in the hospital.

"The patient must not be moved," he said calmly.

"So," Ya-ching replied. At that moment her hand came upon something under Yasuda's pillow. She drew it out and looked at it. It was a small ball of hastily crumpled paper. She held it in her shut hand. Then the siren shrieked again. She glanced at Chung's turned back, at Yasuda's closed eyes, and opened the paper. In it were some small sulphur-colored pills. She was about to cry out and then she did not. Over her face crept a secret and triumphant look. She thrust the pills into her bosom and went on making the bed.

IN THE office Chen-ta stared at Gray. "Here is a strange thing," he said. "First a man is well and then he is ill."

"It is as strange to me as to you," Gray replied. "But it is so."

"When am I to return for him then?"

"Give him three days more," Gray said.

The siren sounded for air raid. Chen-ta rose. "Three days, then," he shouted.

"Three days," Gray shouted back. "And you had better stay until this is over!"

Chen-ta shook his head. "If I had feared those eggs they drop, I would have been dust long ago!" he bawled. Then he turned and strode from the room and down the hall and out of the hospital. He was too busy to heed the approaching planes. He was full of wonder at himself and at his good temper. Why was he not angry at this delay, he who was always quickly angry at anything that happened against his will? Why was he even pleased of returning here in th searched himself and kn In his memory he saw t of the tall girl who had white doctor's office. Siu man had called her, too thought with a flush of in

ng happened in her brown t my face blazing as I tried to ginning word. "I've got to find id. "I mean, I've got to make some money . . ." Then my blamed tongue tripped me.

And Gracie's face was troubled with pity, and before I could go on, she'd whirled to the cash box and was pushing two dollar bills at me. "I didn't know!" she said, soft and low. "No mind, Ovid, we can see the carnival on this."

Of course she'd meant well, but while we'd been talking somebody had come in the door and scraped up a chair to the front table. I shoved the dollar bills back toward Gracie, shamed at what the newcomer must have seen. Hot and sudden, my Bascom pride grabbed my hand and made it slap my pocket, ringing the silver change good and loud.

"I'm not asking charity yet!" I said before I could bite my tongue.

Then I knew I'd done it. She was great-eyed and trembly about the lips as I said, "Aw, listen, Gracie. Let me explain."

Her hands knotted on the counter and redheaded temper sparkled in her eyes. "Don't bother!" she snapped. "I know *cheap* when I see it! Just save your breath as well as your money. I'm not wanting either one!"

She lifted her chin and marched off.

Well, I thought I'd just straddle the stool till she cooled off enough to hear me out. But over at the front table she was saying, like she was merely tickled to death, "Why, hello, Earl Luther! Can I serve you aught today?"

That ruined me. I had to get out of there.

I banged through the door in a snarl of a mood.

MIDWAY of the block I heard my name sung out. I looked toward the Little Gem. Talk about rank amaze! I was that stricken I could only gape and goggle. It was none other than Earl Luther. He came sidling up to me like a sick cat to a hot brick, just splitting his lip in a grin and trying to act friendly.

While I tottered, he said, "Look here, Ovid, now that we're men grown, whyn't you and me drop this here family squabble? Pap's an old fool, an old pothead. He hadn't ought to taken your pap to law."

I felt crazier than a woman's watch.

"Maybe I can make it up to you, Ovid," Earl Luther was saying. "I couldn't help hearing you tell Gracie you were hunting a job. I reckon I know why—"

"Earl Luther," said I in terrible tones, "if you've gone and told Gracie any

DO YOU INHALE?

***All* smokers do — some times. And inhaling increases the chance of smoking-irritation.**

● Reported by eminent medical authorities is this vital difference between Philip Morris and four other leading cigarettes. ***On comparison, the other four brands averaged 235% more irritant than the strikingly contrasted Philip Morris.*** Read on:

● ***Further — the irritant effect of the four other leading brands was found to last more than five times as long!*** You can't *see* this difference — but you can *feel* it, *especially when you inhale!* That's vital to *all* who smoke!

● Especially if you inhale — Call for Philip Morris! Enjoy the world's finest tobaccos — with no worry about throat irritation.

AMERICA'S FINEST CIGARETTE

CREATORS OF FAMOUS CIGARETTES FOR 93 YEARS. ALWAYS UNDER THE PHILIP MORRIS NAME

Just what the Doctor ordered

IT'S common knowledge that doctors are among the heartiest of coffee drinkers.

They know, on scientific grounds, as well as by experience, that there's nothing like a good cup of coffee to rest you when tired, relieve fatigue, sharpen your faculties, and make your mind more alert.

They'll tell you, too, that if you're like 97 people out of 100, the gentle "lift" you get from coffee lasts only about two hours.

And *that* means, of course, you can enjoy the fragrance and cheer of coffee, morning, noon and night without worry over sleeping.

So why deprive yourself of this delicious drink? Enjoy your coffee whenever you want it!

Published by the Pan American coffee producers for the benefit of the American public, the largest consumers of coffee in the world.

crowds came Gracie herself, arm in arm with Earl Luther Siler. Something squeezed inside me as I dodged baseballs. I screwed up one eye and blared the other, I wrinkled my nose and crimpled my mouth in case Gracie might otherwise know me under that burnt cork.

The watching customers set up such a happy howl that Gracie did look straight at me. She smiled, but not in a recognizing way.

I knew then that Earl Luther hadn't told her about me working here. Duly grateful I tried to be, but all the same my teeth ached and I felt sick just seeing the two together, him taking her to the carnival in place of me. Earl Luther had turned a new leaf, yet he didn't look so good to me. He was walking beside her sort of bent over, peering into her brown eyes, flashing his teeth and looking fond.

He spoke out loud enough for me to got set, and started to let fly. Just then I must have forgotten to make my squinchy face, for Gracie was squealing, "It's *Ovid!*" and grabbing at his arm.

That's the reason the ball didn't get me dead center. Even so, it caught me a hard glance over the ear.

Wild hornets sung loose in my head. My ears were full of hammering anvils. All I knew for a minute there was that Earl Luther Siler was flinging at me as of old. I must try to reach him and put him out of business before he damaged me sore.

"The scouts adore Gran'ma. She goes back and forth until they've all got their good deeds for the day over with"

hear: "Honey, would you like to bop the darky?"

She shook her head. "I don't think so. I crave to ride the Ferris wheel."

He turned slow and narrowed his eyes straight at me. "I just think I'll try it a nickel's worth," he said, licking his teeth and grinning like a fox smelling a hen roost.

IT ALL rushed at me now. That Earl Luther must have been months waiting just such a chance to trap me where he could get me. And me, believing fool that I was, had swallered it hook and line and, yes, the dadgoned pole!

"Gimme two balls," Earl Luther said, throwing down a nickel on Mr. Kettles' counter.

"*You* again, huh?" said Mr. Kettles.

"None other." Earl Luther laughed. "I see you've changed black boys since I was here last."

Mr. Kettles looked mad but didn't say anything.

As Earl Luther gripped a ball and squinted down the alley, I just didn't know what ought I to do. So he hauled off and flung. The ball fair zizzed, but I dodged for sweet life and it missed by a whisper.

"I think I've got the range now," he said, staring at me.

Again he dropped his arm way back, by surprise and hemmed in by the crowd that he couldn't stir.

I was reaching my hands for him when somebody yelled, "Run get Warhoss Highfill!"

That made some of my wits come home to roost. You can't keep your pap off the county's road by getting put on it yourself. By the hardest, I curbed myself down.

Gracie had laid hold of my shirt and was trying to pull me away from Earl Luther. He was watching me careful with his black eyes. Mr. Kettles was jumping around like popcorn on a hot stove lid, waving his fists and telling me how fired I was. I'd got so crossed up and low in my mind that I felt I must throw back my head and yelp.

About then I heard a voice like a train whistle. It turned me around. I saw a man standing on the platform in front of the tent next to Mr. Kettles'. The prize-fighting show it was. A big, ugly, hard knot with blue jowls and a dirty bathrobe was next to the man and looking at me through his eyebrows.

The showman pointed at me and outcried, "Hey, you! You there, big boy! If you want to scrap, make it pay you!"

I listened and he said, "Ten silver dollars to stay just one round with Kid Tornado here is our fine offer to one and all. Ten silver dollars, big boy! How about it? Three minutes gets you ten dollars!"

Everybody was laughing and slapping my back. "Take him on!" they told me. "Match up with him!"

I wiped at the loblolly of sweat and soot on my face. I shook my head to clear out the buzzing.

The showman said, "Well, how about it, Captain?"

Earl Luther watched me. He said, "Naw! Ovid ain't stuffed with what it takes."

Of a sudden I got awful tired of it. I turned on Earl Luther and he ducked. "Put your money where your big mouth is!" I spit at him, savage as a catamount. "Are you betting I can't last out the round?"

"I'll cover you two to one," he said.

I wasn't bluffing but I thought he was. He was always as scarce of money this time of the year as me. What little he did get he spent on sporty clothes. But just to see, I picked out of the crowd an honest old face crouched back in a beard and asked him to hold stakes. I gave him my three dollars and seventeen cents. Then, bedogged if Earl Luther didn't pull out some bills and change and count six dollars and thirty-four cents in the old feller's hand! He grinned and hoisted his eyebrows at me.

Well, I aimed to go through with it. This crazy day had harried me so that I was plumb reckless. I said to the showman, "I'm your dewberry, mister."

"No!" said Gracie, commencing to yank at my arm. "Don't do it!"

"And what are you caring?" I asked.

She stomped her foot and said, "I just don't like to see anybody go and make a public fool of himself."

Then she threw up her hands. "Though, truth known," she said, "when you get your common old secondhanded motorcycle and go ripping around on it, you'll be sure to break bones anyhow."

"What secondhanded motorcycle?" I spluttered.

"You know very well!" said she. "Don't think *I* don't know why you crave money so, Ovid Bascom!"

I couldn't edge in a word, she was talking so fast and getting madder and madder. "I don't blame you for being ashamed to tell me!" she said. "So go right on and do what you want now, too! See if I care!"

She faced her back to me, just quivering and shaking, and took Earl Luther's arm. He patted her hand and looked mighty pious.

I could feel the string to my wits unraveling. But the showman was packing folks in his tent. I turned and almost ran inside.

THE showman led me to a roped-off square at the center of the tent. I took off my shirt, and he tied some boxing gloves on me and the Tornado. While he was doing it, I looked about. There were a hundred people or more around the ring. At the back I spied Earl Luther and Gracie. Her face seemed pale, but as I caught her glance she turned to Earl Luther and began to chatter very gay. He sort of winked toward me and stole an arm around her shoulder.

Right then fire flashed my blood. Something thundered my head. All at once I noticed that no poor devil in this world had ever been cursed with such a heartburning for a girl as I had for Gracie.

But now the showman was pushing me into a corner. The Tornado squatted in the other, a mighty, hairy and lumpy man. The way he glared at me, like he could eat me whole blood and raw, curdled my stomach with sickness. I thought hard of Pap and swore I'd stay in the ring if I could.

The showman said, "The rules is not to bite nor kick."

I nodded, trying to not look at the

Tornado, who'd begun to grind his teeth.

The showman climbed out. "When I hit this bell," he said, "start fighting. When I hit it again, the round's over."

I got braced. The Tornado commenced flipping muscles all over his body and showing his teeth. I felt I had about as much chance as a one-legged man at a kicking party. For Pap's sake I had to take that chance.

Then the bell went *blang-g-g*. The Tornado leaped from his stool with his fists cocked full of skill and his face full of slaughter. I jumped, too, and we scrambled in for a few licks. He welted me at pleasure. I could only hit the air where he had skipped aside. I was getting real jolted.

He kept hot after me. I tried to keep him at arm's distance, all the while swallering sad lumps and aching as I thought of Gracie.

Then he caught me in a corner. His fists were like iron balls shooting in from all sides. My head whistled tunes I'd never heard before. It was storming iron balls! I had to scrouge my head inside my gloves. His fists played royal seesaw on me, but I remembered Pap and managed to keep on my feet.

More than that, my brains were busy. For who could have told Gracie I wouldn't take her to the carnival because of saving my money to buy a secondhanded motorcycle? Who but Earl Luther?

The Tornado started butting. It nearly fixed me. The world was rolling under me when he pulled back, swearing and rubbing his head. Behind him, beside the ring, I saw the showman scowling at his watch and reaching for the bell. The crowd was getting mad and yelling, "It's been *five* minutes! Ring that bell! Ring that bell!"

LIKE fury this time, the Tornado feathered into me, slinging those iron balls as thick as birdshot, using his knees and butting. My head spun like a grindstone. I did my levelest to hold him off. With all my force I backhanded him a whop on the ear. He grunted sharp and hopped back, looking surprised. I strained to hear the bell.

But I heard a voice scream, "Watch out, Ovid!" Gracie's voice.

From the corner of my eye I glimpsed Earl Luther heaving his arm. I ducked, the bell rung, and the Tornado fell like a bull struck by lightning. The rock that had missed me bounced off his head through the ropes.

Things happened fast after that. Earl Luther was headed for the door of the tent. I vaulted out of the ring to cut him off. Then Earl Luther saw who'd been standing in the doorway. It was High-constable Warhoss Highfi with grim face looking like bu

"Agai Marshall performs a rescue
t. But this time he finds little to sus-
in his infatuation. Arlena is stupid,
worth of his sympathy and protec-
on, mi less. Nevertheless, I think he
ways ad a fairly true vision of her.
ong a r he ceased to love her and
was irked by her presence, he remained sorry for her. She was to him like a child who cannot get farther than a certain page in the book of life.

"I saw in Arlena Marshall, with her passion for men, a predestined prey for an unscrupulous man of a certain type. In Patrick Redfern, with his good looks, his easy assurance, his undeniable charm for women, I recognized at once that type. The adventurer who makes his living, one way or another, out of women. Looking on from my place on the beach I was quite certain that Arlena was Patrick's victim, not the other way about. And I associated that focus of evil with Patrick Redfern, not with Arlena Marshall.

"Arlena had recently come into a large sum of money, left her by an elderly admirer who had not had time to grow tired of her. She was the type of woman who is invariably defrauded of money by some man or other. Miss Brewster mentioned a young man who had been 'ruined' by Arlena, but a letter from him which was found in her room, though it expressed a wish (which cost nothing) to cover her with jewels, in actual *fact* acknowledged a check from *her* by means of which he hoped to escape prosecution. A clear case of a young waster sponging on her.

"I have no doubt that Patrick Redfern found it easy to induce her to hand him large sums from time to time 'for investment.' He probably dazzled her with stories of great opportunities—how he would make her fortune and his own. Unprotected women, living alone, are easy preys to that type of man—and he usually escapes scot-free with the booty. If, however, there is a husband, or a brother, or a father about, things are apt to take an unpleasant turn for the swindler. Once Captain Marshall was to find out what had happened to his wife's fortune, Patrick Redfern might expect short shrift.

"That did not worry him, however, because he contemplated quite calmly doing away with her when he judged it necessary—encouraged by having already got away with one murder—that of a young woman whom he had married in the name of Corrigan and whom he had persuaded to insure her life for a large sum.

"In his plans he was aided and abetted by the woman who down here passed as his wife and to whom he was genuinely attached. A young woman as unlike the type of his victims as could well be imagined—cool, calm, passionless, but steadfastly loyal to him and an actress of no mean ability. From the time of her arrival here Christine Redfern played a part, the part of the 'poor little wife'—frail, helpless, intellectual rather than athletic. Actually she was an extremely active young woman who could climb like a cat and run like an athlete.

"THE crime itself was perfectly planned and timed. It was, as I mentioned before, a very slick crime. The timing was a work of genius.

"First of all there were certain preliminary scenes—one played on the cliff ledge when they knew me to be occupying the next recess—a conventional jealous-wife dialogue between her and her husband. Later she played the same part in a scene with me. At the time I remember a vague feeling of having read all this in a book. It did not seem *real*. Because, of course, it was *not* real. Then came the day of the crime. It was a fine day—an essential. Redfern's first act was to slip out very early—by the balcony door which he

GOSH! HONEY, LOOK AT THE MONEY WE'RE SAVING

By figuring the financing cost on that new car for themselves, these young people are being thrifty. Maybe you can save some money, too.

Here's how to go about it. Fill out and mail the coupon below. Get your GMAC Figuring Chart that gives you the whole financing-and-insurance story in dollars and cents.

In a few minutes you can figure out the cost of your entire transaction—based on the amount of time you want, and the amount you wish to pay monthly. Then you will know, in advance, *exactly* what you get for what you pay!

The next step is to *compare* the cost of the different financing plans available to you. Check them carefully for financing cost and the completeness of the insurance included. Determine which one gives you greatest value for your money. See for yourself just where and how you can save!

Write for *your* Figuring Chart today! Learn about the many advantages of the General Motors Instalment Plan! Fill out and mail the coupon now.

This plan is available only through dealers in Chevrolet, Pontiac, Oldsmobile, Buick and Cadillac cars.

unlocked from the inside (if found open it would only be thought someone had gone for an early bath). Under his bathing wrap he concealed a green Chinese hat, the duplicate of the one Arlena was in the habit of wearing. He slipped across the island, down the ladder and stowed it away in an appointed place behind some rocks. Part I.

"On the previous evening he had arranged a rendezvous with Arlena. They were exercising a good deal of caution about meeting, as Arlena was slightly afraid of her husband. She agreed to go around to Pixy Cove early. Nobody went there in the morning. Redfern was to join her there, taking a chance to slip away unobtrusively. If she heard anyone descending the ladder, or a boat came in sight, she was to slip inside the Pixy's Cave, the secret of which he had told her, and wait there until the coast was clear. Part II.

"In the meantime Christine went to Linda's room at a time when she judged Linda would have gone for her early-morning dip. She would then alter Linda's watch, putting it ahead twenty minutes. There was, of course, a risk that Linda might notice her watch was wrong but it did not much matter if she did. Christine's real alibi was the size of her hands, which made it a physical impossibility for her to have committed the crime. Nevertheless, an additional alibi would be desirable. When in Linda's room, she noticed the book on witchcraft and magic, open at a certain page. She read it and when Linda came in and dropped a parcel of candles she realized what was in Linda's mind. It opened up some new ideas to her. The original idea of the guilty pair had been to cast a reasonable amount of suspicion on Kenneth Marshall, hence the abstracted pipe, a fragment of which was to be planted on the cove underneath the ladder.

"ON LINDA'S return Christine easily arranged an outing together to Gull Cove. She then returned to her own room, took out from a locked suitcase a bottle of artificial sun tan, applied it carefully and threw the empty bottle out of the window where it narrowly escaped hitting Emily Brewster who was bathing. Part III successfully accomplished.

"Christine then dressed herself in a white bathing suit and over it a pair of beach trousers and coat with long, floppy sleeves which effectually concealed her newly browned arms and legs.

"At 10:15 Arlena departed for her rendezvous: a minute or two later Patrick Redfern came down and registered surprise, annoyance, etc. Christine's task was easy enough. Keeping her own watch concealed she asked Linda at twenty-five past eleven what time it was. Linda looked at her watch and replied that it was a quarter to twelve. She then starts down to the sea and Christine packs up her sketching things. As soon as Linda's back is turned Christine picks up the girl's watch which she has necessarily discarded before going into the sea and alters it back to the correct time. Then she hurries up the cliff path, runs across the narrow neck of land to the top of the ladder, strips off her pajamas and shoves them and her sketching box behind a rock and swarms rapidly down the ladder in her best gymnastic fashion.

"Arlena is on the beach below wondering why Patrick is so long in coming. She sees or hears someone on the ladder, takes a cautious observation and to her annoyance sees that inconvenient person—the wife! She hurries along the beach and into the Pixy's Cave.

"Christine takes the hat from its hiding place, a false red curl pinned underneath the brim at the back, and disposes herself in a sprawling attitude with the hat and curl shielding her face and neck. The timing is perfect. A minute or two later the boat containing Patrick and Emily Brewster comes around the point. Remember it is *Patrick* who bends down and examines the body, *Patrick* who is stunned, shocked, broken down by the death of his lady love!

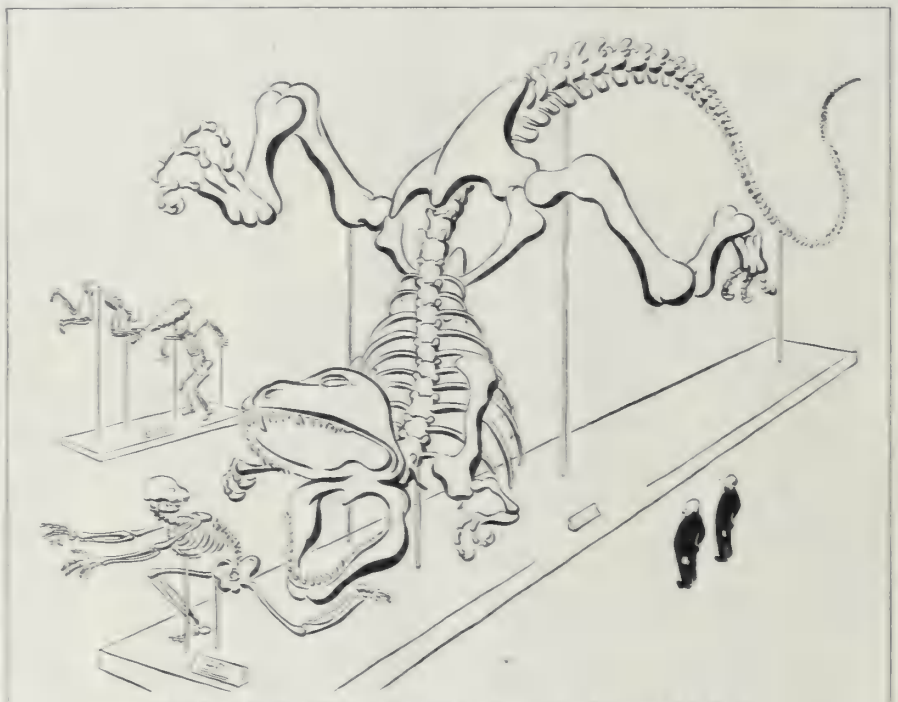
"MISS BREWSTER rows off to fetch the police. Christine, as soon as the boat has disappeared, springs up, cuts the hat into pieces with the scissors Patrick has carefully brought, stuffs them into her bathing suit and swarms up the ladder in double-quick time, slips into her beach pajamas and runs back to the hotel. Just time to have a quick bath, washing off the brown sun-tan application, and into her tennis dress. One other thing she does. She burns the pieces of the green cardboard hat and the hair in Linda's grate, adding a leaf of a calendar so that it may be associated with the cardboard. Not a *hat* but a *calendar* has been burnt. As she suspected, Linda has been experimenting in magic—the blob of wax and the pin show that.

"Then, down to the tennis court, arriving the last, but showing no signs of flurry or haste.

"And, meanwhile, Patrick has gone to the cave. Arlena has seen nothing and heard very little—a boat—voices—she has prudently remained hidden. But now it is Patrick calling.

"'All clear, darling,'" and she comes out and his hands fasten around her neck—and that is the end of poor, foolish, beautiful Arlena Marshall. . . ."

His voice died away.



For a moment there was silence, then Rosamund Darnley said with a little shiver, "Yes, you make one see it all. But that's the story from the other side. You haven't told us how *you* came to get at the truth."

"I told you once," Poirot said, "that I had a very simple mind. Always, from the beginning, it seemed to me that *the most likely person* had killed Arlena Marshall. And the most likely person was Patrick Redfern. He was the type, *par excellence*—the type of the man who exploits women like her, and the type of the killer—the kind of man who will take a woman's savings and cut her throat into the bargain. Who was Arlena going to meet that morning? By the evidence of her face, her smile, her words to me—*Patrick Redfern*. And, therefore, in the very nature of things, it should be Patrick Redfern who killed her.

"But at once I came up, as I told you, against impossibility. Patrick Redfern could not have killed her since he was on the beach and in Miss Brewster's company until the actual discovery of the body. So I looked about for other solutions—and there were several. She could have been killed by her husband—with Miss Darnley's connivance. (They too had both lied as to one point which looked suspicious.) She could have been killed as a result of her having stumbled on the secret of the dope smuggling. She could have been killed, as I said, by a religious maniac, and she could have been killed by her stepdaughter. The latter seemed to me at one time to be the real solution. Linda's manner in her very first interview with the police was significant. An interview that I had with her later assured me of one point. Linda considered herself guilty."

"You mean she imagined that she had actually killed Arlena?"

Hercule Poirot nodded. "Yes. Remember—she is really little more than a child. She read that book on witchcraft and she half believed it. She hated Arlena. She deliberately made the wax doll, cast her spell, pierced it to the heart, melted it away—*and that very day Arlena Marshall died.* Older and wiser people than Linda have believed fervently in magic. Naturally she believed that it was all true—that by using magic she had killed her stepmother."

"Adds a little life to the old place, don't you think?"

WILLIAM HAYES

ROSAMUND cried, "Oh, poor child, poor child. And I thought—I imagined—something quite different—that she knew something which would—"

Rosamund stopped.

"I know what it was you thought," Poirot said. "Actually your manner frightened Linda still further. She believed that her action had really brought about Arlena's death and that you knew it. Christine Redfern worked on her too, introducing the idea of the sleeping tablets to her mind, showing her the way to a speedy and painless expiation of her crime. You see, once Captain Marshall was proved to have an alibi, it was vital for a new suspect to be found. Neither she nor her husband knew about the dope smuggling. They fixed on Linda to be the scapegoat."

"What a devil!" Rosamund said.

Poirot nodded.

"Yes, you are right. A cold-blooded and cruel woman. For me, I was in great difficulty. Was Linda guilty only of the childish attempt at witchcraft, or had her hate carried her still farther—to the actual act? I tried to get l to me. But it was no g moment I was in grave unc chief constable was inclin the dope-smuggling explan let it go at that. I went c again very carefully. I ha collection of jigsaw-puzzle lated happenings—plain whole must fit into a comp monious pattern.

"There were the scissors beach—a bottle thrown fr —a bath that no one wo having taken—all perfec occurrences in themselves, significant by the fact that admit to them. Therefor be of significance. Nothin fitted in with the theories c tain Marshall's or Linda's gang's being responsible. *must* have meaning. I we to my first solution—that fern had committed the n there anything in support c the fact that a very large s was missing from Arlena's had got that money? Pat of course.

"ARLENA was the typ easily swindled by young man—but she was type of woman to be black was far too transparent, not at keeping a secret. The story had never rung true And yet there *had* been t tion overheard—ah, but c whom? *Patrick Redfern's* her story—unsupported by evidence. Why was it in answer came to me like l account for the absence money!

"Patrick and Christine F two of them were in it toge tine hadn't the physical strangle her or the mental it was Patrick who had don was impossible! Every n time was accounted for u was found.

"Body—the word body thing in my mind—bodies beach—*all alike*. Patrick Emily Brewster had got and seen *a body* lying ther suppose it was not Arlen somebody else's? The fac by the great Chinese hat.

"But there *was* only one Arlena's. Then, could it be —someone pretending t Could it be Arlena herself Patrick to play some kind shook my head—no, too r body—whose? This *light ale* is now first choice of millions who once drank beer

AFTER draining his first glass of Ballantine's Ale, a beer drinker's a changed man. Ale "too heavy" a drink for him? Not any more! In Ballantine's, he's found a *light* ale.

And will he ever again be satisfied with anything less than the superb Ballantine *flavor*—resulting from the finest of ale yeasts? It's not likely!

Nor will you—once you've sampled *your* first bottle of Ballantine's. Look for the famous 3-RING trademark standing for PURITY, BODY, FLAVOR—and call for Ballantine's Ale . . . today. Costs no more than the better beers. Sold coast to coast.

d, but *afterward*. A body
scovered at a quarter past four. A husband with an alibi up to twenty-five past four.

"What really happened? It was said that Edward Corrigan arrived at the Pine Ridge, found his wife was not there *and went out and walked up and down.* Actually, of course, he ran full speed to the rendezvous, Caesar's Grove (which you will remember was quite near by) killed her and returned to the café. The girl hiker who reported the crime was a most respectable young lady, games' mistress in a well-known girls' school. Apparently she had no connection with Edward Corrigan. She had to walk some way to report the death. The police surgeon only examined the body at a quarter to six. As in this case the time of death was accepted without question.

"I made one final test. I must know definitely if Mrs. Redfern was a liar. I arranged our little excursion to Dartmoor. If anyone has a bad head for heights, they are never comfortable crossing a narrow bridge over running water. Miss Brewster, a genuine sufferer, showed giddiness. But Christine Redfern, unconcerned, ran across without a qualm. It was a small point, but it was a definite test. If she had told one unnecessary lie—then all the other lies were possible. In the meantime Colgate had got the photograph identified by the Surrey police. I played my hand in the only way I thought likely to succeed. Having lulled Patrick Redfern into security, I turned on him and did my utmost to make him lose his self-control. The knowledge that he had been identified with Corrigan caused him to lose his head completely."

Hercule Poirot stroked his throat reminiscently.

"What I did," he said with importance, "was exceedingly dangerous—but I do not regret it. I succeeded! I did not suffer in vain."

There was a moment's silence. Then Mrs. Gardener gave a deep sigh. "Why, M. Poirot," she said. "It's just been too wonderful—hearing just exactly how you got your results. It's every bit as fascinating as a lecture on criminology—in fact, it *is* a lecture on criminology. And to think my magenta wool and that sun-bathing conversation actually had something to do with it! That really makes me too excited for words and I'm sure Mr. Gardener feels the same, don't you, Odell?"

"Yes, darling," said Mr. Gardener.

Hercule Poirot said, "Mr. Gardener too was of assistance to me. I wanted the opinion of a sensible man about Mrs. Marshall. I asked Mr. Gardener what he thought of her."

"Is that so?" said Mrs. Gardener. "And what did you say about her, Odell?"

Mr. Gardener coughed. "Well, darling," he said, "I never did think very much of her, you know."

"That's the kind of thing men always say to their wives," said Mrs. Gardener. "And if you ask me, even M. Poirot here is what I should call a shade on the indulgent side about her, calling her a natural victim and all that. Of course it's true that she wasn't a cultured woman at all, and as Captain Marshall isn't here I don't mind saying that she did seem to me kind of dumb. I said so to Mr. Gardener, didn't I, Odell?"

"Yes, darling," said Mr. Gardener.

LINDA MARSHALL sat with Hercule Poirot on Gull Cove. "Of course," she said, "I'm glad I didn't die after all. But you know, M. Poirot, it's just the same as if I'd killed her, isn't it? I meant to."

Hercule Poirot said energetically:

"It is not at all the same thing. The wish to kill and the action of killing are two different things. If in your bedroom instead of a little wax figure you had had your stepmother bound and helpless and a dagger in your hand instead of a pin, you would not have pushed it into her heart! Something within you would have said 'No.' It is the same with me. I enrage myself at an imbecile. I say, 'I would like to kick him.' Instead, I kick the table. I say, 'This table, it is the imbecile, I kick him so.' And then, if I have not hurt my toe too much, I feel much better and the table it is not usually damaged. But if the imbecile himself were there I should not kick him.

"To make the wax figures and stick in the pins it is silly, yes, it is childish, yes—but it does something useful too. You took the hate out of yourself and put it into that little figure. And with the pin and the fire you destroyed—not your stepmother—but the hate you bore her. Afterward, even before you heard of her death, you felt cleansed, did you not—you felt lighter—happier?"

Linda nodded. "How did you know?" she said. "That's just how I did feel."

Poirot said, "Then do not repeat to yourself the imbecilities. Just make up your mind not to hate your next stepmother."

Linda said, startled, "Do you think I'm going to have another? Oh, I see, you mean Rosamund. I don't mind her." She hesitated a minute. "She's *sensible*."

It was not the adjective that Poirot himself would have selected for Rosamund Darnley, but he realized that it was Linda's idea of high praise.

KENNETH MARSHALL said, "Rosamund, did you get some extraordinary idea into your head that I'd killed Arlena?"

Rosamund looked rather shamefaced. "I suppose I was a fool," she said.

"Of course you were."

"Yes, but Ken, you are such an oyster. I never knew what you really felt about Arlena. I didn't know if you accepted her as she was and were just frightfully decent about her, or whether you—well, just believed in her blindly. And I thought if it was that and you suddenly found out that she was letting you down you might go mad with rage."

"So you thought I just took her by the throat and throttled the life out of her?"

"Well—yes—that's just exactly what

"ne to think of it, I suppose it does look rather suspicious"

I did think. And your alibi seemed a bit on the light side. That's when I suddenly decided to take a hand and made up that silly story about seeing you typing in your room. And when I heard that you said you'd seen me look in—well, that made me quite sure you'd done it. That, and Linda's queerness."

Kenneth Marshall said with a sigh, "Don't you realize that I said I'd seen you in the mirror in order to back up *your* story. I—I thought you needed it corroborated."

Rosamund stared at him. "You don't mean you thought that I killed your wife?"

Kenneth Marshall shifted uneasily. He mumbled, "Dash it all, Rosamund, don't you remember how you nearly killed that boy about that dog once? How you hung on to his throat and wouldn't let go."

"But that was years ago."

"Yes, I know—"

Rosamund said sharply, "What earthly motive do you think I had to kill Arlena?"

HIS glance shifted. He mumbled something again.

Rosamund cried, "Ken, you mass of conceit! You thought I killed her out of altruism on your behalf, did you? Or—or did you think I killed her because I wanted you myself?"

"Not at all," said Kenneth Marshall indignantly. "But you know what you said that day—about Linda and everything—and—and you seemed to care what happened to me."

"I've always cared about that," Rosamund said.

"I believe you have. You know, Rosamund—I can't usually talk about things—I'm not good at talking—but I'd like to get this clear. I didn't care for Arlena—only just a little at first—and living with her day after day was a pretty nerve-racking business. In fact, it was absolute hell, but I *was* awfully sorry for her. She was such a damned fool—crazy about men—she just couldn't help it—and they always let her down and treated her rottenly. I simply felt

sweethearts, or not likin' Sunday dessert, or gettin' a little bit cold."

"What d'you mean—gettin' a little bit cold?" demanded Pvt. Aaron Gilman of Bell Harbor, Long Island. "When we first get here they put us in winterized tents that don't even have tar paper over the wooden baseboards, and what d'you suppose goes on? I have a bottle of milk in my tent the night the mercury hits bottom and when I wake up I don't know whether I am me or the bottle. Both of us are frozen stiff!"

"That's better," said the Corp. Berg. "Pretty good, in fact. But you got to do it all the time."

●

SOUTHEAST: If you think that getting a camp going is just a matter of tossing together a few one-story buildings, dusting off a drill field and filling same with men, take a look at some Fort Meade statistics. Preparing for more than 25,000 trainees, National Guardsmen and regulars, this Maryland camp's program calls for more than 1,200 new buildings, fifty miles of sewer and water lines, twenty miles of new roads and high-power transmission lines capable of carrying up to 13,000 volts. Lumber has been coming in at the lively rate of 1,000,000 feet a day, making some of the builders and construction engineers feel they've been in the chicken-coop business up to now.

Things are humming in Norfolk, Va., too. A combination of Navy construction, defense training and Coast Guard work is turning Norfolk into a boom town that has the local gentry bug-eyed. Last year's census gave the city credit for 143,000 men, women and children but that figure has already skipped past the 175,000 mark and may reach 200,000. If and when it does, Norfolk will become the biggest town in Virginia, taking the honor away from Richmond, which now claims 190,000 assorted citizens. Norfolk is the site of important Navy yards; trainees and regulars are making Fort Story bulge at Cape Henry, five miles away, and the Coast Guard has growing pains at Camp Pendleton, two miles south of Virginia Beach. You wouldn't know the old places.

The light cream and pale gray color scheme of the country's defense cantonments started at Fort Meyer, Maryland. Paint experts had the meemies about it at first because this particular combination requires quantities of sienna (from Italy) and umber (from Turkey), but a checkup showed enough of these pigments in the U. S. to take care of the works. The Army fooled around with several combinations before they conceived the light cream-pale gray number; then they asked President Roosevelt to look it over and say what he thought. He thought it was fine; so trainees who think otherwise and want to say so will have to direct their squawks to the White House.

NEW ENGLAND: Take one part of snow, melt slightly, then freeze until the surface is glassy. Add twelve inches of heavy wet snow. Result: New England Draft Weather. At Fort Devens a lot of erstwhile civilians are suffering from severe head and chest colds—they call it Fort Devens T. B.—but the weather can't take the rap for the whole business. Officers and old soldiers agree it's partly due to faulty heating systems in some of the hastily built temporary barracks, and they're pretty sure the Army won't officially accept several of the buildings now being tried out at the Reception Center.

Anyway, life goes on at Fort Devens. When the mercury finally stopped at 18 degrees below, one recent morning, officers marched the selectees to a large building for indoor instruction. Later in the day an athletic period appeared on the schedule. What did the men elect to do? They decided to go outside and take off their overcoats and play football.

One of them might have been Pvt. Lester Connors of Billerica, Massachusetts, who fatalistically admits to being a veteran of more than one phase of the national emergency program. "When the construction work got under way here," he explains, "I got a job as timekeeper at $41 a week. My pal got a job, too, and he used to drive me to and from work. Then in November he was drafted and I had a hell of a time getting back and forth, so I thought I might as well volunteer and let the Army take over my transportation worries." It's working out fine, he says.

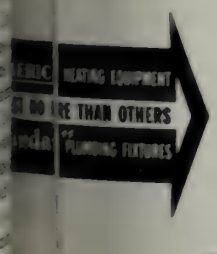
"THANKS to our Heating and Plumbing Contractor we discovered there was no need to cut corners on comfort, beauty and convenience in our home. He showed us the complete line of famous AMERICAN Heating Equipment and "Standard" Plumbing Fixtures and proved anyone can afford them—even in a small home on a small budget!"

How true! For this line is *really complete*—with high quality products of all types in all price ranges. You can choose Radiator Heat with a fine, efficient AMERICAN Boiler, or a quality Sunbeam Warm-Air Furnace or Winter Air Conditioning Unit, to meet the *exact* requirements of your budget and home . . . whether you prefer Coal—stoker or hand-fired—Oil or Gas. And from scores of smart "Standard" Plumbing Fixtures, in white and 11 glorious colors, you can choose a bathroom and kitchen that will win the hearts of your whole family!



And, on our Easy Payment Plan you can modernize right now and make no payments for 2 months. Then take as long as 3 years to pay on low monthly terms. For full details ask your Heating and Plumbing Contractor or write to our Pittsburgh Office for a free copy of the colorful 64-page booklet shown below.

CITY SIN

By ROARK BRADFORD

ILLUSTRATED BY WILLIAM MEADE PRINCE

"Mankind!" Bugaboo shouted. "Dis pe-rade is a dog! Me an' Iron Man must be de Royal Inner Gyard, or somethin'!"

Sin-Splitting Samuel does the preaching, and Bugaboo Jones and Iron Man take care of the fighting

THE whistle of the John D. Grace gave two throaty blasts, the pilot spun the big wheel and the boat turned her nose from midchannel of the Mississippi River toward the bank. Half a mile away, a man astride a mule was waving his hat frantically.

Iron Man, lying flat on his back on the forward main deck, tapped his harmonica and sighed. "Town name of Bayou Sara used to be along 'bout hyar, befo' she drapped in de river."

Bugaboo Jones raised on his elbow, looked, shook his head and looked again. He frowned and turned to his friend. "You look, Iron Man," he begged, "and den tell me I don't see what I sees."

Iron Man looked. "You's right, Bugaboo," he said sadly.

The steamboat touched shore and was held nose-on by the stern wheel's slow churning. The plank was lowered quickly and the man rode down. As the mule's foot touched the deck, the gangplank was hoisted, the wheel reversed and the boat backed toward the channel.

Captain Cooley walked to the rail of the hurricane deck above.

"Howdy, Splitter," he greeted. "Which-away?"

The Reverend Sin-Splitting Samuel, still astride old Balaam, his bony sorrel mule, pushed the flopping brim of his black hat from his eyes and looked upward. "Howdy, Cap'm Cooley," he returned. "Dis time, suh, I'm bound for N'Awlins."

"That far? I thought you never went south of Baton Rouge."

"I ain't never been dar yit," the preacher said, "but now I'm got de call dat de guv'mer done tore down de ole Basin Districk in N'Awlins and done built some bran'-new slumses."

"I have heard of some such activity," the captain said.

"So I and ole Balaam hyar got de call to revive de sin outn dat place."

The steamboat captain chuckled. He had been familiar with the evangelistic career of Sin-Splitting Samuel for nearly half a century.

"North Louisiana made a short cotton crop, this fall," Captain Cooley pointed out, "but I didn't figure times were hard enough to run you clear to New Orleans."

The Sin Splitter grinned. "Whar hit ain't no money, hit ain't no sin," he said.

"And speaking of that," the captain told him, "fare for you and your mule will be five dollars."

"Yassuh," the preacher said without hesitation. "I'll send hit right up by one er de boys."

THE captain returned to his rocking chair and the Sin Splitter dismounted. He passed the cotton rope rein to a young roustabout named Sylvester. "Take Balaam back er de b'iler and bus' open a bale er dat hay," the preacher ordered.

Sylvester was new on the river and the Sin Splitter was new to Sylvester. "You makes kind er free wid yuther people's time," Sylvester protested. "Who feed yo' mule when you ain't on de boat?"

The Splitter glared and walked away, leaving Sylvester acutely unhappy.

"I don't like dat kind er man," Sylvester complained.

"Sho you don't." Iron Man told him. "Don't nobody like him. But you gonter feed his mule and de mate gonter ketch you bus'in' open a bale er dat cargo hay and he gonter take a doll

Here's your toothbrush for the next 12 months!

50¢

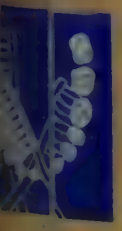
Now you need only one toothbrush a year if you buy a *Miracle-Tuft*

★ If you wonder which toothbrush to buy, here's a startling new fact to guide you: The experience of millions of Dr. West's Miracle-Tuft users proves that this super-quality toothbrush cleans better and keeps on cleaning better a full year after you buy it.

Bristled with amazing "Exton" brand filament—heavier, stronger, longer-lasting than any other bristling substance—Miracle-Tuft is guaranteed to give 2 to 1 longer life than any other brush. But this is only one of the great benefits that Miracle-Tuft offers you . . .

Vital to your health and peace of mind is the fact that Dr. West's Miracle-Tuft reaches you *surgically* sterile, sealed-in-glass. And it's the only toothbrush offering you this extra, important protection.

Clearly, Miracle-Tuft is "the buy" among toothbrushes—for longer life, for better cleansing. *The finest toothbrush you can buy now or ever!* Choice of textures and Regular, Professional and Oro shapes.



These ...ch-Tuft Exclusives ...n ...eaner, brighter ...teet for you . . .

Exclusive!
"EXTON"
Brand Bristling
Heavier, stronger, lasts longer. Compare with any other toothbrush, texture for texture!

Exclusive!
SURGICALLY STERILE
Sealed in glass..germ free
Reaches you as sterile as a surgeon's instruments—Tests prove 100% sterility years after sealing

Exclusive!
CORRECT SHAPE
Patented and original!
Reaches every surface, every crevice of every tooth

Why do young people go for MERCURY in such a big way?

YOUNG people of all ages seem to like the "get-up-and-go" of this new and different automobile. Our engineers applied lessons learned from aviation to give Mercury more power per pound than most other cars. That's why it gets out front and stays there in any kind of going. Mercury has no superfluous weight but a big reserve of live power always at instant command. And it combines this power with size, stamina and stability unusual in so fleet a car. Drive one and see if Mercury doesn't fit your idea of what a modern car should be.

FORD MOTOR COMPANY

MERCURY "8"

before tomorrow's payday. Deftly, he flipped a dime into the bib of his overalls and then dumped the rest of his money into the hat.

The Sin Splitter never overlooked cash. "Rogue f'm yo' brother," he warned, "and you do's a sin. But rogue f'm de Lawd, and bad luck sho gonter overtake you."

Bugaboo bristled. He was familiar with all the talk and some of the doings of the notorious evangelist; and he had heard Iron Man speak of the preacher's extraordinary powers of persuasion. But to be called a thief for not giving away all of his own money, made Bugaboo angry.

"You ain't no brother er mine," he declared with some heat. "And I knows you ain't de Lawd. And even efn you was bofe, hit ain't roguin' for me to hold out a dime er my own money."

THE preacher glared at him silently. Iron Man smiled sadly and began to breathe lonesome sounds through the reeds of his harmonica. Bugaboo glared back and began to sing:

"I kin feel my hell a-risin'
High as de sun kin shine.
And I'd druther kill me a preacher
Den give him a lousy dime."

The Sin Splitter immediately changed his tactics. He smiled pleasantly. "You's jest de kinder man I needs," he declared warmly. "I'm got some powerful fightin' to do agin ole Satan down yonder in N'Awlins, and I'm gittin' 'long in de years. I kin handle de preachin' and de groanin', all right, but when hit come to de fightin'—"

Iron Man stopped the music. "Is hit fixin' to be a fight?"

"Sho," said the Splitter. "Ole Satan been a-sowin' sin for a solid hund'ed years whar dem new guv'mer slumses is. You don't reckon preachin' and singin' gonter undo hit all, does you?"

"Me, I don't keer much 'bout fightin'," Bugaboo said, "but Iron Man, he sorter like hit. And I and him always stays together when hit's a fight goin' on."

"Dat's on account I'm got to pull people out f'm under Bugaboo when he git mad," Iron Man explained, "or else us go to jail for killin' somebody. Bugaboo don't like to be in jail."

The Sin Splitter beamed. "Y'all boys jest natchally got to he'p me out. Now, come on, Bugaboo, and drap dat dime in my hat so's I won't have bad luck takin' up de rest er de collection."

Bugaboo parted with his last dime and enthusiastically slapped Iron Man on the shoulder. "Mankind!" he exclaimed. "I bet you's fixin' to have a heap er fun when us is in N'Awlins dis trip!"

Iron Man did not share his excitement. "I ain't never had me no fun around a preacher," he recalled gloomily. "And dat goes double for de Splitter."

The hat was passed among the other roustabouts, and with a frown or smile, the preacher succeeded in getting all the loose change on deck. As he completed the collection, Sylvester returned.

"De mate," he reported to Iron Man, "kotched me bus'in' dat bale er hay, jest like you said."

"And he writ down a dollar agin yo' payday?"

"Naw. Dat's alfalfa hay. He writ down a dollar-fo'-bits."

"De best ain't none too good for Balaam," the Sin Splitter remarked. "Now, gimme yo' loose change so's I kin git down and revive de sin outn de guv'mer slumses."

"Gi' you what so's you kin do which?" Sylvester demanded.

"Small change, son," the preacher said impatiently. "I ain't got time to argy wid you. Gimme."

Sylvester looked shocked. "Listen, man," he began, "what you tawkin' 'bout?"

The Sin Splitter shrugged. "You tell him. I can't waste time."

Iron Man explained: "Hit's fixin' to be a heap er fightin' and dat's for me and Bugaboo. De change is to pay de Splitter's fare to N'Awlins so's he kin revive de sin outn de guv'mer slumses down yonder. Splitter gonter preach and I and Bugaboo gonter fight."

"Which guv'mer slumses?" Sylvester inquired.

"Who keer which?" Bugaboo said. "Hit'll be preachin' and fightin' and goin'-on!"

"Efn y'all figgerin' on de Magnolia Street slumses," said Sylvester, "well, dat's whar my cousin, name er Kid Reuben Weeks, live at. He do *all* de fightin' 'round dat place, 'specially wid de middleweights."

"We wa'n't speakin' 'bout dat one," put in the Splitter.

"Den you must be speakin' bout de one by de St. Louis cemetery, whar de old Basin used to be at."

"Dat's de one," the preacher said quickly.

" 'Twon't do," said Sylvester. "Elder Johnson do all de preachin' down dar."

The Sin Splitter took this news in his stride. "Us fixin' to do de fightin' in de St. Louis cemetery slumses and de preachin' in de Magnolia Street slumses."

It sounded so reasonable that Sylvester poured all his loose change into the hat. The preacher counted out five dollars and handed it to Sylvester.

"I'm gonter let you hold dis," the Splitter generously offered. "Jest take hit to de harricane deck and gi' hit to de cap'm. F'm me. Onderstand?"

Sylvester did not understand but by the time he returned to the main deck he was beginning to. The preacher had found a comfortable berth on some cottonseed sacks and was now asleep. Iron Man was breathing a sad wail into his harmonica and Bugaboo was resting his eyes while his mind was trying to think up songs to sing to Iron Man's music, just in case he might wish to sing.

"Dat preacher," Sylvester said bitterly, drawing up to Bugaboo and Iron Man, "done cost me eighty cents in money. And dat ain't countin' what he cost my wages for dat bale er hay."

"He ain't wuth eighty cents in money," Iron Man admitted, "but hit's cheaper to pay him den not."

"Pay him for what?"

"Nothin'. Jest pay him. He'll git hit all, anyhow. And you might jest as well gi' hit to him like I and Bugaboo done, den to let him argy you outn hit, like you done."

FOR the rest of the trip down-river Sin-Splitting Samuel kept to himself while his mule munched hay back of the boiler. Iron Man grew increasingly apprehensive; Bugaboo, always willing to let the future take care of itself, rested his mind as well as his eyes; but Sylvester simmered with a not completely understood anger. And when, just before landing at New Orleans, the mud clerk actually held out a dollar and a half of his pay, Sylvester got no happier.

When the John D. Grace docked at the Esplanade Street wharf, the roustabouts were given their final "holdout" dollar and the mate announced the boat would leave the following afternoon.

For once in his life, the Reverend Sin-Splitting Samuel was uncertain of himself. Here were a dozen rousters with real cash money fresh from payday. And cash money in other people's pockets ever was a challenge to battle for the old preacher. On the other hand, spread out back of the levee lay the sinful old city of New Orleans and that brand-new government housing settle-

rty set out for Satan's
reacher on Balaam led
d Bugaboo, with Sylves-
he rear. They turned up Rampart Street and lakeward along St. Louis. A man on a mule, even a scarecrow apparition like the Sin Splitter, is not a spectacle to attract attention in New Orleans; but when the party presented itself at the St. Louis Cemetery housing project, it was something else.

A uniformed watchman stopped them at the gate.

"Y'all can't bring dat jackass in hyar," he stated. "Dis is de guv'mer projeck, and de guv'mer lady say you can't avvertise nothin' in hyar." He looked at the preacher and the mule. "Is you avvertisin' moo'm pitchers or whisky?" he asked.

"Us lookin' for a fight," Bugaboo said.

"Can't avvertise no fight in hyar, neither. Nor nothin' else. Efn y'all got business to 'tend to, come in. But you got to leave de mule outside. You got business?"

"I'm a preacher," the Sin Splitter said, "and I got business anywhar hit's sin goin' on."

The watchman laughed. "I reckon hit's plenty sin goin' on," he admitted. "But Elder Johnson keep busy fightin' hit. Maybe y'all want to visit wid him?"

"Maybe," the Splitter said cautiously.

"Den tie up yo' mule, and I'll show you," the watchman offered obligingly.

Sylvester hung back. "You ain't comin'?" Bugaboo asked.

"Naw," Sylvester said. "I'm got things to do."

THE watchman led the way along the paved avenues and courts that flanked the prim brick buildings. Here, where sin of international fame once flourished, lived simple working people, in economical apartment houses. The Sin Splitter saw nothing sinful. He decided hopefully that the whole project might be wicked splendor on a large scale.

Elder Johnson received the Sin Splitter and the two roustabouts cordially, and invited them into his shining unit. He had heard of the old evangelist and knew his reputation as an exhorter.

"Ah, Lawd," said Elder Johnson wistfully, "I wisht I c'd travel hyar and yonder on a mule, Free-Willin' amongst de sinners, beggin' my bread when I git hongry and my bed when I git sleepy

"I don't know why I bother. I never win anythin' anyway"

Quantico Marines reported a longer lasting peppermint flavor in **Beech-Nut Gum**

IN RECENT TESTS at Quantico, Va., U. S. Marines reported that Beech-Nut's peppermint flavor *lasted* on an average of 25% longer than the peppermint flavor of all the other brands they tested. In addition, a large majority of these Marines said that they preferred the peppermint *flavor* of Beech-Nut to the average of the others tested. Prove this yourself. Get a package of Beech-Nut Gum and see how long and how much *you* enjoy its fine, distinctive flavor!

An independent research organization made the tests*

An independent research organization made these tests with about one-tenth of the Marines at Quantico, Va. Beech-Nut and various other brands of peppermint chewing gum were tested. All were bought in local stores. The identity of the gum was positively concealed. Each Marine was given 2 different brands (Beech-Nut and one other) asked to chew them and report how long he thought the flavor of each stick lasted and which stick he found had the better flavor. *Name on request.

and all de time twis'in' ole Satan's tail to de cows come home. But naw. I got money crazy—I ever c'd take up a dirdy collection—and built my own church. Now I'm got to collect cash money to pay de bills and pay my rent hyar and buy a little somethin' for de widder-womens and de hongry and sick. But I'm still a Free-Willer."

"Me, too," the Splitter nodded enthusiastically. "And Runnin' Water."

"I'm a Foot-Washer on de Fifth Sunday," the Elder said.

"And a Close' Communion, me," added the Splitter.

"Hell Fire?" the elder wanted to know.

"Blazin' broomstone f'm de Burnin' Bush!" the Sin Splitter agreed.

"Rev'und," Elder Johnson said, "ev'y man and 'oman in my church might git up and wawk out, but I'm gonter ax you to give 'em a doste er dat ole-time religion. My people all de time want to hyar de good things. Dey claim dey git plenty bad news widout comin' to church."

"Sinners," the Splitter stated, "don't never like to hyar de bad news. And dat's de kind I and Balaam likes to hit hardest."

Elder Johnson's brow furrowed in deep thought. "You ain't got dat ole jackass down hyar wid you, too, is you?"

"He hitched at de big gate."

"Well, whyn't you say so? Rev'und, me and you's fixin' to th'ow de biggest one-night revival meetin' ever hit dis town!"

The Sin Splitter was interested. "How we split de collection?"

"Half and half."

"I do's all be preachin'," the Splitter reminded him. "And preachin' like I preaches is mighty hard work."

"I'll git de crowd gathered up," Elder Johnson pointed out, "and git a permit f'm de guv'mer lady for you to preach. I gits half or else dey won't be no meetin'."

THE Splitter gave in. "Money ain't no skin offn my back," he said. "But I'm got to git steamboat fare back up de river."

Elder Johnson reached for the telephone.

"I knows hit's agin de rule, Mis' Hazel," he said when he had the project supervisor on the phone. "But you knows I do a heap for you, keepin' things straight. I'd sho like to hold hit at de Sunshine Spiritual Christian Mission Af'ican Baptist Church, but I can't on account er my friend got to ride his mule and he can't do dat in my church. No'm, hit won't be no trouble and us'll git done by midnight. Thanky, ma'am."

He turned to the Splitter. "I got de permit," he said. "Now, le's I and you git out and circulate amongst de sisters and scare up a crowd."

"I mos' gen'ally," said the Splitter with cool dignity, "lets de home preacher ush up de meetin'. I likes to lay down and rest and pray befo' I preaches. Whar's a bed?"

Elder Johnson pulled a wall couch down from behind what appeared to be a door. "Take off yo' shoes," he invited, "and stretch out."

He turned to Iron Man and Bugaboo who had been sitting uncomfortably near by. "Y'all boys," he said, "kin drap over to de market and buy some chickens for supper." He took out his wallet and started to open it. The Splitter interrupted.

"Dey got money," the preacher suggested. "And," he added perversely, "I smelt me some fish whilst I was comin' up hyar. Efn you runs into a fish man, you kin buy me about a three-pound buffalo." He turned to Elder Johnson. "I preaches good on a bait er chicken," he explained, "but wid a belly full er buffalo, I can whup de years offn Satan."

The Splitter retired, Elder Johnson got busy at the telephone, and Iron Man and Bugaboo set off for the market.

"I swear," Bugaboo complained, "I don't b'lieve de Splitter gonter git no fight goin'."

"Is you achin' for a fight?" Iron Man demanded.

"Who, me? Not me. I don't like fights. I figgered you was daid sot on one."

Iron Man shook his head. "I ain't wantin' me no fight. Efn a fight break out, I'll git in hit. But when no fight don't break out, I don't feel bad."

"Well, whyn't you say so? I gi'ed dat ole preachin' fool my last dime, and den went widout no chawin' tobacco for a whole day, jest cause you wanted a fight."

"Nawp," Iron Man denied. "You gi'ed him yo' last dime cause he wanted yo' last dime and de Splitter always git what he want."

ELDER JOHNSON knew his people liked a show and he knew how to give them one. In the few hours that remained before nightfall, he managed to get his corps of ushers and coworkers busy spreading the news. He told them just enough about the Splitter to fire their imaginations and make them eager to attend the meeting.

Promptly at sundown, so the working people would be home and before they had time to get comfortably filled with supper, Elder Johnson started the festivities. His own choir, in mortar boards and black gowns, led a procession from the Sunshine Spiritual Christian Mission African Baptist Church, singing in lazy march time, When the Saints Go Marching In. The coworkers followed in white uniforms and caps and, bringing up the rear, the entire membership, each with a white brassard on his arm. Next, came Elder Johnson, flanked on each side by three brown-sk suits draped with a v bearing the legend: M SPIRITUAL.

And finally came himself. He was astric Iron Man and Bugabo the mule and the two handsomely enshroud quito netting.

"Mankind!" Bugabo pe-rade is a dog! I re Man must be de Roy somethin'."

"You s'posed to be rected the Splitter.

"And Iron Man is Bugaboo said.

"Hysh! Don't tawk the Splitter cautioned.

the hat toward Bugaboo and Iron Man, taking a dollar from each of the bewildered roustabouts. When the elder had completed the second round, all of the money was placed in the Sin Splitter's hat, and the elder introduced the prophet.

"De Rev'und Sin-Splittin' Samuel!" Elder Johnson roared. "A genu-wine prophet f'm back in de hills! Le's give him a hand!"

The Sin Splitter had never before preached to so large a throng or under such auspices. From where he sat, he could see money heaped high in his old black hat. With such an incentive, he knew what to preach.

First he glared; then in hollow tones that reverberated throughout the settlement, he began on a conglomeration of his three most famous sermons:

"Paul say hit take grace, grit and greenbacks to spread de gospel. De Lawd gimme de grace, my mamma gimme de grit and I kin see de greenbacks piled high. So y'all Christians shout and y'all sinners tremble whilst I whup de devil around de stump and gi' him a lick at ev'y jump!"

SIN-SPLITTING SAMUEL threw salvation with such thunderous phrases and awesome figures, even the most hardened sinner was spellbound with fear and wonder. But he never finished the sermon.

For, just as Nebuchadnezzar was in the homestretch of a chariot race around the walls of Babylon, with eagles flying forth and carrying cans of coal oil on their tails, and the dry bones across the street in St. Louis Cemetery were about to rise and prophesy, Sylvester elbowed his way through the crowd.

With him was a short, stocky, very black man with an aggressive chin and a cauliflower ear.

"Dat's him, Kid!" Sylvester shouted, pointing to the Sin Splitter. "He de one do'ed me outn my money!"

Sylvester's stout cousin, known to prize-fight followers as Kid Reuben Weeks, started for the preacher. Bugaboo Jones was in his path but the Kid did not see him.

"Mind out who you pushin'!" Bugaboo growled.

The Kid wheeled and something hit Bugaboo on the chin harder than he had ever been hit before. Bugaboo struck back, swinging the Kid against Iron Man.

"Now!" Iron Man grinned happily, as he hit the Kid three blows before the pugilist crumpled.

Meanwhile, the watchman, in a noble effort to preserve the peace, reached for Bugaboo. It was a mistake. Bugaboo swung and the watchman catapulted toward Iron Man, who was able to get in only one lick before the watchman dropped.

"Bugaboo!" Iron Man groaned. "Us done hit de guv'mer!"

"Hit him some mo'," Bugaboo urged, getting into the spirit of the fight.

"Le's git," Iron Man countered. "Hittin' him is mo' worse den hittin' de po-leece."

The fight had caused considerable stir in the crowd, forcing the Splitter to stop midway in his peroration. Someone shouted for the police. It looked bad for the two roustabouts, but, for no reason they could ever figure out, the Sin Splitter's old mule gave them their chance.

Balaam laid his ears back, brayed and charged toward the gate. Iron Man and Bugaboo followed without interference. Once free of the crowd, they deserted Balaam and by shadowy, circuitous detours, they reached the peace and quiet of the steamboat, hours later.

The mule was munching hay on the after main deck.

"Man, my chin hurt whar dat short black boy hit me," Bugaboo complained.

"And my fist hurt whar I hit him," Iron Man said. "But you hadn't ought to hit de yuther boy. Hittin' him was jail-house stuff. Efn hit hadn't been for dat ole jackass yonder, I and you would be wearin' de ball and chains, f'm now on."

Bugaboo laughed. "Wonder whar de Splitter at? I disremember seein' him on Balaam's back when us left outn dat place."

"Don't weary 'bout me," the Splitter called from the darkness of the boiler room. "I wa'n't fixin' to ride off and leave my hat full er money layin' on de ground. I reckon hit must be a solid hund'ed dollars in dat hat. Maybe mo'."

"You means," demanded Bugaboo, "you climbed offn dat mule wid all dem people yellin' and fightin' and goin' on, jest to pick up dat money? Man, you might er got kilt!"

"Money breed evil," the Sin Splitter stated piously. "And I was preachin' me too good a sermon to run off and leave a whole hat full er evil for ole Satan to start off wid, again."

'Be with you in a moment, Dick. You know where the liquor is"

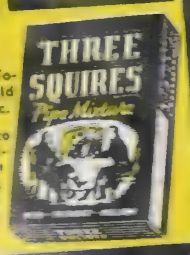
Cut from genuine ALGERIAN ROOTS

Because of the size of the bowl, this rich-looking pipe can be cut only from large-size briar roots. A real he-man's pipe - rugged, hefty, yet the delicate carvings give it remarkable beauty and lightness. Easy to smoke because you get a grip on it, holds a generous filling of tobacco. Now you can own one of these luxury pipes at an amazingly low price.

Nine Phase Filter guarantees cool, clean smoking.

Pipe shown actual size



RARE RUSTIC BRIAR reg. value ... $2.00
FOIL PACK Original RUM and MAPLE PIPE MIXTURE, Blend 53 .25
FOIL PACK THREE SQUIRES TOBACCO .15
Total Value $2.40

ALL FOR $1.00 POST PAID

By arrangement with the Rum & Maple Tobacco Corp., we are able to give you full-size packages of these two famous tobaccos. This is an opportunity for you to smoke these tobaccos sold at stores everywhere from coast to coast.

FREE with EACH PIPE

America's No. 1 Fine Tobacco—this Foil Pack sold for 25c now sells for 25c.

Three Squires Tobacco is mild, friendly, mellow. A great value at 15c. These tobaccos can be smoked individually or blended together.

MONEY BACK If you are not 100% satisfied, we will cheerfully refund your money and you keep pipe and tobaccos. Sent C.O.D. you pay postman $1.00 plus 18c C.O.D. fee, or send a dollar bill, check, money-order or stamps and save 18c. Catalogue of other Westminster bargains with each order.

Everybody's Army

Continued from page 13

help. Boy Scouts trotted around delivering it. Roy Gill, school superintendent and chamber of commerce president, let school out for the day; Police Chief G. A. Clanton marshaled the kids on the main stem with flags as the convoy rolled in. Mayor A. L. Tidwell fixed up showers; somebody lent a campsite; somebody else put in floodlights and Mrs. J. M. Heath of the D. A. R. rounded up every flag in the place to make a showing.

"Not that Brooks County needs flags to show its patriotism," said Mrs. Daniel. "None of our boys has ever been drafted for any war; we run over our quotas with volunteers."

For the volunteers from "up No'th" Brooks County farmers had driven in enough hogs to make four hundred pounds of barbecued pork. In the War Between the States the county had been called the "Smokehouse of the Confederacy" and it still looks on beef, mutton or chicken as puny vittles. As one white-haired old veteran said: "Our pork and bacon was what helped us lick hell out of you Damyankees for fo' years, suh!"

He grinned as he said it—because the South today is trying to kill the Damyankees by kindness. Where a soldier hails from means nothing. . . .

At Waycross, in the turpentine country of Georgia, the railroad lent a campsite, the chamber of commerce gave Colonel Burns half an hour on the radio, the fire department put in water and junior chamber of commerce members, wearing badges, handed out greeting cards and showed the boys around. At other stops there were variations on the same theme.

This Army is Different

The 260th, in turn, put on a show each night, like a circus. Men, women and kids roamed about the camp, watching the pyramidal tents going up, climbing over the guns, asking a million questions—and getting answers—as gun crews demonstrated "how it works." Capt. Charlie Buck, a veteran with more than a quarter of a century of service, lifted small boys up to peer down into the machinery of the searchlights.

You watched all this, as the searchlights shot blue cones through the haze and made light-circles high in the star-studded sky. You saw the colonel with a kid on one shoulder and leading another. You heard snatches of banter between guys with eagles and oak leaves and bars on their shoulders and boys with one or two stripes on their shirt sleeves. You noticed the easy efficiency and teamwork—and you thought how different it is in other armies: Of the rigid discipline, the barked orders, the snobbery and class distinction. You thought, too, how the citizenry are treated in other lands—ordered to do thus and so, prodded into line, commanded to billet so many soldiers, shoved and pushed around. This army was different—it wasn't made of professional soldiers officered by gaudily uniformed snobs. It was just people in uniform, doing a job. It was still part of the people and not a thing apart—or above.

It was different, too, from the old Army of '17 and '18. Some of the veterans with A.E.F. ribbons and four or five stars said it was sissy—which was what the veterans of northern China in Genghis Khan's hordes said of the new levies that joined the Scourge in Asia Minor. To the tough old-timers who had swapped bullets with the Moros in Mindanao and dodged Boche whizbangs in the Argonne, it looked strange to see soldiers with a portable radio over one shoulder and a candid camera over the other.

There may be no gas stations handy in wartime, so its own fuel supply and gasses up wherever necess prime-movers lug the guns south and westward to

"I guess in the next war," grinned Captain Buck, a top sergeant until a few weeks ago, "the boys will capture a position, take pictures of it and then tune in on a news broadcast to find out how the rest of the battle's going."

You remember how the A.E.F. lived on canned bacon and goldfish and a sort of pink marble called corned beef? Well, you ought to taste the new canned rations.

There's one can that contains wholewheat biscuits, coffee and sugar, for a light lunch. There are others full of beef and beans, meat hash and vegetables. Vitamins and everything. Good, too! The new rolling kitchens can turn out a swell feed in jigtime. Last time, the war went to some people's heads; this time it's going to their stomachs.

And remember that chore of shaving with cold water before a tiny metal mirror? Lieut. Col. LeRoy S. Mann, who gave up a prosperous printing business in Washington to become executive officer of the 260th, licked that one. His pride and joy is a command reconnaissance car—a high-riding, four-wheel drive chariot affectionately known as The Jeep. With a converter, he plugs into the car's electrical system and, using the rear-view mirror to look in, shaves by electricity. So does everyone else who can get near the wagon.

Even bunk fatigue isn't bunk fatigue any more. You know what it is now? Systematized relaxation, that's what. We saw it in print in an Army newspaper.

The Jeep, by the way, has to have its name changed, much to the chagrin of Privates Francis Petty and Joe Gallagher, who drive it, because a jeep is really a plane detector. Privates Petty and Gallagher are unde to call it a doodlebug or

ILL CARS ALIKE ?
NOT BY A JUGFULL!

COME FOR A RIDE IN A HUDSON . . . SEE FOR YOURSELF

DIFFERENT IN 5 IMPORTANT WAYS!

A Cars Alike In SAFETY?

If th ure, how is it that Hudson received the o *perfect score of all 1941 cars* for safest Body esign in winning the annual Safety Eng ering Magazine Award? Or take brak Only Hudson offers you finest hy- drau s with a mechanical reserve system wor *automatically from the same foot* ped ever needed. And Patented Auto- Pos Froot Wheel Control—extra safety eve *a tire blows.* Ask about *all* the extra saf features you get in

A ERICA'S SAFEST CAR

2 All Cars Alike In EASY DRIVING?

Forget the clutch pedal! Just try driving a Hudson with Vacumotive Drive! *Go, stop, back up —without ever touching the clutch pedal!* Costs less than any other feature that completely eliminates clutch pedal pushing,* and no other car priced so low as the new Hudson Six offers anything like it. While you're at it, try the difference with Hudson's true Center-Point Steering and the improved Synchronized Silent Mesh Transmission that's in every 1941 Hudson.

*Only $27.50 extra, installed at factory

3 All Cars Alike In BEAUTY?

Take a look at Hudson's *Symphonic Styling*—the big new style idea you can get *only* in a Hudson! A real eyeful of beauty when you look at the *outside*—a complete symphony of harmonizing color when you look *inside*. Here's the first low priced car that ever offered you a choice of beautiful interior color combinations that harmonize with exterior colors (even down to such details as carpets and floor mats)—*and at no extra cost*. No wonder Hudson owners are a mighty proud bunch of people.

l Cars Alike In COMFORT?

Dise e on Hudson's improved type of independ t front wheel coil springing will show you difference. No car within hundreds of dolla of Hudson prices ever had it before! The here's the utter luxury of Airfoam Seat Cush s—available in all 1941 Hudsons, stand- and many. And you can enjoy *conditioned air* the ir round! Try it with Hudson's Weather- Mat —warm in winter, cool in summer, no dra no drowsiness from stale air, no fogged win ws even in rain with windows closed.

5 All Cars Alike In ECONOMY?

If they were, how could a big 92-horsepower Hudson Six win in its price class in the 1941 Gilmore-Grand Canyon Economy Run—*with more miles per gallon than any other entry in the entire run except two short-wheelbase, low-powered cars in a different price class?* In a Hudson, you get this economy along with *performance* that holds nearly 150 official performance and endurance records—more than any other car! For low cost all around, year-after-year, you can't beat a Hudson. Ask *any* owner!

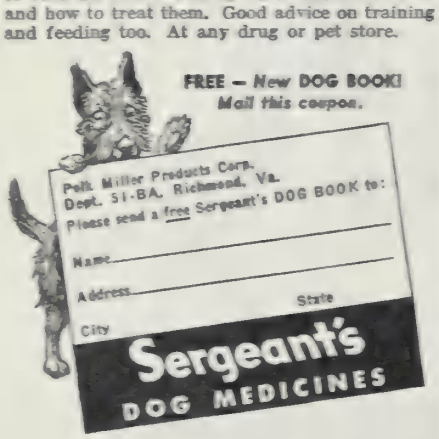
"... and here's another way you win!"

Best 1941 Buy in Every Popular Price Field

STARTING WITH THE LOWEST

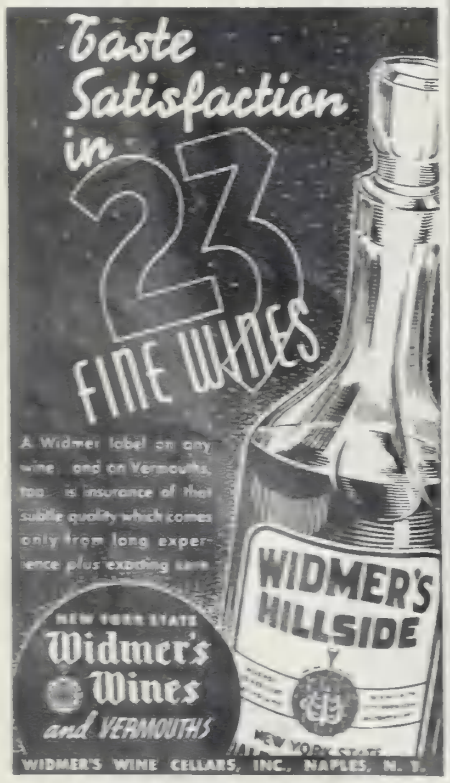
Hudson Sixes and Eights include the richly luxurious new Commodore models, finest cars ever to wear the Hudson nameplate . . . the brilliant new Super-Six . . . and the new Hudson Six in the lowest price field.

r ba ed by 31 years of engineering leadership is bound to be different and better in y w s. Ask a Hudson salesman about it. Come for a look — go for a ride today!



I TOOK THE CURE FOR CAR CHASING — and I thank the Mistress that I'm alive today. She brought home a new Sergeant's DOG BOOK that tells why I chased cars and how to stop me.

THE DOG BOOK'S SYSTEM WORKED! And that's not all. It told the Mistress about Sergeant's VITAMIN CAPSULES, and what they'd do for me. I'm in top condition now, thanks to them!



BETTER GET THE DOG BOOK for your pup's sake. It tells all about worms, fleas and illnesses — and how to treat them. Good advice on training and feeding too. At any drug or pet store.

Could Henry VIII Have Had Stomach Acid Pains?

History tells how Henry VIII would gorge himself with food and suffer afterwards. Don't ignore your sufferings. Try a 25c box of Udga for relief of stomach acid pains, indigestion, gas pains, heartburn, burning sensation, bloat and other conditions caused by excess acid. Udga Tablets must help you or your money will be promptly refunded. At drug stores everywhere.

motor haulers is Lieut. Col. William J. Heale. It's his job to get the convoy moving, and keep it moving. Getting a convoy across country is no easy-chair exercise, either. If *you* want to drive 2,500 miles, you just hop in and go. There'll always be gas stations, flat fixers, roadside restaurants, repair shops and rooms with bath. Rolling 500 men in five-score trucks and cars as a self-contained unit is something else again. The 260th has done more of it than any other outfit in the Army in recent years and has developed a technique that has won it the name of the Rambling Regiment. Colonel Burns, who hails from Greenport, Long Island, and is a patent attorney in private life, wishes he could get a patent on convoy-moving methods.

It's the colonel's boast that his outfit never has an accident. If a bridge breaks down and mover and gun land topside down in a river—that's no accident. That's a mechanical maneuver. It does the colonel's heart good to see it—the equipment is so tough you can't wreck it, and getting it rolling again is good practice for the men. You might have something like that happen in a battle sometime, and knowing how to handle trouble is worth while. If no trouble develops normally, the colonel grows impatient and manufactures a little to keep his hand in.

Down in De Funiak Springs, Florida, Colonel Burns took Colonel Mann, Captain Carl Santilli of Battery D and your correspondent out on reconnaissance in The Jeep. Outside town, he found a nice loose, sandy patch, all hillocks and gullies. There was one very nice gully, six feet deep, ten wide, with steep sandy banks; down at the bottom was a muddy stream.

"Captain," said the colonel. "I want a gun taken around here and over the creek. We'll tell the townspeople and let them watch."

"It'll get mired and stuck, maybe," said Captain Santilli hopefully.

"With a little care," said the colonel, "we might even get the gun to tip over, with Jim Marshall aboard getting impressions."

"With a little care," said your reporter, "the correspondent will be some distance away, getting impressions through a field glass."

"You'll come with me in The Jeep," said Colonel Mann. "It is more than likely three or four trucks and half a dozen guns will all be stuck together and we'll have to have The Jeep haul them out. . . . You boys could do that easily enough, I suppose?" he asked Privates Petty and Gallagher.

"Yes, sir," said the pair in unison, without batting an eye.

And No Cussing!

It turned out, however, that the movers, after bogging the gun down to its hubs at a crazy angle in the creek, got it out in a few minutes. Two spare movers, side by side, wheels locked, ran out cables from their winches and hitched onto the mover attached to the gun. The gun rocked and swayed through the deep mud and up the sandy bank without a hitch, with all the kids cheering and the grownups saying, boy, that's something!

There wasn't even any good old Army cussing about it . . . not that Chaplain A. A. McCallum, who was looking on, would have minded. Handsome, gray-haired "Father Mac" had been chaplain of the old 149th Artillery with the Rainbows in the last show and his faded A.E.F. ribbon bore five gold stars. He had given up the rectorship of fashionable St. Paul's Episcopal Church in Washington to spread his old bedroll with the outfit—and he was more like a friend than a chaplain. He drove

It's 5 A. M. and the boys are loading into the trucks [illegible] the highway toward a waiting breakfast of ham and [illegible]

ahead in his own car most of the time, arranging shower baths, church suppers, ball games and services—doing all he could to smooth things out for his boys when they rolled, tired and hungry, into the twilight.

In De Funiak Springs the Rev. Walter K. Venters of the First Methodist Church opened up his church for the outfit and here "Father Mac," a high churchman, held services for Jews, Catholics, Baptists and Presbyterians—although there were special services for Jews and Catholics if they wanted to go—and no one had to attend church if he didn't want to.

Nearly every man in the 260th had given up something to join the regiment—a home or a job or a car or a girl. Every soldier had his girl's picture with him—and hoped she'd wait.

"Wait for you!" laughed the pessimists. "Boy, when you get back they'll be shoving you around in a wheel chair and your whiskers'll be down to your knees." . . . It sounded like 1918 all over again.

This appalling prophecy, however, didn't discourage Regimental Sergeant Major John Harvey or his assistant, Private Sam Edmondson. No sooner was their tent up than they brought out for comparison large pictures of Muriel and Frances, two pretty girls.

As it rolled south and westward, the outfit acquired mascots and pets—half a dozen dogs, a mole, a cat and a small pig, "promoted" somewhere in Georgia, fed lavishly on scrambled eggs and dubbed Sergeant Shoat.

Since in our country the Army takes second place to civilians and minds its manners, a convoy travels with due regard to the safety and convenience of motorists. The American Automobile Association helps with maps and routes, going ahead to test bridges and plan detours if necessary. On this trip, the Association sent along Dick Tupper and Jerry Ryan in a patrol car. Old hands at the game, and realizing that this spring and summer thousands of motorists are going to meet convoys on the road, Tupper and Ryan offer Collier's readers these tips:

"Out on the road, a convoy travels in units, and maintains gaps of about a hundred yards between vehicles. There may be several miles between each unit. Speed is about thirty [illegible]

"Any motorist is perfe[illegible] the convoy while usin[illegible] driving practice—that is [illegible] curves, blind hills and sc[illegible] ing cities, convoys close [illegible] bumper to bumper, usua[illegible] escort. They go right th[illegible] of traffic lights, not to b[illegible] expedite their movemer[illegible] interference with norma[illegible] try to break into a convc[illegible] town.

"Give Army drivers [illegible] are in front of them, by [illegible] movers have power brak[illegible] have electric brakes, t[illegible] stop twenty-six tons wh[illegible] fast. The Army will r[illegible] rights, if you give it a ch[illegible]"

Everybody Pit[illegible]s In

Incidentally, here's [illegible] boys who roll the big v[illegible] U. S. plates. Take it fro[illegible] rence W. Linderer, in ch[illegible] advance guard, and Co[illegible] his Jeep crew who go[illegible] down the line: If you wa[illegible] to eat, watch where the [illegible] park—but don't dash [illegible] inside the restaurant f[illegible] just a pretty waitress. [illegible] ress is nothing to write [illegible] must be the food the t[illegible]

Through the little tow[illegible] the convoy goes rolli[illegible] in the dim, gray dawns, [illegible] the stars come out—tw[illegible] hundred fifty miles a da[illegible] Quitman and De Funia[illegible] and Baton Rouge and L[illegible] so over the mountains [illegible] plains of Texas—Beau[illegible] Antonio, Del Rio and M[illegible] into the great camp at [illegible]

Everywhere the folk[illegible] wave flags and cheer [illegible] boys in olive drab wh[illegible] guns and man the sear[illegible] folks like everybody el[illegible] the best way they know [illegible] arrogance and as little f[illegible] sible. All along the wa[illegible] women and kids, the c[illegible] merce and the Afternoo[illegible] ciety all turn out and b[illegible]

Everybody's Army.

THE MESSAGE THAT MADE A FATHER CURIOUS
—and the Questions he asked his Wife

...s thoughtful father and millions like ...e health and welfare, present and future, ...fa...ly are of vital concern. He read the above ...ti...ent with deep interest. And then—

...SKE... Mother, do *you* know what Dextrose is?

...HER:... ertainly! It's food-energy sugar. When ... of ... children was born the doctor prescribed ...tro...n their milk formulas.

...ER:... And where does Dextrose come from?

...HER... t's found in many fruits and vegetables. ...wy... es even get Dextrose from flowers.

...HER:... it's such a valuable sugar, why don't ... ser... us foods containing Dextrose?

...THER... do! The corn syrup we had on pancakes ... mo... ing is rich in Dextrose—so is the dessert ... had ... night.

...HER:... ny other foods?

...THER... Oh, lots of 'em—candy bars the children ... . The ... anned fruit juices we drink every morning, our ice cream, canned fruits, ginger ale, soft drinks—and even our bread.

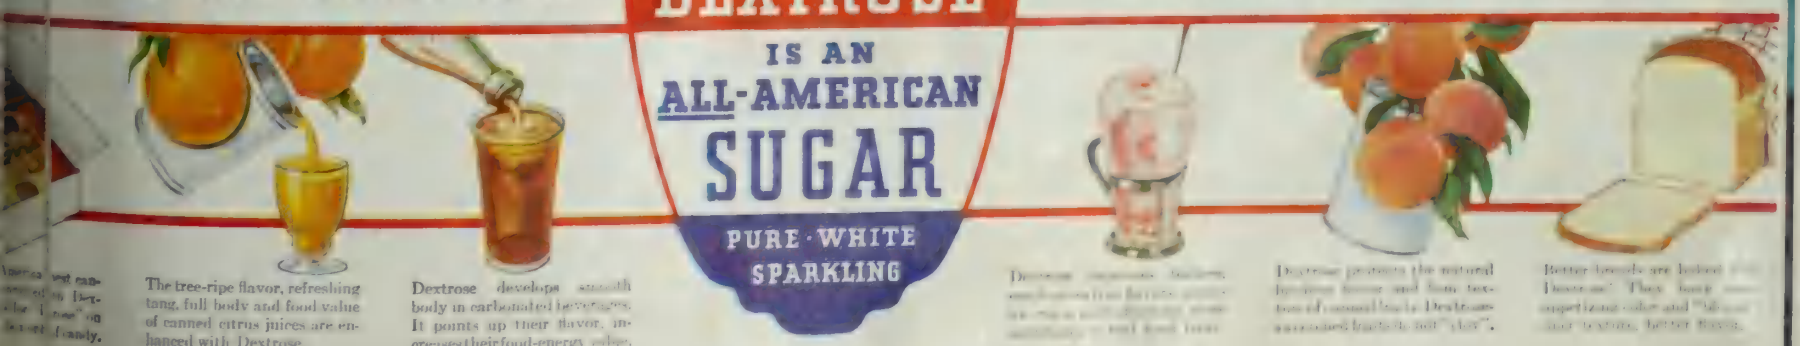
FATHER: But Mother, how do you know these foods have Dextrose in them?

MOTHER: I look for "Dextrose" on the labels . . . because I *know* that foods prepared with this natural sugar are not only high in food value, but they usually have better flavor!

FATHER: Well! You *do* know the facts about Dextrose.

☆ ☆ ☆

DEXTROSE is a pure white sparkling sugar. But it's more than "just a sugar"—it's the sugar for which there is no substitute . . . the sugar your body uses *directly* for energy. In fact, all other sugars must be changed into Dextrose before they can be used by the body for activity.



That's why Dextrose is recognized as the primary "fuel" of the body. Babies begin life on Dextrose. Doctors prescribe it for young and old, in health, in sickness, even for life emergencies! It is the preferred sugar of athletes. In short, Dextrose is the *one* sugar that supports life most efficiently.

Many products labeled "*Enriched with Dextrose*" are made by America's most progressive food companies. They recognize that thinking women today select foods for their health benefits as well as for enjoyment. Next time *you* market, look for "Dextrose" among the ingredients listed on food and beverage labels. It's your assurance of high quality and higher food value!

America can supply every pound of Dextrose Sugar needed for American consumption. Dextrose is wholly, completely American. It is derived chiefly from America's greatest grain—golden Corn. It is refined in American factories by American workers and distributed by American companies.

CORN PRODUCTS REFINING COMPANY
One of the producers of pure Dextrose

IT'S "ENRICHED WITH DEXTROSE" — **DEXTROSE IS AN ALL-AMERICAN SUGAR** — PURE · WHITE · SPARKLING — **IT'S A SOURCE OF FOOD-ENERGY**

...andy.

The tree-ripe flavor, refreshing tang, full body and food value of canned citrus juices are enhanced with Dextrose.

Dextrose develops smooth body in carbonated beverages. It points up their flavor, increases their food-energy value.

Dextrose preserves the natural luscious flavor and fine texture of canned fruits. Dextrose sweetened fruits do not "glaze".

Better breads are baked with Dextrose. They have appetizing color and delicious flavor, better flavor.

The Diner—The hours one spends on the new streamliners pass as quickly as the miles. For radio, scenery and interesting travel companions provide diversions while the food has earned these Rockets an enviable reputation.

The Chair Car offers unusually wide shatter-proof windows, improved air-conditioning, insulated silence, scientific lighting, chairs with contours that invite you to relax, soft of upholstery and adjustable to your complete comfort.

Here's one of Rock Island's New Stre

CHOCTAW ROCK

BUILT BY PULLMAN-STAND

THE WORLD'S LARGEST BUILDERS OF RAILROAD AND TRANS

WITH the commissioning of the *Choctaw Rocket* by the Rock Island Lines—an ultra-modern train offering complete travel service—the most encouraging fact in the progress toward making streamlining everywhere available has been reaffirmed. It is, to paraphrase a familiar saw, that one good train deserves another!

For ever since the historic occasion on which Pullman-Standard introduced streamlining to America and established the standards of strength, safety and comfort by which all construction of this type is measured, every subsequent train has, through its popularity, exceeded rather than satisfied the ever-growing demand for this modern transportation.

Fundamentally, that is why The Rock Island has been able to expand its fleet to include this new streamliner, and also why its construction was entrusted to Pullman-Standard. Because of the overwhelming preference which you, the traveling public, have displayed for these new trains, the railroads have purchased over 70%* of their new lightweight equipment from Pullman-Standard.

**From the advertisement was written*

In addition to railroad passenger cars, Pullman-Standard designs and manufactures freight, subway, elevated and street cars, machine tools, air-conditioning systems, chilled iron car wheels and a complete line of car repair parts.

This alone cost $8,400,- r thousand soldiers and 2,000 re garrisoned at this strategic nearest to the friendly Do- epublic across the Mona Pas- Puerto Rico. The troops are there presumably to be used soldiers against a surprise empt to land on neighboring e air strength stationed there ment comprises one pursuit two bomber groups, or about in all.

y air bases are being built, ana Diaz in the south central island near Ponce; at Arecibo th coast midway between San Borinquen; at Mayaguez, on ast and on near-by St. Croix, gin Islands. The largest of s will be at Juana Diaz, where ursuit Group, with 25 ships, uary 1st. Juana Diaz's total ill be 85 planes with the ar- e 48th Air Base Group which tationed there, with a total of 200 officers and 1,800 en-

h Air Base Group from Kelly Field, Texas, and the 25th Bombardment Group from Langley Field, Virginia, were transferred to Puerto Rico.

That's the plus side of the Puerto Rican defense ledger and those figures, and the fact that everything is "ahead of schedule," is what the Brass Hats like to tell you about. They admit that because there's been so much haste there has been "some waste."

Take the matter of the dry dock. It's finished, all right. But in their hurry the boys forgot to dig a channel through the harbor which would permit cruisers or other warships drawing up to 27 feet to maneuver into the dock. It will be months before the channel will be finished. Army and Navy critics who question the advisability of so much haste are acid about the waste.

Impressive but Obsolete

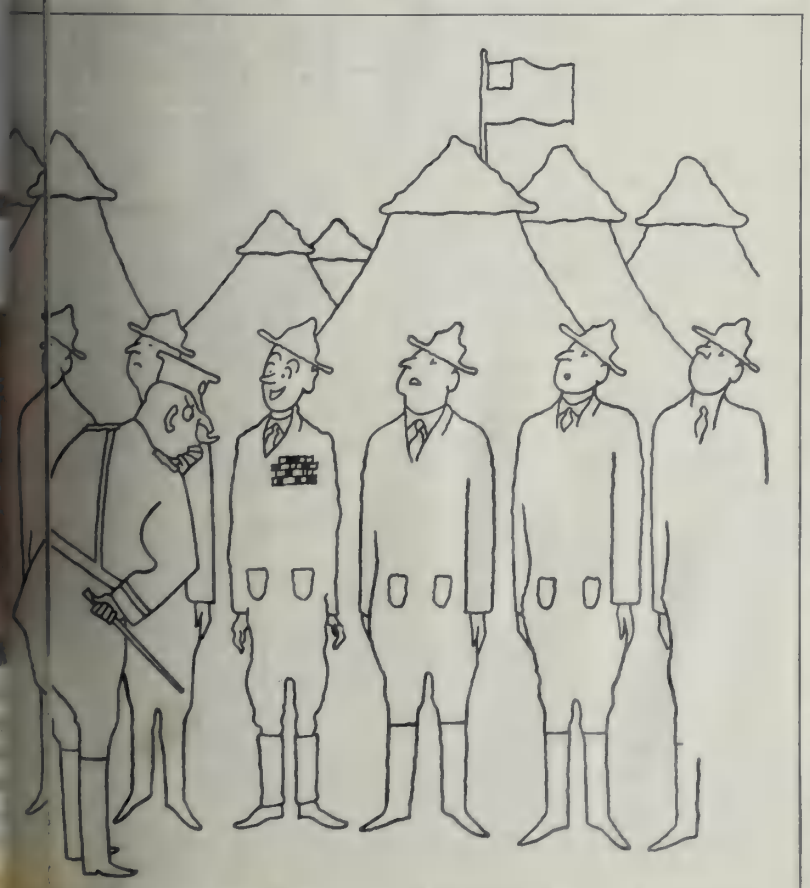
They raise another important point. They say that while Puerto Rico's defenses are impressive—fifty million dollars' worth of anything is impressive—they are already obsolete. They would be fine in a 1914-1918 kind of war, worthless now when bombers like our own Consolidated PB-2-Y can fly 5,000 miles without stopping for gas or oil with a belly full of bombs. That range, it is reasonable to suppose, can be duplicated in bombers manufactured by our potential enemy in the Eastern Hemisphere. In that event, Puerto Rico would be like shooting at sitting ducks, and wooden ducks at that.

These critics, and our Navy and Army are filled with them—men who seem to have ideas but somehow are never heard by the policy makers in Washington, declare that we seem to have learned nothing from the current war. One of the major lessons of this war has been that the biggest bomb yet built, the one-ton demolition or high explosive projectile can't pierce a thousand feet of solid rock.

Germany before the war began and Britain after it started applied this elementary lesson of air war. The Germans built hangars in hillsides and mountainsides that gave them the double advantage of invulnerability and invisibility. Britain, on the island of Malta, in the Mediterranean, and on Gibraltar, also applied this principle. On Malta and Cyprus, the British tunneled into rock—the Mediterranean islands, like the Indies, are but projecting tops of submerged mountains—to make shelters for landplanes and seaplanes. Caves the seas had eroded were enlarged as lairs for submarines and destroyers. Caverns of the inland mountain were converted into hotels to house civilians. This is why Malta, Britain's fortress in the Central Mediterranean, has been able to survive the pounding of Italian planes for months.

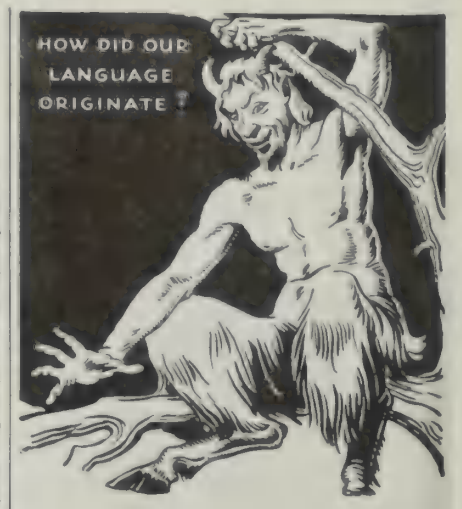
Our defenses on Puerto Rico, our Malta of the Caribbean, stands on stilts on the muck of Isla Grande, the marshes of the interior. Gasoline storage tanks, water towers, the 600,000-gallon-a-day water plant to be used for emergencies, warehouses — everything — are limned beautifully against the tropical sky, spang where field glasses or enemy bombsights can find them.

There are nearly two million people on Puerto Rico, one of the world's most overcrowded land areas, with some 530 men, women and children per square mile, but there isn't an air-raid shelter on the whole island, building or planned. The construction of defenses implies the possibility that Puerto Rico would be attacked in wartime. Puerto Ricans say it is reasonable to expect that protection be provided for the civilians. The lack of any sign that air-raid protection for civilians is in prospect hasn't helped to bridge the gulf of antagonism between the Spanish-speaking public and the gringo-continentals.



The official defense of the way things are being done on Puerto Rico is that up to the present the potential enemies in Europe haven't any bombers capable of flying to the Americas with effective bomb loads, discharging their bombs and returning to bases in Europe or Africa. This, the critics reply, doesn't stand up as an argument for not employing the elementary lesson Malta taught us: to keep defenses and stores underground. There is such a bomber. Fortunately, we have it, but what's to prevent possible enemies from building one like it or better?

No Help from the Mainland



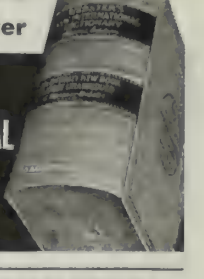
The defenders also say that Puerto Rico is one of many bases and that it is within range of support by air and sea from the bases at Guantanamo, Nassau, and the tip of Florida. Miami, they say, is only six hours away by air, and it is only slightly longer to Pensacola and Orlando.

The tacticians who don't share this view point out that if the stage were reached where Puerto Rico needed assistance from the mainland, it would already have been eliminated as a defense factor.

Puerto Rico, according to those who maintain that all's just perfectly wonderful on the island Ponce de Leon discovered before he went bushwhacking in Florida for the Fountain of Youth, can only be attacked by enemy aircraft flown to the island from carriers. Such planes, they say, could only carry 100-pound and 200-pound bombs. These bombs couldn't do effective work. Correspondents, military observers and others who've seen what these "baby

"Mother made it for me, sir, out of some old scraps" GARDNER REA

Panic



comes from a mischievous Greek god

IN Greek mythology there was no greater trouble-maker among the deities than Pan. His abrupt appearance among the timid wood nymphs inspired the greatest fright. He was regarded also as inspiring human beings with groundless terror. So the Greeks imagined that sudden, contagious fear which seemed to have no sufficient cause must have been inspired by Pan, and to denote this fear they created from the name of this dreaded god the word *panikon*. English has taken it over as *panic*, and we apply the word to any mob fear arising from real or imagined causes.

This is one of the thousands of interesting word origins given in the unabridged Merriam-Webster, WEBSTER'S NEW INTERNATIONAL DICTIONARY, Second Edition. This great reference book provides a wealth of general information. It contains 600,000 entries—122,000 *more entries* than any other dictionary. 12,000 terms illustrated; 3,350 pages. *WARNING:* The only genuine Webster is the MERRIAM-Webster. Look for the Merriam-Webster name and circular trade-mark on the cover. Ask your bookdealer to show it to you. Write for free illustrated booklet of interesting word origins to G. & C. Merriam Co., 606 Federal Street, Springfield, Mass.

"Tortured" by painful
COLD WEATHER JOINTS?

Get this Amazing Quick Relief

If cold spells make your joints stiffen and ache, if you feel you just can't endure the pain of cold-weather joints, *cheer up!* Here's new hope for you!

Normally, your joints are fed lubricating fluids by tiny blood vessels. Extreme cold weather, however, makes these blood vessels constrict. The supply of these fluids falls off and your joints stiffen — seem to "grind" every time you move. It's plain agony!

Here's what you should do! Rub aching joints with Absorbine Jr. It speeds the flow of blood . . . steps up the supply of lubricating fluids. Soon pains and stiffness drift away—your joints glow with relief. Keep Absorbine Jr. handy! At all druggists. $1.25 a bottle. FREE SAMPLE — write W. F. Young, Inc., 201C Lyman Street, Springfield, Mass.

FAMOUS also for relieving Athlete's Foot, Sore Muscles, Strains, Bruises

bombs" can do, don't agree with Puerto Rico's defenders.

Puerto Rico's strength in the defense chain will always be proportionate to its ability to withstand a siege. No matter how modern, powerful and numerous may be its fortifications, naval and air and land forces, Puerto Rico must be able to withstand a terrific pounding and a blockade in the event of an all-out war.

The food that feeds Puerto Rico comes largely from the mainland. One authority estimated that one pound of food is imported each day for each islander, which would mean nearly 2,000,000 pounds, or one hundred thousand tons. This is one reason why San Juan has always been one of the world's busiest ports.

Agriculture still devotes itself almost exclusively to the cultivation of money crops like sugar. Only recently were islanders encouraged to plant vegetables. Rice is a staple of native diet. But no rice is grown on Puerto Rico. From the standpoint of victualing the island under siege conditions, its ability to withstand a blockade has been dropping steadily in proportion to the increases in the personnel of the military services.

So far the only step taken toward making the island self-sufficient in wartime has been the construction of the water-supply plant. And 600,000 gallons a day wouldn't go very far if the unstable waterworks of the island, of which there are seven, but not one that produces water that comes up to mainland standards, were put out of commission.

The best estimate as to how long the island could last if besieged—an eventuality fully as probable as our being attacked by an enemy from the Eastern Hemisphere—was three weeks to one month.

If Puerto Rico weren't the largest of the islands of the Lower Antilles, the slender chain that dangles from the southeastern tip of old Hispaniola in a southeasterly curve toward South America, and if it weren't the easternmost island of the vital Caribbean and therefore the nearest to Europe and Africa, shortsightedness wouldn't matter so much.

But geography settled the island's fate long before Puerto Rico, back in the days of Roosevelt the First, was a gleam in Uncle Sam's imperial eye. Tactically, Puerto Rico is to the U. S. A. and to the Caribbean what Malta is to Britain and the Mediterranean.

And the similarity between the sea the Latins used to call Mare Nostrum and the Caribbean doesn't end with Puerto Rico's resemblance to Malta. The Caribbean means every imperial iota as much to us as the Mediterranean means to Britain.

America's Life Line

The Caribbean, the reference books say, is an area of the Atlantic Ocean, bounded on the east and north by the islands of the West Indies, on the west by Mexico and on the south by the continental gooseneck of Central America. Because the Indies are the exposed peaks of sunken mountains and because the water between most of these islands is treacherously shallow, the Caribbean is practically a landlocked sea. The story of all landlocked seas, the Mediterranean, the China Sea, the Adriatic—is the story of international struggle for domination of those seas. Their control means safety for the merchant ships and the warships of the power dominant in the area.

The United States is the Britain of the Western Hemisphere. We own possessions in the Caribbean, control others politically and economically and, since the Roosevelt destroyers-for-bases deal, we have definite military interests and commitments in that Mediterranean of the New World.

Like Britain, we also operate a canal. Britain controls Suez, we the Panama Canal. Britain's life line of trade and imperial and therefore national security winds through the Mediterranean; ours whips from the Atlantic to the Pacific through the Caribbean.

If Britain were frozen out of the Mediterranean, a ship sailing from London to Bombay via the Cape of Good Hope would have to travel 10,721 nautical miles. Via the Mediterranean and Suez the same steamer's route would be only 6,260 nautical miles, 4,461 miles less.

Here's what would happen if American ships were obliged to go from the Atlantic to the Pacific around the southernmost end of South America instead of through the Caribbean and the Panama Canal:

New York to San Francisco via the Panama Canal 5,289 nautical miles.

New York to San Francisco via Cape Horn 13,107 nautical miles.

Our Cape route would be 7,818 miles longer than our Canal route, while Britain's Cape route would be but 4,461 miles longer. While in England there were politicians who in 1935 were for abandoning Gibraltar, as did Sir Samuel Hoare, who wanted to appease Italy, you couldn't find a single American who would be for abandoning the Panama Canal rather than defend the Caribbean.

History Repeats in the Caribbean

Puerto Rico has always been strategically important. It was so centuries ago, when Spain ruled and exploited the New World. It was through the Mona Passage, deepest water yet sounded in all the Atlantic, that the galleons of Spain passed on their way to Mexico and Aztec gold. Puerto Rico became the main Spanish base for refitting ships. Lying farther east, nearer Europe than any other Spanish possession, Puerto Rico intercepted attacking fleets of enemy ships. It was Spain's interceptor of attacks and of news. The island got word of impending attack long before such news reached the mainland or points closer to the mainland.

There wasn't a Panama Canal in those days, but there was the same narrow Isthmus of Panama. This was an overland portage for the fabulous cargoes the Spaniards plundered up and down the west coast of South America. The English and French enemies of Spain, the fleets of Drake and De Grasse, stabbed constantly at the Spanish positions in the Caribbean and their objective was that isthmus across which the wealth of western South America was transported overland and then by sea en route to Spain.

The island again is an interceptor. Our warships and airplanes based there are to intercept the possible enemy attack from the east. They are to close, too, that ancient Mona Passage, one of the three main natural entrances to the Caribbean navigable to large ships without risk of disaster on the razor reefs that make the waters of the Indies some of the most treacherous in the world.

To hold the Caribbean against attack by sea we must hold the Windward Passage between Cuba and Haiti, the narrow channel between Trinidad and the South American mainland—and the Mona Passage. And there Puerto Rico stands guard, a sentinel of the Caribbean and the Caribbean is to us something more than an "area of the Atlantic." It's Mare Nostrum to us, our sea of destiny. That's why some people believe we ought to be a whit smarter about the quality and disposition, rather than merely the quantity, of our defenses on Puerto Rico.

y in for their money-making l lik conscientious fighters. In the ays e pro had to be the best r a nd the club. He had to stay nig with the quartet and get up e a wn-patrol lesson to the club . M t of the seventy-five or so pro ow on the winter circuit are M. oys. They watch their diets the ssionate devotion of movie T y'll play through a cloud- try g to win a purse, but would into lion's cage to get out of the whe not playing. Some of them ot ake hands when introduced, ar ey might deliver their paws one ushing admirers. Horton h w t carry a valise for fear of ing e delicate machinery of his es. T y dispense their nickels cau- ly, t pamper their all-important to th extent of buying fifty-dollar mac shoes.

ck success will screw some of ner s to such a pitch that they not able to eat solid food for at stretch. Such tension, of se. i ot lessened by the fact that is t only game where the com- por a part of the crowd, and, therefore, subject to claps on the back, chattering cameras, autograph idiots and the loud member who wants to introduce his dear cockeyed little boy just after Joe Pro has three-putted himself out of a contract with an equipment house, or hooked what amounts to Mamma's lynx coat into the woods.

The wives, that gaily dressed and omnipresent chorus of the winter circuit, sit helplessly on the porches of the clubhouses, fashioning their tight little cliques, trying to keep their curious world bright with chatter and gossip. Now and then one of the newer wives, or one of the old and indomitable ones, will slip on low-heeled shoes and go out on the course to follow their quietly anguished mates. The other girls call these dauntless women the "Thirty-Six Holers." And make bets among themselves as to how long it will be before the pro with the new bride turns on her savagely (after she makes the invariable mistake of sympathizing with him for missing the chip which would have permitted him to tie for first) and bitterly orders her to get back there to the porch.

When that comes there will be tears, and advice from the wiser wives, and there will be a new face on the porch, and a new sweater being knitted for hubby or the R.A.F. One of the wifely cliques will have a new member and the new wife will learn many things, including the need of keeping her husband away from his old buddy, the gay-bachelor pro who seems to be training on blondes.

They are wonderful, these golf wives. Prettier even than the baseball wives, but unhappier. For in golf you eat chicken one day, feathers the next. None of the current bevy of girls, except Mrs. Horton Smith, could break 150. But they know an incredible lot about the game and it is always popping into their conversation, though they try hard to keep from talking about the sport.

The reporters find the girls a lot jollier and more informative than their harassed husbands. However, reporters who know them have a dread of bearing to them information as to how their mates are progressing in a tournament. A tidings-bearer just can't win around the golf wives.

This has happened: A golf writer strolls past the porch. There is an immediate lull in the pleasant chatter. The writer knows that Byron Nelson has shot an abysmal 41 for the first nine, but he doesn't say anything until good-looking Mrs. Nelson lifts off her Hollywood sunglasses and sweetly says, "Don't tell me, but how's By doing?" The writer swallows and then lies, "Gee, I'm sorry, but I've been following Hogan." Such an admission means, unless he is a cur, that he will impart to

BROCKETT JOHNSON

TRUCKS are profitable business tools only when they're moving. They are "white elephants" when they stand idle while being loaded or unloaded. That's why so many business men in so many lines of business have adopted the Truck-Trailer "shuttle" method of hauling. You leave *only the Trailers* to be loaded or unloaded and use your truck for the full-time job of pulling first one and then another of the Trailers to be moved.

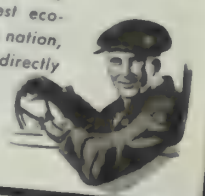
HERE'S HOW YOU SAVE

You need buy only one truck and the Fruehauf Trailers. The truck can be a small instead of a large one since its job is simply to *pull* the Trailers instead of *carry* the loads. As you know, a truck can pull three times as much as it can carry. Your investment will be far lower for the one truck and the Trailers than it would be for several larger load-carrying trucks.

BIG SAVINGS HERE

Gas and upkeep for the small truck will cost much less—you'll save 30% or more, depending upon your operation. That's an important saving on top of your saving on initial and replacement cost.

WRITE FOR THE FACTS



Like so many others, you may find a "shuttle" operation ideal for your needs. In any event, you should save considerable through the Truck-Trailer method of hauling. Send today for the booklet "Executive Thinking." It tells the whole story.

the quietly eager Mrs. Hogan some crumb of information about Ben's progress.

"Ben's out in 33," the reporter is obliged to report. And then, to his dismay, he sees that not a knitting needle is twitching. To the porch comes a tense, expectant silence. The reporter thinks wildly of flight, but knows he is in no condition to run. So, willy-nilly, he stands there and tells them the scores he knows.

If the boob reporter brings news that Joe Pro and Mike Mashie are coming down the homestretch, neck and neck, with a small pot of gold and fame awaiting the winner, and a smaller pot of silver and oblivion awaiting the runner-up, a subtle change comes over Mesdames Pro and Mashie. Bosom pals that they have been through weeks of their husbands' joint adversity, the two girls now separate. Mrs. Pro will excuse herself, to powder her nose, and when she comes back she'll take her preoccupied stand under another umbrella, or with another clique, much to her relief and the relief of Madame Mashie. There they'll sit until it comes time to join the pushing, shoving mob around the 18th green, biting their lips while watching the ending—getting ready for the kissing picture, or the long, silent, plaintively reflective ride to the next tournament.

By the following Saturday the girls are bosom pals again. Henry Picard—humph!—has beaten the stuffings out of both Joe and Mike.

You Can't Win It All

The nineteen winter-circuit tournaments, beginning in mid-December with the $10,000 Miami Open at the Miami Springs course, and ending the first week in April with the $5,000 Masters tournament, at Bobby Jones' Augusta National course, do indeed total $100,000 in purses. But it takes phenomenal good luck and supernatural playing to win even a small percentage of all that money. First prize in the $10,000 Miami Open is $2,000. In other tournaments the percentage is even smaller, a sample of which would be the $1,000 first prize in the $15,000 P.G.A. championship.

Demaret made winter-circuit history last year by winning six of the nine tournaments in which he competed. His purse income for the entire year was $8,400, which placed him near the top of the money earners. But pro golfers are the real amateurs of sport. They pay their way, and their way, particularly on the long jumps involved in the winter tour, is expensive. It probably cost Demaret and his wife $7,500 to win that $8,400. It therefore follows that less successful pros must be extremely parsimonious in order to keep going on the circuit, and that the hapless blokes who shoot only par—an archaic type of golf—wind up in the financial doghouse. The average tournament last winter was won with a ten-under-par score. Ben Hogan was thirty-four under par for the North-South Open at Pinehurst, the Greater Greensboro (North Carolina) Open and the Land of the Sky Open at Asheville.

Wiffy Cox, a master iron-shot player, once embarked on the winter tour with $3,000 and, though he played excellent golf, won so little that he wound up in April with $50. Hogan and his wife found themselves in Oakland in 1938, far from their Texas home, with $80 between them and a unique pauper's status. That afternoon Ben shot a do-or-die 68 to win $300 as an also-ran in the Oakland Open, while Madame H. was rolling her kerchief into tight little knots on the porch. Ben has been in the money in all but two tournaments since then. Ironically, he was paid $500 for endorsing a headache remedy after winning the North-South that he doesn't have any aches.

When Sarazen first tried early predecessor of today winter circuit he got a rate American Plan resort hote tournament was being held, time would duck down the at a lunch wagon. He f horror, later, what Ame meant.

Sam Snead first hit the in a battered jaloppy fit age a grape-hungry Okie. that serpentine stretch of follows the sun from Flor fornia, has seen hitchhiking There may be a broken he hamburger joint along the some strike it rich. And th never forget that fact, wh gets tough and the estab with mamma prodding th from the porch, begin thro and eagles at the upstarts. appalling. Last year Jug M the $10,000 Miami locked shot a 65 on his last round 72 course. Only a 64 cou So Snead shot a 64.

The winter circuit create ers and heightens interest The papers give the winn space, for there is little el sport. Scores plummet and to shreds by men and b driven along by gastric, d business emergencies, or in will to break into the select ton Smith was the first a from the loins of the circ peared from nowhere, or, r Missouri, in 1930 and mad the tour. Sun y real-estate league. In
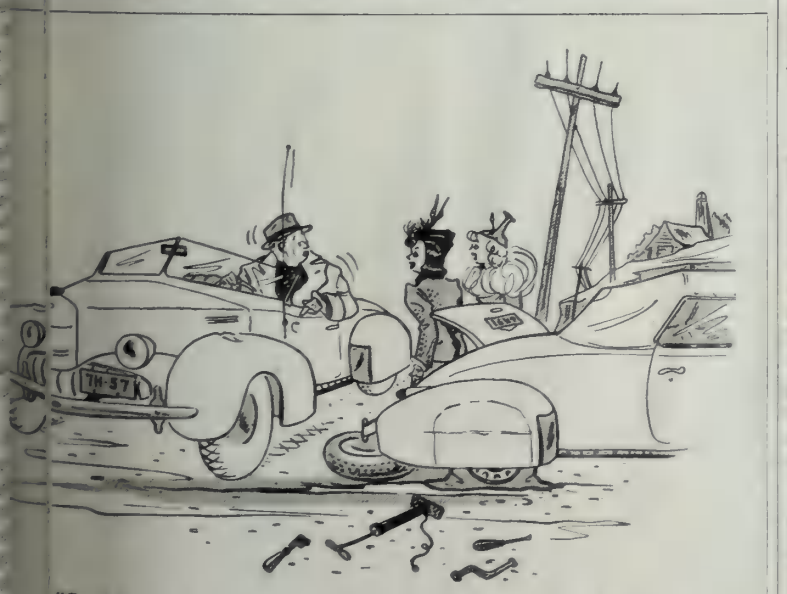
age played Bobby Jones, then
ded th a Sarasota real-estate firm, for the so-called world's championship, played, by coincidence, at Sarasota. The 72-hole match between the best pro and the best amateur did much to make winter golf. Hagen won by the runaway score of 11 and 10, and took the entire gate—$6,800. It is the most money ever earned by a golfer from such a challenge match.

That same winter of 1926 the Los Angeles Chamber of Commerce, alarmed over the number of golf stories coming out of Florida, established its famed $10,000 Open. Jim Coffroth and other promoters at Agua Caliente staged a $25,000 Open with a $10,000 first prize, won by Gene Sarazen. Florida answered with the $15,000 La Gorce. Texas, civically aroused, increased the value of a couple of its theretofore nondescript winter tournaments. And the winter circuit was born, parented by real-estate men and chambers of commerce.

Now, bolstered, enlarged and policed by the vast P.G.A., the winter circuit has become a permanent, colorful and highly respected feature of the American sports picture. It retains part of its old real-estate and C. of C. flavor, but by and large, the play is the thing. The money, none of which is put up by the P.G.A., now occasionally finds its way into the pockets of obscure, battling pros who—in the lush days of the boom—would have starved before they could have broken into the elite circle.



Manufacturers of golf equipment travel alertly along this glory road, urging on their subsidized players, and keeping an eye peeled for some dormant star to add to their list of "advisers" for a minimum retainer of $1,500 a year. The competition gets severer each winter, but each year more young pros set out along Route 90. And the older ones, sensing the bright stare of mamma on the backs of their necks, bear down a little harder.

So the quietly frantic, seesawing enterprise unwinds. Last year at Asheville, the convivial Demaret found himself woefully alone at the bar at the conclusion of the tournament. He had won five winter-circuit events before that, but at Asheville the strain had told on him at last and he had gone so bad that he had dropped out. The bar was ablaze with the spurts of flashlight bulbs. Ben Hogan, the winner, had come in, and not even the free loaders would come near Demaret.

"Can I buy anybody a drink?" Jimmy called out to the room.

No answer.

Demaret tried a few more times, then bought one for the bartender. And the next week he was nearly mobbed after winning the Masters at Augusta by four shots. That's the winter circuit.

"Could we borrow your jack—er, ah, and you, too?"

GERALD GREEN

Can Professional People REDUCE TIREDNESS This Way?

A plan to reduce fatigue got the interest of 69 physicians, nurses, lawyers and actresses. They were among hundreds of men and women who volunteered to drink Knox for 28 days to see if it could fight tiredness!*

When the results were scored, 7 out of 10 professional workers who started the Knox test, and 9 out of 10 who completed it said that tiredness had been undoubtedly reduced for them!

128 men on steel work, truck driving...other hard manual jobs...took the Knox test. Here are the results. 8 out of 10 men who started, and 9 out of 10 who completed the test declared Knox definitely increased their endurance.

This could happen to you! When 26 occupational groups tested Knox, 2 out of 3 people who started, and 9 out of 10 who completed the test reported that tiredness was definitely reduced for them. The majority of people reporting Knox effective at fighting fatigue in these tests got results in two weeks' time. (Here's indication that you have a chance to be less tired by drinking Knox regularly.) The Build-Up is easy to follow. Stick to it for at least two weeks, faithfully. Remember, others have fought fatigue this new way!

Tests made and certified by a qualified research organization.

TRY THIS YOURSELF...for 2 weeks

1. Drink 4 envelopes of Knox Gelatine *every day* for 2 weeks. Then drop to 2 a day. After 28 days, drink as needed.

2. To prepare, pour 1 envelope (¼ pkg.) Knox Gelatine into ¾ glass water or fruit juice, not iced. Let liquid absorb gelatine. Stir. Drink immediately. If it thickens, stir again. The gelatine is tasteless.

BUT BE SURE it's plain, unflavored Knox. Knox is *all* body-building protein. Ready-flavored gelatine dessert powders are ⅞ sugar, ⅛ protein. Buy from your grocer in 4-envelope or economical 32-envelope package.

SEND FOR FREE KNOX BULLETIN

telling how *you* may try reducing tiredness. Write Knox Gelatine, Dept. 70, Johnstown, N. Y.

Jobs After the War

PRESIDENT KARL T. COMPTON of M.I.T. wants to know how about jobs after our defense program is pretty well completed, or after the war, if we get into the war. The defense boom is artificial, and won't produce goods which will produce other goods, or create new wealth, or stimulate new demands.

Dr. Compton answers his own question by suggesting that American industry, beginning now, set aside 2% of gross sales income per year for research aimed at originating "new products and processes which will keep our assembly lines busy after this emergency."

If American industry as a whole would thus assess itself for research, Dr. Compton claims, it could mobilize $1,000,000,000 a year and 250,000 research scientists for development of new goods, services, industries. He adds that despite the big talk about research in this country, the sum total of this work only scratches the surface.

We'd better listen to Dr. Compton and similar advice—and begin acting on it before the boom begins tapering off.

Roll Out Some Medals

MEDALS, ribands, plaques or some such ought to be hung on the following labor organizations, all affiliates of the A.F.L.'s metal-trades department:

International Brotherhood of Blacksmiths; Drop-Forgers and Helpers; International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America; International Federation of Technical Engineers; Architects and Draftsmen's Unions; International Brotherhood of Electrical Workers; International Union of Operating Engineers; International Hod Carriers; Building and Common Laborers Union of America; International Association of Bridge, Structural and Ornamental Iron Workers; International Association of Machinists; Metal Polishers International Union; International Molders and Foundry Workers Union of North America; Pattern Makers League of North America; United Association of Plumbers and Steamfitters; Sheet Metal Workers International Association.

The reason why such honors should be paid is that these organizations have resolved not to strike on defense jobs or otherwise stop work—provided employers agree not to pull any lockouts without sincere attempts to arbitrate.

That is patriotism.

H. R. 1776

IS IT an all-out-for-democracy bill, or is it an all-up-with-democracy bill? As far as we can make out, that is the main question troubling debaters on both sides concerning the lease-lend bill, H. R. 1776.

It seems to us that with some amendments H. R. 1776 can be made a true all-out-for-democracy bill, and can also pave the way for a triumphant strengthening of democracy in this country when and if the world climate turns favorable to democracy again.

We regret to see all this power given to any President of the United States: who doesn't? It is contrary to our peacetime tradition.

But democracy has one notorious weakness: and the dictators have played on that weakness to their great (though we devoutly hope temporary) gain in Czechoslovakia, Denmark, Norway, Holland, Belgium and France. Democracy's big weakness is its slowness of motion—because, though two heads may be better than one, 200 or 2,000 heads can't make a decision as quickly as one, either for right or wrong.

When democracy bumps into an emergency, it has to delegate large powers to one responsible head, especially when fast-moving dictatorships are at the root of the emergency. The main thing is to delegate power before it is too late, as France failed to do and as Great Britain almost failed to do.

How wisely Mr. Roosevelt will use these practically dictatorial powers when Congress grants them, we can't predict.

But this much at least is known about the inner workings of his mind: th
concerned about his eventual
history of his country and of th
ing that way, is he likely to do
things prophesied of him if th

Happily Married?
d, yes, her Husband adores Her.

he Loves her Smile . . . the Sparkling Smile
wes so much to her Lifelong Use of Ipana and Massage.

PUBLIC LIBRARY

Protect your bright smile—always! Help keep your gums firm, your teeth sparkling with the daily use of Ipana and Massage

Q. *What do many youngsters today know about proper dental care that their parents may still have to learn?*

A. They know, for they have learned it in thousands of classrooms, the great importance of *gum massage* to firm, healthy gums and bright, sparkling teeth.

Q. *Why is gum massage so important?*

A. Because today's soft, creamy foods don't give gums the exercise and stimulation they need and so gums tend to become soft, tender . . . and all too often signal their weakness with a warning tinge of "pink" on your tooth brush.

Q. *Just how serious is "pink tooth brush"?*

A. Only one person can answer that—your dentist. In your case it may be serious, and it may not be, but only he can tell you! He may, very likely, say merely that your gums need work and exercise. And, like so many dentists these days, he may suggest "the healthful stimulation of Ipana and massage"!

Q. *Should you massage your gums even if you haven't got "pink tooth brush"?*

A. Yes, decidedly yes! Every time you brush your teeth, massage a little extra Ipana onto your gums. For Ipana is specially designed not only to clean teeth thoroughly but, with massage, to aid the gums as well! Yes, you'll find this sound, sensible habit of Ipana and massage will go far to help you ward off the threat of "pink tooth brush" . . . to help you have firmer, healthier gums and brighter, more sparkling teeth!

Ipana Tooth Paste

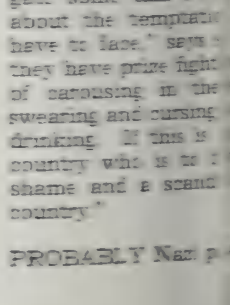
ANY WEEK



MR. GEORGE G. LAGEORGE of Los Angeles, California, wants to bet us that Congress will never vote to declare war on Germany unless we're directly attacked. But we won't bet. We have a hunch that Congress won't have anything to do with it. One of these days, dear George, Mr. Hitler will give the nod to one of his stooges—maybe Japan, maybe Italy—and an American warship is going to be bombed or torpedoed. Like the Panay, for example. About the same time we're going to discover that a small detachment of Japanese marines have landed on some northerly point in the Philippines. Our Navy and our air fleet will embark upon a punitive expedition and some men, including a few Americans, are going to be killed. Lo and behold, we shall be at war. Belatedly, perhaps—say a few weeks after—Congress may make a face-saving declaration, that being one of the few of its Constitutional rights it has managed to retain. Or maybe it will be even simpler than that. Maybe we'll just move in without preliminary incident. Or maybe we're just a mumbling fuddyduddy. Maybe we're in now and are much too dazed to know it. We think that it was Colonel Bob Berry of Mena, Arkansas, who told us about asking Henry, a colored boy, about Henry's employer. Henry's employer had been very sick. The doctors had let it be understood that they'd be very surprised if he recovered. The colonel had heard nothing for several weeks. "Henry," asked he, "is old Mr. Will dead yet?" And Henry: "Yassuh, specks he is. Anyway, old Mr. Will done died las' month."

WE'RE neither a calamity howler, a warmonger, an Anglophile nor a jingo although we're being accused of all four—and more. We're trying merely to be realistic. We're trying too to be calm and are making quite a mess of it. The signs are discouraging. From Baltimore, Maryland, Miss Lydia Collonger reports that several influential citizens have spoken publicly of how nice it would be if the Free State refrained for the duration from the singing of Maryland, My Maryland because the tune is of German composition—Tannenbaum, Oh Tannenbaum. We have not heard that the tune of America, or God Save the King, is being regarded with suspicion because of its origin but we won't be surprised. The Germans say that the air was sung by their ancestors in the sixteenth century. The French, who never seemed to care one way or another before their latest disaster, contend that it was written for King Louis XIV. But the English say it was written by one of their own, Mr. Henry Carey, about 1740. We know, of course, that Francis Scott Key's exulting verses were set to an ancient German air which was exceedingly popular in the better German beer halls long before Mr. Key was born. Let's see—there must have been some reason why we got to setting all this down. Ah, yes, it all comes of a letter we got from Mr. Oliver R. McKenstrie of Rome, Georgia. Mr. McKenstrie too is prepared not to be surprised by anything. "No," says he, "not even by the news (which I expect momentarily) that some wretched fellow has been arrested for singing that dirty rebel song, The Star Spangled Banner."

THE editors of this magazine and the scholars to whom occasionally they assign the tricky business of writing editorials are earnest folk. Repeatedly we've seen them pacing their offices with that serious preoccupied air that better minds are apt to get when brooding upon the graver aspects. But several weeks ago one of these gentlemen in a lighter moment wrote about safety pins, the general idea being that the world would be safer if safety pins were too. We remember saying that we thought that this was a hell of a time to write about safety pins. The words were scarcely out of our mouth and the editorial had been on the newsstands less than three days before a deluge of mail resulted. A large number of readers told us that they had invented the perfect safety pin. A larger number recounted their personal troubles with the old-fashioned safety pin. The latest letter we've read is from Mr. James Wynne Arder of St. Joseph, Missouri. Says he: "That's the kind of stuff we readers want. I'm glad to see Collier's sticking to the common, homely problems of the people. Don't let the war distract you."

BUT there we go getting unwarlike again. Perhaps we'd better confine ourselves to what's left of such inglorious domestic affairs as baseball, legislators and what in the world has become of the Department of Labor, the Townsend Plan, Father Coughlin and Captain Elliot Roosevelt. About baseball we have a note from Mr. Reed Blankenridge of Philadelphia, Pennsylvania. Mr. Blankenridge says that, contrary to the best patriotic trends, the Philadelphia National League team has decided not to cut down expenses. On the contrary, says he, the Phillies have decided to splurge, war or no war. "I am reliably informed," says Mr. Blankenridge, "that hereafter while traveling arou Phillies will hire a r spectable hotel. Of mean, somewhat cro our athletes but the motors of the innove the club might rent a ple room usually ta salesmen. The bow ing bags, however, ju

"I MUST HAVE BEEN WEARING BLINDERS!

but I'm glad I finally discovered all auto insurance is NOT alike..."

"You'll never catch me driving a car without insurance. No, sir! I'm too smart to risk losing my shirt in case my wife or I have a smash-up. But I used to buy my insurance with my eyes tight shut—thought one policy was as good as another. It took a State Farm Mutual representative to show me how wrong I was.

"I wouldn't listen at first. You know, I thought this State Farm fellow was trying to high-pressure me. But I discovered they've really got something there—a Membership Plan that's different. It gives you more protection and better service for less money! And State Farm's national organization will come to my assistance no matter where we might crack up!"

State Farm's Membership gives you

MORE AUTO INSURANCE FOR YOUR MONEY

by G. J. MECHERLE
Founder and Chairman of the Board
State Farm Mutual Automobile Insurance Company

"Do away with old-fashioned practices that make automobile insurance expensive!—That was our aim when a group of us in Bloomington, Illinois, founded State Farm Mutual Automobile Insurance Company back in 1922.

...ing State Farm Mutual policies on a membership ...hey can be renewed as long as the risk remains the same ...surance), we *saved* money—and we have passed these ... policyholders in more insurance for their money. ...by the agent who sells your auto insurance only *one* ... That's why your State Farm policy costs you sub- ...le when you renew it from year to year.

...e are many other economies pioneered by our Company ...t an excess of $40,000,000 for more than a million policy- ...in the cost of their auto insurance.

...In addition we have been able to give them broader pro- ...and better service.

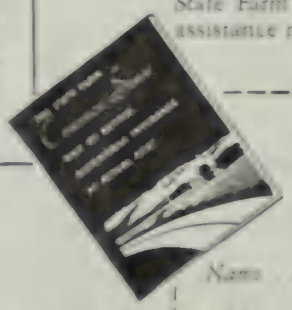
...The complete story of how our Membership Plan works, ...you to mail the coupon at the right."

CAR DRIVERS
. . . these Facts are important

State Farm Mutual is the largest exclusive writer of automobile insurance in the world.

Last year State Farm settled agreeably over 200,000 claims.

State Farm does business today in 40 states, in the District of Columbia and the province of Ontario, Canada.



More than 7,000 State Farm representatives, all over the country, are ready to serve you in case of an accident.

State Farm is a mutual company operated solely for the benefit of policyholders.

Policies, however, are obtainable only from agents.

CAN PEOPLE OVER 40 FIGHT TIREDNESS With Knox Gelatine?

133 men and women over 40 years of age were among the hundreds who volunteered to drink Knox Gelatine for 28 days to test* it as a fatigue-fighter. Did Knox reduce tiredness for them as effectively as it did for younger people?

Women over 40 who tested Knox included school-teachers, cashiers, telephone operators and nurses. 8 out of 10 who started, and 9 out of 10 who finished the Knox test said they were *definitely not so tired.*

What about older men? Whichever their work, mental or manual, men over 40 in the test reported these results: Of the 94 men who started the Knox test, 82 completed it. 74 of these said Knox gave them noticeably greater endurance and reduced fatigue!

Benefit in 2 weeks! That's the report of the majority of those who said Knox was effective. How many benefited? In tests of 26 occupational groups, 2 out of 3 who started the test, and 9 out of 10 who completed it said they were definitely less tired. When such a high percentage of men and women report results from drinking Knox...and so many say they get those results after two weeks...isn't a Knox trial worth the effort? If you are tired...or someone in your family needs more endurance...try the Knox Build-Up Plan. It's easy to follow...directions are given right here!

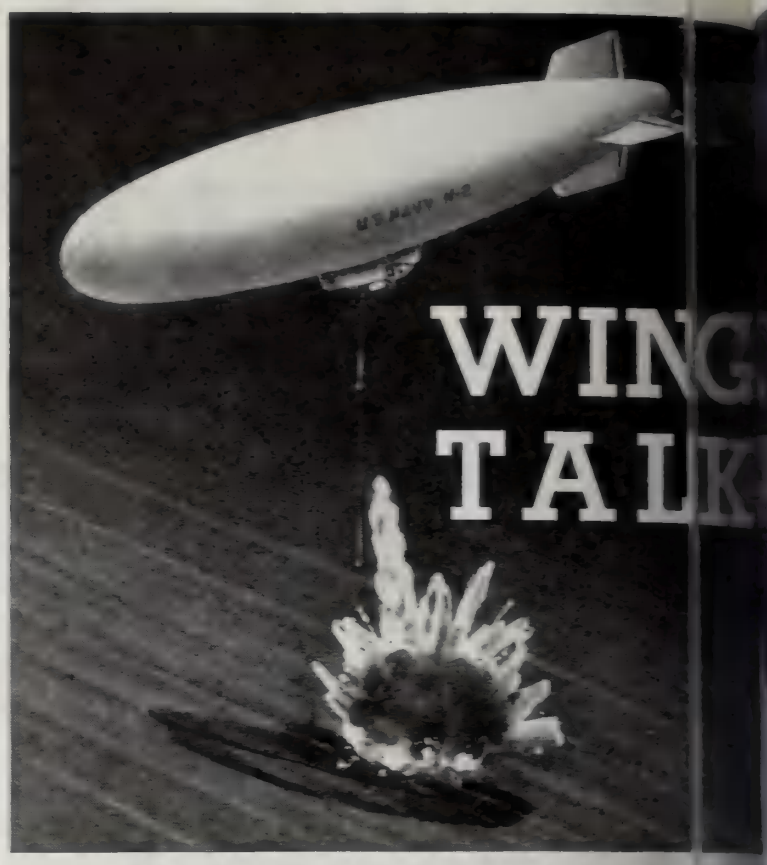
**Tests made and certified by a qualified research organization.*

TRY THIS YOURSELF...for 2 weeks

1. Drink 4 envelopes of Knox Gelatine *every day* for 2 weeks. Then drop to 2 a day. After 28 days, drink as needed.

2. To prepare, pour 1 envelope (1¼ pkg.) Knox Gelatine into ½ glass water or fruit juice, not iced. Let liquid absorb gelatine. Stir. Drink immediately. If it thickens, stir again. The gelatine is tasteless.

BUT BE SURE it's plain, unflavored Knox. Knox is *all* body-building protein. Ready-flavored gelatine dessert powders are ⅛ sugar, ⅛ protein. Buy from your grocer in 4-envelope or economical 32-envelope package.



SEND FOR FREE KNOX BULLETIN

telling how you may try reducing tiredness. Write Knox Gelatine, Dept. 70, Johnstown, N. Y.

KNOX Gelatine

A PROTEIN FOOD THAT FIGHTS FATIGUE

A dirigible with depth bombs is a formidable submarin

SOMETIMES our national aviation picture seems to make liars of those who have spoken well of it. Consider this contradiction, for example: Our industry, fliers and researchers have always led world air progress and captured most of its records. Yet today we are neither the leading exponent of air force nor the possessor of the greatest air power—regardless of what may be the case three years hence.

Fair-minded aviation leaders, when they let their hair down, blame our weakness for getting tangled and wrangled into "schools of thought." There is value in honest and reasonable differences of opinion, "but," worried airmen continue, "that is lost when champions of each side get too far out on the limb to be able to look back and see anything good from the other fellow's point of view!"

This is a standing list of major controversies in American aviation:

Separate versus nonseparate Air Corps: Mitchell enthusiasts versus the Indian War generals: Diesel against gasoline; lighter-than-air against heavier-than-air. Now a no-quarter fight is in progress between air-cooled and liquid-cooled motors.

Responsible men have begun to recall that Germany tolerated no such luxurious schisms. Or, if they did turn up, the ample thumb of Marshal Goering kept them from widening. His Luftwaffe was built on the theory of neglecting nothing, developing every asset fully. Open ears and minds toward all comers. Investigate, experiment and be prepared in all phases of aeronautics.

"There is no question," one of our wisest aviation men told me in Washington recently, "of the United States' ultimate capacity to outproduce any other nation. There is serious question of unprejudiced effort and of unselfish organization for driving ahead and the Axis take the hindmost!"

DIESELS and dirigibles provide outstanding examples right now of how neglect and bickering have handicapped us.

In the Diesel engine, invented by Rudolph Diesel, a German, fuel is exploded by heat and high compression, as opposed to spark ignition of the [illegible]. Your library's newspa[illegible] you Diesel history in ou[illegible] ard's Captain Lionel W[illegible] it to a point where it [illegible] and economy records [illegible] and won Packard t[illegible] Trophy. Jealousy, offic[illegible] rels ended Diesel proj[illegible] try.

The Germans kept o[illegible] modern bombers and [illegible] Diesel-powered, burni[illegible] grade fuels or furnac[illegible] principal factor offset[illegible] of gasoline.

Now there is a great [illegible] here—for tank, marine, [illegible] in production for milita[illegible] engines have no ignitio[illegible] radio interference. Per[illegible] advantage from the [illegible] view is the reduction[illegible] Even incendiary bull[illegible] tanks won't turn a D[illegible] the fighting airman's ni[illegible] ing coffin."

AS TO dirigibles: hea[illegible] ers and surface offi[illegible] fight lighter-than-air. [illegible] now to credit the acri[illegible] unreasonableness of th[illegible] ice consecrated to uni[illegible] purpose of national de[illegible] friendships were broke[illegible] Moffatt, who died for [illegible] Akron, was a Navy pa[illegible] ing Billy Mitchell in th[illegible]

The British quit afte[illegible] $5,000,000 R-101 in 1[illegible] Thomson, Secretary of [illegible] 46 others. The ill fate[illegible] doah, Roma, Akron a[illegible] plainable or avoidable [illegible] —practically brought o[illegible] tion to a standstill.

Again, Germany p[illegible] finished the LZ-130, siste[illegible] burg, before the war be[illegible] well along, and the 132[illegible] old Graf Zeppelin and [illegible] immediately shuttled t[illegible] sia, as fast as they co[illegible] importing critical miner[illegible] no doubt have joine[illegible]

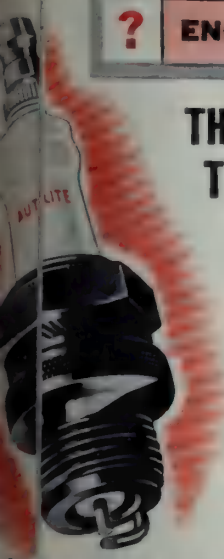
"LET'S SEE YOUR TONGUE!"

CHECK YOUR SPARK PLUGS' HEALTH THIS *Easy way!*



THE OTHER DAY our car was acting up awful. When we got to the garage the man looked at the spark plugs to see if the engine was sick, just like Mommy looks at my tongue. He said, "I'm giving your engine an Auto-Lite 'Plug-Chek' right now!"

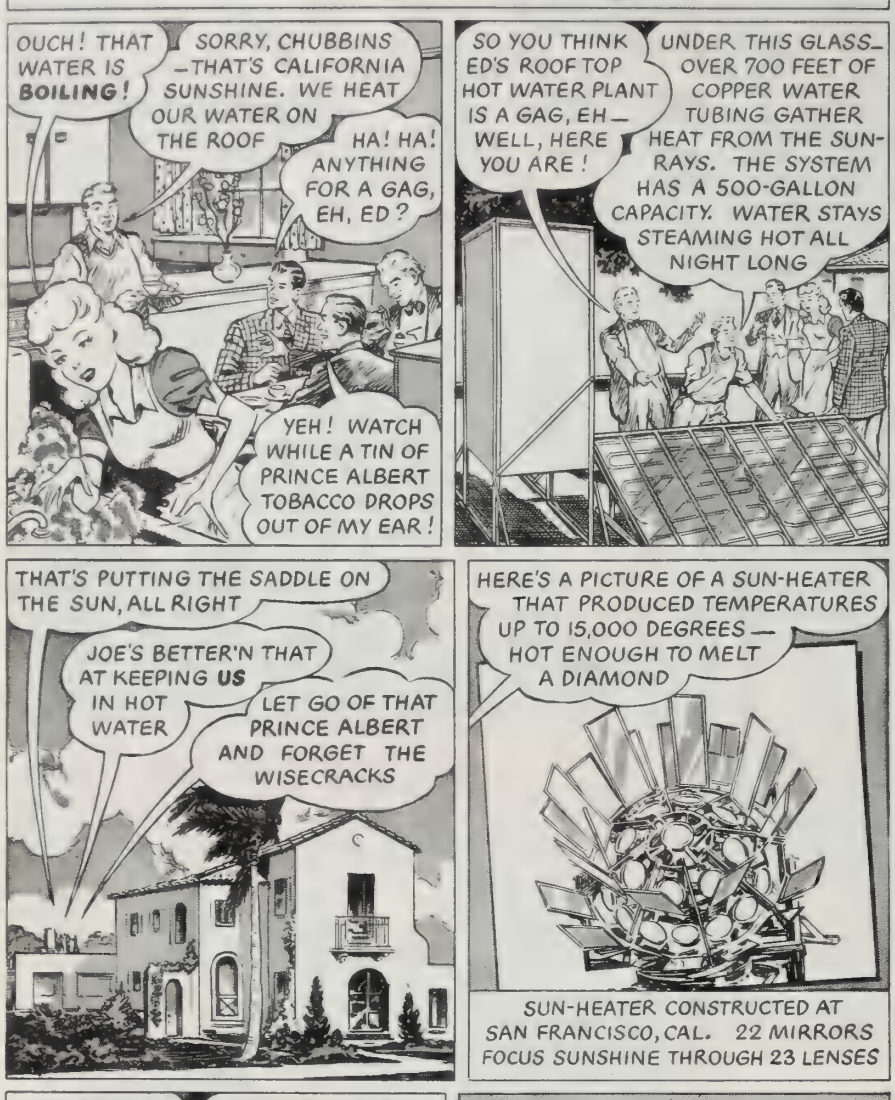
AND, GEE WILLIKERS...You should see how quick he fixed our engine—our car runs better than ever. On the way home Mommy and me made up a rule, "When your engine is sick, ask for an Auto-Lite 'Plug-Chek' QUICK!"

DOES YOUR CAR HAVE THESE SYMPTOMS?

?	HARD STARTING	?	NO PICK-UP
?	SLUGGISH ON HILLS	?	STALLING IN TRAFFIC
?	HIGH SPEED MISS	?	ROUGH ENGINE
?	ENGINE KNOCKING	?	HARD ON GAS

Every 4 Cars Is Factory-th Auto-Lite Spark Plugs

THOUSANDS HAVE REPLACED WITH WRONG TYPE SPARK PLUGS—AND DON'T KNOW IT!



HERE'S a new service for motorists. A scientific device called a "Plug-Chek," helps every Auto-Lite dealer spot, more easily than ever before, plugs that are functioning improperly or have burned or fouled because of engine irregularities. He compares the "business end" of your spark plugs with the "Plug-Chek." This reading enables him to better analyze your engine operation, helps him restore top engine performance. Ask your dealer about the new Auto-Lite Spark Plug that's "Ignition Engineered"—and get a "Plug-Chek" today!

KEEP UP WITH THE WORLD

By Freling Foster

The famous romance of Victor Hugo and Juliette Drouet, between 1833 and 1883, produced the largest number of love letters ever written by one woman. Although he was away from her for only a few of these fifty years, she wrote him 15,000 devoted notes.

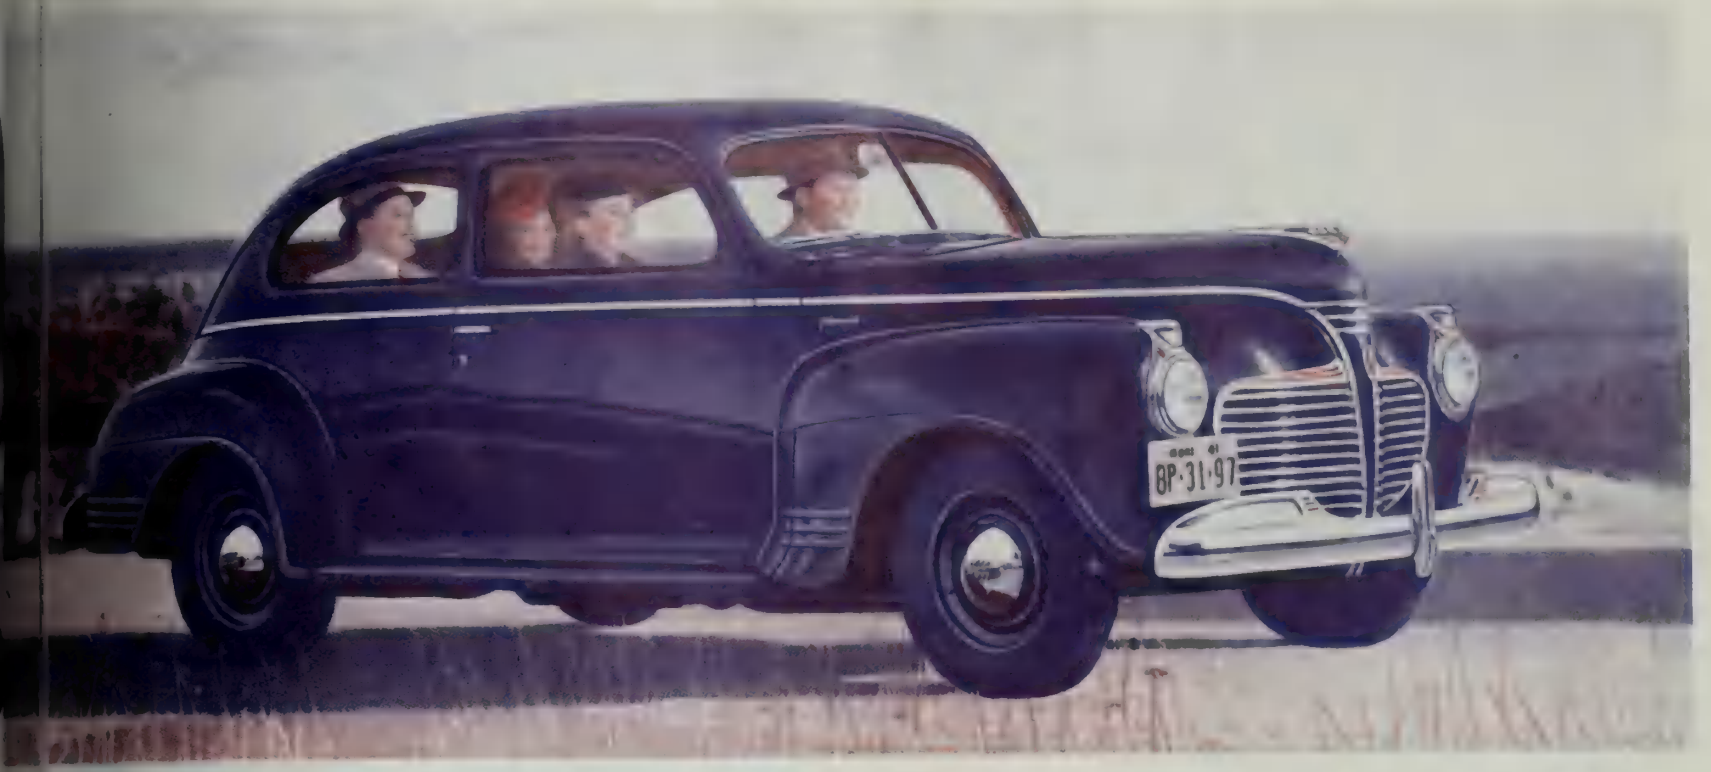
The sunniest spots in the United States are southwestern Arizona and southeastern California. The cloudiest spots are the coastal cities of the state of Washington.

During this school year, about a hundred large corporations will send "talent scouts" to interview fifty thousand college seniors in their annual drive to find and train promising youths for positions in their organizations. To those selected will be offered fellowships, scholarships and courses in company schools which, with the training being given by some five hundred other firms, will cost industry more than $12,000,000 in 1941.

The value of equipping offices with sound-absorbent walls is typically illustrated by an installation in a large American insurance company. Records kept for one year before and one year after the ceilings were constructed showed that the decrease in noise was responsible for a decrease in errors amounting to twenty-nine per cent in the work of typists and fifty-two per cent in the work of calculating-machine operators.

Each winter, a snow survey is made in the Rockies and Sierras by federal, state and private agencies to estimate the quantity of water that is likely to run off into lakes, rivers, aqueducts, dams and irrigation systems in the spring. Although the survey costs more than $100,000 because thirty thousand measurements are made in about seven hundred locations, it is worth millions to industries dependent on an adequate water supply.

The longest aerial-[t]portation system ever nearing completion in twenty-eight miles in will be used to carry lim a quarry to a cement 550 skips, or buckets, a emptied automatically its towers, suspending over waterways, are 1[5] to avoid obstructing s[hips].



In Mexico, an empl[oyer] lay off workers or clo[se] plant until he receives [permission] from a Conciliation and [Arbitration] Labor Board, compose[d] sentatives of the gover[nment] tal and labor. In Brazil, [employee] cannot discharge a work[er] years' service, unless [he has com]mitted a very grave offe[nse].

The motion picture F[antasia em]ploys a radically differ[ent method] of sound projection, wh[ich gives] film a unique auditory [perspective]. It uses four sound tra[cks, instead] of one, requires abo[ut seventy] loud-speakers, instead [of two, and] can only be projected [in theaters] that install special eq[uipment for] it, of which there will [be no more] than thirteen in the e[ntire United] States.

Two sounds may be [produced] such a manner that the [neutralize] each other and the resu[lt is silence]. Likewise, two beams c[an] be produced in such a [manner that] they, too, neutralize ea[ch other and] the result is darkness.—*[Henri]ette Desgrey, Yonkers, [New York]*

To vaporize gasoline [its carbu]reters, an airplane engi[ne weighing] one ton consumes one t[on of air ev]ery twelve minutes.—*B[Robert C]Brown, Montgomery, [Alabama.]*

"RIDE IT— PLYMOUTH BUILDS GREAT CARS —AND YOU'LL BUY IT"

By jiminy, that's the way to get there!

DO YOU enjoy flying in summer, refreshed by escape from the earth's high heat, relaxed by the colorful countryside that lies like a painting beneath you? Then you will enjoy travel in winter even more, if you fly.

For up in a great airliner in the sky, you'd swear it were summer outside except for the gleaming snow that blankets the earth in white.

Suppose the mercury down there has plummeted to 10 below. You sit and read or doze or eat or chat with friendly passengers in a spacious, comfortable cabin with the temperature at a cozy 72.

Winter schedules are maintained with regularity, efficiency and dependability. Nothing unusual about that; most winter days are excellent for flying.

Where do you want to go? What time do you wish to leave? Just consult the regular airline schedules—you'll find convenient departures and frequent service to all sections of the United States and Canada—and to 55 foreign countries, as well.

Business is good and good business calls for Air Travel—especially since Air Fares are in line with the fastest first-class ground travel, everything considered.

Make your next trip by air and discover why thousands of passengers who are flying this winter say, "All around the calendar—*It Pays To Fly!*"

"Se rita!" she announced, "I sweep heem the room, no" Roger scowled and almost clicked his heels

THE TRAITOR

By Frederick Hazlitt Brennan

ILLUSTRATED BY HARRY BECKHOFF

Beginning a new novel—a romance of the United States Navy under pressure from the enemy within, and of Phyllis, the skipper's daughter, a girl equal to any situation

I AM definitely the hatchet woman of Navy Station. When officers are speechless, bound by the code, young Phyllis talks right out. When Navy wives falter into silence, afraid of hell-fire, admirals and the Bureau of Navigation, where is Miss Hartney, the commandant's lovely daughter? She is still in there swinging.

To quote Dolores, the cook Dad and I brought back from Panama, I am *mucho tigre*—much tiger. To quote Dolores again: "You have only nineteen sweet summers, Señorita. But, Dios, the winters, they must have been *very* bitter!" I love to quote Dolores. She is *simpatico*.

Someone has got to tell the truth about what has just finished happening at Navy Station. We found a traitor here. That is bad enough, goodness knows. The very word "traitor" used to horrify me. We have suffered through melodramatic and terrible events. They are saying in Washington that we are all a disgrace to the Service. Gossip has spread to the Fleet, and our tragedy is being referred to as "that Navy Station affair."

We are supposed to hang our heads in shame, making no defense nor even a reply. Navy men and women must take it, you know. Never explain, never complain. Dignified silence, for the good of the Service. Hush-hush, it wouldn't do to undermine public confidence in the Navy at a time like this.

I say pish-tush. (This is calm, lady-like understatement.) Public confidence will not be affected by discovery of treason at a hokey-pokey third-class yard like Navy Station. Not if civilians are told the whole truth, from beginning to end. And why am I so cocksure? It is because I knew us all and watched us—how we thought and felt and acted—during the crisis. I say we learned things through our ordeal that would be good for every American to learn just now. I feel ashamed of a few of us at Navy

Station, including myself, but I am proud of the majority.

At the risk of being caught far beyond my depth, I want to ask just one question: If the love of liberty was born in a dungeon, might not the love of country be born in treason? I think we have proved, right here at Navy Station, that it might . . . .

"WHAT'S the verdict?" Roger said.

"I'm sorry, Rog," I said, "but it has to be 'no.'"

I am going back, now, to that first day when our trouble started. I should like to claim a feminine prescience of disaster. But the plain truth is that Miss Phyllis Hartney had nothing of the sort on her mind. She was very busy trying to tell Lieutenant Roger Collins that she couldn't marry him. It being her first experience in rejecting a man (some hussies would count a midshipman named Tommy, one June week at Annapolis, but *I* shall merely mention him), Miss Hartney was making heavy weather of it.

"I'll ask you again tomorrow," Roger said.

"No . . . please—"

"And the day after that."

"Thank you, Rog—but it's no use."

"Why not?"

"I'm too fond of you to marry you."

"Now, that is nonsense!"

"If I hated you, I might do it. But I won't marry a man I like."

"I know why you're taking this attitude!"

It would have been so much easier with a homely and humble man. But Roger was a beautiful boy, a smart officer and extremely conceited. He had ignored the faint possibility that I might not be in love with him, if, indeed, the idea had ever entered his head. Oh, dammit, I said to myself, I shouldn't have tried to be gently subtle with Roger. Now, he thinks I am making a great renunciation because of Dad. Here it comes—

"Afraid of hurting my career, eh?" Roger said. "That's like you, dear. But I have thought this all out very carefully."

"You have?"

"Why do you suppose I asked for duty at Navy Station?"

"Because you were loyal to the skipper."

"Yes. But I was in love with you, even then."

"Roger! No!"

Then, Roger gave me a glimpse of his noble character. When the admirals cracked down on Dad for writing that book, Roger said, it posed quite a problem for Lieutenant Collins. (The greatest book since Mahan's, I say, but it made the battleship boys hopping mad because it dealt with air power in the modern world.) Should Roger follow the Hartneys into exile at Navy Station? Could he afford, at this stage of his career, to be associated with the skipper? Roger had not faltered. Loyalty was loyalty. He was not faltering now. He would accept the worser hazard of marriage to Captain Hartney's daughter. He was willing, even anxious, to bear the stigma.

I shifted to an obvious irony, saying: "That is splendid of you, Rog, but I couldn't let you sacrifice yourself. The curse of the Hartneys is upon me. I will not bring you to ruin!"

It was Roger's cue to grin, but he muffed it. He kept a sad and solemn, a consecrated face, looking at me steadily. He had very handsome brown eyes. (I have never, alas, thought brown eyes much of a treat, having a pair of them myself. And not bad, either, see?)

"I won't be ruined, Phyllis."

"Oh, yes, you would. No friend of the Skipper's will ever get anywhere in this Navy."

"Not until—"

"Until what?"

Roger side-stepped. "All right. I'm ruined. But I'm marrying you," he said. "Ah, Phyllis, honey—"

I let him sweep me into his arms for a kiss. After all, I liked Roger and I was grateful. His gesture in transferring to Navy Station after he finished his last sea duty had helped my father through a bad time. Dad swore by Roger and needed his efficiency in paper-work detail. So, instead of saying honestly: "My boy, I will know the right man's kiss when I feel it, and *that* wasn't it!" I did a little play-acting.

Gaspily, I pushed Roger away. "No . . . no—" I said, and was I corny! "It just can't be. Ever!"

"You're wrong, dear."

"No. Thank you very much—but no—"

THIS might have gone on quite some time, but I had kicked the buzzer for Dolores. She came barging into the living room with the vacuum sweeper. My jewel, my treasure, Dolores.

"Señorita!" she announced. "I sweep heem the room, now!"

Roger stiffened, scowled and almost clicked his heels.

"You might train her to knock before she enters a room," he said.

"I've tried," I said. "I'm awfully sorry, but she just learn."

"This evening then

"Yes."

Roger glared at Dol hand, bowed and mar I noted that he had tempestuous scene or even disarranging h form. I also remem settled nothing as fa cerned. Both thoug and I took it out on D told you just to come ing. You always over a mugger and a ham!"

This got only a w from Dolores.

A WOMAN goes to the milliner for any one of a thousand reasons. And any man who thinks women buy hats to keep their heads warm just doesn't know women. But a hat that is well-designed never goes out of fashion. A really chic woman never says, "Spring is coming, and I haven't a thing to put on my head."

A well-made hat will fit into your wardrobe and stay there as long as a good coat or dress. I wear some of mine three and four years. My special stand-by is a draped turban of green Rodier wool jersey that matches a quilted wool suit I had made in Paris in 1938. The pictures of it which appear in the center of this page show that anyone with a little imagination can make an old favorite look new each season.

Don't believe I'm discouraging women from giving themselves that lift of spirit a new hat brings. Every woman knows how soul-satisfying and essential it is to look out on the world from an entirely new frame, and have someone beam back with interest.

Most women can wear any one of the six hat classics—turban, pillbox, swagger brim, bonnet, flowered toque or off-the-face hat—if it is modified to suit her head, height and hair-do. But whether it comes off the closet hatstand or fresh from the milliner's bandbox, put it on with a dash. Timid approaches to the season's approved angle are a life sentence to dowdiness.

A SHORT SHORT STORY
COMPLETE ON THIS PAGE

She didn't scream, instead, after a moment, she gave a little laugh. It was part self-mocking, part malignant

FROM where they stood, the house at the end of the night-shadowed avenue glittered like a pleasure palace. But to Barry Forster it was a prison from which, for a breathing spell, he had escaped. He turned to the girl beside him. He took her in his arms and kissed her.

"You're not angry?" he asked almost humbly.

She pulled herself free. But he knew she was not angry—only frightened and bewildered.

"We've been happy, haven't we, Eileen? It's been a perfect ten days. Now . . ."

"She's waiting for you," the girl said unevenly. She was like a beaten army, falling back behind its last defenses. "It was good of her to let you go. She must have missed you terribly."

"Sick people like Felice," he said, "don't miss anyone." He spoke softly, and he knew the picture that he conjured up in her mind—that of a handsome, life-loving man, desperately alone, shackled and overburdened.

"We love each other," he said simply. "You haven't known it till now. I've known it for days past. You thought you were in love with that nice young cub you talked so much about. But it's me you love—and I who need you."

She shook her head. "Even if it were true—it makes no difference."

"Because I'm not free?"

"You know that's why—"

He knew that he could sweep this child off her feet. But there were her people—rich, small-town folk who, during the camping trip that had celebrated her recovery from a threatened illness, had eyed him doubtfully. He could not afford to make them hostile.

"Listen, darling. You're going home tomorrow. Promise me one thing. Wait—just six months. Don't marry your nice cub till then. Give me my chance—"

His hands were on her shoulders. He could feel the inner struggle. His hands tightened. "Promise!" he pleaded.

"I promise!" she said faintly.

THE sanatorium was like a huge mother hen brooding over a clutch of chickens. Each of the dependencies scattered over the estate was a complete unit. When Barry had brought Felice here after her breakdown they had occupied the most expensive of the log-built cabins. Now they had the cheapest. Her sickness had consumed money. His gambling, so that one day he would be rich and free, had consumed more.

The nurse met him in the little hallway and eyed him with disapproval. He knew that she had thought the ten-day trip callous. "How is she?" he said. "How have things been?"

She answered evasively: "Dr. Randolph will tell you. He's coming around at nine. I am waiting for the night nurse who is to come on at twelve."

"You don't need to wait, Miss Keith. I'll take over. It pleases my wife, you know. After all, I haven't seen her for ten days."

The girl's face softened. "Very well

d soldiers, they say, ver ie. The only way get be an old soldier to arn how to fight

ERCANT SAM BATSON studied the eet of the replacements who file into the barricades, kicking rt int little clouds before they took sition on the firing steps. Then he nced over his shoulder at the morn- sun turned his head slowly and ured the slope toward Vicksburg, der s e for a month, but still stand- g, gn ed and defiant. The first Con- derat trench was less than two ndred ards up the bluff.

He d n't look at the faces of the new en. Their feet told him all he needed know Bounty soldiers. Immigrant ishme rounded up by blood brokers ho de ered them in droves to state ilitia The immigrants got a bounty nd th broker took his cut. Sam had nly pi for them. Most U. S. Regulars, Sar was, were contemptuous of ounty oldiers, but old Sam felt sorry or anybody who came three thousand miles to get his innards all blown out.

He reached for his chewing tobacco and was thinking his own thoughts when the young soldier presented himself. "You're the supply sergeant, ain't you? I'm Ben Bradley, your new helper. Ohio's my home. Any instructions?"

Sam looked at the recruit's feet quickly. "Pick up your feet when you walk. The Confeds can see dust a mile." He spat into the dirt and turned his cold gray eyes on Ben. The boy, conscious of the gaze, fumbled for his tobacco and took a big bite.

"Better nibble that tobacco," Sam said. "It'll last longer. Those buckoes up the hill got plenty of tobacco, but they bargain hard."

Ben flushed. He thought he might impress the sergeant by chewing like a veteran. He was hungry for conversation. "Fine-looking soldiers in that last bunch, eh, Sarge?"

"They ain't soldiers. Them buckoes up the hill are soldiers."

Ben resented the remark and said angrily, "The new men are just over from Ireland. They are fighters. Every bully boy in the levy stands over six feet. They love a fight."

The sergeant scratched his beard and glanced at the sun again before he spoke. "You got a lot of dander." He looked the new line over for the first time. "All six-footers," he mumbled. "Well, the bigger they are the more ground it takes to bury 'em."

Ben said, "Wait'll they hit the Rebs. They are wildcats."

Sam stretched and yawned. "They ain't soldiers. Just wild micks with new muskets in their hands and mustard in their blood."

"They ain't scared of nothing," Ben said.

"I know it." Sam rinsed his mouth with water from his canteen, then took another small bite of tobacco. "The earth 'round here is full of men who weren't scared of nothing." He saw an Irishman poke his head above the barricades and opened his mouth to yell, but it was too late. A ball tore through the man's temple.

Ben gaped at the body and felt his heart slip to his stomach. "They killed him. Dead. Shot him in the head."

SAM watched the Irishmen pick up their comrade and saw the looks of amazement on their faces. "Them buckoes up the hill take a lot of interest in their work. Them's soldiers. They know how."

"Why didn't you warn our men?" Ben demanded.

"You talk too damn' much," Sam snapped. Then he was sorry he said it and offered Ben a chew. "Didn't the colonel warn you to keep your head down before you came up here?"

"Yes, but—"

"If those Irishers won't mind the colonel, they won't pay me no mind either. Soldiers have to learn the hard way, son. Considering what the men learned, they didn't pay a big price."

He flattened his face against the top of the barricades, cupped his hands and shouted, "Hey, Reb."

The answer came from the Confederate trench, "Hey, Yank."

Sam stood up and half of his body was exposed. Ben gasped in admiration at what he thought was reckless bravery. The sergeant cupped his hands again. "You shouldn't shoot with the sun in your eyes. Might hurt something."

"You don't say," the answer floated back. "Whatcha got to eat?"

"Roast duck," Sam yelled. "How 'bout you?"

"Roast turkey."

The sergeant stepped down and Ben asked, "Turkey? Did he say turkey?"

The Sticking Point

By Margaret Weymouth Jackson

ILLUSTRATED BY ELMORE BROWN

Congressman Harridan had never been anything but a shabby politician. What would you say now?

REPRESENTATIVE CASSIUS MILO HARRIDAN was an unimportant little man from a shabby coal-mining town in a poorer section of his state. To those who knew him best he seemed, in spite of his well-cut clothes and his twice-a-day shave, as shabby as the district he represented in Congress. He had a modicum of gifts, a shock of black hair, a deep organ note in his voice and a mild talent for oratory. He also had considerable energy and he managed through the years to keep his seat in Congress by an endless and not very pretty performance of trying to please everyone, of trying to propitiate every group, no matter how wild.

He had all the vices of the little man. He liked a drink better than he should have liked it, he smoked incessantly, with nervous tappings and much puffing, he played poker for higher stakes than he could afford. He was vain of his success with women and his vanity required that he be constantly involved in some shoddy intrigue.

The patience of his wife, the unusual attractiveness of his three sons were assets that he took for granted rather than appreciated. He loved them all after his fashion and provided for them adequately. Since he had never bothered to move his family to Washington, and since his paramount emotional interest was always elsewhere, he was more like a showy guest in his own home than the solid father and head of the house.

In the House his career was undistinguished. Without thought or care he allowed himself to be considered one of a "stable" managed by abler or more determined men.

Just as his most vital emotional contact was always outside of his home, so his most vital concern was always with re-election, not with the issues being debated on the floor of the House. All the way around he seemed to miss the genuine purposes and intents of a man's life and to play his part in shadow and vagaries.

At the time the Blake-Overly Bill came down from the Senate for final passage in the House, Harridan's current lady friend was a shopkeeper on a street of small shops not far from his unpretentious hotel. Her name was Alma Stevens and she sold clothing, hats and accessories priced to catch the attention of the many stenographers and clerks employed in Washington. She was a divorcee in her middle thirties, thin, dark and extremely animated. She was a good sort, hard-working, vigorous and not too particular. Her laughter was quick and bright and always on trigger. Her conversation and mediocre and her app than average. She had clean apartment where h to go to talk and drink bee think that they were sw lovers and understood eac

he y moment that the men of ouse n Monferrato raised their s to e shy, slight Ugo, solemnly g hi rilliant future, glasses were rais to another soldier in neigh- g Gr zano–Monferrato—one who ust en graduated with honors the litary Academy of Turin at nhea -of age of nineteen. The of t s second soldier was Pietro glio.

neon n the Cavallero house men- d the oincidence. It would have bett if he hadn't. There was no betw n the Cavalleros and the glios Both were military fami- nd li d in rival villages and if you the tensity of the family feuds of those mountain towns you can understand why Ugo shuddered when the name of the older Pietro was mentioned.

Even before they were born the fragile Ugo and the rugged Pietro were destined to be rivals. Their fathers were rivals, with Cavallero always one promotion behind Badoglio. Pietro became for Ugo a man he must overtake and pass and the younger boy's father kept alive the rivalry. Family honor and ego demanded it.

Ugo Cavallero did, finally, move ahead of Pietro Badoglio fifty years later, on December 6, 1940, when Benito Mussolini removed Badoglio as Chief of Staff of the Italian Armed Forces and replaced him with Cavallero. Ugo couldn't have foreseen the circumstances of his final triumph, however, any more than his father could have envisioned the death of the Italy of Garibaldi, the emergence of Fascism and the eventual participation of Italy in a war with Germany against Britain and against a France that had given Italy the House of Savoy, its ruling dynasty.

Nine years is a long time to make up in a military career. Until the first World War there were no opportunities for rapid promotion and honors. Ugo, meanwhile, developed what skills he possessed and these were a capacity for languages and an aptitude for politics. He became a politician-soldier. Badoglio stuck to his cannon.

Upon being graduated from Modena, Ugo Cavallero became an instructor in the Parma School of Infantry and Ballistics. He attracted the attention of General Cadorna, then Chief of Staff, and at the beginning of the war was promoted to major and placed in charge of the General Secretariat of the Supreme Command which transmitted orders to the field commanders. One of these commanders was Major Badoglio. The House of Cavallero had overtaken the House of Badoglio. The job was now to pass the rival.

The disaster of Caporetto came. Cadorna was broken. His successor as generalissimo of the Italian armies was General Diaz, who promoted Badoglio to a full colonel and then a general and

Catching Hit-Runs

By Myron M. Stearns

Stepping on the gas doesn't do a hit-run driver much good today. New methods of detection will track him down from the evidence he invariably leaves behind

ILLUSTRATED BY D. R. FITZPATRICK

CROWD of Cleveland children starting running across a street from the rear door of their school the moment school was out. A car traveling too fast to stop ran through the group and struck a boy. When officers reached the scene all that the children could tell them was that the car was gone. Police headquarters ordered all accident squads to canvass all service stations. In one garage officers saw a gray touring car in the garage. They felt the radiator and the engine; both were cold. There was no gray touring car in the place. As the officers were about to leave, one of them thought of feeling the car's exhaust pipe. It was warm!

Jacking the car over the oiling pit they examined the underbody and found traces of oil on the king bolts. When compared with the injured boy's clothing they were found to be identical.

Confronted with this evidence, the garage manager admitted that one of his men had driven the owner of the car home and struck the boy while returning to the garage. The radiator had been refilled with fresh water to cool the engine.

In Waterbury, Connecticut, officers investigating a hit-run fatality reasoned that the guilty driver lived in a certain suburb of the city, because no one but a resident would be speeding along that particular road where the accident occurred late at night. On the theory that the guilty person might have been going into the city to shop with his car and might stay in his own vicinity now, grocers and other storekeepers were asked if they had been selling to any new customers.

Nearly two weeks after the accident a grocer told the officers that a postal employee who had lived for years only a short distance away had begun for the first time to buy groceries from him during the past fortnight. Officers went to the house, the small garage at the rear empty. For two days they waited for the owner to be brought back. Then they called the man to his front door and asked him where his car was.

"Why, in the garage!" he said.

They said the garage was empty.

"But I left it there only a little while ago!" he said. "Somebody must have taken it."

Knowing that the man was lying, the officers took him, with his wife, to headquarters, and questioned them separately. Finally they confessed. They had hidden their hit-run car, with telltale marks of the accident still on it, in the woods near their home.

Driving one rainy night along a road near Indianapolis, a motorist narrowly missed crashing into a wrecked car lying halfway across the road. Three people were unconscious, badly hurt. None of the three knew what had hit them. No witnesses had heard the crash or seen the accident. A downpour had washed out all tracks. But, on the scene, state police found straw litter, sawmill shavings, a piece of board and scrapings of blue paint left on the wrecked car by a hit-run machine.

When Every Second Counts

The bits of litter indicated that the hit-run car was a stock truck. Careful examination revealed that the litter contained nettles found in certain black-soil areas of the state. Checking stockyards, sale barns, gas stations and garages in the nearest one of these areas, the investigators found a blue truck, the owner of which proved to be the guilty driver.

Expert hit-run detectives become so interested that they keep going, to the point of exhaustion, to crack a case. Officers on night duty double up and take day duty also, while the day men work into the night—putting the whole squad on almost a 24-hour basis until a case is solved.

The first step is to get to the scene of the accident as quickly as possible. Witnesses who may have seen the escaping car and driver will soon be gone. Clues that might lead to the identification of the missing car or driver may be lost; tire tracks may be obliterated. In Trenton, New Jersey, when two-way radio equipment was installed on all squad cars, the percentage of hit-run arrests rose from less than three out of five to nine out of ten.

As soon as they reach the place of accident, give first-aid to the injured and warn approaching traffic, officers go after the driver involved in the accident. That is not always simple. In both city and country, crowds immediately collect around any accident. Inexpert investigators will sometimes lose as much as fifteen minutes before they find out that the guilty driver is missing. Not infrequently, even after the officers are on the scene, a driver who has stopped after causing an accident will slip away and try to escape detection. Experienced officers have learned also to keep a sharp eye on overcurious bystanders. A guilty driver will often, after turning a couple of corners, come back to see what actually happened, and decide whether or not he'd better give himself up.

The scene of an accident must be thoroughly searched for clues. From even a small piece of a headlight lens, its exact size and manufacturer can usually be told. Bits of rubber torn from the running board sometimes can be identified. There are parts catalogues with detailed pictures of each nut and bolt, each lamp bracket or angle iron, for almost every car that has ever been built. From the motor-vehicle bureau, a list can be secured of all cars in the state of the make and year indicated. One by one these may be carefully investigated and checked off until finally the car involved in the accident is located.

Near Manchester, New Hampshire, a middle-aged dairy hand walking home from work was struck and killed by a run-outer. Near his body traffic detectives picked up dozens of small glass fragments. These were carefully examined, preserved, and labeled. They were identified as coming from the headlight of a small 1936-model truck. Shortly afterward a farmer was seen buying such a lens from a local agency. Detectives went over every foot of his barnyard. They found two little triangular pieces of glass that exactly fitted against fragments picked up at the scene of the accident, positively identifying the hit-run car.

When unable to uncover any evidence through a thorough search at the scene of the accident, investigators may canvass houses in the neighborhood for witnesses who might have heard the crash or seen a speeding car. Saloons, garages and filling stations on both sides of the accident, sometimes over an area of many miles, may be visited.

It Pays to Come Back

In one baffling Midwestern case, officers, assuming that the hit-skip car had been damaged, inquired at garages over a radius of nearly twenty miles without uncovering any further evidence. Two days later an officer returned to the scene and, as he put it, "tried to figure what I would do if I were trying to run out of an accident at that spot." He turned off the highway at the first cross road, and talked with delivery boys and other regular route men. Presently he heard from a milkman about a filling-station proprietor who had sold gasoline to a party in a damaged car, in which there was an injured girl. This led to a check-up of doctors throughout that vicinity, and presently one was discovered who had treated a girl for injuries. She was found, and the owner and driver of the hit-run car was identified.

A novel trick never thought of in early cases is to revisit the scene of the

OUR NEW ARMY

DESIGN FOR LEAVING: Some of the 17,000,000 potential members of our new Army might like to know that Lieutenant Colonel Joseph E. Nelson, Minnesota's adjutant general, is largely responsible for the neatness and dispatch with which they were, or will be, bundled off to barracks. It's this way:

The World War Selective Service law worked better than anyone expected, but there were a lot of weak spots in it: insufficient information about eligibles, draft boards dominated by politics, useless red tape, time lags in the operation of the law. Eight years ago Lieut. Col. Nelson set about to exterminate the bugs, and he did such a good job that the result became Minnesota's Selective Service plan.

But the minute the plan was finished it disappeared faster than a scared rabbit. Two copies were locked up in the deepest archives of the War College in Washington, and the author was advised to keep his own copy so thoroughly bedded down that no newsman, congressman or stray citizen could possibly get his nose into the text. The idea of compulsory military training wouldn't have stood the light of publicity in 1933—the country was much too busy fighting a depression.

The secret thesis didn't stay hidden very long, though. A couple of years after the document had been popped into a vault the War Department yanked it out and made mimeographed copies—marked confidential—for the adjutant general of each state. Military men began to discuss the idea in larger and larger groups; and finally, in 1936, a Chicago newsman got wind of the plan at a summer camp—and the lid was off. When President Roosevelt asked Congress for a selective-service bill last year, copies of the Minnesota plan (which has become, in essence, the plan of every other state) were in the hands of every state adjutant, complete with charts, books, maps and details. It was ready to go and it went.

A good many of Lieut. Col. Nelson's forty-four years were spent in the railroad business; but as an Army man he has been a part- and full-time soldier since 1914, having served in the Minnesota National Guard infantry (Mexico), artillery and air corps (France), on the general staff, in the War College, adjutant general's department and Selective Service, of which he is now Minnesota's director. He quit civilian life in 1926 when he emerged a major from the infantry school at Fort Benning, Georgia. The next year brought him the rank of lieutenant colonel and the job of full-time assistant adjutant general of Minnesota. If the Army runs true to form he'll soon be a full colonel, then a brigadier general and adjutant general.

Present trainees over twenty-five will find little consolation in the fact that the man who doped out M-day doesn't believe they ought to be in camp at all. He has figures to prove that fewer than twenty-five per cent of Class A-1 selectees come from brackets above the twenty-five-year mark. But Lieut. Col. Nelson is a soldier—and the trainees soon will be. "We do what Congress orders us to do," he says, "even if we don't like it."

●

SOUTH: When construction ceases at Blanding it will be one of the biggest training camps in the country. Just to give you an idea: This Florida reservation, sprawling twelve miles from first to last sentry, embraces 134,000 acres located fifty miles southwest of Jacksonville, and facilities are contemplated for 75,000 men. There was a time when an Army division contrived to struggle along with 1,035 trucks, but the 31st (Dixie) Division—Alabama, Florida, Louisiana and Mississippi National Guard—now at Blanding, has more than 2,000, and the monthly cost for vehicle parts alone is a quarter of a million dollars.

As is the case in other sections of the country, sleeping accommodations near Florida's gigantic cantonment are worth their weight in mattresses. Many of the 20,000 construction workers commute daily from as far away as Ocala, a seventy-five-mile stone's throw. Amidst the shambles a sprinkle of trainees is beginning to arrive, and the vanguard of the 43d Division—Connecticut, Maine, Rhode Island and Vermont National Guard—is expected in March. Three thousand Negro draftees are slated, too. It ought to be quite a settlement.

PRIZE outfit of the 31st Division is Company F, 156th Field Artillery, from Breaux Ridge, Louisiana. Every one of Company F's 120 officers and men speaks French, and most of the commands are given in that language when the higher-ups aren't around. Capable of serving as interpreters, too, are most of the personnel of Companies E, G and H, respectively of Jeanerette, New Iberia and Lafayette, also of Louisiana's Evangeline country.

But there is some muttering in the French outfits. The Army's brand of coffee may be all right for the average trainee, but it's just plain insipid to the members of the Pelican State contingent. They're used to a brew that's black as ink and strong enough to bend a crowbar. From home they brought French-drip coffee gadgets, and with them they contrive to produce a potion that will knock your hat sideways.

Aside from the java problem, Sgt. Henry Castille can't understand the quartermaster's mental processes. "Look at that," he said, pointing to a row of bottles on the mess-hall counter. "We requisitioned tabasco pepper sauce and they sent us pickled peppers. *Sacre bleu!*"

Like the chefs in the three neighboring outfits, First-Class Cook Dorsey Broussard, of St. Martinsville, boss kitchen mechanic for the Breaux Ridge company, puts a French twist on everything in his pots and pans. They're the same groceries supplied the Mississippi, Alabama and Florida units, but when they reach the ultimate consumer they just aren't the same vittles. It may be that word of this will get around, and inspecting officers will get into the habit of dropping in at mealtime—"Well, well; just in time for chow!"—but First-Class Cook Broussard undoubtedly won't be caught napping. He probably has in mind an extremely delectable gumbo made of pine shavings and sawdust.

BLANDING is a paradise for the water-sports-minded. Troop quarters are established along the shore of Lake Kingsley, a nearly perfect circle in outline and has a diameter of two miles. Within the reservation are ten large and nine smaller crystal-clear lakes with white-sand beaches, all of them teeming with big-mouth black bass and other fish. Some of the bass weigh eighteen pounds—that's what it says here on the report.

MOUNTAIN: Any man who can keep 700 other men soup-happy on forty cents a day each will make a helpful husband when he gets around to matrimony. At least, Lieut. Eugene C. Light, mess officer for the 252d Quartermaster Company at Fort Douglas, Salt Lake City, thinks that trudging home from a supermarket with a week's supply of groceries will be a pipe, after what he's been through. In his Army capacity last month he bought five and a half tons of beef, four and a quarter tons of pork, 605 pounds of turkey, 548 pounds of fish, 1,350 dozen eggs, 2,196 gallons of milk, three and a half tons of bread, a couple of tons of butter and nearly ten tons of fresh vegetables. Oh—and twenty-four pounds of marshmallows.

SEVERAL prospective draftees in Murray, Utah, turned up at Fort Douglas in a new National Guard unit. It could hardly be called larceny, *but*—Selective Service officials had an idea that the National Guard was using the draft lists in seeking candidates to fill vacancies caused by resignations of men having dependents or essential jobs. Selective Service men finally admitted it was okay for draftees to elect to serve a year's training in the Guard: "They'd all wind up at Camp San Luis Obispo, anyway." Incidentally, since we reported three weeks ago that construction work at that California camp had been delayed by heavy rains—Chamber of Commerce or no—mobilization of Utah's 40th Division has again been postponed.

Meantime, the old-time Regulars at Fort Douglas are calling the draftees "S-men"—but without sarcasm. Fact is, you can usually tell a soldier with six to twenty years of experience by the pleasant way he addresses everybody. November draftees who try to put on the dog by ordering the February selectees around are dead giveaways, yet it goes on in every camp in the country.

●

MIDWEST: Mechanization note: There's no bugler at Scott Field, Illinois, twenty-four miles east of St. Louis, but that's no excuse for overtime ear-pounding. As befits the principal radio school of the Army Air Corps, reveille is an electrical transcription, sounded from a record via a cluster of loud-speakers.

THE 7,500 radio-communication students thus needled to wakefulness are in different stages of an eighteen weeks' course. In addition, there are 4,200 correspondence scholars who send their papers in franked envelopes to Scott Field's Air Corps Institute. There's a waiting list of 1,900. The courses were bought by the government from a private correspondence school which furnished some of the civilian staff now running the A.C.I. It's a break for the Air Corps boys—some of the lessons cost civilians $200 a set.

ST. LOUIS hockey and wrestling crowds contain from 200 to 800 Scott Field boys, and in the nearer town of Belleville, Illinois, they are sometimes entertained socially. One of a group of noncoms recently gave the hostesses the low-down on their insignia. "This HG service badge with the yellow propeller blades on the blue background means a man's married," he said, "and these 'hash marks' on the sleeve indicate the number of children." The hostesses went on being polite until a sergeant, not from HG, put in an appearance wearing no badge but boasting four service stripes.

THERE'S plenty of prairie mud around Splinter City, the big new cantonment on the far side of Scott Field, and WPA workers from Belleville are trying to clean it up by building roads. One group of these laborers regularly arrives in a hearse. No explanation. *C'est la guerre.*

Guardsmen at Florida's Camp Blanding like . Specially made, it's on tap day and night

Camp Blanding's Kingsley Lake offers good fishing and swimming. Shore areas are assigned each regiment and supplied with piers and equipment

Automotive maintenance cost is high. Each of the 2,000 trucks in the 1st Division uses about $125 worth of new parts monthly

Thousands of civilian construction workers commute daily to Blanding, rushing roads and barracks to completion for an estimated 75,000 men

Home-Maid Ski Champ

By W. C. Heinz

Championship ... lyn Shaw dem... skill that ma... among U. S. ...

At fifteen, Miss Marilyn Shaw is Women's—not girls', mind you—National Ski Champion. Here is one American mistress of the sport who learned her skiing on the flanks of the Vermont hills and hasn't even a nodding acquaintance with the flossy ski peaks of Europe

THE chances are you weren't on Baldy Mountain in the state of Idaho on the morning of March 22, 1940. But if you were you will recall that it was a cold morning, so cold the air seemed hard and that Sun Valley lay before you a desert of dry snow and gaunt trees. A ski run, the course for the Women's National Championships, slashed zigzag down the flank of Baldy, the marker flags waving crisply in the sharp wind.

At the head of the run stood a group of performers, timers and starters in a small forest of skis and poles. Their breaths made puffs of chilled vapor and the crowd of overcoated, mufflered spectators and the participants with the big numbers on their chests and backs were excited in that undemonstrative way of winter-sports enthusiasts. These fans aren't like baseball fans or football fans. In this sense and this alone, skiing is like tennis. Good craftsmanship evokes patters of applause, you know, instead of howls and jeers and cheers.

Standing in the midst of a group of lean, leathery ladies who'd skied at St. Moritz and Kitzbuehl and other flossy places in Europe, there was a chunky girl in black pants and short white parka, and when the hood was thrown back from her head it revealed a cloud of golden hair and a sturdy face with a generous nose. Her smile was toothy and her eyes had the deep quality of people who love sport for sport's challenge to courage and skill. Her name, you learned after the day's events had been run off and such things as elapsed time and form calculated, was Marilyn Shaw, aged 15. She never heard of St. Moritz and Kitzbuehl and other Continental ski spots like Davos or St. Anton, because these places are a long, long way from Stowe, Vermont, where her father owns a general store.

Until that March day nobody had ever heard of Miss Marilyn Shaw. But before the shadows fell across Sun Valley that evening she was very well known indeed. In fact, she was National Women's Open Ski Champion, which is something for any girl over twenty-one and a lot more for someone who hasn't been graduated from high school yet and still played with dolls. That rather startling fact—a national champion at fifteen—isn't nearly as dramatic as the way it all happened.

Who Wouldn't Be Scared?

The starter told her: "You're next, Miss Shaw." Marilyn gave the fastenings on her skis an expert tug or two, tested the spring of her poles, and shooshed over to the starting point. The course lay before and below her, about two miles of packed, frozen and powdered snow which dropped away 3,200 feet in that distance. Scared? Yes, she was, a little.

The men's national downhill race had been run off on that same course that morning. Of 40 healthy-l... only three survived falls ... failure. Even the winne... rance, who anybody will t... skier, was hurtled into t... lined either side of the c... covered with the interve... ably assisted by skill a... Men like Alf Engen, H... Charley Proctor and Sep... internationalists all, failed ... defending champ, Toni M... sixth with one pole and a... that ought to give you an ... fifteen-year-old Miss Sha...

Marilyn propelled he... and downward with an e... stroke of her poles. She ... mentum, her knees sprin... working rhythmically with ... ganized desperation. The ... off her parka hood and l... stiffly behind her like a s... of spun gold. And then her ... go. That's where it gets yo... Hot irons seemed presse... shinbones. The muscles ... tightened and she was no... the fact that they obeyed ... maintain balance, poise ...

"All I can remember," s... "is that my legs ached so ... never get to the bottom. ... long I thought I'd never ... I just wanted to finish."

Moonlight and Onion

By Dunlea Hurley

ILLUSTRATED BY MARIO COOPER

The man she loved wore baggy trousers and never drank lemon phosphate under any circumstances. The man she married was different—even to the crease in his pants

"He says he's looking for his horse that got away when the Indians came. He say's he's headed for the last roundup. I take him to the station"

RANNIGAN?" says the barkeep.

"Reporter?"

"On the Morning Tab," I say. "Big redhead."

"Snappy dresser?" says the barkeep.

"Snappy," I say, "like ■ bag of wash. You could tell him by the hat."

"What kind?"

"On the order of an abandoned bird's nest."

"No," says the barkeep, "this redhead I mean uses a derby."

"This redhead I mean," I say, "plays The Last Roundup on the piano like a whole cowboy band, beats his feet like ■ drum, gets a trumpet obbligato on one side of his face, tubas out the other and hums banjo through his nose."

"No," says the barkeep, "this redhead I mean is ■ quiet redhead with a blonde that would make you leave your happy home. They come in yesterday for ■ ginger ale."

"No," I say, "this redhead I mean goes about remarking 'Yippee!' and 'Wahoo!' and is a woman-hater and does not indulge in ginger ale in any form."

"Sorry I can't help you," says the barkeep.

"That's okay," I say.

"You a Tab reporter, too?" he says.

"I wouldn't know," I say. "I was, up to ■ week ago, then ■ sloe gin fizz crossed my path and everything went black. That's why I've got to find this fellow."

The question is, what propaganda has the Redhead fed to Managing Editor Burch, according to our ancient custom, to account for my seven-day vanishment? I can't go back until I know. The stories must be straight. But now I have covered every place in town where there is a keyboard at the mercy of the customer, and where else would you hunt the Redhead on his night off? I don't know what rooming house is serving the occasional Rannigan whim for sleep. Even if I did, he wouldn't be in it of ■ Saturday eve. And the cops on the late trick reveal they haven't been called upon for days to quell a disturbance featuring Jeremiah T. Rannigan, III.

ON THE Four Corners is ■ pool and billiard academy. The Redhead is not in it. There is also a coy dive called Auntie's Tearoom and Gift Shoppe, I am pained to say. It hurts me to bring this up because of what I see sitting in ■ booth by the window of Auntie's quaint joint.

Not that the blonde isn't okay. For a blonde, she's fair enough, if you like them blond. I mean, she's pretty in her own way, I guess. Well, maybe she's even beautiful by some standards. All right, let's be sensible about it. She's a knockout.

As for the red-haired person who sits there ogling this blond beauty like ■ hypnotized goldfish, I recall the face but I can't place the crease in the pants, the shine on the shoes and the big bow tie with handkerchief to match. This red-haired person bears a remarkable resemblance to Jeremiah T. Rannigan, III, and there is something hanging there on the wall that looks like a new derby.

Down the street a siren screams. Old Hook and Ladder Number Five. I know that wail. And the truck smashes right past Auntie's Tearoom and Gift Shoppe. And I am watching the Rannigan reaction. Only, there is no reaction. Nothing. He does not jump and run. He does not even jump. His nostrils do not quiver.

"Hello," says a voice. "Fancy meeting you here. It is you, isn't it?"

"Hello," I say. The voice is Bill Hawser on his way to exaggerate the fire for the Sunday Star.

"Two alarms, already," he says, happily. "A veritable holocaust and inferno."

I point inside Auntie's Tearoom and

Gift Shoppe. "Who does that red-haired person look like?" I say.

"My dear," says Bill, "that's Jeremiah T. Rannigan, III. Haven't you heard? He's the best lemon-phosphate customer Auntie has got."

Well, I'm not taking that. "Look here, Hawser," I say, "that's a vicious rumor to circulate about a man behind his back." But Bill is gone. The third alarm is in. You can tell by Engine Ten's howl. The third alarm, and Jeremiah T. Rannigan, III, sits in the window of Auntie's Tearoom and Gift Shoppe infusing carbonated water into his system by means of a colored straw.

I enter the tearoom. I don't care who sees me. It's no time for fooling. "Beg pardon," I say to the Redhead, "are you one of Auntie's quaint gifts on display in this window, or could you be a party I once knew, name of Rannigan?"

The blonde smiles. The Redhead rises. He does not wallop me one. He bows. No yippee. No wahoo. It's fantastic. I sit down, groggy, and more lemon phosphate comes, and the Redhead takes it without a whimper, and I gather the horrifying details.

He calls her Angel. She calls him Pinkie. She doesn't drink, smoke, chew or play poker. The only off-color thing she ever did was marry Red Rannigan.

"We're celebrating," she says. "Our anniversary. One week tonight."

My heart slides down into my left sock.

"And who do you think was best man?" says the Redhead, kittenish.

"Who?" I say, through the spots in front of my eyes.

"You," he says.

"Me?" I say.

"Sure," he says.

"Don't you remember?" says Angel, surprised.

"I told you he wouldn't," says the Redhead. He shakes his head. "That sloe gin fizz," he says. "An insidious institution."

So! I'm an accessory before the fact. Me who never meant any man harm.

"Don't worry," says the Redhead. "I fixed it with Old Man Burch. I told him you got the grippe. I told him you couldn't call in because they cut your phone off for nonpayment. That made it sound logical."

SO I have to go inspect the little love nest. Out in the suburbs where the grass smells healthy, four flights up in a self-service elevator, three-room apartment with a canary in a cage and the down payment on a baby grand piano.

The Redhead brushes a speck off the baby grand with his pocket handkerchief and I say, "Well, Red, how's about some ropin' and a-tyin' of The Last Roundup?" And Angel says, "Why, Pinkie, I didn't know you played." And Pinkie says, with a look right down my throat, "I don't." And that is that.

"You play," he says to her. "That Moonlight Sonata." And she does. And he shows me the ruffles on the drapes. "Made over from an old evening gown," he says, proudly.

"Did you run 'em up by hand?" I say. "Or did you do 'em on your little hemstitch machine?"

It takes me two hours to make a getaway.

"Good night," says Angel. "You must come often."

"And you must come up to my place for the sewing bee," I say. "Over McGinty's harness shop," I say. "First door down the alley. Just a few of us auxiliary girls."

Angel looks bewildered.

"We're crocheting artificial foam for near beer," I say, "in behalf of the animal rescue league. We meet every Monday in October, seventeen Greenwich Mean Time, sharp."

"A great old kidder," says the Redhead. And Angel laughs and says, "I think newspaper people are delightful."

Next day I hope it's all just a nightmare, but the Redhead is at work when I get to the Tab and even in his natural habitat he's more Pinkie than Rannigan it is plain to see. Marriage is wonderful, he tells me, and I ought to try it some day. Along that line. With a picture of the little woman in the wallet. And she phones him every day at 6 P.M., to check if he still loves her.

"It must be simply too thrilling," I say.

"Thrills?" he says. "Listen! I'm up bright and early this morning, grab a cold shower, touch the floor ten times, mosey into the kitchen and what do you think?"

"The canary has kittens," I say.

"On the table," he says, ignoring the crack, "is a platter of bacon and eggs, and steaming coffee, and toast and marmalade. Like a magazine ad," he says. "And a big apple pie." He pats his belt buckle. "Homemade apple pie," he says.

On a Friday eve Mike comes over to me, looking low. He throws a fistful of copy on my desk. "Hate to do it, kid," he says, "but will you please unravel this pasty-pudding?"

Well, I knew it. I felt it coming. I look at the copy, and up there in that left-hand corner on the first page, there it says "R,"—for Rannigan.

"Skim off the lemon meringue herein," says Mike, sadly. "Chop the thing down to a page and a half. And kill that reference to the Moonlight Sonata."

HE WALKS away, blowing his nose. It is a moment I never hoped to live through. That Red Rannigan should be rewritten! Why, they will tell you on the Rochester Independent that the Redhead quit cold in 1934 and left half a week's pay that he never came back for, only because a new copyreader took out an exclamation point and changed the Redhead's spelling of one word. And the spelling was wrong, too!

So, I rewrite the Redhead, me who learned everything I know in the hard

"It's a crate of dishes from Father. He wants us to wash them and send them back" TONY BARLOW

"And on the crust, printed on with a fork, it says: 'An apple pie for the apple of my eye.' "

I can stand no more. I sneak out for a double Scotch at Emil's Hospitality Bar and Grill. Mike, the feature editor, and Greeves from the copy desk are there, and Greeves is saying, "I've seen many a fine reporter that it took years to develop sacrificed upon the altar of domestic bliss overnight, and that's what is happening to Rannigan. His copy is getting rancid. That beautiful blonde is hanging that guy by the apron strings."

"WELL," says Mike, "you can't make a silken percy out of a pickled onion.. It's just a typographical error from souse to spouse and back again," he says, "and never the twain shall meet. I'll bet it doesn't last."

But it does last. Two weeks more and it's worse. The old Rannigan punch-in-every-paragraph is not there. His stuff has too much honeysuckle twined between the lines. The dialogue doesn't jig and thumb its nose any more like of old.

Rannigan school and who one time would have been proud to have my byline on the worst piece of copy he ever turned in.

But it has to be done. The cream has got to be squeezed out of the puff. The sweetness has got to be taken out of the light. The moonbeams have got to be removed from the sonata and the sonata has got to be junked. I knock out the story the Rannigan way, the real Rannigan way, the way they have printed Rannigan stories in eleven different cities, including Delbar, Alaska, once, before love reared its head.

It makes the first edition with time to spare, and before the Redhead convoys his derby home to the Moonlight Sonata he looks at the first edition, and there he sees his own story, page one, the way he taught me to write it, but now that he's gorging on poetic apple pies he has forgotten how, himself.

I watch as he reads, praying he will blow up. He doesn't. He comes over and I can't look him in the eye, but he looks me in mine and says, "Nice story, kid. I missed that one by a mile. We're having country sausage for a midnight snack and Angel would lil us."

It breaks my heart.

"Sorry, Red," I say, "b meet a party about this certain matter." And he I go down to Emil's Ho and Grill and imbibe a mi and have a good cry.

With a gas-station map the situation on the follow which is payday, and I ow it this week and can take get a bus as far as South used to know a fellow. there, I ought to be able to time job, anyway, while lo for a new environment in get the past.

The phone rings and the it's for me, and I say int "Yes?" and she says will hold of the Redhead and h her immediately, please. and she says she didn't me way she did to him. It's mistake, she says, and the so sensitive, and he doesn'

I think of what Mike sa only a typographical error to souse.

"Where could he be?" sa

"Where could he be?" I he could be on his way guess, if you haven't seen Whenever nobody has seen lately, he is mad about so is on his way to Arizona."

"Oh!" she says.

"But he never gets the her. "The farthest he e Horizon, Texas."

"Oh!" she says, making sentence long. "Oh!" she s phone goes, "Pop!" like a out.

strong and alive." The last time he said this he had squinted at the sky and added, "Now that the Japs avoid striking us."

It was a thing no one pretended to understand, this peace over the hospital, but now, after twelve days, everyone felt it more than strange.

"Who could have thought peace could be sinister?" Gray was saying at that moment to Sara.

They stood together at the wide window of the laboratory on the second floor, looking across to the hills. It was clear dusk on a late winter's afternoon, this mild winter of Chen-li, which seldom deepened to ice or snow. Across the purple-black of the mountains the wavering firefly lights were climbing upward. The people of Chen-li still had no peace.

"It is beginning to be rumored in the city that the hospital compound is always safe," Sara said. "Have you noticed, the last few days, how full of people the compound is after the first warning?"

"Yes," Gray said shortly. He had seen and he had not liked it. Tonight as he was dressing for one of Louise's little dinner parties the siren had screamed and he threw his topcoat on over shirt and trousers to come at once to the hospital. There was always the chance that the planes might hover over the hospital again. And on the way he had seen figures, indistinct in the darkness, moving to avoid his notice. He caught a group of them with his flashlight and saw a little family—man, woman and two children. They stood immobile, statues in the light.

"WHOM are you seeking?" Gray had asked gently. A sort of tenderness made him always mild now with these people. They suffered daily with such silent patience and who could be angry with them, whatever they did?

"We seek no one," the man said in apology, "only a little safety, Thomison doctor."

"Stay, then, if you find it here," he had replied. He went on, stopping to look at no one else, and had come straight to find Sara, in the laboratory examining slides.

"Why aren't we being bombed," he had asked her.

"I ask you the same question?" she replied. "Shall we take our folk to shelter or not?" Day after day this had to be decided.

"They made such a row about it yesterday," he said reluctantly. "Nobody wanted to go. They all talked about Buddha having come to protect them at last. There's a lot of rot about the air above us being crystallized so that the bombs glance off. They are always ready to believe in miracles."

"Let's risk it tonight," Sara suggested.

The second warning sounded.

"It would be awful if the Japs changed their minds," he said soberly.

"It's a ghastly responsibility," she admitted.

Thus they stood, side by side at the window, staring at the mountains. The minutes sped, one after another, and they did not speak or move, sharing the responsibility between them. The last warning sounded.

"It is too late now," Gray said.

"Yes," she agreed.

"I hope we are blown to bits with the rest if we're wrong," Gray said grimly.

"Yes," Sara said again.

She moved nearer to him, and he put out his hand and found hers and held it hard. Neither put into words the communion that flowed between them. For him it was not like any he had with Louise. Therefore still it was not love. And yet he knew to his alarm that his feeling for Sara was not what it had been. She had become a woman to him. He saw against his will the shape of her tender mouth and the droop of her lids at the corners of her dark blue eyes. How could he see these things when he loved Louise? He put the question away in self-disgust without answering it.

But for Sara this communion was everything and she took it with proud gratitude. Then Gray spoke: "I'm glad I don't have to go through this alone."

She did not answer. The sound of her own voice would break the moment. She wanted only to take from him all that he could give her.

"They are passing," Gray said. He dropped her hand lightly without pressure and threw open the window and leaned out. "Passing us clean, by George!"

He stared at the sky for a long moment and then he shut the window and turned to her, bewildered. "I don't know whether to be glad or sorry," he said slowly.

"Nor I," she said, and put all her sad heart into the secrecy of words. To die with Gray, to live without him, it was a choice she was glad that she did not have to make.

He went away without saying more, frowning as he went and tramping down the hall toward the hospital door. The siren was sounding for safety, and Louise would be expecting him. Her guests might even be there. She had invited four men from the port and usually they came early to avoid the hour of nightly raids.

HE WALKED quickly across the winter-bitten grass, paying no heed to the quiet people who were now leaving the hospital compound. Let them share this inexplicable safety, if it had to be. He was beginning to feel it somehow shameful.

"I've got to get at the bottom of this," he thought angrily, marching up his own steps. It would have to be tomorrow, though, he knew, as he opened the door. A burst of men's voices fell upon his ears and above them like high music he heard Louise's laughter.

. . . . In the low-ceiled living room of the Chinese house Louise was beginning to be able to forget for such hours as these all that she did not want to remember—the hospital, the city lying close between river and mountains, the narrow, crowded streets, the people among whom she was so alien, whose very looks she hated. Yesterday Gray had made her take a walk with him and had stopped for a moment to watch a baby boy just able to walk. The cobbles were wet. The baby slipped and put out his hand to catch at her skirt to save himself a fall. She had drawn back, her instinct quick, and the child had fallen.

"Louise!" Gray had cried, and then he stooped to pick up the sobbing child.

SHE had stood without a word while he dusted off the child's padded garments and then while he led him to a candy vendor's stall and bought him a stick of barley toffee coated with sesame seeds. By then the child's mother had come running out of a small hot-water shop. She knew Gray as everybody seemed to, and she was full of smiles and chatter. Gray had said nothing afterward for a while and then he had asked her outright: "Louise, why did you draw back from a child?"

"Because it was Chinese, I suppose," she said clearly. "I don't need to defend myself," she thought.

"Why do you hate them?" he asked.

"They disgust me," she said coldly. "I can't help it. I can't bear to have them touch me, even the children."

"And I love them," he said slowly. "I admire them and find them brave and full of humor and courage and all that I like people to be."

She did not answer this nor did he say more. But they walked along the Chinese streets very far from each other. And when she got home she had written an impulsive little note to Harry Delafield at the port: "I'm a little low, dear Harry. Bring your men along and have dinner with us tomorrow. We're very safe to dine with these days, you know—thanks to the whimsical enemy. Louise."

She was not quite sure that Gray knew that she and Harry called each other by their first names. There was no reason why they should not, except Harry's English formality.

"Gray won't mind," she had urged him last week, "go on, Harry."

"Hang it, I can't," Harry had said frankly. "It's odd that when we're alone, you and I, I can say 'Louise' as easily as anything. But the m... it sticks in my throat. ... out 'Mrs. Thomison.' I ...

"What?" she asked, l...

The Greatest Refrigerator ever Built... PHILCO Advanced Design

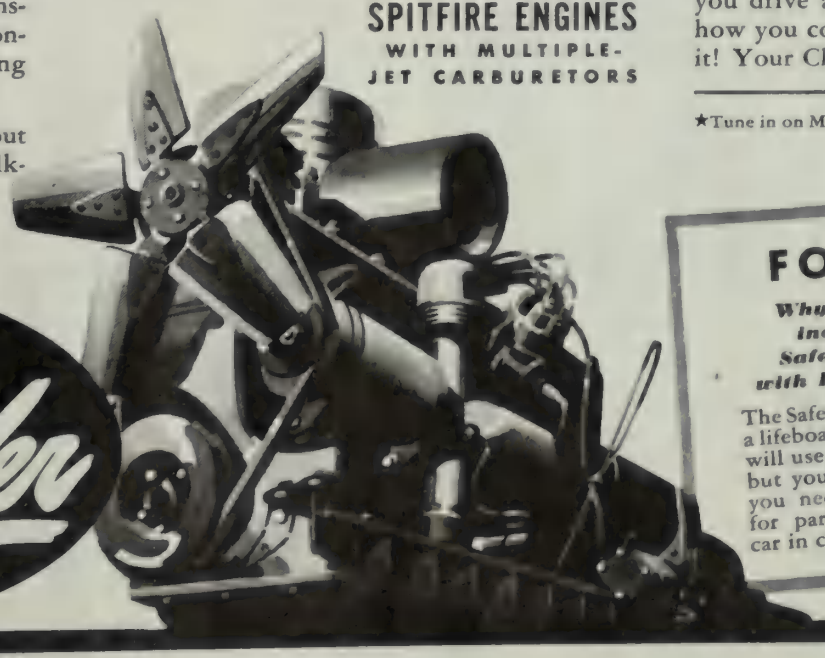
We took a honey of an engine and *ADDED* Fluid Drive!

...try it... See what a difference Fluid Drive makes!

YSLF engineers might have said, "We've ot th greatest engine in history in our pitfir It's got thrills enough for any- But what they did do was to take that -pac d honey of an engine . . . *and add Drive o it!*

y kn w that there is no substitute for *Driv* They knew that the best engine in rld ould be a better engine with *Fluid* . . t t *Fluid Drive* and Vacamatic trans- n co d add factors of smoothness, econ- drivi ; ease and thrills beyond anything uld e put inside an engine.

res is that when people rave about er *Fluid Driving* you know they are talking about more than a great engine . . . they are talking about the greatest combination of *engine and drive* that the motoring world has yet seen.



We don't have to tell you that Chrysler *Fluid Driving* is something different, wonderful, and special. Millions of people are saying that for us. We do suggest, however, that you try it for yourself!

Drive for hours without touching clutch or gearshift. Glide up to traffic lights . . . put on the brake to stop . . . stand still without touching clutch or gear lever . . . then slip away again simply by touching the throttle! See how the Vacamatic transmission gives you the power you want when you want it . . . like the variable-pitch propeller of an airliner.

Don't you owe it to yourself to try this before you drive any new car? Frankly, we don't see how you could possibly buy a new car without it! Your Chrysler dealer invites you!

★Tune in on Major Bowes, CBS, Thursdays, 9 to 10 P. M., E. S. T.

FOR SAFETY!

Why Chrysler includes a Safety Clutch with Fluid Drive!

The Safety Clutch is like a lifeboat on a ship. You will use it very seldom, but you're mighty glad to have it when you need it. A very valuable safeguard for parking . . . for maneuvering your car in close quarters or dangerous places!

"So yesterday we Hung the Mayor!"

1. I was a portrait painter with no portraits to paint. One day I learned that the mayor was in the market to get himself slapped on canvas. I hurried down to City Hall, but the mayor wouldn't sit [illegible] I decided to wait

2. About 6 o'clock, a waiter lugged a tray of dinner into the mayor's office. A terrific howl went up. "Take it away!" bellowed His Honor, and the waiter came running out, looking scared half to death and clutching a yellow pill.

3. "The Mayor never touches coffee!" yelped His Honor's secretary. "He wouldn't sleep a week!" That was my cue. "He should try Sanka Coffee!" I said. "What's that?" shouted the mayor. "Whoever said that, come in here!"

4. "What is Sanka Coffee?" the mayor demanded, as I came in. "And why should I try it?" "Because, Mr. Mayor," said I, "it's delicious coffee . . . and it's 97% caffein-free so it won't keep you awake." "The says it!" he grunted.

5. So I told him: "The Council on Foods of the American Medical Association says 'Sanka Coffee is free from caffein effect and can be used when other coffee has been forbidden.'" He was impressed. "Thanka," he said. "I'll try it!"

6. Next day he phoned me. "You are appointed official portrait painter of this city!" he said. "I drank two cups of Sanka Coffee and never slept better! A lot of officials need their portraits painted . . . Just begin with me!"

SANKA COFFEE

REAL COFFEE . . . 97% CAFFEIN-FREE

Sanka Coffee is real coffee . . . all coffee . . . a blend of choice Central and South American coffees! "Drip" or "regular" grind.

TUNE IN—"WE, THE PEOPLE"—Tuesday evening. See your paper for time and station.

pital and a war going on she would probably forget to brush her hair or powder her nose. There would always be something else. But whether Gray loved her or not, she loved Gray, and if Gray wanted Louise, then Louise must love him. She would pretend nothing except her purpose. She began it simply and directly.

"Gray and I have worked together a long time," she said. "It'll be three years next July."

Louise stared at her, astonished, and did not answer.

"You'll wonder why I've come. It's because I know what a fine doctor he is after all that time. But he's a great deal more than a doctor. He's a human being, and he's a better doctor if he's a happy human being. He isn't happy now."

Between Louise's long, black lashes her golden eyes began to smolder. Still she did not speak. Sara went on:

"You are his happiness, you know. There is only his work and you. He loves his work and you—nothing else."

Louise wrapped her robe about her more closely, tucked her feet under her on the couch and lit a cigarette and blew its smoke from between her pretty lips.

"Do you think it possible you only imagine Gray isn't happy?" she asked. Her voice was so sweet that Sara's heart shivered. Louise looked thoughtfully at her cigarette. "Perhaps it is you who are not happy," she said. She shook back her fluff of hair and smiled. "Poor Sara!" she said distinctly, and thus with so few words opened to the cruel light of her amber eyes Sara's shivering heart. And now she gazed full at it, still smiling.

Sara felt herself ready to flee. She had held her secret as her treasure, never to be uncovered. And now Louise had uncovered it by a few ruthless words and by the gaze of those ruthless, beautiful eyes. Then she rose to battle.

"Don't pity me," she said clearly. "Pity Gray. The only tragic thing in the world is to discover that what one loves is too small. That tragedy I shall never know."

There," she thought in calm triumph. "Let that suffice."

LOUISE'S eyebrows lifted, but her eyes fell. Sara considered those dark lashes. Should she mention the letter or not? She decided not. "Why should I tell you what you know already, since you chose to marry Gray? I have never known a man fit to stand near him. I only hope, for myself, that I can be half as good a colleague in the hospital as he deserves. I am only anxious that nothing," she paused for emphasis upon the word, "that nothing will make him unhappy, no uncertainty anywhere in his life, no lack of loyalty or appreciation from us all."

Louise rose. "Are you trying to tell me something?" she inquired.

Sara leaped up. "Yes! That I hear things about you that I should not hear! And if I hear them, Gray must hear them."

Louise gasped. "Why—why—of all the impudent—"

"See to yourself, then," Sara said sternly. She turned and went out of the room and out of the house. What good had she done, she thought, except to make it now impossible ever to be near Louise again, and so separate herself still farther from Gray?

"But perhaps it will bring her back to him," she thought. She paused in the February sunshine and gazed at a la-mei tree, whose golden buds were opening cups of fragrance upon bare, brown branches. Lao Wang had planted the la-mei for spring and fragrance. Standing there, she drew in deep breaths of that sweetest scent to excuse her agony. But in a few moments she went on again. She had a shrapnel case [illegible] at one o'clock. . . .

In the room Sara had [illegible] ise walked about in [illegible] edged with fear. What [illegible] mean? How much was [illegible] much jealousy and [illegible] course. Sara was mad w[illegible] Sara was foolish about [illegible] frowned. It was certain[illegible] Gray to have a silly wom[illegible] stantly adoring him as [illegible] if he did not care for her.

"We've got to get a[illegible] ridiculous place." Louise [illegible] sat down again on the [illegible] the pillows about her a[illegible] so long that Little Pig [illegible] to peep at her.

"Get out!" Louise sa[illegible] the door in terror.

But she went on thin[illegible] that smoking one ciga[illegible] other, and every now an[illegible] back her flying hair. [illegible] Sara know? What had [illegible] if she herself told Gray [illegible] plained to him that she w[illegible] because she had to, bec[illegible] not endure another raid[illegible] say, couldn't she, that ev[illegible] spared, too? She could [illegible] all right, because Gray [illegible] much. She got up at last.

"I rather think I'll be [illegible] she thought.

She crushed her ciga[illegible] and sauntered into the be[illegible] gan to brush her pretty [illegible] slow strokes, calculated to [illegible]

"I DO want a baby, da[illegible] murmured. It was [illegible] safe, and she laid her hea[illegible] knee. Under the Chinese [illegible] hair shone like carded si[illegible] spun.

She spoke out of the si[illegible] the couch before the fi[illegible] dinner had sat thinking [illegible] and she had wondered on[illegible] what she planned to say.

His astonished face loo[illegible] hers and he was stricken [illegible] ness. "Louise!" he whis[illegible] darling!" He gathered her [illegible] against his shoulder. All [illegible] thought of saying fell into [illegible] he threw them away.

"I've been thinking and [illegible] said restlessly. "I know you [illegible] quite happy, darling—" Sh[illegible] he or did he not know S[illegible] over to see her? Better tal[illegible] even though it was not [illegible] didn't need to have Sara c[illegible] talk to me, darling. I kne[illegible] that I haven't been nice to [illegible]

"Sara?" he inquired. "I [illegible] over here?"

"This morning," Louise [illegible] She lifted her little point[illegible] traced the outline of his lip[illegible] I don't love you enough. E[illegible] all I have, Gray. Maybe it [illegible] big enough for you."

"Did Sara say that?"

"Yes, she did. Gray, an[illegible] anything afterward. I know [illegible] enough for you, Gray. I w[illegible] and strong and capable [illegible] I'm not. I'm just—me."

"I only want you," he sa[illegible] have been angry with Sara [illegible] except that he knew she ha[illegible] to help him.

"Of course I know she s[illegible] you." Louise was saying. [illegible] Gray—terribly. That's wh[illegible] realize."

"She's not in love with [illegible]

"Yes she is, Gray."

"I don't want to know it.

"No, Gray. Don't let's [illegible] her—only you and me. Go[illegible]

"Yes, darling?"

"I have been unhappy."

si ed. "I'm afraid you have,
hea "
it hasn't been just because of
It's en because I haven't known
o g on with what we want. I do
a by, Gray. But how can we
it he? It wouldn't be right—all
omi g!"
did ot answer. He laid her down
s k e again and sat slipping his
's i nd out of her hair as it spread
her ace. Such a lovely, lovely

"
he d not answer. When she did, it
by t smallest of sighs and a ques-
n: " ay!"

"Yes, dear?"

"Sometimes I wish—is there anything I could do at the hospital?"

He answered her with deeper tenderness: "Why don't you come over tomorrow and see, darling?"

"Would you like it, Gray?"

"Love it!"

"It wouldn't bother you to have me around?"

"I'd like you right under my feet." He lifted her to him and under his kisses she murmured in mischief:

"But Sara will be cross."

"Eh?" Gray paused.

"I said, Sara won't like it if I am at the hospital!"

"Hang Sara," Gray answered.

"If you like," she said with laughter and triumph.

SHE was so pretty, he thought, with quivering tenderness—but why did Chung bring her letters? The sharp question clung in his mind like a dart thrown into flesh. But he would not pluck it out—if he did the wound might bleed. And if she loved him—and would she want his child if she did not love him?

At the keyhole Siao Fah put his eye on a level with Little Pig's. When he saw what was going on he said severely, "Do not corrupt yourself with such sights." He whacked Little Pig on the cheek with the wire egg beater and stuffed the keyhole with the end of a dish towel.

ppi. Ben edged closer to the old ser-
eant.
The noon came up, then ducked be-
hind a cloud. Heavy silence fell over the battlefield and Ben nodded. He was awakened by shouts at the upper end of the barricades and ran there. But old Sam just shifted his position and waited. Ben was panting when he returned. "Sarge! We got eight dead men—"

"Knifed in the belly?" Sam switched his chew to his left jaw without missing a beat.

"How'd you know?" Ben said hoarsely.

"The Cradle Boys generally go for the belly. Little fellows and they can't reach high up. Never go for a man's chest, son. Too many bones. How many percussion caps did they get?"

Again Ben asked an explanation of the old man's knowledge, and Sam said slowly, "The Confeds have got Enfields. They got plenty of lead, too, but they are low on percussion caps. So they take ours. Supplies are my job. I told the cap'n to watch out, but he won't pay me no mind."

"The cap'n is mad," Ben said. "He's going to hit 'em about daylight."

"I figured that," Sam said. "He's crazy. But you stay with me and maybe you'll live to plow some corn in Ohio."

THE captain should have waited until the sun was full up and in the Confederates' eyes, but he ordered the charge at dawn. The big Irishmen were laughing and swearing vengeance. The captain went over first, waving his sword and shouting for his men to follow. Sam and Ben climbed out of the barricades, stooped and ran across the field. The Irishmen stood straight as they ran. A blast of grape, canister and rifle fire folded them up.

Sam and Ben crawled back to the barricades. They hadn't fired a shot. Stretchermen began bringing in the dead and Sam shook his head.

"They didn't know how. Now we'll get another company."

Ben was choking from powder smoke

How's your "Pep Appeal"? —by Bundy

Uncle A: Well! Well! Doris. So your *engagement's* going to be announced tonight!
Uncle B: I must say you don't seem very *thrilled* about it!

Uncle A: Looks like a little job for us, Bert. The poor girl's short on "pep appeal."
Uncle B: Right you are, Andy. Maybe she isn't getting all her vitamins. We'll have to take her in hand.

Uncle A: Lucky your mother had some KELLOGG'S PEP in the house, for it's a grand place to start on vitamins. Yessir, PEP is extra-rich in the two vitamins that are least abundant and thus most needed in ordinary diets—vitamins B_1 and D. You start getting all your vitamins and you'll feel like a different girl!

The Girl: *Wait a minute!* Instead of all that talk about vitamins, why didn't you tell me how *good* PEP is? Wow! This tastes grand!

The Girl: See you later, and thanks a million for that tip about vitamins and KELLOGG'S PEP. You just watch what a different girl I'm going to be.

The Uncles (in unison): Where there's pep there's hope!

Vitamins for pep! *Kellogg's* Pep for vitamins!

Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

"Tough Take-offs are easy with COOL SHAVES!"

● "I know many a fellow who takes up a crate with gusto, but takes up a razor with qualms. To such unhappy men I say, 'Bail out from shaves that sting and burn!' Drop into any druggist's for Ingram's cooling, soothing shaving cream.

● "At the first touch of this different shaving cream you zoom to shaving satisfaction. A quick cloud of cooling lather covers your face in split seconds—helps condition your skin for shaving as it wilts your wiry whiskers.

● "*Contact!* You shave with a freer hand—smoothly as a glide to a 3-point landing. And with minutes shaved off your usual shaving time, you're down to earth *refreshed*—ready for breakfast and business or dinner and dance.

● "Yes, Ingram's de luxe lather is a facial refresher. It saves you the expense of lotions and tonics. For Ingram's leaves your face cool and smooth and young-looking, and it stays that way for hours. Get a tube or jar of cooling Ingram's—concentrated for economy—today!"

INGRAM'S
SHAVING CREAM

and indignation. "I'm beginning to see what you mean."

Sam fixed coffee and watched the sun come up. The company counted fifty dead, including the captain.

CAPTAIN ALEXANDER XERXES TROWBRIDGE was glad the clouds of powder smoke had lifted from the field. The smell of battle gone, he could enjoy the savory odors of Henry's cooking. Henry was a genius. A Louisiana Creole, he could take a dash of this and a pinch of that and make even horse meat taste good and smell better.

The little captain rubbed his grimy hand across his fuzzy face. He wished he could grow a beard. A beard would make him look older than his eighteen years. He wore high-heeled boots and they made him taller than most of the soldiers in his Cradle Company. He wished his men would call him captain instead of Ax. The nickname wasn't dignified. He hated his full name, but was stuck with it. It was his father's idea. He had named his son "from A to X." So everybody called him Ax. He was a proud boy, even vain at times as any competent young un is apt to be. Little fellows often are cocky.

Henry fetched his rations and Ax nodded toward a tunnel that led from his ditch down the slope toward the Yanks. The Creole disappeared into the tunnel and soon a swarm of boys poured out of the hole. It was high noon and hot. The Cradle Boys were caked with clay.

"Almost through, Ax," one of the boys said and began eating.

"We'll set it off tomorrow," Ax said.

"It'll shake this ditch up, too."

"We won't be here," Ax said. "As soon as she goes off Featherston's Mississippians up in the next bastion will charge down here. They'll take care of the Yanks. What's left of 'em."

"Where we going?" Henry asked.

"We're slipping out tonight," Ax said. "Going to Johnston, over in central Mississippi."

"Reckon Johnston will make it?"

"Don't know," Ax said. "But if he don't jump Grant from the rear and make him lift this siege, Vicksburg's a goner."

OLD SAM watched the new men move in, each ten paces from the other. They were armed with Belgian guns and kept the muzzles toward the ground. They were tricky muskets. No man spoke and none disturbed the dust. The sergeant nudged Ben. "Look at 'em, son. Them's soldiers."

The replacements slipped off their packs, propped their guns on the firing steps, and soon most of them were dozing. The company sergeant, his jacket open and his beard caked with dirt, ambled up to Sam. "Being the supply sergeant," he growled, "you wouldn't have any tobacco now, would you?"

"Being a ninny, you'd ask that," Sam said.

"We're the 17th Missouri, Woods' Brigade."

Ben noticed that the old man's eyes brightened, but Sam said, "You ain't bragging about it, I hope?"

The Missourian said, "We ain't got no tobacco. Who's up there?" He jerked his head toward Ax's ditch.

"The Cradle Company's up there, Mister Man," Sam said. "If you don't believe it, poke your head up."

The Missourian's eyes narrowed. "This is a hell of a war. No tobacco, no nothing. Then they put us against a swarm of yellow jackets. Tell those Rebs we're swapping."

"Whatcha got?" Sam asked.

"Plenty of salt and coffee. We need tobacco and sugar." He scowled at Sam. "You sure it's the Cradle Boys? I heard they were in Virginia."

"Whistle 'em up for yourself then," Sam growled.

"I aim to." The Missourian shouted up the slope, "Hey, Reb."

The Confederates replied and the Yank yelled, "We're from Missouri."

"Know'd it." It was Ax's voice. "You smell som'n like your mules, only worse."

The Missourian turned to Sam: "It's them all right. I ain't seen 'em since Tennessee. They know how. One of 'em traded me a plug of wormy tobacco and then gave me this to boot." He pointed to a scar on his chest. "Well, we're swapping. I'll round up some coffee and salt."

"How 'bout your cap'n?" Sam asked.

"He won't say nothing. He knows how."

SAM spoke to the Confederates again and told them to meet him halfway with swapping goods. Then he and Ben climbed out of the barricades and Ax and Henry walked out of their lines. They exchanged greetings and Sam and Ax began bargaining, a cup of salt for two pounds of tobacco, a handful of coffee beans for a handful of sugar. The deal completed, Ax looked at Ben and said, "You're little enough to be with us. We feed mighty well."

"I'm an American," Ben said hotly.

Sam gripped the boy's shoulder to silence him. Ax's lips formed into a tight line and he said coldly, "What the hell do you think we are? Immigrant bounty boys?"

"He don't mean no harm, Cap'n," Sam said. "He's a good boy. And he's learning how fast."

Ax smiled tolerantly at Ben. "No hard feelings, Yank. How old are you?"

"Twenty," said Ben. For some strange reason he liked the little captain.

"You're too young to be in this war," Ax said. "I hope you don't get hurt. Take care of yourself."

Ben was mighty proud as they walked back to their lines, but Sam was worried. It wasn't like Ax to come out and swap with a sergeant. He usually sent his own supply sergeant.

Sam distributed the tobacco and the Missouri sergeant bit into a plug, a smile of contentment on his face. Suddenly he cursed softly, jerked his plug from his pocket and examined it. "Grit," he muttered and turned to Sam [illegible] planation. The old man sn[illegible] plug from his hand and looke[illegible] fully. He reached for his own [illegible] collected the others he had fe[illegible] men gathered around him [illegible] gaze wandered from one fa[illegible] other, thence up the slope t[illegible] enemy. "Get the cap'n," he [illegible] "Quick." All the blood had dr[illegible] Sam's face. The Missourians [illegible] hold their breath. "It's clay, [illegible] There was awe in Sam's voi[illegible] trace of fear. "It must've co[illegible] Confed's hands."

Ben didn't understand and [illegible] a sinking feeling in the pit of [illegible] ach. He ran for the captain [illegible] they returned Sam was gone.

"He's out yonder in a little [illegible] Missouri sergeant explaine[illegible] gled out like a snake."

The men spoke in whispers [illegible] slipped back over the top of [illegible] cades and dived to the bott[illegible] trench. The men stood to, [illegible] shots, but none came. The[illegible] hadn't seen him.

"Well?" the captain demar[illegible]

"They're digging all rigl[illegible] brushed off his clothes. "I h[illegible] They're almost under us."

Then Ben understood and hi[illegible] squirmed into a knot.

"They probably got a wag[illegible] powder down there by now," t[illegible] said. "Careless of 'em to leave[illegible] on their tobacco, though. That[illegible] little Ax. Well, men," he faced[illegible] pany, "we are safe as long as[illegible] in their trench. They'll set off [illegible] tomorrow. Then the second[illegible] there will charge us. But we'[illegible] Cradle Boys. When they le[illegible] trench, we'll leave this one. [illegible] some rest."

Ben leaned weakly against [illegible] of the embankment. "We goi[illegible] here with all that powder und[illegible]

"Ain't nowhere to go, son,"

AX ENJOYED the aroma o[illegible] coffee several minutes b[illegible] sipped it, and then he spat i[illegible] "Corn!" He shook his fist to[illegible] Yankee line. "The double-cros[illegible] gers. Rustle me a chew, Henr[illegible] get rid of this parched corn ta[illegible]

"Is this the place that wanted the sawdust?" CHARLES P[illegible]ON

What's farming got to do with life insurance?

MORE THAN **30,000,000** people live today on American farms.

The farm lands, buildings, implements, and livestock are said to be valued at over 43 billion dollars . . or more than 10 times the total investment of the entire American steel industry. Gross annual farm income is estimated at over 10 billion dollars . . or more than 3 times the total value of all the automobiles and trucks produced in this country in 1940.

What has all this to do with life insurance? Simply this . . .

The money which a life insurance company invests for the benefit of its policyholders must be invested safely in sound, permanent securities. Farming is still America's largest single enterprise, feeding a nation and supplying a substantial portion of the raw materials used by industry. Farmers also constitute a major market for industrial products.

Because of these and other factors, first mortgages on fertile farm lands are a sound investment for life insurance companies.

Metropolitan today has over 81 million dollars invested for the benefit of its policyholders in about 13,000 farm mortgages.

These mortgages are selected with extreme care by Metropolitan's Farm Loan Division. This division consists of about 550 employees, including land appraisers, financial experts, agricultural specialists, and others.

Of course, even the best farmer's efforts can be offset by economic conditions over which he has no control. For example, in 1921 American farmers experienced a severe recession of prices and, before agriculture recovered from this, the depression of the 1930's set in.

Naturally, in such periods of economic stress, it is inevitable that some farmers are unable to meet their mortgage obligations. In these cases, Metropolitan has been very reluctant to exercise its legal right to foreclose, and does so only when forced to do so for the protection of its policyholders.

When foreclosure cannot be avoided, Metropolitan seeks to rehabilitate the farm and to sell it to a "dirt farmer." In 1940, Metropolitan sold 1,164 of its Opportunity Farms. Of this number, 1,061 were bought by farmers, 726 of whom were tenant farmers who are now becoming farm owners under the Company's special tenant purchase plan.

As a result of its farm loan policies, Metropolitan has been credited by agricultural authorities with having made substantial contributions to better farming methods and to the general welfare of America's farming population.

Metropolitan Life Insurance Company

(A MUTUAL COMPANY)

Frederick H. Ecker, CHAIRMAN OF THE BOARD

Leroy A. Lincoln, PRESIDENT

1 MADISON AVENUE, NEW YORK, N. Y.

"I want to help you 24 hours a day, the same as your telephone"

Where is the nearest plumber? Does that automobile service station stay open all night? Who is the authorized service man for my refrigerator?

For helpful answers to these and thousands of other questions, just look in the Classified Section of your Telephone Directory.

"I always turn to your 'yellow pages' when I want to know Where to Buy It"

he put it in his mouth and jumped to his feet. Quickly he called his men about him, even those in the tunnel. He looked at their hands

"You popeyed bunch of ninnies." Ax's tone was as sharp and biting as steel. "You gave Henry your tobacco to swap without getting the clay off your hands. Now the Yanks know what we're up to."

The men's jaws sagged and they said, "Oh," almost in unison. They had been fighting too long to underestimate the Yankee regulars. Ax's tongue lashed them until he was breathless and sent them back to their job. He'd think of something

All afternoon he sat in the trench, his back to the wall, his short, little legs doubled up almost to his chin. He knew the Yanks would stay in their trench as long as he stayed in his, but he couldn't stay put long after the fuse was lit. "Missourians," he muttered. "Tough as their mules and just as sharp." He glanced up quickly at the setting sun and his face brightened. He even laughed and Henry sighed in relief. Everything was all right. The little captain had laughed.

"Henry." Ax stood and stretched. "See that the sentry carries a lantern when he paces this trench tonight. I want the Yanks to see the reflection. I want 'em to know we are still here."

The little captain was jaunty again. Even cocky. He walked away toward the supply train. He didn't have to stoop in the trench. And as he swaggered, he hummed softly:

"Here's to the lads of Tennessee,
The bravest in the land.
Half hoss and half alligator,
'Ygod, and half man."

He sent word back up to Featherston that he'd run a long, slow-burning fuse to the mine and for Featherston to light it at daybreak.

PORTER'S boats began pounding from the river and the ruins of Vicksburg were silhouetted in the red glow. The Confederates' big guns boomed their answer and the earth trembled and rumbled. The yell of Cockerell's brigade sounded above the tumult as they threw themselves against McPherson's 17th Corps, trying to cut a path. If they could slash a wedge through the Yankee lines, most of them could get out and Johnston could widen the hole and roll the invaders up. Once near Graveyard Bastion, Grant and Sherman met at headquarters, drank raw whisky and laid more plans to tighten their vise.

Grant instructed his commanders to synchronize their watches before next day's attack. Foreigners, attached to Grant's staff as observers, scoffed. Americans would never understand the fine art of war. They'd never know how. They fought in trenches like moles. Some fool had used a submarine. The Yankees were using observation balloons. The Southerners were using breech-loading guns. Both sides were using ironclads, wholesale espionage and were reviving the Trojan horse methods of the ancient Greeks. Germans, French and British ridiculed such tactics.

Old Sam flattened himself against the bastion and watched the reflection of the sentry's light as it bobbed up and down the Confederate trench while the guard paced his beat.

"I don't like it," he said to Ben. "It ain't sensible. Little Ax is up to som'n."

"How you figure that?"

Sam said, "I can understand the Confeds showing a light while those bounty boys were here. Showed how little they thought of the Irishers. But they know we got soldiers in here now. That light proves Little Ax wants us to know he's still in his trench. He wants us to stay here."

The moon stayed behind clouds most of the night and then began waning. A breeze swept in from the river and mist rolled up. The captain paced his line, pausing often to talk with his men. He stopped beside Ben and Sam and they all watched the light, moving up and down and to and fro.

"They are still in there," the captain said.

Ben shut his eyes tight and opened them quickly to clear his vision, and he peered through the mist. He felt that something was wrong, but he hesitated to speak. They'd think he was a fool. Finally, he decided to chance it and addressed Sam:

"Sarge, are you sure every man in that Cradle Company is little?"

"Runts, son. Ain't they, Cap'n?"

"That's right," the captain said. "'Bout knee-high to a June bug."

"All right," Ben said. "Look at that light. Watch it bob. A long-legged man is carrying that lantern—"

The captain wheeled on Sam. "He's right. We're getting out."

He gave orders in monosyllables. The men adjusted their bayonets. A few felt for their Bowie knives. "Don't shoot 'less you have to," the captain said. "Use steel. The second trench mustn't know what we're up to. Get out low."

The men wiggled out of the barricades and crawled across the field, hidden by mist and darkness. There wasn't a sound in the first trench and the men stood on its brink for a second, then jumped in, knives drawn, bayonets ready.

The trench was deserted except for an old Missouri mule that wandered back and forth, a lantern dangling from its neck. Somebody snickered and reached for the light. The captain stopped him. "Leave it be!" he ordered. "The men in the next trench are watching that light." He groped around until he found the mouth of the tunnel. Ben dived for it, but Sam grabbed him.

"Hold on, son. You saved this company once and I want you to live to grow corn in Ohio."

The captain addressed his men in whispers. "The Cradle Boys slipped out. I don't know when that mine is going off, or how. Probably pretty quick, 'cause it's coming daylight. Soon as she goes off, the Confeds'll charge. They'll expect us to be down near the crater. Stand to. We'll get shook up, but we'll fool 'em."

The men grumbled and swore, but they stood to. They tried to flatten themselves against the far side of the trench. Sam nudged Ben. "That's what I mean by knowing how. It don't make no difference how brave you are, you got to soldier a long time before you can stay hitched at a time like this."

Ben's tongue was stuck t
of his mouth. He tried to b

ely, and without reasons that
actly define, Harridan wanted
sed.
e bill was being considered
House, Harridan sat one eve-
a's living room, with the big,
Paul Kenneth, who was Al-
ord. (That is, he owned the
at housed her shop.) Ken-
friend, Edith Holt, who
Alma's girl friend and who
a bookkeeper in one of the
es in Washington, made a
ey were much together, these
es. Edith was unmarried,
and a little stout. For the
they got along well and en-
another's company but some-
idan felt in Kenneth a thinly veiled contempt for all politicians and he resented it.

"The real ax grinders, if anyone wants my opinion, are on the side of the passage of the bill," Kenneth stated. "Those are the ones who hope to milk the government. They don't even understand what it's all about or where it is leading."

"I disagree with you," said Harridan definitely. Alma liked Harridan to be pleasant to Kenneth, for sometimes she was a little slow with her rent, in the off seasons, and her attitude to him was always a little propitiating. But Harridan spoke now with annoyance. "I am convinced," he pronounced, and was surprised to find himself with a full-grown conviction on his hands, "I am convinced that the men who are leading the opposition are only a front for sinister influences."

"Nuts!" said Kenneth rudely. Alma laughed. She winked at Harridan, who was wishing he had not stated his position in quite such fancy language.

"What's the difference?" Alma said amiably. "I'm sure it makes no never-mind to me whether they pass it or whether they don't. As long as Washington is filled with girls who want to buy their winter coats on the budget plan I can survive."

"It might make considerable difference to you," Kenneth told her. "All this expenditure may bring on a depression that will wreck you along with everyone else."

"Have some more beer," she answered; "I've been through one depression. I can survive another. As long as I have Cashy to look after me, I'm not going to worry."

"There are worse things than depressions," Harridan told Kenneth, "and subjugation is one of them." His anger burned brightly and he hardly knew what to do with it. He felt a sharp contempt for himself and the others. What was he doing with these stupid people? What did they know about major legislation? What, in fact, did he know about it himself?

Kenneth and Edith departed shortly afterward and Alma said pleadingly, "Please don't quarrel with Kenneth, Cashy. Don't talk politics with him."

"I'm willing to leave politics out of the talk," Harridan said, "but I don't intend to have Paul Kenneth tell me how to vote. He's nothing but a fat dumbbell and his views are purely selfish and mercenary."

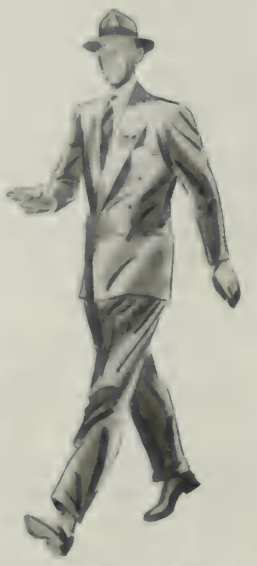
They sat in a little silence and then Alma rose and went to perch herself on Harridan's knees.

"Let's not quarrel, Cashy. I just want you to be smart. You know Paul has some big connections. He knows more about politics than you think. I couldn't bear it if you made a mistake, if you did something that kept you from coming back to Washington. Because I'm so crazy about my baby!"

"Skip it," Harridan told her. He put his arm around her and kissed her. This was becoming a dreary affair, he thought. It was about time to end it. He saw, for the first time, how his absorption in her had weakened all his other associations in Washington, and that he was more dependent on her than he liked to acknowledge. Here was more than habit, more than a crude emotion. There was a measure of genuine affection between them. It popped into his mind that tomorrow he would read the whole Blake-Overly Bill with care, every word of it, a matter he had not done.

Walking back to his hotel he was thinking again in a thin, angry vein that was unlike him. It was all very well, he told himself, for people who had no sons to take an indifferent attitude toward legislation affecting the national welfare. They had no stake in affairs. Their own small interests were the beginning and end of things. But he had sons! He would rather they loved and served their country than any other thing. He had served in the first World War. It was not his fault that he had never got overseas. He was as much a veteran as those that fought in France.

HARRIDAN could not go to sleep in his small hotel room. He got up and turned on the light and an awakening curiosity made him rummage through his desk for the last snapshot picture of his sons which his wife Mary had sent to him. He had glanced at it carelessly and laid it aside. Now he wanted to look at them and he sat studying their faces.



They were getting to be big boys, he reflected. The older two were in high school. He felt sentimental toward them. This bill would affect them directly. He wondered what they thought about it. He had a notion to write and ask them but the impulse died a-borning. He had always planned vaguely that when they were older he would quit taking risks. Certainly they were old enough now so that he ought to begin to consider the possible effect of a scandal on their characters and future. But he was not really afraid of any scandal. What he had done was no more than an everyday affair among men he knew and his sons need never know of it. More important than that, and what he did not face then, was a reluctance on his part to lose the esteem in which he was sure they held him.

Suddenly he was tired and sad. But to himself he said only that he was blue, a condition that might arise from a number of external causes. He put out the light and went to bed. Tomorrow he would read the bill, go to the House and consult with the men from his own state. But he had already resolved that he would vote for the Blake-Overly Bill.

In the morning Harridan felt headachy and bilious. The coffee shop in the hotel was small and lighted by artificial light at nine in the morning. He was tempted to go into the bar but decided against it. He sat over his third cup of

MAJOR—another authentic Walk-Over military style. "Marching" sole that rocks you into a swinging stride. Weatherproof brown calf. Flexible oiled soles. $8.50.

coffee, reading the paper swiftly and skillfully. Someone came and stood beside him and spoke his name and he glanced up into the face of the congressman who was leader from his own state, a man old and gray in public service.

"Sit down, Dennis, and have a cup of coffee with me," said Harridan eagerly.

Dennis smiled and sat down and the colored boy brought a fresh pot of coffee and an extra cup to the table.

"Are you going to the House today?" Dennis asked.

"Yes," said Harridan. "I want to hear the debate."

"Do you know how you're going to vote?" the other asked. It was an invitation to be asked for advice. But Harridan answered contrary to rule.

"Yes," he said. "I'm not sure about the amendments. To tell you the truth I haven't had time to study them carefully. But I want to vote for the bill. I'm in favor of the principle."

"I doubt if it will pass," the other answered, and Harridan was suddenly awake and surprised. He had voted according to instructions from Dennis for a long time.

"What do you mean?" he asked. "The Senate has approved it. It ought to pass easily in the House."

"Some of the boys are changing their minds—afraid of it," said Dennis.

"Not me," said Harridan. "I'm for the bill. I'm going to vote for it."

DENNIS drank his coffee. He seemed indifferent, unimpressed with Harridan's statement. He spoke of other things and they rose together. Harridan paid for the other's coffee and his own breakfast and they stopped together for a moment at the cigar stand.

"Think it over," Dennis said mildly. "Most of the boys from home are against the bill. The people back home don't like it. Better vote with the gang."

"No," said Harridan, and was surprised at himself, "I'm going to vote for it."

Dennis hesitated, then shrugged and went on out. Harridan went to his office and asked his secretary to get a copy of the bill and the proposed amendments and he read it through. He could not concentrate on the exact wording. He knew what the bill was about. Anyhow, his mind was made up, he thought stubbornly. He was not going to be pushed around.

His anger persisted. There was a letter from his wife in the mail and he read it with as much annoyance as though it were a dun from a tradesman. She was making some alterations in the house, she wrote, and would like some extra money.

Harridan looked at the balance in his checkbook and wrote a check and enclosed it with a note. He was in a hurry, he said. The debate in the House over the impending bill would begin at eleven.

THE House was crowded and the galleries were full. He sat listening, and his mind wandered. He really did not hear much that was said but certain impressions were vivid. The attack on the bill, he saw, was well organized and strong. The strength and character of the opposition surprised him. Cynical as he was, he could not question the motives of some of the opponents. Some were born hams, grandstanders, he thought contemptuously. And some were only fools. His own conviction grew. When the House recessed for the day he found his way to Congressman Blake, who had spoken for the bill, and congratulated him. The other thanked him, seemed a little surprised.

"I didn't expect to find you on our side, Harridan," he said, "but I'm glad of it. We need every vote." They stood talking together. Harridan felt as though he were standing in a river with diverse currents pulling at him. He knew he could not afford to linger here with Blake, and it struck him forcibly that he actually knew little that went on in the House. He wished suddenly that he had been more active, made more friends. It might have been smart to have brought his family here, established himself with more care. He was an outsider. He had always known it, but he had not faced it before. Now he felt that Blake had little real confidence in his support.

Newspapermen were crowding around Blake, elbowing Harridan aside. Flashlight bulbs exploded in his face. He went out. It was dinnertime. He did not want to see Alma particularly but habit was strong. He found her in the little office of her closed shop. She unlocked the door for him and he went back into the small, lighted cubicle with her.

"I'm glad you came," she said. "I've been thinking about you all day, and I want to talk to you . . . about something important."

"What's on your mind?" Harridan asked, watching her and smiling. She was seldom serious. She opened a desk drawer and took out some pictures and showed them to him. He looked at them indifferently. He had seen them before. They were snapshots that had been taken on a trip down the Potomac a couple of months ago. There was Paul Kenneth and Edith and himself and Alma, in foolish poses. In one of them Alma was sitting on his lap, drinking from a bottle he held for her. They were silly pictures, he thought. Kid stuff! And he laid them down.

Alma's voice was hoarse when she spread the pictures out: "Kenneth has all of these. He had them enlarged with the names and dates on all of them. There are half a dozen packages of these pictures to be sent to your wife and your sons and the opposition newspapers in your district. That day we went down the river, you remember, was the day the vote was taken on the power bill and you weren't there."

So it was as simple as that—like a cheap movie. There was nothing to it. He looked at Alma and she made a little distressed sound.

"So I'm to vote against the Blake-Overly Bill," he said. She nodded miserably.

"If I vote against it—these packages will not be mailed," he said.

"Cashy," she implored him, "I had nothing to do with it. I had no idea. I swear I didn't. It's as bad for me as it is for you." Her thin lips trembled and she said suddenly, "Tell me what it means. I don't understand it."

He was moved. A genuine emotion stirred him with neither words nor phrases to describe it. He believed her, that she had not plotted against him. He answered her and if his words were grandiose he could not help it. He had no other words.

"It's a matter of patriotism," he said. "I think the bill should be passed. I think the strength behind the opposition is inimical to our country."

"But some of those who are against it"—she said, almost pleadingly—"oh, I don't understand politics!"

"Some of them are all right," he said. "But I'm convinced they are being used. And those that can't be used can always be blackmailed. I'm convinced the bill should be passed. I know what I should do. Hell, if it were a matter of the pork barrel—if it were a matter of someone's pet project, I wouldn't care. I'm not so nice. But this—" he stopped.

He was very angry. And he felt helpless, caught and impaled. A picture from long ago flashed into his mind of his oldest son sitting on a small red chair with a picture book spread on his knees. He had no idea when this had been or how, but he remembered it suddenly. The grave, absorbed, round face, the dark hair, the fat, small hand on the open page. He felt as though he had never seen his son before, as though he would never see him again.

"I'm hooked!" he cried. "I can't do a thing!"

"I'd try to get the pictures back from Kenneth if I could. But he hasn't even got them. Someone else has them. Cashy, you'll just have to do what they tell you—not only for my sake—"

"If I do this," he told her bluntly, "it won't be for your sake. But don't say anything more—I've got to get out. I've got to think. But there's one thing you and your friends forget. They say here in Washington that every man has his price. It's just as true that even a rogue has a sticking point."

She caught hold of him as he started for the door, but he broke her hands away and went out. He didn't want to see her again. The moment, of nearness, had sion, of nearness, had doubted now the sincerity Did she actually think he his vote to protect her in But she didn't know wh about and she didn't care. was nothing he could do.

He knew enough about to know that no one would more to him. He would no or Paul or Edith. He had to, no one to whom he c He thought of Blake, but I have time or patience to li story. He had only one th that was go into the Hous of the vote and vote again

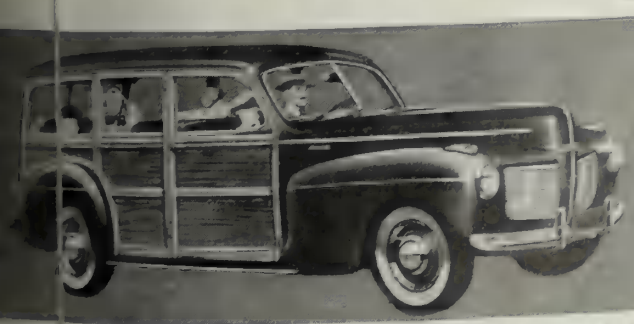
Why Mercury Gets Out In Front And Stays There!

MERCURY gets away fast and stays out front because it has more ... per pound than most other cars. Our engineers applied ...s learned from aviation to make Mercury not only a *new* but *...ferent* kind of car. Like the alert and nimble deer, Mercury ha... superfluous weight but a big reserve of live power always at in...nt command. And Mercury combines this power with rugged st...ngth, stamina, economy and size unusual in so fleet a car.



MORE RUBBER ON THE ROAD—Mercury's new larger tires with wider tread put more rubber on the road for added grip in starting and stopping—greater stability on curves.

MORE ROOM—Wherever extra size contributes to comfort, Mercury is big. More head, leg and seat room enables passengers to relax and rest in perfect comfort as they ride.

SMART W STATION WAGON is a brand-new Mercury body type this year. ...nt end ...d driver's compartment follow the sedan styling. Body is hand-...de of se...cted maple and birch. Choice of tan, blue or red hand-buffed ...ther upholstery. Large luggage capacity. White sidewall tires are extra.

There's A Magnet In The Mercury!

MERCURY has attracted more than 175,000 new owners in just a little over two years. No single "super" feature accounts for this record growth in popularity. Mercury is just a well-built, modern car that we think gives you your money's worth! The Mercury V-8 power plant is about as fine an engine as you'd ever want. And the smooth, easy ride on long, slow-motion springs reaches a new high in motoring comfort. By all means drive a Mercury soon and make sure it is or isn't the car for you. You spend a lot of time in an automobile, and we think the extra comfort and pride of ownership you get in a Mercury is well worth the little more you pay over lowest-priced cars.

plane," he told the clerk. "If I'm still at the House can you give her a room adjoining mine and make her comfortable?"

"Yes, Mr. Harridan—we certainly shall." He went to his office and then to the House.

He had decided by then what he would do. He would tell his wife about his stomach trouble and tell her he had become concerned and wanted to go into a hospital for examination. He would let her think he was apprehensive of some malignancy. That way he might avoid the whole matter of the vote. It was a poor excuse but one she would accept. He roused from his own grinding thoughts, which were going over and over what he would say to her, to hear Blake speaking. It was not the customary oratory. He was speaking against an amendment that would defeat the purpose of the bill and he spoke coldly and concisely. The amendment was defeated and the House adjourned. Harridan voted with Blake. This didn't matter, he knew. Tomorrow would be the test. Well, he wouldn't be here. He went dragging back to his hotel, actually ill by now.

The clerk told him his wife had arrived and the elevator shot him up to his floor. He put his key in the lock of his own rooms and opened the door. The door between the rooms was open. His wife was sitting by the window in his room looking out into the street. Her hair was smooth and she wore a neat dark dress. She looked so respectable that she startled him. She turned and smiled a little.

"Well, Cassius!" she said. "I thought I'd find you ill!"

He closed the door and took off his hat and put it on the dresser. He went over to her and stooped and kissed her and was sensitive to the fact that she turned her cheek to the caress. How in the name of everything crazy, he asked himself, had he ever thought he could talk to her?

"The truth of the matter is," he said, sitting down on the bed, "that I've not been well. I guess it isn't as serious as I thought but I was in a lot of pain last night and thought perhaps I'd better go to the hospital for a checkup and that you ought to be here. Today I feel a little better."

HE FELT that she was studying him and he remembered that he hadn't slept, hadn't shaved, hadn't had a drink—he must look pretty tough.

"I'm sorry," she said quietly. "What seems to be the matter with you, Cassius?" He grinned a little crookedly.

He started to say to her, "It's my stomach," but he said, instead, "It's my country." He stopped, startled. His face flushed scarlet and he said at once, "I mean, it's my stomach."

But she sat there quietly. There were still the wide, gray eyes with shining, clean glasses over them. There was something very young about her—young and countrified, he thought. In her plain dress she looked younger than Alma and that was strange, for she was at least ten years older and she lacked the style and trimness of the other.

She said slowly, "What is the matter with the country, Cassius?"

"It was only a slip of the tongue," he began, but she shook her head.

"No. You must tell me why you sent for me. Is it because of the Blake-Overly Bill?"

"Yes," he said, too weak to struggle against her persistence and longing suddenly to tell someone whose interests were at least identified with his own. "I want to vote for it. And I can't."

"Why can't you, Husband?" she said. She used the word, he knew, deliberately. It was a strange old word, formal and deeply signific[ant]. He felt himself trembling. [I'm] all to pieces and he had [no right] was not entitled to burde[n her] forfeited his claim upo[n] standing or sympathy. Bl[ame] her. "Because I've sold [myself] for a mess of pottage and [now] want to do. I'm in one h[ell]

"Begin at the beginn[ing]" and tell me about it."

Of course he didn't be[gin] ginning and of course he [told] all about it. He had to s[ave] ings and his own prestige [and] he told her a somewhat [exaggerated] about getting lonely at the [office] on a jaunt with some peo[ple] ing a few drinks and tak[ing] pictures. He felt that sh[e] than he told her, but she [let] he had finished.

"So you see I have to [go] boys," he said.

SHE sat very still. She [looked] down into the street a[gain] for her to say something. [Finally] sighed and pressed her h[and]

"I don't know what you [should] she told him in some a[nswer]. course, Cassius. It isn't t[he] morrow that you have a[ll] make. You made it long [ago] made it a hundred, a tho[usand] Now I don't know whether [it's a] choice. It's too much to as[k] it easy for you now—to te[ll] the way you're told and m[ake] all right about it. Or to tel[l] the way you want to and [decide] for you. Is that what yo[u] "I don't know what I [should] answered slowly. "I thoug[ht] know."

"Hasn't it ever occurred [to] I might be waiting until th[ey're] grown—to leave you? I [would] sooner, if it were best for t[hem]."

Harridan felt deserted. H[is eyes] with tears. But he only sa[id] your country, too."

"But I am not a member [of] she answered. "The respo[nsibility] mine. You must decide it."

Harridan got up and took [off] "I'll shave and wash up [and] out to dinner," he said, and [went] the bathroom. When he c[ame] said quietly: "I think I'll [go] back, Cassius. There's a p[lane] that I can catch—unless yo[u're] going to the hospital."

"Not now," he told her. "[I'll] home and go to the hospital [when] through here." He didn't k[now] say to her.

She said, "If you decide [to go] with this—I can see to it t[hat] receive no pictures sent to [you] what they see in the papers. [Maybe] But, perhaps, the papers w[on't] them, even if they got [it] all—"

"Perhaps not," he said. H[e will] take her to some nice rest[aurant] accountably he wanted to t[alk] her. She looked so clean, [so] tionably a man's own wife. [She] anxious only to get away f[rom] saw. And he saw that she [could] commit herself or advise [him] all, he thought bitterly, b[ut] ported her for twenty year[s] not refused to wear his nam[e] the money he sent her. He [was] nant. Yet he was helpless. [She] already gone away from him.

They had a hurried sand[wich] coffee shop and rode to the [station] taxi and he put her on the [train] stooped, with some malice [in] her cheek before he left her [and] a meaningless gesture. He co[uld] wishing that she had urged [him] what his common sense comm[anded] wished she had wept a little

ced a quarrel with him. ad Alma here and Mary he had no one. He went en he got back to the ho- y and purposefully got

on his way to the House and had another drink. He took his seat and sat with his hand shading his eyes and listened.

The session dragged on and on and it began to look as though the vote would be postponed. Harridan heard nothing. He was scarcely thinking. He was drifting on some inner current in his mind. He was again a boy at home with his mother and father. He was playing games in school, he was going to college, into the Army, back into the law. He was married and living in a six-room frame house. He was running for Congress.

He and his generation and the generation before them—and the generation before that—never, in old times or new, never had there been a world like the world they had lived in. Never had there been a land like theirs. What if his sons lost him—and had their country left? He thought of politicians in other lands and their sons. Suddenly he realized that the roll was being called and he heard his name. He rose and stood at his desk.

"Aye!" he said in a loud, clear voice, and sat down again.

He would never see any of them again. He would never sit in this assembly again. But he didn't care. He was proud, proud, and tears of pride were in his eyes. He only wished that he could get away, out in the country somewhere. He was going all to pieces. He wanted only to get somewhere where he could kneel down and kiss the ground.

Catching Hit-Runs

Continued from page 19

llowing days, at the same dent occurred. This gives because many people do ng at a particular time of

ere walking along a coun- arly in the morning. Both nd killed by a driver who . The case proved to be an unpromising one, without lues. So the officers re- scene the following morn- ly the delivery wagon of a along. The driver said he e girls on the highway the nd had read about the ac- papers. He said he had by a man in a new car or seventy miles an hour, minutes after the accident. ion of the speeding car en- ficers to solve the case.

There's Never a Motive

ist struck a boy riding a bi- lonely road. The boy was e bicycle was jammed under axle of the car and pushed road. The driver had to get out and pull it from under the car before proceeding. Good detective work enabled officers to locate the suspected car, from which all evidence of the accident had been removed by the time it was found. The driver denied having hit anyone, and there were no witnesses. But the officers took his fingerprints and convicted him. They had been found on the frame of the bicycle.

Despite the difficulty of overcoming the "no motive" factor, hit-run detectives are usually able, through hard work, to get convictions on nine out of ten of the cases they take to court.

Accident records of 21 states show that in 1939 there were in the whole country about 1,450 fatal hit-run accidents. Besides these, offending drivers tried to skip out in more than 20,000 injury cases, and nearly 300,000 damage-only accidents.

The cases successfully cracked are mounting steadily. Lumping together Dayton, Knoxville, Miami, Louisville, Detroit, and Greenwich, Connecticut, 4,186 serious-accident hit-skippers out of 5,499 were caught in 1939—better than three out of four. Dallas, Texas, caught 89 per cent. South Bend, Indiana, 91 per cent. Evanston, Illinois, caught 94 per cent.

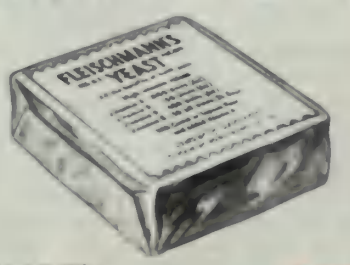
Dayton, Ohio, recorded 135 hit-run cases in 1939, including property damage and personal injury; 134 of the offending drivers were caught. Detroit's system of accident detection, set up by Franklin Kreml, head of the Safety Division of the International Association of Chiefs of Police, started operations in September, 1937. During the next three years Detroit caught 9,031 hit-runners, big and little, out of 12,018 —or 75 per cent. States and cities that have been casual heretofore are beginning to sit up and take notice of such records. The public, too, is beginning to get wise. With detections secured by the new method, road cops multiplying, drivers are learning to think twice before leaving the scene of an accident.

You'll like yeast this new way

MISS HOUSTON: You're certainly lively and good-humored today, Mrs. Hughes. Been eating yeast again?
MRS. HUGHES: No...drinking Fleischmann's Yeast in tomato juice! Best drink I ever tasted!

MISS HOUSTON: Now, isn't that strange! I was thinking just the other day how much better I felt when I was eating yeast. But I never learned to like it.
MRS. HUGHES: Well, my dear Miss Iron-Fingers, you'll like it now! In tomato juice, it has the flavor of oven-fresh bread. You can stay with it for years...just as I intend to do.

MISS HOUSTON: You know, I never doubted the authorities when they said "yeast is one of the richest natural sources of the amazing vitamin B complex." And I can use a lot of extra vitamins . . . in my job!
MRS. HUGHES: But maybe you aren't getting enough of these vitamins. Start drinking yeast first thing in the morning, last thing at night . . . See if you aren't fresher at five o'clock. I'll even make you a little bet!



MASH... Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too ...whole business takes less than a minute!

Home-Maid Ski Champ

Continued from page 22

Well, she finished. She didn't win, but she finished, the only woman—oh, all right, girl—to go the whole way without falling. She whipped through that final slope of the course that slants at 37 degrees and had trapped the best of them, male and female, so far. Mrs. Grace Carter Lindley, an old-timer in ski competition, beat out the Shaw girl by three fifths of a second. Ski racing is against the stop watch and the results were: Mrs. Lindley 4:10.6, Miss Shaw 4:11.2. Three women didn't finish and Rettles de Cosson, the British star, suffered a brain concussion in a fall. That's just in case you still believe that skiing isn't tough and that the Baldy Mountain course isn't one of the most difficult tests of a skier's skill in the world.

That was a blow, of course, to be a mere second in the important straight-away downhill run. But Marilyn still had a chance. There was the slalom race, a run down between flags staggered at difficult angles. The Combined Ski Championship is awarded for the best performance in both events which together form the supreme test of skiing ability.

The slalom score is compiled after two runs. In the first run, Marilyn was second again. Marion McKean, the professional from Beverly Farms, Massachusetts, was first with Marilyn 4.6 seconds behind her. Everything depended on the second run, for neither Mrs. Lindley, the downhill winner, nor Miss McKean had combined scores which, at the moment, bettered Marilyn's.

Fourth After a Fall

Halfway down the final test Marilyn fell as she attempted to execute an almost impossible angle in the slalom. She went down in a splatter of snow. For one anguished moment she lay there, a pile of parka, girl and skis, and then she was up and away again. Tears froze on her eyelashes. But she finished upright and going away. She was fourth.

The officials went into a huddle with their data on times and form. Before the participants had reached warm fires and steaming cups of tea, the officials had announced, in a matter-of-fact way that somehow didn't fit the drama of the situation, that Miss Marilyn Shaw was the new American Woman's Open Combined Ski Champion, a title that carried with it the amateur championship as well.

The Kitzbuehlers and the St. Moritzers were surprised, and slightly confused. Miss Shaw had won neither of the single races. But she had 33 points more than Gerda Paumgarten, the Austrian star runner-up. Consistency and all-round ability had paid off. Mrs. Lindley, who had won the downhill, was thirteenth and last in the slalom and Nancy Reynolds, who had won the zigzag race, hadn't finished the downhill. Marilyn's second in the difficult downward plunge and her heartbreaking fourth in the wild slalom test combined to give her enough points to win the championship.

And it was more than a triumph of youth and determination over experience and skill. It was an American victory. Marilyn was the first female in the history of the sport in this country to win the event without foreign training at smart spots like St. Moritz. Marilyn learned her skiing the hard way, mostly, on the slopes of the hills about her home town. And except for some expert tutoring for a couple of weeks by a hired ski master, Marilyn got most of her stuff from her mother.

The story of Marilyn Shaw is the story of a whole family of Shaws and of the town of Stowe, Vermont, too. The Shaws are old stock in Stowe and skiin' fools—with the exception of Pop who's too busy selling skis, ladies' house dresses, groceries and hardware.

And Stowe has been ski crazy ever since it found out, about six years ago, that it's one of the best snow holes in the United States. A sleepy little town of 982 citizens, it lies sunk in the valley between the Worcester Range of the Green Mountains and Mount Mansfield. Snow buries its quiet streets from November to May.

The skiing Shaws—Mother, who's been married eighteen years, Marilyn, now sixteen, Barbara, fifteen, Ann, nine, and Gale, Jr., seven—all grew up on skis. It was in the winter of 1935 that Mother, leaving the two babies at home, took her two daughters, Marilyn and Barbara, up on the Toll Road, the novice trail down the east side of Mount Mansfield, for the first time. She was determined to teach them to ski well.

Mother wasn't too good herself. She had been busy with babies and the home most of her life. But she could still get about. The children had plodded about on boards of one sort or another since they were tots. They helped one another up and down the Toll Road about three or four afternoons every week.

In 1936, there was some excitement in the town of Stowe because the lodge at Smuggler's Notch, away up on Mount Mansfield, had hired a real Austrian ski instructor. He was Sepp Ruschp. One day that winter Mother Shaw decided she'd bundle up her whole brood and they'd all go see this Mr. Ruschp, too.

"The first time I see that family," says Sepp Ruschp now, "I know they are remarkable. That Mrs. Shaw, I knew she would make the perfect skier. Not a racer, mind you, but graceful. Marilyn and Barbara were like the mother, but how good I could not tell."

It was in March, 1938, after the second winter of lessons for the Shaws, that the Men's and Women's National Downhill and Slalom championships were held at Stowe, on the Nose Dive Trail on Mount Mansfield. Marilyn had never even skied the Nose Dive, precipitous and infamous down-mountain drop that falls 2,000 feet in a mile and a third, but it was Mother Shaw's idea that she could do it and do it well and so she went to Ruschp.

"When she say she want Marilyn to go into Women's Nationals on Nose Dive," he explains, "I think she is crazy, but I say, 'If you want, we see.' "

He asked Marilyn if she wanted to try it. Of course she wanted to try it.

"When do I learn to jump, Harry?" MICHAEL BERRY

"When we get to top and turn around," he says, "I say in joke, 'How you like to run it, straight?' 'Sure,' says Marilyn and so down I start. Not once do I stop or look after me and when I get to bottom there is Marilyn right behind.

"I am surprised," he adds, "but then I know she be good skier."

Ruschp, realizing this girl had the daring as well as the ability it takes to make a racer, trained with her steadily for two weeks—and when the day of the Women's Nationals finally came, on April 9, Marilyn was ready. She was so calm she fell asleep while awaiting her turn in the stone warming hut on the top of the mountain.

"I knew I didn't have a chance," she explains, "and besides I was tired."

Marilyn was only thirteen then.

It was snowing so hard that day you could barely see a tree in front of your face and there was a wind-blown icy crust over the snow which made the going particularly treacherous.

The HOME DEFENSE of the Minute Man...

...in a new, up-to-the-minute form

Today as in '76 the watchword of America is *"Home Defense"!* And today the sturdy Home Defense of the Minute Man—Pure White Lead—is ready. Ready to guard the homes of America, as it guarded those homes of Concord and Lexington. The same historic paint protection, in a brand new form—*ready to brush on!*

NOW...the proved protection of "DUTCH BOY"...

Since the nation was born, Pure White Lead has protected homes from their worst enemy, the weather. Down through the years have come gleaming Cape Cod cottages . . . proud Colonial mansions — historic monuments to White Lead's durability.

Remember, Dutch Boy White Lead means paint that hugs tight and lasts long. Paint that wears down slowly, smoothly, instead of cracking and scaling—thus saving the expense of burning and scraping off the old paint when you finally repaint.

Ready for the Brush!

And now Dutch Boy presents the time-tested protection of Pure White Lead in a new form, *ready for the brush* ...DUTCH BOY PURE WHITE LEAD PAINT takes its place, shoulder to shoulder, beside the Dutch Boy's famous white lead *paste!* Gives you the extra quality of white lead, yet costs no more than regular quality paint.

When you buy a paint job...remember, it pays to hire a good painter. And when he uses Dutch Boy, in either the famous paste or the new ready-to-use form, you are getting the sturdy home defense of Pure White Lead. Either form can be tinted any color you desire.

BE AN EXPERT paint buyer. Send for our free booklet, "Styling with Paint the Dutch Boy Way", which tells you everything you need to know about buying a paint job. 32 illustrations in color. Address Dept. 360 in care of the nearest branch listed below.

Moonlight and Onion

Continued from page 24

get it back right now, if he wanted, but he isn't going to be around to want, if we don't nab him fast. It's all your fault," I say, letting her have it, although, doggone, she does look pretty cute hustling along like this, catching her breath. Her eyes are so round. I guess that's it. But I am firm.

"You can't make a silken percy out of a pickled onion," I say, "and that's what you tried to do to the Redhead, only it wouldn't work, moonlight and onion don't mix."

"But I didn't," she says. "I really didn't. You don't understand. Do you think I married him," she says, "to settle down and play the Moonlight Sonata all my life?"

"What else for?" I say.

"For his funny old hat," she says. "The one he wore the day I met him. That outrageous, funny old hat. And those dear, baggy trousers. I fell in love with them at sight."

"Well," I say. "Well, well."

"Do you think I couldn't have had a million men with derbies?" she says. "I married Jeremiah T. Rannigan, III, not a bow tie with handkerchief to match!"

"Well," I repeat. "Well, well, well." So the Rannigan went and glamorized himself with the mistaken idea his Angel would want him that way.

"That's when he walked out," she says. "I tried to explain to him how he had changed and how I wished he hadn't and how I thought his stories in the paper weren't quite so good as they used to be, except that one this morning. I guess the shock was too sudden. He didn't say anything, but he went out early and I knew something was wrong."

"Well," I say. All I can seem to get out of my mouth is "well," but I'm thinking this date will probably go down as the great mistake of all history, the Rannigan retreat from everything he holds near and dear. He's really a sensitive guy like Angel says. We better grab him quick before the exodus is complete.

BUT the Redhead is not at Emil's Hospitality Bar and Grill. He's been to Emil's and gone. The Redhead's pipe is on the bar at approximately the spot where Emil says the Redhead was standing for some of the quickest quick ones Emil has ever seen vanish.

We hasten around the block and storm the Blue Eagle Tavern.

"Hello," says the barkeep. "Who do you think was here? Your old pal, the Redhead. Hadn't seen him for three weeks. He's looking fine."

"Which way did he go?" I say.

"Started out the door north," says the barkeep, "veered slightly south-southeast, turned around twice at a forty-five degree angle and struck due west toward Dillfoyle's."

There are no customers in Dillfoyle's when we arrive but there is a derby on the hatrack. It has a big hole in the top of it. Midge, the barkeep in Dillfoyle's, is looking glum.

"That Redhead!" he says. "Bets me ten bucks he can kick a field goal with his derby onto the hatrack in three tries. I'm a sucker. I bet him. He does it, second kick!"

At the Hofbrau they have not seen the Redhead but they have heard him go by. At Keelan's a bum is wearing a checkered sports coat and a big bow tie with a handkerchief to match. He is a little dazed.

"This fellow give me the outfit for a keepsake," says the bum. "Account of we have much in common. I'm from Spokane, Washington, and he is on his way to Arizona."

The cop on the Four Corners says he heard a noise like "Yippee!" and then a sound like "Wahoo!" and that's all he knows.

The trail grows faint at the Florida Club. We lose it altogether at Paddy's Place and backtrack to The Ranchero. This is a chile spot run by a Bronx Mexican named Sam Goldstein and all decorated up with sombreros and saddles and ropes. But one sombrero, one saddle and one rope are not on the wall where they used to be. The Redhead has bought them.

"He's going into the cowboy business," says Sam. "I hate to part with them trophies but for an old friend like

"If your friend is all you say, George, I think I can get a friend . . . for you!"

KIRK STILES

Rannigan, all right. He says he'll send me the money from Phoenix."

"Oh!" says Angel. "Oh, oh!" And I see now how perhaps a person, even of the Redhead's type, can get tangled in the apron strings if he's not careful. You don't know what a pretty word Oh can be if you never heard Angel oh it. It gives me the extra push I need because this man hunt is getting me winded.

WE HOP a cab and hit for a drinkery where I know them to have the best public piano in these parts. It's a little piano you can shove around on wheels. They bought it brand-new after the night the Redhead did The Last Roundup on the other one, working in a variation by playing bass with the heel and toe of his right shoe.

But at this place they have seen the Redhead coming from afar off and have hid the piano in the ladies' room, and the Redhead has fared forth again.

I am running out of

last service as a soldier t Italy came at the end of d War when he served as Italian Military Commis- rsailles Peace Conference. standing, he was made a eral and although, in his he was Italy's youngest *rigata,* Badoglio was one rank higher—a division general. In 1922, Cavallero retired on a fat pension and became plant manager for Ansaldo, the Italian equivalent of the Ford Motor Company.

Until 1925, when on January 3d Mussolini stood before a flaccid Chamber of Deputies and made a speech proscribing all political opposition parties and Fascistizing Italy by abolishing free elections and taking over the press, Cavallero remained that for which he was best suited—a businessman. Cavallero looks less like a general than any soldier in Italy. He is short, inclined to fatness and has the pink complexion of a man who spends much time in Turkish baths and on the masseur's table. He wears a pince-nez on a handsome, aristocratic nose and has a thick mane of gray-streaked black hair. He is pompously professional in appearance but amiable, talkative. He tells a good smoking-room story and is, unlike most other men of the regular army, a good mixer and a familiar figure in the smart night spots and supper clubs of Milan, Turin, Genoa and Rome.

The Welcome Convert

Cavallero was one of the loudest applauders of the Mussolini dictum that after January 3, 1925, there would be one-man rule in Italy. Fascism, until then a refuge for the rowdy elements of Italian political life, a party composed of Luigi Federzoni's nationalist Blueshirts, Rossoni's skull-cracking Socialist-Syndicalists and Mussolini's own castor-oil and bludgeon boys in black shirts, welcomed the support of respectable names like that of Cavallero. Up to then the only soldier it had been able to convert was Colonel Emilio De Bono.

Mussolini rewarded Cavallero by making him Undersecretary for War. Badoglio, who had vainly begged King Victor Emmanuel to be permitted to

A Statement about Dry Shaving!

▶ After months of experimentation with various electric razors, we have now adopted one—the Remington Triple-Header—that has met all our rigid requirements. We sought a dry shaver that made possible a quick, comfortable, velvet-smooth shave in keeping with Terminal's 33-year reputation for fine barber service. We sought one that performed equally well on soft and on tough beards. We sought one that would give us long, faithful service.

This selection rested not with the executives of the Terminal Barber Shops—but with the hundreds of Terminal Master Barbers in our system. After trying the various shavers for months, they decided—practically unanimously—that we adopt the Remington Dual and Triple-Header throughout our chain. We bowed to the choice of these experts.

We invite you to try a Remington Dry Shave today. It only costs 25¢. If you don't think it is the finest, most comfortable dry shave you've ever had, the shave is on the house!

We can guarantee this new modern dry shave because we know you'll look better and feel better after one!

"disperse the Blackshirt rabble" with a few machine guns during the March on Rome, was "exiled" as ambassador to the United States.

Cavallero's appointment in Mussolini's cabinet came as Fascism emerged from the wave of national and international indignation generated by the murder on June 10, 1924, of the liberal Giacomo Matteoti. Accused of the murder were three or four ultra-Fascists. Their defense attorney was a young Blackshirt named Roberto Farinacci.

Farinacci physically symbolized Fascism. He was its scourge. In the province of Cremona, where he edited a newspaper, it was Farinacci who led the Squadristi dispensers of castor-oil and beatings. His career was written in blood and violence.

Mussolini made Farinacci Secretary of the Fascist party, in the internal politics of the regime the most important job next to that of Il Duce. As counsel for the Matteoti murderers, Farinacci won an acquittal. As chief of the party, the smooth-faced Farinacci with the round, black eyes and slick, black hair and the physical vigor of ten men became a one-man *Cheka*.

Both Cavallero and Farinacci were scrapped by Mussolini—Cavallero in 1928, after three undistinguished years as Undersecretary for War, during which his principal job was to organize the personal army of Il Duce, the Blackshirt Militia, and integrate it into the aristocratic regular army; and Farinacci in 1926, when Mussolini eschewed violence until the gains made in regimenting the nation were consolidated.

Before this peaceful stage began Mussolini made, for a dictator, a grave tactical error. He purged Cavallero and Farinacci—and many others as he did in laters years whenever he had to switch policies and, therefore, the men who represented them—but he didn't shoot them as Hitler or Stalin would have done. And today, as Italy faces internal and foreign enemies of Fascism and as Mussolini stands on a podium as shaky as the one which upheld him in 1924-1925, the men he successively scrapped but didn't execute are rising around him and threaten to drag him down. Cavallero and Farinacci are only two. There are others, but these are the most important.

The House that Mussolini built was predicated on the proposition that Il Duce could do no wrong. He had first to inculcate this idea before he could proceed with the regimentation necessary to accomplish such un-Italian projects, for example, as the Rome-Berlin Axis and the anti-Semitic campaign. As a Rome correspondent I covered the Ethiopian War, the Spanish War, the creation of the Axis and the campaign of Germanization of the Italian people. I heard Italians grumble and proceed unwillingly from one to the other and I was there too, when they were obliged to go to war against Britain and France and I know from direct, personal experience that the lack of a will to war was at least proportionate to the faithlessness in Fascism, to the economic internal collapse of a country that had already been at war for five years and to the ravages of a regime that lived on graft.

When Italians were informed in a brief communiqué that Cavallero had been made Chief of the General Staff they spread out their hands, pursed their lips and arched their eyebrows in their national gesture of incredulity. They knew that men like Cavallero, Emilio De Bono, Farinacci, Rossoni, former Undersecretary for Air Valle and a score more Fascists had started as poor men or men of modest means, like Count Volpi di Misurati, and become fabulously rich during the life span of Fascism.

And now Cavallero is Chief of Staff—and Farinacci fumes in his editorials in his now powerful newspaper, Il Regime Fascista of Cremona, that Italians have a right to know what happened to 175 billion lire appropriated for the creation of that "invincible army" that was going to smash the British Empire and gain for Italy her "place in the sun." He implies there has been graft. He also implies, in a nation of one-man government, that there is something terribly wrong in view of Blackshirt defeats in Greece and Albania, in Egypt and Libya.

"Italy had a right," Farinacci wrote recently, "to expect readiness and the fullest efficiency (of the armed forces) in their day of the supreme test." He as much as said to Mussolini and his regime that the myth of the superman has been exploded, that Il Duce had failed. Why Farinacci dares be so outspoken is the story of why Fascism in Italy is at the mercy of the man Winston Churchill called the Attila Beyond the Alps—for Farinacci is Adolf Hitler's lawyer at the court of the Blackshirt hierarchy, as Cavallero and other generals and admirals whom Mussolini has advanced to places vacated by his latest bloodless purge are the agents of the Nazi High Command, by conviction or compulsion.

The One-Man Minority

Of Farinacci's almost pathological hatred of Jews, I have personal knowledge. At least a year before Fascism's anti-Semitic campaign began, the Cremona editor, in an interview in the Hotel Bristol in Rome, told me that every Jew in Italy ought to be liquidated and that the only solution to what he called the Jewish problem throughout the world was universal ostracism of all Jews who survived the pogroms he recommended in all nations. His views were radically different from those of other important Fascists, such as young Foreign Minister Count Galeazzo Ciano, who in February, 1938, issued a statement that in view of the fact that there were only 44,000 Jews in a nation of 44,000,000 people, the race did not constitute a "problem" in Italy.

As a "first-hour" Fascist, Farinacci was accorded a place on the Fascist Grand Council, the highest ruling body in Italy which even has the power to name the successor to King Victor in the event of his death. Farinacci, therefore, was never out of internal Fascist politics. He had a voice, a loud one, too. But he was outvoted and restrained. He was, for many years, a one-man minority.

But as Italo-German relations grew increasingly intimate, following the Ethiopian War, his influence grew. He stood for the same things that characterize Nazism. His emergence as a first citizen of Fascism could be charted by the change in attitude of Blackshirt underlings toward what Farinacci had to say in his editorials. While Italy was not anti-Semitic, he was labeled a hothead brigand. When it became convenient to play Berlin's game even to the extent of aping Nazism's anti-Semitism, he became a respected citizen.

Rome correspondents soon found the answer to the riddle of Farinacci. As a lawyer Farinacci ranked low. He could not, therefore, have earned in his limited practice the enormous amount of money required to build up Il Regime Fascista from a provincial newspaper of inconsequential importance to a powerful organ that ranks now with Mussolini's own Popolo d'Italia of Milan. CARL ROSE

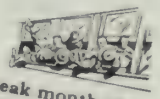
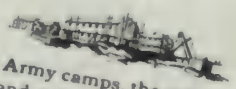
MAINLINE of National Defense

Like a mighty loom, weaving countless threads into a pattern of national security, the railroads of America shuttle the materials of defense from mine, forest and farm—to mill and factory—to assembly plant and warehouse—to camp and port.



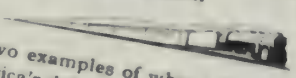
There will be no time lost here. That is the American railroads' pledge to the American people—a pledge based on preparedness which began twenty years ago. Railroad tracks and yards, cars and engines, shops and signals have been improved. Operating methods are more efficient, and organized cooperation among shippers, the government and the railroads makes it possible to get more use out of better railroad facilities.

Freight moves faster than ever before, it is switched and classified faster, and with the cooperation of shippers and the government it is unloaded faster. Cars are used for transportation not storage.



Today America can look to its rail transportation system with full confidence. It is the finest mass transportation in the world. And it is ready to meet any demand of peace-time commerce or national defense.

NOW—TRAVEL ON CREDIT. America's railroads offer new, simple installment payment plan for trips and tours. **You can take your car along too. SEE YOUR LOCAL TICKET AGENT.**



DEFENSE FACTS

In July 1918, peak month of troop movements during the World War, the railroads moved an average of a little more than 20,000 men a day. In August 1940 the railroads moved troops to Army maneuvers at the rate of nearly 40,000 men a day.

For the new Army camps, the railroads handled a billion and a half board feet of lumber—60,000 carloads. Work was never held up because of any railroad failure to deliver materials—and there was not the least interruption of regular rail traffic.

Just two examples of what railroads mean to America's defense, in moving bodies of men and masses of materials over long distances, quickly, safely, on schedule.

ASSOCIATION OF AMERICAN RAILROADS WASHINGTON, D. C.

A SPECIAL PREPARATION FOR SHAVING

FOR THE 1 MAN IN 7 WHO SHAVES DAILY

It Needs No Brush Not Greasy or Sticky

Modern life now demands at least 1 man in 7 shave *every day*. This daily shaving often causes razor scrape—irritation.

To help men solve this problem, we perfected Glider—a rich, soothing cream—not greasy or sticky.

BUFFER BETWEEN BLADE AND SKIN

You first wash your face thoroughly with hot water and soap to remove grit and oily sebum that collects on whiskers every 24 hours. Then spread on Glider quickly and easily with your fingers. Never a brush. Instantly Glider forms a protective layer between the edge of your blade and the sensitive surface of your skin. It enables razor to remove each completely softened whisker at the skin line *without scraping or irritating the skin.*

ESPECIALLY FOR THE 1 MAN IN 7 WHO SHAVES DAILY

For men in responsible positions—doctors, lawyers, businessmen and others who must shave *every day*—Glider is invaluable. It eliminates the dangers frequent shaving may have for the tender face and leaves your skin smoother, cleaner. Glider has been developed by The J. B. Williams Co., who have been making fine shaving preparations for over 100 years.

TRY A TUBE AT OUR EXPENSE—We're so positive that *Glider* will give you more shaving comfort than anything you've ever used that we'll send you a generous tube ABSOLUTELY *FREE*. No stamps—no cartons—no dimes. Just send your name and address to The J. B. Williams Co., Dept. EG-1, Glastonbury, Conn. On this FREE trial test, we rest our case entirely. Don't delay—send in a penny post card today for your free tube of *Glider*. Offer good in U. S. A. and Canada only.

Rheumatism Relieve Pain In Few Minutes

To relieve the torturing pain of Neuritis, Rheumatism, Neuralgia, or Lumbago in few minutes, get NURITO, the fine formula, used by thousands. No opiates. Does the work quickly—must relieve cruel pain to your satisfaction in a few minutes or your money back. Don't suffer. Ask your druggist today for trustworthy NURITO on this guarantee.

NEW OPPORTUNITY IN ACCOUNTING

—and how you can take advantage of it

Never before, has there been as great an opportunity as now faces the accounting profession. Depression has taught executives the vital urgency of knowing all the facts about their business. Then, too, new governmental policy forces the keeping of better and more complete records in every office and plant. It is not a matter of choice—it is necessity. Accountants tell us the demand for competent accountants will probably soon exceed the supply. This spells real opportunity—for those already in accounting and for ambitious men who will start training immediately. The man who is wise will investigate promptly—he will write for free booklet and full information.

through the Brenner Pass to save the regime. Panzer divisions, legions of German troops, will save the regime, might help overcome the Greeks and might halt the British drive into Libya. But victories gained with the help of Germans wouldn't please 44,000,000 Italians, who for eighteen years have been paying taxes to create an "invincible army."

Diplomats recently returned to America from Italy told us that Mussolini is in a quandary regarding German assistance. He knows, they say, that the presence of the half-million to one million German troops needed to bolster the Italian army might have one of two disastrous effects. They might precipitate a revolution. Italians instinctively hate Germans. The presence of Germans, on the other hand, would reduce Italy to the status of occupied France, the Latin sister which Italy, split by internal dissension and awake to the fact that grafters plundered the treasury instead of building the promised "invincible army" and air force, so tragically resembles.

Mussolini Decides

Dispatches reaching Collier's from Rome and, therefore, passed by the censor, disclose frankly that Italy has only about three or four months' supplies of food on hand—"adequate unless it must go to help feed Germany"—and that there is grumbling and open protest against mounting prices. The course Mussolini has chosen, according to these dispatches, is to put Fascism itself to the supreme test and to go it alone. That's what they're handing out in Rome and this means that Mussolini, rather than satisfy the claims to the Italian Tyrol and to the Adriatic port of Trieste voiced in Hitler's Mein Kampf, has decided to sink or swim with the converts he has won in eighteen years and the youths who were raised in the Fascist theology that Mussolini is always right.

The experts, who are human and, unlike Mussolini, fallible, don't believe he'll make the grade. There is an abundance of evidence to support their belief. As in France, graft long ago was at work in the air ministry and the defense ministries generally in a system whose cornerstone was the dictum that to the victor belong the spoils.

In the military maneuvers of the summer of 1939, Mussolini discovered that airplanes which he reviewed in Milan he saw again in Turin and later in Naples. They were flown ahead of him to convince him the appropriated billions had really been spent on an air force. He knew better. He fired Undersecretary for Air Valle. That sort of thing was not new to Mussolini. Shortly after the Ethiopian War he had been obliged to purge General De Bono when he discovered relatives of the general had made fortunes out of road-building contracts in Ethiopia where, at one time, a bag of cement cost four times as much as an equivalent amount of sugar.

A shock to Italian public opinion, already disturbed by proof that the Blackshirts were being roundly beaten on the Greek and Egyptian fronts, was the appointment of Cavallero who, upon his retirement from public life with the title of Count, the rank of Division General and Senator of the Realm, re-entered the service of the Ansaldo Company as production chief of the Piranni plant. When Cavallero took charge he swept out all the assistants of his predecessor and replaced them with his own relatives and adherents.

In 1931 or early 1932, there occurred one of Italy's major unpublished scandals. Many of Cavallero's aides were arrested, tried and sentenced on charges of graft. Since petty graft is overlooked, their grafting must have been on a colossal scale, so much so that Cavallero, immune to arrest as a senator, was confined at home for months under house arrest. He demanded a trial but the opportunity of clearing his name was never accorded him.

In 1935 Cavallero, like a good many discarded Fascists, volunteered for service in Ethiopia. He regained the confidence of the inner circle of such Fascists as Farinacci and the pardon of Mussolini. What Italians most counted against Cavallero, however, was the fact that he was chosen to replace Badoglio, a man of unquestioned integrity and military genius, despite the evidence that in the years since 1922 Cavallero had never held a military position except as an executive between 1925 and 1928 and as a commander in an unchallenged march in Africa.

The rising power of Nazi-backed Farinacci, the appointment of Cavallero and the replacement with old-line Fascists of others removed in the latest purge of Fascism suggest that Mussolini is gambling on a last stand with his buddies of a former era. The new Undersecretary of the Navy, replacing Admiral Cavagnari, creator of the fast, modern, lithe Italian fleet is Admiral Arturo Riccardi. He is sixty-two years old, bald, paunchy and tall, with a long, fleshy nose over a close-clipped black mustache. He is also equipped with a protruding chin, but his main asset in replacing Cavagnari, who was broken when Mussolini had to find a scapegoat for the Taranto incident in which British bombers sank or incapacitated three large warships, is that he served for five years as chief of the Navy's Personnel Division.

Mussolini had to replace Cavagnari when he found he couldn't tell Italians, who asked themselves what these three new ships were doing in harbor when there was a British fleet to be fought in Mare Nostrum, that Italy didn't have fuel oil to operate them. Russia was Italy's main oil supplier. Oil from Russia stopped in 1937 at the height of Il Duce's anti-Communist campaign.

The new Naval Chief of Staff is Trigo Campioni, also sixty-two years old. He is boomed as the naval genius of the Ethiopian War. There is no record of any naval engagement with the Ethiopians, who didn't have a fleet. Assistant Chief of Naval Staff is the fifty-one year-old Admiral Angelo Jachino, whose qualifications for his in

dition maintains that Navy established just prior to the War because a certain nator got caught trifling with s mother-in-law. To square dy, the senator persuaded o buy a defunct shipyard

someone had sold her in what was then part of Arcadia. Another explanation, equally plausible, is that an admiral on the general board, nearsighted but stubborn, stuck a pin in a map an inch too far south. The admiral's parrot is said to have remarked: "That's a damn' sight better site for a dam site, damn your eyesight!" (Note: all criticism of admirals is attributed to their parrots.)

I stress this point—physical ugliness coupled with an illogical location which limits Navy Station to near-uselessness—because it leads to another and even more important fact. Navy Station has always been regarded by its officer personnel as a *punishment station.* Officially, there are no punishment stations. But it is what people believe to be true that counts—the imaginative estimate of a place and its conditions. Nor did the bad name of Navy Station start with the group who have served here under my father's command. The very first verse of the Navy Station song, dated long before our time, is proof of that:

We serve at Navy Station
With freedom's flag unfurled;
In grim exasperation,
And hating all the world.
We didn't have to come here;
We could have gone to hell—
But we're the dumb, damned Navy,
So now we think it's swell!

I make no apology for this bit of doggerel. (Liar: you'd like to teach it to an admiral's parrot.) I know that good Navy men and women are serving tougher duty tours in worse places than Navy Station, and not getting into scandals, either. It was unintelligent to blame a drizzle, a group of shabby buildings and a fence for my mood. The scene with Roger and my spat with Dolores were not the real cause. I am the sort of rattlebrain who could go on turning down honorable proposals of marriage or fighting with Spanish servant girls indefinitely. No, I was suffering from a subconscious tension which must have been accumulating for weeks, even months.

THE phone rang in the upstairs hall, and I jumped, my heart beating fast.

Dolores tapped on the door. "It is the Señora McMatthews."

"Does she know I'm in?"

"*Si*—but I will lie—"

"No. I'll talk to her!"

I saw that Dolores had been weeping. She grabbed my hand and kissed it. Contrition is unbecoming to Dolores. She is at her best with a dagger flashing in her hand, though, come to think of it, I have never seen her with an actual dagger.

"Pipe down!" I said, snatching my hand away. "You can have my new stockings."

Dolores thanked me and praised the saints, making a beeline for my bureau drawer. I turned to wrestle with demons—i.e., Mrs. McMatthews. She was Navy Station's champion teller of the tale, viewer with alarm and exhorter to duty. Her husband being a senior three-striper in the Construction Corps in charge of all drydock work, Mrs. McMatthews was also a power.

"Yes, Mrs. Mac?"

"Is that maid listening in?"

"Not this morning. She's trying on some new stockings. Quite a thing. Has beautiful legs, you know—"

"Phyllis! I have a very serious matter to discuss."

"Yes?"

You Have Always Wanted Them!
Now You Can Have Them!

Read how you can have The Harvard Classics at an extraordinarily low price and on most liberal terms.

HERE is your great chance to own Dr. Eliot's Five-Foot Shelf of Books. Now this supreme library can be had at a cost per volume one-third the price of current fiction.

DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS (THE HARVARD CLASSICS)

Dr. Eliot, Harvard's most distinguished President, has brought together in The Harvard Classics from his lifetime of study the pure gold of the world's literature. Dr. Eliot realized the need of a library offering everyone the culture which a university strives to give. THE FIVE-FOOT SHELF OF BOOKS is the magnificent result of his inspiration and knowledge.

NEVER BEFORE SUCH A BARGAIN

Brentano's, the famous booksellers, recently stated that for only the partial contents of The Harvard Classics in ordinary clothbound editions, the cost would be $402.00—yet in a beautiful edition, handsomely printed and illustrated, and uniformly bound, you can obtain these superlative writings at a fraction of that cost. This is the rarest of opportunities. Here are the complete marvelous contents of Dr. Eliot's Five-Foot Shelf of Books. Fifty volumes, 22,407 pages of superb reading, 418 of the world's masterpieces, the Lecture Volume, Daily Reading Guide, and Index of 76,000 entries, costing $50,000 to prepare is the key to the treasures of The Harvard Classics.

YOURS FOR ONLY 50¢ A WEEK

Today for an initial payment of as little as $2.00, you may have a complete, luxurious edition in your home with all shipping charges prepaid by us. No one thus needs to wait one day longer to own The Harvard Classics.

FASCINATING BOOK—FREE

A most interesting book, "Fifteen Minutes a Day," furnishes you with full information about The Harvard Classics . . . tells about Dr. Eliot's fascinating Reading Courses . . . and how you may have this priceless library for little more than the average person spends for newspapers.

Send for the famous book, FIFTEEN MINUTES A DAY. It is yours without obligation and without cost.

OWN THIS FAMOUS LITTLE BOOK—*FREE!*

Send for this Free booklet that gives Dr. Eliot's own plan of reading.

P. F. COLLIER & SON CORPORATION

Name Mr. Mrs. Miss .....

Address .....

"Your father must talk to Commander Sedden."

"Pop Sedden?"

"About *Bert*."

"Oh . . . Bert . . . what's he done now?"

"Bert is coming home for a visit—*tomorrow*."

"Oh . . . I see—"

"Commander Sedden has told poor Bessie that he won't *receive him*."

"Bert registered, didn't he?"

"Yes, but he's going to call himself a conscientious objector. And if he does that there'll be *a tragedy*. Poor Bessie says the commander has been—*you know*—again."

"Drinking?"

"*Yes*."

"All right," I said, "I'll see what can be done, Mrs. Mac."

"And, Phyllis—*that isn't all*—"

I listened to the rest of the grief report with a new, faint tingling of fear. Mrs. Briscoe had gone on the warpath and insulted Mrs. Conroy and Mrs. Davis. Ensign Murphy was flirting outrageously with Mrs. Cowles. The women's Committee had found termites in the floor of the cardroom at the Officers' Club and cockroaches in the kitchen. Lieutenant Bob Cowles was broke again and had borrowed some money from Commander McMatthews.

"I'll see what can be done—"

"Hello, hello . . . and Phyllis—what is the captain going to do with those civilian engineers?"

"What civilian engineers?"

"The ones who are coming with Lieutenant Roberts."

"Who is Lieutenant Roberts?"

"You'll have to ask your father. It's all *very mysterious*. They've told Commander McMatthews practically nothing. But I understand Lieutenant Roberts isn't married, so he'll probably want to live in the annex, and if he does that will create a *difficult problem,* if he expects the same quarters for the civilians—and I would suggest to the captain that he be *very firm* this time and insist that the civilians room in the village."

"Are they lepers, Mrs. Mac?" I said.

THAT left Mrs. McMatthews spluttering as I said goodby. But I felt too wretched for politeness. Mrs. Mac's almost daily reports had never been quite like this. The formula was the same: an appeal to Captain Hartney, through me, that people be talked to or action taken. Even the problems presented by Bert Sedden, Mrs. Briscoe, Ensign Murphy, Mrs. Cowles and her husband had been touched upon many times before. But they had lain dormant and static in Mrs. Mac's ceaseless gossip; and I had always said to myself: "We will sit tight on the lid and nothing will happen." Now, I was not so sure. I had detected a new tone of real anxiety in Mrs. Mac's jabber.

Dolores spoke at my elbow. "Is trouble?" she asked.

"No, no," I said, "nothing like that. Where's my raincoat? I've got to go over to Mom Sedden's—for a few minutes."

I found the coat myself and hurried out of the house before Dolores could ask any more questions.

The rain was cold and the skimpy grass of the parade ground had been beaten flat. Brown water oozed up in every footprint. The yard was deserted, except for some workmen in dungarees loading a truck at the other end.

Head down, I plodded toward the Seddens' house. I was thinking of my mother, who died in Honolulu when I was fifteen. She had left me a job to do and I was a very poor substitute. My mother had been a diplomat and a peacemaker, a woman of infinite patience and true courage. It is the commanding officer's wife who keeps a happy ship and a serene station, if she has genius and character and sweetness of soul.

Mom Sedden opened the door. "Good gracious, you'll catch your death," she said. "Are your feet wet?"

"Yes'm . . . a little," I said.

"Come right in to the fire. Pop's down sick in bed with it."

She led me into her simply furnished little parlor.

"I have a wonderful surprise!" Mom said. "Don't tell me you've heard it?"

"No. What?" I lied.

"Bert's coming! Tomorrow!"

"Swell. How long has it been, Mom?"

"A year and seven months. The poor boy missed his vacation last summer, you know. Kick off those shoes, dear. I'm going to get you some hot tea. I-I'm quite fluttery and excited—just think . . . Bert—"

She bustled out the door. She did not go toward the kitchen, though, but upstairs, stealthily. There had been sounds of footsteps up there. My heart ached for Mom as I tried not to listen to a murmur of voices. So Bert is coming back, I thought angrily, so that young punk has condescended to make Pop and Mom a visit. The sweet, prodigal son—who has turned Mom's hair white before her time and is doing his best to break Pop's heart. A conscientious objector, eh? That *will* be the pay-off. That will fix things up just dandy—

"Now, then . . . where was I? Oh, your tea—"

"I'll help, Mom."

I followed her into the hall. Then, we both halted. Pop Sedden, fully dressed in uniform blues but without cap or topcoat, was coming down the stairs.

"Oh . . . h-hello, Pop Sedden!" I stammered.

HE DID not answer. He moved like a very old man, stiff-legged, his shoulders hunched. His close-cropped gray mustache twisted. He reached for the knob of the front door, hand shaking pitifully and went outside.

"He-he thought a walk would do him good," Mom said.

I turned and hugged Mom close, and she said, "Bert isn't a bad boy. He isn't. His father just never understood him. He never had any patience with Bert. He's our *own*, Phyllis. We can't forget that . . . we can't."

"Don't worry, Mom," I said.

"I don't worry . . . it's Pop—"

"I'll fix Bert!" I said.

"Oh, you know about his refusing to—"

"Just pinko bunkum they've taught him at school, Mom," I said. (Fearless Phyllis, that's me.) "I'll kid Bert out of it. You let me handle Bert."

"You think it's only a notion?"

"Of course!"

"That's what I tell his father, but—"

"You folks just sit tight," I said. "I can handle Bert."

I left Mom Sedden, after a good talk over the teacups, feeling much better. Mrs. Mac had lied. Pop hadn't started drinking—not yet. Nothing had really happened. I would get to work on Bert as soon as he showed up. It was going to be all right.

THUS, when Mrs. Briscoe hailed me from her front porch, as I set course for my father's office, I walked right over there. Unless I felt in first-class fighting trim, I always hurried past Mrs. Briscoe's. She was the wife of Lieutenant Briscoe, our one "mustang" officer. A big, dramatic brunette filled with persecution and will-to-power complexes, Mrs. Briscoe had been carrying on a personal war against what she called "those Annapolis stuck-ups" for years and years. The fact that everybody liked her husband—my father being especially fond of him—only made matters worse. Mrs. Briscoe wanted us to like her, too, and we just didn't.

"Oh, I didn't expect you to walk all the way across the wet grass, Miss Phyllis," she said. "I only wanted you to stop a moment so I could come over to *you*."

THURSTON GENTRY

I let that one whizz by.

"Pete says I've got to apologize."

"For what, Mrs. Briscoe?"

"I told off Mrs. Conroy and Mrs. Davis. I just couldn't take it any more, Miss Phyllis. They got me down. So do I write them or make it verbal? Pete doesn't know, because he didn't go to Annapolis."

"I'd write."

"Do I send it by my butler or mail it?"

"Just mail them, Mrs. Briscoe."

"Thanks. Not that it'll do any good."

"I'm sure it will."

Mrs. Briscoe relaxed momentarily. "You're all right, kid," she said, "but the others—I wouldn't give them the —skip it. I've got to apologize, so I've got to apologize. Thanks."

"Not at all."

"Wait . . . I'll tip you off to something—"

"Yes?"

"There's bad blood between young Murphy and Mr. Cowles. On account of the Missus, see? I'm telling you this because the captain ought to break it up. Jack's the only one of the lot who's been halfway nice to me and Pete. I don't want him to get hurt. See, Miss Phyllis?"

I shook my head. "I th write a third note of ap Cowles," I said.

Then I walked rapidly the administration build

I ran up the steps of " half-minded to tell my Briscoe. Voices coming office, immediately to t front door, brought me to

…'m go…!" I said.

…tore o… of there like a grammar…ol kid… had two excellent motives: …pe fro… any further questions about Navy Station and the hope that this fire might provide a little excitement.

It was exciting, all right.

I remember that scene in exact detail. A huge stake-body Service truck was stalled halfway through No. 3 gate. Its cargo was covered with a tarpaulin, lashed tight. Black smoke poured from beneath the tarpaulin and just back of the cab. The lower half of a man was wedged between cab and cargo, the upper half hidden in the tarpaulin and smoke.

Two tough-looking young men stood on the ground beside the truck. Marine Sergeant Maginnis, Chief Bosun Nardin, half a dozen marines, the chemical cart and two score sailors and civilians were grouped around the truck, but at a respectful distance. This distance was widening as Miss Phyllis (She Runs to Fires) Hartney dashed up. The two mugs near the truck were doing all the talking.

"Is she going to blow, Savvy?" one of them asked.

"Better come out of it, Savvy!" the other said.

"Don't be stubborn, Savvy."

"Let's pull him out."

"How about it, Savvy?"

Chief Nardin gripped my arm. "She may explode, Miss Phyllis. Best to get out of here—"

"Okay, you darn' fool, get yourself killed."

THIS casual and calm remark from one of the young men near the truck focused my attention on that poor fellow in the smoke. Only his legs were now visible.

I never could stand suspense. I have to *do* something about it. Yanking away from Chief Nardin, I walked over to the truck.

"This is silly," I said. "If it's going to blow up, pull him out!"

The mugs looked at each other.

"She says silly!"

"So it's silly!"

"You get the hell away, Sis!"

"Go on, now. Amscray."

"I will not!" I said.

I grabbed hold of a long dangling leg and pulled, saying sharply, "Come out of that! You'll be killed!"

The leg just kicked loose. At this moment, all the men who belonged to Navy Station charged in to rescue the captain's daughter. There was an idiotic hullabaloo, with the marines unlimbering their chemical cart and the two mugs insisting that they mustn't squirt anything into that truck, and me insisting that this fellow Savvy be yanked out of there before he was blown to bits.

Just as the argument reached its peak, Savvy's upper half appeared from the smoke. He leaped to the ground.

"She's going to blow!" someone yelled.

Savvy was coughing and wiping his eyes.

"Is she, Savvy?" one of the mugs asked.

"Nope," he said, after a few slow coughs. "Fire's out."

"How close to the stuff?"

"Pretty close."

"What burned?"

"Just those mats."

"So he would smoke that pipe!"

"And burn my mats!"

Savvy scowled at the two mugs. He looked like a mug himself. He was tall and slim and had a ridiculous crew haircut; he was wearing flannel slacks, a tieless blue denim shirt and a filthy old leather windbreaker.

"Which one of you yanked my leg?"

"She did!"

He looked at me, smoke-reddened eyes peering from a spottily blacked face. "Hurt you when I kicked?"

"Oh, no, I—"

"I had my neck stretched over some

LIFE'S GREAT MOMENTS . . . . "THE NEW JUNIOR PARTNER"

THIS CALLS FOR Haig & Haig!

● It's only natural that the supreme Scotch should be chosen to commemorate a supreme moment. But why not be equally discriminating at other times? Remember, Haig & Haig is the only Scotch with a 314-year-old record of continuous satisfaction. And yet, despite this distinction, Haig & Haig makes no extra charge for its great name and fame.

broken glass grids," he explained. "Got afraid I'd cut my throat."

"Oh, I am sorry—I thought—I didn't know—"

"Okay. Sis."

Savvy turned to Chief Nardin. "I'm Lieutenant Roberts," he said.

Chief Nardin looked amazed, and I've often wondered how *I* looked.

"Oh, how do you do, sir!" the chief said. "I'm Nardin. This is Sergeant Maginnis."

Lieutenant Roberts shook hands with both of them and introduced them to the two mugs. The two mugs turned out to be a Mr. Prentice and a Mr. Rorabeck, both graduate engineers from M.I.T.

I nudged the chief and he hastily did the honors, naming me as "Miss Phyllis, the skipper's daughter."

"N-not Miss *Hartney?*" Savvy asked.

"I've swallowed my foot!" Mr. Prentice said.

"Always remember it was Dutch who told you to scram," Mr. Rorabeck said. "I'm Pat—and ever the gentleman."

Savvy looked at me seriously. "I thought Captain Hartney was a bachelor," he said. "I mean, he writes like a bachelor."

"Oh—y-you've read his books?" (What goes on here? I am tongue-tied and stupid.)

"Yes. Great stuff."

"I've read 'em too," Dutch said.

"Savvy made us read 'em," Pat added. "Your dad is his hero."

BEFORE Savvy could say anything Roger marched up to take charge of the situation. He looked like a toy officer, fresh from the bandbox, and he was very military. "Fire out? Good! Take the apparatus back, Sergeant." Then he turned to our group near the truck. "Lieutenant Roberts?"

"Yes." Savvy said.

"I'm Collins, aide to the commandant." They shook hands. "Mr. Prentice . . . Mr. Rorabeck?" More hand shaking.

Roger saw me. "Oh, Phyllis—I am sorry—may I present—"

"Met 'em!" I said. "I pulled his leg and almost cut his throat."

"Oh . . . eh? You did?"

"Lieutenant Roberts put out the fire, singlehanded. It was going to blow up any moment!"

"No . . . not that close," Savvy said. (Look at him frowning. I've got to lay off the hero stuff. Just annoys him. I know whom he reminds me of—Colonel Lawrence! All he needs is an Arab headdress. He has the same kind of homely-handsome face, the same eyes. Whoa, now, Phyllis—don't go romantic—)

Roger had been thrown off stride momentarily. But he stiffened and looked at the truck.

"How did it start?"

"I was careless with my pipe," Savvy said.

"Indeed? . . . Well, no serious damage. The captain thinks you'll find everything you need at the basin. I suggest that Lieutenant Roberts come along with me—to report. Chief Nardin will direct you fellows to the basin."

"Very well," Savvy said, meekly.

Roger looked at the truck again. "Better post a guard around the area, hadn't we, Roberts?"

"That's up to you. But we'd like to camp on the job."

Dutch and Pat nodded, grimly, it seemed to me. Savvy reached into the cab and dragged out a battered carryall. The motion was deft and graceful. (Yep, Lawrence of Arabia, young Phyllis. He's moved right into Navy Station. Oh, Tecumseh, my hair . . . my old coat . . . my muddy shoes—)

It had stopped drizzling now and the sun was trying to poke a few rays through the clouds. But Phyllis (I Must Know All) Hartney was still in several kinds of fog and beginning to resent it.

I pointed to the truck and asked, "What's in it that almost blew up? Dynamite?"

Roger looked pained. Savvy seemed a little bewildered. Dutch said: "No, not dynamite." Then, Roger said hastily, "Going our way, Phyllis?"

"Nope. Thanks," I said.

Savvy ducked his head at me, shyly. "Hope to see you again very soon," he said.

"You will," I said.

He and Roger started off toward the Officers' Club, Savvy looking like a charmingly mysterious vagabond beside Roger's spruce figure.

Dutch and Pat, with a quick, "Be seeing you, Miss Hartney," climbed into the truck. They didn't want the subject of what the truck carried reopened.

I looked at Chief Nardin, as he stepped on the running board to guide them, and winked. His broad, bland Swede face was deadpan, but a white eyelash flickered. The chief and I have had a working agreement for several years. He tells me what he thinks the captain's daughter ought to know and I tell what I think a chief bosun ought to know. Our liaison system would do credit to the Gestapo.

The big truck rumbled off, taking the road to the Basin. This was a secluded backwater pond, dredged very deep, in which there was an abandoned submarine-escape practice rig.

I started back to the house. It was shocking proof of my essential superficiality and lightmindedness that, as in a twinkling, I forgot all the problems which had made Navy Station seem a sinister place but two hours before. Pop and Mom and Bert Sedden; Ensign Murphy and Mamie Cowles; Roger and feuds vanished in the fresh new sunshine now streaming down on the yard.

"It's because of Dad," I told myself. Ensign Murphy; Mrs. Briscoe and her "It's that letter he got from the admiral. They'll forgive him and soon we'll be leaving Navy Station!"

But I have promised to tell the truth straight through. I did think about my father and I was happy in the hope that justice would be done him after all. But I was also thinking, "Mrs. Mac said he wasn't married—he wasn't married. He's a bachelor, a bachelor, a bachelor!" (Note to all female Navy juniors: This is a good marching refrain.)

DOLORES suspected something. "Señorita!" she exclaimed, in the front hall. "You are 'appy! Is true, is true?"

"Don't tease an old woman," I said.

"What has happened to you?" Dolores continued in Spanish. "Your cheeks are red. Your eyes are full of joy. You are no pussycat, now. You are much tiger. Much!"

"Aunt Phyllis still has her moments, my child," I said.

I think I have said before that Dolores and I are *simpatico.*

"You tell fib to me, Señorita," she said. "Is the new man! You 'ave met the new man—this officer Kirstell, who came in auto!"

I grinned. "Don't try to catch Aunty," I said. "There are three men. They came in a truck. None of them is named Kirstell."

"No, no—the captain sent note!"

Dolores ran to the hall table and came back with the note. It read:

"Phyllis:

When you buy a Ford car . . . what happens?

. . . NOT JUST BUY so many pounds of steel . . . ss and rubber when you buy a car.

. . . t you do buy is the ability of men and . . . es to convert these materials into use- . . . on ou on the road.

. . . t this out because when you buy a . . . ar its job is done differently for you . . . ne way that it is done by anybody else . . . car building business.

. . . 1,100-acre Ford Rouge Plant is not just the largest industrial plant in the world, but it is also unusual in its basic idea.

In addition to making finished motor cars, it has its own steel mills, its own tire and glass plants, its own modern plastics division.

It is so complete that raw iron ore may be turned into parts of a finished car within as little time as 28 hours.

Yet at only one point in the whole Ford plant do we take a profit on the things we make. That is on the finished car, and the profit there is small. In every case, the Ford-produced materials that go into Ford cars are put into them at cost.

That is how it happens that the buyer of a Ford today gets a fine-car engine, extra quality throughout the car, and costly design and construction found in no other car at the price level. These things come to you as your dividend in the Ford way of doing business.

. . . ome ord Advantages for 1941:

. . . EW RO . . . RESS. Bodies are longer . . . wer and . . . his year, adding as much as seven . . . ches to seating width.

SOFT, QUIET RIDE. A new Ford ride, with new frame and stabilizer, softer springs, improved shock absorbers.

POWER WITH ECONOMY. The Ford engine leads the low-price field in horsepower; holds many records for economy as well as for performance.

BIG WINDOWS. Windshield and windows increased all around to give nearly four square feet of added vision area in each '41 Ford Sedan.

LARGEST HYDRAULIC BRAKES in the Ford price field, give added safety, longer brake-lining wear.

GET THE FACTS AND YOU'LL GET A FORD!

It's Up to Skip

Continued from page 18

Tony chewed his unlighted cigar to the extreme corner of his mouth, and scowled. "He is. The general has been horsing around airplanes for twenty-five years. And he's spent about fifteen of 'em as a military pilot."

"A big fat guy like that?" said Skip, in amazement. The general weighed well over three hundred pounds, and most of his weight had congealed, fore and aft, around his middle.

Tony's lips quirked. "He's like most of us big fat guys," he said dryly. "He was probably thinner when he was younger. . . . But he knows his stuff. The reason he wants the job this way is because it would cost about two grand more an airplane to add the brake, flap and landing-gear controls you're talking about. On a hundred ships, that would amount to two hundred thousand dollars, which is enough to buy two extra airplanes. All he wants those auxiliary controls for is to give the pilot a rest, once in a while. And maybe so if the pilot is killed, the bombardier can tell the rear gunner how to take the ship to its objective and drop the bombs. After that, if they get back to their base, the rest of the crew can bail out and let the ship go to hell."

"It's still dumb," said Skip. "Suppose some of them are wounded, and *can't* bail out? Personally, I think the general's like most of these foreigners—overrated. And another thing—I'll bet if he had to ride that gunner's compartment in a raid, he'd—"

"Don't worry about it." Tony advised him. "He won't. And I wouldn't count on his being overrated, as you put it, while you're making out your flight report today. He *might* even be as smart as you are."

WALLY MEAD, General Symarion, the boss and Slim Riley came out of the operations office just then. The boss smiled, and said, "Good morning," and introduced them to the general. . . . "*Enchanté!*" said Skip, in his best French.

The general gave him something that might have passed either for a smile, or for that expression a man's mouth assumes after having bitten into an underripe persimmon. "*Un plaisir!*" he grunted. He was a short, swarthy man, incredibly fat, and was dressed in a pair of white coveralls that seemed to increase his actual girth. He sported a tiny black mustache, and a brusque and monumental dignity that Skip supposed was meant to emphasize his high military rank and all-round importance. Skip was prepared not to like him; and he was not disappointed. . . . Slim Riley, meanwhile, had not spoken to him. . . .

Wally Mead was a small, stocky man of perhaps thirty-five, who had ex-U. S. Army Air Corps written all over him. . . . "Let's mobile," he said. He walked around to the front of the ship and waved vigorously to attract the attention of Jerry Southern, the check-out mechanic. Jerry throttled the engines back, swung open the top of the cockpit enclosure, crawled out and grinned. "Everything's sweet, Wally," he said.

"Good!" said Mead. He turned to Riley. "You ride in the front compartment, Slim. I'll read the data for your report down to you through the interphone from my instruments. Skip will ride in the tail end with the general, and fill in *his* report from the instruments back there. That way, we'll have two sets of performance data, and the general can compare them. Explain that to him, will you, Skip?"

Skip did so, and the g ra

He ...ed...the altimeter, and saw that it ...ved...,000 feet. With the normal lag of the instrument, that meant that the XBSA had less than half that altitude between it and the hard surface of the earth. . . . Frantically, he took the stick in both hands, braced his feet against the bulkhead in front of him, and pulled. Whatever was jamming the controls still resisted him.

He pulled harder, and whatever was holding the stick yielded a bit, and then suddenly came free. His every instinct, then, was to pull the stick clear back into his stomach; but he was thinking again, by now, and he remembered that the XBSA weighed over ten tons. Ten tons translated into a sudden pull-out from a dive of such terrific velocity were many times more weight than she was built for. A sudden pull-out now might tear the XBSA to pieces like ■ shot clay pigeon. And the altimeter read 6,000 feet. . . .

He looked at the inclinometer again. It was trembling a little against its stop; but that could mean anything; and the air-speed indicator stood at four-twenty-five. Sweating, he eased back on the stick some more, and cursed because he couldn't see the ground.

"Skip! Skip!" came Slim's voice, through the interphone. "For the Lord's sake, pull out!"

Skip eased back on the control stick some more. The air-speed dropped to 400. "How much altitude have we?" he shouted.

Slim's voice held a frantic urgency. "None, guy, none! Horse it! Drag her back and pray!"

Skip backed against the rear bulkhead and pulled. The stick shivered in his hands like a taut steel cable in a high wind; and all through the ship, rivets, ribs, longitudinals and plating groaned and crackled. Skip was thrust breathless into his seat; and a horrible blackness started to drift across his eyes. But through it, dimly, he saw the inclinometer needle hit zero; and then show ■ positive rate of climb. With a prayer of thanksgiving, he eased forward on the stick until the pressure lessened. Briefly, through the small side window of his boxlike prison, he caught a flash of the high buildings of Western City. He was beneath their tops! . . .

"Whew!" came Slim's voice through the interphone. "That was close!"

SLOWLY, Skip eased the stick back, opened his throttles, and commenced to climb. The relief of still being alive left him weak and shaking; and for a full minute he sat there without thinking or feeling, flying the ship mechanically in a gentle climb. Then, suddenly, he thought of Wally. Something must have happened to Wally, for it must have been Wally's body that had jammed the controls. Then Wally must have been unconscious, too. . . .

He worked the stick back and forth. There was no responsive movement from the front cockpit. "Wally!" he shouted through the interphone. "Snap out of it!" Still there was no answer.

Behind him, a voice said, "What happened?" and he started. He had forgot-

Wet Paint CROCKETT JOHNSON

• You'll enjoy a double thrill when you go Burlington to colorful Colorado! The thrill of vacationing where you can ride, hike, golf, fish, swim or just laze in the invigorating atmosphere of the Rockies. And the thrill of riding the diesel-powered, stainless steel Denver Zephyr which glides you from Chicago to Denver, just overnight. Think of it, you save a day each way—precious vacation time to spend in seeing Denver and its mountain parks, Colorado Springs, Pikes Peak, Boulder and enchanting Estes Park.

• Burlington's special summer fares to Colorado are surprisingly low. And whether you ride the Zephyr or a fine steam train, you'll enjoy Burlington hospitality and the comfort of complete air-conditioning. Speedy service, too, from St. Louis to Colorado.

• Travel independently or join a congenial *Burlington Escorted Tour* with everything arranged in advance. Either way, Burlington gives you the greatest travel value.

GOING TO CALIFORNIA? Cool Colorado is right on the way. Enjoy a visit in this enchanting playground. Thence, thru the heart of the glorious Colorado Rockies and the spectacular Feather River Canyon—to the coast. Magic daylight hours over the most scenic route to California.

TRAVEL ON CREDIT. Take your vacation this summer and pay later. Check coupon for complete details of this convenient service.

GIVE YOUR LAZY LIVER THIS GENTLE "NUDGE"

Follow Noted Ohio Doctor's Advice To Feel "Tip-Top" In Morning!

If liver bile doesn't flow freely *every day* into your intestines—constipation with its headaches and that "half-alive" feeling often result. So step up that liver bile and *see* how much better you should feel! Just try Dr. Edwards' Olive Tablets used so successfully for years by Dr. F. M. Edwards for his patients with constipation and sluggish liver bile.

Olive Tablets being *purely vegetable*, are wonderful! They not only stimulate bile flow to help digest fatty foods but also help elimination. Get a box TODAY. 15¢, 30¢ and 60¢.

Now Many Wear

FALSE TEETH

With More Comfort

FASTEETH, a pleasant **alkaline** (non-acid) powder, holds false teeth more firmly. To eat, talk and laugh with greater security and to avoid the worry and discomfort of slipping, rocking, wabbling false teeth sprinkle your plate with FASTEETH. No gooey, pasty taste or feeling. Does not sour. Checks "plate odor." Get original **alkaline** FASTEETH at any drug store. Accept no substitute.

Plates loosen when gums shrink. Have your dentist re-adapt your plates to the changed gums. Until this is done you can get valuable aid in holding the plate more securely by using FASTEETH daily.

ALKALINE DENTAL PLATE POWDER

Be sensible about HEADACHES!

"For 3 generations our families have depended on Bromo-Seltzer,"

says John H. Greif, North Bergen, N. J.

"Around 1900 when, due to my work, I suffered from severe headaches. I found immense relief with Bromo-Seltzer and doubt if I could have carried on without it. Time and again our old family friend, Bromo-Seltzer, has given us relief when we needed it most—both from *headaches* and *headache 'stomach upset.'*"

That's why millions depend on Bromo-Seltzer! Because you should realize that, with a headache, so often your nerves and stomach are affected, too. Bromo-Seltzer does *more* for you because it not only helps STOP THE PAIN, but also helps CALM THE NERVES and SETTLE THE STOMACH. Next time,* get this sensible, *3-way* relief. Use Bromo-Seltzer as directed on the label.

Carefree Since He Went "GLOVER'S" For His Hair. You'd Be, Too!

● Any serious attempt to curb Dandruff, relieve Itching Scalp or check excessive Falling Hair calls for a serious-purpose *MEDICINAL* treatment—not something that's just slicked on the hair. Use Glover's Mange Medicine and massage and it will soon be apparent to you how really effective it is. Nobody knows it better than your Barber—ask him! For the shampoo, use Glover's Medicated Soap—an important part of the treatment. FREE booklet on Glover's famous System for the Scalp and Hair. Write today! Address GLOVER'S, Dept. B, 460 Fourth Ave., New York.

GLOVER'S MANGE MEDICINE

ten Symarion. He turned in his seat. The general's face was white as chalk; but he was in complete command of himself.

"I don't know," said Skip. "Something wrong with the pilot, I think." Through the interphone, he said, "What's the matter with Wally, Slim?"

"Wait a minute," said Slim. "I'll see if I can find out." The bombardier's compartment on the XBSA was below and slightly forward of the pilot's cockpit. There was no passage between the two, but there was a small window: covered with safety glass, through which the pilot, when he was sitting erect at the controls, could see the bombardier's hand signals during bombing maneuvers.

SKIP waited. After a moment Slim called back. "He's out cold. It looks like it's all your party, now."

"What do you mean?" asked Skip.

"I mean this," said Slim. "It looks to me as if Wally's hurt bad. I don't know what happened to him, but he's got a gash in his head, there's blood and glass all over the cockpit floor, and he's hanging sideways out of his seat like a wet sack."

"Oh!" said Skip. "Oh! . . ." He took a deep breath, and sat for a moment soaking up the realization of his predicament. It was amazingly simple, yet horribly complex at the same time. So long as it remained in the air, the XBSA could be flown from the rear cockpit; but so far as Skip could see, that was the only ray of light in the whole mess. There was no communication between the rear gunner's compartment and the pilot's cockpit. The bomb bay, sunk into the belly of the ship and occupying most of its fuselage, was between them. Neither was there any means of gaining the pilot's cockpit from the bombardier's compartment. And in a ship with wheels and flaps up and brakes inoperative, the chances of anyone's surviving a forced landing at ninety miles an hour were so slight as to be negligible. Particularly since—from the rear gunner's compartment—he could see neither down nor forward to judge his landing.

He took another deep breath, and said to the general, "The pilot is badly hurt, *M'sieu*."

The general turned the precise shade of a piece of old parchment. "That's very bad," he said.

"Without hydraulic controls, I cannot land the ship with safety. You will wish to use your parachute, no doubt?"

"But certainly," said the general. "We must all use our parachutes. The ship is not meant to be landed from back here."

Skip shrugged. "Nevertheless, I must try to land it," he said; "I cannot leave the pilot."

THE general stared at him in amazement. "But that would be very foolish," he said. "Of what use to kill two men instead of one?"

"I'll have to take that chance," said Skip.

The general shrugged. "Are you then an experienced pilot?"

Skip shook his head. "I have two hundred hours, but I have flown only light ships, M'sieu."

"The thing is impossible, then. Even I would not attempt it. A man may take chances, yes. But here you have no chance at all." He unbuckled his safety belt and stood up. "I would stay, if I could help, but it would be useless."

Skip nodded. "I understand, *M'sieu*." Through the interphone he said, "Where are we, Slim? I mean, are we over open country?"

"No, pal," said Slim, sardonically. "You're over the ocean. Take a slow left turn and fly about northeast."

"Thanks," said Skip. "I've got to figure out some way to see from back here. Do you think I could get the top enclosure open? If I could, maybe I could swing this table around, sit on it, and poke my head out the top."

"Kid," said Slim vehemently, "if you touch that enclosure, you're going to be minus the door, the vertical stabilizer, your rudder, and an airplane. It isn't made to be opened in flight. Get your boy friend to open the lower gunner's door. You won't be able to see where you're going, but at least you'll know where you've been."

"Thanks," said Skip. The lower gunner's door was designed so that a machine gun could be trained down through it, and was also intended for use as an escape hatch. Its opening was just twenty-two inches across, and forty-eight inches long. . . . The general slid the door open, and Skip looked back and down. Two thousand feet below him the blue waters of the Pacific gleamed in the sunlight.

"How far out are we?" he asked Slim.

"About three or four miles offshore. Turn left a little and you'll be heading just north of the airport."

Skip made the turn. "Look!" he told Slim. "I've got an idea. You and the general can bail out when we get over the field, and I'll have them talk me in from the ground by radio. How does that sound?"

"You wouldn't be asking for advice, would you?"

"Oh, drop it," said Skip. "I'm sorry about yesterday."

"Okay, kid," said Slim. Then: "Think you can do it?"

"I can try," said Skip. "It's been done before."

"Sure," said Slim, ironically. "Under a hood, with wheels, brakes, flaps and a check pilot riding in the right-hand seat in case anything went wrong. But I guess it's the best answer. I'm no pilot. They can tell you more from the ground than I could from here."

Skip snapped on the auxiliary radio control, and put on the headphones. There was a faint and unintelligible babble in his ears. He twisted the dial slightly, snapped on his transmitter and began calling Western Aircraft. He couldn't raise them, and realized with a sort of sick despair that the set wasn't working. "That's all I needed," he told himself. . . . He called into the interphone. "Well, that's out, too. The radio's shot."

There was a moment's stunned silence. Then Slim said, "Now what?"

"I don't know," said Skip uncertainly. "I wonder how this w get rid of the general the damn' thing into with the throttles cut a couple of practice a field. I'll call off altit directly down at the p ing over, and write the the altitudes I give yo get my approach pre out, you can bail."

"What the hell do y asked Slim, indignantl

"Look," said Skip w a sucker. I'll make o up front like you ar have the chance of a dog pen. We'll be do we hit."

"And *you* wouldn't port without me to tell going. I'm sticking, so . . . Besides, I'm workin I had my knife in my just about got the scr window behind me. from where I sit, like I reach through with a I just tore loose from t mechanism, and loop i ing gear retracting leve

CANADA AT WAR

is still the

GREATEST PLAYGROUND IN THE WORLD

14 Million* Americans *Say so!*

DON'T take our word for the merits of Canadian vacations or for the way we treat you. Ask any one of the 14,000,000* Americans who visited us last year. Perhaps one of them was your next-door neighbour. Ask *him*.

He will soon tell you how easy it is to cross the border; how courteously you are received everywhere; how free you are to move about; how willingly banks, hotels and stores pay the premium on American currency; how easy it is to leave Canada when you please.

And he'll tell you about the wonderful vacationland this great north country really is; how cool and bracing, with fine modern highways stretching in all directions, accommodations to suit all budgets and unlimited scope for every kind of holiday.

Yes, Canada welcomes you as never before. She offers you the freedom of her towering mountains, untracked forests, sparkling lakelands, silver seashores, brilliant cities, lovely towns and of all her broad historic countryside.

**Over 14,100,000 United States citizens visited Canada in 1940. This tremendous number, over 10% of the total U.S. population, does not include the many millions who came to Canada for less than 48 hours; it includes only those who stayed in Canada for more than two days.*

☆ The U.S. Department of State, Washington, suggests U.S. citizens carry some documents of identification such as old passports, birth or baptismal certificates, naturalization certificates, club cards, tax bills, or similar papers.

YOUR CANADIAN VACATION WILL DO DOUBLE DUTY!

Your Canadian vacation will do far more than give you a glorious time. *It will help the fight for freedom.* For the American dollars you spend in Canada will all go back to the United States in payment for war supplies which Canada is buying there in tremendous quantities.

PARTNERS IN THE BUSINESS OF DEFENSE!

WHEN it comes to national defense, one *trained man* is worth a dozen untrained men!

That's true of America's armed forces—which need chemists, mechanics, machinists, electricians, radio experts, accountants and a dozen other classifications of trained men. And trained men in America's armed forces get better pay and higher ranking!

It's true of America's industry—"the front line of national defense." Today, business and industry are crying for skilled, trained manpower! Never has there been greater opportunity for the alert, ambitious man who has mastered his line of work through study and practice!

Yes, the *trained man in uniform* and the *trained man in industry* are "partners in the business of defense." Whether you're serving Uncle Sam in barracks or factory, farm or office, TRAINING can make you a better citizen, a real asset to your country!

SANDPAPER THROAT

Throat raw, raspy, due to a cold? Get yourself Luden's and help yourself to quick, soothing relief. In addition to their special formula and cooling menthol, Luden's, like hot lemonade, have an alkaline factor.

general's face showed not a trace of fear. . . . He merely shrugged, said, "*Bonne chance!*" and started to ease himself, feet foremost, through the gunner's door. . . .

Skip throttled back, bringing the air speed down to an even hundred and thirty miles an hour, and slightly raised the XBSA's nose. Over his shoulder, he said, "Now!" and waited for the ship to be relieved of the general's three-hundred-odd pounds. Nothing happened. Then there was a shout from behind him, and he turned in his seat.

The general was wedged halfway in and halfway out of the gunner's door, with his legs dangling in space, and his ample waist spread out over the combing; and it was immediately apparent that he would remain in that position for the rest of the flight. His corpulent body was too large to pass through the opening; and Skip knew that to lift him back into the ship was beyond his strength. He began to laugh. Reasonably, at first; and then uncontrollably. There was nothing but tragedy in the general's position; but still he could not stop laughing.

Slim heard him through the interphone. "What's so damn' funny?" he asked. Skip managed to tell him, and Slim started to laugh, too.

"Ho! Ho! Ho!" he roared. "Ho! Ho! Ho! But what are you going to do about him?"

SKIP wiped his eyes with the back of his hand. "What can I do? I'm going to leave him there!"

"Ho! Ho! Ho!" roared Slim, again. "I hope that landing's good! You're sure going to have a dead general if it isn't! Ho! Ho! Ho!"

And Skip realized, with a suddenness that left him shaken and sickened, that if he put the ship on the ground in any but the tricycle landing position, or if—and this was very likely—he should bounce and drag his tail after landing, the general would almost certainly be cut in half. . . . A horrible desperation came over him. "Slim!" he said frantically. "What's the use of kidding ourselves? I can't land this thing from back here. I can't see. Take a look at Wally. Yell at him. Do anything! See if you can't bring him to."

"Kid!" snapped Slim. "Quit that! You've got to land us. Wally's out of this picture. . . . By the way, don't you want to get rid of some of this gas?"

"How can we?" Skip asked him.

"I've still got that piece of cable," said Slim. "I think I can reach the dump valves with it."

"Swell!" said Skip. "Let both wing tanks go."

Behind him, the general said, quite calmly, "The man up front, he is still there?"

Skip nodded. "*Oui, M'sieu.*" He looked at the general over his shoulder. He was pale, but there was no trace of panic in his eyes. "I—I'm sorry that I laughed."

"It is nothing," said the general. "My position has its elements of drollness . . . I see now that the wheels are down. Since I can see them, may I suggest that you allow me to give you directions while you are landing? I have had much experience with fast ships."

Skip stared at him, and swallowed. "*Oui, M'sieu le Général.* I should be glad of your help. And may I compliment you on your courage?"

"Courage?" said the general. "It is not courage. In my profession one does what one must. The man in front will guide your approach. At fifty meters from the ground, I will take over. Above all, be calm," he added. "With the wheels down and the fuel you have just released—and which, incidentally has given me a shower bath—our chances are much better."

"I'm sorry about the gas, Skip. "I did not think about . . ."

"It will soon evaporate," general. "Now, tell your ma . . . the approach. Be tranquil- . . . luck. . . ."

"*Bonne chance, mon Gén* . . . Skip.

THEY came in on a long l . . . over Western City. Lookin . . . down. Skip saw its tall buildi . . . out like landmarks beneath . . . felt strange, and tight, and . . . helpless. . . .

Slim's voice said, throug . . . terphone. "There's another . . . ing off, kid—one of the transp . . . must've figured out that s . . . wrong. Shall we wait for ther . . . we could signal them to lea . . . the approach."

Skip thought for a moment. . . . he knew, help Slim to hav . . . ship flown by an experience . . . rectly in front of him. But at . . . time—"I don't know," he sa . . . do things look?"

"Not so bad," said Slim. . . . undershoot a little."

"I'd rather have it like t . . . Skip. "I can boost her in wi . . . gines . . ." Then: "We w . . . We've dumped most of our . . . don't want to risk running out . . . they wouldn't know what w . . . anyway. The wheels are down . . . naturally think Wally was f . . . We'd better take her on in."

"Okay," said Slim. "You're . . . tor."

Skip cleared his throat. "In . . . thing happens," he said, "I . . . to tell you—I mean I—"

"Forget it!" said Slim. The . . . pretty low. You'd better gi . . . little gun."

Skip advanced his throttl . . . "When I say 'okay,' next t . . . said, "you stop talking. The . . . can see the wheels. He's goin . . . me in."

"Got it, kid," said Slim. . . . Be . . . cut your throttles, now. An . . . easy. You're doing fine."

"Thanks," said Skip. "Be s . . . belt's tight."

"Don't worry about me," s . . . "I'm doing all right."

SKIP eased his throttles back . . . mind's eye, he could see . . . coming up before him as it had . . . times before. Over to his left . . . the factory buildings and the . . . tower; ahead—just above hi . . . would be the sea and the hori . . . on his right would be the private . . . on the far side of the field. He . . . his eyes on the air-speed i . . . keeping it carefully at 95 m . . . hour.

Behind him, the general sa . . . calm voice, "Listen to me, nc . . . mechanically Skip said, "Okay . . . He shot a brief glance downwar . . . ground below him. As he did . . . boundary markers flashed past. . . . general said, "We are drifting . . . your left wing a little," and m . . . cally he pushed the stick slightl . . . left, and then back until the tu . . . bank indicator was centered ag . . .

"*Ex-cellent!*" said the gener . . . voice, somehow, sounded cheer . . . confident. "And now, *mon an* . . . back slightly on your stick." S . . . and the air speed dropped tow . . . red line on the dial that mark . . . XBSA's stalling point.

"Easy!" said the general. . . . Pick your right wing up! No . . . it! Float it! A little more! Ther . . .

The wheels touched, bounced s . . . and then touched again. "Forwa . . . your stick!" said the general. . . . the front wheel on the ground. . . . did!"

Skip opened the enclosure at the top of the gunner's compartment and peered out. And then he got very, very sick.

SKIP took the rest of the day off. He didn't see Tony until the next morning, when he came into the production office.

Tony looked up at him from behind his desk. He had a funny look on his face. "How you feeling, kid?" he asked.

"I feel all right," said Skip, unenthusiastically. "Did you hear anything about Wally?"

Tony took the dead cigar out of his mouth. His eyes were on the kid's face. "The doctor says he's going to be okay . . . I suppose you heard you're quite the little hero," he added.

Skip nodded. "Yes," he said, savagely. "My hand's sore from all the congratulations."

"I'll bet," said Tony. "By the way, the general is putting in those auxiliary hydraulics you were yelling about."

"That's good," said Skip.

"The general spoke to the boss about you, too," said Tony. "He's going to give a banquet for you. A nice big banquet. You'll like that, now won't you?"

"No!" said Skip. "I don't want any banquet. Not for me, anyhow. The guys who ought to get the banquet are Slim and the general."

The funny look left Tony's eyes. "Then you learned something yesterday, didn't you?"

"Yes," Skip burst out. "I wasn't so smart, after all. Without those two guys to help me, and think for me most of the time, I'd have killed Wally and myself sure."

Tony said, "I'll speak to the boss, today, kid. We'll make that banquet for three."

"Good!" said Skip. He broke off for a moment and looked out into the street. "But look," he added. "I *was* right about those controls, wasn't I?"

"Oh, shut up and beat it!" growled Tony. . . . But after Skip had left the office, he put the cigar back in his mouth, cocked it at an angle, leaned back in his chair and looked at the ceiling. He was grinning.

the Akron or the LZ-130, could
ca y four or five of their own pur-
in belly hangar. You remember
"he k-on" experiments conducted
ur avy years ago with its big air-
s.

Another point: Dirigibles can mount heavier armament and carry much more ammunition than its harriers without sacrificing much performance.

Also, if both plane and gun protection failed, it would still take a reckless and drastic thrust to fetch down a dirigible—provided it is filled with helium. Dirigibles are divided into many compartments, or "ballonettes." You have to rend each virtually into a sieve to let so much gas escape that all buoyancy is lost.

THE United States practically has a corner on this odorless, tasteless, colorless gas; nearly all the world's supply being found in the natural gas of the oil fields of Texas and Kansas. All our other resources having been made available to the British, I assume helium would be, too.

But the factories and the art of airship building lie fallow. Many, many long and valuable months would be lost in tooling and in the various oddments of preparation before large production could be achieved. Meanwhile, our Navy has six airships, small ones: 48 more authorized, but only 6 appropriated for and on order.

What do you think? W. B. C.

Telephone Tales

BY LONG DISTANCE

says Bill McGann a credit man:

"I find that certain types of debtors
Ignore my best collection letters,
And seem to more or less resist
The point that their accounts exist—
In which event, my sage advice is
That nothing quite so well suffices
As does the tactful friendly tone
Of a request by telephone.
As others will no doubt attest,
This personal approach is best
For bringing in remiss accounts
Of either small or large amounts.

"And naturally this same resource
Has always been my first recourse
For checking people's credit rating
Without unnecessary waiting.

"In credit work," friend Bill exults,
"Long Distance surely gets results!"

THIS "INEVITABLE" TALK

AMONG the ideas President Roosevelt has been voicing of late, we've enjoyed most the falls he has taken out of the thought that totalitarianism is inevitably the next phase in human evolution. He simply denies this proposition—calls totalitarianism tyranny and slavery, and says it need kill off democracy only if believers in democracy stand by with folded arms and craven hearts.

Time will tell about that. Certain it is, though, that totalitarianism is not the first force in history that many people have believed to be the inevitable master of the world.

Napoleon Bonaparte, for example, was as good a propagandist in his day as Adolf Hitler in this. Napoleon's Continental System was going to tie up all Europe in an anti-British economic bloc, with perverted overtones from the French Revolution as its basic philosophy. For years before the Battle of Leipzig in 1813, which set Napoleon's feet stumbling toward Waterloo, millions of people all over the Western world thought Bonapartism was the inevitable next phase in that world's progress.

In the late Middle Ages, devout Catholics feared that Protestantism, with its new crude vigor and enthusiasm, was the inevitable conqueror of the ancient Church. What actually happened was that neither faith scored a knockout victory. Each gradually affected the other for the improvement of both.

Speaking of religion, Mark Twain once got seriously concerned over the Christian Science Church. Mark explained, in a long, interesting and long-ago-exploded essay, that a Christian Science hierarchy was inevitably going to fasten an unbreakable grip on the minds, souls and tangible assets of the American people.

When the Mohammedans really got going around the Mediterranean in the 7th and 8th centuries A. D., the idea spread through Europe that these people were the inevitable rulers of the known world. That wave broke at Toulouse, in southern France, in 721. Similar reverses overtook the ancient Persians and Carthaginians, the Huns and Tatars and Mongols of the Dark Ages, the Russians and Swedes and Spaniards of the Renaissance and early modern times.

In our own country, from about 1789 to about 1920, there was a nation-wide conviction that American democracy was inevitably going to spread throughout the world. Thi
was shared with dread by sundry r
of the Old World.

Beginning about 900 A. D., a beli
grew up in Europe that the end c
was inevitably scheduled for 1000

Pardon us, then, if we seem a
about the inevitability of totalitaria
where. We've heard that "inevit

COVER ARTHUR CROUCH

ANY WEEK

WE WERE about to start with a bit of whimsey when our telephone rang. A gentleman who said that his name didn't matter (and he may be right) told us that he had just arrived from Florida with a few disturbing tidings. He was quite breathless, and we're panting a little as we pass it along. The general impression, said he, is that when presently we maneuver ourselves into the war, our Navy will move majestically eastward bent upon making life completely insupportable by mankind's number-one enemy, the psychotic Mr. Hitler. However, it's not going to be so simple, he said. He has discovered that "scores of German U-boats are already lurking off the Atlantic coast of the United States and northern South America." Moreover, "the French island of Martinique, in the Caribbean, and the French islands of St. Pierre and Miquelon, off the south coast of Newfoundland, are already bases for Nazi submarines." We asked him, of course, why these lurkers hadn't already been at work off our coast, sinking British bottoms within a hundred miles or so of the United States. "Who says they haven't?" he demanded. "However, you haven't seen anything yet. Wait." So we may as well wait.

ALSO the drinking-liquor situation is becoming more acute. To begin with we have incensed the citizenry of Brownwood, Texas. In one of our weekly Our New Army pages it was reported that, while Brownwood is dry, whisky prescriptions could be had for fifty cents. Mr. W. Lee Watson of Brownwood denounces it as "unfair reporting." Says he: "After all the work the Chamber of Commerce has done to attract people to this town, I think it is downright unfair. Why, there are plenty of places in town where you can get a prescription for two bits. In fact, if your malady is so mild that a half pint will suffice, the prescription is only fifteen cents." From Mr. Will Crossmier comes a protest that "in no dry territory in the United States can you find more nor honester bootleggers than in Brownwood, my home town. Why impugn the patriotism of the town? We are not profiteering on our soldiers. A prescription costs two bits. If you're a little short, twenty cents will do. No reasonable offer has ever been turned down. We're dry but honest."

ANYWAY, Our New Army may be reinforced before long by the enlistment of Mr. William H. Dixon of Glendale, California. Our latest word from Mr. Dixon is that he's pretty well disgusted, not to say defeated, by the difficulties of maintaining his civilian status as a building contractor. It's somewhat involved. "On the days that I'm not busy making out government reports or voting against thirty-dollar Thursdays," says Mr. Dixon, "I build houses and try to sell them to the boys who work in near-by airplane factories. Recently I built a group of these little nests on a street where the city had failed somehow to acquire title to the five feet of ground where the sidewalk should go. To get a permit I was required (a) to pay a city inspector ten bucks a day to sit on a nail keg, smoke his pipe and watch my men, using my materials, build a cement walk on my five feet of ground and (b) to deed the five feet, including pavement made with my cement, to the city free. I tried to get the inspector job for myself but was told I would have to put up one hundred dollars to join something or other. So I think I'll join the Army which is, as far as I know, the only organization left that demands no initiation fee."

THE only time we've ever been in Marcus Hook, Pennsylvania, we managed by agility and, we think, some pretty clever strategy, to escape alive. We were being entertained by a Mr. Kouffler in a tavern. As we remember it, it was a darkish place but the beer was good. Off in a corner, all alone, sat a gentleman of formidable proportions. To our amazement, he didn't like us. Without arising he growled deeply and told us that he could lick us. We told him that we thought so, too. But he wasn't appeased. "D'ya know how I can lick you?" demanded he, crouched at his table. "Well, I'll tell ya." He raised a huge hand, the fingers crooked. "Wit' me mitt," said he, "wit' me duke, wit' me claw." So, as we say, we departed slightly hastily from Marcus Hook. Nor had we heard a word from the pretty place since—until now, we have a letter from Mr. G. Hurst Paul, editor of the Marcus Hook Herald. Mr. Paul discovers that recently one of our advertisers, the Travelers Insurance Company, began its otherwise trustworthy ad to the effect that an oil tanker plied between Beaumont, Texas, and Marcus Hook, Delaware. Mr. Paul is pretty sore, insisting accurately enough that Marcus Hook is not in Delaware. But we also have letters from Delaware protesting just as hard. In fact, here's one threatening to sue us and the Travelers for putting Marcus Hook in Delaware.

WE HAVE other troubles, too—domestic ones. We've just come from a conference about our associate, Quentin Reynolds who, as you know, has done a remarkable

Calling all motorists to the Goodrich Jubilee!

Want Longer Mileage? Greater Safety?

THESE NEW SILVERTOWNS WERE BUILT FOR YOU!

OU'L be hearing that word "Duramin" a from now on. For it's the name of one of big st firsts in all Goodrich history.

t me is more mileage for every motorist o rid on Silvertowns . . . more safety from ds . . more protection against blow-outs.

Here' why: Duramin fights oxygen, rubber's at en my. It keeps life and bounce in tires—the t ad, in the tire body, in the sidewalls.

Yes, uramin is the big news—but it's not whc story. We've made each carcass steel-ong th top-quality Hi-Flex cords. The fa-us Godrich blow-out protection is now er th ever.

You t stronger, safer, tougher Silvertowns s yea than ever before. And right now is time ou *need* tires you can trust. So "Switch Goodrich." Today's cash prices are low. Or a can se the easy Budget Plan. All Goodrich verto n Stores, and many Goodrich Deal-, offe it.

B.F. Goodrich Silvertowns

LIFE-SAVER *Silvertown*

For every *four* miles that the *original* Life-Saver Tread Silvertown gave you —this new tire gives you *five*. It gives you extra safety, too. No tire can stop you quicker. No tire can keep you safer from skids.

DELUXE *Silvertown*

It offers the best possible combination of mileage, safety, comfort and quiet running. Its Duramin-toughened rubber fights wear. Its new-type tread smothers road noise to a whisper.

SAFETY *Silvertown*

This is the "popular price" Silvertown with greater carcass strength than ever before. Duramin, and Hi-Flex cords, make it the best tire buy in its price class. Costs less than any Silvertown in years.

A FEW OF THE MANY B. F. GOODRICH FIRSTS THAT HAVE SAVED MILLIONS FOR AMERICAN MOTORISTS

FIRST *automobile offered American public equipped with Goodrich tires.*

☆

FIRST *in America to build cord tires for automobiles.*

☆

FIRST *to develop a black tread for longer mileage.*

☆

FIRST *to lower tire costs with "accelerated curing."*

☆

FIRST *to offer American public tires made with synthetic rubber.*

"I save money by making my own dresses. . . . You should economize on oil and gas by having Sealed Power Rings put in our car."

. . . so are cars equipped with Sealed Power Piston Rings

WOULD you like your car to run as smoothly and be just as thrifty on oil as when it was new? Of course you would! Then just do this: Ask your repairman to install Sealed Power Piston Rings. These famous rings—used as original equipment in 12 out of the 18 American makes of cars—restore oil economy, bring back pep. And they protect the big investment you have in your car. Sealed Power Piston Rings are now sold in packaged sets engineered for your particular make of car. Ask for Sealed Power Rings by name. Sealed Power Corporation, Muskegon, Mich. and Windsor, Ont.

SEALED POWER PISTON RINGS

Best in new cars! Best in old cars!

Cutaway diagram of a German 2-pound thermite bomb, the used to start fires in London. Its overall length is thirteen i

WING TAL

THIS seems a good time to chat about aluminum, the silvery white metal that Englishmen and scientists pronounce differently from you. They give it five syllables instead of four: a-lu-*min*-ee-um. To the militarist, it is one of the essential raw materials; to the chemist, it is one of the "elements." Its existence was suspected by Sir Humphrey Davy, but it was not actually discovered, or isolated, until 1827, by Wöhler. There's plenty of aluminum in the world, but it just doesn't grow that way. It's always hiding in other things—earths or compounds, notably bauxite, from which it must be processed.

Almost feathery as compared with iron and many such other structural materials, and tough and resistant to corrosion, aluminum was a godsend to the advance of modern transportation—particularly in this latest age of streamlines, light weights, high speeds.

Lightness with strength is the key to efficient and economical aircraft. Thus aluminum—especially duralumin, one of the many alloys made from it—is the skin and bones and a powerful lot of the innards of most commercial and fighting planes and their engines.

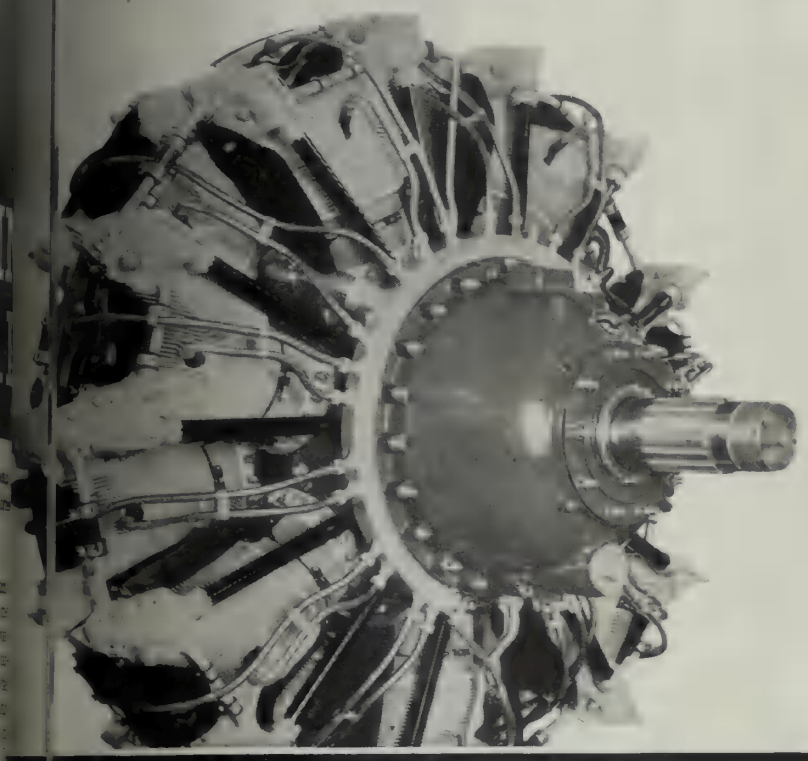
MENTION of aluminum brings a picture of glistening wings and cabin walls to your mind, or a thought of sturdy ribs and spars and pistons. But perhaps you did not know that there are at least three other essential services that aluminum performs for aviation.

One impartially covers the uses of peace or war. It is paint. A great four-motored bomber, or a transatlantic clipper, will have at least 100 pounds of aluminum paint on it.

A second is deadly. You hear and read much about the "incendiary bombs" that are searing the face of Europe. Those bombs are thermite, which is a mixture of powdered aluminum and iron oxide or some other metallic oxide. There is a process whereby these ingredients can be mixed under control and used for welding. But when kindled they burn uncontrollably with terrific force and a heat of about 5,400 degrees Fahrenheit. It spits burning drops in all directions: it will go through cement pavements or metal roofs. One spark will eat through your skull or body.

Thermite bombs are usually small, maybe only two pounds. There are many types. All, roughly, have a thin outer shell, either lined with or wholly made of magnesium, tha highly inflammable metal u ing flares and fireworks. The may be set off by a cap—its ficient to kindle the thermit you have your miniature he

It was a strewing chiefly bombs that in late Decen The City (London's equiv Wall Street district) and land's capital its worst fi 17th century. It was therm gan the destruction of the Britain, and it is one c weapons used against me ping and convoys.



A THIRD function of alu may observe if you are the activities of the crew across the oceans. The na ficer opens a window and small globe of bubble-thin is filled with aluminum p glass breaks on striking the aluminum quickly spreads and mirrorlike slick. In the c flects the sun, and the navig it through instruments t plane's drift in the wind. any other marks at sea to fi unless you cross a surface

At night the aluminum p flect flares and help a pilo estimate drift but to gauge if one is necessary away fi base aids.

Alas, the ingenuities o swiftly translated into the of war. Latest advices t flying coastal-patrol airme embattled nations are usi powder in sub hunts.

From moderate altitude discerned as much as 100 f surface, depending upon t the ocean, which varies w bed, temperature and o Over markless water, howe speed of his aircraft prever keeping either in view or exact location of a sub he or from bombing it accu overshoots. So it has bec practice for a patrol flier aluminum globe the insta sub. Then he can go ahe his turning maneuver, bea the easily observed alum confident that in its vicini locate his quarry—

And ready for business.

WHAT ABOUT *aircraft engine production?*

The Pratt & Whitney Aircraft Division of United Aircraft, one of the two largest engine manufacturers in the United States, answers below the questions most frequently asked about its engine production.

★ ★ ★

How fast is your engine production increasing?

During 1940 Pratt & Whitney Aircraft built more than twice as many engines as in 1939. During 1941 we shall more than double again our last year's output.

How has this increase been achieved?

By rapid expansion of plant, personnel and machinery—plus similar expansion of subcontracting. Since 1939, Pratt & Whitney has doubled and redoubled its factory area, and increased its personnel from 3,000 to nearly 15,000 employees. Five hundred subcontractors and suppliers furnish finished parts and raw materials.

Are you producing engines for both Great Britain and the United States?

Yes. Most people do not realize it, but for months a large percentage of our engines has been shipped to Great Britain. In addition to these continuing requirements we are now producing large quantities of engines for the American defense program.

Are you producing engines fast enough to meet airplane requirements?

Yes, despite heavy shipments abroad. The total engines delivered to American airplane manufacturers by Pratt & Whitney in 1940 was well above total requirements. There were, however, minor shortages in two types amounting to less than one day's production, but we were well ahead of requirements in all other types.

Will mass-production help to increase output?

True mass-production is not yet feasible for building aircraft engines. Remember that the aircraft program, big as it seems, is still dealing with thousands per year—whereas automobile mass-production deals with millions. Furthermore, mass-production, by its very nature, calls for "freezing" of specific designs. This is impractical in so rapidly advancing an art as aircraft design, particularly in war time when engineering changes are frequently essential to maintain tactical superiority.

Will the automotive industry be a factor in production?

Yes, as soon as automotive manufacturers are able to build and equip new plants, train new personnel, and adjust themselves to aircraft methods. In this program we are cooperating in every possible way. Meanwhile, for at least a year the existing aircraft industry must supply the nation with the bulk of its engines.

How big is the job ahead?

During the two fiscal years ending June 30, 1942, Pratt & Whitney is facing the task of producing more aircraft engines than were produced during the first World War by *all* American manufacturers, including ten in the automotive industry.

Can it be done?

We are confident that it can, but the job will not be easy. We must again double our production. We must install more machinery, train five to ten thousand new employees, and increase our operating efficiency still further. But with the continued cooperation of our employees, subcontractors, and suppliers, we believe that Pratt & Whitney Aircraft will meet its obligations to the nation.

Now-500 to 600 Miles on a Tankful!

Why Buy Any Other Lowest-Price Car when Nash Leads in the Things You Want?

★ **BETTER ECONOMY**—25 to 30 Miles on a Gallon of Gasoline.

★ **SMOOTHER RIDE**—Only low-price car with Coil Springs on All Four Wheels.

★ **EASIER STEERING**—First car with Two-way Roller Steering.

★ **ROOMIER**—Greater Seating Width. The Rear Seat makes up into Convertible Bed.

★ **SAFER**—Welded Body-and-Frame Construction . . . made rattle-proof, twist-proof.

ISN! In the Official 1941 Gilmore-Grand Canyon Economy Run, ash 00' turned in more miles to the n th n any other 6, 8, or 12 cylinder nob , regardless of weight, size, or quipment. With its marvelous h S ed Forward, Nash averaged mil per gallon at an average speed .6 m es an hour, over gruelling 599-mou tain course.

IN getting into this big 1941 Nash n an traveling 500 to 600 miles before d to top at a gas station!

k o driving the equivalent of Boston folk . . or the Grand Canyon to Los s . . r Chicago to Kansas City . . . on *ank l of gasoline!*

zing Yes—but not for the new kind of the west-price field!

re's ver been a car like Nash before—a k -price car so roomy. The front near five feet wide.

And wait 'til you tap that throttle! Nash's new kind of engine has the liveliest six-cylinder performance you ever felt . . . made satin-smooth by a radio-balanced crankshaft.

And as the miles flash by—25 to 30 of them to every gallon of gas—you soon discover how *different* driving can be.

The road is full of ruts . . . yet those jolting bumps and bounces just don't follow with Nash's four-wheel coil springs. The new "Unitized" body-and-frame construction stops any quiver of vibration. The silence is uncanny!

You head into curves with the throttle open—yet just the touch of your hand guides this big Nash. The new Two-way Roller Steering does the rest.

And should the March winds bluster or blow—just turn on Nash's Weather Eye System—and go blithely on your way in warm, dustless, conditioned air.

There's never been an automobile like this new Nash before—at *any* price.

You have its savings of $70 to $100 a year to consider—its amazing differences in size, ride, roominess—yet the reason you'll want it is a simple one. *It's more fun to drive than any car you ever owned!*

Remember — three years of testing are behind this new kind of car. It's backed by Nash's $50,000,000 in resources. See your Nash dealer today and see the amazing differences that are switching thousands to Nash!

Go NASH

AND SAVE MONEY EVERY MILE!

Suicide Ship

By Walter Havighurst

ILLUSTRATED BY DAN SWEENEY

She was a doomed ship, a suicide steering straight at the turrets of destruction. Her bow began to settle

San's first command not ome in quite the he had anticipated But e knew he was ry t be alive for it

WO ys out of Halifax the de- troye escort left them. Then throug fog and wind and the gray ntic vistes they lunged on toward and—nty cargo ships spaced out gnmwar-gray procession, laden ey Plimsoll marks in the heavy sea. new ort would meet them at the ervou two days out from the dark ts of t Hebrides. Those would be headlands of a beleaguered king- the outposts of a warring continent n all t seas were warring seas.

Philip Sands stood on the bridge wing he ar ed merchantman Pentland h and watched the four-stack de- yer w eling around. She dropped r fast m the convoy's head and, as passe the Pentland Firth, two sig- flags t ke out on her yardarm. *Con- n voye. Good luck.* They were a k of c r in the gray Atlantic mist.

Mr. Sands, third officer of the Pentland Firth, saluted from the bridge wing. There was nobody to answer, or even to see him, but he held the salute, chin out, shoulders squared, his lean face wet and shining as the mist dropped from the rim of his oilskin hat. The destroyer swept past in a scroll of foam and his hand came down. He stood at ease against the bulwark, but his body was vibrant with the deep pulsations in the ship. Ahead and behind stretched the long, spaced line of the convoy, and that steady throbbing was the life, the deep, unbroken purpose, that drove them all toward the bomb-scarred harbors of an embattled inland.

Good luck. . . . Now the destroyers were rolling back to Newfoundland. Now thirty British freighters were on their own. The ships that made England great, in peace or war. Curiously, ironically, that greatness was never so real as in the face of peril, and the ships of England, crawling in their gray procession under the somber sky, became her eloquent and splendid symbol, her indomitable will. Philip Sands, serving his first commission, felt it deeply. He squared his shoulders and his eyes began to shine. *There'll Always be an England.* He was whistling as the mist drove in his face.

Inside the wheelhouse, standing at the weather glass, Captain Allerdice watched the overage destroyer drop astern. He saw the pennants flutter from her yardarm. *Good luck*—he glowered at them. He was a grim, tight-mouthed man with a lined, gray face and the fleshless, mottled hands of age twitching at his side. Not in nervousness, but something else. Call it tension, call it crisis, call it war. The master of a ship in the disaster-haunted sea lanes has a taut wire stretching in his mind. He cannot grapple with his enemies; he may not even see them. Only a sudden tremor, a mortal agitation. A thousand times he wished he were a gunner in an antiaircraft battery on the hills of Sussex, with a V of big Dorniers or a snarling swarm of Messerschmitts in the sky. But a captain can only sail his ship through the shrouded seas.

He watched the destroyer fading in the mist. Now he was the master of thirty vessels, two hundred thousand tons of shipping, and the two batteries of guns on his fore- and afterdecks were the convoy's only armor. Good luck . . . Captain Allerdice was a Royal Navy commander, past the age for retirement, with a set of naval reserve officers and a crew of boys just out of training school. With the losses and demands of war that was the kind of ship's company a man could expect in an armed merchant cruiser. But two hundred thousand tons of shipping— His hands twitched at his side.

A thin sound came from the bridge wing. The captain's face tightened. He threw the lee door open.

"Mr. Sands!"

The tune stopped dead in Mr. Sands' cheeks. He spun on his heel. His hand jerked up to salute.

"I'll have no whistling on this bridge, Mr. Sands."

"Yes, sir."

Captain Allerdice went back into the wheelhouse.

"Mr. Torpenning."

Mr. Torpenning, chief officer, turned from the weather glass. He saluted vaguely. Those veteran naval reserve officers, with long years in the unceremonious merchant service, wore their naval manners shabbily, like an embarrassment.

"What is Mr. Sands doing on the bridge?"

The brown eyes lighted up Mr. Torpenning's weathered face. "He came up early, sir. He always reports before his watch."

"What in damnation for?"

"He's young, sir." Mr. Torpenning's

tired features broke into a distant smile. "Old heads like us—your pardon, Captain—we forget—"

"We don't forget we're officers of the watch," snapped the captain. "We don't whistle on the bridge."

"His first berth, you know."

"Yes. I know." Captain Allerdice stared out at the straight-backed figure on the bridge wing. "His first berth, on a crossing like this. Two hundred thousand tons of shipping in my care and I have to break in a green watch officer."

"Not green," said Mr. Torpenning. "He was a junior in the Cambrian."

"A junior," snorted the captain. "In charge of thirty cargoes of wheat and cotton, frozen beef and sheet iron, airplane engines and lorry tires. Maybe they had to send my staff officer to one of those American destroyers, but to replace him with a junior—what is the admiralty thinking of, Mister?"

"They're thinking the young men have to come up, sir. In wartime."

The weather was growing thick. Captain Allerdice paced the wheelhouse, four steps forward and four steps back, and he scowled out at the dimming convoy. The Falkirk showed only half real, through drifting veils of gauze, two thousand feet ahead. The Empire City showed astern, deep-laden, her gray bow tossing slowly. The rest of the procession was wrapped in fog. But it was not thick weather that put that scowl in the captain's face. *The young men have to come up*—and the old men have to step down. Step down and out. Even in wartime.

THE naval surgeon in Halifax had been closemouthed enough, with the stethoscope hanging like a thin, black wishbone over his white hospital jacket. But Captain Allerdice knew what would be waiting for him in Birkenhead—an honorable dismissal. Two years past retirement age and a leaky valve in his heart. They couldn't measure something else in a man, the tight, hard purpose, the hidden flame, the unyielding will that makes a seaman. Mr. Torpenning would command the Pentland Firth on her next run.

Then Mr. Sands, veteran of a single crossing on the bridge, would move up to second officer and they'd have some seasick lad on the bridge as third. And Captain Allerdice—it was hard enough to sit in a Bournemouth cottage with a marine clock chiming sea watches on the mantel, to put away the tea things and go digging in the rose garden. It was hard enough in peace. But a seaman huddled in a bomb shelter, staring at the four gold stripes on his cuff. . . .

Eight bells chimed from the bulkhead and the quartermaster reached up and struck them smartly on the ship's bell. From the masthead the lookout's response came in quick, paired syllables. The quartermaster was relieved, giving over the course and slouching through the lee door. But Mr. Sands did not come in from the bridge.

Mr. Torpenning stood at the weather glass, packing tobacco in his pipe and waiting patiently for his relief. Captain Allerdice glared at the tobacco crumbs spilling on the floor. He flung the door open.

"Mr. Sands!"

The third officer was looking upward, searching the murky sky with binoculars. He dropped his glasses and saluted.

"Did you hear eight bells, Mr. Sands?"

"Yes, sir. But I thought I heard the drone of motors. I wanted a minute to make sure."

"Motors—"

In three steps Captain Allerdice was on the bridge wing.

"Those glasses."

He swept the glasses through the thick sky. Behind him Mr. Torpenning stood in the door peering upward. There was only the leaden overcast, the hurrying cloud rack, the long, windy tatters of a thickening sky. They listened. There was only the throbbing of the engines deep in the ship and the rushing seas beneath her bow.

"Nervous," Captain Allerdice said, and the contempt was thick in his voice. "Imagining things. Eight bells has gone, Mr. Sands."

Philip Sands' face came up, white, as though a hand had struck him. He walked stiffly into the pilothouse. He looked up at the first officer and his mouth was rigid.

"Course, sir."

"Seventy-seven," Mr. Torpenning said.

"Seventy-seven, sir."

He went into the chartroom to initial the log.

Mr. Torpenning looked in. "You heard the drone of motors, Mr. Sands?"

His face came up pale, with two red spots now burning in his cheeks. "I thought so, sir. Twice. I couldn't be certain, with the wind and the seas breaking."

"You saw nothing?"

"I can't be properly sure, sir. Just for an instant I thought I saw it. Dark and wide-winged, high up. Then the clouds massed over. There wouldn't be gulls out here, sir."

"No—and not above the clouds."

"That's what I thought."

"Better enter it in the log."

"Yes, sir."

Mr. Torpenning stopped to light his pipe. His voice dropped low and quiet around the pipestem: "Carry on, son."

As Mr. Sands looked up the light kindled in his eyes, remote and brightening.

Mr. Torpenning found the captain on the bridge wing still searching the cloud rack with his glasses. down, scowling.

"That's the worst of a Nervous, hearing things—

"These young lads—" penning around his pipes ears and eyes than us old

s a matter of fact, I was about at end of my rope because our deal h M-G-M for Clark Gable specified had to start with him by February here we were in January with no Scarlett. (We had passed up our chance to get Bette Davis from Warners' when we signed for Gable. There was never a way of getting both, even if we'd wanted both.)

And while the long search we conducted for a Scarlett was considered "phony," at least a dozen girls got their first breaks as a result of the search. One girl we brought up from Louisiana, Adele Longmire, got the lead with Raymond Massey in the stage production of Abraham Lincoln. Martha Scott's tests for Melanie, which came very close to getting her the role, resulted in her getting the lead in Our Town, and in being launched on what promises to be an outstanding career.

Another girl that we tested for Scarlett and then brought out West for further tests was a model named Edith Marriner—who now, under the name of Susan Hayward, is playing leads under contract to Paramount. Another we tested as a Scarlett possibility was a girl named Terrence Ray, who had been doing glorified extra work. Her test was so good that she was given leads by Paramount, who changed her name to Ellen Drew. Doris Jordan, who went through long and rigorous tests for G.W.T.W., was signed by Sam Goldwyn on the strength of them. He changed

y's imple pride, a girl's faitl –these are things that fur can never destroy

"What in tarnation's happened to my dog?" Ham complained. The moon tipped up from behind the trees and Joe Ed could see them plainly

E w n, smoke-hazed day had pped past noon when Joe Ed rnt drove his wagonload of kins er the rise of Lebanon Hill. as a ng, rawboned boy with an n led of light hair over the back colla and he drove with the reins peer g off to the right as if he d for nething. Billie Bevans rode besi him, still wearing his old Jimy although it was October. eithe side of them the fields lay and usty between barbed-wire . Sp shed over with goldenrod ronw d, they had the gentle look ed s and sloped tamely to the of th town. But behind them the road led into knob country, a utlan ish district of stills and ed-to ther dwellings, of lean- m with stubbly chins and n wi quick eyes. These people to th nselves for the most part, when, n occasion, one or two of vent ed into town, they had a e, lo ly way about them that the folk dn't like.

Ed vs from the knobs. Billie had hin as he drove through Cuth- Cro ing.

like ight smart to git a lift into an' ar talk about the killin'," said. Whoever done in ole Janu- urtle ust sure a bin a scrapper." bet N. Purtle fit brave," said Joe "Alw ys seemed he was kinda ke, h white hair bushin' out same mane

"An' he sure could roar ef he taken himself the notion. Feller come by Cuthbert's Crossin' yestiddy says they musta fit on the back porch there at Purtle's, seein' the way it war muddied up with tracks. Says Sukey come back after dark—bin huntin' some fussy ol' hen—an' found her grandpap laid down the back porch steps with his head plain busted open in a mighty mean way."

"That was bad on Sukey," said the boy. "Ain't they found nobody yet?"

"Not yit . . . an' hit's bin two days."

JOE ED said nothing else. Knob people are not given to much talk. Billie respected this on the six-mile drive, but now at the edge of town he spoke again, chewing away on a straw of orchard grass.

"How'd you persuade them punkins outen yer pappy?"

Joe Ed was looking off to a flat-topped, red-brick house that had just come into view. This was January Purtle's place where Joe Ed had hired out sometimes at plowing time and mowing. Old January's grandchild, Sukey, worked in the fields with the men. The wagon hit a rock and jolted him into speech.

"I taken the punkins while Pappy was drunk asleep."

Billie sucked in on his straw of orchard grass.

"I raised 'em," the boy said quickly. "I ain't never thieved from Pappy what was hisn. He'd've had 'em swapped for 'shine inside of a week an' I needed me some britches."

They both looked down at Joe Ed's knees sticking straight through his trousers.

"Looks like the Christian Circle mighta done better by you," Billie remarked.

"These seen me a year," said Joe Ed, "an' a boy when he gets growed up should make to buy his own."

They went lolloping on downhill, the ramshackle horse and wagon making the only sounds in the warm noon countryside. The boy kept looking at the red-brick house set round with locust trees and a whitewashed fence. His eyes in his bony face were a gentle, eager blue. Now he could see the old gray nesting of the barns and sheds and, off to one side, the little locust thicket. There, in the thicket, just at evening time, Sukey Purtle had kissed him the day the mowing was finished. No one had ever kissed Joe Ed before.

Remembering, he shifted on the worn wagon seat. There had been flecks of wheat caught in her dark, short curls and even in the shadow of the thicket her skin had smelled of sunlight. She had held him by the arms and said, "Don't stay in the knobs, Joe Ed. You'd make a right good farmer if you tried." And though she stood no higher than his chest, just like a child telling him right from wrong, he had believed her. Then old man January had bellowed from the back porch, "Sukey, where in tarnation . . . I want my supper!" and she was gone in a flash of red gingham.

That had been June and he hadn't seen her since. His pants had worn through and he had no others; and pride, which was as new to him as love, had held him in the knobs. Not till the news

The Corner of the Wall

By Philip Clark

ILLUSTRATED BY FRANK STREET

A SHORT SHORT STORY COMPLETE ON THIS PAGE

BEYOND the window of the dressing room, the hills of northern Mexico rolled hard and brown against a cobalt sky. José Martal leaned in the window embrasure, watching the dry, naked land that was so much like the land of Aragon and listening to the faint, familiar sounds of the gathering crowd. He was still in his shirt sleeves, but he was ready to go any time. His stiffly embroidered bullfighter's jacket was laid out on a bench, the neatly folded cape, and the leather case with the swords propped ready against the wall.

The door of the dressing room opened. Martal knew without looking that it was Hernan, his manager. Still watching the brown hills, Martal said: "Well?"

Hernan said quickly, "Ribera's out. He can't possibly work. They've taken him to the hospital." Then, even more quickly, "But I've a good one to take his place. A really fine banderillero."

Martal turned around. Hernan was a fat man, and his wide face wore a permanent irritation. Martal said, "Mexican? A good Mexican banderillero?"

Hernan said angrily: "What difference, if he's good? I've seen him work before . . . in Spain. Before the trouble."

Martal stood for a moment, looking at him. "You saw him before the trouble. But during and after? Which side?"

Hernan said, "I didn't ask his politics. I know he can put the sticks in. What more do you want?"

Martal said, "Only this. I fought for the people."

Hernan said angrily, "You all fought for the people," and walked out of the door without another word. Martal picked up his things and followed him down the sloping corridor. Over his shoulder, Hernan said, "This one's name is Chavez. A good workman. Respect him for what he is."

Martal said nothing. He was suddenly tired of it, sorry he'd ever started. But the old anger, the endless deadly ache of the beaten, was heavy in his chest. He remembered, as he would always and forever remember, how his father had died at Guadalajara. And Martal had done a good job of trying to, as long as there had been any point to it.

They came out into the bright sun, in the passage inside the barrier. Martal heard Hernan saying, "This is Pedro Chavez. The new banderillero . . ." And he was looking into the man's eyes.

THEY both stood very still. Martal did not hear the crowd now. He heard the rain falling in Teruel—Teruel, where they had fought from wall to wall, from corpse to corpse. And he remembered that moment . . . that endless moment at the corner of the wall. The enemy eyes under the raked Falangist cap . . . the rifle leveled almost muzzle to muzzle with his own. That endless moment. And, suddenly, from overhead, the short scream of the shell. The black, stunning shock of the burst. Then into the blackness the voices of his patrol, the frantic hands scrabbling him clear.

Hernan had turned away. Martal said softly, "I think you know me."

Chavez said, "Only by the eyes. Then, you had a beard."

Martal said, "We had a work that left no time for shaving. A work still unfinished."

Martal turned and walked away. He was certain the man was an informer, a spy. But he could take care of the fellow. A word in the proper place, and . . .

The first bull was very bad. A coward and dangerous, because he would not come properly to the sword. But he showed that Hernan had not lied about Chavez. The man was graceful and very sure c he did not just show off. bull for Martal. So tha took over, the animal stand and take the swor

The second was mu charged hard, and in th Martal had a chance to what he could do with t Chavez took him, stampi calling, body poised—th sticks, his feet carrying clear. It was well done.

Chavez came back watching the bull hooki He said to Martal, "He the left."

His voice was very c sional. Martal said sho Watch for yourself."

Chavez took another p las and went out, calling bull charged. They me the barrier, almost in fro was too close to be saf was good. Martal saw coming down, his feet quickly. Then he saw trailing between the ligh the stumble and the lash

If you think golf prizes are won by the players, consider Jessie Barret. She drove not, neither did she putt. But she won first money

JESSIE BARRET sat on the clubhouse porch purling one, knitting one. Mrs. "Siege Gun" Summers sat next to her placidly crocheting. From the various clusters of people out on the course they could hear scattered bursts of hand clapping.

"What did Ed have this morning?" Mrs. Summers asked.

Jessie looked up with unseeing intentness from her knitting. "A seventy-five," she said.

"Two sixty-nines and a seventy-five," Mrs. Summers said. "He's still shooting for the top spot."

"Yes," Jessie said.

"The Gunner figured two-eighty-three would take the big check," Mrs. Summers said. "A nice crisp seventy would do it for him."

"What did Mr. . . . what did the Gunner go out with?" Jessie asked.

"He had a seventy this morning, and he was working on a couple of seventy-twos."

"He only needs a sixty-nine," Jessie said, "for a two-eighty-three."

"He's too old to play thirty-six holes of tournament golf in a day," Mrs. Summers said complacently. "But he'll give it a try."

Jessie went back to her knitting.

IT STEMMED from the Cold Springs Country Club caddie house. That's where Jessie met Ed Barret and that's where Ed had proposed. He had come in to Cold Springs as assistant pro under old Stewart McLaren and the third time he had played the layout he shaved a stroke off the course record. He was, according to Stewart McLaren, the greatest stylist he had seen since Harry Vardon.

He gave Jessie some lessons.

Jessie thought a man that could play every shot in the bag like Ed Barret could make a good husband. Especially in view of the fact that he came from poor but highly respectable people, had been to college and was a tall, lithe individual definitely on the handsome side. And so after twenty-four lessons, six moving-picture shows and two dinners she got him into the caddie house one day when it was deserted and found out he used the interlocking grip on some short approach shots, and bingo, they were engaged.

Which was as Jessie had planned, Jessie being in love with him from the first lesson.

IT WAS during their short engagement that Jessie read the headline—she was reading the sports pages now—"$100,000 Pot of Gold for Niblick Nomads."

She cut it out and showed it to Ed. "What does this mean, dearest?"

"That's the total prize money of all the winter tourneys," Ed said. He paused a moment. "You see, there are a lot of pros that play them all. They start out in the fall and play right on through the West Coast and Arizona and Texas and New Orleans and Florida right on up to the Masters' at Augusta in early April. They travel and play for the prize money in all of them."

"Oh, darling, it will be a marvelous honeymoon, especially with all that money," Jessie said.

Ed was standing out a hundred yards from the practice green with a bucket of balls. He pitched two balls within ten feet of the cup before he answered.

"Honey," he said, "you haven't seen much golf, I guess. There are fifty guys could win any one or all of those tourneys. It's a question of hooking together four hot rounds when the chips are down. And another thing"—Ed dropped a ball, pitched it to the green—"and another thing: they don't, fortunately, give the entire purse to the winner. Top money in a ten-thousand-dollar tourney will run maybe fifteen hundred, the rest they divide up down the list, with say the first twenty-five being in the money."

"That simply makes it that much surer," Jessie said.

Ed Barret hit a high pitch just beyond

Hartney's first taste of excitement whe entering headquarters one day, just time to prevent a lively fist fight n Lieutenant Collins and Jack Murphy, ign. hat's the trouble? No statement ncom g.

tter great importance reaches Captain ny. I from an admiral in Washington rarm (and "personally") endorses the n's b k. Phyllis is delighted. Her dad on b out of the doghouse—she hopes. le sh is conversing with her father, a arm s nds. She runs to the fire—a blaze ervic truck. The blaze (under a tar- that vers part of the truck) is put out oung an while his two companions, ob- y lea g an explosion, urge him to clear

excitement over, Phyllis meets the hero: nant "Savvy" Roberts. His friends ch" d "Pat") are two engineers from —M Prentice and Mr. Rorabeck. a bec es very interested in all of them; ally Savvy. . . .

tain artney telephones Phyllis and tells o con to his office, at once. There her , wh and drawn, introduces her to nant ommander Kirstell, who has just d fr Washington. Her father says: ligen has good reason to believe—*that my ficers is a traitor.*" Phyllis stares, ulou "A traitor?" she gasps. "Who?" utens Commander Kirstell shakes his "We on't know—yet," he says quietly.

II

MY FIRST reaction to this ugly news was protective of my father. It had hit him hard—not the thought of what a scandal at Navy Station would mean to his own future, but the abstract idea of treason itself—and so I fought against so bitter a conclusion.

"Couldn't you be mistaken?" I said. "It's hard to believe . . . I *can't* believe it!"

"Neither can I, Phyllis," my father said, gruffly. He turned his back on us and walked over to a window and stood there, looking out at the ocean, while I glowered at this man from Washington in a childish determination to argue U. S. Navy Intelligence out of its facts.

"What's your proof, Commander?" I said.

Lieut. Commander Kirstell looked gently amused. He was a short, beefy man of about thirty-five, well-dressed in gray tweed cits. He had tightly cut and rather frizzly black hair, parted in the mathematical middle; a square, bluish jaw and the pale, cold eyes of a realist. I sensed that he considered my father's emotionalism unbecoming a Navy officer. They had not got on very well in the preliminary conference; and Kirstell was a shrewd enough judge of character to realize that he wouldn't have much effective assistance from Captain Hartney. My father, a sensitive scholar, always occupied with large affairs and living a mental life detached from Navy Station, could not be depended upon for detective work of any sort.

"You understand, Miss Hartney, that what I tell you is not to be repeated?"

"Of course."

"I vouch for Phyllis," my father said, shortly. "Go ahead, Commander."

The facts, as outlined by Lieut. Commander Kirstell, were these: Intelligence had intercepted a message in code at one of their short-wave listening stations. They had cracked the code. The message reported the transfer of one Lieutenant Dent Roberts, inventor, to Navy Station for further tests of his device. A concluding sentence explained why Kirstell had come to Navy Station. It said, "*We have officer there who will cover.*" Intelligence accepted this statement as true, because (1) the Germans had used a new high-frequency transmitter which they still believed was beyond the range of our listening stations and (2) there was no conceivable reason for their boasting of a traitor at Navy Station if they intended the message to fall into our hands.

MY FATHER'S eyes were tragic, as Lieut. Commander Kirstell finished his terse outline of the case. "I still say it's a trick, Kirstell," he insisted. "Not an officer or a man here could be capable of treason."

"We haven't eliminated the possibility of a trick, sir."

"A trick, of course it is," my father said, pathetically trying to cheer himself up. "Eh, Phyllis?"

"You can't put anything past Germans," I said. "Commander Kirstell will probably find that there's nothing wrong here, at all."

"I hope so, Miss Hartney."

"Look. Dad," I said, "why don't you take a tour around the yard and let me talk to the commander? It's really more in my line."

"Well . . . I—I would like a walk—"

"Go right ahead, sir! I'll be getting some background information from Miss Phyllis."

I handed my father his cap and topcoat and pushed him toward the door. He was glad to go.

Lieut. Commander Kirstell was a smart man.

"That is what we should mean when we say 'an officer and a gentleman,' Miss Phyllis," he said, nodding after the skipper. "I'm very sorry that this thing had to come at Navy Station. I hope Captain Hartney will believe that."

"Thank you," I said. "It was very understanding of you to send for me. I want to spare Dad as much as I can."

Then I got right down to business. (Miss Phyllis is a Navy junior but not *quite* a lady.) A lady would not have driven so directly at a selfish and primitive point. To wit: "Does Lieutenant Roberts know?"

"Roberts?"

"The officer mentioned in the message. A two-striper by that name reported for duty here this morning."

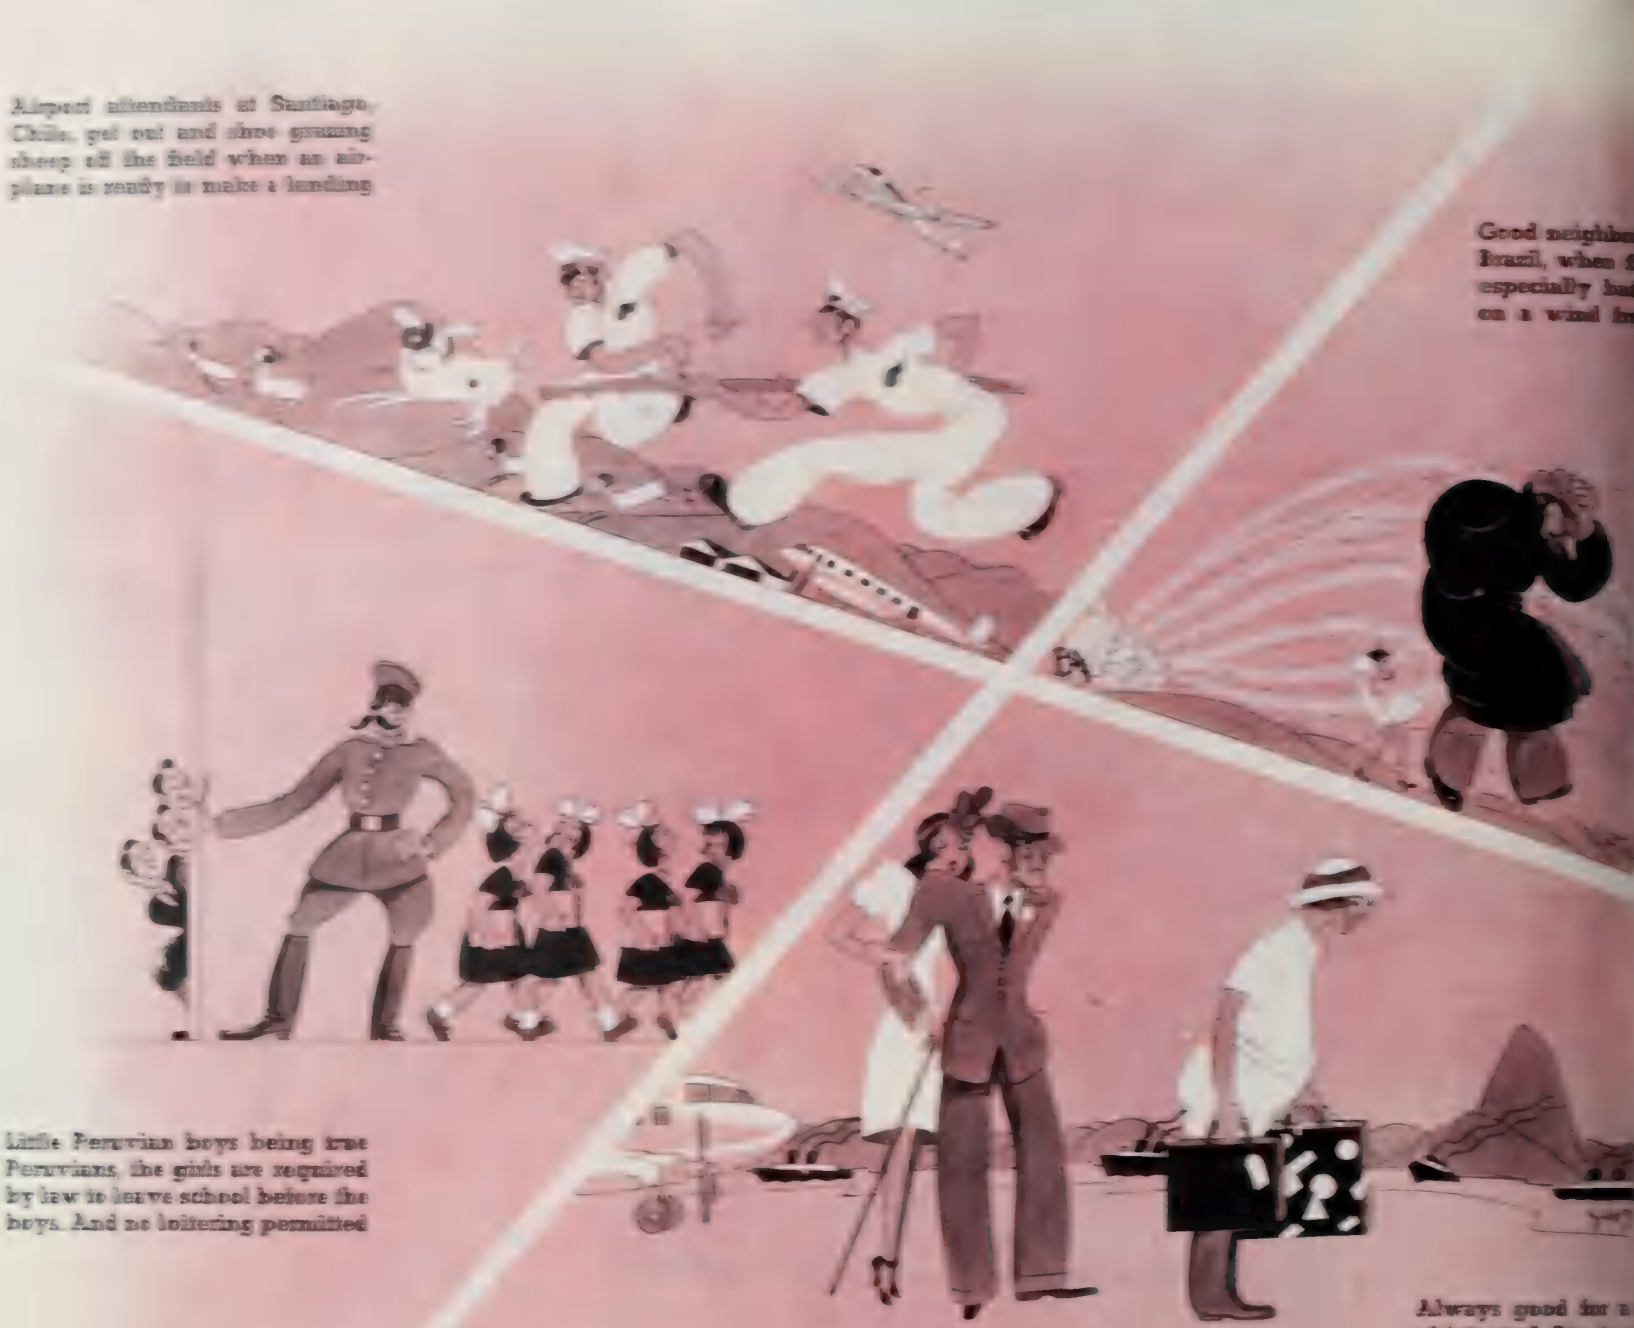
"Oh . . . he's here."

"Yes. Is it the same man?"

"Right. I didn't expect them so soon. They must have driven day and night."

"Does he know—about this?"

"No."



"Aren't you going to tell him?"

"I think not."

"Why?"

Kirstell blinked, asked my permission and lighted a cigarette, dawdling in the process. "You and the captain and I make three. That's plenty—for the present."

OUR SOUTHERN EXPOSURE

BY W. B. COURTNEY

ILLUSTRATED BY GEORGE DE ZAYAS

Traveling around South America, Collier's roving reporter makes a few notes that will help you understand our good neighbors

KLM are the world-familiar and famous initials of the great Dutch empire air line. In pioneer world air-travel days KLM was flying monthly from Amsterdam to the far-off East Indies. Later KLM linked the Caribbean islands of Aruba, Curaçao and Dutch Guiana with Dutch Guiana, by way of Venezuela and Trinidad, the British island. Now KLM has been denied the use of Trinidad, is forced to make the long, exceedingly hazardous flight over the interior jungles of Venezuela and Brazil to come into Dutch Guiana the back way, for they are not allowed to fly over intervening British Guiana, either. It has made for wretched feeling between the Dutch and British in South America.

The reason is a gaudy wartime story with all the fruits.

Trinidad is the British convoy assembly point in the West Indies for tankers from Venezuela, the islands and for petroleum ships from elsewhere. You see the harbor of Port of Spain full of them, with two old British cruisers coaling at the docks. Then, suddenly, the fortune motley fleet of many flags of tide-stained tramps and luxury three-stackers has gone. In the morning there are only the palms on the shore, and the brazen tropic sea.

Seven tankers, last summer, blew up mysteriously a day or two after sailing from Trinidad. There were only fourteen survivors from the lot. Whether from information given by those survivors isn't known, but a KLM pilot was arrested. In his pocket were found sealed letters from a young woman in Trinidad, addressed to a man in Curaçao.

The doomed tankers had come from Curaçao. The letters reported details of their loss. A fact, by the way, that had never been printed or acknowledged or broadcast or in any way publicly made known by the British authorities.

It is, of course, strictly against international and domestic postal regulations for air-line pilots to carry unpostaged letters. In doing so, the KLM flier made it possible for his girl friend to evade British mail censorship at Trinidad.

She is now doing a 25-year stretch in jail. The pilot however was released on espionage charges for want of evidence that he knew what he carried. A show of disciplinary action was made by KLM: the pilot was grounded, made a clerk in the Curaçao office.

Ladder Love

By Wallace Irwin

A SHORT SHORT STORY COMPLETE ON THIS PAGE • ILLUSTRATED BY EARL CORDREY

BIANCA'S wedding was a month off when her parents faced the facts; Clem Barkley scratched his bald spot with a pencil, as if writing figures on his brain. "Call it two thousand flat. Five hundred for repairing damage done at Binky's coming-out party. The Tweed wedding cost three thousand, the Ballards' twenty-five hundred. Two thousand will do it. That's to hire St. James' Church, and if we ask a hundred people for the reception on the lawn, Riley the French caterer won't pull a cork for less than a thousand dollars. And Picolelli's orchestra with photographers. And I suppose Binky expects a canopy of orchids—"

Anna said, "American beauties," faintly, and thought of the nice home wedding that had started her and Clem off. But he had big ideas now, and she knew why.

Clemence Barkley and Co. hadn't been selling much insurance lately, and he thought that an enormous show wedding would advertise prosperity. But now he sat gloomily, adding figures on Anna's best stationery. Suddenly he grunted, "Johnnie Wilder! Family connections and a twenty-dollar job. What else has he got to offer?"

"Isn't love anything?" asked Anna with spirit, and left the room.

What had come over Clem all of a sudden? Up to now he had seemed proud to have his adored Bianca marry a socially registered Wilder. Never before had he spoken of good-looking Johnnie as anything but a boy who could make his way anywhere.

CLEM was up and Anna had gone to bed when Binky came home, her eyes bright as she said all in one breath, "I'm so frightfully happy. Johnnie and I decided on the twenty-fifth; St. James' isn't big enough so it's got to be All Souls'; thousands are coming."

Grunting, he followed her to her room and closed the door behind him. It wasn't her lovely, doting father who said, "Binky, you'd better forget about that Wilder boy."

"Better what?" Brown eyes enlarged an inch.

"I don't want to be harsh with you, darling." But his look was sour. "You're only seventeen, and you don't know what you want. Think it over for a year or two, then you'll know whether you and Johnnie are—er—temperamentally suited. You'll both know better when you're older. . . ."

The girl, who had never been seriously crossed by her devoted parents, jumped from the bed and ground a heel into the rug until her toes stuck through a toeless sandal.

"I never heard of anything so un—what do you know about Johnnie that's—wrong? I demand an explanation."

Barkley tempers faced each other. Clem said, "I've told you I don't approve. That's enough."

"What's this? The Dark Ages? Try to keep me from—"

"You're under age in this state. You can't marry without your parents' consent. And you haven't got mine—"

"Suppose I don't ask for your old consent?"

"Then you'll stay in your room till you change your mind."

With great alacrity for an old man of forty-five, Clem slid out of the door and locked it behind him.

Everything about Bianca was taut, from the straps of her sandals to the ribbon in her hair. Locked in like a runaway slave. Could this be 1941 when fathers were supposed to know their place? . . . Finally she tiptoed over to the window, too angry for tears. She lifted the sash, peered into bright moonlight and saw an answer to prayer: a ladder stood against the house, a yard or so beyond her reach. Eddie, the gardener, had forgotten to take it down. Full of quick resolve, she stole back to her telephone, and was relieved to find it working. The ogre she called a father had forgotten to cut it off.

She almost whispered into the mouthpiece when she got Johnnie's room at the club. Softly, with no endearments, she told him what to do.

When at last she heard the ladder whispering across the side of the house she was in her street clothes and had her bag packed. Finely muscled arms came out of the dark, and as they pulled her into the void she gave herself the luxury of one little murmur: "Oh, Johnnie!"

THE older Barkleys got the news next morning when they were at breakfast. A servant brought in the telegram. Anna read it, grew dizzy and handed it over to Clem.

It was from a little town across the Maryland line. Clem's voice had a queer wobble in it as he read aloud:

"Johnnie and I married. Please forgive us but we had to. Address Shepp's Hotel till Wednesday then home. Oh, Johnnie is wonderful—Binky."

The only smile Clem had worn for months grew from the tip of his chin to the tips of his ears. Without a word he went to the library and came back with a yellow check. Anna saw what he had written on the proper lines, "Pay to Bianca Barkley Wilder . . . $2,000."

"Annie," he chortled, "slip this in your letter and ask Binky to forgive an old grouch who couldn't afford a wedding and a wedding present at the same time. Tell her this is the money she saved by running away, and it'll come in handy when they start housekeeping."

Clem scratched his bald spot and added: "Might tell her too that her poor old pop was a bit careless when he put that ladder outside her window."

CHINA SKY

By Pearl S. Buck

ILLUSTRATED BY MARTHA SAWYERS

The Story Thus Far:

AFTER directing Dr. Sara Durand, one of his aides, to take over while he is away, Dr. Gray Thomison, head of a hospital in the Chinese city of Chen-li, leaves for America. The war is raging, and Chen-li *and* the hospital are being bombed daily. But happy in the knowledge that the man she loves, *unknown to him*—Gray Thomison—will presently be at her side again, young Dr. Durand carries on superbly.

Her first great test comes when Chen-ta, a noted Chinese guerrilla (called by the Chinese "the Eagle") brings in a badly wounded Japanese prisoner—a high-ranking army officer who gives his name as Yasuda. The Chinese implores Doctor Durand to save the man's life. Puzzled, Sara—assisted by Doctor Chung, head of the men's ward—operates; and Yasuda does not die.

Then Sara receives a crushing blow. Doctor Thomison cables that he is returning with "Louise"—his bride! . . . The young couple arrive. And from the first Louise (who dislikes China and the Chinese) is miserable—*and terrified by the savage bombings.* Noting her fear, Doctor Chung (in the pay of Yasuda) assures her that the bombings will cease if she will put her husband's Chinese seal on certain letters that he will bring her. Suspecting nothing, Louise agrees to do as he wishes.

The first of the letters (prepared by Yasuda) goes through. A short time later, the bombers stop molesting the hospital—but not the city. And everyone wonders why. . . . No longer afraid, but bored by life at the hospital, Dr. Thomison's wife begins writing to Harry Delafield, an attractive Englishman who is stationed near by. Presently, in answer to her entreaties, he comes over with some friends for a small dinner party.

While Gray—wondering why, for twelve days, the hospital has not been attacked—is dressing, Siao Fah, his cook (who adores "Thomison doctor") comes to him, gives him one of Louise's letters that he has intercepted. Gray reads the letter. It is to "Dearest Harry"; and it is, apparently, a love letter. . . .

Later, after the guests have gone, Louise is unusually affectionate. As she and Gray talk, in the bedroom, Siao Fah stands outside their door, while Little Pig, his assistant, peeks through the keyhole. After a time, Siao Fah pushes Little Pig away—and covers the keyhole with a dish towel. In the room, Louise is telling her husband that she loves him, that she wants to work beside him in the hospital.

VI

LOUISE tripped up the hospital steps with her little high heels clacking. The hospital was quite quiet and clean, for almost no one was here. Perversely, she thought, the Chen-li people had stopped coming, now that it was really safe to come. She pushed open the swinging doors, guarding carefully her bouquet of Chinese lilies.

Gray, hearing the light clatter of her footfall, opened his door and saw her coming down the corridor, her blue dress clear color for her glowing face, and for a moment he put aside again his question of her, never answered because love kept it unasked. How pretty she was, how sweet and suitable it was that she should bring flowers to his hospital! How impossible that she could be anything except what she looked! He had simply said gruffly to Sara the next day, "We were wrong about Louise—both of us," without having the courage to tell her that he had never asked Louise about the letter. "I'm glad, Gray," Sara had said quietly. Since then Sara had avoided him, but it was easier if she did.

Now Louise was at his side.

"Who is the lucky one this morning?" he asked playfully.

"Whom do you say?" she asked, smiling at the adoration in his eyes.

Even the Buddha did not dwarf the young man who stood at its feet. It seemed rather to retreat into the shadows

"There's not much choice pital is so empty," he said rue of the hospital orderlies bro yesterday. There are a few the charity ward. And, of co da's still here. I can't get at Chung's making fresh tests almost like a typical case sickness, the man's half-co much of the time."

"Shall I give my flowers t she asked. She had been on Yasuda, anyway, but her ey nocent beneath Gray's.

"You may find him uncons He hesitated, then he glance empty hall, then tipped up h his forefinger and kissed her. to see you coming in with fl day for somebody, my bea said.

DOWN the hall Sara's softly. She had been ab out of her office, but now, see she stepped back and stood, the door, her lips pressed to was frightened at herself. V life before had she hated she hated Louise? When, ind ever been so angry with an was with Gray? How coul fooled by this silly flower st ever had been wrong, Loui him back again. She groane bewildered with her own cor

"But that was what I wan it?" she thought.

Surely to have Louise lov what she wanted. Surely s swered honestly to him tha glad, Gray." But she had nc to him again. They had con in the quiet hospital, m where there was none thes he came late and went hom

She waited a moment opened the door. The hall now and she stood irresol had she been about to go? longer important. She went stairs to her own rooms. He nese baby was there playing An amah sat near, sewing. could sit up now alone. No saw Sara she smiled and put and Sara took her and held

"I'll take care of her a whi to the amah, and when the w ered her sewing and went a glad to be alone. This litt she thought, looking at the going to be very pretty. S doll-like look of all Chinese the tiny hands fumbling at on Sara's uniform were flowers. And then quietly, child's wonder, she began to

For a long time they s weeping and the child wat she wiped her eyes. What w of weeping when nothing co For the first time since she b Gray she wished she could somewhere far enough so t Gray could never meet. "I happy with her, I never wan again!" she thought passic then to her shame she sobbe went on sobbing and coul And the baby looked frigh moment and then accepted noise and tried again to bright buttons.

New INTERNATIONAL* Trucks

NEW POWER . . . NEW STAMINA . . . NEW ECONOMY

NOW International Harvester presents the new International HEAVY-DUTY Trucks—rugged, powerful trucks that are built for *heavy hauling!* Here is a glimpse of one of the many handsome models with which International begins its *34th year of truck manufacture.* All sizes, including 6-wheel and Diesel-powered units.

Here is a greater generation of quality trucks—distinctive, up-to-the-minute, ultra-efficient—marked with the famous emblem and the name that stands for *earned leadership in the heavy-duty field.*

Change is not just a matter of the calendar with International. Improvements are passed on to owners and drivers as fast as is practicable. But only in this complete redesign could we incorporate all the best fruits of Harvester experience.

From the moment you enter the new all-steel Comfort Cab with its foam-type rubber seat cushion and put one of these beautiful new trucks in motion, you will feel the difference. First, you will find a *revelation in easy steering.* Outstanding engineering is evident in the new Hi-Tork brakes, the rugged rear axle, the larger easier-riding springs. These and many other International features, topped by the powerful new engine, bring you what it takes to *out-perform* and *out-economize* the past.

Get acquainted with International's new K-line trucks and you will understand why more heavy-duty Internationals are sold than any other make. See these new Internationals at the nearest dealer's showroom, or at any Company-owned branch. Catalogs on request.

One whiskey that should go down in history....

THE 1941 BOTTLING OF FOUR ROSES

WE KNEW LONG AGO, that the 1941 Bottling of Four Roses would be a whiskey of extraordinary excellence.

We knew—because of the great care with which we distilled the special whiskies for today's Four Roses, 5 years ago and longer. We knew—because of the way we aged and mellowed them... the added knowledge and skill with which we slowly brought them to maturity.

But no one—not even we ourselves—could have foreseen their present magnificence. Of all the fine whiskies we've made or known—in our 76 years' experience—none ever had such marked qualities of greatness.

So, no matter when you last tasted Four Roses, a new and thrilling experience awaits you in the 1941 Bottling. A *new* experience because there's never been a whiskey like it. A *thrilling* experience because never before have you tasted such rounded perfection, such soft and glorious flavor.

Four Roses is a blend of straight whiskies—90 proof. The straight whiskies in this product are 5 years or more old. Frankfort Distilleries, Inc., Louisville & Baltimore.

EVERY DROP IS 5 YEARS OR MORE OLD

"Your father," frowned Elsie, "has always been like that!"

"BUT I WANT TO see the movie!" complained little Beulah.

"So do I," agreed Elsie, the Borden Cow. "But your father insists on trying to bull his way in on a pass."

Elmer, the Bull, turned from his argument with the ticket seller. "I am only insisting on our rights," he rumbled. "After all, it's our RKO movie, 'Little Men,' they're showing here."

"*My* RKO movie," Elsie reminded him. "Next you'll be claiming credit for the wonderfully pure, wholesome *Borden's Milk* that Borden experts and scientists help me to produce. And all the grand foods that are made from my milk."

"How many, please?" asked the ticket seller. "I mean foods—not tickets."

"Just heaps, my dear," replied Elsie. "Why, there's a score of *Borden's Fine Cheese* alone. One you're probably familiar with is *Borden's Cream Cheese*. It's made with my fresh cream and milk, and it's so rich you can whip it—though, of course, you don't *have* to."

"You will find, miss," Elmer began to the ticket seller, "if you just send in my name to the manager—"

"You'd get farther, Elmer," said Elsie, "if you sent

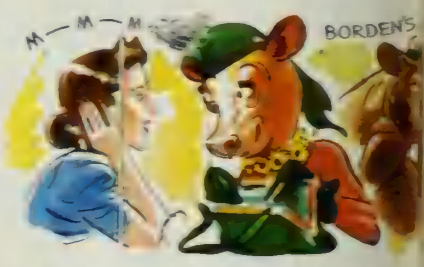
him in some samples of the lovely cookies and candies and cake frostings that are made from the *Borden's Eagle Brand Sweetened Condensed Milk* my milk helps to make. I guess I know something about men."

"I certainly wish you'd let me in on it!" exclaimed the ticket seller.

"Here's just one of them loves to eat," Elsie stated positively. "Particularly the perfect cream soups and fluffy mashed potatoes that result from using *Borden's Irradiated Evaporated Milk*. It's the same fine evaporated milk that doctors approve for infant feeding be-

cause it's so digestible and rich in Vita

"I want to see the movie," whimpers it's no good just getting in for the end



"That's not always true, darling," El "There's hardly anything nicer than n not when it ends with a plump, fragra *Borden's Nonc Such Mince Meat. O*

Such dessert happen to be made from milk. But it gets its extra spicy goodn from the same kind of Borden skill always keeps my milk so fine."

"Will someone pay any attention to Elmer. "I know my rights, and—"

"Don't get so hot under the collar warned him. "You look fit to melt a t *Ice Cream*. And that particular master

and cream is so smooth and luscious t feel as though they could actually *eat* turned to the ticket seller and went on —here, *I'll* pay for three tickets."

"Thank you, ma'am," murmured the hope you like your picture."

"Like it?" beamed Elsie. "We'll love *if it's Borden's, it's GOT to be good!*"

OUR NEW ARMY

PHOTOGRAPHS BY HARRY PENNINGTON, JR

Camp Reports from Collier's Own Correspondents

FORT CUSTER, MICHIGAN: The amount of paper work necessary to keep the Army going would drive ordinary file clerks batty. Things get done, though. In fact, Pvt. Dennis Charles Aloysius Donahue, of Royal Oak, Michigan, is still somewhat bewildered by the speed with which he became a recruit. Considering that (a) he is known in Army files as No. 36,101,277 and that (b) the special order which sent him from Fort Custer to Fort Worden, Washington, wound up with "Military Service FD 1456 P 50-0623 A 0410-01 (CSS) QM 1494 P 63-0700 A 0525-01," you'd think Pvt. Donahue would have got lost in the shuffle. Not so. The red tape unwound like the mainspring of a busted watch. In just sixty hours Pvt. Donahue was hustled into Custer, inoculated, vaccinated, fitted out with duds, given a mental-aptitude exam, attached to Co. B, detached from Co. B, sent to Sunday Mass, bunked, debunked and dispatched to Seattle. He was also ed. "This Army," said Donahue, "it on't waste no time, does it?"

EER sold at the Reception Center is of the 3.2 variety and the boys don't e it. They'd like a word with Repub- n Representative Paul W. Shafer of tle Creek, too. Battle Creek's local on already prohibits sale of liquor the glass, and now Representative er is at work on legislation banning r sales to men in uniform. As if weren't enough, Michigan's organ- bean growers are asking the War Navy departments how come the onal military bean is occupying a ely unimportant place on 1941 Navy menus.

N Lieut. Cornelius A. Murphy Lieut. Edward J. Callahan their brides to the fort, they inded that 50th Field Artillery required them to be paraded he post in an artillery caisson six prancing steeds. There is n, not even a horse, in Fort the parade came off. Officers bumped about in an ammu- ler drawn by a prime mover eeled, air-braked, 318-horse- -hauling colossus—in which tootled the battalion drum orps.

●

T ETAN ALLEN, VERMONT: nfare whatever, the Army ning more than 300 artil- ski troopers. In the Jeri- fountains) Range, where metimes slides to twenty members of the 7th, 32d ions of the 1st Division arned to function as ad- bservers, machine-gun le-radio, antitank and s, message carriers and en. Some of the most e skiers are Southern- year when the bat- ort Benning, Georgia. p their Northern pals, off them when they es.

FIRST Division Artillery's commander, Colonel John S. Wood, directed the ski training. One of his officers is 7th Battalion's Capt. George Haig, of New Haven, who says he can stand Vermont's cold weather but is glad he doesn't have to like it. Back in 1918, when he served with Colonel Lawrence in Arabia, Capt. Haig blew up bridges and attacked Turkish garrisons, trains and railroad stations while thermometers stood at 110 degrees in the shade.

●

FORT SAM HOUSTON, TEXAS: Some of the homesick soldiers are pulling fast wires to get back home for a few days, but the Army is hard to bamboozle. When a telegram or long-distance phone call urges the recruit to "Come at once Mother ill" and he asks for leave, the Army puts on its bifocals and looks into the situation. The camp chaplain turns the message over to the Red Cross, whose representative nearest the soldier's home checks facts and relays them back to the fort. It isn't that Uncle Sam is unduly suspicious; nearly thirty per cent of the summonses are phonies. The draftees who try this stunt figure there's less chance of detection if they give the least possible information. Chaplains say the fakers are easy to spot because their psychology is wrong. When there's real trouble at home, more details are usually supplied. Ten words don't cost any more than "Rush home Aunt Bessie ailing."

COMBINING civilian and Army life, Reserve Officer Major C. Ray Davis, San Antonio's tax commissioner, has been making two round trips daily between city hall and Fort Sam Houston. The mileage has been piling up, but the Army fitted him into the right job. He's a transportation officer.

●

FORT LEWIS, WASHINGTON: Bowling alleys, skating rinks, dance halls and beer taverns in neighboring cities are trying to outshout one another's welcome to soldiers, but if there's a golden egg somewhere most operators have yet to find it. Nearest big city is Tacoma, fifteen minutes away, whose stern police commissioner has forced the gambling joints upstairs and whose red-light district is kept discreet. It may be only a rumor, but soldiers hear there was a stabbing brawl in a Tacoma dive a while back, resulting in an Army threat to declare the area a forbidden zone. Anyway, Tacoma's chief bid for soldier trade now is a sedate service men's club sponsored by the business community.

Ninety minutes away is Seattle, which through long years of sitting across Puget Sound from Bremerton's Navy Yard has learned how to entertain soldiers without having to replace the furniture. Both cities suffer from Washington's strict liquor laws: No sale of mixed drinks, hard liquor by the bottle only at state-owned stores.

Across the Oregon border is Portland, filled with cocktail lounges and pining for payday profits. It's four hours by train from Fort Lewis, and reduced

(Continued on page 44)

Unusual talent keeps the weekly amateur-night show crowded even on paydays at Fort Sam Houston, Texas. Shown above is "Lucky Jack" Perry of Co. D, 23d Infantry, getting rid of fifty-one feet of rope and chain, six padlocks and a strait jacket, in less than a minute. Lieut. L. T. Fagan, chaplain, is the announcer. Former movie stunt man Perry, who can safely smack into a parked car at sixty miles an hour, wants to transfer to the tank corps

Since his enlistment two and a half years ago Sgt. Harry Bibb, head of the classification section at Brooks Field, Texas, has produced nearly 300 Air Corps and Army life cartoons. Below, Capt. N. T. Perkins, field adjutant, poses in an advanced training plane while Cartoonist Bibb completes an authentic sketch

The "60-Second Workout" helps you to a head of hair that helps you get ahead!

The Vitalis "60-Second Workout"

50 seconds to Rub

Vitalis with massage wakes up your scalp circulation—needed oil is supplied—hair looks alive.

10 seconds to Brush

Vitalis keeps your hair in place—lustrous, trim, well-groomed—with no "patent-leather" look.

IF YOU HAVE business ability you can climb the ladder of success. But if you have the appearance to sell your abilities, you can take the fast elevator.

Sell yourself—and let well-groomed hair help you on the job. Socially and in business a crisp, alert, immaculate air commands attention—*and holds it.* And with Vitalis and the "60-Second Workout", good-looking, handsome hair is an easy accomplishment.

Simply massage your scalp with Vitalis and vigor. Immediately you'll feel the lively tingle of a speeded circulation. And the pure vegetable oils of Vitalis supplement natural scalp oils. Your hair takes on a new, healthy lustre, begins to look alive. Comb it and it stays in place with no "patent-leather" look. You'll see in your own mirror and in people's eyes what a difference one healthful Vitalis grooming has made—how trim and clean-cut you look.

But that's not all. Vitalis and the "60-Second Workout" routs loose dandruff—helps prevent excessive falling hair—helps *you* keep your hair. So get yourself a bottle of Vitalis today.

VITALIS

Helps keep your hair healthy and handsome

Sallies of the Alleys

Continued from page 18

other day and knocked off nine strikes and a spare in a row. Dixie Jester, who is the pride of Georgia, has a Ph.D. and out of love of the game gave up teaching school to popularize women bowlers, has made 651 in a three-game series. The hefty cowgirl, Miss Billy Simon, who bowls professionally around San Antonio in a ten-gallon hat, has a lifetime average of 193. And, of course, the feats of Mrs. Florrie McCutcheon, the silver-haired mother of woman bowling, are legend. A housewife, grammaw, 60, compactly handsome, Mrs. McCutcheon (now operating her own alleys out in Taft, California) has a lifetime average of 209—has rolled many perfect games of 300. That, gentlemen, is bowling.

No Place for a Lady

Twenty-five years ago a woman in a bowling alley was something like a male student at Vassar. A few hardy pioneer enthusiasts like Mrs. McCutcheon sneaked into the alleys on afternoons when no men were looking, but bowling was strictly a man's game. Spittoons were draped tastefully around the clubroom, and there was sawdust for those whose aim had been influenced by trips to the bar. Often the bowling was free—a means of luring the athletes to the bar. As for the air in the clubroom—members with sensitive membranes insisted it be pumped out and stale tobacco smoke pumped in before they deigned to hurl themselves into the fray. A woman's presence in this charming atmosphere was definitely out of place.

But in time, alley owners began yanking their establishments out of the base-

ment. The result was th

They Aren't Fooling

And ten the girls can throw those pou ers as fast as a man. "But ed," xplains Mrs. McCutcheon, "is imp tant in bowling. Often a fire- l ju cuts through the pins without chir them. Accuracy is what nts. And Mrs. McCutcheon, like st w nen, throws a slow, or soft ball nd ely misses. Incidentally, most men sist on buying their own ball. costs bout $18, and they nurse it like delic e child. Should you pick it up d tr to roll with it—you may lose rt of our hair.

Nor e the ladies far behind in pro- sion manner. They know all about low- rough, splits and spot bowling. hile ere are no trick lady bowlers, ere few undexterous ones among to otchers. Mrs. McCutcheon has de l the difficult splits—including nightmarish 4-7 and 10 split. In a ls gents match at the Capitol leys on Broadway one night, she ock off the 4 and 7 pins—saw the pin ll over to tip the 10 pin—then nke as the 10 pin wobbled tenta- ely nd finally fell—to win her team exc ng match.

Girl too, are very fussy about the leys not a speck of dust must mar their polished surface. Let the ball take a bad bounce and they will complain bitterly. The proprietor may hear. "What is this—a golf course?" and demands for sandpapering and bump mowing. They also complain about slumps, try endless new stances and grips and balls to come out of it; practice blind bowling endlessly; and talk about their strikes and spares for days.

To offset the argument that Man vs. Woman would tend to breed bad feeling, it is known that women, being better-natured and less competitive, are better sports than men. Occasionally a gal will try to annoy another gal by whistling or humming, or by making some catty crack about her hair as she is about to bowl, but this is rare.

Certainly men never can complain about women's sportsmanship, I am assured. "The way to annoy or distract a man," explained a comely young lady instructress at a Broadway bowlitorium, "is to take off your skirt in a tense moment and carry on in your shorts."

One of the glamorous sides of women bowling is the costumes, put together like a sartorial jigsaw. The skirt is abbreviated and loose; is as removable as a tangerine skin, leaving the wearer in her shapelies and shorts.

Incidentally, no woman has ever been detected ringing in a "dodo" or mercury-loaded, illegal ball, guaranteeing a terrific hook. This is a masculine practice. While it is true that women do have trouble keeping score, and fight among themselves over this matter, men know that addition has always been a feminine weakness—and when they play most men keep score.

A Warning to Men Bowlers

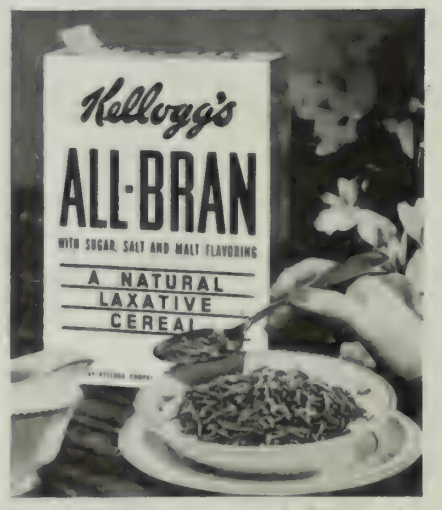
Little by little male superiority will fade in bowling and in time the girls may pass the men. But they still don't like the idea that men won't play league ball with them. FOR WOMEN ONLY signs hang on several bowling establishments around the country.

At the moment there are about 110,000 registered women bowlers in this W.I.B.C. About 50,000 of them can probably hold their own against 50,000 registered males of their own class. In a few years there will be more The serious women bowlers go at it the way the League of Women Voters goes about getting out the vote on a wet day. Mrs. McCutcheon practices about six hours a day; and Miss Dixie Jester, who didn't take up the game till two years ago, patiently rolls 30 games a day.

Out in Oklahoma City the Early Birds' League, consisting of 14 teams of very married housewives, meets every Monday and rolls far into the afternoon. Debs and advanced social dowagers drop into the Lido alleys after midnight in New York's fancy-schmancy silk-stocking district, kick off their evening slippers and bowl the pants off their escorts. Vassar, Purdue, Minnesota and other college coeds drudge patiently at their college mineralite plants and I have watched some of the prep-school girls on the bowling team of Miss Gardner's school of East 70th Street, New York, knock off scores of 200. As for the West Coast, the feminine bowling fever runs a temperature there and Hollywood is filled with movie stars who are pretty good bowlers.

For when the girls get the bowling fever they get it pretty bad. Right now I'll take even money on a team comprised of Mrs. McCutcheon, Mme. Alexander the Widow, Vera Morris of Albany (she's bowled 677 in match play), Miss Billy Simon, and the 190-average Catherine Burling of Norwood, Ohio. You can name any five gents you wish. And I promise my team will bowl in slacks—and keep them on during the match.

Let's Play Charades



ROUND AND ROUND on the Ferris wheel. It stands for the old "dosing" way of fighting constipation. You're up—you're down. But you never go ahead. And people don't make much progress with constipation—till they get at the *cause* and *correct* it.

STRAIGHT TO THE HEART of the difficulty goes the modern, better way. If your trouble is the ordinary kind that's due to lack of proper "bulk" in the diet, a crisp, toasty, delicious cereal, KELLOGG'S ALL-BRAN, can get at the cause and correct it.

AND HOW MUCH MORE PLEASANT! Compare those unhappy trips to the medicine cabinet with a bowl of crunchy, nut-sweet ALL-BRAN for breakfast. You'll say it's fun to keep fit when a delicious cereal can add so much to your well-being.

"PASS THE CREAM!" And fill up the bowl with crisp, delicious shreds of KELLOGG'S ALL-BRAN. Make it your steady breakfast cereal, drink plenty of water, and see if you don't forget all about constipation due to lack of "bulk."

Galloping Goons

By Kyle Crichton

"Break up the zone defense, make the defense play ball, use the whole playing area and fight for their lives." Coach Keogan of Notre Dame sounds off about our pellmell, elephant hunt basketball

PHOTOGRAPHS BY EUGENE

"A game for giants," says Coach Keogan. Proving his point is Bob Faught, 6'5½-foot Notre Dame basketballer, above. Right, he reaches up to slap an enemy shot right out of the basket

AS BASKETBALL coaches go, Mr. George Keogan of Notre Dame is a quiet specimen. Quite unlike the famous "Piggy" Lambert at Purdue, it is not necessary to have strong-armed guards on the bench to keep him from committing hara-kiri during a close game. So it was with some amazement that observers noted words coming from Mr Keogan's lips during a recent contest. He chewed silently on his unlighted cigar and his words were subdued and unheated. What Mr Keogan said was:

"A fine game for a herd of buffalo."

Just that. Nothing more. Just that little bombshell left to hang in the air like the menace of sudden death. It had the bitterness of desperation, the stillness of frustration. The point is that although the Notre Dame teams go on winning their share of games Mr. Keogan maintains that basketball under the present rules is a farce.

Now, this is serious business because basketball has more participants than any other American sport. There are grammar-school kindergarten, high-school, college and professional teams. There are factory teams and church-league teams; there are High-Y teams and 4-H teams; there are for men's teams and girls' teams.

"It was once a game of speed and cleverness," says the quiet Mr. Keogan. "It has now been turned over almost entirely to the giants. They brought this about by the change in rules that eliminated the center jump and established a dividing line on the court. The whole thing is now a parade of goons."

These are sharp words and the Keogan gentleman is likely to get sharp looks from some of his fellow coaches for his frankness, but it will be difficult for anybody to deny that the trend toward taller players has been distinctly marked in the past few years. Arkansas has a team that averages six feet six inches. West Texas Teachers average the same with their most important contribution being a six-foot-ten center. The very good Oregon team of two years ago averaged about six-foot-four, with the three front men averaging six-foot-six.

"If you'll watch the papers," says Mr. Keogan, "you'll see a line like this any week of the season. 'The game was won in the last twenty seconds when Gallumph, the six-foot-seven giant, tipped in a rebound.'"

The dividing line, or ten-second rule, was expected to eliminate stalling. That dividing line cuts the court in half and the offensive team is compelled to bring the ball over that line within ten seconds or the referee will give the ball to the

opposing team. Instead of fighting for the ball all over the court, the defense waits for the ball to come to it.

"It confines the action to half the court and makes it swell for the mastodons," says Keogan. "Instead of using cleverness, change of direction and fast dribbling, the lunks just wait there and get the ball by interception or on the rebound."

For years the New York writers have been maintaining that the smaller players of the New York teams were competent to operate against the giants of the West and Middle West but this year they have had to alter their views. They got the first lesson when Mathisen of Illinois picked up twenty points against Manhattan College because there was nobody tall enough on that squad to cope with the Illinois giant. As other teams continued to come into Madison Square Garden and do the same damage because of altitude, it became generally agreed that the whole tone of the game had changed.

In late years there have been such good little men as Miner and Dye of Ohio State, Abuchene of Michigan State, Lewis of New York University and Riska of Notre Dame, but they are exceptional. If a little man happens to be a genius, he can get by; otherwise he will be swamped by a horde of behemoths.

A Change that Didn't Work

By a strange bit of irony, the elimination of the center jump was brought about by a desire to curb the giants. In the old days, the ball was brought back to center after every field goal and tossed up between the centers by the referee. Most teams had a lanky center and the others tried to get them. By doing away with the jump except at the beginning of each half of the game, it was felt that things would be evened up. Exactly the opposite has happened. The goons have now taken over the game completely.

"The theory that even a great center could dominate the game was never anything but nonsense," says Keogan. "Even when we had men like Krause and Nowak at Notre Dame, we could never control the center tip. Aggressive opposition forwards could get that ball at least half the time."

But what really burns Mr. Keogan up is the new provision that after a team scores a field goal it is compelled to hand the ball to the other side. He feels that is a very poor reward for a fighting team. It is particularly unfair toward the end of a close game, he maintains.

"With two minutes to play," he says, "a team three points behind has little or no chance to pull that game out of the fire. If it should happen to score a goal, the other side is given the ball. There is no chance to fight for it, no opportunity for maneuvering."

The game has changed since Keogan came to Notre Dame in 1921 as assistant football and baseball coach and the record of his teams proves that he has kept up with the trends. He took on basketball at Notre Dame originally as an extra chore. There was no regular court and the games were played in the field house on a dirt floor. The lines were marked with lime like a football field and most of the men were football players. The way they bumped the opposition around was a caution and that style of thrilling contact play is still current in the Middle West. Keogan had been coaching Valparaiso before he came to Notre Dame and he knew about basketball conditions there from having brought the Valparaiso team to the old field house. After five minutes both teams were so covered with red dust that they looked collectively like Jim Thorpe, the Indian.

On one play Garvey, a football tackle from Notre Dame, did a b on a Valparaiso man who for an easy setup shot. Gar him halfway out of the fiel then went over and picked was an egregious foul and r have meant the ousting of unnecessary roughness bu wasn't so tender in those d

That was the only style a then were playing the man-t which most coaches still ag the best money's worth for tors. Under that system the and open and a premium i ball handling and teamwork that we have today a game passing, sloppy ball handl roar of the herd.

"If the coaches agree the to-man game is the most i of basketball," says Keoga them will also agree that t fense is the curse of the gam

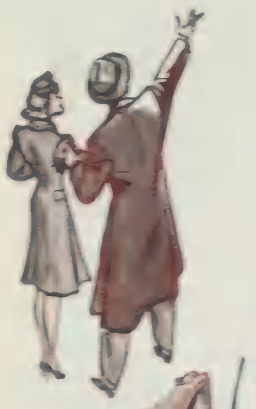
Without baffling the la technicalities, it may be s zone defense gives each ma zone to cover on the floor. stead of covering a certain five defense men simply p selves in the area around arms extended and feet spre anybody to break through.

The result is that the gam down to a walk. The only offense has is to shoot over or to beat it to the basket a break before the defense ca

"A fat chance any offense ing that consistently," sa "The minute the defense lo they scramble back to safety one shot and then retreat."

To combat the zone defe layed offense was started at by Keogan in 1915. They for a lead of four or five po the game and then bring th to the middle of the floor and the defense to come after it. they were behind in the scor fensive teams refused to co ball. They had been taught zone and they weren't goin taught it even if they staye tionless all night.

How to End Stalli



There was the famous ga Knox and Lombard in wh wasn't moved for thirty-t Lombard drew the ball e game with only a two-point went on the defense and refu out. The band played, spect amiably with their friends i a Lombard man took a sh side lines and sat down. A started up again during t minutes and Lombard won ball score of 9-7.

"So they changed the ru stalling," says Mr. Keogan ceeded in making the grea all, the zone defense, twice ever. What's the sense you're going to penalize an not penalize the defense th fight for the ball all over Force the *defense* to send to the dividing line within ten you'll get basketball back a

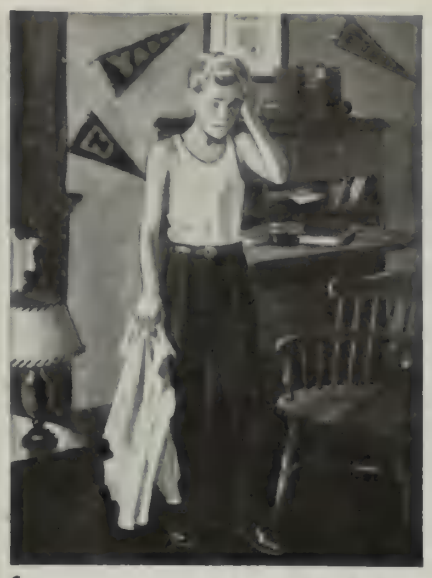
...talks like that people often ... Keogan of wanting to bring back the delayed offense and the slow-motion attack. Not a bit of it, says George. He is tired of seeing basketball played in half a court by a group of galloping goons who would be lost if the game came back to normal. He saw a high-school game recently in which there were sixty-one passes out of bounds and forty-nine bad passes on the floor. He feels that the spectators are soon going to weary of the pell-mell, elephant-hunt type of basketball.

"Break up the zone defense," he says. "Make the defense play ball, make them use the whole playing area and fight for their lives. Give the game back to the Sedrans and Nowaks and Woodens—and give them legislation that permits them to perform. Why legislate for mediocrity?"

These are strong words from the quiet Mr. Keogan, who almost never loses his temper or goes into a tantrum. The closest he ever came was during the famous Pittsburgh-Notre Dame game of several years ago when the timekeeper allowed the teams to play ten minutes overtime. Notre Dame had the game won in the regulation period but the minutes dragged on and Pittsburgh finally finished ahead. When it was over, the timekeeper said he was very sorry but the watch seemed to have been out of order and what could be done?



"George showed him what could be done," they report now at Notre Dame gleefully. "He took the watch and threw it on the floor and ground it with his heel. He never said a word, just ground away."

From this it will be seen that Mr. Keogan has his moods. His mood is now for a change in the sport he likes most.

"Couldn't I peel a mess of potatoes at home and bring them in so you can get leave tomorrow?"

GREGORY D'ALESSIO

1. JOHN NEEDS A LAXATIVE; but he's got an exam at 10 o'clock. He's scared to risk it. He can't have anything interfere with his quiz! So he puts off taking a much-needed laxative, puts off relief.

2. JOE NEEDS A LAXATIVE; he has a 10 o'clock exam, too. But his mother says: "Never put off till tonight the laxative you should take this morning." So Joe takes *speedy* Sal Hepatica.

3. POOR JOHN! How can a fellow concentrate on history when constipation symptoms hinder clear thinking? John holds his aching head, flunks his quiz!

4. JOE PUTS HIS BEST efforts on the quiz and passes! Sal Hepatica worked within an hour . . . easily, gently. Joe is able to concentrate, feels swell!

Whenever you need a laxative —take *speedy* Sal Hepatica

PUT OFF taking a needed laxative and you're simply putting off relief. Don't delay. Discover *speedy* Sal Hepatica. It usually works within an hour . . . gently, thoroughly . . . by attracting water to the

intestinal tract: works without discomfort, griping, or irritation.

Sal Hepatica, remember, is *more* than a laxative. It helps reduce excess gastric acidity, too; helps turn a sour stomach sweet again.

It's not surprising that 3 out of 5 doctors, recently interviewed, recommend Sal Hepatica! Try this *speedy*, sparkling saline next time you need a laxative!

SAL HEPATICA

"TIME TO SMILE!" Tune in on EDDIE CANTOR Wednesdays at 9 P. M., E. S. T.

Six Hours from London

Continued from page 24

waiting for a mattress in a ship's corridor.

The clippers are virtually reserved for A and B priority customers; that is, when the clippers fly. There were only two flights during the month of November. Mail has a priority even above diplomatic preference, and often clippers leave Lisbon loaded only with mail.

The ship situation is little better. Occasionally a Portuguese vessel takes off loaded to the gunwales and every Friday the American Export Line sends a ship New York-ward. But at best these ships can carry only 180 passengers, which is just enough to maintain the population status quo in Lisbon.

You can get any variety of political opinion you want in Lisbon. A very intelligent barman in Lisbon told me gloomily that his country was about seventy per cent in favor of Hitler's moving in. It developed, however, that his bar was the headquarters of the German espionage group and that he was reflecting their opinion. A newspaper editor told me that ninety-five per cent of Portugal hated National Socialism and Hitler, and would fight to the death in case of an invasion. But his paper was violently opposed to Fascism and his views were undoubtedly born of the fact that he had been reading his own editorials—always a dangerous practice.

Official Lisbon tries desperately to keep neutral in letter if not in spirit. The Diario Noticeas is Lisbon's largest morning newspaper. Each day communiqués from both London and Berlin appear on Page One. News from each city is given the same space, and the communiqués are printed without comment. If the London communiqué is sixty lines long and the Berlin communiqué only forty—twenty lines are chopped off the London story. Lisbon doesn't want to make Herr Hitler or Dr. Goebbels angry.

The social center of Lisbon is not in the city itself but at a place called Estirol, which is a road company of Miami Beach on a very small scale. It has a magnificent hotel, a gambling casino and a beach. The bar at the Palacio Hotel is where the boys and girls gather after playing golf or before dinner. Here you can hear news of Berlin, Warsaw, Vichy, Paris and points east that no official communiqué ever gives you.

I sat there the night I arrived with the two correspondents who had come from London with me. A handsome, dark-haired young man in white shorts and a lovely sweater sat at the bar. He had been playing tennis. He was joined by a good-looking blond giant and they ordered drinks and discussed the affairs of the world. We three sat and listened.

Admirers of the Nazi Way

The dark-haired man said in perfect English, "Even the British army admits that it could never beat the German army on land."

The blond young man agreed. They talked for a long while, very complacently and both very, very Fascist-minded. They talked of the magnificent German air force, about how the conquered countries were gradually coming into line, about how the food problem would be helped if the Americans would only send food to Belgium and Holland. Finally the dark-haired man left. The blond, too, paid his bill and then he spied us.

"I've met you somewhere," he said cordially to me. "I'm sure. May I sit down for a minute."

He sat down. One of my companions had had enough. "Who was your German friend?" he said abruptly.

"He was no German," our blond laddie said. "In fact, he's an American. He was naturalized fifteen years ago."

"We couldn't help overhearing you," I said. "He just came out of Berlin. He's on his way to Rome. What does he do?"

"He raises money for the starving," our visitor said. "It's true he was born in Berlin and he has lived there for the past fifteen years, but he is American."

"He talked like one," my fire-eating companion said dryly. "And you—are you German?"

Our blond laughed. "No. I'm Irish. I'm from Tipperary. I'm just here for a rest."

"A phony American and a phony Irishman," my newspaper pal muttered. "That's a hell of a parlay."

"Will you have a drink with me?" the man from Tipperary said.

We both said "No" and forgot to add "thanks." None of us said anything for a while and then he took the hint and said, "I guess I'd better be going."

A Russian came into the bar. I had known him in Paris. He had got out of Paris just before the Germans arrived and he'd been in Lisbon ever since. He was feeling very sorry for himself. All that time he hadn't been able to get a clipper or a ship out of Lisbon.

"But I have done well at the Casino," he said brightly. Then he added: "When will the English have sense enough to give in? I have it on good authority that London is in ruins, that most of her air force is destroyed and half the convoys that leave Canada never arrive. Why doesn't she give in?"

One of my pals said, "We'd better get out of here before we start something."

We walked through the bar. Here was a group of American Army and Air Force observers whom we had known in London. They had been waiting for a clipper for a week. Here was a group of Frenchmen chatting vivaciously and at the next table a group of Germans surveying the scene with complacency. At a third table there were three members of the British embassy.

Near the door, sitting quite alone, was the inevitable tall, dark beauty with lustrous eyes who may have been a mannequin or a Mata Hari. You can play any game you want to in Lisbon and you'll find people to play with you.

Even the Gamblers Were Bored

The Casino is one of the largest in Europe. It is probably the only one in the world which has a moving-picture theater and a barbershop attached to it. It also has a restaurant and a bar and two chemin de fer tables. It was very quiet. Four of the roulette tables were crowded. There was no sound except that of the bored voices of the croupiers. Most of the players were men. No one smiled. Everyone played grimly.

"I hope you don't mind—it's only that we can stand guests just so long!"

A dozen players kept making notes in little books. These were the system players. It was the dreariest casino I'd ever been in. This seemed a morgue after the delightful gaiety of the Miami, Saratoga and Hollywood gambling places I knew. But illegal gambling is always so much more fun than legal gambling and the mob men who run the American casinos are so much more affable and friendly than the coldly polite gambling entrepreneurs of Lisbon. Most of these players were refugees with not much of a future and an unsavory past. They played either to make money or because there was nothing else for them to do. It was very depressing.

I went back to my hotel. It was strange to stand on the street at midnight and actually light a cigarette. It was strange to see street lights and to watch cars go by with blazing headlights. I hadn't seen that for eight months. It was strange not to hear the hum of German aircraft overhead and the comforting roar of the guns keeping them high. And we were only six hours from London.

I went into the bar for a ni

WN FALTER

"Something is happening in the cigarette business!"

● LOOK AT Pall Mall closely. It's not merely a longer cigarette. It's a milestone in cigarette history!

For Pall Mall is a cigarette deliberately designed for better smoking.

Pall Mall is over 20 per cent longer than the old-style cigarette. And this additional length is important.

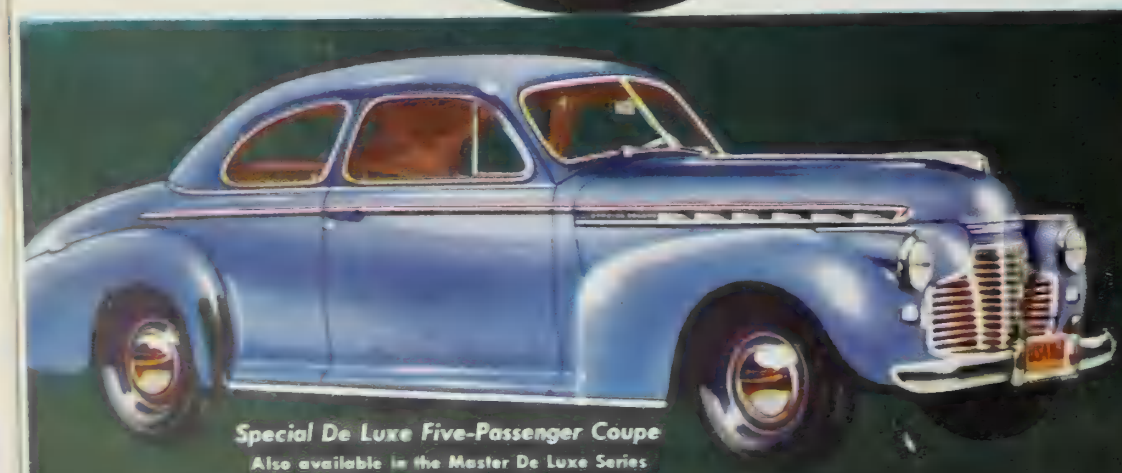
Because it travels the smoke further—the smoke reaches you cooler. Because it filters the smoke through more tobacco—the smoke is definitely milder.

Important, too, is BULKING.

Because this careful, time-taking process mellows tobaccos as nothing else can.

In BULKING, the traditionally fine Pall Mall tobaccos acquire a new character. The delicate flavors blend together. All harshness is gradually softened. Pall Mall becomes a noticeably smoother cigarette.

The smoke of these fine tobaccos—enriched by BULKING, traveled and filtered through Pall Mall's greater length—gives you a combination of advantages no other cigarette can offer.



Prove it! Yourself, try Pall Mall critically.

Chung's eyes. She sighed and sat listlessly idle. She was very tired, though she had not known it until today when she saw Gray kiss Louise. Now nothing seemed worth doing.

AND then suddenly in the silence she heard voices quarreling. Could it be Siu-mei was quarreling with her lover? She tried not to hear but the rapid, interrupting voices told their own story clearly. They were quarreling! Then she heard Chung's quick step and the sound of a door shut. She opened her own door and saw Siu-mei sitting there alone, her cheeks very pink.

Sara came into the room. "What is wrong?" she asked.

"Chung says Chen-ta, the Eagle, has been defeated at Sian-chow. I told him I would not believe it," Siu-mei replied shortly.

"It is very bad news, certainly," Sara said gravely. "The people of Chen-li put all their trust in Chen-ta!"

"Chung says it is the beginning of many defeats," Siu-mei said with anger in her voice.

"And you?" Sara asked.

"I—I do not agree with him!" Siu-mei cried. "I say anyone can be defeated once. It means nothing." She sat silent for a moment, brooding.

Sara looked tenderly at the beautiful girl. "Do you really love Chung?" she inquired.

But the question was too frank even for Siu-mei's anger with her lover. She turned her face away and would not answer for a moment. Then she rose and leaned toward Sara's ear.

"Yes!" she whispered shyly, and went away. . . .

The quarrel went on between Siu-mei and Chung when four days later Chen-ta was again defeated at Pao-shan.

"What did I tell you?" Chung asked her. "Chen-ta is a peasant, and the sons of peasants are his soldiers. How can they withstand a modern army? The country is lost unless we have something better."

"You talk and do nothing!" Siu-mei cried at him.

"What can I do except what I do—my work?" he replied. Then he grew alarmed at her anger. After all, what was Chen-ta to them? "Let us forget this thing, my Siu-mei," he said.

But she only said, "How can I forget that the enemy will descend upon us if Chen-ta does not hold them back?" And to his warmth she could answer nothing but sighs and at last he grew angry and left her again because she could not put aside Chen-ta.

He could not tell her, of course, that she need not fear whether Chen-ta were defeated or not. He himself would be safe even if the Japanese marched into the city, as long as Yasuda was his friend. And he would keep Siu-mei safe, naturally, and all her family. His plans were very clear. When the enemy was about to take the city he would urge the white people to escape. He would be nothing but courteous, but he would insist on their going. They could trust him, he would tell them. He would take care of the hospital.

"This is the final test—if the captain's wife can't smash it then the Army will accept it" REAMER KELLER

THE third defeat of Chen-ta was a week later at Liu-an-fu. Only by a miracle was that defeat accomplished, for a letter which Chung had taken to Louise—he called her "Louise" in contemptuous secret—had somehow not reached the hand for which it was meant. He discovered this by chance through his brother who came to tell him in the night that Chen-ta was preparing to march southeast the next day.

"But is he not to attack Wu-shan?" Chung inquired in great anxiety.

"No, we march instead against the garrison at Liu-an-fu," Chung Third said. "The Eagle has changed his mind because of his two defeats." He saw his elder brother's frown and said pathetically, "My life grows very hard for me now. The Eagle changes his mind often. We prepare to march south and instead at the last moment we march east. Or we are told to face west and then we are turned north. And, somehow, I must slip out of the ranks and come to tell you."

"You must indeed," Chung said fiercely.

"But do I not deserve a little more reward for it?" Chung Third pleaded.

Chung turned his back on him. "When my plans have been fulfilled it will be time to talk of reward," he said coldly, dismissing his younger brother.

Chung Third went away seemingly humble but filled with a hatred against his brother so great that he scarcely noticed a girl who stood near the door when he opened it. She was a pale, pock-marked girl who was not worth notice. But there she was. If he had waited he might have seen her stand for a moment there before Chung's door in the dimly lit corridor, and then turn the handle of the door softly and go in to his room. But he hurried on his way and saw nothing.

THE girl was Ya-ching and she had put her ear to the keyhole and heard seven words out of ten of what had been said between Chung and his younger brother, and then she guessed at all she had not heard. In the hunger of her unreturned love for Chung she came often to his door at night to listen, to watch. She could not believe that Chung and Siu-mei did not meet alone here. When the old barriers between man and woman broke, she told herself, so that they looked at each other and talked together, were not all barriers gone? And if she found it true that Siu-mei came to Chung's room at night it would be a weapon in her hand to be used secretly or openly.

Tonight she had found not this weapon but another. She saw a man go into Chung's room and come out again. She had listened and heard enough for her use, and she decided to use it quickly while the blade was hot and new.

She stepped now into Chung's room so silently that she had to cough before he heard her. He sat by his table writing a letter and when she coughed he leaped and put his hand over what he wrote as he turned.

"Why are you here?" he demanded when he saw her.

"I heard," she said simply.

"You will ruin your good name if you stay here," he said.

"I heard," she repeated.

"Heard what?" He set his white teeth together as he spoke.

"I know what you are doing," she said.

He leaped to his feet. "Leave my room!" he shouted.

But she did not fear even his anger if it only brought her his notice. "I will not tell anyone," she said softly. "Do you think I would harm you? I came in only to say—use me if you need someone to serve you faithfully."

As for him, he now heard her urgent voice for the first time. It might be well, he thought, to have a faithful woman, ready to obey his every command. It might be well to secure her to him. If only her face were not ugly or he were not fastidious!

"How can you help me?" he asked.

Then she turned her head away and in the lamplight he saw the curve of her shoulder and the outline of her slender waist and hip. She had taken off her uniform and put on a deep red robe of silk—for him, he knew. It was a pretty garment. He glanced and saw its long, narrow skirt was cut as the fashion was to show her ankle and leg above the

knee. It was a slender ankle and there was a graceful shape above it. He had often heard that women with plain faces had bodies most beautiful.

"Use me as you will!" she whispered. She drooped before him and he felt a power rise in him over this helpless woman who offered him herself. He liked power over anyone. The room was still, the house silent, and it was midnight. Who would know what happened in this room? He took one step to the door and locked it.

"Do you know what you do?" he asked her. His eyelids thickened slightly as he looked at her and his lips changed.

"Yes," she said, and did not turn her head. And she thought, "If the whole pomegranate is not to be had, is a part not better than none?" . . .

WHEN Chen-ta's fourth defeat came to pass Siu-mei said nothing to Chung nor Chung to her when the news came. But none the less she did not like his pleasure in his own rightness when they met that day in Sara's room. She thought for the first time, "Can it be he wishes the enemy to win?"

She cast away the thought instantly, but not quickly enough to escape her own alarm. Then she strengthened herself by asking questions to her own scorn. Why should he wish the Japanese to come to Chen-li? Would he not suffer as they all would? Could any possible good come to him from being a traitor? And then when she had let this one word "traitor" come clear into her mind she cast it out quickly. How could she think that word when she looked at her lover as she now did and saw him young and handsome, a man of talent and education and all that young men craved to be these days? In instant remorse, she put out a tender, little hand to him as he sat beside her on Sara's couch and said:

"I wish one thing—that you would not seem so friendly with the sick Japanese. Why do you not let his case be taken care of by Thomison doctor?" The rumors in the city had reached her long before today that the hospital was safe because it sheltered a Japanese officer.

"Yasuda?" Chung inquired, surprised. "But I am interested in his case—a peculiar case with which I am experimenting with a new drug. Now I suspect a tumor on the liver."

"He will not soon be well, then?" she asked, very troubled.

"Not soon," Chung said calmly. He had not taken the little hand on his knee. He would not, he decided, until he need not defend himself. There was no urgency in him to take her hand. Ya-ching, whom he did not love, had nevertheless drained him of urgency. It was true, as he had suspected, that her body was beautiful. And in the night it is easy not to see a face.

"Do you know that we are losing patients because of this Japanese?" Siu-mei said. "Do you know that people are saying that we are safe in every raid because we are friends of the Japanese?"

"What does it matter what common people say?" he answered. And then, after a moment, he said one more thing: "It may be well, one day, to have been friendly with those who may conquer."

This he said to begin to make her ready, but he himself was not ready for what she now did. For she leaped to her feet and bent over him, her eyes sparkling and flashing and that tender little hand which had lain upon his knee was lifted and laid so suddenly and sharply across his cheek that the sting of it brought tears to his eyes.

"You speak as a traitor might speak!" she cried, and like a whirlwind she rushed out of the room. And Sara came in early that day and she found him with his eyes watering and his handkerchief to his cheek.

...Ch -ta in his mountain garri- ...new ys after this received the ...rs Chen-li. They came wind- ...and omewhat terrified. though ...not show it, after the journey ...he ts of cliffs. The garrison was ...nely emple up against the sky. ...a ha seized it for his own. though ...he t ee ancient priests who were ...pray and dust the gods at New ...and ray their prayers, and they were well pleased because he fed them with his hordes and spared them the trouble of going out with begging bowls.

When they missed their old. quiet peace in the midst of all the noisy. scuffling young men. they remembered how full their bellies were and let what was go on. Their only trouble now was to resist the meats that those men loved. and their chief prayers were for strength to eat only cabbage when the smell of pork was in their nostrils. They fell into this sin sometimes and climbed out again with groans and fears of hell after all their saintly years.

These three old priests now met the elders as they came up the last rocky steps on foot which even the bearers could not climb with burdens on them.

"Is this the revered nest of the great Eagle?" Mr. Ling inquired.

"It is." the eldest priest replied.

"Let him know that six men of Chen-li await his word," Mr. Ling said.

They had all stood facing the gate while they waited lest turning they must look down the steep rocks up which they had come and must go down again. But they had not to wait too long. The gate opened and a guard stood there and bade them enter and led them to the main hall where. below the great Buddha. Chen-ta was waiting. Mr. Ling. weary as he was. saw that even the high. gilded Buddha did not dwarf the tall young man who stood at its feet. It seemed rather to retreat into the shadows. waiting and protecting.

"Seat yourselves. old sirs." Chen-ta said calmly. He waited until they were seated and then he sat down. too. They waited while he sent for tea and sweetmeats and they heard him order a meal for them of the best the mountain had.

"Do not trouble yourself," they said.

"It is my pleasure," he replied.

And so when they were rested a little. Mr. Ling began. since it was agreed he must be spokesman. and in winding. devious. courteous words which seemed all praise. he made known the purpose of this visit from the Chen-li elders. Out of all the praise Chen-ta plucked the question.

"You come to ask why I am defeated," he said bluntly.

They coughed politely and each

"Johnson isn't cut out for this work. He's ticklish"

THE AMERICAN SHIRT FRONT: *Informal Dance*

These shirts off key	*Arrow Shirts on key*
1. **Bosom is bunchy.**	Arrow Shirts have the exclusive "Mitoga" figure-fit: curved waist, sloped shoulders, tapered sleeves.
2. **Tight at the throat.**	Arrows are Sanforized-Shrunk: fabric shrinkage less than 1%. A new shirt free if one shrinks out of fit.
3. **Messy collar.**	Try Arrow Hitt or Dart. whose collars look starched without starch . . . or soft-collared Arrow Trump.

slowly supped his tea. This was assent.

"I do not know," Chen-ta said in the same bold, frank voice. "If I did, would I let defeat go on? All that I can say is that whereas before the enemy was always surprised when I came, now he is always ready."

The old men looked at one another.

"There is a spy," Mr. Ling said gently.

"There has never been a spy among my men," Chen-ta said proudly.

No one contradicted him. No one spoke for so long that Mr. Ling knew it was his duty to speak again.

"When the enemy is a common one," he said in a judicial voice, "then we may proceed in common ways of war. But this enemy is no common one. And we must, therefore, expect uncommon things."

"If there is a spy among my men he sleeps dead tonight," Chen-ta cried passionately.

"When a man feels a flea bite," Mr. Ling said again, "he finds the flea before he kills it."

Chen-ta laughed suddenly. He liked this old man with the long, sheeplike face and little, fringy beard.

"I will find my flea, old sir, if he lives," he cried cheerfully. He slapped his knees. "What is your honored surname?" he inquired.

"Miserably, it is Ling," Mr. Ling replied.

"Ling?" Chen-ta repeated. "I met a Ling doctor at the hospital where my prisoner lies."

"That was my negligible daughter," Mr. Ling said proudly.

How could old Mr. Ling now understand the new attentions which Chen-ta urged upon him? He pressed every dainty upon him and deferred to all his ideas for searching out spies and at the feast which was spread in the second hall of the temple before the figure of the God of Wealth, which was made almost as big as the Buddha, Chen-ta put old Mr. Ling in the seat of honor and drank empty to him innumerable small cups of wine.

IT WAS late in the night before Mr. Ling caught a glint of light from the meaning of all this. He only of the six elders had been given a room alone. The old priests had been turned out for this, though he did not know it. He lay upon a priest's hard bamboo bed, fearing he had eaten and drunk too well and that he could not sleep. Then into the lonely room Chen-ta silently came. The old man started up in his bed in confusion, but the young man pushed him down by the shoulders and sat down beside him.

"Do not rise," he said. "I came only to ask a question. I am a common man and one without grace. What I say I say as a beast makes its cry, knowing no other way to speak. Is your daughter betrothed?"

And Mr. Ling gasped and blinked. This was directness indeed. He felt as though snow had fallen upon him.

"Yes," he stuttered, "ye—yes, by her own choice."

Chen-ta's face set itself. He was silent a moment. "By her own choice?" he repeated.

"She is very modern," old Mr. Ling said apologetically.

"Who is the man?" Chen-ta demanded.

"A doctor, Chung by surname," Mr. Ling replied, not sure whether he should give any man's name into such keeping.

"That mutton face!" Chen-ta cried.

Mr. Ling smiled but did not speak.

Chen-ta sat frowning. "I suppose your daughter does not even remember me," he said moodily.

"Yes, she does," Mr. Ling said eagerly. "In fact, it is due to her that I am here. She insisted that I come. She said, 'Our only hope is in the Eagle.'"

"Did she say that?" Chen-ta asked sternly.

"As I am here, she did." Mr. Ling said solemnly.

The moonlight shone clearly into the room, for the paper was torn out of the ancient lattices and none had replaced it. Chen-ta rose and went over to the lattices and threw them open. Then he stood, very straight and bold in the brightness of the night. A faint, distant roar floated in upon the wind. It was scarcely more than the noise an insect makes with its wings.

"The planes are over Chen-li," he exclaimed.

Mr. Ling clambered out of bed and went to see for himself.

"So they are," he said. They could see the darting flashes pale in the moonlight.

"Is she safe?" Chen-ta asked in a low voice.

"Perfectly," Mr. Ling said. "Strangely enough, the hospital has not been hit in months. All the city is talking evil of it, they say the Japanese are protecting it."

"What?" Chen-ta shouted. He seized the old man's shoulder. "I have not been told of this!"

"You have not come near for a long time," Mr. Ling said.

"No, because my messenger I sent there always told me that the Japanese was worse," Chen-ta exclaimed.

"Your messenger!" Mr. Ling repeated. "Who is he?"

"A common fellow," Chen-ta said. Both minds were working now with each other.

"Why did you choose him?" Mr. Ling inquired.

"He said he knew the way, having gone there once to have a wen cured on his cheek."

"Is he loyal?"

"He came to me as a deserter from the government troops."

"A deserter," Mr. Ling mused.

"But for a good reason," Chen-ta said quickly. "He would not join in this retreat."

"A reason good, if true," Mr. Ling said, and sneezed in the wind.

Chen-ta let his hand drop. "Get back to bed," he said. "It would be poor thanks to your daughter to let you fall ill in my camp." He helped the old man back and spread the padded quilt over him. Then he stood for a moment. "We may catch a flea," he said.

"It may be." Mr. Ling ag... his head.

» POPULAR WAYS TO SERVE WINE «

In afternoon or evening entertaining. When friends drop in casually, nothing is better than one of the famous sweet dessert wines, served with crackers and cheese, or with thin sliced fruit cake. Red, full-bodied *Port*, for example; or golden *Muscatel*, rich with the unique flavor of Muscat grapes. These wines are usually served in small portions.

At appetizer time. The delicate, nutlike flavor of good *Sherry* wine is an intriguing prelude to dinner. Serve your Sherry alone or with hors d'oeuvres . . . set it out in cocktail size glasses.

With your dinner. Red, tart *Burgundy* and *Claret* are perfect with roast beef or with a juicy steak. And when your main dish is chicken or fish, just try delicate pale-gold *Chablis* or dry *Sauterne*. These table wines are made "dry" (not sweet) to complement the flavors of main-course dishes. Usual serving is about half water goblet size.

"We Are Prepared"

Readiness is Characteristic of the Pennsylvania Grade Oil Region...and its Men

Ira L. Hill Photo

By H. A. LOGAN

Veteran Refiner; a director of
PENNSYLVANIA GRADE CRUDE OIL ASSOCIATION

IN THE historic Pennsylvania Grade Oil region, preparedness is tradition. Since "coal-oil" first spouted from Drake's well in 1859, men of this region have looked steadily ahead. They ever have been ready for the next forward move, for their product—Pennsylvania Oil—has been part and parcel of American progress.

In the sixties, soon after it was "discovered," Pennsylvania oil replaced whale-oil and candles to light the world. Then it became the preferred axle-grease for wagons and carriages; next, the friction-fighting lubricant in America's golden railroad age—the age of great expansion westward. A new challenge found Pennsylvania's oil men prepared—when the automobile came, bringing with it the truck, the tractor. And then the airplane! Today, not only millions of automobiles but most of America's great commercial airplanes rely exclusively on Pennsylvania Motor Oil.

Today the Pennsylvania Grade Crude Oil Association is both guardian and spokesman for Pennsylvania Oil and the men who produce, refine, and sell it. Through this Association, these men have made it their business to be prepared—always ready for the next step ahead.

H. A. Logan

WHAT THIS MEANS TO YOU TODAY, TOMORROW

In all the world no crude oil equal to Pennsylvania Grade has ever been discovered. Chemically and physically, Pennsylvania Grade Crude is *different* from all others, and, of course, this difference is apparent in motor oils made from it, just as a pie made with choicest apples is different from one made with ordinary ones.

Your car deserves one of these superior Pennsylvania Motor Oils. These oils lubricate better. They last longer. They are economical. A Pennsylvania Motor Oil gives you better service regardless of temperature, because it does not thicken up from cold or thin out from heat as much as other oils.

Every Pennsylvania Motor Oil entitled to use the emblem of the Association is made from 100% Pure Pennsylvania Grade Crude Oil — not one drop of any other crude is used.

When you add a quart of oil or have your car drained and fresh oil put in, be sure you get 100% Pure Pennsylvania. Look for the emblem or permit number of our Association. Don't be satisfied with an oil "just as good."

Pennsylvania Grade Crude Oil Association

OIL CITY • PENNSYLVANIA

The area shown above, touching four states, is the only district in the world producing Pennsylvania Grade Crude Oil, which is known to be the best raw material in the entire world for making motor oil.

At left is the official emblem of the Pennsylvania Grade Crude Oil Association. It is registered in the U. S. Patent Office and protected under federal copyright laws. This emblem is not the mark of a brand. It is a guarantee to you that a motor oil is made entirely from Pennsylvania Grade Crude Oil and that the oil is up to the Pennsylvania Grade Crude Oil Association's rigid standard in every respect.

Our New Army

rates for round trips may precipitate an intercity fight. Pretty dismal prospect.

LIEUT. J. E. MAZE of the 146th Field Artillery contrived to get a snootful but it was involuntary and all in the line of duty. When the trucks in his outfit were ordered serviced with antifreeze it fell to Lieut. Maze to see if the work had been done. "After sniffing the alcohol in about ten radiators," he admits, "I couldn't tell much about it. I was tight as a tick."

IN THE forest greenery and mud of Fort Lewis the most fragrant odors emanate from the tepee chimney of John Shanks, Seattle, whose experience includes five years of cooking in the Forest Service, two years as pastry cook in Spokane's Davenport Hotel and another three years as pastry cook in Seattle's largest department store. The Army made him a cook. Shanks whiffles through the drudgery of dishing up meat and potatoes for the ninety-odd men in his outfit, then spends his evenings whipping up lemon pies, doughnuts and cookies.

"We're all looking forward," Lieut. Griffith Murray sighs, "to plain white bread again."

Shanks joined the National Guard last summer along with a lot of other lads lured by what is now the stock gag of the 41st Division: "Three Weeks' Vacation with Pay on the Shores of a Beautiful Lake." They got the three weeks' annual N. G. outing, all right, but President Roosevelt's mobilization order followed immediately.

●

FORT HUACHUCA, ARIZONA: Largest mobilization of banjos, dice, rabbits' feet and general astonishment is claimed by this post, where several thousand Negro draftees—many from Chicago and Harlem—are being trained for the newly organized 367th and 368th Infantry regiments. Established in 1881 as a border post for Indian-fighting cavalry, the fort is at the mouth of a big canyon in high desert country a few miles from the Mexican border. Rookies' eyes bulge when they take a gander at the vast open spaces. Another eye opener is a tiny adobe village on the reservation, the "camp" of eight leather-faced Apache Indian scouts. I simply did not believe an of these men I knew so well d c mit treason. Other sins and es, s, but not treason. I was very wh Lieut. Commander Kirstell . "Vl . . . that will do splendidly, now Thank you very much, Miss llis.

paus only long enough to ask what ost ible assignment would be at y St ion. He said that he had been ed i nominal charge of reconstruc- wo at the shipyard, under Com- der cMatthews. No one was to w. c course, that he had any con- tion ith Intelligence. Nodding, I ied t of there.

The skipper had returned from his walk and was in Pop Sedden's office, making a great show of being busy on reports with Pop. He looked guilty as I halted outside the open door.

"All present and accounted for, sir!" I said.

Commander Sedden jumped to his feet. He had taken a brace since morning, and came forward with one of his heartiest greetings, bantering me about my green coat. The Irish were in bad favor with Pop because of their refusal to let England use bases in the Free State. We ribbed each other in the old way, both ignoring what had happened at the Seddens' that morning, until my father considered that he had established a good excuse for not returning to his office.

"H'm . . . I think we've licked it, Joe," my father said. "I'll have to get back to Kirstell." Then, as an afterthought to me: "Shouldn't we have all the newcomers to dinner, Phyllis? Tomorrow night, eh?"

"Why not tonight?" I said.

"All right . . . if you can manage."

"You invite Commander Kirstell, Dad. I'll invite the others!"

"Oh, you've met young Roberts and—"

"Yes. This morning. Be seeing you!"

On the porch, I almost bumped into Willie, a sailor on messenger duty for Roger.

"The chief'll be by at five o'clock, Miss Phyllis," Willie said.

"Thanks," I said.

As I was heading for the commissary to order steaks and warn Dolores by telephone, Marine Sergeant Maginnis saw me from afar and sent another message by a young private.

"Sergeant Maginnis says the chief says he's got some dope and he'll see you at five o'clock, Miss Hartney."

"Good! Thank you," I said.

It is always gratifying to the head of a Gestapo to know that his or her agents are on the alert. I ducked into the commissary and did my ordering. Dolores cursed a little—in Spanish—when told about the dinner on such short notice, but I fixed that by saying, cryptically, "I want much man-appeal in this dinner, much!"

Then I set sail for the basin.

ROGER, always efficient, had posted sentries. One of them stopped me on the path to the basin's single building, an old boat shed. He said I must either have a pass or be accompanied by an officer. I was on the verge of demanding that he phone Roger and get him down here in person to escort me through the lines, when a voice yelled: "Aw, let her in!"

It was Dutch Prentice.

"Ah, there's Lieutenant Roberts now!" I said, "Thank you, sentry!"

Dutch, a small, weazened and goggly-eyed young man, looked at me sourly as I approached. "Savvy isn't here," he said.

I noted that they had unloaded the truck and its contents were now out of sight, probably stored in the boat shed. They had also set up two Army field tents at a respectful distance from the shed.

"Oh, he isn't?" I said. "It may not matter at all. Just think, I may have come to see you!"

"Yeah? Ha!"

"As a matter of fact, I did."

"What for?"

"I'd like to have you come to dinner at our house this evening."

This flustered Dutch and he called

for reinforcements. "Hey, Pat! The captain's daughter!"

Pat came reluctantly out of the shed, being careful to close the doors tight behind him. He was a chunky lad with a glum, cynical face. I had been unfair when I classified them as mugs on first sight, but Dutch and Pat had a dismaying lack of the ordinary amenities. I thought a good deal about this, later, and decided that they were like one-man dogs, loyal to Savvy to the death and hating all others on principle. In addition they were engineers, not long enough out of school and too absorbed in their work.

"I thought you'd be around," Pat said. "Whenever Savvy pitches a new camp, they always come around."

"Once," Dutch said.

"You've got me all wrong, Mister."

"Yeah?"

"I came to see you."

"Ha! She told me the same thing," Dutch said.

"I'll own up. You both dazzle me."

DUTCH and Pat exchanged glances. They worked as a team.

"Savvy ordered us to be very polite to you, because you're the skipper's little girl," Pat said. "So pick yourself a rock and sit down."

"Less majesty, you oaf, you churl!" Dutch said. "This gal rates thirty-six guns, eighteen side boys, twelve flourishes and sixteen ruffles. I shall get her a chair."

He dragged a canvas chair out of the nearest tent. I did not sit down. It is better to die on your feet.

"Are you coming to dinner?" I said.

"Dinner?"

"Did she say dinner?"

"Who asked the question?"

"I think she said thinner."

"So you don't want me to love you, eh?" I said. "Too bad, too bad!"

"Yeah?"

"Why bad?"

"We could have made great music together, with me drumming on your thick skulls. Now, I'll just have to brush you off as a couple of klunk stooges and invite Lieutenant Roberts."

"Can't you take a hint, Sis?"

"Spell it for her, Dumb."

"Look, honey chile," said Dutch. "What we've been trying to say is: 'No dice.' N-o . . . d-i-c-e. To put it brutally, Savvy is married, see?"

"Married?"

"That's it!" said Pat, moving in. "He's married to a beautiful skyrocket with swishy skirts all covered with stars."

"No other dame need apply."

"Not even a cute little redhead like you."

"I think she's beginning to understand, Pat!"

"I doubt it. Tell her some more."

"Okay. I'll put it this way: you mustn't ask any of us to dinner. You mustn't go rolling those big brown eyes at Savvy. There's a war coming on, see? We've got work to do. We have to warn all the girls. There's nothing personal about it, Miss Hartney. So thank you very much . . . and after the war . . . we'll all get together in Berlin and be very happy."

"Nicely put, Dutch."

A girl can take only so much. (Young Phyllis takes rather less than that.) So I lost my temper and really lowered the boom on Mr. Dutch and Mr. Pat.

I said if they wanted war, let it begin here. I said I was not in the habit of being warned away when I brought duty-invitations. I never threatened anyone, I said, but let no boorish, goggle-eyed screwballs from M.I.T. assume that I was not a power around Navy Station. I could throw plenty of spokes into wheels and monkey wrenches into machinery. Life was going to be very hard for a couple of young geniuses. I'd have the Navy Department send 'em back to M.I.T. for a course in good manners, that's what I'd do. And if Lieutenant Dent (And Maybe Not So Savvy) Roberts didn't know how to kick his dogs around and make them behave, I'd—

"Miss Hartney!"

"Oh . . ." I said. "H—hello—"

Savvy Roberts, himself, in person. He was in uniform, with coat unbuttoned and cap cocked rakishly, and he carried an armload of apparatus wrapped in burlap. He set this down with care and looked at the three of us.

"What's the trouble here?"

"Aw, just a little argument."

"She lost her temper."

I was still good and sore, and I moved in to do all the damage I could, saying, "I came over here to invite you all to dinner this evening. I've been informed that you never accept invitations. I've also been told to stay away from here. Are those your orders, Lieutenant?"

"This is all right!" Savvy said.

"You like it?"

"Very much."

"The whole shebang?"

"Yes. I can work here!"

"So you like Navy Station. *Why?*"

"Your father is the principal reason, Miss Hartney. I had a real talk with him this morning. He knows what I'm after, and he approves of it. I told Dutch and Pat that if we could just wrangle our way to this station we'd be all set. And am I happy!"

"That's good of you."

"Good of me?"

"To speak that way of Dad."

"WHY be so humble? Captain Hartney is one of the best brains in the Service. The tops, *I think!*"

"So they exiled him."

"That's quite unimportant."

"And called him a foolish visionary."

"I read all about it in the papers," he said. "Best thing that could have happened to your Dad. All the fatheads

"You can push a little faster now, dear" DAVID R. HUTTING

"Of course not, Miss Hartney," Savvy said. "I shall be delighted to come to dinner. Either Mr. Prentice or Mr. Rorabeck will be with me. They can't both come because one of us stays on duty at all times. Will you explain that to Captain Hartney?"

"Yes," I said. "He'll understand, of course."

THEN Savvy looked at Pat and Dutch. They up and spoke their pieces like little gentlemen.

"Sorry, Miss Hartney," Pat said.

"We were just kidding," Dutch said. "Forgive us, please."

"I'm sorry too," I said.

We shook hands solemnly, like naughty children in front of an indignant teacher.

"We'll expect you at seven-thirty, then," I said.

"Which way do you go back?" Savvy asked.

"I think I'll take the short cut around the basin," I said.

"Mind if I walk along with you a few minutes?"

"No, indeed!" I said.

"Thanks."

The short cut around the basin led along a chummy beach with our precious fleets on one side and a fishy-smelling backwash from the sea wall on the other. It was not a romantic walk, but the sun was shining nicely, low down in a moody roving sky, and we did have the ocean, a humming surf and a good wind.

denounced him. Now his reputation is secure. Didn't it make him happy? Can you remember what he said when Granny Hartrig sounded off in the institute proceedings?"

"Yes . . . come to think of it . . . I do."

"I'd like to know."

"Dad said, 'Too bad Hartrig isn't a more famous fool. His criticism could make me an immortal!' "

"Swell!"

But it was my bounden duty to go on being cynical and bitter. (Tactical Note: This is known as drawing a man out.)

"I don't want my father to be an immortal," I said. "I want him to have his flag not later than the first of next month."

This was heresy to Lieutenant Roberts.

"Any amiable chump can be an admiral," he said. "Don't talk nonsense."

"Oh, sure, just stay here at Navy Station and rot."

Savvy halted and looked down at me, his gray eyes seeming to have tiny, mystic lights that danced and flickered. Whoa, girlie, I thought, this one is really different. You'd better be careful with this one. Maybe he actually is Lawrence of Arabia, come back to life. That's a sand dune right behind his left shoulder, isn't it? Now, if he wore a burnoose and if he hadn't singed his eyebrows putting out that fire this morning—

"You ever talk this way before Cap'n Hartney?"

"No."

Then, I said, "Yes, I d

"We fell in love every other Tuesday," said the meerschaum

"YEP," said the old hand-carved meerschaum, "back in the Gay Nineties my boss was in and out of love like it was a revolving door.

"But flighty as he was with the gals, he had *one* love, by golly, that he never tired of—and that was *me!*"

"Phooey!" scoffed the Shiny New Briar. "No pipe can be *that* good!"

"You'll learn, sonny," said the Old Timer, "after you've been broken in with Half and Half tobacco. You'll find a man reaching for you in the morning with a grin, and putting you away at night with regret."

"Jeepers!" said the youngster. "Do you really think I'll click like that with some guy?"

"Don't worry, son," said the meerschaum. "You'll be sitting pretty when you're filled with Half and Half. It's a tobacco a man enjoys right down to his toes. It's a fragrant smoke . . . a friendly smoke that doesn't talk back, or ever nip a man. Yes sirree, bub—Half and Half makes any pipe a sweetheart!"

A CARGO OF CONTENTMENT IN THE BOWL OF ANY PIPE

Next time you settle down with a pipe, load it with Half and Half. Enjoy its mellow, aromatic flavor. In briar, corncob, or meerschaum, Half and Half is contentment in the bowl of any pipe!

interesting meerschaum is a splendid example of the lost art of pipe carving. It is Half and Half's $25,000 collection of pipes assembled in honor of a uniquely fine tobacco . . . Half and Half.

Remember, Half and Half comes in the Vacuum Telescope Tin that gets smaller and smaller as you use the tobacco.

Ro..., handsomely turned out in ...w uni...rm, did his best to carry the ...ersa...nal ball, but he was fidgety ...kept ...mbling.

...ly S...vy seemed entirely at ease. A captain's dinner or potluck with the Hottentots, it was all the same to Savvy. Alas, he was interested only in my father, and hero worship plays the devil with dinner-table small talk. Savvy kept waiting for the great man to drop priceless words of wisdom, but Dad was not in good form, poor darling. I saw, to my dismay, that Roger had taken quite a shine to Savvy and was trying to make him a friend—and that Savvy, while kindly disposed, did not give his friendship for the asking. Roger, sensing this, was bewildered and suspicious. It is difficult for a conceited man to understand why his charm does not sweep all fields.

To add to my torture—any hostess worth her salt would have felt tortured—Dolores, the scourge of the Spanish Main, went for Lieutenant Roberts in a big way. Such smiles and such rolling of the eyes at Savvy! (Grim Commentary: Like mistress, like maid? eh? We are *simpatico*, eh? Dammit!) So I sat on the edge of my chair, diving to retrieve the conversational ball whenever Roger fumbled it behind our own

"I'm sorry I broke your machine. I just wanted to get some gum"

KIRK STILES

goal line, and waiting for an undisciplined child of Panama to blurt out the inevitable gaff.

I knew my Dolores, all right.

Serving Lieutenant Roberts the biggest and best fillet, Dolores looked at him in rapture. "You are Señor Ga-ree Coopair's twin brother, no?" she said.

"I beg your pardon?" Savvy said.

"Dolores!" I said.

Roger, across the table, grinned. "She wants to know if you're Gary Cooper's twin brother!" he said.

"Cooper—"

"The movie star, dope," Pat said.

"Oh . . . oh, no—no relation," Savvy stammered.

Dolores saw my face and fled, giggling evilly. I wanted to follow her right out to the kitchen and kick her shins. Gary Cooper, for goshsake! To compare the reincarnation of Colonel T. E. Lawrence with a movie actor. I wanted to stick a sharp fork into Dolores.

Then, while Savvy reddened, probably ashamed of his ignorance about movie stars, and while I tried to think of something to say, dear Roger put his foot right in it. "That's treason, Roberts!" he said. "Not to know one of America's heartthrobs."

My father looked up from his plate. "Treason?" he said.

The word had such an ugly sound for three of us. I set my teeth hard and Lieut. Commander Kirstell's face tightened a little, as Roger politely explained the joke to the skipper and Savvy looked more miserable than ever.

"Oh . . . oh, yes," my father said.

ROGER babbled right on. "And, speaking of treason," he said, "have you seen Colonel Donovan's report on France in the current Journal, sir?"

"Yes," my father said. "Depressing."

"Let's be merry and gay!" I said.

Savvy looked at my father. "Depressing, sir?" he asked.

"It didn't strike you that way, Roberts?"

"No, sir."

"That's interesting. Why not?"

"Well, sir, treason is a fascinating crime—to me. I suppose I take a clinical delight in it. So much more complicated and important than murder—isn't it, sir?"

"Yes, it is," my father said, slowly, his eyes warming as they habitually did when anyone he talked to showed the slightest evidence of originality. "Go on—"

"I remember an essay you wrote, sir—quite some time ago—when Hitler first came to power. You said he would be dangerous because he was a genius at treason."

My father looked down the table at me. "I told you someone, somewhere would read that, Phyllis," he said, pleased.

"Where was it published, sir?" Roger asked.

"In the Virginia Quarterly," Savvy answered. "I can lend you a copy."

"Thanks. I must read it," Roger said.

"A true prophecy," Savvy went on, as if thinking aloud and wholly absorbed. "It may be that the history-book boys will call this the Age of Treason."

"That's . . . rather severe," my father said.

I glanced uneasily at Lieut. Commander Kirstell. He was watching Savvy out of the corner of his eye.

"We're getting much too serious—" I began.

Roger barged right in. "We're not France, Roberts," he said.

"Frenchmen said they were not Austrians."

Stiffening, Roger got testy: "Treason isn't an American vice."

Savvy looked at him, gravely. "You've never been a traitor, Collins?"

"Are you serious?"

MY EYES appealed to the skipper for rescue. But he was leaning forward in his chair, with a scholar's intentness upon the debate.

Roger's chip-on-my-shoulder tone amused Savvy. "I think we've all betrayed our country, in one way or another, Collins," he said, gently. "I think most of us are traitors right now."

"Rot!"

Savvy turned to my father: "What do you say, sir?"

As my father hesitated, a sentry's voice shouted "Halt!" and it sounded through the open windows of our dining room as if from just across the parade ground.

The order was repeated, and then a rifle shot cracked out. Two more shots followed in rapid succession.

I thought Roger was admirably quick as he sprang up and said: "Excuse me, sir!"

But Savvy Roberts was already out the door.

the two-hundred-yard marker. Ed strode back to Jessie.

"*I* lured you into! I! Why, you know perfectly well that you were the one that . . ."

Jessie walked away from him into the crowd. She reappeared when he reached his ball. "Socks," she said feelingly. "Socks. Fourteen million pairs of socks that have to be washed in lukewarm water and put on racks. What kind of feet have you got anyway? Honeymoon! Do you call living in a two-by-four hotel room in a forest of wet socks a honeymoon?"

Ed walked over to his ball, pulled a four iron out and addressed his ball briefly, hit a shot that was on the pin all the way. He turned to Jessie, but Jessie had walked away into the crowd.

But she was back with him when he reached the green. "My mother warned me against you. You and your sixty-fives at Cold Springs and your eighty-threes when it amounts to something. The . . ."

Ed walked away from her, lined up his putt and stroked it crisply. His expression didn't change when it dropped.

Jessie was waiting for him on the second tee. "Well," she said. "how do you propose we get home on seventeen dollars and fifty cents? Have you given that any thought . . . ?"

They were carrying most of the gallery at the tenth hole but Ed Barret didn't know it. He had heard, piecemeal, his entire married life reviewed in the most unfavorable, in fact untruthful, fashion. Every time he marshaled an answer and got his temper under control enough to make it, she would fade into the crowd, leaving him open-mouthed, impotently raging. But she was beside him as he prepared to play his second across heavy rough to the eleventh. "I'll tell you something if it'll relieve your mind," she said hotly. "You don't have to worry about that bank roll of yours. I'll wire father from here and have him send me money to come home on. I won't be a burden to you any longer."

HE STOPPED stock-still and his answer came low through clenched teeth: "Okay! Fine! That's swell. The quicker the better. Just simply go any place your phony heart desires and let me play golf." This last was spoken in a slightly less restrained tone and the caddie must have heard it.

"Good golly, Mr. Barret, you're . . ."

"Shut your mouth!" Jessie whirled on him. "You speak when you're spoken to." The caddie dropped back, coloring with anger. Jessie winked imploringly at him.

Ed Barret stepped up and played a spoon shot across a hundred and eighty-five yards of trouble into a quartering wind. The ball came to rest on the edge of the green. But he didn't hear the clapping.

Jessie was back at him: "You moan and you groan. Why don't you get an honest job like anybody would that had a wife to support?"

There was more of t more. It lasted until the eighteenth fairwa her silently raging h Mrs. "Siege Gun" Sur on the clubhouse porc

RE e classic rivalries between 's a sections the world over: and okyo, Moscow and Lenin- Mila and Florence, Manchester iverp ol. At home we have Los es an San Francisco, and, in mat- f spo at least, the fratricide be- Ne York and Brooklyn. Alec ded all these were gentle com- wit rivalries existing in South ica, ere spectators at intercoun- ootb games are customarily ed f weapons.

Brazi henever the weather turns it is ttributed to a "wind from os A s." In Argentina officers told us that in academy lessons or field sham exercises their imaginary enemy was never referred to with discreet anonymity, but quite frankly as "the Brazilians."

Not especial pugnacity in South Americans, but rather the unsurveyed, unconquered, illimitable wildernesses of their continent—inhabited, if at all, by Indians—are to blame for vexed, uncertain frontiers. Alec said:

"Look at the maps of South America on display in any North American business house down here. You will see the names of the countries indicated, but not their boundaries. They've all had their ears burned hanging definite maps. That's why they all now use that neutral blank map, same as the one in the Pan American Airways timetable.

"When your great man, His Excellency Señor Alfred M. Landon, was here in Lima in 1938, I was his chauffeur. Yes, all the time. And I showed him things and told him matters as I now do to you. I said to him, 'Your Excellency, it is fine, this Good Neighbor business. However, I hope while you are about it you will find some way to get us in South America to understand and to love *one another* as well!' "

WE HAVE large enough crowds at our air fields to watch planes come and go. But most of those people are bent on curiosity. Airports in South America have a deeper meaning, attract large but different crowds. With unimportant exceptions, the plane is South America's only means of interstate and continental international travel. The major airports, therefore, take on the flavor of bus, rail and plane depots combined, with Fred Harvey and customs and immigration men to boot. Here are no sightseers; but relatives and friends pressed gaily, or tearfully, behind official bars.

It's all on a bell system. One bell, and the crew marches sheepishly aboard. Two bells: amid an instant hubbub of squeals and lamentations, you stride firmly to the plane. But this is nothing compared with the uproar when three bells sound.

Three bells is a signal that an incoming plane has been sighted and there is a stampede for vantage places and the first glimpse of Uncle Louis or little Gracilla.

There are certain fields where shrewd, old hands have learned to read signs that enable them to wedge in ahead of the three-bell rush. At La Guaira in Venezuela, you know, when you see hangar attendants go forth with sticks and stones to chase the goats from the field, that the last radio word, ten minutes before arrival, has just been received from the plane. At Barranquilla, in Colombia, there are cattle to be shooed. Santiago airport in Chile, has sheep to be herded away.

At Santiago, moreover, there is a bit of animal occultism. Usually, on fine days, the air-minded sheep do not venture too far onto the runways. But airport workers say:

"No matter what the weather looks like, or what the meteorologist says, if we see those sheep grazing all the way across the field to the station, we know there isn't going to be any plane arriving today!"

AEROPUERTO SANTOS-DUMONT at Rio de Janerio is named after the great Brazilian who, while the Wrights were still mending bicycles, went to France, flew an early dirigible around the Eiffel Tower, made sound if less

spectacular contributions to the science of aeronautics. He is one of the patron saints of flight, who set in motion in your father's skull the preparations for your present air-mindedness.

This is a handsome, spacious field, with fine terminal buildings, landscaping and restaurants. On the harbor front, it is only a single click of the taximeter to Rio Branco, the center of Rio de Janeiro—one of the most civilized and sophisticated of modern cities.

From the clipper plane, then, at this airport in this city, stepped the foreign editor of a great United States daily paper—all decked out in sun helmet and snake boots, with the print of a grim mission on his features, as if he were resolved at whatever cost to life, limb and comfort to plunge through jungle and pestilence in his search for the fifth column.

Brazilian reporters who met him exchanged hurt, uneasy smiles. One told us:

"Some day I'm going to step out of a plane at LaGuardia Airport all dressed up to hunt red Indians!"

IN RIO is a neighborhood that strikingly resembles the Yoshiwara of Tokyo. Here, indeed, are birds in gilded cages. From clean, tidy, starkly lit rooms girls of every nationality and color and gradations of both grasp the gaudily painted wooden bars of their windows and smile upon passers-by. Everything is friendly, orderly.

Within one such room, alone, oblivious of the jolting throngs outside, the plump, middle-aged Frenchwoman in a decorous Mother Hubbard sat reading the war headlines in a paper from home—a month-old Le Temps. Her spectacles had slid down to the bulb of her nose, and sat there like a small boy held by a stair banister newel. To see through them she had to tilt her head back and look down her cheeks, gaining thus a singularly benign expression. There was a sailor hailing her from the window bars. For several minutes she paid no attention to the puzzled man. Then she glanced at him briefly over her glasses, readjusted them, shook her paper, turned her back and went on reading.

BETTER stay away from the Monroe Doctrine as a subject of conversation down here. The average South American knows so much more about it than you do. If in an excess of good will you patronizingly and emotionally explain how it is all for his own best interests and protection, he will tell you that our famous Doctrine has been warped, frequently stretched a lot, and cleanly broken more than once. By England, when she seized and colonized British Honduras; again when she took the Falkland Islands from Argentina. By France, when she set up the Emperor Max in Mexico. By Spain in Santo Domingo.

SOMETHING of the intense devotion of South Americans to the idea of personal liberty is expressed in their driving habits. On this continent traffic lights are as scarce as Communist orators in Vatican City, and as little needed. A week in Rio is sufficient to reduce anyone schooled in the closely regulated driving of the States to craven, quaking collapse.

When you enter his car the genial Brazilian allows no consideration of the problems or conditions of the road to interfere with his manners as host. He presses the accelerator to the floor at once, points his car in the general direction of your destination, allows one hand for the wheel but keeps the other free for conversational purposes, turns around in his seat and composes himself for a chat with his eyes fully upon you—and pays no furt

THINGS are so mixed up with isms and ologies, with axes, fronts and only friends, that it seemed inevitable to South Americans—the primary target for both European and North American propaganda today—that somebody would kick a goal for the wrong side.

When the Havana Conference was in preparation signs developed that Mr. Hull's official sweetness and light were not uniformly shared by all his compatriots—particularly those in the shipping business. International conferences are something like an air corps. To keep a plane in the air you need at least ten men on the ground. To keep delegates at table, you need a retinue in the background of at least twenty clerks, secretaries and ink boys for each of the front men.

So there was a large batch from the east coast alone of Brazilians, Argentines, Uruguayans, Paraguayans to be transported to Cuba. The air line handled some; the bulk had to go by steamer. But North American boats could not turn aside from their regular schedules for the one extra day that was necessary to make a stop at Havana. There were a dozen such excuses.

At Rio at the time was the Brazil Maru, one of Japan's fine new merchant ships. "Look," the Japs said, "we'll take off passengers, reimburse them, put them up in hotels to wait for the next ship, turn the whole Brazil Maru over to you at your convenience!"

So it happened that many of the delegates from South American republics to the famous democratic convention on unity against dictatorships traveled to it in a totalitarian ship!

You'll like yeast this new way

FRANK: Clever little trick! I used to eat yeast every day, and I remember the good it did me, too. Never felt better in my life. But I didn't like the taste.

SUSAN: Well, here's a way to like it! Really, it tastes like oven-fresh bread . . . in tomato juice. Makes a delicious vitamin cocktail this new way . . . Quick and easy to mix, too. Twice a day for me now. I'm going to get *all* the benefits of yeast by staying with it.

FRANK: And there are plenty of benefits to get, believe me! I check the authorities 100% when they say "yeast is one of the richest natural sources of the amazing vitamin B complex."

SUSAN: Now you're talking! And maybe you aren't getting enough of these vitamins. Drink yeast first thing in the morning, last thing at night . . . Keep it up, and see if the silver lining doesn't begin to show!

MASH . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's *Fresh* Yeast

DRINK IT . . . TO YOUR HEALTH!

Discovering the New Ones

Continued from page 13

her name to Doris Davenport and gave her the lead in The Westerner. One of our first hunches for the role, Margaret Tallichett, found a career of a different sort in Hollywood: she became the wife of Willie Wyler, the well-known director—and if she hadn't quit pictures for marriage might have had a nice theatrical career.

A little girl named Bebe Anderson, whom we brought up from Alabama, played the part of Maybelle Merriweather in the film, was subsequently signed by Warner Brothers, and is now playing substantial roles under the name of Mary Anderson. (It would seem that most of these girls got not simply new opportunities, but new names in the bargain!) Paulette Goddard, who had only played in Chaplin's silent Modern Times, some years before, was given a contract by us and got off to a whole new career in The Young in Heart. There are half a dozen others that I could tell you about, but I think these ought to be enough to make my point—which is that the much derided Gone With the Wind casting search was possibly the most productive episode from the standpoint of finding new personalities that the industry has ever had. Our tests cost us approximately $85,000, but I like to think it was worth it.

Before my brother Myron, a Hollywood agent, brought Laurence Olivier and Miss Leigh over to the set to see the shooting of the burning of Atlanta, I had never seen her. When he introduced me to her, the flames were lighting up her face and Myron said: "I want you to meet Scarlett O'Hara." I took one look and knew that he was right, so far as my conception of Scarlett O'Hara was concerned. Later her tests, made under George Cukor's direction, showed that she could act the part.

The Girl that Nobody Wanted

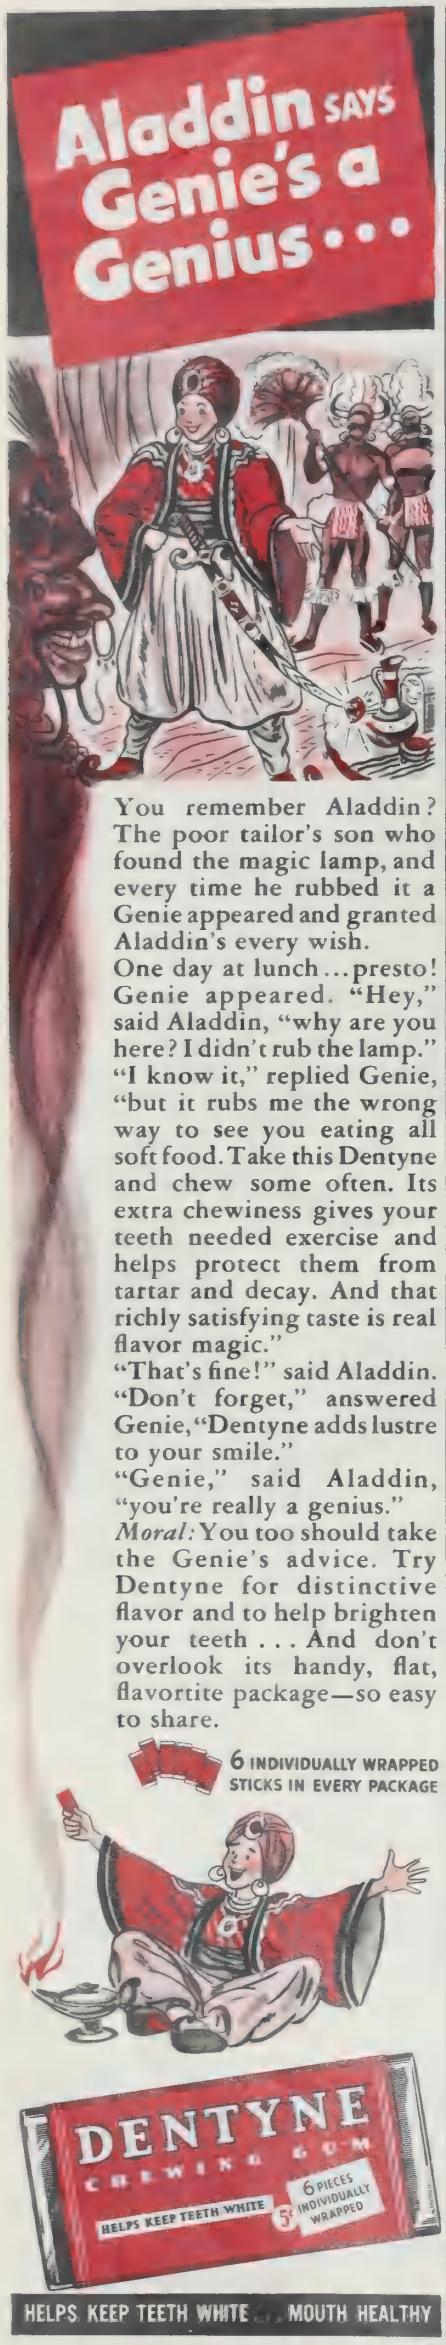
Although the public furor about it was not so great, the experience with Joan Fontaine in Rebecca was almost as exciting. For a year I had been talking with Miss Fontaine and trying her in tests. At one point in the proceedings I tried to get Sam Goldwyn and Hal Roach to join me in a three-way deal on a contract with her, but they looked at her other pictures and would have none of her. RKO gave her a couple of important opportunities, and then let her out. She was thought by some people in Hollywood to have so little talent that they called her "the wooden woman." Nobody at our place could see her for dust in this role, nor could they understand why I kept turning down the great and important stars that were eager to play the part. (The part was considered the biggest plum in years, second only to Scarlett; and one prominent star pleaded with me to let her play it with no salary whatever.)

Being the boss and also stubborn, I kept making tests of Miss Fontaine as well as those of many others, including newcomers and great luminaries who hadn't for years deigned to make a test for anything. Finally, I gathered all the tests together and assembled the studio staff in our biggest projection room. There wasn't a person in the outfit in favor of Miss Fontaine. I finally decided that maybe they might have better judgment back in our New York office. You see, I had sent the Leigh tests back to the New York office to confirm my judgment before closing with her, and everybody had agreed that she was the only Scarlett. In fact, John Hay Whitney, my principal partner, insisted that we shouldn't even consider anybody but Leigh. . . . But there was nothing doing on Fontaine. The verdict was unanimously against her.

At this point I weakened and let Miss Fontaine's option drop. Then, a week before shooting was to start, I paced the floor one night and brooded over the fact that if the lead in Rebecca was miscast the whole picture would be wrong; and that if I had enough nerve to cast an English girl as Scarlett O'Hara, why couldn't I have the courage of my own convictions about Fontaine? I reminded myself that she would have the benefit of the guidance of the great director I had assigned to the picture, Alfred Hitchcock. And I went to the studio bright and early the next morning, determined to use her. But it looked as though I was going to pay the penalty for not having decided sooner. Miss Fontaine had just promised to marry Brian Aherne, and she was not sure she wanted any further part of the picture business and its heartbreaks. Finally, by raising the terms that were called for in the option, and by making certain other concessions, I was able to persuade a girl whom Hollywood wiseacres had branded a failure to accept the greatest role of the year!

By the way, one of the best performances among the newcomers we tested was given by a girl from New York named Ann Baxter. She has great charm and talent, but was a little too young. I predict great things for her, and am glad to hear that she's already getting some good breaks in Hollywood. Another girl who made splendid tests and who I think has a very promising career is Virginia Gilmo[illegible] tract to Sam Goldwyn.

Vivien Leigh wanted th[illegible] very much, and while th[illegible] in my mind that Vivie[illegible] most anything brilliantly [illegible] anybody in the world wo[illegible] she could have been so [illegible] so long by the Mrs. Danv[illegible] and if they didn't believ[illegible] story would have fallen a[illegible] a girl who looked like [illegible] class Englishwoman and [illegible] in all reason have allowe[illegible] to boss and frighten he[illegible]



It's Not Only B[illegible]ty

There is much talk ab[illegible] ing "photogenic" but tha[illegible] understood. Nine times [illegible] an actress has a great [illegible] the stage she also has a [illegible] ity in the films. This is [illegible] than it was years ago wh[illegible] hadn't progressed to its [illegible] Naturally the screen enla[illegible] grotesque any physical [illegible] these defects are seriou[illegible] might keep an actress [illegible] a big fan following in fi[illegible] there are actresses who [illegible] talent and interesting pe[illegible] whose failure in Hollywo[illegible] to their not being "pho[illegible] the truth of the matter is [illegible] badly cast, or that the [illegible] poorly made.

And while we're on [illegible] me say that, so far as I'm [illegible] day of the elaborate ma[illegible] ing to a close except fo[illegible] exotic type. When Ma[illegible] was playing The Prison[illegible]

"Personally, I don't believe a fellow who sends mimeographed love letters is sincere"

You remember Aladdin? The poor tailor's son who found the magic lamp, and every time he rubbed it a Genie appeared and granted Aladdin's every wish.
One day at lunch ... presto! Genie appeared. "Hey," said Aladdin, "why are you here? I didn't rub the lamp."
"I know it," replied Genie, "but it rubs me the wrong way to see you eating all soft food. Take this Dentyne and chew some often. Its extra chewiness gives your teeth needed exercise and helps protect them from tartar and decay. And that richly satisfying taste is real flavor magic."
"That's fine!" said Aladdin.
"Don't forget," answered Genie, "Dentyne adds lustre to your smile."
"Genie," said Aladdin, "you're really a genius."
Moral: You too should take the Genie's advice. Try Dentyne for distinctive flavor and to help brighten your teeth . . . And don't overlook its handy, flat, flavortite package—so easy to share.

g successes are a matter nse. Myrna Loy had been tal sirens for years, which oke with people who knew a beautiful girl, but no revolutionary thing, put- a polite comedy like The om, but when it was sug- e by Ned Griffith, the ped at the idea. Nobody much, probably because yrna personally. We fol- casting her in a straight the lead opposite John Topaze.

ts will remember the fren- zied search for a Tom Sawyer, which resulted in our discovering Tommy Kelly in a schoolroom in the Bronx. That also was suspected of being a publicity build-up, but we took hundreds of tests and were desperate for a Tom Sawyer until we located young Kelly. Tommy had been selected along with dozens of other boys by Oscar Serlin, who was then talent-scouting for us, and who has since become well known as the producer of Life with Father. Norman Taurog, the director, and I saw Tommy's test mixed in with dozens of others that had been arranged by Oscar and other talent scouts in all parts of the country. There were those who thought it was silly to look in the Bronx, but Tommy's personality stood out head and shoulders over all the others.

Since there are few stories as great as the Mark Twain classic for a boy to play in, Tommy has never repeated that triumph, but he is a fine little actor. We were all sentimental about him in the studio, and everybody was delighted when I arranged that he should be in the very last scene that was shot for Gone With the Wind. Do you remember the scene in which the news of the Gettysburg defeat came to the people of Atlanta? The ragged band, composed of old men and boys, began to play Dixie, and the camera finally centered on a heartbroken boy playing his flute. That was Tommy Kelly.

There's Always a Chance

The point of all this seems to be that there is always a chance for a newcomer in pictures. Real sincerity and acting ability cannot be hidden on the screen. I saw Ingrid Bergman in a Swedish film and sent Katherine Brown, our New York representative, over to Sweden to sign her. There was no need to see her personally or talk with her. She has an honesty and spirituality about her acting that I am confident is going to make her one of the really great figures of the screen.

In addition to her vitality and beauty, her striking personality and enormous natural ability, Vivien Leigh has a background of training and acting experience that makes her a great film actress. Vivien makes no secret of her opinion of certain scenes as she goes along. During the 122 days she was on the set during Gone With the Wind, the longest period for an actress in a single picture in the history of the movies, she would be muttering deprecations under her breath and making small moans before a scene. Then she would walk into the scene and do such a magnificent job that everybody on the set would be cheering.

Back in the days of silent pictures, it was possible to take a nitwit with a beautiful face and figure and make an actress out of her. The glamor girls are still needed in films, but it takes more than glamor now to achieve real and lasting stardom. Some of the biggest failures in Hollywood have been concerned with trying to make actresses of famous New York show girls. With sound pictures the ladies have to talk.

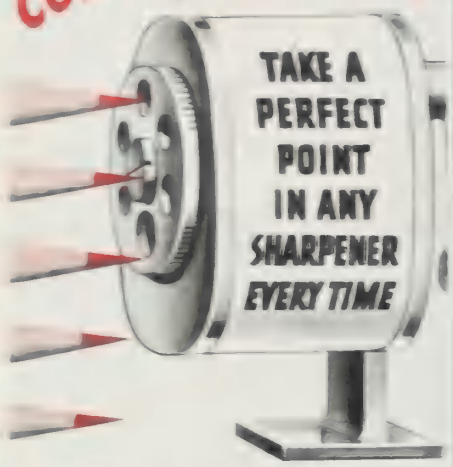
Occasionally, someone who has had no previous experience will make an impression. But the screen is going to have a whole new list of stars in the next few years, and most of them will be those who have come up the hard way—those who have learned their trade, who have studied the profession that they hope to succeed in, and who have become actors and actresses through long experience. Our make-up men and photographers can make great beauties out of fairly pretty girls. But all the grease paint and all the expert lighting can't make a Helen Hayes or a Vivien Leigh.

To be sure of flashing acceleration be sure your spark plugs are CHAMPIONS

Acceleration wins midget races—practically all racing drivers use Champion Spark Plugs.

If your car starts hard, is sluggish and gives you poor gas mileage, your spark plugs probably look like this. For economy replace all spark plugs, even CHAMPIONS, every 10,000 miles.

Be sure of your car in traffic—be sure your spark plugs are Champions.



You penalize the performance of your car or engine by underestimating the importance of spark plugs. Be sure your spark plugs are Champions and you can be sure of absolutely dependable ignition under every operating condition.

No other spark plug has the patented Sillment seal which makes Champions permanently free from troublesome compression leakage *common to ordinary spark plugs*. This feature insures uniform ignition in every cylinder, greater efficiency and economy than is possible with spark plugs which leak under today's higher compressions.

Remember Champion manufactures spark plugs only, and accordingly is backed by research, engineering and manufacturing facilities without equal. The better performance of Champions is traditional and proved by their almost exclusive use by racing champions everywhere.

You're always ahead with Champion!

Journey by Night

Continued from page 15

came through that January Purtle had been robbed and killed did Joe Ed find courage to lay claim to a part of the skimpy crop he tended for his pappy. Sukey was left alone and might need help. He had to go to her now.

They rattled across the wooden bridge by the ice plant and pulled up at Stillson's Produce Market. There wasn't a soul in sight.

"I ain't gonna git much talkin' done around here," Billie complained.

"They're jest in eatin'," said Joe Ed.

Then footsteps sounded behind them and Billie craned round.

"Hit's that Simp Goodloe," he said. "He always knows ever'thing."

Joe Ed climbed down over the wheel. "I'll go in an' get my price from Mr. Stillson." And his long legs carried him out of sight before Simp reached the wagon.

SIMP GOODLOE was a big fellow, handsome in a heavy sort of way. He wore tight gray pants and a dirty orange sweat shirt that strained across his chest.

Billie hailed him. "Hi, feller."

"Hiya," said Simp. He stopped. "Where'd you get this fit-out?"

"Hit's Thorntons'. I rid in with Joe Ed. Say, whut they found out about . . ."

Simp cut him off: "So you're ridin' with Thornton trash? I'd a heap rather walk." He leaned against the wagon. "These Joe Ed's punkins?" He looked them over with small gray eyes set close in his heavy face.

"Uhuh," said Billie.

"That bein' the case," said Simp, "I guess he could spare me one." He picked up a big, fat pumpkin and smashed it against the front wheel of the wagon. Then he smiled at Billie and dusted off his hands on the seat of his britches. "Jest tell him I been along," he said, "an' if he's countin' on seein' Sukey Purtle this trip he might as well change his mind." He strolled off toward town with a well-pleased, rolling gait.

When Joe Ed came back Billie was still scratching his head and looking after Simp. "Dogged ef he ain't a polecat, pure an' simple," he said.

The boy leaned down and picked up the pieces of broken pumpkin. "Ef I was Pappy I'd hunt Simp down an' kill him," he said slowly.

"Good thing you ain't," said Billie. "Punkins ain't wuth that much."

Joe Ed nodded. "I'd take a heap, Mr. Bevans, afore I'd do ary vi'lent thing." He put the pieces of pumpkin back into the wagon, explaining, "They'll do for my little pig." Then he unloaded the others.

With the pumpkins sold and the few pieces of silver in his pocket, Joe Ed climbed up on the wagon seat again. He divided his piece of cold corn pone with Billie and they ate in silence. When they had finished the corn pone they set off for Courthouse Square.

The town, its midday meal completed, came back into the street. The square was a bewildering maze of cars and people to the boy.

Joe Ed found a place to hitch by the old stone watering trough. It stood toward the back of the courthouse near the jail, and the sight of the three barred windows didn't ease him any. His pappy spent several months of the year behind them.

"I guess I'll jest get me my pants an' be off right soon," he said to Billie.

"I'll find me a ride. I warn't aimin' to go courtin' with you."

Across the street and halfway down the block was the Cyclone Cash Store. It was painted red and had a porch six steps above the sidewalk which gave it a commanding view of the square. As they crossed the street Joe Ed could see the usual crowd on the porch: the two Canary boys, Lige, the big one and Birdie, the little one; and Ham Tatum who looked like a chinquapin after frost, and a few others. Simp Goodloe's orange shirt stood out among them and Joe Ed slowed his steps. When they came to a little alleyway he stopped.

"I reckon I'll jest go around to the back an' get me my britches. Sometimes they says things about Pappy if my clothes is raggedy."

Billie scratched his nose. "I reckon it wouldn't do ef you jest plumb slapped 'em down?"

The boy shook his head. "I don't ever aim to be so vi'lent as Pappy."

Joe Ed came quietly in at the back of the Cyclone Cash Store. He saw no sign of old man Clark, the owner, but there were the denim work pants stacked at the end of the counter. He felt for the silver in his pocket and in a moment of elation and excitement went over and touched one of the stiff, blue garments.

A voice rapped out behind him: "What you up to there?"

The boy swung around as if he had been shot at.

Behind the grocery counter stood round little Mr. Clark, his bald head shining, the tufts of hair above each ear trembling with indignation.

"You ornery Thorntons! I'll set the sheriff on you same as I did on your pa. Come sneakin' in by the back to steal from an honest man."

"I come to buy me some pants, Mr. Clark," said Joe Ed. He looked down and saw that they were still in his hand as if he had picked up a piece of fly paper. "These here," he added.

There was a pause. The old man shifted his glance from one side to the other. "So you come to buy some pants, eh?" Then he pushed his glasses to the end of his nose and the watery eyes crystallized into a sharply pointed look. "And where'd you get the money?"

Joe Ed stood with h

Are Your Teeth Alluring, Too?

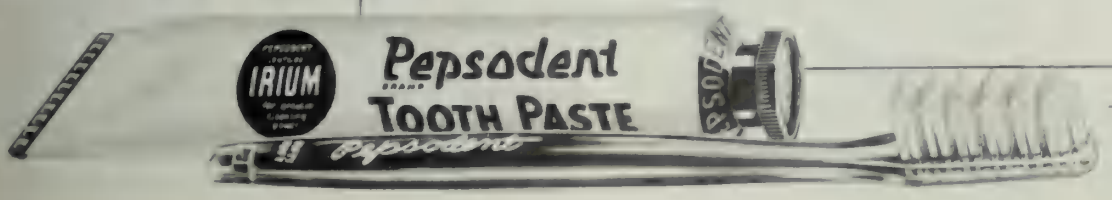
the Answer's on the Tip of your Tongue

1 Make the Tongue-Test...

Run the tip of your tongue over your teeth . . . inside and out. Feel that filmy coating? That's Materia Alba . . . and it doesn't belong on teeth! It collects stains, makes teeth dull, dingy-looking.

2 Your Tongue Tells You

Your tongue tells you what others see . . . the filmy coating that dims the natural brilliance of your teeth, your smile. And it's this filmy coating that makes teeth look dull . . . bars your way to romance.



3 Switch to Pepsodent with Irium

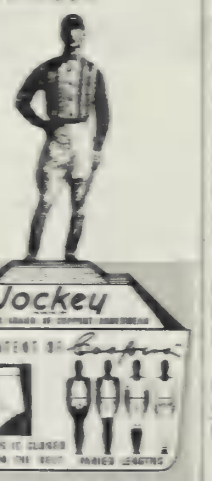
There's a very good reason why Pepsodent makes your teeth feel so wonderfully smooth, look so sparkling bright. For only Pepsodent contains a wonder-working combination that *cleans* and *polishes* teeth to a new high brilliance.

First, *only* Pepsodent contains Irium, the super-cleansing agent that loosens and flushes away the filmy coating your tongue can feel, your friends can see. And Pepsodent *alone* contains a patented new high-polishing agent that buffs teeth to such a shiny smoothness, this filmy coating slides off before it can collect and stain.

Give yourself the radiant smile that comes from teeth that feel bright, look brighter. And that's no job for a "half-way" tooth paste. Get a tube of Pepsodent with Irium today!

– and for double-power cleansing . . .
PEPSODENT'S *NEW*
50-TUFT TOOTH BRUSH

Modeled TO THE MALE FIGURE



Jockey Underwear gives masculine support

Here's the underwear that does things for you! The patented Y-front construction gives you masculine support and squirm-free comfort. The knit fabric moulds itself to your body—and lets your skin breathe. The convenient, angled opening positively will not gap. Jockey is buttonless, too—and it's not only easy to launder, but needs no ironing. This streamlined modern underwear is two-piece, with special contoured shirts for extra comfort and convenience. Be measured with Coopers' hip tape for perfect fit. Get your supply of Jockeys today. You will find it the most comfortable underwear you have ever worn. Varied leg lengths. Priced from 50c up, per garment. Junior sizes (down to 4 years) from 35c.

"Quality Corner" Better stores show varied fabrics for your selection. Mercerized cotton, 75c. Rayon, 75c. Mercerized cotton and linen, $1.

Look for the name *Jockey* on the label!

For your protection, the name Jockey appears on the label of every Jockey garment. Jockey merchants also identify themselves by displaying a Jockey boy in their windows and on their counters. Remember, Jockey was originated and patented by Coopers. Names of your nearby merchants will be furnished on request.

Jockey Bellin keeps dress shirts from bulging. To look your best in dress clothes, wear Jockey Bellin. It's regular Jockey underwear with a wide Lastex yarn band that firms your abdomen. Bellin aids good posture, even when seated, shirt fronts follow the good-looking curve of arched chest and flat abdomen. At your dealer's, $1, or write us.

against the railing, feet crossed, hands in his pockets, taking applause with easy insolence.

"Still goin' to Purtle's?" he asked as Joe Ed stood brushing the dirt off his brand-new britches.

Joe Ed looked up. "I aim to," he said.

Simp lowered his lids and smiled around at the men. "Looks like he don't know Sukey's marryin' me when I get around to ask her."

Joe Ed stood straight and his eyes were a hot blue in his quiet face. He stepped over in front of Simp. "That ain't so," he said.

Lige laughed and slapped his thighs. "Better get out your lucky buckeye, Simp, an' rub it up if you're gonna mix with a Thornton."

"I don't need my lucky buckeye. Joe Ed's nothin' but a milk-belly." He spoke softly but his eyes were hard. "You go an' peddle your punkins an' lay your hands off Sukey."

"I ain't takin' no orders," said Joe Ed clearly. He had his hands together in a knot behind him. "I aim to go out to Purtle's same as I said."

Then Simp's lids flickered like a snake's and quick as a snake's tongue the blade of a knife flashed out. An instant later Joe Ed's big, bony hand swung from behind him and sent Simp whirling backward over the railing.

For a full half minute nobody moved. It was Joe Ed who moved first. He went slowly down the steps alone.

Simp lay there on the pavement. A narrow stream of blood seeped from his forehead just above the hairline. The knife lay near his hand, its blade bright in the sun. Joe Ed stood looking at him, waiting for the hand to reach for the knife. But it did not move. Simp did not move.

Mr. Clark came bustling out of the store, letting the screen door bang behind him. "What's this? What's this?" he cried.

The men on the porch began to talk and shove. They all piled down the steps at once. In five more minutes half the town had gathered. Joe Ed was pushed aside. He stood off at the corner of the store alone. His knees began to shake and he wondered what he ought to do. For a few minutes he was violently sick and after that he saw Billie's face swim past him.

"Git out," said Billie.

The boy nodded. "I'll be at home when they want me." And he went wavering like a drunk man across the street to his wagon.

HE HAD untied his horse and thrown the rope in the wagon when he heard the voice of Mr. Clark from the steps of the Cyclone Cash Store. "He done this thing to one of our own boys, but he done a heap sight worse to January Purtle, our most respected citizen. Why, he came in here not a hour ago with money! Did you ever hear tell of a Thornton with honest money?"

Joe Ed had put his foot up on the hub of the front wheel. He stopped as he was. He knew what he heard and yet his mind refused it.

Then again the voice of Mr. Clark, sharp as the blade of Simp's knife: "Did you ever know a Thornton that wouldn't kill?"

And the crowd began to murmur.

"Then what are you standin' here for?"

The words cracked like a whip over the restless crowd. Joe Ed had never heard an ocean, but he knew that was the sound behind him now, the tug and surge of a tremendous force without a mind to guide it.

The sound rolled toward him down the street, mounting and rolling forward like a wave—and he ran!

His long legs carried him a lap ahead of the crowd. His feet thumped over the wooden bridge an plant, but he stumbled of Lebanon Hill. Wh men on the bridge, he cl wire fence and struck open fields, slashing kn tangled grass. He tore second fence, a big, thr above the knee. stood up with something in her hand.

For at least a minute she stood quite still, turning the small, dark object in her fingers. Then she carried it to the light from the kitchen window. As she held it close to the sill and studied it her hand began to shake. She closed it in her firm, brown fist and burst in at the kitchen door.

"Bones," she cried, "where abouts are my shoes?"

The little Negro turned from the milk crocks and walled his eyes at her. "Fo' Lawd, Miss Sukey, ain't somebody else got kilt, yo' come roun' wantin' yo' shoeses?"

She dived under the sugar chest and brought them out. "You look after everything, Bones. I've got to go into town this blessed minute."

On the back porch steps she stopped a moment and looked off to the knobs. "Joe Ed," she whispered, "I don't know how to find you."

JOE ED dragged on across the lumpy fields. His arm grew heavier with pain and he cradled it in his other arm as he walked. His mouth and throat were dry and he made for a clearing where he knew there was a small, dank pond. But when he reached it and swept back the green scum with his hand, he spit the water back. Before he could rise he heard sounds in the direction of the highroad—the chug of a motor and men's voices.

For the time, flight was over. He must make himself a hiding and let the hunt go past him if it would. With the knowledge of any wild thing, he found in the dark an old uprooted tree and he clawed his way among its roots and drew in leaves about him. As he worked he heard them coming. They were liquored up and loud. A shot rang out and went whirring through the half-bare trees.

"Whut in hell you shootin' at?"

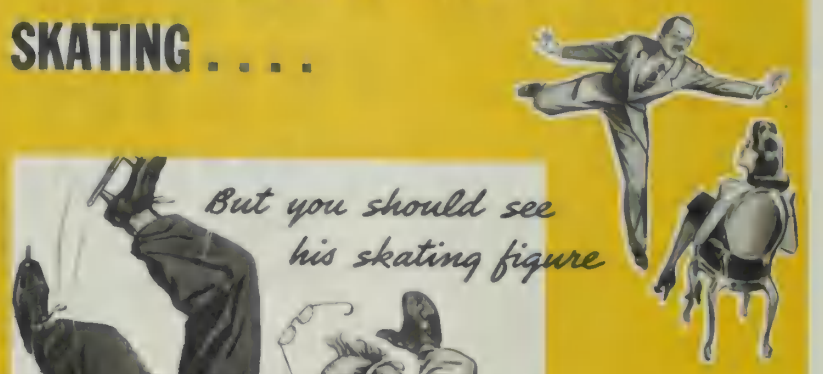
"Moon, I reckon; ain't nothin' else in sight."

Their laughter rocked crazily through the woods.

"Better save them shots to put into Joe Ed's hide."

"Some Thornton meat'd taste right good to this ol' blunderbuss."

They were making for the pond. And another sound came on ahead of them, a softer tread coming with rush and pause and an occasional puzzled whine. A dog! The dog would find him whether or not the men did.



A curious stillness filled his body as he listened to the soft feet coming nearer. The whine gave way to a sharp snuffling along the ground. Joe Ed felt the tendons at his knees and elbows

FALSE TEETH WEARERS often worst breath offenders

Don't let Denture Breath and stains shout "False Teeth"

KEEP PLATES LIKE NEW WITH POLIDENT

Plates and bridges soak up odors and impurities like a sponge! A hard dark film collects on them. This film holds germs and decay bacteria. It is so tough that ordinary brushing seldom removes it. And it gets into every tiny crevice where brushing can't reach.

Almost always it results in "denture breath", one of the most offensive of breath odors. You won't know if you have it—*but others will.*

Yet there's a perfect way to clean and purify false teeth without brushing, acid or danger. It is Polident, a powder that dissolves away all film, stains, tarnish and odor. Makes your breath sweeter—and your plates or removable bridges *look* better and *feel* better.

Tens of thousands call Polident a blessing for convenience and hygiene. Long-lasting can costs only 30¢ at any drug store, *and your money back if not delighted.* Approved by Good Housekeeping Bureau and thousands of leading dentists everywhere. Hudson Products Inc., New York, N. Y.

POLIDENT

Cleans and Purifies **Without Brushing**

Do this daily: Add a little Polident powder to half a glass of water. Stir. Then put in plate or bridge for 10 to 15 minutes. Rinse—and it's ready to use.

Money Ahead!

draw like wires and he was cold to the bone. The whole heat of his body rushed to his wounded arm and throbbed there like an engine. He waited.

Then the dog's cold muzzle thrust through the leaves and touched his face. For a moment neither of them made a sound. Then the dog crouched to his belly and Joe Ed heard its thick tail thump the leaves. He moved his hand over the big smooth head, along the chest and forelegs.

"Spot!" he whispered. "Old Spot!"

For there on the left foreleg was the knotty joint where the leg had been broken on a coon hunt in the knobs about two years back. Spot was Ham Tatum's dog and Joe Ed had come along as Ham was about to shoot him.

"I'll mind him, Mr. Tatum," he'd said.

But Ham hadn't lowered his gun. "Ain't worth mindin', a fool critter would go an' break his leg."

Joe Ed had bent down, putting his body between the dog and the rifle barrel. "I'll mind him; you go along with your hunt; I got nothin' else to do." But when Spot was well Ham Tatum came and got him.

Now he heard the men come scuffling on, snapping the branches and swearing.

"Spot . . . Hooo Spot!" Ham shouted.

The dog had found the wound on Joe Ed's arm and was licking it with his warm, rough tongue.

"What in tarnation's happened to my dog?" Ham complained. He was good and mad. "Consarn the critter. I'll kick his teeth plumb to his tail when I get aholt of him."

They had come to the pond. The moon tipped up from behind the trees and Joe Ed could see them plainly. There were about ten of them. Lige had a jug of moonshine hung on his thumb and they stopped and passed it around from mouth to mouth. Moonlight had turned the pond silver and the mud-bank gray. When the jug came back to Lige he set it down and saw the fresh footprints at the edge of the water. He let out a whoop like a dog that has almost bagged his quarry.

Joe Ed watched them as they searched outward from the pond. He lay very quiet, listening, watching. Spot's warmth had loosened the grip of cold from his body. Now and then the dog thrust a cautious tongue to touch his arm and the boy remembered Sukey's mouth about the wound; he remembered her cry that had followed between the barn ar "You've got the righ straight like a man."

LAMPS

"What's happenin'?" asked the boy.

The man had a narrow, anxious face. "The whole town's mad as hops over the killin' of January Purtle. This here's been brewin' fer three days an' it's done bust loose fer fair."

"What is it they aim to do?" asked Joe Ed quietly.

"String up the killer to the courthouse elm soon's they set eyes upon 'im."

Joe Ed said nothing. His hand made an involuntary movement toward his throat.

"I'd sure like ta seed it," said the man, "but I got to git home an' help my wife have a young un." He kicked his mule. "Well, good night, buddy."

Joe Ed looked into the sharp face of the stranger as he started to ride away, and loneliness, deeper than any he had ever known, tugged at him. With the simple urge of man toward man, he put out his hand and his fingers brushed the ragged knee crooked to the mule's withers; but the man rode past, his eyes on the road ahead. Joe Ed drew back his hand under cover of the darkness.

"Good night," he said. Then he turned and set off downhill.

AT THE edge of the square he stopped. Standing in the safe darkness beyond the Cyclone Cash Store, he could make out a few faces that he knew: Mr. Clark haranguing from the base of a lamppost, Ham Tatum drunk asleep on the pavement by the watering trough. Joe Ed's horse and wagon were still there, and he was glad of that. As well as he could he pushed his wounded arm behind him and stepped from the shadow of the store into the lighted square.

He was on the sidewalk near the corner of the store where, that afternoon, he had stood shaking and vomiting like a cur. He could be plainly seen. And that first moment of standing clearly visible was distended for Joe Ed so that it held all he had ever feared or hidden from or fled from. It held, fiery and anger-sharpened, the core of a community that counted him and his kind more worthless than the coons and possums that lived with them in the knobs; it held scorn and mistrust and hate. After that moment had passed he moved forward into the crowd, slowly rather, but with a steady, even tread.

He knew now that he was ready for whatever they meant to do, but he didn't wait. He walked straight toward the courthouse steps, his eyes on the lighted window of the sheriff's office. If anyone raised a gun he wouldn't know it. It was better that way. His measured footbeats sounded louder to him than the noises of the mob. Crossing the street, he passed close to the bonfire, but no one stopped him, nor even noticed him.

There were some twenty steps up to the courthouse porch. The old stones were hollowed slightly in the center by the passage of many feet. And Joe Ed set his own feet in these hollows, firmly, one after one, his eyes on the step above him and no higher. He was nearly halfway up when a great shout rose behind him.

Now, he thought, now! But he did not break the rhythm of his climb.

As he mounted, step after step, he felt from all parts of the square the rushing in of anger, the mob converging on the steps behind him.

It was not until then that he lifted his head and looked above him.

Beyond the wide, dim porch the double door of the courthouse was thrown open. The block of electric light looked white and hard and ruthless compared to the wandering firelight in the square below, and in that light, sharply outlined, shoulder to shoulder, arm to arm stood the sheriff—and Simp Goodloe.

For the fraction of a second Joe Ed's foot refused to leave the step beneath it. There was no strength in him, only a wild lightness like the wings of little peewees skimming through him where bone and blood should be. Simp Goodloe was not dead! Then he moved on up the steps and the mob roared like a forest fire behind him:

"Kill him! String him up!"

Joe Ed scarcely heard them. He saw the sheriff raise his arm for quiet, but it was no better than a straw held up against a cyclone.

Then Joe Ed felt the board floor of the porch beneath his feet, but he didn't stop. He kept right on walking until he stood eye to eye with the sheriff and Simp Goodloe.

"I come back," he said quietly. "I come back to say that, dead or alive, I ain't afeard of you, Simp."

Simp didn't answer, just looked at him with heavy, sullen eyes.

Then Joe Ed turned and walked back to the head of the steps. The fading light of the bonfire clung around him. His clothes were torn, his face was scratched and dirty, his hair hung wild and ragged into his eyes. He knew he looked like a scarecrow, but he didn't care. For he knew besides that, no matter what they did to him, he was free. He had done what was right to do and all the jails in the state couldn't lock him up from that single, simple fact.

The mob on the steps stopped where it was and was silent.

He hadn't much to say, but he spoke each word out slowly and clearly:

"I'm sorry I ever run from you. I never kilt Mr. Purtle."

As he looked down into the faces, picked out of the gathering darkness here and there by a lantern, he heard again that peculiar murmur that is the pulse beat of a mob. And again he knew that it was swelling toward him, but he stood where he was, his face to their faces.

Then it broke into a shout and men came swinging forward, saying his name and clapping him on the shoulders. He looked from side to side of him, from face to face, but they moved on, closing in behind him. Here was Billie Bevans at his elbow, his hat shoved back, his eyes all puckered up with pleasure.

"Dogged ef it warn't a right prideful thing you done," he declared. "But they're sure gonna have Simp's hide afore this night be done."

"Simp?" said Joe Ed.

THEN he saw Sukey pushing toward him in her little, tight, red sweater. Her eyes were shiny black as she caught his hand and her words came tumbling out: "It was Simp Goodloe . . . he done it . . . he kilt Grandpappy! I found his lucky buckeye right by the back porch steps with S. G. carved into it plain as day. I run all the way to town to tell the sheriff." She stopped and caught her breath.

"Yes," said Billie, "an' sheriff took off down to Goodloe's an' found the money buried right into the woodpile."

Joe Ed saw Simp and the sheriff being hurried past them by the mob. In a crazy jumble they poured down the courthouse steps and went swinging off around the corner toward the jail. A few of them still waved lanterns, but they would string nobody up tonight. Joe Ed had seen in their faces that they were tired and their anger was spent.

Sukey looked down at Joe Ed's hand that she held in both of hers. She spoke softly now: "Oh, Joe Ed . . . I didn't know how I'd ever get you back."

Behind her the square was quiet and empty and given back to night.

"Sukey."

She looked up at him.

"I had to come by my own self," he said. "There wasn't no other way."

ARE YOU 'MARRIED' TO YOUR PIPE TOBACCO?

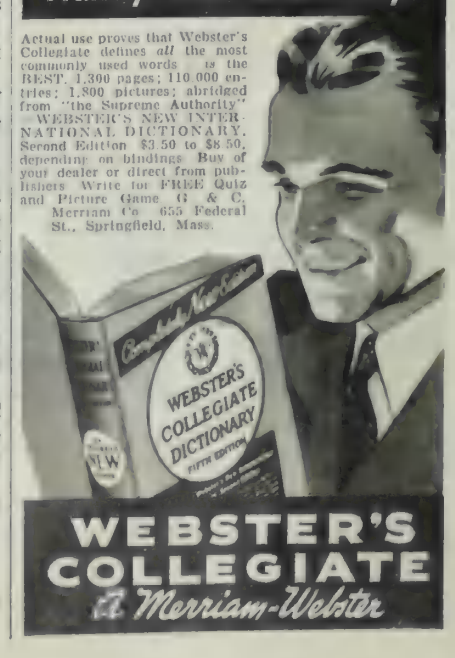
MOST PIPE SMOKERS are like young men who haven't yet found the girl of their dreams.

THEY GO ON SEARCHING expectantly until at last they "get married" to the brand that satisfies all their ideals of what a pipe tobacco should really be.

AND IT'S SURPRISING how many thousands hit on Edgeworth as their happy choice. Yet it's not so surprising when you consider why.

WAY BACK IN 1903, the makers of Edgeworth decided to buy only the finest tobacco leaf grown—regardless of price.

THAT POLICY is still in effect! Over a period of 10 years, our costs for Edgeworth leaf have averaged 43.69% higher than the market average. Yet a pocket tin or pouch of Edgeworth sells for only 15¢.



Try Generous Sample—At Our Expense

If you aren't yet "married" to your pipe tobacco, write to Larus & Brother Company, 203 South 22nd St., Richmond, Virginia—and we'll send you, AT OUR EXPENSE, a generous sample of Edgeworth Ready Rubbed—America's Finest Pipe Tobacco. We hope it will "end your search."

the world. Thirty-nine components in a soldier's ration. Know what a ration is? A ration is subsistence for one soldier one day. A ration costs the United States government anywhere between forty and fifty cents. Got that down? Okay. About forty-two cents today."

Sergeant Delvecchio machine-gunned us with information, barely pausing in his inspection. It was all sound stuff too, because we checked it with his boss, Lieutenant Colonel Talmadge Phillips, United States Army Quartermaster Corps. We'll speak of him later—of him and his schools and his headaches. The colonel has been in the Army since 1906, up from the ranks, and if you'll inquire of his superiors they'll tell you that he knows more about feeding soldiers than almost anybody else in the world.

History with Your Food

"Vegetables," demanded the sergeant, his spoon ready and his eyes announcing that he was in no humor for trifling. Six vegetable cooks were standing defiantly at their hot pots of peas, potatoes, spinach and corn. Grated egg went on the spinach. Before dipping in, he turned to us. "Vitamins. Starch. Minerals. Broccoli yesterday and not so hot. Cooked to a pulp."

The potatoes didn't please him—cooked enough, but they had rather a quick-lunch look about them.

The peas were okay, not shriveled. The spinach passed, although it had come within that much of being on the overdone side. The sergeant ate quite a mouthful of it, grinding it well with his molars, expecting sand. But it had been well washed. He waved the corn aside, not thinking much of corn anyway. Corn's all right, you understand, but it hasn't much nutritional value. So the sergeant made a surprise attack. Instead of commenting further on the vegetables, he gave us a bit of history.

Washington's colonial troops licked England on a ration of eight components—when they got 'em, he said. And that ration included one tallow candle and a fifth of an ounce of pure lye soap. Like as not they ate the candle. It included a gallon of spruce beer too. Of course times have changed but it is Sergeant Delvecchio's opinion that if Washington's raggies could win independence on a ration like that, and half the time not getting it, their heirs today ought to hold it on a ration better than the average American family gets. Beef, flour, milk, peas, rice, soup, spruce beer and a candle—maybe—that's what the Boys of '76 got.

And it was worse in 1812, only seven components—beef, flour, salt, a candle, four ounces of rum, half a pound of soap and (steady now) one gallon of vinegar. It was like that in the Mexican War except that the lads got seven cents' worth of dried beans a day instead of a gallon of spruce beer. But they still got that gallon of vinegar. In the Civil War things got better, the sergeant told us. The government added pepper, sugar, yeast powder and dried beans to the ration. But they still got a gallon of vinegar. By this time we all got inquisitive about the vinegar. To the general amazement, the sergeant didn't know what the boys did with the vinegar except maybe to pour it on something.

Before inspecting the dessert, the sergeant said that the ration of 1917 was like Friday in the poorhouse compared with the chow our fellows are getting today. We were glad that he brought it up, inasmuch as it gave us our first chance to say something. The sergeant is right, although we

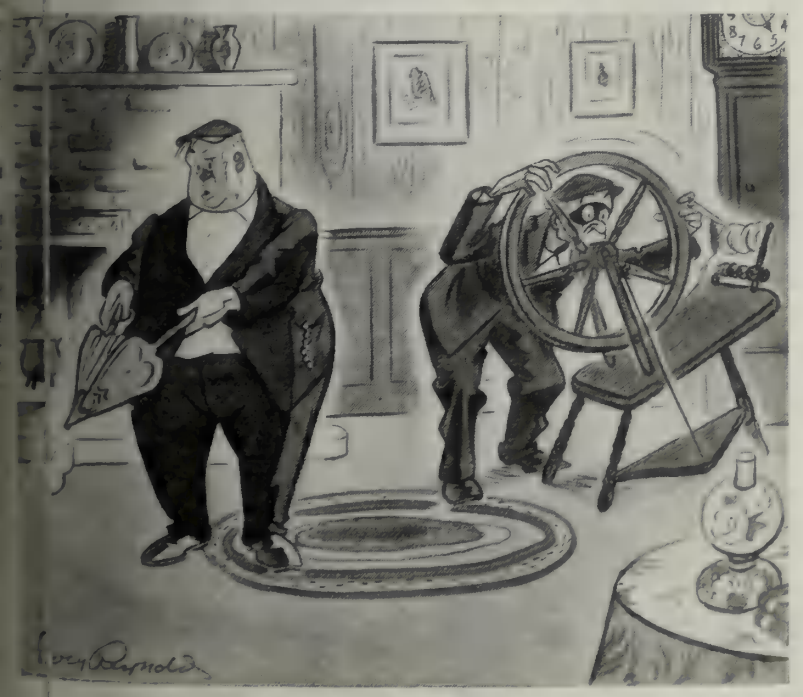
he job of such as Colonel Phil- stablish schools in all the camps centration centers. The man s pay. There was the National r example, that poor little step- the Army. Suddenly, overnight, ustered into federal service and uddenly the Army had to go to it. We may as well shudder situation that obtained in the vision, National Guard, now l at Fort Dix, New Jersey. One n, after the division was mobil- lonel Phillips was ordered to uad of the men he had trained ike Sergeant Delvecchio—and school for bakers and cooks Dix.

Untrained Cook Wanted

the colonel found was all the need that the National Guard been yearned over by the Gen- ff. We'll have to annoy you w statistics. For 1,729 men in enty-first Infantry there were en cookstoves, some of which ld cook on. There were only frigerators. There were thir- s sergeants, only two of whom a glimmering of how to cook. re twenty-seven cooks, but only of them had ever had any cook- rience. And not one of these could pass even the preliminary tions in an Army school.

you can't cook for the Army u've survived two months in You can't be a mess sergeant ve proved that you're a good cook. In the Regular Army e 12,000 graduate cooks. The in the process of turning out ore immediately.



Sergeant Delvecchio ushered he bakers' school eighteen of asp ants were taking written exams. re large, earnest fellows, it be- ess tial that a baker be hefty. The gea gave us a set of the questions, serv g as he did so that he'd bet a ndre bucks and let you name the ds t t not one housewife in a thou- nd c ld pass. We agreed with the rgea having done so all day. Any- y, w didn't find a single question that meant anything to us. For example: Name five constituents of flour. What kind of wheat is our Army flour made from? Name three other grains used to make flour. Give two reasons why flour is held in storage for six months to a year before using. What is gluten? Give the percentage of protein in soft wheat flour. What is yeast? How many kinds of water in the United States? Name them. Name the best water for bread-making. Why is sugar, diamalt, corn sugar used in bread-making? What change takes place when water, sugar and yeast combine? Room 80 degrees, flour temperature 78 degrees, what shall the temperature of your water be?

Anyway, we flunked. And we did a little worse next door where they were holding exams for mess sergeants. Try a couple yourself, Mom: Define nutrition. Write six dinner menus and tell why, from a nutrition standpoint, you made each selection. Name the six classes of food that make up a menu. What is a calorie? What are the water-soluble vitamins? The antineuritic? The antiscorbutic? Name the foods in which these vitamins are present.

All right. Admit you're licked. We'll try again. In the next room they're giving student cooks their finals. Sergeant Delvecchio said that only six of the sixteen head-scratchers had had any experience at stoves or ranges in civil life. Two had been salesmen, one a plumber, three clerks, one a filling-station attendant, two engineers and one a stockbroker. The engineers and the stockbroker were lieutenants. The latter was a swell cook, said the sergeant. The fact is, he added, a little education never hurt any cook. Anyway, here are a few of the questions they were pondering: What specifically are the food values of cheeses—name five? What should be the average weight of a case of specification eggs? What is butter? Explain gravy? What specifically is the food value of milk? Why does a good cook use a swab on a griddle instead of pouring the grease? Why does salt in the water make the cooking faster? What vegetables are cooked in the least amount of water and why?

We missed the meat examination. Cooks and mess sergeants must pass it if they hope to win or hold their jobs. But we got a set of the questions and found the sixteenth to be: How long do you boil frankfurters? The thirteenth

WAKE UP YOUR LIVER BILE— WITHOUT CALOMEL

—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pints of liquid bile onto the food you swallow every day. If this bile is not flowing freely, your food may not digest. You get constipated. You feel sour, sunk and the world looks punk.

It takes those good, old Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Take as directed. Amazing in making bile flow freely. Ask for Carter's Little Liver Pills, 10¢ and 25¢.

If You're Wishing—

LET me tell you how to add to your income in your spare time. This spring you, too, can have money for yourself and to assist with the family money-problems. Write today for our free booklet, "*An Adventure in Dollars and Cents*," for in it you'll read many more letters from women and girls who've turned spare moments into extra dollars. It also tells you that with no experience you can be a money-maker too. Just send a card or a letter to

"In Agony" with the pain of
COLD WEATHER JOINTS?

Here's PROMPT Relief For You

Why put up with the misery of stiff, grinding cold-weather joints every time cold weather comes along? Here's fast relief for those shooting pains!

Tiny blood vessels feed certain lubricating fluids into your joints. But when extreme cold strikes, the blood vessels constrict and the flow of these fluids diminishes. Your joints stiffen and hurt. You can't get about without pain.

The thing you should do is rub those aching joints with Absorbine Jr. It speeds the flow of blood and increases the supply of lubricating fluids. Right off you begin to feel its glowing warmth. Pain lets up . . . stiffness fades away.

Keep Absorbine Jr. handy. At all druggists. $1.25 a bottle. Write W. F. Young, Inc., 301D Lyman St., Springfield, Mass., for free sample.

FAMOUS also for relieving Athlete's Foot, Sore Muscles, Strains, Bruises

Science Gives You a BASEMENT FLOOR PAINT "That Stays Put"

TRUSCON PARATEX

NEW, AMAZING RUBBER-BASE FLOOR PAINT

THERE'S nothing like this new rubber-base coating for basement floors or any other kind of floors—indoor or out, concrete or wood. Acid-proof, alkali-proof, soap-proof, gasoline-and-oil-proof. Has all of rubber's resistance to wear, moisture and chemicals. And, like rubber, it's easy to keep clean. Tough and long-wearing, it far outlasts ordinary paint. Easy flowing—easy brushing—quick drying. Comes in six beautiful colors. Economical. **Desirable territories open for dealers and sales representatives.**

stirred us to our roots: How do you prepare brain that you would fry with scrambled eggs?

It pays to be an Army cook—financially, too. A cook (private, first class) gets fifty-six dollars a month and a mess sergeant sixty. If you're a master sergeant like Sergeant Delvecchio, an executive NCO of a school for bakers and cooks, you get away up into the higher-income brackets—$204 a month, a house to keep your family in and plenty of coconut custard pie. If a student cook exhibits exceptional talents, he is recommended for the mess sergeant school and that means another two months in training before he returns to his hungry outfit. And by the time he has done the whole four months he's not only a cook and a mess sergeant, too, but a well-trained household economist, a purchasing agent, auditor, accountant, grocer, butcher and baker. A very handy man to have around.

As you may suspect, we had a magnificent time of it following Colonel Phillips and Sergeant Delvecchio around their school for bakers and cooks. Several shocks, too. How were we to know that our lads were being fed sweetbreads, calf brains, au gratin potatoes, curried chicken, roast duck, ox-tail soup, toast (French and milk), puree of green peas and tomatoes, Creole gumbo, venison, Yorkshire pudding, asparagus, chop suey, sugared parsnips, brown betty, fruit cake, meringue glacé, lemon meringue pie, cinnamon buns, ladyfingers, salads (chicken, piccalilli, apple-celery and embassy among many others), French, Russian, Thousand Island, mayonnaise and Popeye dressing? How were we? We're just a civilian struggling to keep body and soul together and in dire need, perhaps, of all the vitamins in the Manual of the Army Cook.

All this, of course, was the garrison ration. On maneuvers, playing at war under simulated combat conditions or as chessmen in some complicated attack-and-defense problem, when troop movements are too fast and too frequent to make the setting up of complete kitchens feasible, the lads will be fed Field Ration A and Field Ration B plus hot coffee, tea, cocoa or milk as the circumstances may dictate. If the new oil-burning rolling kitchens are wheedled into something more dependable than they've been hitherto, Rations A and B may be augmented by a few extras.

Field Ration A—It's a Picnic

Field Rations A and B are not arbitrary handouts. What they will eventually consist of depends largely upon the ingenuity of such resourceful nutritionists as Colonel Phillips. Of A, the regulations say that they will "correspond as nearly as practicable to the components or substitutes therefor of the garrison ration." And B will "correspond as nearly as practicable to the components of Field Ration A with the exception that nonperishable processed or canned products will replace items of a perishable nature." Field Ration A may have a rather picnic character. For example, consider the noonday fare of the First Army maneuvers of 1940: Sandwiches—ham and sausage, roast beef, cheese, tongue, egg and lettuce.

Of course, in mere maneuvers the troops knock off for supper. The kitchens are in place. And the lads get, almost if not quite, the garrison ration before turning in for the night.

But where this is not feasible Field Rations C and D come into the picture. The Army has not uttered quite the last word about C and D. But one thing is sure—they're canned. When we first saw those cans we recalled delirious memories of the monkey meat, canned willie and goldfish of 1918. But not after we had ripped the simple, patented top off the new cans. Ration C, says regulations, consists of "previously cooked or prepared food packed in hermetically sealed cans, which may be eaten hot or cold, and will consist of six cans per ration as follows: Three cans containing a meat or vegetable component and three cans of crackers, sugar and soluble coffee." Field Ration D, which may be a mere supplement to C, is nothing but three 4-ounce bars of "concentrated chocolate."

As Field Ration C stands now the three foundation cans contain a beef hash, a vegetable and meat combination and an all-vegetable medley, and tasty isn't the word for it. Field Ration C was tried out in the 1940 maneuvers and pronounced a decided success. Easy to get at, too; all you do is pull a narrow strip of metal briskly and off comes the top. No hacking the rebellious container's head off with your bayonet or dashing it against a rock. In this new mechanized Army lots of the lads won't have any bayonets—just gang demolishers like machine guns, submachine guns and inglorious but effective contraptions like that. Anyway, take our word for it that Field Ration C is wholesome and filling, to say nothing of tasty.

The reason that the important C is not yet a definite thing is because the Army is experimenting with fortifying it with vitamins. It's all pretty scientific and perhaps we'd better not get into the subject too deeply while the nutritionists, dietitians and other scientists are still pondering the problem. The efficient German armies have been experimenting with fortified field rations and have left no doubt in the minds of our military observers that the idea has come to stay. Germany's fir

Suicide Ship

Continued from page 12

"But we can sink each other. In 1917, a convoy off Beachy Head—" He broke off. "Take the weather bridge wing, Mr. Sands. And the lee, Mr. Huston."

DAYLIGHT came, and it was only a gray blindness where there had been black. From the dim deck the foremast rose up faintly and the fo'c'sle head was an uncertain island where a clangor broke out regularly between the shuddering blasts of the siren.

Mr. Torpenning came out the weather door, turning up the collar of his greatcoat. "Fresh coffee in the chartroom, Mr. Sands."

He went in. The chartroom was warm and the coffee smell was like a fiber in the air. Through the door he saw the captain looking over the quartermaster's shoulder at the compass, and he heard his voice rasping: "Keep her on, dead on."

Mr. Huston, behind the old man's back, gave him a broad wink. But Mr. Sands was staring at the captain. For a moment he forgot his sandwich and the smoking coffee. The captain's lined face burned with a false color and the breath came short through his teeth, like a soft panting, while he paced the open weather glass with the wet wind driving in. He needed rest and sleep.

It was stronger daylight when he was back on his bridge wing, and maybe the weather was breaking a little. He could see the lookout on the fo'c'sle head, pacing like a sentry.

"Might break today," Mr. Torpenning said mildly. "Then we'll get some sleep." His eyes were tired; his face was worn and patient like a schoolmaster's. "If a man could have a smoke. Well," he confided, "carry on . . ." and he went back inside the wheelhouse.

Mr. Sands was tired but the coffee had warmed him. It had warmed his stomach and it had warmed his mind. Again he pictured the big convoy plodding on through fog and peril, serving the dire need of England. He was young enough to keep the wonder, the pride, the knowledge that he had a vital part in the great effort. They would carry on.

"There'll always be an England,
While there's a country lane—"

He had a monotonous post, two steps back and two steps forth, staring at nothing hour after hour. He didn't realize that he was whistling till a voice barked at him:

"Mr. Sands. Go below!"

He turned, startled, his hand jerking to salute.

"Go to your quarters. Whistle yourself to sleep or to hell. But get off this bridge."

Mr. Sands went blindly. Not the blindness of fog, but of anger, chagrin, humiliation.

Behind him Mr. Torpenning's voice rumbled and the captain's words came, raised: "A whistler! A whistler in a fog in convoy. I won't have a whistler on my bridge."

When he got to his cabin Mr. Sands found a red trickle threading from his mouth. He had bit those whistling lips till the blood ran. Beaten, bitter, he threw himself in his bunk and let the full realization flood him. His first commission, and he had been ordered off the bridge. His career was ended. He clenched his fists and the blood ran freshly from his broken lip.

When the gong sounded at noon he went to the saloon. Even a reprimanded watch officer, a humiliated third mate, must eat. Then he went aft to the poop and stood there keeping a bitter watch of his own. He strained his ears to catch the glooming of the whistle astern of them. If a dark bow would rear up, like a cliff, out of dimness, threatening—he was keeping watch. But there was only the labored thresh-ing of the propeller, the rise and fall of the fantail, the blast of the siren and the answer, like a faint and delayed echo off that sounding board of fog.

With a sudden burning guilt he realized that the captain might call him. He raced back to his cabin. The telephone hung dead on the wall. He lay on the bunk, waiting, staring up at the rivet-studded plates above his head.

It was two hours later that the telephone rang. He leaped at it.

It was Mr. Torpenning's voice: "Weather clearing, Mr. Sands. Come up and take the watch."

He was on the bridge in thirty seconds. Mr. Huston was yawning and stretching his arms. Mr. Torpenning looked around with the tired lines deep under his eyes. The captain was not there.

"The old man caved in," Mr. Torpenning said. "A proper heart attack. The doctor put him to bed. You take over, son, and we'll get some sleep." Then he saw the teeth marks in Mr. Sands' lips. His voice dropped: "Don't worry about the old man, son. It's his last trip, and he hates to give up. In war, you know. That's what's gnawing on him."

The blood pounded in Mr. Sands' throat. "Yes, sir."

He repeated the course and initialed the logbook. Then he was on the bridge, alone. He stepped outside to look over the convoy. They were all there, steaming full speed over the brightening sea. . . .

THE raider appeared suddenly, out of the north, under the sinking sun. The lookout reported from the crow's-nest but already Mr. Sands had his glasses trained on the horizon. His heart pounded. Not a converted raider, not a gunboat—a battleship, with tripod mast, a powerful, curved waist and bristling turrets. The pictures in the naval manual leaped to his mind—Schwartzwald—the long, low hull, the flaring bows, the severe, raked superstructure. She was swift. Even through his glasses he could see the fan of water at her stem and her feather of smoke flat on the wind.

He raced into the chartroom and pressed the captain's button. No answer. He jabbed again. It was the doctor's voice:

"Captain Allerdice is in the midst of an injection. He cannot be disturbed for ten minutes."

Ten minutes. . . . Mr. Sands threw a glance fore and aft at the plodding convoy, helpless as sheep while the gray wolf loped across the great, wild pasture. It was the Pentland Firth's job to get them through, and now a reprimanded third officer stood alone on the bridge. He thought swiftly of the eleven-inch batteries on that steel-cased raider and the small guns on the unarmored decks of the Pentland Firth. And he thought of two hundred thousand tons of wheat and cotton, steel and frozen beef—

Already he was ringing the engine-room telegraph and his mouth was at the speaking tube: "Smoke, Mr. Monahon. Black, for a smoke screen." He turned to the loud-speaker: "Gun crews to firing stations. Man the magazines."

He spun around to the quartermaster: "Port helm."

The quartermaster stood with a gray

FIND OUT
NOW IF YOU'RE A VICTIM!
GINGIVITIS

4 OUT OF 5 May Be Too Late! Often Leads To Pyorrhea

If *your* gums are tender, sore and bleed—take heed right away! These are often signs of Gingivitis—a mild inflammation where the gums join the teeth. BUT many folks go on blindly neglecting this condition until it often leads to horrible Pyorrhea which *only* your dentist can help. It pays to visit your dentist every 3 months for tooth and gum inspection. At home—

Help Gums be Firmer
Teeth "Naturally" Bright

Massage your gums and brush teeth twice daily with Forhan's Toothpaste. This Forhan's effective TWO-WAY dental help—originated by Dr. R. J. Forhan—

1. Helps gums to be firmer—thus more able to ward off infection.
2. Cleans teeth to their "natural" lustre.
3. Helps remove acid film that often starts tooth decay.

Sound, sparkling teeth require firm gums. Start helping with Forhan's and massage *at once!* At drug and department stores. Week-end size 10¢.

Old Town Canoes"

face, staring. The raider was coming up fast. His voice was ragged as canvas: "We haven't got a chance, Mister. A Chinaman's—"

"Port helm!" cried Mr. Sands.

He was at the speaking tube again: "Steam, Mr. Monahon. More steam. Race her."

Black smoke was streaming like a river from her funnel. As the revolutions picked up and the ship swung northward, it poured in a thunderous cloud bank across the convoy. The first shell burst in the water beside the Empire City.

Mr. Sands raced into the chartroom and jabbed the radio operator's button. "Message to the convoy—'Scatter under cover of smoke screen. Proceed to port independently.'" He rang Mr. Torpenning and Mr. Huston, but he could not wait their answers. From the bridge wing the raider showed sharply. No glasses needed now, not even for the silver flash in the sunset and the white puff erupting from her turrets. Mr. Sands waited. The thunder came, echoing over the sea. The shells burst around them. A cloud of smoke rose from the Falkirk's midships.

Captain Allerdice hurried up the ladder in his dressing gown. Behind him came Mr. Huston, rubbing the sleep out of his eyes, and Mr. Torpenning swiftly scanning the sea.

Mr. Sands was at the loud-speaker, talking to the gun crews: "Stand by to fire when we close range." He turned to the quartermaster: "Port helm, ten more degrees."

Then he saw Captain Allerdice. His hand shot up to salute. The captain took it all in with one wide-sweeping survey—the convoy scattering behind the smoke screen, the wounded Falkirk, the Pentland Firth driving head on toward the raider. For an instant his eyes flashed with a grudging admiration.

Another thunder rolled across the sea. Water erupted at the bow and at the same instant the ship shuddered. A shell burst on the fo'c'sle head.

"Hold your course, Mr. [illegible]

"Steady, as she goes," M[illegible] to the quartermaster.

Captain Allerdice held [illegible] the raider. "Schwartzwa[illegible] softly. "Eleven-inch guns [illegible] cles curled along his jaw [illegible] were burning.

Mr. Sands nodded. "T[illegible] accurate, sir."

Behind them, from the [illegible] was a roaring as the head [illegible] gan to blow. The captain h[illegible] ing tube. "Fasten your [illegible] down, Mister. Build up [illegible] And race her."

first p, his first assignment;
only ix weeks out of training
He s ready to race for that
ling boat when Sands' voice sounded. It was hoarse and ragged, it was singing:

"There'll always be an England,
And England shall be free—"

He looked around wildly. The shells and smokeless powder were racked up beneath the gun carriage. The dead lay quiet on the deck. It was a voice out of nowhere—

"If England means as much to you,
As England means to me."

He bent swiftly to the breeching. Something was clenched in his hand. He dropped the speaking tube. Then he picked it up.

"Aye, aye, sir. Keep firing." He bent to his gun.

On the shattered bridge Mr. Torpenning limped over the crumpled body of Mr. Huston and faced his captain. "Your shoulder, sir. It's smashed to pieces. I'll call the doctor."

The captain pointed down to the battered main deck. "The doctor is dead."

A shell screamed from the foredeck. Concussion shook the ship. With his good arm the captain raised his glasses.

"That shot sent him back. He's swinging."

Mr. Torpenning looked over the foredeck. "Only one gun left."

"It's enough." The last red rim of the sun was gone. A purple light washed over the sea and in the east the dark was gathering. "He'll never find those ships now."

Ten minutes later, with the water licking at her rails, Captain Allerdice gave the order to abandon ship. The men came wearily up from the engine room.

They stepped over the strewn decks. They picked up their wounded and carried them to the two lifeboats at the rail.

Down on the forward deck a gun was still firing. The captain took up his speaking tube: "Cease firing on the foredeck. All hands abandon—"

ANOTHER salvo landed. The foredeck shuddered. The tall mast toppled and swayed and crashed into the sea. With a terrific thunder the forward hatches blew open. The magazine had gone up. There was nothing left but black sea water rising in the hold.

Captain Allerdice looked aft and saw a man still standing at the hand wheel on the poop.

"Mr. Sands, come amidships."

With the pumps idle the ship was settling fast. Steam rose from her flooded engine room and curled along the heated decks.

It was growing dark as Mr. Sands climbed to the ruined bridge. But the sky was lighted by an arching star shell as the Schwartzwald raced toward the horizon, hunting the scattered convoy. In that white light the captain's face showed gray as sea water and haggard with pain. He was near the end.

"Mr. Sands. There are flares in the lifeboats. One of the convoy will come back before daylight. You are in command of the survivors."

"Mr. Torpenning?"

"He is wounded, in boat number two."

"Mr. Huston?"

"Dead."

He stared at the captain's shredded shoulder. "And—you, sir?"

Captain Allerdice braced himself against a twisted stanchion. "I said—you are in command. Good luck, Mr. Sands."

Mr. Sands' arm jerked up to salute. His teeth-scarred lips were trembling. "You are not—"

"Get into your boat, Mr. Sands. Lively."

Mr. Sands raced down the ladder. His eyes were shining.

WHAT TO DO *if you're working too hard*

The surest way to get your share of life's pleasures is to *do* something about it. Be polite, but firm. And when your summer vacation rolls around, take that "someday" Southern California trip. Take it now—while you can—and when it will do you the most good.

Yes, the time is here. Slip your sporting gear into a bag and come west. Dive into blue Pacific combers, climb tall mountains, tour the Old Missions, investigate foreign colonies ... Santa Catalina, Symphonies under the Stars. See the great industries: oranges, oil, airplane-making, movies. Clear, rainless days are made to order for your favorite sport. Cool midsummer nights will find you joining the fabulous night life or sleeping under blankets.

Think it over. A chance to get clear away for a while...to find yourself in new surroundings, meeting new people, getting some new fun out of life. Why, even the trip out here will give you a fresh slant on this country of ours, on events, and on yourself.

Faster Travel! Lower Costs!
Ordinary 2-week Vacation is Ample!

TODAY, even from New York, Southern California is just overnight by plane, as little as 2 business days by train, 4 to 7 by auto or bus. And living costs here (where sport and fun are continuous the year 'round) average 22.8% under those of 20 other leading U.S. resorts. Accommodations for every budget in Los Angeles, Beverly Hills, Glendale, Pasadena, Pomona, Hollywood, Santa Monica, Long Beach and other cities of Los Angeles County and its neighbors.

FREE: *Automatic Trip Planner*

For your Southern California trip: new unique book, answers all questions. Lavishly illustrated. Crammed with impartial facts available only through this non-profit community organization. Get your free copy by return mail.

WHEN YOU ARRIVE, step into our Tourist Information Bureau, 505 West 6th Street, Los Angeles. Literature, maps, guidance—26 helpful services—all *free.*

ALL-YEAR CLUB OF SOUTHERN CALIFORNIA

Come to California for ■ glorious vacation. Advise anyone not to come seeking employment, lest he be disappointed; but for tourists, the attractions are unlimited.

50,000,000 Creditors

PLANS are in the works at Washington to issue something like the War Savings stamps of World War times, for sale to the general public. There is also a suggestion that the amount of baby bonds purchasable by any one person in any one year be cut from the present $10,000 worth to $5,000 worth.

From at least two points of view, it looks to us like a scheme full of vitamins for the body politic.

For one thing, economists claim that in a time of rapidly expanding production, like the present, widespread investment in the public debt has a tendency to keep prices from skyrocketing. It's counterinflationary. Inflation is a real threat when we go in for greatly increasing goods that don't produce wealth—and armaments are pre-eminently goods of that kind, need them badly though we do. And by buying in on the public debt, a person creates a backlog against the almost inevitable reaction from the armaments boom.

We also like this scheme to spread public debt around, because it looks as if the public debt is bound to grow greatly in coming years. We can't or won't pay for all the armaments as we go along. Yet we've got to have the armaments. The next best thing to paying as we go, balancing the budget and putting something each year on the principal of the national debt, is to ease a good part of that debt into the hands of millions of creditors.

If Uncle Sam could acquire, say, 50,000,000 small creditors in addition to his present comparatively few bank and insurance-company and big-estate and foundation creditors, that would mean 50,000,000 people—voters—paying some serious attention to the debt, to the way it is handled, the rate of its growth, the operations and management of the government that owes the debt.

You naturally want your debtor to live right, at least until he pays you. To have 50,000,000 pairs of somewhat fishy eyes focused on some of Washington's heavier spenders at all times can do the nation no harm that we can possibly imagine.

Let's get going on the savings-stamps and baby-bond reform as soon as Henry Morgenthau & Co. can finish the necessary spade work.

TEST RESULTS HAVE SHOWN

Listerine's amazing ability to fight colds!

Above are photomicrographs of germs which are among the "secondary invaders" that live in the mouth and way back on the throat and are responsible, many authorities claim, for most of the bothersome aspects of a cold. Listerine Antiseptic destroys large numbers of these potential trouble makers on mouth and throat surfaces.

ar aft year, evidence from painstaking research
tes groups continues to pile up supporting
imp ssive fact:

hat se test subjects who gargled Listerine Anti- had ewer colds, milder colds, and colds of shorter tion an those who did not use it. Moreover, rine ers experienced fewer cases of sore throat.

Kills Associated Germs

he reason for Listerine Antiseptic's success, we eve, just be this:

hat it kills millions of surface germs associated co s, known as the threatening "secondary ders some of which are shown above.

hese revalent types of germs, unless combated, inv le the tissue and accelerate infection. y a authority gives them credit for causing t of he distress of the common cold.

ow horoughly Listerine Antiseptic attacks n ha been recorded by tests that showed that even 15 minutes after the Listerine Antiseptic gargle, germ reductions on mouth and throat surfaces ranged as high as 96.7%—an hour after, as high as 80%. Yet Listerine Antiseptic is so safe, so gentle in its action, that it does not irritate the tissue.

Fight Colds Intelligently

Get the habit of using Listerine Antiseptic night and morning as a precaution against catching cold, and if you feel a cold coming on, increase the frequency of the gargle. This emergency treatment may spare you a nasty siege.

LAMBERT PHARMACAL CO., *St. Louis, Mo.*

NOTE HOW LISTERINE GARGLE REDUCED SURFACE GERMS AS MUCH AS 96.7% IN ACTUAL TESTS! The two drawings at right illustrate height of range in germ reductions on mouth and throat surfaces in test cases before and after gargling Listerine Antiseptic. Fifteen minutes after gargling, germ reductions ranging to 96.7% were noted; and even one hour after germs were still reduced as much as 80%.

ANY WEEK

WE'RE no sooner recovering from our amazement at the way our associates on this staff soar off into the clouds bound for what somebody once cunningly called the ends of the earth, than we discover others bound for places in freight trains. This time it's Jim Marshall. That Mr. Marshall should be going anywhere in anything but a plane, a submarine, a destroyer, a balloon or in one of those unarmored torpedo speed boats that the Navy has fallen in love with, is merely more evidence (as though it were needed) that we're warranted in our frequent expression: "Good gracious, what next?" Anyway, and probably just for variety, Mr. Marshall is pausing in San Francisco wither he was carried by a freight train. Too little attention has been paid our American freight trains as mediums of passenger transportation. "I've just finished riding 1,500 miles in a freight locomotive that has toilet facilities, windshield wipers, leather-upholstered swivel chairs, indirect lighting, steam heat and a place to plug in your electric razor," reports Mr. Marshall. "The terrific thing runs at seventy-five miles an hour. They also serve crumpets and tea with lemon." Mr. Marshall says, too, that he spent a few hours on the Navaho Indian Reservation and found Chief Deer Follower and Chief Talking Water suffering acutely from pains in their necks. The pains, they said, were the result of "a thousand questions asked by a thousand high-priced experts in a thousand high-priced cars telling the Indians how to live the better life. Incidentally, the Navahos call Mussolini Gourd Chin and Hitler Mustache Smeller. I'll write you from Kishamoulaki."

WE ARE seriously contemplating a trip to Winsted, Connecticut, to delete a few snowshoe rabbits which have been terrorizing the Litchfield Hills. This rabbitkrieg we have in mind does not come of any desire of ours to be brutal, but rather in the furtherance of our national defense. We have been invited to membership in an air-raid warden group, our duties being to stand on a hill gazing at the sky. If we see an airplane we make a note of it. When the book is filled we get another free. The group is already operating—or was operating until, one chilly night during a blizzard, making it impossible to see the sky, a large number of snowshoe rabbits attacked the wardens, several of whom had to receive medical treatment. Unhappily, the wardens are not permitted to carry firearms lest the temptation to shoot become unbearable. The flash of guns would give away the position of the air-raid wardens who would forthwith be bombed. The tales we've heard about the onslaught of those rabbits upon our group sound a trifle hysterical. One warden reports that he was severely bitten, and a lady warden says that she was knocked down and her ski pants torn. Our job, as we understand it, will be to stand on guard against the snowshoe rabbits, giving the alarm upon their approach and reassuring the wardens with hearty cries of "Steady, ladies and gentlemen, steady."

A GENTLEMAN in Anchorage, Alaska, announces that he will read this magazine no more. Every so often readers whom we've irritated notify us that they're all washed up, through with us, done. Such letters always sadden us, leaving us with a sense of futility. Nevertheless, we always wonder what a dismal journal this would be if it were so supine, so colorless, so saccharine and appeasive that it offended no one. This letter from the Anchorage gentleman is considerably out of the ordinary because he begins with: "I have been a steady reader of your magazine ever since the Roosevelt-Taft split in 1912." And he proposes to desert us after twenty-nine years because of our recent editorial advocating the repeal of the Johnson Act. He calls that editorial British propaganda—and he wants none of it. Frankly, we're not going to let that guy quit. We'll sue. No man can take the best years of our life and desert us after twenty-nine years of happiness. Moreover, we're suspicious and are prepared to fight if we find out that a certain pale Jeannie with light brown hair, and very little of that, has been tampering with him.

HOWEVER, we have a bit of encouraging news from Canada. We've read a couple of books on the subject but still fail to grasp the reason why a war that is keeping Canadian industries running at top speed should at the same time depress the Canadian dollar far below parity with ours. Mr. Bert Dell of Detroit, Michigan, bought a bottle of liquor in a Control Board store in Ontario. He laid down an American twenty-dollar bill. He got twenty dollars and ten cents (Canadian) change. Dr. Dell spoke to the man about it. The man denied that there was a mistake, explaining international exchange to Mr. Dell as follows: "Vive la guerre."

IF NECESSARY, being an advocate of direct action and not being above a bit of light bribery, we'll buy him a drink. We shall try to do it as casually as our journal ate. Quentin Reynold arrival in Paris jum Adolf Hitler. Mr. R himself and Mr. Hit Ritz bar, his first s Paris. Mr. Hitler wa with Mr. Reynolds drank the fuehrer's us that Mr. Reynold "The Wounded Don' Blakemore, a twel mirer, and got the "Thank you very mu I am enjoying it. There's One Waiting for You!

Apply now for the world's finest aviation training, at U. S. Army Flying Cadet pay

One of those sleek, new basic training planes, lined up on the runway at the "West Point of the Air," is waiting for *you* to take the controls.

Thousands of young men, ambitious for a career in the great, new field of aviation, will see a challenge in this picture—and an opportunity.

The U. S. Army offers you the best aviation training in the world, and pays you while you learn. The instruction you get prepares you for a civilian or military air career.

As a Flying Cadet you will receive $75 a month, plus uniforms, equipment, board and lodging. Upon graduation, you will be commissioned a Second Lieutenant in the U. S. Army Air Reserve, and placed on active duty with the Regular Army Air Corps with pay ranging from $205.50 to $245.50 per month.

The requirements are simple. You must be not less than 20 and not more than 26 years of age, unmarried, sound physically. You must have completed two years of college, or pass a written examination covering equivalent work.

Because America needs trained pilots, you have the chance of a lifetime to build your career in the air. Apply today!

TRANSPORTATION has always been an important factor in the development of real-estate values. Thus, students of land economics trace four main trends, or epochs, in our history in which the realty wealth of the nation was progressively established, affirmed, then shifted onward to new appraisals. Water, rail, highway—and now the air.

In colonial times the large fortunes in land were made through ownership of water-front areas. Upon such harbors as Portland, Boston, New York (the Vanderbilt riches began on Staten Island), and Charleston. Upon such rivers as the Connecticut, Hudson (New York's ruling patrician families, as the Roosevelts), Potomac, Delaware, Schuylkill and Ohio. (The Ohio Company, in which Franklin, Washington and all the big shots of the day invested, was a prototype of the later California and Florida booms.) Upon lakes, such as Erie. Upon canals, which tapped the interior's first industries. Our commerce was chiefly waterborne: the China and India clippers gave New Bedford, Nantucket and Salem land values that they don't have, in proportion, today.

The railroad era of realty values really got under way in the middle of the last century. It ran concurrently with industrial expansion. It decentralized water-front and urban areas, enabled city workers as well as manufacturers to move out. It birthed new fortunes —Huntington, Stanford, Harriman. It brought on the land booms of the early seventies and the early nineties.

Next, a good state and national roads system, which of course is synonymous with the automobile, ushered in the third era of real estate. "It's on an improved highway" became as potent a sales argument as "it has good rail service" had been. It was more elastic: boosted rural values by new attainability and vast extension of suburbia.

NOW, and I have this on the word of real-estate experts, we are just entering the ultramodern, or air, stage of our land reappraisals—and it may very well fetch the highest values of all, not confined to audacious speculators, but spread out for the most good over the greatest number.

Like all new epochs, it is not reaching life without aches and groans.

Suburbanites near Seattle broke the heart of State Senator Billy Conner with their opposition to his cherished dream of the world's greatest marine air base on Lake Washington. KEEP UP WITH THE WORLD

By Freling Foster

When rivalry was rife among comedians on Broadway in 1908, a certain theater exhibited a woman called "Sober Sue" and offered $1,000 to anyone who could make her laugh. For fourteen weeks, these comedians vied with one another, but all failed, and shortly after she had departed they learned that her facial muscles had been paralyzed for many years.

All the men who had seen service on the German raider Emden during the World War were permitted, in the early 1920's, to add the name of this vessel to their own. One such man is Admiral Witthoeft-Emden, who is now connected with the German embassy in Washington, D. C.

One of the rarest afflictions is total color blindness, there being fewer than 150 recorded cases in all medical history.—*By C. E. Creighton, Wheeling, West Virginia.*

In the state of Bikaner, India, all music is grouped into morning, afternoon and night pieces and it is against the law to play a composition outside of its "hours." Thus, for instance, a person wishing to play or hear a night piece at one in the morning has to wait until the next night, which begins at four the following afternoon.—*By Bob Stobaugh, Martin, Tennessee.*

Valentine has been the most widely used name of saints, one recently compiled list containing fifty-two of them.—*By Kathleen Gay, Columbus, Mississippi.*

The United States is the only country in which all telephone and telegraph systems are owned by private organizations. In all other countries, the government owns and operates a part or all of one or both methods of communication.—*By Allan C. Garrigus, Indianapolis, Indiana.*

Although no American woman has ever been employed as a pilot of a regular airliner, more than 1,500 now have flying licenses, a number of which permit their holders to fly chartered planes carrying passengers.

An incredible aeria place recently in Aus two Air Force planes b locked about 3,000 fe army air field. The upper machine, after men in both ships t brought the planes s ground.

Copenhagen's first shelter, built a short ti the site where Ludvig celebrated Scandinav wrote his Epistolae in Holberg predicted th should ever learn to fly swoop down upon and destroy great numbers people who, to save would have to take ref in the ground.

One of the fastest-gr isms in the vegetable the "veil" of the wild S can mushroom, *Dictyo iata*. After attaining it growth of four inches hours, this mushroom lacy, flowing "veil" or virtually covers it minutes.—*By Phil Mu ton, Florida.*

Beef stew and chile con carne make a mess of mess kits but thirty gallons of water in a GI can heated over a coal fire does the trick for the Fort Dix men shown at upper left. Obstinate mess-kit cases yield to mud treatment. Cooks and K. P.'s (left) roll out at 2 A. M. to have fried potatoes, eggs, coffee, cereal, ready for a six-fifteen breakfast for 250 men

Incidents, Anecdotes and News from Draftee Training Centers

ARMY DOUGH: They'll never get rich but Uncle Sam's trainees are the best-paid men under arms. Privates draw $21 every payday for the first three months; $30 after that. Their foreign contemporaries don't do so well. Turkish privates drag down the equivalent of a nickel a month, Greek fighters get the price of five packs of chewing gum, Mussolini's warriors receive a buck and a half and Hitler's combat troops try to get along on six dollars a month. Aside from the U. S. the best basic rate is Britain's—$15.17 per.

Some draftees detect a silver lining on the greenback headache, a customary subject for barrack-room beefing. At Fort Lewis, Washington, Pvt. Philip C. Goebel of Seattle thinks his $21, clothes and grub are worth a $100-a-month civilian job; Pvt. Otto Kniepp from Snohomish says he's saving more out of his Army pay than he did from his former $38-a-week salary.

To make things easier for the draftee who isn't used to budgeting, the Army lets him buy on the cuff at the post canteen and deducts the amount from his pay check. When he's completely flat the new soldier can sometimes borrow a few bucks from richer pals, but usually at Shylock rates of interest. A few of the Army regulars at Fort Meade, Maryland, are doing all right for themselves with this kind of transaction. The bedlam around the pay window, where creditors snag debtors, is something.

Regular Army Pvt. Walter Hammond, of Headquarters Company medical detachment at Camp Upton, New York, wants no part—despite draftee cajoling—of these financial shenanigans. "I get my thirty-three rocks a month," he told a group of penniless privates, "and it's got to stretch because I got a very expensive hobby. Taking pitchers. So I do it simple. Eleven bucks for photography. Two for laundry. Eight for the canteen. And twelve . . . just for spending."

The draftees are still working on him.

●

CAMP EDWARDS, MASSACHUSETTS: The Army trains men but a lot of the boys are already trained for the Army. For instance:

Draftee Eugene F. Petit of Chicopee Falls studied three years for the priesthood, then dropped out of St. Mary's Seminary, Baltimore, because he decided it wasn't his vocation after all. He worked in a printing shop until the draft got going, volunteered for his year of service and is now assisting L. Clancy, S. J., chaplain,

John Martinides, a Yo York, native, was a cook in Rhode Island, hotel. A li cooking, he too volunteer Army put him right back in "In some ways," says he, None of this six-to-nine stuff. And I don't have to cutlets, sea food en bordur room omelets all at the sam

talk to Jock MacIlroy, and
o his other, and then to Molly some more; and the only question remaining to be settled was whether they would be married before Sandy went into the woods, or wait till spring.

Red had worked in Bangor that summer, but he came home for a week or two before heading upriver for the winter. He was a fine figure of a bold young man, with an eye for a pretty girl; and Molly was a pretty girl. He came tramping up the road past Jock MacIlroy's farm, and he overtook Molly on her way to his own home; so it was from her he learned that she would marry Sandy.

When she told him, Red grinned flatteringly. "Will ye so, now?" he challenged. "You're a fine one to go marrying anyone at all with never a word to me! Now when will that marrying be?"

"Right away!" she said proudly. "Right away, before Sandy goes upriver."

"Ho!" he protested. "No man with a heart in him would ever marry you and leave you as soon as that! Put it off, Molly. Maybe you'll change your mind when the drive comes down in the spring!"

SHE told him she would never change her mind, and he laughed again and said cheerfully: "Lord love ye, many a girl has said 'no' to me once, or maybe twice, but I changed their minds for them in the end. Now I dare ye to put it off till spring."

She laughed and said Sandy would not wait; and Red told her confidently, "Let me talk to the little man. You'll see!"

By that time they were come to the farm, and Sandy and Mrs. Fowler were out to meet them, and he had no time to say more. But Molly wished to show him how wrong he was, so before them all she told Sandy that she had been thinking, and maybe it would be full as well to wait till spring, after all.

It was a week more before they started away upriver and Red did not let her forget, and he laughed at Sandy—to her—for being so easily persuaded to delay the wedding. Sandy was busy making the farm ready for the winter, but Red had time for Molly, and he made of it what he could. He got small help from her. When the day of departure came, she kissed Sandy goodby, proudly, before them all.

Red had kissed her goodby—and had his ears boxed till they rang, for his pains—the night before; but he knew, by that time, that Molly would not change. The knowledge rankled. Before they reached the winter camp, he began to dislike his brother, and to deride him before the other men. He said derisively that Sandy was a farmer, not fit for woods work at all. After a while he began to make Sandy's care of his team a target. "Man, you dandle them as if they were a pair of women," he protested. "What's

PHOTOGRAPHED FOR COLLIER'S BY HANS GROENHOFF

HIS GIRL BLOND

By J. Bryan III

Blondie and her family began life ten years ago in a comic strip. Since then they've made a career for themselves and their creator in radio, movies and in the hearts of the Average American

ALL right, Winchell. Here's the final test, the showdown: Pick any infanticipating couple you want, and say whether it's going to be a boy or a girl.

Can't, eh? Well, listen to this: On the morning of Monday, April 7, 1941, the D. B.'s, one of the most prominent young couples in the country, will receive a bundle from heaven labeled, "Handle with care! Baby girl!"

That's news. What's more, it's true. It's straight from the ink bottle, and the ink bottle belongs to cartoonist Chic Young. The D. B.'s? They're the Dagwood Bumsteads, Mrs. Bumstead being the Blondie of the comic strip, radio program, movie series of the same name, as several score million people are aware.

Even readers of the Helsinki *Suomen Sosialidemokratti* know Dagwood's passion for multidecker sandwiches. Readers of the Shanghai China Press wonder at Blondie's new hats. Readers of the Guatemala City *Imprenta Hispania* sympathize when Baby Dumpling has to sit in the corner. They, and the readers of more than 500 other newspapers, representing thirty nations and seventeen languages, have known the Bumsteads long and they know them well.

They know them so well, indeed, that when Chic Young showed Blondie using a saucepan with a pattern of stripes, he received an avalanche of letters inquiring when she had bought it; her old saucepan had been plain. He received another avalanche when he put a new lamp on the bed table. Another when he inadvertently moved the refrigerator to a different side of the kitchen.

To these millions of people, the Bumstead house is as familiar as their own. The explanation is that the Bumstead house *is* their own, or their relatives', or their neighbors'. Some readers accept the illusion as fact. They are so convinced that Young is drawing actual fellow citizens of theirs that they write him letters beginning, "You know Robinson's drugstore on the corner of Fourth and Main? Well, why don't you show—"

Young has scrupulously avoided localizing the Bumsteads. No one regrets this more than Dr. George Gallup. If Gallup knew where they lived, he could simply ask their opinion and he'd get the average opinion of America. This is the secret of the Bumsteads' appeal: they are as average-American as baseball, ham and eggs and—for that matter—comic strips.

The Bumsteads never do something for a laugh that they wouldn't do normally. There are no such traditional cartoon black-outs as someone attempting suicide, or joining the Army, or jumping out of his shoes. Nothing enters their lives that doesn't enter an average life.

Dagwood can't operate a rocket ship or a disintegrator gun; his highest accomplishment is catching the last bus that will get him to the office on time. Blondie has never been held hostage by the mad Professor Querio; her chief anxiety is whether her cake will rise. Baby Dumpling is not a Little Lost Prince, but he has one adoring subject—his dog Daisy. A typical Bumstead disaster is a mosquito in their bedroom or a cake of soap that sli

ld b eve that part about its nport t, because nothing unim- woul ever get Marge Lewis out of bed at that hour, so, knowing that, I went.

I took a cold shower, and ate an orange, and walked over to Marge's. Walking through the snow, I started thinking about it, and I wondered what George had done now; and I hoped it was something awful. It is easier to understand that when I explain that George Lattimer and I had been rivals for Marge Lewis' hand for six years. We were very civilized about it, of course. It was a friendly and sporting rivalry, not counting a few dirty tricks George had pulled on me, which I will not go into here. I will simply say that George had proved to be the best man, or at least it seemed that way since he and Marge had announced their engagement and were to be married in the spring. That is why I was hoping George had done something awful.

It is about four blocks to the Lewis place from where I live, and I walked it very quickly in the cold. Marge met me at the door. She was wearing a housecoat and slippers, and in spite of George, she was looking much the same as usual, which is very good indeed.

She said, "Dear Jeff, you're so considerate and dependable, and everything. I don't know what I'd do without you. Come on in."

"I didn't come here for flattery," I said. "What about George?"

"It's too tragic," Marge said.

There was a fire burning in the fireplace in the den. I put my hat and coat on a chair and turned around just in time to see Marge pouring whisky into two glasses out of a decanter.

I said, "For the love of Pete, Marge. Eight o'clock in the morning—"

Marge said, "Please, Jeff . . . It's just too awful," and went right on pouring.

Right then I knew that George had done something awful, because it is my experience that normal people do not drink at that hour in the morning unless they have a terrific hang-over, or are suffering from some unusual emotional strain. We had the drinks, though, and that is where I made my biggest mistake. I am not accustomed to whisky for breakfast, and the unusual effect on an empty stomach was one of the reasons I let myself get roped in the way I did. Under ordinary circumstances I would have put my hat on and gone home to bed, but six fingers of Scotch will sometimes undermine my perceptions.

AFTER the second drink Marge began to cry. She said, "I'm so unhappy, Jeff. I'm losing George. He's going to break our engagement."

Needless to say I was delighted, but under such circumstances a man must be sporting. I was very sporting. I said, "Old George wouldn't do that."

"Yes, he would," Marge said. "He's infatuated with that creature."

"That happens quite often," I said. "Just don't pay any attention to it. It'll pass."

"Not with George," Marge said. "He's too romantic. He's not like you, Jeff. He's an idealist. I'm going to lose him."

I said, "I hope . . ." and then I caught myself just in time. "Not old George," I said.

Of course I knew what it was, because it wasn't exactly a family secret. There is nothing secret in this town, except perhaps a few lodge handshakes, and the ages of two or three women that I know. And then I had what you might call a primary interest in what went on, so it was natural that I should know about George Lattimer and Cass Conover.

Not that there was anything wrong about it, but when two people are together a lot it is bound to cause gossip. At least it is bound to cause gossip in this community, and George and Cass were certainly together a lot. Any time during the summer you could see them in the pool at the club, or playing golf, or shooting billiards, or banging balls back and forth on the tennis court.

Of course I have seen the same thing happen to other couples, and it has come out all right in the end, with no damage done. As far as I could see the danger lay in contrasts, and Cass was certainly the most extreme thing from Marge that I could think of right offhand. Cass is a big, strapping wench who does things. Not that she is homely. As a matter of fact, she is good-looking in an athletic way, but husky, and independent, and capable, and sort of masculine in her attitude. The good-pal type. You know: man to man. Fight, wrestle or foot race for money, marbles or chalk. And that is not Marge's style at all.

I was fairly proud of having thought that all out until I realized that it was pretty obvious and that Marge knew it,

(Continued on page 77)

After the fourth slap Marge stopped the hysterics and settled down to plain weeping, saying, "I've killed him"

LESSONS OF WAR

By Quentin Reynolds

PHOTOGRAPHED FOR COLLIER'S BY CECIL BEATO

William Penn once sat in this classroom learning Latin. Today it's just as it was in 1656. Above the blackboard is a list of Chigwell's honor students. Penn's name is not there

It's eight P. M., an hour before "lights out." German bombers are passing overhead en route to London. The shelter is well lighted and heated, the boys are catching up on their work

IN 1656 a small schoolboy was awakened every morning at five-thirty by the mellow sound of the school bell. He put on his black knee breeches, donned his high black hat, shook the sleep from his eyes and then went to morning prayers. All day long he lived by the sound of the bell. It told him when to pick up his Lilly's Grammar for his Latin lesson; when to open the Greek grammar of Cleonard; when it was time to declaim Tully and Terrence, when it was time for dinner and recess.

The boy learned well. He learned not only the classics but he learned tolerance and humility and one day when he was almost grown the bell again tolled to say that he and his schoolmates were ready to put aside their books and enter into the affairs of the world. The boy's name was William Penn, and today a state in America is named after him.

The Chigwell Grammar School, not far from London, still stands as it did when William Penn was there. For three hundred years its bell had echoed through the valley of the Roding.

A hundred years ago a vigorous middle-aged man with a dark beard came to the village of Chigwell and he liked what he saw. He rented a small cottage on the school grounds and each morning the bell chimed to wake him too, not to attend early prayers and classes but to remind him that it was time to pick up his quill. And so Charles Dickens wrote Barnaby Rudge and he never minded the soft tones of the bell which rang so often during the day.

Nothing has changed at Chigwell. It is just another English public school educating lads from eight to eighteen as it has educated them since 1629. Across the road from it is the famous King's Head Inn where Dickens, in his broadcloth and his beaver hat, used to drink mulled ale; where the great robber Dick Turpin came each day for his pint of bitter and for information about the London coach.

Nothing has changed, and yet Penn and Dickens and even Turpin would be puzzled if they returned. There would be something lacking and finally they would realize what it was—the bell no longer tolls. No church bell or school bell rings in England today. They may ring one day. When they do it will mean that the invader has come. The bells will peal all over Churchill's island and members of the Home Guard will grab their rifles; farmers will take up pitchforks; housewives will be ready with homemade bombs—the bells will tell England that she is now fighting for her life.

Bugles now summon the lads to classrooms at Chigwell School. The bell hangs forlornly in its belfry and there is a padlock on its chains. Dr. Robert James, the headmaster of Chigwell, keeps the key.

A year ago, when the possibility of air raids could no longer be ignored, the students began to build trenches. They timbered them up and made them deep. The headmaster picked "spotters" among the students. But the spring passed and summer vacation came without the dread possibility having become a reality. Then came September and England had to learn how to live in a new world.

The school term was to start September twenty-third. Dr. James knew now that the trenches would not be enough. He called in professionals and had underground shelters built. They had wooden floors and electric lights and stoves and bunks enough to accommodate all of the 260 students.

Today the school handles air raids intelligently, without hysteria and with a minimum of lost effort. I sat in a classroom (the same one in which William Penn learned Latin). The Latin master was writing the familiar verbs on the blackboard and explaining what they meant and how they should be used.

Then the wail of the siren came faintly through the windows. The boy who was reciting now never even dropped a "sic" or a "semper." This siren meant that aircraft were over London, less than twenty miles away. The lesson continued. Then the loud notes of the bugles played by the spotters filled the room. The master laid down his book. Without a word the boys filed out of the door. They ran the scant fifty feet to the shelters. German aircraft were near.

In the finely built shelter they studied or they played checkers or they just played. It was a great lark to the youngsters (even to the older ones) and then, aged to duck hour. An hour sounded and emerged from places of safety

you re in, Mr. Winthrop?"
Mr. W throp had not said, but he showed no re-
ince. With alacrity he passed out business cards
layin the name PERFEX in rich bas-relief.
Heat g," he announced, "is my line. The Per-
peopl manufacture everything from a bathroom
lamp to an office-building furnace. Coal, gas, oil,
tric aters—a Perfex for every purpose is our
chwor"
ncon iously, though he spoke with warmth, his
ds br ght a sudden chill to the Municipal Ad-
ising Bureau. "Of course," admitted Mayor
by, "w do have a few brisk days down here. Much
your orious autumn mornings, they are."
"Yes?" said the sales manager. For such ■ young
n, he d a personality as compelling as a north
d. "In February, 1899," he smiled, "the tempera-
e in Pt Leon dropped to seven above zero. And
anuar 1886, there was ice on your bayous."
The m yor looked hurt, as only a bland, fat man
look urt. But Woodrow put in loyally, "That
s a lo time ago. I remember my grandfather
ing wh t hard times they had after the War."
Again Winthrop smiled. From his brief case he drew ■ sheaf of graphs and statistics. "I never plan ■ campaign," he said, "until I have complete government records. In January, 1917, for instance, I note a trace of snow in Port Leon. Naturally," he added, glancing at Woodrow, "you wouldn't remember. That must have been during your infancy."

CARVER WINTHROP could scarcely have been more than a kindergarten pupil himself, though doubtless ■ forceful and mature little chap. "Or for that matter," he said, brightening, "take *today*'s forecast. In the plane coming down here I read that a drop in temperature is predicted. A big drop, the papers said. A *big* one."

His three auditors had a guilty and defensive air. They, too, had read the papers.

He went on happily, "I have always been fortunate in opening up new Perfex territory. Pure coincidence, I suppose, but I usually rate a nice cold wave. The 'Winthrop luck,' they call it in our main office."

"Now see here," snapped J. Eldridge Digby. "We've got our Camellia Week to think about."

The sales manager made a note. "Fine! We can work that into our art—the carefree Southern family gathered in their undies about the new Perfex, with potted camellias in the window. I'm ■ great believer in advertising, Mr. Digby, especially at the outset of a campaign. Here in Port Leon we'll need several full-page spreads."

At the first mention of advertising it was plain that a struggle had begun in the publisher's soul. Armies of ideals surged back and forth, locked in mortal combat. But in a moment he smiled wanly, hailing the victory of industry over climate.

"I'm sure," he said, "that the Clarion would prove a helpful medium. After all, there ought to be a wide market for your product here. Invalids, children, elderly people—"

"Everybody," said Carver Winthrop, "needs Perfex comfort. Given the right sort of educational campaign, Florida and California should be among our best territories."

He zipped shut his brief case as if to hint, very tactfully, the value of time. Then he rose.

"Perhaps," suggested the (*Continued on page* 72)

After slowly skating back and forth, he chose a spot where he could pose his profile to best advantage against a semitropical background

Hustling Hal

By Kyle Crichton

JAMES S. DOOLITTLE

Warners' associate producer, Hal Wallis, and his close friend on the set and off, Director Mike Curtiz

Life is never dull for Hal Wallis, who produces about forty-five pictures a year for Warner Brothers, is married to Louise Fazenda and would eat steak every night if she'd let him

NOTHING is more dismal than a Hollywood motion-picture studio at midnight. The lights on the outside of the gigantic sound stages blink forlornly and the streets between the stages are filled with the ghosts of platinum blondes and manly heroes. Just when the tears are beginning to fill your eyes at this pathetic spectacle, a limousine will pull in at the front gate and out will crawl five bedraggled gentlemen. They have just returned from a sneak preview at Huntington or Santa Barbara and they are very weary.

If this were a section of the hired help, the situation would be bad enough, but these particular worthies are the big shots—the producer, the director, the musical director, the head publicity man, the assistant head publicity man. In short, these are the gentry who are beating their brains out through overwork and all they will get for their pains is a fortune. If the above scene takes place at Warner Brothers, the producer in question will be Hal Wallis, the object of this discussion.

Mr. Wallis is a bit of a philosopher about his profession.

"A producer," he says, "is a man who is loved by his immediate relatives on both sides of the family and by practically nobody else. The actors swear you've put them in the part to ruin them, the writers are convinced you're a moron, the director knows for certain that any good scenes will be eliminated by criminals working in the cutting room. In the midst of the shooting, the female star has a rift with her boy friend and goes into a decline; the male star falls off a horse and is dented; California, the sunny, produces a slight drizzle of rain which lasts eighty-four days."

The Result's a Headache

You can't fool the man about his job at all. As associate producer at Warners' he is responsible for approximately forty-five epics a year. A Broadway producer who puts on three shows a season invariably ends up on a tropical island being fanned by a native boy. All Mr. Wallis gets from his labors, aside from the fortune, is a headache of such bulbous nature that men have stepped off the rim of the Grand Canyon for less.

Of the making of pictures, there is no end . . . at Warners', anyhow. Mr. Wallis lives out at Van Nuys on a farm and gets to the studio around ten o'clock. From then on it's a riot. He sees writers, supervisors and directors. He checks costume designs, sets and everything else connected with a movie production. He reads his mail; he comforts one of his actresses who arrives in tears to say her husband has been beating her; he orders his secretary to go out to the reception room and throw the assembled agents into the alley. Between times he confers with Jack Warner and Harry Warner, tries to dictate his mail and has a row with the publicity department on the titling of a new picture.

At one-thirty he goes over to the private dining room and eats a salad and listens to the wisecracks of Jack Warner and Mark Hellinger and any assorted favored guests who may be around seeking a free meal. After that he gets a shave. This is the high spot of the day. He lies back in the chair and the barber puts a wet cloth over his eyes. The tonsorial gentleman warns:

"No lousy shop talk in here now; this guy is dying."

Then Wallis goes over and sees the rushes of the shooting do
fore. This is the point w

They were rav ous in the sixth, trying to get a run or eller; nd the result was unbelievable at the e seve h—horse collars for both teams! Hal t like ing on all day. Not even a base hit m u he first part of the eighth disturbed was a atch hit with one out.

Then, wonder of wonders, Feller went haywire on the mound just long enough to bring trouble. He hit a batter, and a sacrifice put the runner on second. A clean hit scored the run and Hal Price was three put-outs from victory.

But why wasn't he dancing with joy and surging with strength enough to tear down the grandstand? Why, instead, did he suddenly feel as though all his strength had been siphoned from his massive frame? Therein was his tragedy every time. Subconsciously, Audie had explained, fear crept up his spine and assailed his brain, battered down the fortress of confidence and left him with the fallacious belief that he was an old man in baseball, a has-been, a failure. His struggle was to beat a team while telling himself, between pitches, that his arm was no good.

HE SHUFFLED to the mound feeling years older. Wondering if he could reach the plate with the ball, he caught the catcher's sign for a fast ball, wound up and threw. He ducked a flash of white over his head, then heard a groan from the grandstand. He turned to see the batter reach second in a cloud of dust.

It was no use. He felt limp and helpless again, nauseated and all creepy from the rush of hot shame to his head. What was *she* thinking? A man is supposed to make his girl proud. Instead, he looked to her for strength—

Yet, to that moment, he hadn't looked. Believing in the old arm, he hadn't wanted to. Now he had no strength. She knew it, probably saw it, but she understood. And so he surrendered as the next Cleveland batter swaggered to the plate. He peeked toward the upper grandstand where she always sat. She was there, but—

She was reading a newspaper!

More than that, a guy in the next box was gabbing with her. As they laughed, the whole ball park and its twenty thousand spectators whirled before his eyes like a giant pin wheel. Now, absolutely everything in his life was gone, because she was all that mattered. How on earth could any woman do a thing like this to him, after he had been so honest with her? Well, he could stand so much and no more. Murder was in his heart. All else shrank in importance. He had no concern for his precious elbow when he threw a hook; he threw with a savage whip of his arm. In fact, he was quite amazed a few minutes later when the third straight Cleveland batter went down on strikes, stranding the hopeful tying run on second.

Deaf to the wild congratulations of his teammates, he yanked off his uniform and jumped into street clothes without a rubdown or shower. All that mattered was his wife. He hurried into a taxicab and sped to the apartment, there to be greeted by her mask of smiles and gushing exclamations of simulated delight.

"Nix on all that!" he roared. "I'm sweatin' my heart out, dyin' a thousand deaths, sufferin' as no man ever did, an' you sit up there . . . you . . . readin' a newspaper! Audie!"

"Sitting there, darling, yes," she exclaimed, and fought to touch him with her trembling hand. "But reading a newspaper—no!"

"You were too. I saw you. An' gabbin' with a guy. Who was *he?*"

"Just a perfect stranger, dear," she chuckled, and pushed him into the kitchenette. The odor of thick, broiling steak always smoothed his ruffled temper. "He wanted to know how I managed to read with the newspaper upside down."

"Nix on all that!" he roared. "I'm dyin' a thousand deaths, and you sit up there —you—readin' a newspaper! Audie!"

The Traitor

By Frederick Hazlitt Brennan

ILLUSTRATED BY HARRY BECKHOFF

The Story Thus Far:

TOO strong a booster for aircraft, Captain Hartney, U.S.N., is exiled—given the command of a small Western naval station. There, presently, three young inventive geniuses arrive—Lieutenant Dent ("Savvy") Roberts, and Messrs. Prentice ("Dutch") and Rorabeck ("Pat"), M.I.T. graduates—and go to work on a new secret engine.

The engine causes a fire. Whereupon, Savvy Roberts risks his life by extinguishing the flames. Among those who witness Savvy's act of heroism is Phyllis Hartney, the captain's daughter. The young lady is much impressed.

A few minutes later, Phyllis, summoned by her father, goes to his office. There Captain Hartney introduces her to an officer who has just arrived from Washington: Lieutenant Commander Kirstell. Kirstell tells her that "Intelligence" has intercepted a short-wave coded message, and decoded it. He says that the message has to do with Lieutenant Roberts' transfer to Captain Hartney's station—and a new device that Roberts is testing. He quotes the concluding sentence of the message: "*We have officer there who will cover.*"

Then, while Phyllis stands there appalled, Kirstell asks her to do what she can to help him find that officer—that traitor. And, unable to think of anyone she knows who might betray his country, Phyllis promises to cooperate. She does not suspect anyone. The only man who might be guilty of such a crime is Bert Sedden, Commander Sedden's son. But Bert (a cynical, rebellious young pacifist who scoffs at everything his father holds dear) is not an officer. Nor is he now at the station—he is due to arrive, from the East, in a few hours. . . .

That evening the captain gives a small dinner party. Among the guests are: Lieutenant Commander Kirstell, Savvy Roberts and Pat Rorabeck. Also, the captain's aide, Lieutenant Roger Collins, who has fallen for Phyllis. In the course of the dinner (a masterpiece by Dolores, the Spanish-American woman who presides over the captain's kitchen) the talk veers around to an interesting subject: treason.

Suffering dreadfully (because he does not want to believe that any of his fine young officers is a traitor) Captain Hartney listens to the various comments. And, after a time, there comes a welcome interruption—a sentry, across the parade grounds, calls "Halt!" and, a moment later, fires three times.

Lieutenant Collins springs up. "Excuse me, sir!" he says. But Savvy Roberts is ahead of him—wasting no time, Savvy has leaped up and bolted through the door.

He grinned and patted my head with a gentle and lordly tolerance. "You're all right, sis," he said; "but stop worrying—or you won't grow up to be a big girl"

III

MY FATHER and Lieut. Commander Kirstell followed Savvy, Roger and Pat to the basin, leaving me with the wreckage of a dinner party. I would have trotted right after them (she runs to fires *and* shootings) but Dolores got hysterical from excitement and started dropping things. I had to stay on the job or abandon my mother's gold-banded dinner china to heavy casualties.

"He will be shot, the Lieutenant Robert!" Dolores wailed. "Shot, before you have given him one smile—and in his grave!"

"Don't be so silly."

"*You are not in love with him!*"

"Oh, shut up!"

"I, myself, am in love with him."

"Don't drop that tureen!"

"You are entirely without a heart, Señorita. I am in love with that man, but immediately! There is something of a gravity wrong with you."

"Carry that platter with both hands."

"He lies dead at this moment. You will love him in his coffin. You will cry bitter tears—"

"Pipe down!"

"I must say it—"

"No!"

"You are cruel, Señorita."

"You are a crazy Spig. Stop talking, or I will kick thee on thy lovely shins!"

"An impudence, a coarseness, an irreverence!" said Dolore

"No spik Inglis," the witnesses said. They hadn't counted on a Russian named O'Flaherty and a detective named O'Malley

A COP in this town don't know what kind of case he's going to get," O'Malley said, "and this is one of 'em. A guy named Androskey run a lodginghouse. He was a Russian. He got married recently to a girl a lot younger than him. Now he got shot and the claim is a young guy named Andy Dosenki knocked him off. So cops pinched Dosenki. Cops that speak Russian been working on the case and can't prove anything. Now they put me on it. I can't speak the language, so I won't learn nothing, but I got to go try."

"Do you think Dosenki did it?" I asked.

"I ain't talked with the guy."

We talked with him. They had him locked up. He was a blond youth and he spoke English all right.

"Listen," O'Malley said to him, "you claim you didn't knock that guy off but everybody else claims you did. How do you account for them saying that about you?"

"I don't know. I was asleep. Then I woke up. Then I heard a shot. Then somebody knocked on my door. I got up and went to see who it was and nobody was there, but I saw Androskey's door was open, so I thought it might have been him. I went in and Androskey had shot himself."

"What made you think it was him that done it?"

"Well, the gun was in his hand. I knew it was his gun. He kept it on the shelf in his closet. I tried to take it out of his hand, then guys from other rooms came in."

"What was it woke you up?"

"I just woke."

"Boy, we got this different. You wanted that dead guy's wife."

"No, sir; I didn't want that woman. I got a girl of my own."

Dosenki's girl was at the police station. She was very young and quite pretty. The blond widow was there too. She was twenty-three years old.

"Where was you when your husband got killed?" O'Malley asked the widow.

"I was at a picture show."

"Who with?"

"I was alone. Then I came home. My husband had been shot and the cops were there."

"Yeah? What was your idea marrying a guy more than thirty years older than you?"

"Well, he was good to me. I didn't have any job and he let me stay at his place. Then he wanted to marry me."

"You didn't love the guy, though."

"I liked him all right."

"Sure. Till you met Dosenki."

"Say, Dosenki is nothing to me. He liked me, though. He'd been bothering me."

"Is there any chance of this being suicide, as Dosenki claims, O'Malley?" I asked.

"They think not. . . . The medical office says it's unlikely a guy could shoot himself that way."

"What's the evidence against Dosenki?"

"He worked nights, so days he was around the lodginghouse. That night he didn't work. All the people that live there claim he had been making a play for Androskey's wife. She wouldn't have nothing to do with him. Then Androskey got shot. Dosenki knew where Androskey kept the gun. It looked like there had been a fight there, and a button was on the floor, and later, cops found a bathrobe in Dosenki's closet that the button come off of. Well, I suppose we got to go there."

WE WENT to the lodginghouse. It was on the East Side, a dingy place. A cop was on post at the room where Androskey had been shot. We went around and knocked on all the doors and assembled the lodgers. There were about a dozen men.

"This guy took only men lodgers," O'Malley remarked. "Then he married that kid. I guess there had to be trouble. What do you know about Androskey getting knocked off?" he inquired of the lodgers.

"No spik Inglis!" they yelled at us.

"This is a hot case!" O'Malley said.

A boy about nine years old was watching us in the hall. He had P. S. 134 on his sweater and O'Malley grabbed him.

"No spik—" the kid started.

"Yeah? What language do they speak in Public School 134? You go and get me some guy that can talk to these people for me."

The kid grinned at us. "Okay, flatfoot," he said finally.

"You think somebody knocked on Dosenki's door?" O'Malley asked me while we were waiting.

"I think he was making up a story and just put that in," I decided.

Then the boy came back with a good-looking, dark-haired youth about twenty-five years old, who said his name was Olavski.

"You live here?" O'Malley asked him.

"No. Near here."

First Fashions of America

By Marian Stephenson

PHOTOGRAPHS BY THE AUTHOR

Marian Stephenson's pictures of the qay Tyroleans started our Tyrolean fashions, and she brought back the sun-tan idea from the French Riviera. Now, with her camera focused on America, she gives us ideas for some real home-grown fashions

YOU'LL see clothes this spring and summer reminiscent of your early colonial ancestors. Gay cavalier capes, scarlet coats, Pilgrim jerkins, carefully starched ruffs.

This idea for a first American fashion was born at a dinner party and later became a reality, through the aid of designers and manufacturers who worked from pictures I made as an inspirational source.

We decided that some real American fashions could be created from the rich heritage left us by three classes of our early settlers, the Pilgrim-Puritan, Cavalier and Patroon. It seemed to us that the historical background, manners and fashions of these three would yield a vast amount of source material for fabrics, clothes, jewelry and accessories.

Loading my station wagon with cameras, films and lights, I started on a trip covering Virginia, New England and New York. I spent three weeks in New England, photographing everywhere I went. Old church spires, weather vanes, door knockers, picket fences, old gardens and houses. Even the ivy on a brick wall was the inspiration for a silk print. Buttons were designed from door knockers, pins from weather vanes.

Plymouth and Duxbury, old Pilgrim towns, and Salem, Cape Cod and Nantucket were marvelous sources of antiques, paintings and engravings. I found the jerkin, the apron and the hat of the Pilgrims all adaptable fashions.

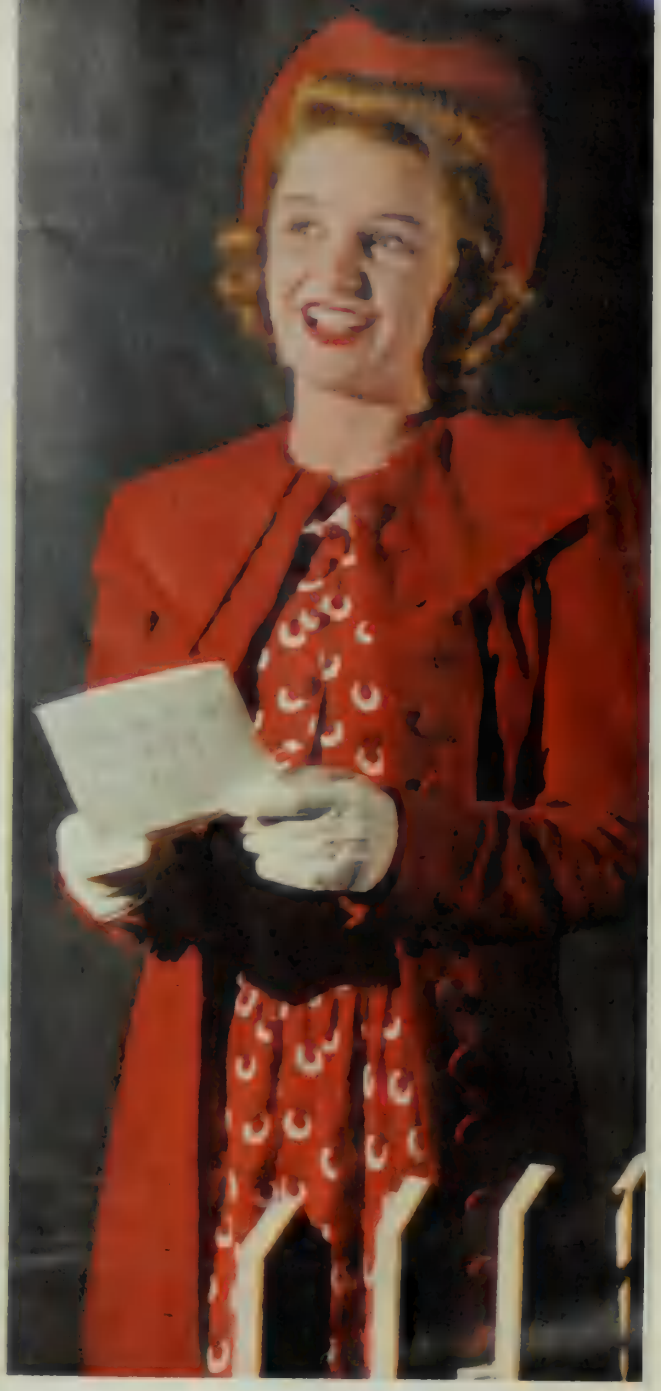
This was followed by several weeks snapping pictures in restored Williamsburg, the cavalier capital, and other historical landmarks like Alexandria, Mount Vernon, Charlottesville, Jamestown and Fredericksburg. Here the gay Virginians carried on their gracious way of life, and old portraits, especially of men's clothes, showed us their sophisticated use of black with contrasting pale colors, their sumptuous capes and wide-brimmed hats.

Scarlet was an important color (even with the Quakers) and the scarlet cloak was popular in all the colonies for more than a century. Old wills trace the careers of scarlet cloaks through several generations.

The wealthy Dutch merchants (called "patroons") who helped develop the New Amsterdam colony as a commercial and shipping center, wore great, baggy breeches. These "knickerbockers" and their boleros are valuable design sources as are Dutch seamen's clothes of this period. The sailors wore short jackets over a collarless shirt with a colored handkerchief tied around the neck. The beautiful neckwear of the Dutch women, often having sixty yards of pleating in a carefully starched ruff, provided another fine source of inspiration.

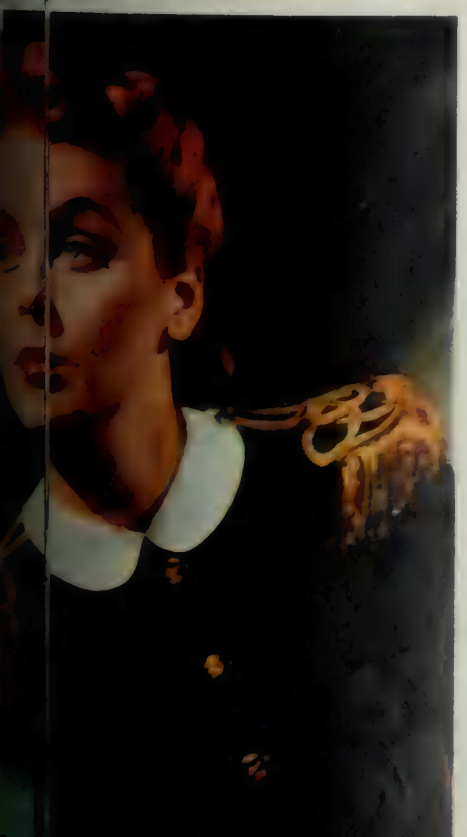
We feel that we've only begun to work on the designing possibilities that can be derived from our early colonies. But these first American fashions that have been created can be obtained now all over the country. Many others, including play clothes and children's clothes in cotton and rayon prints, will be coming along for summer wear.

The gay Virginia cavalier's costume was the source for the 3-piece cape ensemble above. The tricorne rage of the 17th century inspired the new tricorne hat. Jewelry was designed from an old New England weather vane



Pin (left) modeled from horse's head over a blacksmith's shop in Williamsburg, Va. Sage-green wool bolero ensemble inspired by costumes of old New York—Dutch seaman's short jacket of this period is used in this case

Men's clothes of the 18th century inspired this covert cloth coachman's coat, (right) blouse with white cotton jabot and a hand frill, and side-roll hat. Buttons were designed from an old New England door knocker



A New England lion door knocker inspired this rayon print. The straight-hanging coat with squared collar is "The Scarlet Judge," from the red coats of New England judges. The hat is a variation of the old tricorne

Jerkins of the Pilgrim men inspired the striped one above, worn over a marquisette shirtwaist evening dress. Scarlet cape is from the capes worn by Puritan men and women. With it, the versatile weather-vane pin

Left, an engraving showing the looped gold braid on George Washington's epaulets provided the designing cue for the jacket of this crepe dinner dress with a white shirtlike top. Eagle trim buttons appear on the jacket

An old dummy standing at the door of a Nantucket antique shop provided the inspiration for the frilled bonnet at the right. The crisp lingerie yoke is from the frilled neckline of dresses worn by wives of Dutch patroons

CHINA SKY

By Pearl S. Buck

ILLUSTRATED BY MARTHA SAWYERS

The Story Thus Far:

WHEN Dr. Gray Thomison, head of a hospital in the Chinese city of Chen-li, sails for America, he leaves a young woman—Dr. Sara Durand—to carry on in his place. The war is raging and, every day, Japanese airplanes are bombing the hospital. But happy in the knowledge that the man she loves, *unknown to him*—Gray Thomison—will soon be by her side again, young Doctor Durand carries on courageously.

Her first great test comes when a noted Chinese guerrilla—Chen-ta, who is known throughout China as "the Eagle"—brings her a badly wounded Japanese prisoner and implores her to save the man's life. Wondering why he wants the Japanese to live, Sara—assisted by Dr. Chung, head of the men's ward, operates; and the Japanese—an officer of high rank, who says his name is Yasuda—does not die.

Then Sara receives a crushing blow. Doctor Thomison cables that he is returning with "Louise"—his bride! . . . The young couple arrive. And from the first, Louise (who, not understanding the Chinese, loathes them) is miserable. Also, she is terrified by the bombings.

Noting her fear, Doctor Chung (in the pay of Yasuda) assures her that there will be no more bombings *of the hospital*, if she will put her husband's Chinese seal on certain letters that he will bring her. Suspecting nothing—not dreaming that the letters will convey information of the greatest value to the Japanese military authorities—Louise agrees to do as Chung wishes.

The first of the letters goes through. And, a short time later, the bombers stop molesting the hospital—but not the city. . . . No longer afraid, but bored by life at the hospital, Dr. Thomison's wife begins writing to Harry Delafield, an attractive Englishman who is stationed at a near-by port. Presently, in answer to her entreaties, he comes over with some friends for a small dinner party.

While dressing for the party, Doctor Thomison is interrupted by Siao Fah, his cook. Siao Fah, who adores "Thomison doctor," shows him a note (which he has intercepted) from Louise to Delafield. It is to "Dearest Harry"; and, reading it, Thomison realizes that it is a love letter. . . .

In the past "the Eagle" has always been victorious. Now, he is defeated whenever he attacks. The answer (unknown to him) is that Chung Third, Doctor Chung's brother, is reporting his moves to the enemy. . . . Sara drops into Yasuda's room, unexpectedly. The Japanese is sitting up in bed. Beside him is Chung. Between them is a map. As Sara enters, the two men stare at her, transfixed.

VII

SARA, looking at the two men, did not let her eyes waver. "You are better, Mr. Yasuda," she said distinctly.

"Much better, I thank you," Mr. Yasuda replied. He folded the map carefully as he spoke.

Chung rose. "What you have said is most interesting," he remarked to Yasuda. Then he turned to Sara, his teeth very white through his smile: "Mr. Yasuda has been showing me a terrain map of the central provinces which the enemy used in their march west. Very clever!"

Sara did not answer the smile. "When did this remarkable change occur in the patient?" she asked.

Chung picked up a chart from the small table by the bed. "Mr. Yasuda has had no fever today. In fact, his temperature has been dropping for thirty-six hours. He enjoyed his noon meal."

"Very much," Yasuda murmured. The map was now in a small square and from under his mattress he pulled out a flat leather case and put the map inside it. Then he lay back against his pillows and gazed at Sara between his lids. His pale face was blank. But so was Chung's. These two faces now confronted Sara with a look so alike that for the first time an enormous possibility dawned in her mind. There was an evil connection between them. She had come upon some hidden, electric cord of communication. She suddenly felt frightened and helpless. Yasuda—perhaps he was not ill at all! He did not even look ill now. She was alone with these two men.

"I am sorry if I interrupted you," she stammered, and, turning so quickly that she stopped herself lest it seem flight, she left the room and went back along the corridors and up the stairs to her room. She must tell Gray as soon as it was morning. Twice she was sure she heard a footfall behind her, but she would not turn her head to see if Chung was following her. If it was he, then she must keep steadily on.

When she reached her room she hesitated for one moment, and in that moment she turned her head and saw not Chung, but the nurse, Ya-ching, watching her. Ya-ching had followed her, not Chung!

"What are you doing here, Ya-ching?" she called angrily.

"I came merely to see if Ling doctor's

ost my heart to a Spinach

at Margaret's, I met the spinach of my wonderfully *garden-fresh* I had to rub my e it wasn't picked that morning! What a y flavor it had . . . like no other spinach I ever! Margaret told me her secret . . .

2. Birds Eye Spinach! *Specially* flavorful, and picked at its richest, tenderest best. It's *Quick-Frozen* near the farms, so all its wholesome goodness is captured *4 hours after picking!* Beforehand, though, *all* hateful sand is washed out in gallons of clear, spring water! Amazing?

3. Listen . . . every cool-green leaf of Birds Eye Spinach is *so* clean and *so* perfect, there's no washing and picking over to do! Margaret says (and I *believe* her!) she saves 25 minutes' fretful fussing. She simply slips the spinach from package to pot! It's that easy! Besides . . .

4. There's never any *waste* to pay for . . . no tasteless, lifeless leaves. Why, one box of Birds Eye Spinach equals a half-peck of unwashed, untrimmed, and full-of-work spinach! It all adds up to a saving . . . since you eat every luscious ounce! Margaret's certainly smart . . .

5. She says she's read where some pretty critical scientists have proved Birds Eye Spinach has all the same important vitamins found in spinach freshly picked! So, now my family gets the *good* out of spinach the convenient Birds Eye way! (Can you blame me for boosting Birds Eye Foods? Try 'em, yourself, and you'll cheer, too!)

Why Do More People Prefer a G-E Than Any Other Refrigerator?

A RECENT series of five independent surveys made among present users and prospective buyers of refrigerators confirms the General Electric Refrigerator as the accepted standard of excellence! More people actually prefer a G-E Refrigerator than any other make!

Tops In Preference Because Tops In Performance!

For years General Electric has been building better and better refrigerato for less and less—always emphasizing "b r prod- uct" instead of "lower price." Th s why a G-E Refrigerator is so outstandi in per- formance—such a proud possess in any home. Tremendous public acce nce has made possible today's great Gene Electric values. See the new models no at your nearest G-E dealer's showroom.

istinguished Family!

NOW A BIG 7 CU. FT. CAPACITY G-E REFRIGERATOR AT THE FORMER PRICE OF A G-E 6!

ALREADY G-E sales indicate that more families will buy General Electric Refrigerators in 1941 than in any other year in our history. Drop in at a nearby dealer's and you'll see why this big G-E buying wave has already started. Today you can buy a new General Electric—the preferred refrigerator—at a price many dollars less than ever before. *And these new 1941 G-E models are even better refrigerators, too!* You'll especially like G-E's new "Big 7". This big beauty gives you more storage space, all new advancements in food preservation, latest convenience features—*and sells at last year's price of a G-E 6!* Ask your neighbors how long and how well G-E Refrigerators serve. Then see the 1941 G-E models. Compare them with all other refrigerators. You'll find that model for model, size for size, and dollar for dollar—a General Electric is your best buy!

NEWS! About the New G-E Refrigerators

- ★ **NEW!** Lowest G-E prices in history—and easiest terms!
- ★ **NEW!** Beautifully styled all-steel cabinets are most attractive ever built—both inside and out.
- ★ **NEW!** Perfected Conditioned Air for sweetening of refrigerator air and keeping foods fresher, longer!
- ★ **NEW!** Built-in "Butter Box" keeps table butter in spreading condition.
- ★ **NEW!** Big dry-storage drawer that's easy to keep clean!
- ★ **NEW!** Top shelf that will hold as many as 11 full-quart milk bottles!
- ★ **NEW!** Sliding shelves of solid stainless steel—adjustable spacing!
- ★ **NEW!** Quick-freezing, easy-releasing ice cube trays!
- ★ **NEW!** Greater cold-producing capacity with less current than ever used by sealed-in-steel G-E Thrift Unit!
- ★ **NEW!** More than a dozen 1941 models with prices on big 6 cu. ft. family size Model LB6-41 as low as $114.95* including 5-year warranty on the hermetically sealed mechanism.

**This model does not have all above features. Local and state taxes, if any, additional. Prices slightly higher west and south and subject to change without notice. General Electric Co., Bridgeport, Conn.*

YOU SAVE THESE WAYS . . . with a Big 1941 G-E Refrigerator!

YOU SAVE AT THE STORE!

● G-E's generous, flexible storage space and perfected Conditioned Air for better food preservation permit you to purchase perishable foods in bigger quantities on special bargain days.

YOU SAVE IN THE KITCHEN!

● General Electric's 10 Star Storage Features permit you to keep fresh foods of every type and every kind (leftovers, too) for days and days without a penny-worth of waste. Budgets go farther!

YOU SAVE THRU THE YEARS!

● General Electric's original amazingly low operating cost continues year after year. The peerless performance record of the famed sealed-in-steel G-E Thrift Unit is unsurpassed for long-life economy.

"You'll Always Be Glad You Bought a G-E!"

at is he system, anyway? How t wo ? Why? Thompson walked into a dressing room, turned down his coat collar. Then he gave out with three words: "No jumble hockey."

First should come his system for training goalies.

"There are three special abilities a good goalie must develop," he said. "One is courage, one is correlating his eyes and hands so he's as fast at fielding as the best shortstop in the country. The third is figuring angles—angles on the shots that come rifling for the net."

If you watch Karakas or Brimsek at work in their nets, the system will be plain to you. Either one will risk almost certain mayhem diving into bright, sharp skate blades to make a stop. You'll see their right hands or left hands dart like a snake's strike to palm a flying puck. You'll see them whip their big stick blades into the line of the rubber almost before it's been shot. They get angles faster than a flier with a bomb sight.

That's the way Cliff Thompson trains goalies. Long before there's any ice in the fall, his backstop boys are hard at it. For hours, in a dry lot, they're out as targets for a firing line of shooters.

"What about line and defense players?" is the next question.

"In the first place," he answered, "my boys go down the ice *together*. Then they come back *together*. I won't let one of them stay down while the others go back. If one stays down, there's a hole in our defense when the other team comes our way. Individual starring is fine. Any boy can be an individual star if he has it in him and still play in teamwork. If my boys don't play teamwork, they don't play at all."

This sounded a little too simple, but there is more.

"Too many coaches teach jumble hockey," he went on. "They put one stick-handler and two fast skaters in the front line, or two stick-handlers and one speed merchant. That kind of a line means the boys can't possibly get down to the goal together.

"When the play or the condition of the other team demands stick-handlers, I put three stick-handlers in the forward line. Or if it's speed, I put in three fast skaters."

Thompson grew very serious in his explanation at this point. "First of all," he said, "every hockey player has to learn to skate and do it all the time. If he doesn't skate enough, he'll never go

"Get 'em young and teach 'em your way," is Coach Thompson's system. In the top picture he is superintending an unprofessional melee of Eveleth High School kids

PHOTOGRAPHED FOR COLLIER'S BY CARL ERMISCH

There's plenty of blackboard hockey as Eveleth youngsters grow up to top professional standards. Plays to cover almost every conceivable situation in hockey are diagramed and explained by Coach Cliff Thompson

For Mary has bad breath . . .
a condition
she condemns in others,
never suspects in herself.
It's a tragic mistake,
and a common one.
Even you may be guilty of it.
Remember, dentists say . . .

"Tests show that 9 out of 10 people have bad breath. That's why dentists recommend Colgate Dental Cream. For Colgate's active penetrating foam gets into the hidden crevices between your teeth . . . helps clean out decaying food particles and stop the stagnant saliva odors that cause much bad breath."

Don't you enjoy Colgate's
tangy flavor?
Aren't your teeth brighter,
more attractive?
And that penetrating foam—
how clean and refreshed
it makes your mouth feel!
Colgate's is the pleasant way
to combat bad breath!

Play Safe!
TWICE A DAY—
AND BEFORE EVERY
DATE—USE COLGATE
DENTAL CREAM

MAKES TEETH SPARKLE · QUICK AND FOAMY · DELICIOUS TASTE · POLISHES SAFELY · COMBATS BAD BREATH · CHILDREN LOVE IT

COLGATE RIBBON DENTAL CREAM

APPROVED BY GOOD HOUSEKEEPING BUREAU

to the big leagues. Canada has a big advantage over us there. They get a couple of months' more skating every year than we do. Maybe now that we're getting so many artificial ice plants the United States will turn out more big-league hockey players."

There's another antijumble process in Cliff's coaching system. He never played basketball, but he took a lot of leaves from the basketball coaches' books and put them in his private hockey manual. There are plays doped out and diagramed to cover almost every situation that arises in a game. When play stops for a face-off, the Eveleth lads glide to positions they know as well as they know their seats at the family dinner table. When play starts, they skate, pass and shoot by the blackboard.

Cliff Thompson is forty-five and doesn't look it. You couldn't tell from his appearance that he's been bringing up hockey teams from babyhood for fourteen years. That's another part of his system. A nine-year-old stopped him on the street and said he was told Cliff wanted to see him.

"I couldn't remember anything about him," Thompson said, "so I asked his name and what it was about.

" 'I'm Freddy Gangrich,' he told me, 'and Mickey Hohalla said you're looking for a forward line.' 'Sure I am,' I said, 'I'm always looking for a line.'

" 'Well, I've got one,' he told me. 'It's me and Mickey and Johnny Pula. When can you give us a look?'

"What's more, he had one. First chance I had, I looked 'em over. The first year I was at Eveleth, I coached sixteen little kids' teams in addition to the school teams. I could bring 'em up in the right style, so they wouldn't need so much coaching in high school. Later, I cut down to six kids' teams, but I'm handling as many as I can this year. It pays."

A Record to Be Proud Of

Born in the hamlet of Lyle, Minnesota, Thompson settled with his parents in Minneapolis when he was nine. The new home was only a block from Nicollet ball park of the Minneapolis Millers. Before he was fifteen, he was bat boy for the Millers, and there developed a mutual worship between him and the team. He studied baseball more than he ever studied his lessons at school.

About this time, Cliff got some unique training on ice skates. Norval Baptie and Norris Wood, pre-World War speed champions, had a rink flooded in Nicollet park so they could practice in seclusion. Cliff spent, every spare hour with them, grinding round and round the track on workouts, long and sprints.

king in the pleasant landscape.
ing not a single thought to
pening under that long bonnet
in front.

ou shouldn't; driving an auto-
uld be a satisfaction, not a job.

's what's going on:

the single, compromise-size
you find on most cars, this
EBALL eight with Compound
n* has *two* good mixers on

Each one is smaller than average, more efficient and thriftier.

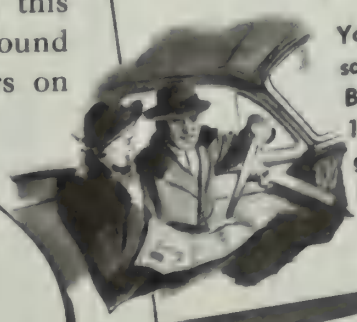
A single one of them—the front one—handles all your normal carburetion needs in frugal fashion—keeps you rolling smoothly, easily, quietly, on the very minimum rationing of gasoline.

But the other carburetor is alert and ready for any sudden need. Just tramp down on that accelerator pedal—it goes into instant action.

What for? To give you more fuel and more power for any emergency purpose!

To swing you up a tough hill without slacking pace—to swoop you around slow trucks with sudden power—to let you take advantage of long, open stretches where timesaving is possible.

It's almost like having *two* engines—one to handle normal requirements thriftily, another to team up with the first for extra oomph and wallop when you want it.



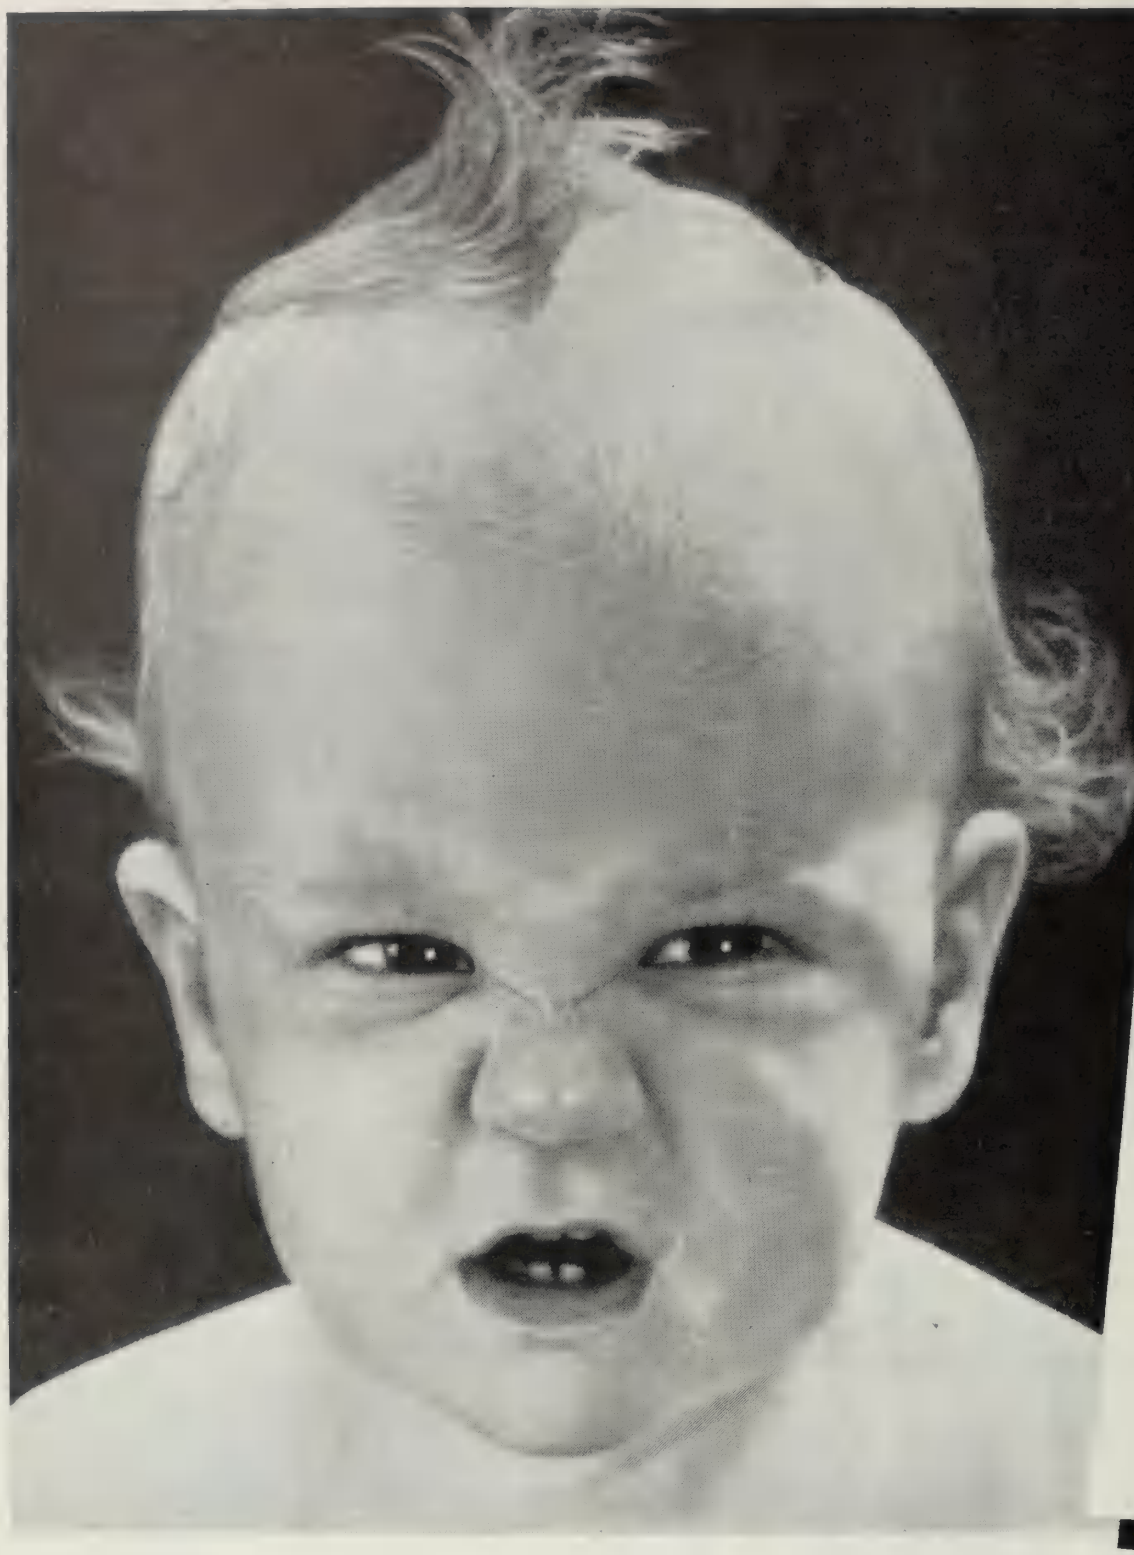
That kind of teamwork pays.

It's more *lively,* more *thrilling,* more *satisfying.*

And owners by the thousand will tell you *it's more economical too*—as much as 10% to 15% more economical.

If you haven't experienced what it feels like to have that under the bonnet of your automobile, better go have that Buick demonstration now.

ADDS A SEVENTH TO YOUR MILEAGE



You can plan longer trips on the same gas budget in this year's Buick! Owner reports reveal 10% to 15% more miles per gallon from the Buick FIREBALL Eight with Compound Carburetion than the same size Buick engine gave them last year.

*Standard equipment on all Buick SUPER, CENTURY, ROADMASTER and LIMITED models, available at slight extra cost on all Buick SPECIAL models.

BUICK PRICES BEGIN AT

In a small town in Austria poverty doesn't force upon one the indignities that it does in a large city. There are no slums and no serious overcrowding. I do not know the exact income of the Hitler family, but being familiar with the scale of government pensions I should estimate it at $25 a month. This small sum allowed them to live quietly and decently—unnoticed little people in an out-of-the-way town.

Their apartment consisted of three small rooms in the two-story house at No. 9 Bluetenstrasse, which is across the Danube from the main portion of Linz. Its windows gave an excellent view of the mountains.

My predominant impression of the simple furnished apartment was its cleanliness. It glistened; not a speck of dust on the chairs or tables, not a stray fleck of mud on the scrubbed floor, not a smudge on the panes in the windows. Frau Hitler was a superb housekeeper.

The Hitlers had only a few friends. One stood out above the others; the widow of the postmaster who lived in the same house.

The limited budget allowed not even the smallest extravagance. We had the usual provincial opera in Linz: not good, and not bad. Those who would hear the best went to Vienna. Seats in the gallery of our theater, the *Schauspielhaus,* sold for the equivalent of 10 to 15 cents in American money. Yet occupying one of these seats to hear an indifferent troupe sing Lohengrin was such a memorable occasion that Hitler records it in Mein Kampf!

For the most part the boy's recreations were limited to those things which were free: walks in the mountains, a swim in the Danube, a free band concert. He read extensively and was particularly fascinated by stories about American Indians. He devoured the books of James Fenimore Cooper, and the German writer Karl May—who never visited America and never saw an Indian.

The family diet was, of necessity,

"I te that commentator—he's so unbiased in favor of Britain"

How's your "Pep Appeal"? —by Williamson

Playwright: He says the play hasn't any "whoosh." Now what does *that* mean?

Wife: No "oomph," my crestfallen celebrity. No zip. No pep appeal. And neither has its author! *Now* maybe you'll listen to me about neglecting your *vitamins!* You've got to have them all, you know, and we're making a start right now.

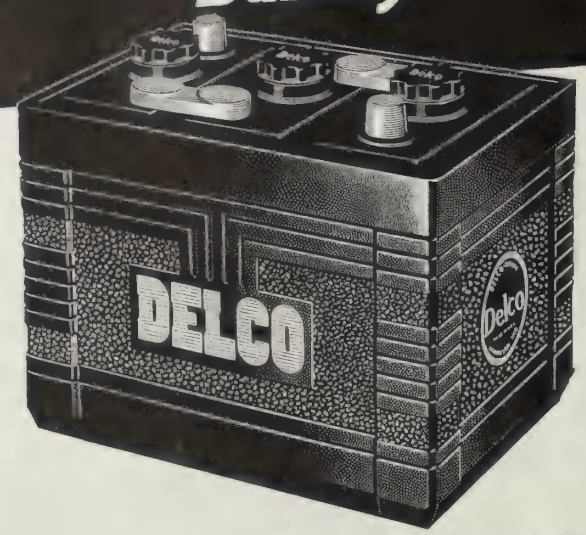
Wife: Lesson number one is crisp, delicious KELLOGG'S PEP. It's extra-rich in the two vitamins that are least abundant in ordinary diets—vitamins B_1 and D.

Playwright: Say! Why didn't you tell me PEP *tastes* so good? You've been holding out on me! Why, it's marvelous!

Playwright: (sometime later) And now, my dear, that I've discovered vitamins and KELLOGG'S PEP, just watch me become the world's "pep appeal" playwright. Why, Shakespeare himself would be green with envy to read the masterpiece I've started here.

Wife: You know what they say: "Where there's pep, there's hope."

Vitamins for pep! Kellogg's Pep for vitamins!



Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

Replace with a

DELCO

Battery

Let owners' experience GUIDE you

In Delco-Remy's files are hundreds of unsolicited letters* from men and women who have been so well satisfied with the Delco battery in their cars that they have taken the time and trouble to write about their experience. Here are some of the comments: ". . . Four years of service and has never been out of the car . . ." " . . . Has not failed me once in 40,000 miles . . ." " . . . The best battery I have ever owned!" That is the kind of satisfaction you want in your battery.

*Copies of letters quoted from are available to anyone.

Let leading engineers DECIDE you

As original equipment in more than 43 per cent of all new cars sold, Delco batteries have been approved by America's leading automotive engineers—for sure starting, for dependability, and for long battery life. Let the expert opinion of these battery-wise men decide your choice: Replace with a Delco battery.

Delco batteries for every make and model automobile are available through 30,000 Delco battery dealers in every section of the United States. Delco batteries are distributed nationally under the direction of United Motors Service.

PRODUCT OF Delco-Remy

World's Largest Manufacturer of Automotive Electrical Equipment

simple and rugged. Food was cheap and plentiful in Linz; and the Hitler family ate much the same diet as other people in their circumstances. Meat would be served perhaps twice a week. Most of the meals they sat down to consisted of cabbage or potato soup, bread, dumplings and a pitcher of pear and apple cider.

For clothing, they wore the rough woolen cloth we call *Loden*. Adolf, of course, dressed in the uniform of all small boys: leather shorts, embroidered suspenders, a small green hat with a feather in its band.

A Remarkable Mother Love

What kind of boy was Adolf Hitler? Many biographers have put him down as harsh-voiced, defiant, untidy; as a young ruffian who personified all that is unattractive. This simply is not true. As a youth he was quiet, well-mannered and neatly dressed.

He records that at the age of fifteen he regarded himself as a political revolutionary. Possibly. But let us look at Adolf Hitler as he impressed people about him, not as he impressed himself.

He was tall, sallow, old for his age. He was neither robust nor sickly. Perhaps "frail looking" would best describe him. His eyes—inherited from his mother—were large, melancholy and thoughtful. To a very large extent this boy lived within himself. What dreams he dreamed I do not know.

Outwardly, his love for his mother was his most striking feature. While he was not a "mother's boy" in the usual sense, I have never witnessed a closer attachment. Some insist that this love verged on the pathological. As a former intimate of the family, I do not believe this is true.

Klara Hitler adored her son, the youngest of the family. She allowed him his own way wherever possible. His father had insisted that he become an official. He rebelled and won his mother to his side. He soon tired of school, so his mother allowed him to drop his studies.

All friends of the family know how Frau Hitler encouraged his boyish efforts to become an artist; at what cost to herself one may guess. Despite their poverty, she permitted him to reject a job which was offered in the post office, so that he could continue his painting. She admired his water colors and his sketches of the countryside. Whether this was honest admiration or whether it was merely an effort to encourage his talent I do not know.

She did her best to raise her boy well. She saw that he was neat, clean and as well fed as her purse would permit. Whenever he came to my consultation room this strange boy would sit among the other patients, awaiting his turn.

There was never anything seriously wrong. Possibly his tonsils would be inflamed. He would stand obedient and unflinching while I depressed his tongue and swabbed the trouble spots. Or, possibly, he would be suffering with a cold. I would treat him and send him on his way. Like any well-bred boy of fourteen or fifteen he would bow and thank me courteously.

I, of course, know of the stomach trouble that beset him later in life, largely as a result of bad diet while working as a common laborer in Vienna. I cannot understand the many references to his lung trouble as a youth. I was the only doctor treating him during the period in which he is supposed to have suffered from this. My records show nothing of the sort. To be sure, he didn't have the rosy cheeks and the robust good health of most of the other youngsters; but at the same time he was not sickly.

At the *Realschule* young Adolf's work was anything but brilliant. As author-

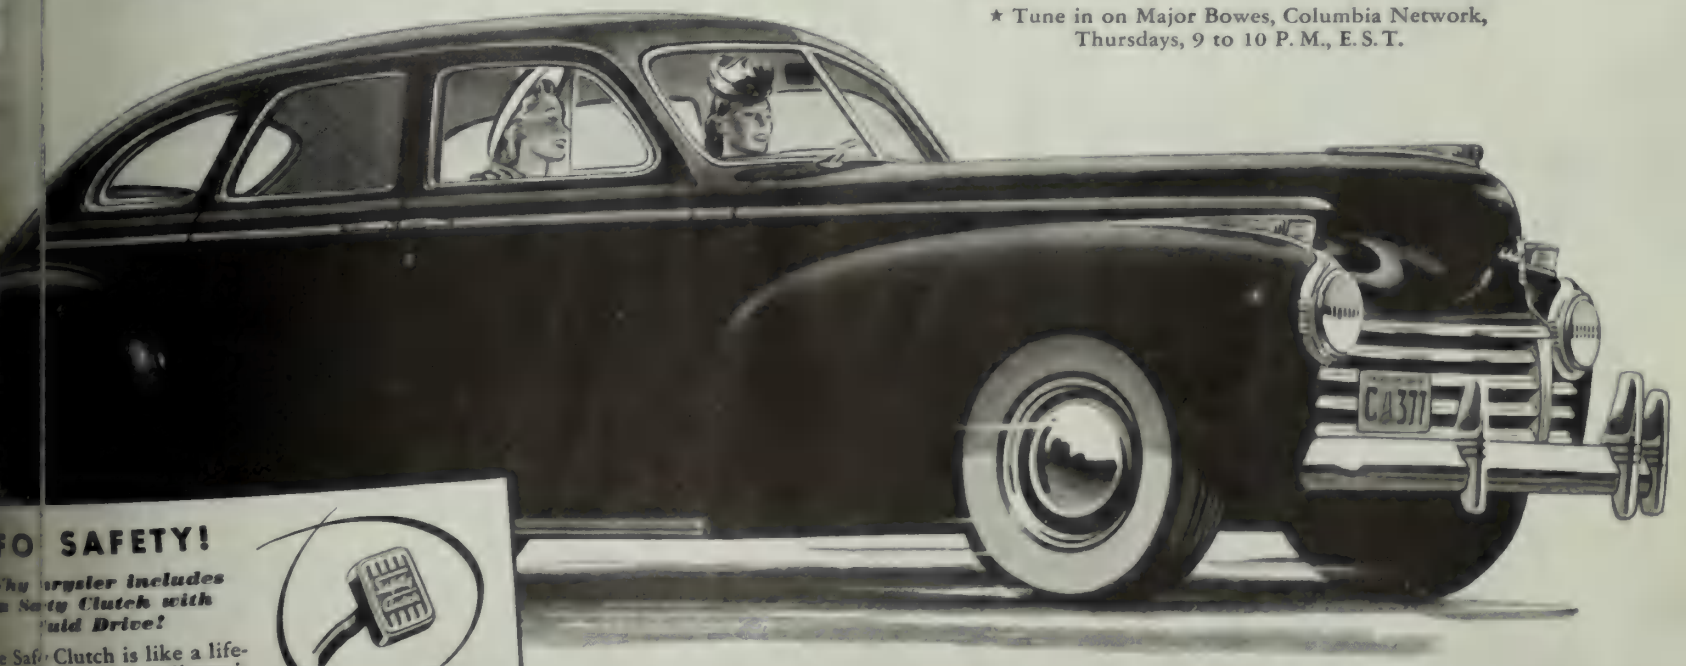
When are You going to try Chrysler's Fluid Driving?

"... I had heard about *Fluid Drive* . . . who hasn't? But I didn't know it was so wonderful until we got our new Chrysler!

"... Chrysler has so much power, you just put it in 'high' and start anywhere . . . it pulls out of snow banks and mud holes . . . climbs . . . dashes away from a standing start . . . travels all day without touching clutch or gearshift!

"... course *Fluid Drive* is the magic that enables you to do all these . . . but it's the enormous power of that Spitfire engine that gives it extra thrill.



"... says that the Vacamatic transmission has something to do with it, too . . . it changes the power ratios, or something, like the variable-pitch propellers on a plane.

"Anyway, it's perfectly amazing that so much power can be so smooth and silent . . . and so economical!

"Why shift gears . . . when *Fluid Driving* is so much simpler, smoother, and easier? The minute you drive a Chrysler, you'll agree with me that there is no substitute for *Fluid Drive* . . . there just isn't anything in the world like it!

"I don't see how anybody can afford to buy any new car without seeing and driving a Chrysler!"

★ Tune in on Major Bowes, Columbia Network, Thursdays, 9 to 10 P. M., E. S. T.

FOR SAFETY!

Why Chrysler includes a Safety Clutch with Fluid Drive!

The Safety Clutch is like a life-preserver on ship. You will use it very seldom, but you're mighty glad to have it when you need it. A very valuable safeguard for parking . . . for maneuvering your car in close quarters or dangerous places!

BE MODERN ...WITH FLUID DRIVE—

Buy Chrysler!

"I'LL BE SAFER ON *Pullman* THAN YOU TWO AT HOME!"

IT DOES NOT PAY to take unnecessary travel risks, when Rail-Pullman offers you the safest fast transportation in the world! . . . It does not pay to trust your safety to the whims of the Weather Man.

Day-and-night, winter-and-summer, Rail-Pullman speeds Mr., Mrs. and Young America on their way—comfortably, safely!

Snow, fog, ice and storm don't worry you if you hold a Pullman ticket! All they change is the scenery out your Pullman window.

So go the safest way! The way that provides you with more comfort, more security and conveniences than any other form of travel. The way that provides you with so much more for your travel dollar.

So, go Pullman next time and get there feeling fit. And get home safely!

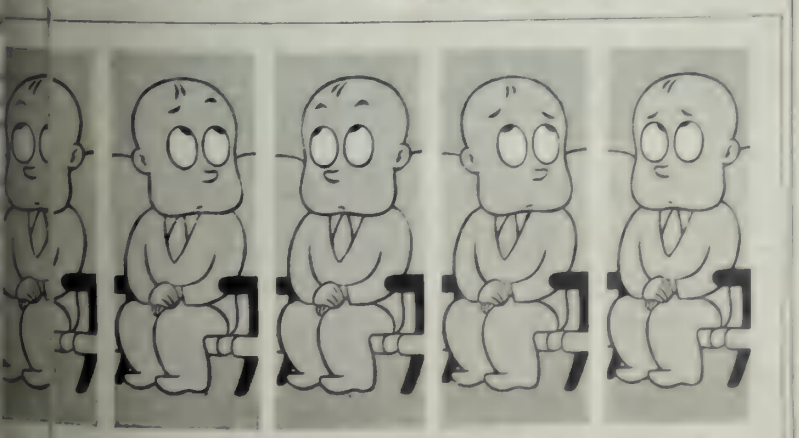
y of December 20, 1908, I
ls. The end was approach-
ted this good woman to be
le as I could make her. I
whether she would live
k, or another month; or whether death would come in a matter of hours.

So, the word that Angela Hitler brought me the following morning came as no surprise. Her mother had died quietly in the night. The children had decided not to disturb me, knowing that their mother was beyond all medical aid. But, she asked, could I come now? Someone in an official position would have to sign the death certificate. I put on my coat and drove with her to the grief-stricken cottage.

The postmaster's widow, their closest friend, was with the children, having more or less taken charge of things. Adolf, his face showing the weariness of a sleepless night, sat beside his mother. In order to preserve a last impression, he had sketched her as she lay on her deathbed.

I sat with the family for a while, trying to ease their grief. I explained that in this case death had been a savior. They understood.

In the practice of my profession it is natural that I should have witnessed many scenes such as this one, yet none of them left me with quite the same impression. In all my career I have never seen anyone so prostrate with grief as Adolf Hitler.



I did not attend Klara Hitler's funeral, which was held on Christmas Eve. The body was taken from Urfahr to Leonding, only a few miles distant. Klara Hitler was buried beside her husband in the Catholic cemetery, behind the small, yellow stucco church. After the others—the girls, and the postmaster's widow—had left, Adolf remained behind; unable to tear himself away from the freshly filled grave.

And so this gaunt, pale young man stood alone in the cold. Alone with his thoughts on Christmas Eve while the rest of the world was gay and happy.

A few days after the funeral the family came to my office. They wished to thank me for the help I had given them. There was Paula, fair and stocky; Angela, slender, pretty but rather anemic; Klara and Adolf. The girls spoke what was in their hearts while Adolf remained silent. I recall this particular scene as vividly as I might recall something that took place last week.

Adolf wore a dark suit and a loosely knotted cravat. Then, as now, a shock of hair tumbled over his forehead. His eyes were on the floor while his sisters were talking. Then came his turn. He stepped forward and took my hand. Looking into my eyes, he said: "I shall be grateful to you forever." That was all. Then he bowed. I wonder if today he recalls this scene. I am quite sure that he does, for in a sparing sense Adolf Hitler has kept to his promise of gratitude. Favors were granted me which I feel sure were accorded no other Jew in all Germany or Austria.

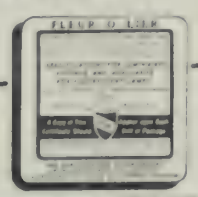
The second of Dr. Bloch's articles will appear next week.

Movies: Front Row

As swiftly as that, they're springing up . . . those new factories needed to build airplane motors, tanks, planes, guns and other defense items. They're the latest word in scientific factory construction. They're marvels of efficiency, safety and low-cost operation. Perhaps this is why, in many such plants, products will be . . . .

. . . made FASTER and BETTER with the help of

G-E Fluorescent Lighting!



For this amazing new lighting has already proved itself. Properly installed★ G-E Fluorescent Lighting delivers new high levels of light . . . *fifty foot-candles and more* . . . that help people see better, work better, feel better. It's cooler. It's low in brightness. It's the next thing to having a layer of daylight hung from the ceiling . . . to speed production . . . decrease spoilage. You can use it 24 hours a day . . . and the cost is surprisingly reasonable. No wonder everyone is talking about G-E Fluorescent Lighting!

It has swept into stores and offices, too! Because fluorescent lighting with G-E MAZDA "F" (fluorescent) lamps offers a *practical* way to have lots more light, along with modern styling, to attract customers, speed sales, step up efficiency, reduce eyestrain. It is *doing* things in corner bakery and big office building alike.

How can it help you?

Why not see what fluorescent lighting can do to help *your* business? ★Ask your local electric service company or G-E MAZDA lamp distributor to tell you about lighting fitted to your needs, with G-E MAZDA "F" lamps . . . the kind *made to stay brighter longer.* They now cost less than ever!

NEW LARGER DISCOUNTS on purchases of G-E MAZDA lamps (all types)
$5.00 and up to $15.00 list . . 20%.
$15.00 and over, list . . . . 25%.
See your G-E MAZDA lamp supplier.

G-E MAZDA "F" lamps are recommended for use only in equipment having high power factor, such as that marked by this label or the RLM label.

For top performance from this new lighting, be sure to get certified fixtures, bearing the FLEUR-O-LIER label, shown here, or the RLM label. These lighting units, together with their ballasts and starters, when certified by Electrical Testing Laboratories to comply with exacting specifications, assure you of balanced, satisfactory service. Because certification is open to any manufacturer whose product meets these standards, you have a wide choice of styles.

G-E MAZDA LAMPS
GENERAL ELECTRIC

I've checked the financing cost; the insurance we get — and what we pay for it; and the payment arrangements convenient to us. Then I figured out the total cost myself! There! You see! We figure our own time payment plan and save money, too.

WHY don't you also figure the cost yourself *before you buy!*

Just send the coupon below for your GMAC Figuring Chart. It gives you the whole financing-and-insurance story in *dollars and cents* . . . shows exactly what you get for what you pay. In a few minutes you can figure just what the cost will be to you — based on the number of months you want, and the amount you wish to pay each month.

Then, compare the General Motors Instalment Plan with others you may have thought cost less. Notice especially the broad insurance protection for your car included in this plan. It won't take you long to see just where and how you save!

So fill out and mail the coupon below. See your General Motors dealer. This plan is available only through dealers in Chevrolet, Pontiac, Oldsmobile, Buick and Cadillac cars.

Hustling Hal

Continued from page 20

This was a blow because Wallis and his assistant, Graham Baker (now the rear end of the Towne-Baker outfit) had made some good pictures: Little Caesar, Dawn Patrol, Five Star Final and Sally. At any rate, Wallis swallowed his Adam's apple in chagrin, tried his best to hide his tears and became a supervisor, a position no decent American would take on a bet. However, it turned out well because Zanuck finally had a row with the Warners and went over to Twentieth Century-Fox. That was in 1934 and Wallis was given the big office again and has been there ever since.

But that still doesn't account for Wallis or for Warners. For years they made a series of stinkerolas, interlarded by such hard-hitting pictures as I Am a Fugitive from a Chain Gang and One Way Passage. Then suddenly they began making Pasteur, Zola, Juarez, Dr. Ehrlich.

When Jack Warner and Wallis started east in 1935 to tell the Warners' sales conference that one of the big productions of the next year was to be the life of Louis Pasteur, they were afraid to announce the title. They thought first of calling it The Death Fighter but when that hard-faced mob kept looking at them Jack lost his courage.

"One of our big ones for next year, boys, will be Paul Muni in The Fighter."

Hoo-ray! they howled. Muni in an action picture at last!

But they sold Pasteur and they sold the other "quality" pictures and in between they got rid of the others, the smash-bang babies that are centered around Alcatraz and Sing Sing and teach a good moral lesson that crime doesn't pay anybody but the Warners.

That's How Movies Are Made

Just what it means to keep a schedule going—and that is the job of Wallis—was shown last spring. Paul Muni was in New York doing a play: John Garfield had been suspended for refusing to take a part he didn't like and after that was settled he also headed for Broadway: Olivia de Haviland was answering no phone calls until she got the type of role she wanted: Gail Page was under suspension: Geraldine Fitzgerald was threatening to have a baby any minute. At this juncture Jeffrey Lynn also felt that life was treating him badly. He went down to Palm Springs, looked gloomily at a typewriter for two days and finally got off a thirteen-page, single-spaced complaint to Wallis. Hal wired him right back.

"It's great! Add two more pages and we'll buy it!"

Those recurrent battles are a distinguishing characteristic of the Warner establishment. At some time or other every actor in the place has been at odds with the management. That would seem to indicate a permanent state of feud that could only be fatal to production but it doesn't seem to work out that way. After a week or two of statements that make it appear only sudden and brutal death will suit either party, they get together, arrange matters, kiss all around—and start out again to make a pretty good picture. Generally at the exact spot where the fight broke out.

Wallis is one of the least-known men in Hollywood. He stays on his farm at Van Nuys. By selling walnuts and oranges, he can meet the taxes. For the rest, he is slightly mad about his boy Brent and is still living with his first wife. He is a dark-haired, thickset man of six feet and he gets his exercise from swimming. His steady friends are Paul Muni, Mike Curtiz, Henr liam Dieterle, Erich George Brent. When t right in Van Nuys, he w a letter. He goes horset ery Saturday with Blan which is said to be a sigh his gang goes bowling. I: complain, he'd have ste for dinner.

His romance with L came to a head rapidly star and he was a punk publicity department t asked for a date and ca her in an old Model T F top and the right front stay shut, so between b and holding the door, chance to protest. ★★★ IN THE FRONT OF OUR AIR DEFENSE ★★★

In the Army's famed fighter planes — the Bell Airacobra, the Lockheed P-38 Interceptor and the Curtiss P-40 — there's an Allison liquid-cooled engine whose in-line design helps make them the fast, fit fighters they are.

This advanced air power is the product of the American Aircraft Industry in collaboration with the U. S. Army—both pledged to the duty of arming us best.

Allison

DIVISION OF
GENERAL MOTORS

BEHIND THOSE WORDS, there is much more than just good wishes. A whole science of navigation by air is also on the job, to deliver that "happy landing."

The pilot's instrument board bristles with delicate devices that eliminate guesswork, outwit the weather, bring his ship in on its precision schedule. Behind the scenes, but indispensable, is the storage battery—providing power for the plane's radio, navigation instruments, cabin, position and landing lights.

If leading airlines, the Army and Navy, and private plane operators seeking the utmost in safety and dependability, can entrust these services to Exide Batteries, you can rely on Exide to start your car. Before you buy *any* battery, however, have your present one tested on the Exide Sure-Start Tester. This scientific instrument will reveal its true condition. The test is free—wherever you see an Exide Dealer Sign.

and a little poise . . . and be a credit to your father."

Then he relented, grinned and patted the top of my head with a gentle and lordly tolerance. "You're all right, Sis," he said. "But stop worrying—or you won't grow to be a big girl!"

And then he walked out on me.

Dolores appeared from her listening post behind the pantry door. "That is much man, much, Señorita!" she said in Spanish. "What distinction . . . so tall . . . so brave! I think he is interested."

"Oh, indeed?"

"I would not deceive you."

"Not really?"

"When they pat you on the head, it is a good sign. It shows respect and control of the emotions. I am well pleased."

"It's good to know that."

"He thinks you are a child. If he could but see—"

"You go wash the dishes. Scat!"

By the time my father got home, I had worked myself into a fine state of nerves over Savvy Roberts. The skipper was no help at all. He marched in looking as if the world had collapsed.

"Lieutenant Roberts came back to tell me about the prowler," I said.

My father nodded. "I'm afraid Kirstell is right," he said. "We do have a traitor here."

"Just some tramp, wasn't it?"

"No. Whoever it was had been trying to tunnel under the fence. Right at the basin."

"Then it's known—about Sav—Lieutenant Roberts?"

"Obviously."

Sighing, my father sank into a chair. He looked old and tired. "Don't think I've ever had a service matter affect me like this, Phyl," he said. "It's damnable. I can't put a decent face on the thing. Can you imagine *any* man on this station guilty of treason?"

"No, sir," I said.

"I—I think I'd like a whisky and soda."

I got it for him. It was the first drink of liquor, ceremonial occasions excepted, I had ever seen him take.

"An able lad, young Roberts," he said, out of a tense silence. "I know what fascinates him with treason. It's an unexplored field. I've been trying to think if anyone has written an intelligent study of a traitor. Don't recall a single commentary on the subject. Murder . . . and all the other crimes . . . yes, a whole library on each one. Why does a man betray his country? And why should a man want to betray *this* country? Except for England, it is the one last hope on earth."

I WAS too upset to be patient with philosophical musings. I knew my father. He was going to try to escape into a series of bitter and literary monographs on treason. He would set case histories up in his mind—from false Sextus to Benedict Arnold and Sir Roger Casement—and seek to prove from lack of analogy and contradictions that none of *his* officers could be guilty. In the meantime, Lieut. Commander Kirstell would be ferreting out our traitor, and Savvy Roberts might—

"Listen, Dad—" I said.

"Eh? Yes?"

"I think you should tell Lieutenant Roberts about this!"

"Roberts? Oh, no."

"Why not?"

"Kirstell won't hear of it. Said you had mentioned the idea. Very emphatic in rejecting it."

"You're commanding this station."

"I'm bound to follow h dear."

"And let them kill Lie erts?"

My father set his glas clink. "How much has you?"

I explained what I knew his work. I also pointed o Pat and Dutch were the p tims of any dirty tricks attempted. Tonight's p basin was patent evidenc manded to know if it wa not to warn them of a de cific danger. It is one th take routine precautions ferent matter to be o against a traitor in you so emphatic and so dead my father looked a little

"If I didn't know that are so much interested i might think—" he broke ture dismissing the idea said. "I hope Kirstell an ing to regret our decision

ALL CARS ALIKE ?
NOT ON YOUR TINTYPE !

JUST DRIVE THE GREATEST PERFORMER OF THEM ALL

1941 HUDSON

The big, 92-horsepower Hudson Six Touring Sedan pictured above is one of the lowest priced sedans on the market

DIFFERENT IN 5 IMPORTANT WAYS!

① All Cars Alike In SAFETY?

If they are, how is it that Hudson won the 1941 Safety Engineering Magazine Award (pictured at right) for safest body design—with the *first perfect score ever recorded?* How is it that Hudson alone has finest hydraulic brakes *plus* a reserve mechanical system *working automatically from the same foot pedal* if ever needed? Just one of many great safety features you'll find only in AMERICA'S SAFEST CAR!

② All Cars Alike In EASY DRIVING?

Forget the clutch pedal! Just try driving a Hudson with Vacumotive Drive! *Go, stop, back up—without ever touching the clutch pedal!* Costs less than any other feature that completely eliminates clutch pedal pushing*, and no other car priced so low as the new Hudson Six offers anything like it. And while you're at it, see how much easier driving is with Hudson's true Center-Point Steering and new Synchronized Silent Mesh Transmission!

**Only $27.50 extra, installed at factory.*

③ All Cars Alike In BEAUTY?

Take a look at *Symphonic Styling*—the big new style idea you can get *only* in a Hudson! Here's the first low priced car that ever offered a choice of beautiful interior color combinations that harmonize with exterior colors (even to such details as carpets and floor mats) *—at no extra cost.* No wonder Hudson owners are a mighty proud bunch of people!

④ All Cars Alike In COMFORT?

Ride on Hudson's improved type of independent front wheel coil springing—and *feel* the difference! Discover the luxury of Airfoam Seat Cushions—available in all 1941 Hudsons, standard in many. And year-round comfort with Hudson's Weather-Master—warm in winter, cool in summer, no drafts, no fogged windows, no drowsiness from stale air.

⑤ All Cars Alike In ECONOMY?

If they were, how could a big 92-horsepower Hudson Six win in its price class in the 1941 Gilmore Grand Canyon Economy Run—*with more miles per gallon than any other entry in the run except two short-wheelbase, low-powered cars in another price class?* For brilliant performance with year-after-year economy, you can't beat Hudson—holder of nearly 150 *official* performance and endurance records.

Gilmore Grand Canyon Economy Trophy

LOWEST PRICE IN AMERICA
FOR ALL THIS SIZE AND POWER

You'll be astonished at the low price for which the nearest Hudson dealer can deliver a big, beautiful 1941 Hudson (Six or Eight). See him—for a deal you can't afford to miss!

And remember:

HUDSON PRICES START IN THE *LOWEST* PRICE FIELD

From its 31 years of engineering leadership, Hudson brings you the richly luxurious new Commodore models, finest cars ever to wear the Hudson nameplate . . . the brilliant new Super-Six . . . and the new Hudson Six in the lowest price field. A new high in automobile value in every important price class. Come for a look . . . go for a ride . . . today!

You'll like yeast this new way

JERRY: You've got a world of the old ziparoo today! Been eating yeast again?
HAZEL: No . . . drinking it! Fleischmann's Yeast in tomato juice is the most delicious drink of the year!

JERRY: I knew it! I recognize all the symptoms. I felt high, too, when I was eating yeast. But I never learned to like it.
HAZEL: Well, you can join our ranks again now, with pleasure and profit! Yeast in tomato juice has the flavor of oven-fresh bread, and mixes quickly. You can stay with it now . . . as people should do to get all the benefits.

JERRY: You're telling *me* about the benefits! I know what the authorities say is right: "Yeast is one of the richest natural sources of the amazing vitamin B complex."
HAZEL: Well, maybe you're not getting enough of these vitamins. Drink yeast first thing in the morning, last thing at night . . . Perhaps it will get you into the U.S.F.P., the Union of Swell-Feeling People!

MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's *Fresh* Yeast

Copyright, 1941, Standard Brands Incorporated

DRINK IT . . . TO YOUR HEALTH!

ute lecture on duty. By agreeing to help Lieut. Commander Kirstell I had unofficially joined the Navy and must consider myself as much under the compulsion of unquestioning obedience as any man in the service. My word of honor was pledged not to reveal the secret of Kirstell's mission to anyone, unless he released me. This was no time for personalities, no time for feminine emotion. If every officer at Navy Station should be killed, one by one, I would still be required to say nothing. Did I understand that?

"Yes, sir," I said. "Good night, Dad."

My father jumped to his feet and walked to the door with me, his arm about my shoulders.

"I'm sorry I got you into this, Phyl," he said, gruffly; "but Kirstell insisted and I couldn't refuse full co-operation. You realize that, eh?"

"Of course," I said. "Don't let it get *you* down, Skipper."

"That's my girl! Thumbs up, eh?"

"Right."

I KISSED him good night and went upstairs to bed. But, looking back on it now, I can see that I had not been convinced of the wisdom and necessity of Kirstell's attitude. I was resentful and rebellious. I thought of Savvy and Dutch and Pat camping on their job in those army tents at the basin. Mostly, I thought of Savvy. What was our traitor planning to do to him? What would happen when Savvy started running tests of that rocket thingamajig of which Chief Nardin was so skeptical? And who was this traitor . . . who *was* he? Which man who had lived and worked with us on terms of intimate friendship actually hated us and his country? (Clinical Note: These are not thoughts that make for sound sleep. I got about two hours of intermittent dozing.)

Bright and early the next morning, things began to pop. Dolores announced Mamie Cowles, wife of Lieutenant Bob Cowles. I had just finished my breakfast.

I think I have described Mamie as Navy Station's "most vulnerable" wife. She was a frail, clingy, weepy, whiny ash blonde and reveled in it. She worked on the theory that our Mamie either had been or was about to be done wrong by; that it was no fault of hers people were such villains; and that the best way out of any trouble was to sit in a corner and wait—a man would be right over to help.

There being no man in our living room, just at the moment, Mamie was standing dramatically with a letter in her hand.

"Hello, Mamie—what can I—"

"This! Look at it!"

She held out the letter.

"You mean . . . I'm to read it?"

"Yes!"

The missive was typewritten on a single sheet of paper and unsigned. It read:

"You had better leave Jack alone. He has friends who can queer your little game. A word to the wise should be sufficient. A word to Captain Hartney would be worse."

I thought I detected the heavy Brooklyn hand of Mrs. Briscoe. But the code called for me to be disgusted and indignant.

"You're not upset about *this*, Mamie?" I said.

"It's horrible, Phyllis!" Mamie cried. "Who could be thinking such dreadful things of me?"

"I can't imagine," I said. "Throw it in the fire and forget it."

Mamie was living proof that you can take all the old clichés and make them work, simply by the process of believing in them hard enough.

"It's so *ugly*," she said.

"Yes."

"It—it sullies something
"What's that?"

ow. it was, and he absorbed all the Communist doctrine while living in capitalist luxury, and his natural contrariness fed upon disapproval. Had he gone direct to Russia, where everyone theoretically would have agreed with him, Bert might have turned into an orthodox conservative. And maybe—perhaps this is merely wishful thinking—the Bolshies would have shot him.

"Hi-yah, Bert!" I said.

"Hullo, Red."

"Welcome home!"

"Ha!" Bert said. "Home sweet home."

"Come on, give us a smile."

"Pop won't even speak to me."

"No?"

"You haven't changed much. Married yet?"

"Not yet."

"I hear it won't be long now."

"Mom's just guessing."

"If you've fallen for Collins, you're a dope."

"Yes?"

"But then, you always were a dope."

"Thanks, Stinky."

"Quite a babe, though."

"Gee whiz!"

The trouble with stinkers is that they always have at least one redeeming trait. Bert's was a certain sharp, grimy, alley-urchin rebelliousness—a dogged, head-down determination to ram stone walls and fly in the face of all the creeds. This would have seemed only sinister in a physically powerful specimen, but it was pathetic and somehow appealing in Bert. He was short, lightly built and had a mop of kinky brown curls atop a childish, angelic face. A stranger, meeting him, would guess that he had been kicked around by cruel parents in his boyhood and suppose that his cantankerousness was due to psychic compensation.

"Definitely a babe," said Bert, solemnly, "and going to throw yourself away on a pretty boy in a uniform. All you want is a row of brass buttons and to stay in the damned Navy. Sometime when I'm feeling better, I'll tell you about Collins. But go away now. I'm an undutiful son and a nasty boy and I hate everybody's guts, including your own graceful viscera."

I sat down on the steps. "Are you *always* going to be such a stinker, Bert?"

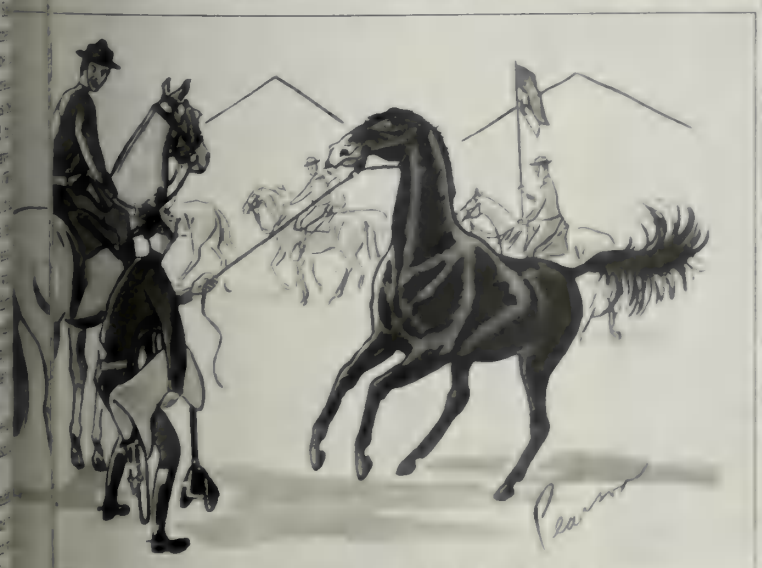
"I'm not going to war, if that's what you mean."

"A conscientious objector, hunh?"

"Right!"

"Just because it hurts your father and mother."

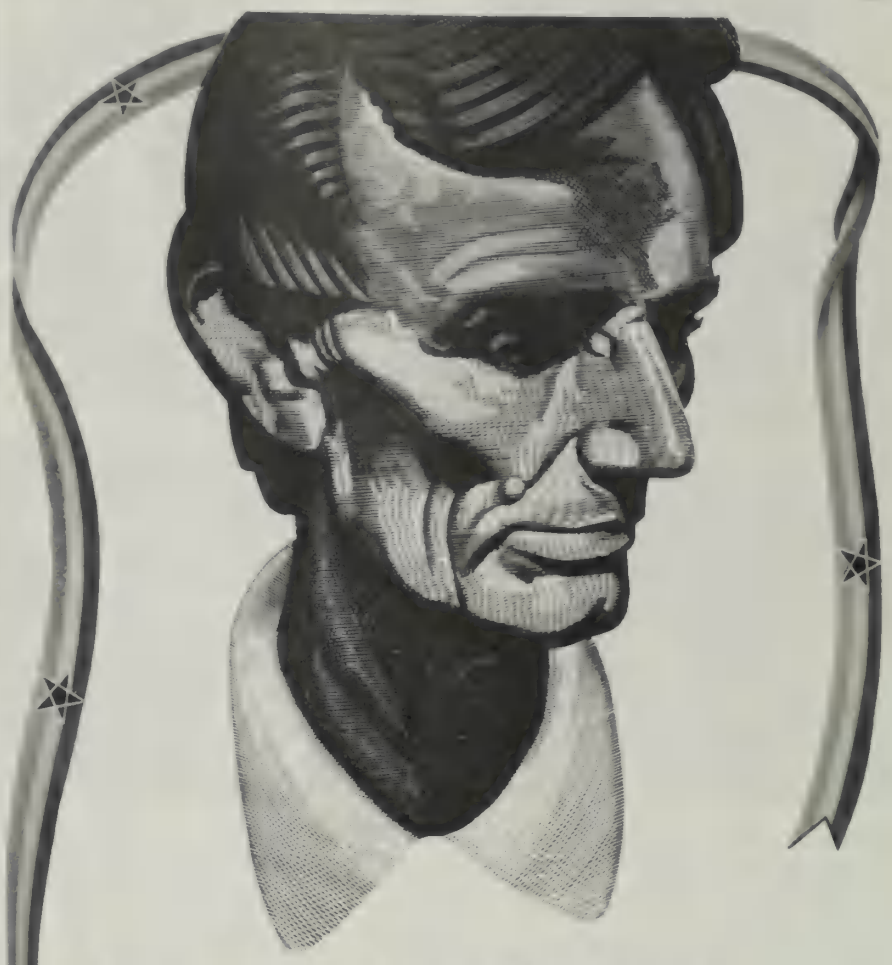
"You're an imbecile."



"I think you're just yellow."

"That doesn't work. Pop's tried that."

"Don't try to tell me you have moral objections."



"No."

"Heresy, Bert. The party line says

"Walk right up to him and show him who's boss!"

CHARLES PEARSON

Now You Can Afford $10,000 Life Insurance

THESE LOW RATES MAKE IT POSSIBLE

• Here is a long-term policy that protects you for the expectancy of life based on your age, according to the American Experience Table of Mortality. It has cash and loan values.

Age	Monthly Rate Per $1,000
20	$ .90
25	.99
30	1.12
35	1.28
40	1.54
45	1.89
50	2.43

AT age 35 a $10,000 policy costs you only $12.80 per month and will, should you die during the expectancy period, pay your beneficiary $10,000 or a monthly income for life. This low-cost policy cannot be issued in amounts less than $2,500. Write us for full details, stating age. Use the coupon below. Mail it now.

HERE IT IS—America's *more economical* full-size car—the Nash Ambassador "600"! Proved in 1941's official economy race, with a winning 25.8 miles a gallon average, in 599 miles of high-speed travel!

Never before in Gilmore competition had a car so big gone so far, *so fast* on such a small amount of gasoline.

Official A.A.A. observers eyed the size of this Nash—almost 17 feet in length, the front seat nearly five feet wide—and marveled.

Experts talked about the most amazing "roadability" they had ever witnessed . . . of hair-curling high speed turns . . . of almost unbelievable riding smoothness.

Nash was sure to win! For no other low-price car has its modern construction—body-and-frame welded into a stronger but lighter unit. on aircraft principles.

No other car can match its roadability, for Nash alone has Two-way Roller Steering . . . less unsprung weight than any other full-size car in America . . . absolutely the easiest steering and parking you ever experienced!

No other low-price car can equal Nash's riding smoothness . . . for it alone has soft coil springing on all four wheels.

Nor has any other car Nash's modern, Manifold-sealed Engine with high economy at all speeds, under all weather conditions.

Yes, and today thousand[s] of ow[ners] there is simply no comparis[on] with [Nash]

No other low-price car h[as] a [Full] Bed, or the Weather Eye [conditioning] System . . . for perfect, filte[red] fresh] fort, without dust, bugs or c[old].

See This New Nash Slip[stream]

Imagine owning this big Na[sh] se[dan] right—for only $745!*

Big as it is, imagine goin[g] [from] miles on *one* filling of the ga[s] [tank] ing 25 to 30 miles on a gallon, [with good]

Come on—*drive* it! Com[e] it w[ith] low-price cars. You, too, wi[ll] [switch]

Yes—a double bed made ready in 60 seconds; ideal for touring, sporting trips, saves lodging expense. Sedan shown is the big Nash Ambassador "6", with "Aeropower"... a 105 H.P. Twin-Ignition, Valve-in-Head Engine. Here's the best buy you'll find in the cars priced just above the lowest!

NOW NASH LEADS I[N] THE LOWEST-PRICE FIE[LD]

MORE ECONOMY... 25 to 30 miles on [a] gallon of oline... savings of $70 to $100 a year on [overall expense]

MORE ROOM... more total inches o[f] [seating] than any other car in the lowest-price fie[ld]

MORE COMFORT... new type soft co[il] springs on four wheels! First on any car in the lo[w]-price [field]

MORE SAFETY... body and frame [are] one solid welded, rattle-proof unit of amazing stre[ngth]!

EASIER STEERING... Nash is the onl[y] car with Two-way Roller Steering. Turns in a 33-fo[ot] circle.

FINER "EXTRA" FEATURES... The W[eather Eye] ditioned Air System for winter driving... [Full] Bed... Fourth Speed Forward... Auto[matic Overdrive]

...ts Amazing Economy!

...Run—the Nash Ambassador "600", Equipped with the ...Officially Delivered More Miles to the Gallon than any ...tered, regardless of Size, Price, Weight or Equipment.

Bert snorted. "I left the party a year ago."

"Liar."

"The same old Red."

"I was trying to give you credit for some logical reason, no matter how cockeyed. Oh . . . I see . . . you're a Nazi now. Sorry."

"The hell with them."

"Not a Communist . . . not a Nazi . . . not an American. I'll bite—what's the answer?"

Bert blinked, his large, blue eyes as expressionless as a doll's. "The answer is very simple. I'm not going to war because I don't want to get killed."

I stared at him. "How gallant!" I said.

Shrugging, Bert took out a cigarette. "Sarcasm's no good, either," he said. "When they ask me what I did in the great war, I'll say, 'I stayed alive,' and be damned proud of myself."

"While other men died so you could keep your own hide safe?"

"Can I help it if this country's still full of suckers?"

That left me speechless and aching with pity for Mom and Pop Sedden, especially Pop. I got slowly to my feet, and, inwardly raging, walked up the steps and into the house.

Mom Sedden was there. I suspected that she had been crying in secret, although her manner was determinedly cheerful.

"Phyllis! Have you seen Bert?" she asked.

"Yes. Just now."

"Did you talk to him?"

"Not very much. Where's Pop?"

"He went to his boat."

"I'll go see him."

She stopped me. "Did—did Bert say anything about—"

"It'll be all right."

"Oh, Phyllis, I knew you'd do it! Bert always has admired you so—"

"I'd better catch Pop before he starts fishing."

"Yes . . . and, Phyllis, try to make him understand the boy. He's behaving as if Bert had committed treason. He's cruel . . . and unfair—"

"I'll talk to Pop."

I found Pop in his small motor sailer moored to a landing stage dock. His fat, stooped fi disreputable mufti—the being a faded old canvas coat—was huddled in the seemed to be fussing with t proached, but actually, I just sitting there full of g ery.

"Oh . . . hello, Phyllis aboard?"

"Yes, if I may," I said.

He handed me down wi perceptible exaggeration which was the tip-off, if y that he had been drinki Mom, had what I call a patrician and aged and Pop should have lived a h ago; he was a huntin', sho pucka sahib made for a more wholesome world t now is.

"Cap'n Hartney very ki me from duty today," he

"Because Bert's home,"

"Yes," Pop said, and wince. "Your father is alw ful. Deeply appreciate it.'

"I've just had a talk wit

POP carefully put the co bucket, his hand shaking face, always ruddy, drair and his white mustache twi

"Sorry you had to liste rot," he said. "Can't tol more, myself."

"Maybe that's the troub

"Eh?"

"I think he does it just out of us. You, especially.'

Pop shook his head. "U that, too, Phyllis. His mo we said, 'He's young. Jus oats. Wants to show off.' enough . . . to be an officer

"He's still a kid, Pop."

"When I was his age . . . going into it. There he is he is."

"He loves you."

"Loves . . . oh, no . . . no,

"He does. He was hurt wouldn't speak to him."

"Mentioned it?"

"Yes."

has hated me, you know. We never got along."

"I think you should speak to him, Pop."

"You do?"

"Yes . . . and behave as if none of this draft and conscientious-objector argument had ever happened. And if he brings it up, just ignore everything he says."

There was a sudden, pathetic eagerness in Pop's manner. "Modern psychology, eh?"

"Yes—I suppose it is."

"You know young people. Meet a lot of 'em all the time. Know how they react to things, eh?"

"Sure do, Pop."

"I should have talked to you before—about Bert. Never wanted to admit he had me stumped. His mother kept saying, 'You're too harsh. He'll turn out all right.' *Harsh!* I didn't think I was. I gave that boy all the attention I could . . . had a good deal of sea duty, but gave him all the attention I could. But, somehow, after he was fifteen or so, he seemed to slip away from me."

"It wasn't your fault. Or Mom's, either."

"Happens to a lot of 'em, eh?"

"Yes, it does."

"But why, Phyllis? His mother and I thought we'd done a pretty good job. His home was happy. We sent him to the best schools we could afford. We tried to teach him our own viewpoint on things. It didn't seem to us to be a narrow, old-fogy viewpoint, either. Naturally, I wanted him to go to the Academy. He made no objection. He just acted . . . when he got there . . . like an alley rat. Gad . . . I woke up one morning and discovered that all the years of effort we'd put into that boy meant nothing to him at all. He hadn't listened and he hadn't observed. When it came to forming opinions, he preferred to get them from a handful of pip-squeak, parlor-pink college professors. It—it knocked me all in a heap."

WHAT could be done about Bert except to stall for time and hope for a miracle? How could I have told Pop what I really thought—that Bert wasn't worth any more tears and worry and heartsickness? Not poor, old, baffled Pop. I had to pretend that I had just the method to cure Bert.

"He's set himself against us just from sheer cussedness and exhibitionism, Pop," I said. "So the thing to do is to treat Bert with a large dose of smiling indifference."

"Think that might work, eh?"

"I'm sure of it."

"I hope you're right, Phyllis."

"You'll try it?"

"My dear, I'd try anything, anything."

"Swell!" I said. "So instead of brooding out here you go back to the house and make it up with Bert. Take the attitude that his cockeyed ideas are of no importance. Promise, Pop?"

"I . . . well . . . all right."

Pop bowed very gallantly as we shook hands on it. His sense of humor returned.

"Too bad the boy isn't a drunkard or a devil with the women," Pop said. "I'd know how to handle that!" Then, he added wryly: "I'd even prefer to have him a thief."

"We'll cure this too, Pop!" I said.

Feeling very much the little Miss Fixit, I started around the dry-dock area to take the short cut to the basin. I had an excellent excuse for dropping in on Savvy Roberts. That afternoon was the date of our regular fortnightly tea fight at the Officers' Club. All hands were supposed to attend. I knew there was little or no chance of persuading Savvy to come, but—(Clinical Note: Hartney was about to tell a lie here. The truth was she just wanted to see Savvy again.)

"Phyllis!"

"Hunh? . . . Oh, hello, Bob."

Lieutenant Bob Cowles waylaid me by the dry-dock gate. Remembering my interview with Mamie, I tried not to show any embarrassment. But it was always a bit embarrassing to talk with Bob Cowles. His Academy nickname was "Eight Ball" and it had stuck with him—horrid testimony to an unbroken string of bad breaks.

When he was an ensign there had to be an explosion in his turret; when he was a j. g. a cruiser ran aground while he was junior watch officer on duty; when he made two stripes he married Mamie. He had been sent to Navy Station to supervise overhaul of the Pearson, an old destroyer, and was up before the selection board for promotion to lieut. commander. His career hung in the balance. Either he would win promotion and command of the destroyer or be washed out of the Service.

A thin, swarthy, intense and jittery, black Irishman, Bob never had learned to conceal his frazzled nerves. His sense of shuddery fear, waiting for the next blow of fate, communicated itself to you; and you found yourself suffering with him and always ashamed that this should be so. Talking to him was like standing in an exposed place during a storm, where the lightning would be certain to strike; you fidgeted and wanted to run, yet could not decently abandon Bob to perish alone.

"Has your father had any word?" he asked now, clicking a small stack of coins together in his right hand.

"Not a thing," I said.

"I should have heard by now."

"Pooh. Not necessarily. No news is good news."

"That's what Mamie says, but—"

"For Pete's sake, stop *worrying*."

Bob clicked those infernal coins together. "I guess I'm sunk."

"Blaaah! You've a good fitness report, in spite of the tough breaks. Dad and Pop both wrote letters."

"God bless 'em. But I've a hunch—"

"Kafooey on your dog-trot Irish hunches. You'd have to be deaf, blind in one eye and crippled before they'd pass you over. There's a bad storm brewing, fella. They need you."

"Yes . . . there's that—"

"You'd better get back on the job before some hunky drops a hammer on his foot and sues the Navy."

Bob grinned. "That's "Well . . . thanks, Phyll medicine for a guy. Th

you, sir!" I said, humbly.
rs of the night before seemed . I tripped lightly home. Savvy rried about this thingamajig. that purred. He was guarded marines to protect the gold Fort Knox. And he had come *o talk to me.* Savvy, himself. (Whoa, there, Phyllis—why e humility?) Just a look and ut that was sufficient joy for Oh, it would be all right, all

uble with me is that every t to stepping high I need a angel at my elbow to say, ow bridge!"
m Sedden, Mrs. McMatthews t to the Officers' Club an hour tea fight was to start, it being o get everything in readiness. had gone into the kitchen to ettles, and Mom and I were the dining-room table, when ngry voices in the card room. sacred to men only, was in ng adjoining the main lounge. t a teapot down hastily. "Oh, t's Bert—" she whispered.
You stay here and keep Mrs. f it!" I said.

D to the door of the card st in time to see Bert Sedden enant Roger Collins jump to while half a dozen other of- led at Bert.
taken all we can stand from er said. "The only thing that's from getting your head ff is our respect for your ay you're a worthless, yellow or your father's sake I'm go- it that you keep your mouth d here."
n't make me do that," Bert

apped him heavily across the ur conscience won't let you t, eh?" Roger said.
n lick me," Bert said, "but change my opinion of you. re a dirty Nazi bully."

Roger began slapping and cuffing him, the force of the blows causing Bert to stagger and put his hands to his face.
"Stop it!" I said.
Someone brushed me aside. It was Pop Sedden.
"Passive resister to force, are you?" Roger said. "How does this feel—"
He hit Bert with his fist, knocking him into a card table. Bert fell, blood spurting from his nose and mouth.
Pop Sedden spoke—slowly, tragically. "Get up and fight, son," he said.
Bert shook his head and wiped the back of a hand across his bloody mouth.
"Sorry, sir—" Roger said.
Pop's answer was a punch on the jaw. Roger staggered and fell, more from astonishment than from the force of the blow, I think. Anyway, he scrambled quickly to his feet.
"I'm very sorry, sir," Roger said.
He clicked his heels, bowed and walked out the veranda door.
Reaching down, Pop helped Bert to his feet. He turned to the other officers, saying, "I apologize for my son. He will not come to the club again."
Nothing more was said. Pop and Bert moved through the doorway where I was standing. Neither saw me. Pop led the way across the lounge, walking with slow, shambling steps. Bert followed him, mopping blood with a handkerchief. They went outside.
I hesitated, wretchedly, not knowing whether to run after Pop and Bert or hurry to Mom in the dining room. There was no doubt in my mind that a tragedy impended. A black flood of passions so strong as to seem like the abrupt darkening of a happy day into night had swept across Navy Station. I felt the panic of a swimmer who has recklessly underestimated the tide.
"The skipper—" I thought, "—I must go to Dad. Right away. This is too much for me—"
As I turned, I felt a hand on my arm. "Miss Hartney . . . a word with you."
It was Lieut. Commander Kirstell.
"Th-there's been a fight," I said, stupidly, "you've got to excuse me—"
Lieut. Commander Kirstell shook his head. "This can't wait," he said. "*I have a clew to our man.*"

it to and told 'em not to tell. She figured, right enough, when they heard shots, each of 'em would think he knew what was happening and would stay in his room, so he wouldn't be on the scene and get mixed up with the police.

"The afternoon of the night they killed the old man, she pulled a button off of Dosenki's bathrobe while he was out, and when she pretended to go to the picture show, she took the gun out of the closet and give it to Olavski. She'd went to that picture show before and knew what was in it, in case she got asked. Her and Olavski come in, after the old man was asleep, and Olavski hid in the closet. She woke the old man up, because they wanted it to look like there'd been a struggle, and Olavski shot him, and she left the button there and she knocked on Dosenki's door and listened to hear him getting up before they run out.

"What went wrong was that Olavski's first shot had went through her dress while she was holding the old man so he could be shot. She grabbed another dress out of the closet and took it with her and changed at Olavski's room. Then she come home like she was coming from the picture show."

"I SEE," I said. "It was at Olavski's hotel we found the dress."

"Yeah. They'd ought to have got rid of it. Well, there's almost always something a killer had ought to done but didn't. Of course, at the start, there wasn't no indication of all these things. It looked like a routine murder. An old guy had married a young girl and a young guy was a lodger there and the old guy got shot. So they pinched Dosenki. Still, it didn't look right."

"Why not?"

"Well, common report said Dosenki had been making a play for Androskey's wife, but Dosenki was in love with somebody else. Besides, he didn't act like no guy that done a murder; we know how they act. Cops that talked Russian could get only one story: Dosenki had killed him. So the idea come to the Inspector to put a cop on the job that couldn't talk Russian."

"Why?" I inquired.

"Well, guys that talk foreign languages take care what they say when they think somebody ca 'em. The idea was to h around where they would We had to have an i wasn't just luck that Ola and fixed it so we didn't The kid from P. S. 134 Olavski in was Olavski's then we found the bullet it looked like a woman m there when Androskey go women around there said skey had a red silk dress, mean nothing without we

Chung but a girl, standing in the shadowy darkness of the room.

"Ya-ching!" she cried.

"It is I," Ya-ching whispered. "I am in great trouble, Ling doctor."

Siu-mei sat up and put out her hand for the light, but Ya-ching stopped her.

"Let me speak in the darkness, Ling doctor." She knelt beside the bed and began to sob softly.

"Don't cry," Siu-mei said, astonished. "Speak—tell me what is wrong."

"I cannot find words to tell you," Ya-ching said in a small voice.

"Is your family in trouble?" Siu-mei asked to help her. "Has your house been bombed?"

Ya-ching shook her head. "No, it is I, myself."

Siu-mei put aside her first quick guess. There were many young girls in trouble these days when all the usual ways of life were disturbed and changed, and war gave strange freedoms between men and women. But surely a girl with a face like Ya-ching's was safe!

"Are you ill?" she asked.

"Yes," Ya-ching said desperately. "I am sick with shame. I have no husband but I am with child. Cure me!" Ya-ching besought her eagerly. "Give me foreign drug!"

For a moment Siu-mei did not reply. "I cannot," she said at last sternly. "It is not allowed. I should forfeit all my years of work here if it were discovered I did such a thing."

"Then I will kill myself," Ya-ching said passionately.

"That you may not, either," Siu-mei said at once. "Consider reason. What you have done is a pity. But there are ways. Will the man not marry you?"

"Shall I tell him you say he ought to marry me?" Ya-ching asked. She lifted her head.

"Yes, certainly tell him so," Siu-mei said with earnestness. "And say that I will be your go-between, so all may be done decently and quickly."

For answer Ya-ching buried her head again in the silk quilt. Her shoulders shook and she made small, stifled cries. She was sobbing, Siu-mei thought, and listened again. No, this strange, ugly girl, she was not weeping—she was laughing!

She shook Ya-ching sharply. "Why do you laugh?" she cried.

And still Ya-ching would not answer. Instead she leaped to her feet and ran from the room, her cloth-shod feet silent, but the sound of her stifled laughter breaking the sudden silence of the night.

AND left alone in her room Siu-mei listened. The air raid was over. She had scarcely noticed it, so used had she grown to safety. And yet now she felt no longer safe.

And Ya-ching ran creeping along the dark corridors of the almost empty hospital, guiding herself by her hand on the walls. No one was there to see her. Not even an orderly sat in the hall now. There was no need. She went down the stairs and up again into the men's hospital to Chung's rooms. The door was locked, but she had a key and she fitted it to the keyhole and went in.

Chung was there, poring over a piece of paper with a small magnifying glass. He put the glass down as she came in and he looked up.

"Go away," he said, "I don't want you here tonight. I have work to do."

She stood before him, not moving. "I will not go until you have heard me," she replied.

"What do you want?" he asked.

"I am in trouble," she said.

He took up the paper again and began to study it as though she were not there.

"Will you not ask me what trouble?" she inquired of him.

"No," he said distinctly.

She flew at him then as any common, angry woman flies at the man who stirs her to fury. She seized him by his ears and she screamed at him:

"You shall hear me—you shall know—"

Then he struck her full in the mouth and his hand, soft and smooth, was suddenly hard. She staggered and put her hand to her bleeding lips.

"Your trouble is none of my business," he said. He took out his silk handkerchief and wrapped it about his hand as he spoke: "I care nothing about any trouble of yours. You may be ill, you may be about to die, and I do not care."

"My trouble is worse than that," she faltered.

He looked at her, his eyes wide as a tiger's eyes. "Still I do not care!" he shouted.

And then she knew that he knew what her trouble was and that it was true that whatever it was he did not care. And he saw that she knew.

"I let you come here," he said contemptuously. "I never asked you to come. Now I tell you, do not come again!"

And then she cried out indeed, for she still loved him and would always love him in her stupid, desperate way, knowing she was never to have anything from him except what she had already had. She ran to his feet and fell there.

"Do not say never!" she cried, weeping. She caught his foot in her arms. "I will not complain. I take back to myself all I said—it is my trouble, it is not you who is to blame—it is all I—if only I may come here sometime say I may, only—"

"I have said never!" Ch and when she clung to hin her still clinging to his fo floor and at the door he l foot and pushed her out i and he took from the key he had given her and he s and locked her out.

And she lay there sobbin heard her in the empty h after a long time she went to her own bed and lay th until her tears were dry, lay there, plotting through til dawn. One by one she weapons and surveyed t mind. There were the pills taken that night from Y She had them still and s Chung making the same was the man creeping to hi would wait for that man a to talk. And she would tell it was that should marry h not.

SLOWLY through the h for this man grew evil in her and with all he turned to agony in her sh self against him whom sh she was ready to die if sh see him die first. . . .

Two days later Chung ing to the hospital, felt hi by the sleeve outside the dark and he was instantly went afraid all the time Chen-ta was behaving so s no one knew what he was next. He ordered all his tr and yet, willfully at the las a moment now twice when had already slipped out c

"Let's go some place where we can't talk!"

With a wing span greater than the height of a 17-story building the new Douglas B-19 carries a bomb load of 18 tons and can fly non-stop one third the way around the world. By serving the needs of both the Government and Civil Aviation, Douglas acquired the experience and vast facilities to make so great an airplane possible. Thus from the cradle of the airliners comes the world's largest bomber to help make America supreme in the air.

From woodburner to streamliner The Mutual Life has paced the progress of the nation

In that early era of American inventive genius that started the railroads on their transcontinental march, sent words by wire, and ships back and forth to Europe by steam — the humanitarian spirit of American democracy made possible the protection and security of the individual by the establishment of The Mutual Life Insurance Company of New York.

It was a truly democratic enterprise with the rewards shared by each and all; every policyholder participating in its cooperative benefits under his contract.

For 98 years this mutual company has kept pace with the progress of the country, offering millions the opportunity, through its agents, to plan their lives with point and purpose — encouraging thrift an enterprise — and from its accumulated funds, hel in trust, helping to furnish this nation with th means to make it strong and great and prosperou

Becoming a policyholder in this enterprise—wit all the profit and protection it holds for you an your family—is an easy, forward step to take. Mak your Mutual Life agent your counsellor — discu with him your needs and obligations — let him dra up a program of insurance to fit you individually - and then put it in force. By this act you will h enlisting your best efforts for yourself and, in turn for your country — for the independence you s achieve adds to the sum total of our democrat way of life and channels your savings, with those other millions, into its further development and defens

Third had gone out of that bling like a bamboo leaf He was, he felt, a mere en these two strong ones, is own elder brother. But Eagle more and so he had th much groaning to go s once more and tell him le would strike and then tell him that he was watched and could come no more. Now that he was near the hospital he felt himself so afraid that he was not sure if after all he did not fear his brother as much as the Eagle. It was at this moment that he had felt his sleeve taken and a light flashed upon his face.

"Let me go!" he squeaked like a rat, and, darting and turning, he tried to break free.

But the hand twisted itself into a knot in his sleeve.

"Be quiet!" He heard a woman's voice and was so astonished that he stood still. A woman! He felt less afraid. What could a woman do to him?

"You go to Chung doctor?"

In the reflected glow of the flashlight he saw her face. It was the ugly girl he had seen that night outside his brother's room. Fear went out of him.

"Why should I say I do or do not?" he retorted impudently.

"You are the one I saw before," she said. She flashed her light up and down the street. No one was near. She let the light go out and they stood in darkness.

"What if I am?" he retorted.

"Are you his friend or his enemy?" she asked.

Chung Third grinned into the night. "Neither—I am his brother."

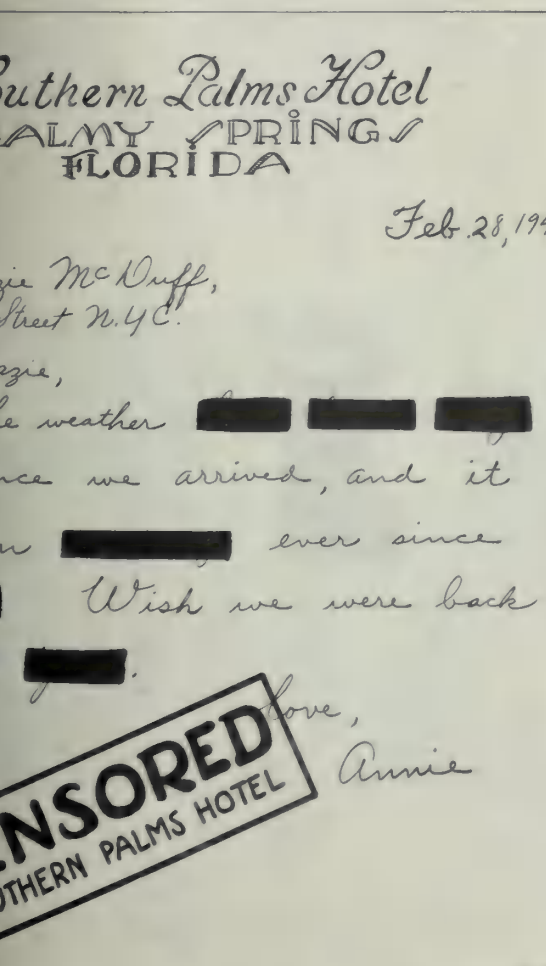
She was struck silent by this. Chung's brother! She had not dreamed of it. Then he might be coming merely with family news. Yet if that were so—

"Why do you come in the night?" she asked.

"Because he bids me not come by day," Chung Third replied.

She thought desperately: "How can I bribe him to truth? With what can I pay him?"

"Are you younger or elder than your brother?" she asked.



"Younger."

She hoped a little again. If this were a younger brother he would have reason to hate Chung. She made a great guess.

"The evil your brother does is known," she whispered. "I came to warn you."

Chung Third felt his sweat start. "Why warn me?" he faltered.

"Because—because why should an in-

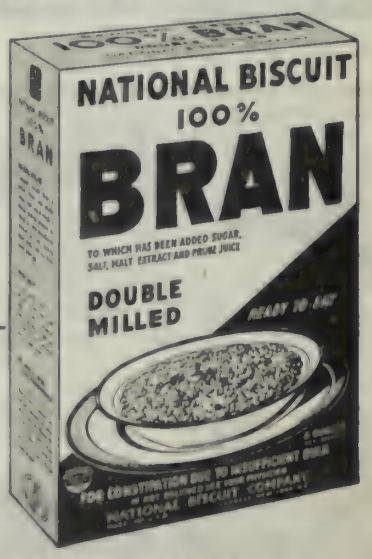
Taste the delicious difference in this wonderful NEW FORM OF BRAN



New DOUBLE-MILLING process refines texture of NATIONAL BISCUIT 100% BRAN

Check its Advantages

- This tempting cereal helps relieve that common type of constipation caused by insufficient bulk in the diet. ✓
- Made by an improved process of Double-Milling, which further breaks down the bran fiber, making it less likely to be irritating. ✓
- It's a deliciously different New Form of Bran that you will enjoy eating for flavor. ✓
- Accepted by the Council on Foods of the American Medical Association. ✓
- Contains all the goodness of 100% Whole Bran. ✓
- Furnishes significant amounts of phosphorus and iron and is a good source of Vitamin B_1. ✓

ACCEPTED AMERICAN MEDICAL ASSN

You'll change your ideas about bran when you try the new National Biscuit 100% Bran. It's so delicious in flavor . . . so *gentle* in action! Eat National Biscuit 100% Bran as a cereal . . . try the fine recipe for bran muffins on the package. If your constipation is not helped in this simple manner—consult a competent physician.

NATIONAL BISCUIT COMPANY

WELCOME CHANGE IN CIGARETTE ADVERTISING

ARE YOU weary and confused over the mass of claims seen every day in cigarette advertising?

AFTER ALL, we suspect you smoke a brand simply because you like it—the soundest and best reason of all.

ON THIS basis alone, we produced Chelsea—and utilized the best knowledge and experience that comes from 65 years of manufacturing quality tobacco products.

A GREAT many smokers report that Chelsea cigarettes have given them an entirely new pleasure in smoking.

MAYBE THEY will please you—maybe not. Possibly you will discover a new cigarette satisfaction.

24 for 15¢*... 4 more than usual

Chelseas are packed in 24's—4 extra to the package! A dividend of 40 extra to the carton. Chelseas are new! And if your dealer cannot supply you, send $1.50* for a carton. Address: Reed Tobacco Company, Richmond, Virginia. Branch of Larus & Bro. Co.

**Plus state cigarette tax if one exists in your State.*

SAFE!

NEW Discovery Worms Dogs Without Danger of TOXIC POISONING!

Yes! You can now worm your puppy or dog and be SURE of no violent after-effects or toxic poisoning! This new discovery—Glover's *Imperial* Capsules—expels Round Worms (Ascarids), Hook Worms, Whip Worms—all THREE! Never before possible in a worm medicine. Only 25¢. Large box, 60¢. At all druggists. FREE DOG BOOK. Write GLOVER'S, Dept. 16, 460 Fourth Ave., New York.

ONLY 25¢ GLOVER'S *Imperial* **CAPSULES**

nocent man suffer with an evil one?" she replied.

"I am innocent, truly," he groaned.

"So, I came to tell you," she whispered. "Do not go near him tonight. You may be seized when he is seized."

"But—but I have something to tell him," Chung Third stammered. "I came all this way to tell him."

"Is it written down?"

"No, it is only in my mind."

"Then tell me, and I will tell him," she said.

Now Chung Third was divided against himself. He longed to tell her and be spared meeting his brother—and what if she spoke the truth? Besides, if he got away as early as this he might return to his place before the Eagle missed him. And yet, who was this woman?

"How do I know who you are?" he asked.

"Tell me what is in your mind," she said. "Tell me, for I know already what your brother is doing. Why should you die with him?"

Her voice in the night was terrifying to him—it was so strong, so willful. He was afraid of women, after all. Though he talked much of them among his fellows, he was frightened and silly when one spoke to him. Besides, did he not fear the Eagle more than his brother? The words he was holding in his mind burst out of him like firecrackers:

"Sha-wu Mountains, tell my elder brother. Tell him just those three words. And tell him the first night of the new moon and tell him that I do not know when I can come again. That is all." He gave one great wrench and left a piece of his cotton sleeve in her hand and ran through the dark streets like a fleeing dog.

And she threw down the rag and then picked it up again and rolled it into a ball in her hand and went creeping back through the gate she had left unbolted. She had all her weapons ready now. . . .

SARA, looking out of her window the next morning, saw Gray already out in his garden. She had not slept—had he, too, not slept? She stood, her silk robe clutched about her, her long hair down her back, and watched him. It was spring again, the lovely Chinese spring, so early green with willows, so early flowering with pear and plum blossoms. Gray was planting something in a little flower bed at the side of the steps. The early sunshine struck his face, half turned toward her, and she saw it clearly. Then he turned his face, she thought, toward her, as though he felt her gaze.

No, he was not looking at her. He was lifting his face to the sky, weighing, she knew, the day. Was it clear? Would it be a good day for flying? She could catch his question. So, too, did she question the sky each morning. He searched for a moment the cloudlessness of heaven and then she could all but hear him sigh as he went back to his work. And stopping often to watch that tall figure bent over its labor, she washed and dressed herself, content creeping into her in spite of all. For he was there and she was here, and the same wall encircled them, and was not that much for content? In a world so large he might have been somewhere and she here, and the wall between them. Whatever was, they were within call, within speech, within daily meeting. And today she would have to talk long with him, for she must tell him of Yasuda.

A little later in her living room she touched a bell when she had finished breakfast and when the amah appeared she said, "Tell Thomison doctor that when he has eaten I should like to talk with him over a matter."

"So," the old woman muttered, and trotted away.

She watched the amah approach Gray and give her message and saw Gray rise and dust the earth from his hands, and to her surprise saw him come at once. She ran downstairs to meet him at her office door.

He came in, his eyes very clear, the breath of morning fresh upon him.

"But have you had your breakfast?" she cried.

"Long ago," he said. "I couldn't sleep."

"Nor I," she said quickly. "The strangest thing, Gray—I hardly know how to tell you." And then she did tell him, wondering if she had made too much of that scene in the night. He would be impatient with her and call her feminine and prone to imagination.

But now he only listened to her gravely, his eyes fixed on hers.

"That is very serious," he said when she had finished, "certainly it is very serious. I don't like it at all." He sat frowning and thinking. This was the second inexplicable thing about Chung. This morning, alone at breakfast, Gray had asked Siao Fah suddenly:

"Does the mistress still have the letters from Chung doctor?"

He had asked Siao Fah against his own will, and yet he had had to know. And Siao Fah had answered steadily, "He brings them as he always did."

And then Gray had not been able to swallow another mouthful. He had flung down his napkin and had gone outdoors to work furiously in the garden, and when Sara's old woman had come he had followed her without going in to wake Louise with his kiss as he always did every other morning. He felt very far from Louise these days. His love was quivering and wounded. What did she hide, he asked himself, when he saw her bringing in her flowers to the hospital, when he saw her about his house, when she lay in his arms? Why did she not speak? But she did not.

Now here was Chung, looking at a map with the Japanese. A sinister business, if one believed in the sinister. But he did not. There was always a reasonable explanation to everything. If he could ever bring himself to ask Louise he would probably find it was all nothing—the letters. Delafield h

How Frigidaire Cold-Wall Models Preserve Vitamins and Keep Foods Better

Scientists have found that wilting and drying destroy vitamins... that *still*, moist, uniformly cold air preserves health-giving freshness.

Air circulation which wilts and dries food is minimized in the unique Cold-Wall, because *the chilling coils are in the walls*, and the Cold-Wall compartment is sealed. You don't even have to cover foods in the Cold-Wall! See these basically different "refrigerators of tomorrow"... see how they provide the scientifically correct storage for every kind of food.

Cold-Wall Prices from $167.75*

Model Illustrated $204.75*

Exclusive Quickube Trays

Try them and you will agree that Quickube Trays are best. Both the trays and the cubes are released at a touch by *built-in* handles. No separate pry-bars or other gadgets to lose or misplace. Ice the instant you want it.

Sliding Hydrators

All fully-fitted 1941 Frigidaires have convenient sliding Hydrators—with glass tops in most models. They provide the *moist* cold that is needed to protect fruits, vegetables and other perishables.

Famous Meter-Miser

Nothing else like it! Simplest refrigerating mechanism ever built insures permanent quietness and current savings. Super-powered. Sealed in steel. Never needs oiling. Cools with F-114, Frigidaire's exclusive, safe refrigerant.

You Know What You Get

Frigidaire attaches a new Facts Label to every 1941 Frigidaire. It gives the facts you want about the model's construction, capacity, features and performance. You know exactly what you get before you buy.

FULLY-FITTED M-6—This model is called a "Six," but actually it has 6.9 cubic foot capacity, and 14.2 square feet of shelf space. Enough extra room for a big watermelon. Fully-fitted and with entirely new Fluted Front Design. A great new value at $142.75*

For 1941, Frigidaire, world's largest refrigerator manufacturer, offers a new conception of what a refrigerator should do for you.

Even in lower priced models you will find brilliant advantages. For example: lower operating cost, faster ice freezing, more Frozen Storage space, new Meat Tender, Utility Storage compartments, Super-Powered Meter-Miser. Check your refrigerator—or any other one—against the 1941 Frigidaires. Frigidaire Division, General Motors Sales Corporation, Dayton, Ohio. Canadian Factory at Toronto.

JUST ONE CAUTION. Some stores may use the name *"Frigidaire"* loosely to identify other makes of refrigerators, and thus confuse the public. If a refrigerator does not bear the *"Frigidaire"* nameplate, it is *not* a *"Frigidaire,"* made only by the Frigidaire Division of General Motors. Only a *"Frigidaire"* offers you the advantages outlined in this advertisement. Be sure you visit a Frigidaire Dealer!

***IMPORTANT!** Prices quoted are Dayton, Ohio, delivered prices and include installation, Federal Taxes and 5-Year Protection Plan against service expense on the sealed-in mechanism. Transportation, state and local taxes (if any) extra. **All prices subject to change without notice.** See your Frigidaire Dealer for local prices.

Sara cried, "and he was not like this."

"I saw him only like this," Ya-ching insisted.

"But you were not here all night," Sara said.

"It is true that for a little while Chung doctor stayed here and sent me away," Ya-ching replied.

"I came in then," Sara told her, "and he was not like this."

Ya-ching's face did not change. "As to that, I do not know," she said. "I do not know what he is when I am not here."

Not to these two would she give her weapons, she was thinking. She would use them first on Siu-mei. This morning she had seen the one last thing needed to whet her determination to its final height. She had seen Siu-mei and Chung meet upon the stairs, the one coming down and the other coming up, and she herself looking down on both from above. And she had seen them hesitate for a moment and then Chung had taken Siu-mei into his arms. Only for a moment it was, but it was eternity for her, watching from above. It was only a moment and Chung had gone on down and Siu-mei had run upstairs, her face rosy and smiling, and that beautiful smiling face had been the last thing needful for Ya-ching. She had wanted to scream and shriek and then she remembered her weapons. She could sever those two clean, one from the other, and she would.

UNDER the eyes of the two Americans she kept her face empty. They turned from it to look at each other.

"We had better talk this over before I see Chung," Gray said. He strode out of the room and Sara followed him. "Come to my office," he told her over his shoulder. She went down the hall behind him. A siren shrieked for an air raid, but neither of them heeded it. There was something closer to them, more terrifying to them than airplanes. There was something here in the hospital, some alien, enemy thing. And Gray, walking down the corridors to his office, was cutting away from himself everything except the cold determination to discover it. Whatever it cost him he would know. He shut the door behind Sara and turned the key in the lock.

"Sit down," he commanded her. And then he sat down behind his desk and, facing her across it, he told her:

"Sara, Chung is still bringing those letters to Louise." And when she leaned forward, her face instantly intent, he said, "What has Louise to do with Chung? When I find that out I'll have the truth."

He tore Louise out of the shelter of his heart with those words and held her there to examine as he might examine anyone in this office. "I've got to stop shielding her," he muttered. "I've got to know—not for my sake, but for the sake of—the hospital."

The long wail of the siren went on and they waited for it. Soon from where she sat facing the wide window and the rocky hills she would see the long, wavering line of people climbing to their caves again.

Chen-li was nearly all in ruins now. The packed houses of the city, centuries old, had fallen like children's blocks beneath the bombs, and acres of blazing fires had crumbled wooden pillars and beams. But the people came out of their caves and searched the ashes with their bare hands and rescued fragments of goods and furniture and in the ruins opened their little shops again to sell a few loaves, a handful of cake, a half-dozen cans of American milk, a basket of damaged oranges, and from the country farmers brought their vegetables and fruits every day and from the river the fishermen their fish, and they stuck their flags into piles of broken brick and cried their wares until the air-raid warning came yet again.

Sara's eyes filled with tears suddenly and Gray saw and was shaken to the bottom of his being. He had often seen Louise cry. Her pretty eyes filled easily and he had come now to realize that those tears lay just under her eyelids, very close to the surface, very ready for her use.

Last night she had been angry with Siao Fah for disobedience. His mind flashed back over the tempestuous little scene, so like many another. She had ordered roast duck for dinner and Siao Fah had bought pheasant again, because, he said when Gray sternly questioned him, he knew his master liked pheasant better than duck.

GRAY had laughed. "You oughtn't to mind that," he said to Louise. But Louise had flown into inexplicable anger, had leaped up and run from the room and when he followed her she was crying. He had taken her in his arms.

"You always side with Siao Fah," she had sobbed on his breast.

"No, I don't, darling," he had said humbly, "but why hurt his feelings when he is so faithful?"

"Faithful only to you!" she had cried in real fury. And then she had made her old complaint against him, her real complaint, the cry with which she carried on all their quarrels into one great quarrel. "You will do anything for a Chinese—you sacrifice everything to them, even me." This was what lay between him and Louise, like a great and immovable stone. He had long ceased to give her any answer, and he gave her none last night. He had simply held her until she had stopped crying.

But he had never seen Sara cry.

"Sara, don't—" he stopped and turned his eyes away from her quivering face. He had never seen her as anything but his comrade, steady and courageous and gay.

"Don't mind me," she said brokenly. "I'm not crying for any—particular reason. I mean, when I saw the people beginning to climb those hills again—I just began to cry, senselessly."

He wheeled his chair to face those hills and they sat in silence watching. The second warning sounded and the long, thin blue line of people thickened. It was a glorious day, a warm, swelling, bursting sort of day, when leaves were unfolding quickly and bamboo shoots pressing upward and blossoms opening in an hour or two. But the people were hurrying underground.

"Here we sit," she said fiercely, the tears running down her cheeks, "perfectly safe, perfectly helpless, not knowing what to do! After the raid is over the wounded will simply—lie in the ruins. They won't come to us. They'd rather die than come to us. Gray—I haven't dared tell you. But two days ago I went out into the streets to—to them after the raid. I took some first-aid stuff."

"No sooner does he get back from his trip to Miami than he begins calling us 'Paleface'!" LEONARD DOVE

"They wouldn't let you touch them," Gray broke in.

"How did you know?" She wiped her eyes.

"Because I've tried it myself," he said grimly.

IT WAS true. Each alone had gone out, not able to bear the knowledge of suffering. And each had come back.

"Thank you, thank you," one after the other of the people had said. "We need nothing, we thank you." So even a dying man had spoken to Gray as he stood beside him and said with such dignity of death at hand that Gray had not been able to serve the man against his will, even against death.

"Gray, what shall we do?" Sara rose and came to his side and stood there and he rose, too, and stood, and they watched the thing they had watched so often before. But this time it was new and terrible to them as it had never been before. They had no part in it. That was the horror of this moment. They were here and useless. Without their knowledge they had been ma[de] of all that they loved.

The airplanes were thick now, coming in threes, in sixes over the old city. The bom[bs] and bursts of fire followed fountains of flame set free. P[lu]of smoke rolled out and t[he] dimmed. The hills were they were in the midst of [a] vided by tongues of fire [to] the sky.

Someone rattled the door it locked, but they paid no and whoever it was went Gray thought of Louise a [lo]and as though she had thought Sara said:

"You were speaking of L[ou]

"Never mind," he an[swered] doesn't matter—nothing ma[tters] way, she's as safe—as we a[re]

What mattered in the w[orld] what they now saw before suddenly out of those ro[lling] three enemy planes appeare[d] them one small Chinese small plane dove down large ones like an angry in[sect] flew upward. From its jaw[s] see against the black clou[ds] jets of fire. They were th[e] machine guns which must into the belly of their prey.

"Sara, look!" Gray sh[outed] small plane had darted up the very wings of its enem[y] saw two planes out of the and flutter downward. A[nd] smoke rolled over the in[vi]again and curtained it turned to each other, gaspin[g] ing and sobbing and cryin[g] words to each other:

"Gray, did you ever see s[uch] not to be believed—it's the that makes you want to go yourself to pieces for the just *got* to—" "You bet w[e] ing else will do—"

THEY seized each other exultation and suffering ship for all that was brave and good and in that gre[at] flung themselves into each forgetting their separate made one by this joy whic[h] than they. She was in his arms were about him an[d] pressed to cheek while th[ey] to each other. And then s[he] was aware of the other. the midst of which they h[ad] a second before ebbed a[way] waves. They were thems[elves] nothing around them.

She thought. "What I never happen has happene[d]

But he could not think. H[e] feel her in his arms—Sara he had never thought of lo[ving] did love her. Now he kn[ew] her. Oh, all the trouble t[hey] to be! He groaned at the the terrible, tangling trou[ble] he could not let her go ou[t] He had never felt such st[ill] satisfaction in his life bef[ore] now, with her in his arms.

"This is going to be a h[ard] he muttered, staring down

She looked up at him, h[er] flushed, her eyes dark, be[g]

"Let me go," she whisper[ed]

But he could not. To h[is] arms was suddenly all be[ing] world. "I can't," he said her lips for the first time what they were, he bec[ame] them.

And after a long time sh[e] are we going to do, Gray

And he said, "I don't k[now]

But he did not let her g[o] not take her arms away f[rom]

No car has ever carried the Ford idea quite so fa

THE FORD BUSINESS started as a man and an idea. Today, on River Rouge, thousands of well-paid Ford workers wield the tools and vast resources of one of the greatest of all industrial plants. Here we build cars in what is known as "the Ford way."

It is a way of great efficiency, in a plant so complete that raw ore may find itself a precision-finished fine steel part in a new Ford car in as little time as 28 hours from start to finish! And the economies we make along the way are passed along to you who buy our cars.

It is a way of quality, producing many *extra*-fine materials which are built into your Ford car at no extra cost to you.

It is a way in which we take one small profit on each car, so that more of the price you pay goes into the *car* you drive.

At your Ford dealer's now is a car that shows the benefits to you of thi as no car we've ever made befor It is the product of our 39th year. Behind it are over 28 millio

Its size, comfort, quietness, driving ease surpass anything we before. How it compares with do, we leave to your own judgm

We know that we have built out, and its owners tell us that i

Some Ford Advantages for 1941:

NEW ROOMINESS. Bodies are longer and wider this year, adding as much as seven inches to seating width.

SOFT, QUIET RIDE. A new Ford ride, with new frame and stabilizer, softer springs, improved shock absorbers.

POWER WITH ECONOMY. The Ford engine leads the low-price field in horsepower, holds many records for economy as well as for performance.

BIG WINDOWS. Windshield and windows increased all around to give nearly four square feet of added vision area in each '41 Ford Sedan.

LARGEST HYDRAULIC BRAKES in the Ford price field, give added safety, longer brake-lining wear.

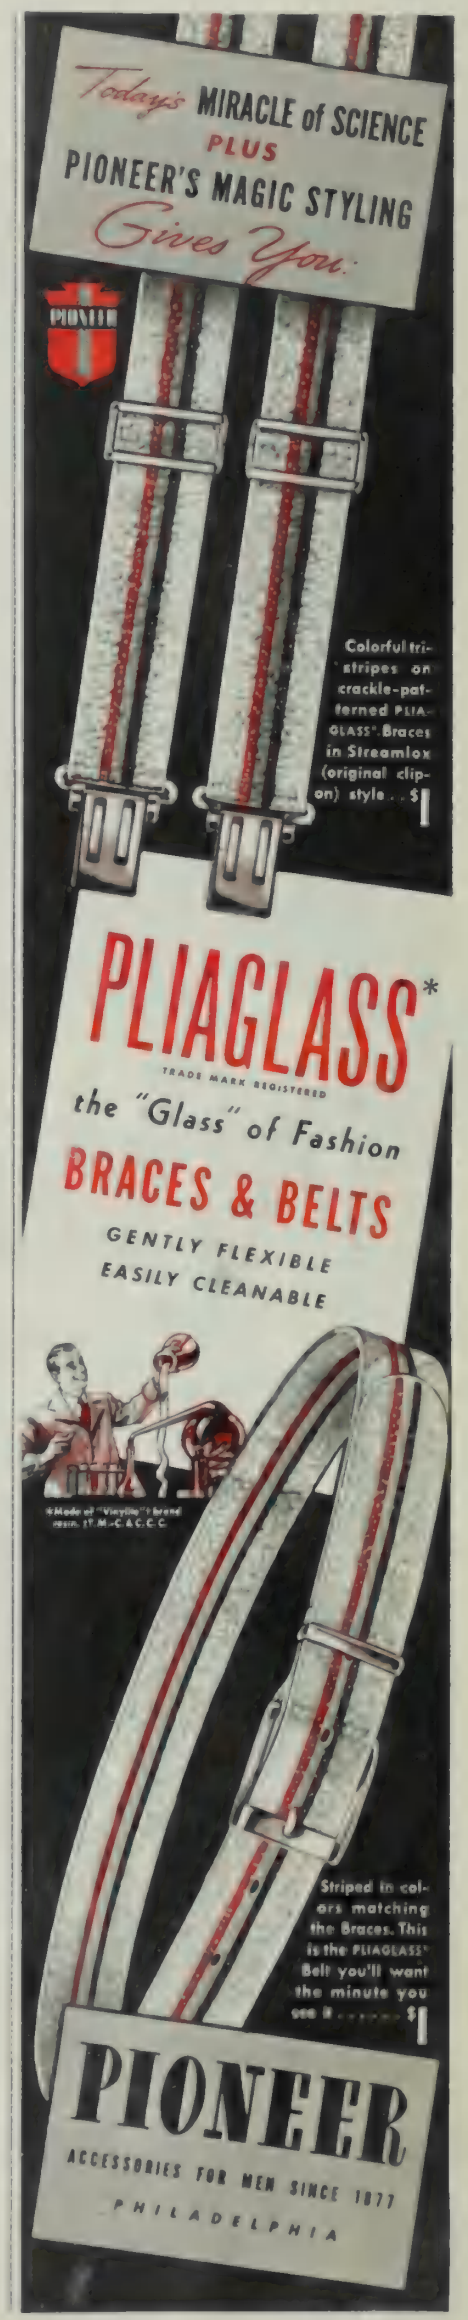
This is a nation that ...aps ...toe, figuratively, while ...g its...anger in check, because ...lency...nust be considered. This is a nation to be understood, not judged casually, and engaged in ■ unique form of passive internal revolt. A nation slow to anger, but potentially terrible in its wrath. This grows in your mind as you rub shoulders with German officers and soldiers whose booted heels strike sharply on the sidewalks; whose greetings of "Heil Hitler!" seem to hang endlessly in the crisp air.

You follow along, past posters denouncing "British-Jewish World Sickness" and proclaiming ■ "New Norway" and turn into a restaurant. Oslo citizens are indulging their habit of one big meal a day—late in the afternoon. You feel the unspoken antagonism as a German officer comes in. It's something—this antagonism—that has to do, you feel, with that rigid, water-soaked body of that German soldier.

Irritations and Annoyances



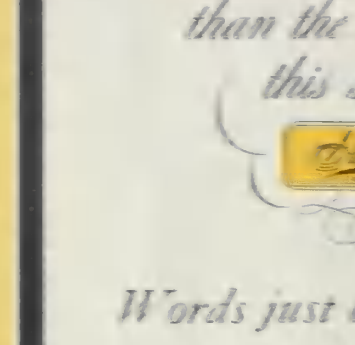
You watch closely as the officer sits down at ■ table where Norwegians are eating, and you feel no surprise when the Norwegians rise to their feet and leave the restaurant, their food unfinished. When you think it over, it's only what you expected to see. For all manner of things are happening in Norway today, you discover, as you go on, and they are things that scar the edges and poison the plan and purpose of the German program for Norway.

Briefly stated, a new program of resistance to German occupation is under way in this mountainous western side of the Scandinavian peninsula. It's a program that irritates and annoys the Germans, because it's different from anything they've encountered. It's building up steadily, with all the well-known ingredients of passive resistance, civil disobedience, violence and sabotage—plus ■ novelty of Norwegian invention.

This novelty has to do with method and attitude, rather than plan. If you think of a man being attacked at a complete disadvantage, but being passively contemptuous of the whole proceeding, you get an idea of it all. If you think of a people who accept domination because they must, but who feel superior to the people who have forced their way in, you begin to understand.

It's a form of passive as well as active civil war. And it's pinned to a new red-letter day in Norwegian history. For September 25, 1940, has been added to April 9th of last year as an unforgettable reminder of the German interruption of all Norwegians' belief that they have ■ right to govern themselves as they think best.

It was on that day that Germany found it necessary, from the German viewpoint, to "depose" King Haakon, dissolve the former Norwegian political parties, give the backing of force to the National Concentration Nazi group of Major Vidkun Quisling and otherwise take a most effective punch at the former way of things in Norway. That was the end of Part One of the Norwegian drama which began when the Nazis threw their heavy Junkers and parachute troops and mechanized columns against Haakon's people with the



Money can buy no

excuse of "protecting" them from the British.

It marked the end of whatever hopes the Norwegians had of retaining even a measure of independence of thought and action under German control. It was a new jolt to Norwegian mentality because it struck at the very foundations of the democratic traditions that made Norway a free nation at the beginning of this century. Thus it did a first-class job of clearing away doubts and illusions and confusion. It eliminated talk of compromise with Nazi ideas. It brought the Norwegians back to fundamentals, and a new unity, by accentuating, through complete loss, the ideals and principles of the old order.

What you see and hear in Norway today is Part Two of the German occupation, as far as the Norwegians are concerned, and it's going to end in a very definite amount of trouble. What you have now is a resurgence of Norwegian spirit under new stimulus.

Today, you find 2,900,000 Norwegians, excluding the handful who support Nazi control, nursing a steadily developing hatred and resentment—and scheming to give it expression. You find that a nation which reacted in horror at the thought of war and killing, in keeping with Scandinavian attitudes, is beginning to taste blood again, after the slump in spirits which followed the collapse of Norwegian military resistance, the German invasion of the Low Countries and the surrender of France.

The Germans, on the other hand, are learning that the civilized Norwegians have a nice, primitive touch about them as they react from the defeatism, the complacency, the inefficiency that aided the German occupation of Norway last spring. And this is not as surprising as you may think. The Norwegians have showed themselves a progressive people, as members of that "highly improved" state of society that was essentially Scandinavian. But there are old men in Norway who can tell from personal experience of days when men from adjoining valleys met to settle their grudge quarrels in fights to death with fists, knives and clubs.

Acceptance without Endorsement

That violence still lingers in the Norwegian temperament, but not on the surface. It has to be developed, with the patient thoroughness so typical of all Scandinavian endeavor. German propagandists who boast that the Norwegian public accepted "without violence" the sweeping changes of last September are being misleading with a purpose. Your real Norwegian replies that a man with a gun in his stomach cannot be said to have "accepted" the theft of his pocketbook.

Consider all this and it's not surprising to find Norwegian jails now crowded with persons arrested at anti-Nazi demonstrations, or to learn that people have been killed in riots—Sven Erik Rolf, for example, son of the famed stage producer, Ernst Rolf. Young Rolf, an ardent Quisling supporter, was beaten to death by an angry crowd at a political meeting.

Sabotage spreads, although still limited, because of the overwhelming possibility of punishment in which innocents may suffer. And old-time conditions of revolt no longer pertain, after all. Not with machine guns on the ground and airplanes overhead, and with an army of 300,000 Germans in a country of less than 3,000,000 population.

But it does happen that a consignment of fish for Germany is spoiled through improper refrigeration. It does happen that a large stone tumbles onto a railway track, and soldiers of a German troop train must heave it out of the way, with gratitude for the efficiency of the locomotive engineer meeting at Quisling Nazi mean protection, for never group more carefully a loud-speaker bursts and a small but effective concealed in the mecha explosion is the signal fo tion at which fire hoses store order.

In Oslo today you hav the censored press to con comprehension of how th ward violence is grow that police have recent a well-known skater from athlete has died, and the head did not come from fall. The dead man was supporter of the German ling government.

the dark months, however, egia favored by a self-gov- radi n in which community een mphasized, managed to pr am of resistance. He exce under compulsion, to h G mans. Norwegian boys me organizing a campaign to scissor the hair off Norwegian girls who associated with German soldiers. In one community a citizen was arrested for displaying a "sullen" attitude. The other residents took to passing Germans on the street with a broad grin that infuriated the "tourists."

If the Germans expected to develop a pleasant social life in Norway, with people of blue-ribbon standards as far as being Nordic and Aryan is concerned, they have been greatly disappointed. They encounter nothing but social disdain. German officers who requisition living quarters in luxurious homes — a common practice — usually find themselves in possession of the entire house.

In vain have the Germans tried to overcome this program of making them feel like social lepers. Only small children and irresponsible hangers-on listen to the military band which plays outside the Parliament building at noon each day, in an effort to charm the Norwegians with music. And when the band marches away, the small boys are likely to trot along singing, "Thieves, thieves, who stole our Fatherland," in untutored adaptation of an old song. The only spectators along the flag-decked street when Goebbels arrived in Oslo were German soldiers, although streets only two blocks away were crowded with pedestrians.

Meanwhile, the affection of the Norwegian public for the king and royal family reached a new level after the Germans announced, last September 25th, that the Norwegians no longer had a king. German propagandists emphasized that the Norwegians accepted "without protest" this dethronement of their monarch. But the Quisling regime has found it necessary to issue a decree making it punishable by up to three years' imprisonment to write or speak publicly about King Haakon.

At a recent benefit performance in Oslo for a retiring actress, the audience saw a member of the Quisling govern-

THEY'VE GOT THE IDEA—

CALL FOR PHILIP MORRIS

TRUE SMOKING PLEASURE—WITHOUT SMOKING PENALTIES!

DO YOU INHALE?

All smokers do—some of the time

IT'S easy to understand that when you do inhale — consciously or unconsciously—there's increased exposure to irritation! Here's something vital—long known to eminent medical authorities:

4 other leading brands of cigarettes were found to average 235% more irritant than the strikingly contrasted Philip Morris—and further, the irritation was found to last more than five times as long!

So—especially if you inhale—Call for Philip Morris—*complete* smoking pleasure, unmarred by throat irritation! Philip Morris' superiority for the nose and throat is *recognized* by eminent medical authorities: *no other cigarette can make that statement!*

AMERICA'S FINEST CIGARETTE

ment and his party enter the royal box. The audience didn't hesitate. They came to their feet, hurled everything they had at the people in the royal box, from umbrellas to rolled-up programs, and left the theater.

At a football game, a sport often attended by Haakon, the spectators, in keeping with old custom, began singing the King's Song as though heralding the entrance of the king. Through loudspeakers the German officials practically threatened death to the entire assembly. For the words of the King's Song are sung to the same tune as the British national anthem.

Fruitlessly, the Germans try to turn aside this affection for king and royal family. That Haakon has been "deposed" only makes the Norwegians chuckle. And in Norway there exists good proof today of the success of monarchy as the Scandinavian peoples have indulged it. If a royal family before satisfied the need for poesy in the life of the Norwegians, it stands now as a symbol of a way of life that has been lost to aggression.

Norway Bides Its Time

The German propagandists, working through the Quisling government, are no more successful in their unrelenting efforts to win over the Norwegians to Nazi ideology. They have had some success, but only where force and compulsion can have full effect. Of Quisling himself it can be said that most Norwegians would hate him more if their hatred were not so tempered by amusement. There have been various rumors, so far not confirmed, of attempts on Quisling's life. Known Quislingites are careful where they walk. And the Germans themselves realize that this former Norwegian army officer, with his heavy, nonclassical features, his posturing in a manner most reminiscent of Hitler, has no hold on the sympathies of the Norwegian people. That he has been unable to bring men of any real standing and repute into his government is even more to the point. In the last election to the Stortinget (parliament) in 1936, Quisling's party polled only 26,000 votes or about 2 per cent of the total. In some areas today anti-Quisling posters are being slapped up faster than the police can take them down—when the police bother about it.

Where will it all lead to—this growing campaign of the Norwegians against their German invaders?

First, to a further development of the very spirit of resistance, and the development as well of real un: rection, so far lacking.

Second, an increase in ance, as circumstances pe

DIX, NEW JERSEY: More 0,000 fficers and men occupy June he number may reach rafte who arrived yesterday stand y and watch this morn- pou n. "New guys," mutter lay s diers scornfully.

ONE company may eat well; the one across the muddy street may wonder what the hell is coming next. Fault lies with the mess sergeants and cooks, not the commissary. The boys use individual mess kits which they clean by dunking in thirty-gallon cans of hot water. Every man will be a dishwasher until plates are provided—and the lads on K.P. aren't looking forward to that with any degree of glee whatever.

LAST October the Army condemned miles of territory near the camp for a new artillery range, duly evicted the residents of various farmhouses and now sends two-man patrols by truck nightly over every one of the lightless miles. When one of these units spotted a blaze of light from a second-story window of an abandoned house deep in the woods the sergeant summoned two more patrols, just in case. They abandoned their trucks at a distance, surrounded the joint and two of the men crept stealthily up the stairway. These two gentlemen listened at the closed door whence light streamed, heard nothing, agreed in whispers to bash down the door and see what came. Bash they did. Inside the room a private was pumping air for an old reed organ; his sergeant, hands poised above the keyboard, was ready to give out with something. The sergeant said (forty-seven words deleted here).

SGT. CHARLES MARSH, Co. H recreation center, has earned those three stripes. An Army man for nearly twenty-eight years, has served in practically every spot recognized by the Atlas manufacturers. In the present emergency he has found only one man who wasn't particularly willing to play ball. This was a rookie who, at the conclusion of a disciplinary bawling-out, plopped his rifle butt on the ground and assumed the mien of a gorilla. "Look, fella," growled the gorilla. "I just done six months for what I done to one guy and I could easy do six months for you." Sgt. Marsh lifted one eyebrow slightly. "All right, buddy," he said. "But first you got to do twelve months for the Army. That's all, brother."

●

RECOIL: The 250th Coast Artillery at Fort Ord, California, may be out for the Army basketball championship, as we reported, but Pvt. Edward Scott Taylor of the 147th Field Artillery doesn't think the 250th has a chance. "Undefeated so far this season," he writes, "we beat the 250th by ten points —37 to 27. It wasn't the lead we expected, but our team wasn't told it was going to play that night until after mess, which had included wienies and sauerkraut for some of the guys and large gobs of baked beans for the others. They weren't in the best shape but they got around the floor anyhow."

That's traveling on the old full stomach.

THERE were two things wrong in our anecdote about the recruit on work detail who was yapped at by a colonel for not saluting and who retorted: "You're just a mess sergeant. I can tell by the chicken on your collar." Several colonels here and there made haste to tell us we ought to get wise. (1) Men on work detail don't have to salute officers, (2) a colonel's spread eagle is worn on the shoulders.

Shucks. That spoils the story.

G. W.

EMBLEMS OF EXCELLENCE

STANLEY CUP. In major league hockey the Stanley Cup has for 47 years been the emblem of the World Hockey Championship Title. As shown in the picture at the right, the rings that make up the base have been added to the original cup to provide room for engraving the names of the team and players annually winning this coveted trophy. To get its name on the cup a team has to be *good*.

ETHYL EMBLEM. There is a "Stanley Cup" for gasolines too. A gasoline in a pump which bears the Ethyl emblem has to be *good*. It must be "tops" in anti-knock (octane) rating and all-round quality. "Ethyl" means a quicker-starting engine in cold weather; a cooler-running engine in summer; extra power and economy the whole year through. When you stop to buy gasoline, the Ethyl emblem tells you which pump contains the best.

WHAT SECRETARIES REALLY THINK...

29% longer lasting flavor in Beech-Nut Gum, tests with 615 secretaries show

IN 26 CITIES throughout the country, 615 secretaries tested peppermint chewing gum. They reported that Beech-Nut's peppermint flavor lasted, on an average, 29% longer than the peppermint flavor of all the other brands tested. In addition, 2 out of 3 said that they preferred the peppermint flavor of Beech-Nut to that of the other brands. When *you* buy chewing gum, get the *yellow* package of Beech-Nut. *It's delicious.* Discover how long and how much you enjoy its better, stronger peppermint flavor.

An independent consumer research organization made the tests*

615 secretaries in 26 cities were tested. Various brands of peppermint chewing gum were bought in local stores and re-wrapped in *plain* wrappers. Each secretary was given two different brands (Beech-Nut and one other), asked to report how long she thought the flavor of each stick lasted and which stick tasted better. Beech-Nut was thus tested against all the other brands.

**Name on request.*

They said:
more minutes of flavor

mayor, "you'd enjoy seeing our spots of historical interest? I know that Woodrow and Miss Sutton would like to drive you around tomorrow."

"Thank you," Winthrop said warmly. "I'd be glad to accept."

AT NINE the next morning a mockingbird swore at a blue jay in the magnolia outside Woodrow's bedroom window. Never an impulsive riser, he opened one eye cautiously. Then as he groped into consciousness he realized that the weatherman was a liar. For the sky was unclouded and the Southern sun poured forth golden energy.

It struck Woodrow as a good omen. He yawned optimistically, and just at that moment his landlady's voice carried upstairs:

"Woodie, somebody to see you. . . . Gentleman, name of Mr. Winthrop, says you made an appointment."

Woodrow groaned. He had, to be sure, used the word "early," but without supposing that anyone would take it seriously on Sunday morning.

Still drowsy after his shower, he dressed and came downstairs to find Carver Winthrop bursting with vitality. "I always take a brisk morning walk," he explained. "So I looked up your address instead of waiting at the hotel."

The colored girl served Woodrow a sketchy breakfast, and when he returned to the living room Winthrop wore a masterful smirk. "Your landlady," he announced, "has become Port Leon's first Perfex client! I just signed her up for a new oil heater."

Mrs. Dulcie Simcoe had the dazed and slightly silly expression of a hypnosis subject. Woodrow was awed, knowing her convictions against extravagance and Sabbath breaking. He reflected gloomily that she might raise her rents.

Upon relaxing in the 1934 coupé, Carver Winthrop observed that a sales manager, like a general, should never lose touch with the firing line. "Of course," he said, "I shall credit my sales to the local representative I hire. It gives him an incentive and keeps me from growing lax."

They stopped in front of Abbie Ann's home and after a wait of forty minutes she emerged, looking deliciously sleepy. "Why, Mr. Winthrop!" she exclaimed. "You've brought your overcoat."

"I haven't forgotten the weather forecast," he said hopefully. But his eyes paid tribute to her zephyr-weight sweater.

Woodrow drove first to the bayou, pulling up near the bathing beach to display the view. The blue water looked inviting, and on the opposite shore the tender green of the palmettos stood out against live oaks draped with Spanish moss.

Winthrop seemed impressed. He leaned forward, his eyes half closed, until at last he was moved to speech. "At Dartmouth," he remarked dreamily, "I liked skating and skiing most of all."

Woodrow felt that he had never met a more repulsive character. The sales manager was not fascinated by the oak under which Andrew Jackson had once paused to rest. Nor did he show any enthusiasm about the buried pirate treasure. In disgust Woodrow drove out into the country, expertly dodging the cows, pigs and goats which disputed the highway with motorists in a free-range commonwealth.

On open stretches it became evident that the growing chill was not entirely due to Carver Winthrop's personality. The sky had turned a steely blue, and the broken window of admitted a breeze that caressed.

out and the newsboys were passing out free copies. Woodrow glanced at the first page, observing that a two-inch Iowa snowfall had inspired the banner headline:

BLIZZARD THREATENS NORTH

He had discovered the Perfex spread on page six when the Clarion publisher entered with Winthrop and Abbie Ann. Smiles wreathed his plump features, giving him the hypnotized look Woodrow had already seen on the landlady's face.

"Mr. Winthrop," he said, "has kindly consented to sell us one of his demonstrators."

As if conferring a boon, the sales manager produced the papers. "Indelible pencil, if you please," he said as Mayor Digby reached for a fountain pen. "A minor precaution, but I try to guard against accident." He glanced at his watch, then turned to Abbie Ann. "Now," he said briskly, "we have six minutes before our appointment with the school board."

Carver Winthrop thought of everything.

As they went out, the mayor stood by Woodrow's desk with a doting expression. For he was a romanticist at heart, despite his edict against married women on the city pay roll.

"A splendid couple!" he murmured huskily. "They remind me a little of a movie I saw once. . . . A movie about a Northern spy and a beautiful Southern girl."

ON TUESDAY morning the mercury fell to new and strange levels. The skies were still hostile and the wind continued to rattle the palmettos with the effect of chattering teeth.

Yet, after recovering from the first shock, Port Leon reacted with perverse pride. People bragged of their frozen plumbing as overcoats shamelessly appeared out of storage. School children, awarded a holiday because of inadequate heating, ran whooping to the bayou to slide on the first natural ice of their lives.

The carnival spirit seized tourists for

YOU'LL ALWAYS BE CONSTIPATED UNLESS—

You correct faulty living habits—unless liver bile flows freely *every day* into your intestines to help digest fatty foods. SO USE COMMON SENSE! Drink more water, eat more fruit and vegetables. And if assistance is needed, take Dr. Edwards' Olive Tablets. They not only assure *gentle* yet *thorough* bowel movements but ALSO stimulate liver bile to help digest fatty foods and tone up intestinal muscular action.

Olive Tablets, being *purely vegetable*, are wonderful! Used successfully for years by Dr. F. M. Edwards in treating patients for constipation and sluggish liver bile. Test their goodness TONIGHT! 15¢, 30¢ and 60¢.

whom winter was ordinarily no treat. Sales resistance dropped with the thermometer, and before noon the shops and bars of Main Street were doing an exuberant commerce.

Woodrow Wilson Chase, alone of all his townsmen, took neither ease nor joy in Camellia Week. Though the new Perfex exuded a genial warmth, he remained cold and indifferent to it. He was morbidly watching the gay crowds on the sidewalk when the sales manager burst into the office, followed as usual by the mayor and Abbie Ann.

"Chase," he said abruptly, "could you dig me up a pair of skates?"

"Skates?" echoed Woodrow, too stunned for resentment.

"Skates. The radio says fair and warmer tomorrow, and I want to have my picture taken on the bayou before the ice melts."

Mayor Digby chuckled fatuously. "You know, with palms and Spanish moss in the background. Mr. Winthrop is leaving us tonight and the photo will help future sales campaigns. He's already sold nearly everybody in town a Perfex."

Port Leon's greeter was obviously helpless in the toils of a crushing personality. Abbie Ann, too, seemed to betray her climate. She had never looked more achingly young and deluded.

Woodrow stood up. He stared with peculiar interest for a moment at Carver Winthrop's early colonial nose. Then he relaxed.

"I'll see," he said.

He tried first on Main Street. The quest reminded him of freshman days when he was sent to borrow a left-handed monkey wrench. People responded with the same mixture of pity and mirth, but to a man they denied knowledge of a pair of skates within the borders of Port Leon.

Woodrow persisted in a spirit of dark fatalism. He had slept but little the night before, nor had his wakefulness been due to scorning the hot brick proffered by his landlady. Now, chilled and weary, beset by grins and quips, he was in a mood for martyrdom.

AFTER lunch it seemed a good idea to inquire at the flower show. But in the hotel lobby he was almost trampled by ladies deserting the camellias for a rush to doors and windows. A few scattered snowflakes were falling outside, and nobody in Port Leon cared to miss such a spectacle.

At last he discovered a pair of skates cherished as an heirloom by an orange grower lately removed from Minnesota. It was midafternoon when Woodrow drove back to town, and the headlines of the Clarion were stripped naked of civic pride:

COLD BREAKS LOCAL RECORDS.

In this atmosphere of insanity it did not surprise him to find a large crowd waiting at the bayou. A dozen youngsters scrambled for the honor of bearing the skates to Winthrop, and a moment of anxiety followed as he tried them on. Several people applauded when the Perfex executive nodded approval.

It was like him not to trust the ice until he had chipped a hole near the edge and paused for mental arithmetic. He took a few tentative strokes ending in a tricky reverse. He bent over to study one of the runners with calm interest. And then, without warning, Carver Winthrop exploded into a series of figures so dazzling that they could have been compared only to fireworks.

The usual laws of balance were repealed as he wheeled, dipped and swayed in widening circles. Woodrow watched with sick absorption. Though he had won Boy Scout swimming honors on this beach, his medals tarnished when he caught a glimpse of Abbie Ann. She was holding Winthrop's coat, her lips parted devoutly.

Still, the sales manager was too good a showman not to leave his audience in suspense. At the height of his exhibition he stopped to beckon the photographer. After slowly skating back and forth, he chose a spot where he could pose his profile to advantage against a semitropical background.

An impulsive shout of warning stuck midway in Woodrow's throat as he remembered a warm spring near that very spot. He had discovered it years ago while diving, and now his conscience struggled with an overpowering fascination.

The contest was close, considering the odds against his conscience. But before the moral issue could be decided, the ice shattered and the black waters of the bayou leaped up to embrace Carver Winthrop.

THERE was an awful silence, rent by the first shrieks from the crowd. Above them all could be heard the imploring bellow of J. Eldridge Digby.

Afterward, Woodrow credited himself with honest intentions, but his townsmen did not give him time to put them into effect. As a champion swimmer, he was nominated by popular acclaim to be Port Leon's hero. His last impression was one of melancholy self-sacrifice, then the icy water engulfed him and Winthrop clutched with both arms.

In the emergency Woodrow proved faithful to his life-saving training. He held his breath to the surface, and his numb fist seemed to travel with the deliberation of a slow-motion picture. Yet it connected solidly and he landed another just to make sure. The white, frantic face blurred and the arms loosened. After that it was easy to catch the rope thrown out to them.

They were dragged to shore by a newer generation of scouts who found Carver Winthrop a prize. It was long since the boys had enjoyed a real first-aid victim, and they began pummeling and kneading his unconscious form with enthusiasm.

Nobody paid any attention to Woodrow. Feeling alone and friendless, he was halfway to his car before Abbie Ann caught up. He noted with wonder that it was Carver Winthrop's overcoat she wrapped about him.

She tucked him into the seat and took the wheel. "Honey," she said, "don't talk! Abbie Ann's taking care of you."

The Historic Home Defense of Colonial Days . . .

. . . through the years marches the [illegible] — *Home Defense!* [illegible] many an old Colonial [illegible] — protected [illegible] of the Nation by [illegible] of Pure White Lead.

. . . *the time-tested protection of*

PURE WHITE LEAD . . .

Ready for the Brush!

Today, the home defense of the Minute Man is ready in a new, up-to-the-minute form. DUTCH BOY PURE WHITE LEAD PAINT—*ready to brush on*—steps into line beside the Dutch Boy's famous *paste* white lead!

★ ★ ★

The new paint is Pure White Lead—all ready to spread! New in form but proved in performance. Yes, if these old New England homes could talk they'd tell you white lead paint's time-tried secret of keeping houses young. How it hugs tight, hugs *long*...wearing down slowly, *smoothly*, instead of cracking and scaling off. Ask your painting contractor what this means to you. He'll tell you it makes white lead paint cost less by the year. And says the expense of burning and scraping off the old paint when you finally do repaint.

"You're Money Ahead When You Paint With White Lead"

Yes, the new Dutch Boy Pure White Lead Paint is *news!* You bet it's news—for now you can get real Dutch Boy White Lead *all ready to brush on!* In addition to this new convenience, you'll also get gleaming whiteness and great hiding power, at a gallon price no higher than that of regular quality paint.

★ ★ ★

Want to make yourself a smart paint buyer? Then send for free booklet, "Styling with Paint the Dutch Boy Way" containing 32 illustrations in color. Address Dept. 361 care of nearest branch office listed at right.

2 COAT WORK. The new Dutch Boy comes in two forms—Exterior Primer and Outside White—specially designed to do a real white lead job on new or old work in 2 coats.

WHEN YOU TELL A BEAUTIFUL WOMAN "*You Go Your Way*" BE SURE YOU MEAN IT!

CONNIE WAS EVERYTHING people think a beautiful Young Woman of Manhattan should be. She lived for parties, people, clothes—oceans of clothes. And nobody knew how Bill, her husband, hated to tell her she couldn't have them. But he needn't have dreaded it so much. Connie was going to have what she wanted, anyway.

Bill had been gay enough when they married. But after trying for four years to cope with all their expenses, he made a mistake. He grew up, he grew older. Connie never aged a day.

For awhile he continued to take Connie to all the parties but it was no use. Even staying awake became a problem after twelve o'clock. And so he took to telling Connie, "You go without me." Connie did.

Then it was amazing how many beaux and boy-friends simply sprang into action. Of course, Bill couldn't be jealous of these pip-squeaks, Connie said. Everything was quite okay. But was it? As Bill looked back he realized that you could be so civilized it made a sap out of you.

You'll love Connie. And you can't help liking square-jawed, genial Bill though you may want to kick him just once where it would do the most good. Don't miss this gay and deeply moving story of mad Manhattan, "You Go Your Way."

an excuse," Marge said. He'll be ten days up s alone with—"

"Not alone," I said. "Tim'll be there, and the caretaker."

"Alone in the mountains," Marge went on, "with that woman. Hunting all day with her, and then being alone with her at night with the moonlight and things. You know how romantic and impressionable George is."

"It isn't that bad," I said.

"Yes, it is," Marge said. "I know George."

"In that case," I said, "being a man of direct action I would say there is only one thing left to do. We could go up to Conovers' and bring him back."

"And let that woman know I'm jealous of her?" Marge looked at me as though she doubted my intelligence. "No . . . not that. I have an idea. That's why I called you up because you have to help me with it, and it's the only way. You have to take me hunting, Jeff."

"Hunting?" I said.

"Hunting," Marge said. "I have to win back George's respect in the only way I can. I'll have to try and be the thing he wants now. If I could just kill something. Something big that he'd admire. . . ."

I said, "Dear, dear, dear. . . ."

Marge began to cry again. "Don't make fun, Jeff, please. I'm desperate and it's the only way I can think of. If I could just kill a bigger elk or moose or something than he does, maybe he'd respect me again. If I can only do things the way Cass does. You can see that, can't you, Jeff?"

It was a very crackpot scheme in my opinion, and I couldn't see it at all. But I said, "All right, Marge, I'll see you through on this. But we have to have a chaperon."

"I thought of that," Marge said. Apparently she had thought of everything. "We can go up to Stewart's and stay there with Pop and his wife."

I said, "Stewart's?"

I didn't like that idea, because Stewart's is only across the divide from the Conovers', say three or four miles; and anything less than a hundred miles is uncomfortable proximity to me if I am escorting another man's fiancée without his knowledge or consent.

"Why not?" Marge said.

op bothering Alvin! He came over to play cards with you"

JOE EASLEY

I didn't say anything and she said, "You have to do it, Jeff. You can't refuse."

She started to cry again, and maybe it was her crying, or maybe it was the Scotch that did it. Anyway, I finally said I'd take her hunting. She cheered up immediately.

"When do you want to go?"

"This afternoon," she said. "As soon as we can."

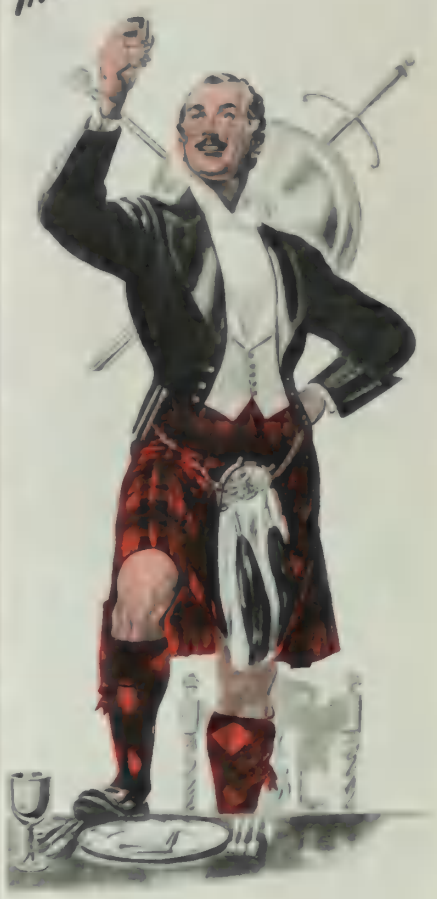
So, considering the lack of breakfast and the Scotch, it was with something resembling surprise that I came to about thirty minutes later to find myself prowling through two inches of dust in my attic and littering up the floor with hunting gear. I had all the trunks open and was pulling out odd lots of hobnailed boots, and skinning knives, and wool pants, and rifles and ammunition. And last, but hardly least, I rustled around finding two shirts of a very violent red because some of the sportsmen in these parts are not very discerning and will shoot anything that moves unless it is identified in some way that is unmistakable at a distance.

SO, TO be brief about it, we went hunting and there I was, and I didn't like it. Or I suppose I should say there we were, because Marge was with me, of course, but I still didn't like it. I still thought Marge was crazy, and in spite of all her assurances to the contrary, I had a very definite suspicion that George and I would not be the best of friends after he found out about our little excursion. There are limitations even to friendship.

I tried to console myself with the thought that I valued Marge's opinion of me more than I did George's, and that I was helping Marge, or at least she thought I was helping her, which amounted to the same thing; but in spite of that I wasn't in the mood for the enjoyment of a perfect outing. And it would have been perfect under other circumstances. The weather was ideal. The air was keen and bracing, and six inches of snow on the ground made it fine for tracking.

We ate a big breakfast, and Mom Stewart put up some sandwiches for us, and when we started out Marge said, "Can you pray, Jeff? We just have to get something. Something big."

"Don't you worry," I said. "This is fine game country. We'll get something."



We did, too!

It happened up on top of the divide. We had picked up the trail of some deer about two miles above Stewart's and followed them until the tracks split going up a pass over the range. Some of the tracks went up one side and some up the other, and I suggested that we part company and follow both bunches. That was all right with Marge. She took the left side going up, and I took the right side, and just before we split I said, "We can meet up on top, and if we don't jump them by that time we can eat lunch and hunt back along the ridge."

The sun was high by that time, and the glare of it on the snow almost blinded us. Marge turned away and started off up the hill and after she was out of sight in the timber I started up my side.

I can see now that the time element was important in view of what occurred, but I had never hunted that country before, and it was pure accident that I happened to get the side where the going was toughest, and that Marge beat me to the top. Or you can call it fate,

"May we aye th' Truth an' Faith defend"

Just as it has been good form, since the clans began, to offer a toast with one foot resting on the bare oaken table, it is good form today to raise a glass of Teacher's. Good form *and* good taste; for in Teacher's a host presents one of Scotland's finer whiskies.

There's More Pleasure in a Good Pipe

if you prefer being poetic about it, but that is what happened.

I don't suppose it was more than two miles to the top from where we parted, but it took me better than two hours to make it. It was almost noon by then. I was getting hungry, and the minute I hit the top I began bearing off to the left to meet Marge.

I found her after the first half mile. There was a gale blowing on the ridge and when I first saw her she was almost out of sight in a clump of timber, out of the wind. I started to yell at her but she saw me at the same time, and started making motions that I translated as meaning keep quiet, and hurry. I ran as fast as I could through the snow, and when I reached the timber she said, "Jeff, dear, I saw something. Something moved in the brush."

THE tracks she had been following went over the brow of the hill and down to a line of timber and buckbrush that followed the bottom of a draw. The glare of the sun was in my eyes, and I couldn't see very well.

"I can't see it," I said.

"I can," Marge said. "It's something brown. It isn't moving now but I can see it. What do I do now?"

I said, "Shoot."

"I'm so excited," Marge said. She had the gun up and was squinting along the barrel. I still couldn't see what she was shooting at.

"It has to be a big one," Marge said. "It must be a big one!"

"Go on and shoot," I said.

She handled a gun very competently for a woman. I had had my doubts about that at first, but she took the gun down from her shoulder and set the rear elevation at two-fifty, and settled down with a double arm rest in a sitting position and went to work.

The crack of the gun whipped out across the valley. Marge fell back under the force of the recoil and I saw a commotion in the brush.

I yelled, "You got him," and started running down the hill with a great deal of disregard for my anatomy. Marge was coming behind me but I had a head start and I was at least fifty yards in front when I hit the brush. I plowed through to the spot where I'd seen the movement and then I stopped with my mouth hanging open, because what I saw wasn't exactly what I had expected to see. For a minute I was so surprised I couldn't even speak. I heard Marge coming through the brush calling to me, and her voice sounded anxious.

"Did I hit him, Jeff?"

"Yes," I said, "you hit him."

"How lovely," Marge said. "Did I kill him?"

I said, "No. No, you didn't kill him. He's still able to sit up and swear." And then things began happening all at once.

George looked up from where he was sitting holding his leg, and said, "Don't stand there like a fool idiot. Do something!" And I said, "What?" And then Marge came through the brush and took one look and fainted, and altogether it was a fine situation.

I am a man who can usually collect himself in a crisis, but in the face of two crises I was completely bewildered. As far as I could remember, the situation had never been paralleled in my experience, and there I was with a wounded man, and a swooning woman, and not knowing which one to help first when Cass Conover came through the brush. I had never been a great admirer of Cass' type of woman, but at that moment I could have kissed her, especially when I thought what a mess it would have been if she had been a weak-female type and had fainted, too.

It didn't feaze her a bit. She looked at me and said, "Hello, Jeff." Then looking at George she said, "Who did it?"

For some reason I said, "I did."

"He did not," George said. "Marge did it. I heard her say so."

"Oh, Marge . . ." Cass said. "Let me see it. It can't be very bad."

It wasn't. It turned out to be just a superficial wound in the fleshy part of the thigh, but from the way George carried on you would have thought he'd been shot through the stomach. Cass took a skinning knife out of her belt, and cut the pants away from the leg, and then started dressing it from a pocket first-aid kit that she carried. She did it very efficiently, too, in spite of the fact that George was howling at the top of his lungs, and squirming and kicking.

"George," Cass said, "you sound like a kid with the croup."

"Croup," George yelled. "Listen, I'm shot."

"If you don't shut up," Cass said, "I'm going to finish the job with a knife."

I was rubbing snow in Marge's face but it hadn't had any effect up to date. I said, "What do you do for a fainting woman?"

Cass came over and propped Marge's feet up higher than her head, and then she went over to a little creek that ran down the draw and came back and dumped a hatful of water in Marge's face. Marge came out of it sputtering, and stared at George for a minute and said, "Oh, I've killed him. Oh, George!"

That went on for a while, and then she proceeded to develop one of the most A-1, triple-action cases of hysterics it has ever been my misfortune to witness. She started laughing and crying all at once, and Cass Conover slapped her so hard you could have heard it smack clear back to Pop Stewart's. Her teeth clicked together, and when she opened her mouth to whoop, Cass slapped her again.

"Hey," George said, "don't you dare slap Marge."

"You keep your nose out of this," Cass said.

After the fourth slap Marge stopped the hysterics and settled down to just a plain, everyday, garden variety of weeping, saying, "I've killed him," at intervals.

Cass said, "Don't be an idiot. He isn't hurt."

George yelled, "Hurt," in a very grieved tone. "I'm dying. Get me to a doctor."

He insisted that he couldn't get up and Cass said, "Come over here, Jeff. Grab an arm."

WE GOT him to his feet, and then he insisted he couldn't walk. Cass was getting pretty disgusted by that time, and she was all in favor of leaving him and letting him get home by himself, but Marge started crying at that, so we compromised. We got one of George's arms around me, and one around Cass, and started down the gulch, half carrying, and half dragging him. He weighs about two hundred and ten, and it was tough work. Marge was coming along behind crying, and George was groaning, and I was panting, and Cass was swearing, but we made it all right.

We made it a mile and a half down to Conovers', and got George in the car and took him in to town to a hospital. We dropped Marge off at her house on the way. They gave George a shot of antitetanus serum, and put him to bed. By that time I was pretty tired.

Cass came out of the room and lit a cigarette and said, "A good hunting trip spoiled. Take me home, Jeff. I need a drink."

I needed a drink, too. I took Cass home and had two or three drinks there, and then I went home and had another drink, and went to bed.

I woke up some time after noon the next day, and the phone was ringing.

ed it Marge said, "Jeff

ll do you expect?" I said.

"Going hunting in a dun-colored coat and playing around in the brush. Of course, it was an accident."

George just looked at me. "I might have known you'd lie about it," he said. "Accident!"

Right then I saw my chance to torpedo a beautiful romance below the water line. It is all right to be sporting, but there are limits even to sportsmanship. I remembered all the dirty things George had done to me during the course of our rivalry, and I thought, "All is fair in love and war."

"George," I said, "I can see there is no use in trying to deceive you further. Marge told me she would rather see you dead than in the clutches of a designing woman. Although," I said, "I didn't think she meant it literally at the time."

George sat straight up in bed. "I knew it," he said, but the outburst I had expected didn't take place. Instead of that he began to look dreamy and romantic. "The eternal woman," he said. "The mate. The mother. Tender and gracious, but fierce in her protectiveness. . . . That's love, Jeff."

He was lying there perfectly contented, and he didn't even notice me when I went out.

THAT all happened a year ago, and it is now water under the bridge; but I will never understand emotional reactions. George and Marge Lattimer are known as the most devoted couple in our town, and I can still get a feeling of satisfaction out of knowing that I was responsible for their reconciliation; yet it goes further than that.

It has made a new man of George. He has grown in moral stature and he now has an air of confidence and a feeling of his own worth that he never had before. It is a marvelous thing. I often think of it when I meet George at the club and we have a drink or two on the porch, and I know that his happiness and increased success are my doing.

And as I said before it is a fine thing; but the part that strikes me as being the most singular thing about the whole affair is that although George and I are the best of friends I never go to the Lattimer home for dinner, or to visit in the evenings the way you might think I would. I don't go because Marge Lattimer won't let me set foot in the house.

just little idea of mine, Mr. Barns—to get you perfectly relaxed"

ROLAND COE

With 300 Gins to choose from:

The Advantage is with Gordon's

BECAUSE...
Gordon's has the advantage of Liqueur Quality and High Proof, 94.4.

and BECAUSE...
Drinks never taste thin with Gordon's Gin.

• Because there's no gin like Gordon's, it naturally costs a little more—but you get the advantage of Liqueur Quality and High Proof, 94.4. That means richer flavor, velvety smoothness—drinks that never taste thin!

Gordon's Gin

100% Neutral Spirits Distilled from Grain

Copr. 1941, Gordon's Dry Gin Co., Ltd., Linden, N. J.

Prove it yourself...
TASTE THE DIFFERENCE
CAPTURED FLAVOR

Three of the famous "Taylor Family." You'll like the soft, smooth flavor of Tawny Port . . . an all-occasion favorite. For cocktails that make friends exclaim, "That's delicious" . . . use Taylor's Vermouth (dry or sweet) that ranks with the world's finest. And for bridge or dinner serve Taylor's Sherry . . . another popular member of the famous Taylor family of still wines and Champagne.

★ ★ ★

"Pedigreed" wine-grapes, at their peak, are plundered of a rich treasure in flavor. The secret Taylor Cellar Treatment "captures" that flavor, blends it into Wines of Character. Ask for Taylor's when you dine out . . . Buy Taylor's for home use . . . at your local package store.

His Girl Blondie

Continued from page 14

Bumsteads' milkman is a stock character. So is their mailman. Both are drawn from life, and both are celebrities in Great Neck.

"Everything goes into the strip that goes into an American middle-class home," Young says. "The milkman and the mailman go into every such home every day. That's why Daisy is there. Almost everybody who lives in a house has a dog—at least, it sounds like it at night.

"The three things of universal interest are sex, food and sleep. Sex is out of my strips, but a great many of them deal with food and sleep. The first thing Dagwood does when he comes home is peek into the pot, to see what he's going to get for supper. And when he isn't thinking about eating, he's taking a nap. I know that's true to life, because I'm always eating and taking naps myself."

Young is like Dagwood in more respects than those. Like Dagwood, he has a pretty young wife—the former Athel Lindorf, of Rock Island, Illinois, a member of a harp ensemble. Like Dagwood (soon), he has a boy and a girl—Dean, two, and Jeanne, one. Like Dagwood, he has a dog—Rod, a Boston bull terrier. Like Dagwood, he lives in a suburb. But there the resemblance stops. Dagwood has one foot on the ladder. Young is already close to the top. In a few months his is expected to be the biggest-selling comic strip in the world. Right now it brings him more than $100,000 a year.

Chic Young was born in Chicago forty years ago. His mother calls him by his real name, Murat, but everybody else calls him Chic.

The Young family all drew but father. He ran a shoe store. Mother and brother Walter painted in oils. Sister Jamar became a fashion artist. You've seen the strip called Tim Tyler's Luck; it's drawn by brother Lyman. Chic studied shorthand and got a daytime job—as secretary to the general freight agent of the Illinois Central—so that he could go to art school at night. He had been there five weeks before anyone noticed him. Then an instructor stopped by his board, shook his head and walked away.

A Gag that Wasn't Funny

His tuition fee wasn't wasted, though, because one of his fellow students was "Abe" Martin, who now draws Boots and Her Buddies. Even then, in 1922, Martin was good enough to graduate into a job with the Newspaper Enterprise Association, a feature service whose headquarters were in Cleveland, and presently he wired Chic to hurry over with samples of his work.

Chic stayed home from the office for a day, hacked out three strips called The Affairs of Jane—"when I think of them now, they give me the shudders"—coaxed a railroad pass out of his boss, and headed east. N.E.A. hired him at once. Salary, $22 a week.

The boys at N.E.A. had a favorite gag. They'd phone a newcomer and tell him they represented Marlen Pew, an executive in King Features Syndicate, and that Hearst, who owned it, wanted him to sign up.

Chic was wise when his turn came. "That's wonderful!" he said. "I can't discuss it over the phone, so why don't you drop in at the apartment tonight?"—and gave a fake address.

That night his phone rang again. It seems that the caller really did represent Marlen Pew and was, at the moment, somewhere out in the wilds of West Cleveland. When Chic had finished apologizing, he managed to explain that he had a year's contract with N.E.A. and couldn't leave. By the time his year was up, The Affairs of Jane was being syndicated to a hundred papers. Chic didn't care. He bequeathed it to the company and rushed to New York, to King Features.

"Mr. Pew?" they repeated. "He's gone on to another job. Who wants to see him? Chic Young?" Nobody in the office had ever heard of Chic Young.

Another year passed before he finally landed with the outfit. His springboard was Dumb Dora, a strip which is now memorable chiefly for the fact that one of the characters, Rod Ruckett, was a caricature of the artist. He drew Dora from 1924 until 1930. It was on September 8, 1930, that Blondie first appeared.

The Bumstead Saga

For the benefit of friends who came in late. Dagwood is the son of J. Bolling Bumstead, who owns five railroads, and Blondie is the daughter of a Mrs. Boopadoop. Dagwood's family disowned him when he eloped, and they haven't been in the strip since. Neither has Blondie's mother. The date of the wedding was February 13, 1933. Baby Dumpling was born on April 15, 1934. He was christened Alexander, in honor of Flash Gordon's creator, Alex Raymond, who was Chic's assistant at the time.

A name has not yet been chosen for the new baby sister. Chic looks no farther into the future than her birth. She will age normally, of course, as Baby Dumpling has, and their parents will become stout as they grow older—Chic thinks of Dagwood as twenty-nine now, and Blondie as twenty-seven. A new reader can pick up the strip and be right in the swim.

The simple truth is, Chic has no plans at all, even when he sits down to his drawing board at nine o'clock Monday morning. He says, "After doing this work for eighteen years, I'm still starting with a blank piece of paper, and there's nothing so blank as a blank piece of paper at nine o'clock Monday morning."

He does all six of his week-day strips at a stretch. The first is the hardest. The second comes a little easier, because something in the first may suggest it. The six must be finished by Tuesday evening, if he has to work straight through Monday night.

Wednesday he answers his mail in the morning and plays golf in the afternoon.

He gets fifty to a hundred letters a week in the summer, a hundred to two hundred in the winter, and he answers every one. Most are from fans requesting autographs or original drawings, novice cartoonists begging for criticism or advice, and people offering ideas. Usable ideas are few. Chic doesn't think he's been given two dozen in his career. Occasionally the mail brings him a present, prompted by something in the strip—a flashlight, a cake mixer, a pipe, a can of insecticide. When Dagwood observed, "A sandwich isn't any good without cheese," the Minnesota Cheese Association appreciatively came through with a ten-pounder.

Chic's advice to novices is short but valuable: You can tell if your drawing ink is dry by rubbing it with your hand, and you can remove inkstains from a rug by soaking the spot in milk and then cutting around it with scissors.

Thursday and Friday are for the Sunday page. Saturday morning he draws

...man as a "guy," or to a woman as a "battle-ax." He never makes fun of a representative of a group or a profession. Plumbers, for instance, don't forget their tools.

"I don't think of people as stupid or ornery," he explains. "I'd rather say something nice about them."

When his week's stint is completed (he has to keep four weeks ahead of publication with the daily strip, eight weeks with the Sunday), it goes to the syndicate office where it is scrutinized for misspellings and technical mistakes. The only time the editors had to revise a Blondie strip was when Dagwood brought home a potted zinnia which, they felt, looked more like a camellia.

The office also does the translating for foreign distribution. In France, Dagwood is known as Emile, Baby Dumpling as Papouli, Daisy as Titus. In Sweden, Dagwood is Dagobert and Baby Dumpling is Putte. In Latin America, Blondie is Pepita, Dagwood is Lorenzo, Baby Dumpling is Goyito and Daisy is Turco.

Chic pretends to know nothing, however, of the daily squawks that his strip causes. Squawks? Rather, they are downright riots. And they spring, of course, from "friendly" discussions of which is the funniest strip he ever drew.

Group A favors the one in which Dagwood comes home and finds a plate of those silly little bridge-party sandwiches, left over from Blondie's game that afternoon. He looks at them contemptuously, then gets two big slices of bread (Group A's spokesman has to wipe his eyes and catch his breath at this point), claps a dozen between them, and munches a sandwich-sandwich.

Group B, which has been waiting impatiently to have its turn, now shouts, "Okay, but how about *this* one—!"

Dagwood tops his six-decker sandwich with a thick sprinkling of pepper. Just as he is about to bite in, the pepper gets up his nose and he sneezes. A slice of ham lights in Blondie's lap, pickles and ketchup and onion fly all over the room, a piece of cheese hits Daisy (here the narrator collapses and has to have his collar loosened), and a fried egg spatters on a chair. Blondie's line is, "I always knew one of your sandwiches would explode!"

Well, they're both pretty funny strips. In fact, *very* funny. But if you want to know the absolutely funniest strip Chic ever drew, it was the one about the time Dagwood was taking a bath, and Baby Dumpling—

Bam! Splat! Oof! Zowie!

Hungry Nerves

By Hannah Lees

ILLUSTRATED BY GEORGE DE ZAYAS

Thiamin may be the answer to the doctor's—and patient's—prayer. Still in the experimental stage, it already has helped cure neuralgia, shingles, D. T.'s, heart disease and indigestion. Not a bad start

A MAN came into a well-known New England hospital recently in bad shape. Very bad shape. Trees, he said, were growing out of his bureau drawers. Lampposts were walking around the room spitting at him, and there were soldiers shooting and a little boy with his legs cut off. The doctors in charge didn't need to smell his breath to know that his trouble was delirium tremens, and they started treatment. They prescribed a quart of whisky a day; four ounces every three hours awake or asleep, whether he wanted it or not. And at the end of three days he was cured.

Now the doctors who gave this remarkable treatment weren't trying to prove the hair-of-the-dog theory, or even just to make the patient happy. It probably didn't make him happy at all, but they didn't care. What they were interested in proving was that it isn't basically liquor that causes delirium tremens; that too much whisky doesn't have nearly as much to do with the trouble as too little of something else, too little vitamin B_1.

Along with his quart a day they gave their D. T. patient large intravenous injections of vitamin B_1, and almost as soon as he began getting the shots his brain began to clear, whisky and all. They tried this quart a day plus shots of vitamin B_1 on four other patients with delirium tremens and they all got well in an average of two and a half days. To make extra sure they took five other D. T. patients—sober old New England is apparently full of

SMOKE MEANS TROUBLE!

SMOKE from the ironing-board—and smoke from your car's exhaust—both mean trouble! Next time you're trailing a car with a smoking exhaust, keep this in mind: Smoke is a common symptom of excessive engine wear, wear that squanders gas, oil and power—wear that only costly repairs can correct.

And this needless wear all too often results from nothing more or less than failure of *ordinary* oil—due to heat, due to cold, due to impurities.

Before it's too late, save yourself worry, trouble, expense. *Before your car becomes a "smoker",* change to Insulated Havoline Motor Oil.

For Insulated Havoline is especially made to resist the higher temperatures to which oil is subjected by the modern, high-efficiency engine.

Even at zero, Insulated Havoline flows freely, prevents those cold, "dry" starts that can damage pistons and cylinders.

No carbon-forming impurities in Insulated Havoline either, thanks to a special distilling process that removes them.

Change to Insulated Havoline now at Texaco and other good dealers everywhere.

DISTILLED AND

INSULATED

... AGAINST HEAT ... AGAINST COLD

DON'T WAIT TILL YOUR CAR SMOKES!

Don't be one of America's caravan of 3,000,000 "smokers."
Help reduce needless, expensive wear in *your* car.
Change *now* to Insulated Havoline Motor Oil.

TEXACO DEALERS INVITE YOU TO ENJOY

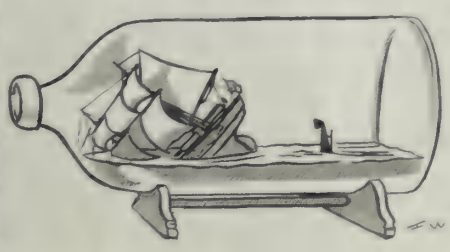
we'll do well to stick to ht now, because, the world plex place it is, vitamin B be at least eight different nd again about the only ht different vitamins have that they are all found in and in other rough grains, liver and yeast. They're ether like one big happy pretty assorted family.

tinic acid for one impor- of the family, and if you tinic acid you get pellagra re's vitamin B_2 with the e of riboflavin, and if this m your diet for very long pleasant kind of sore lip st beginning to be able to ere's vitamin B_4. It hasn't human experiment stage, are deprived of this little lie down on their sides, turn cartwheels and die, or so I'm told on good authority. There are several others they are just beginning to separate out of the complex they used just to call vitamin B. And then there is vitamin B_1, which can bring men out of delirium tremens even while they're still getting a quart of rye a day.

Vitamin B_1, by the way, if you'd rather call it by its name than by its letter and number, has been officially christened thiamin. Thia for the sulphur which it contains and amin for the amino group that it is in. Want to see what it looks like chemically? Okay. $C_{12}H_{16}N_4SO_2$. Think of needing infinitesimal quantities of all that so you won't see pink elephants!



Anyway, It Worked

What made those New England psychiatrists think that maybe lack of vitamin B_1 had something to do with pink elephants was one of those trains of thought that are always leading scientists to strange places. Lack of thiamin caused polyneuritis. Everybody knew that by now. But one of the commonest other forms of neuritis was alcoholic neuritis. People had always thought it was the alcohol that caused this neuritis. But now look, there was diabetic neuritis too, and neuritis of pregnancy. And diabetics were very apt to live on limited diets low in starches. And pregnant women were apt to eat strange and unbalanced diets and burn up a lot more nourishment than normal individuals besides.

And here came the final link: People who drank too much were usually too busy drinking to eat. In fact, people who drank enough to get alcoholic neuritis—or D. T.'s—often didn't eat at all but just lived for days on alcohol, which, after all, is almost as full of calories as chocolate fudge but singularly lacking in vitamins of any kind. However, if they did eat their digestive systems were likely to be so upset by the alcohol that they didn't absorb much food, including vitamin B_1.

What it comes down to is that vitamin B_1 is turning out to be a sort of universal nerve food, the kind of thing the country-fair medicine men used to love to sell at a dollar a bottle without any vitamins in it at all. Because if all these things are due to lack of vitamin B_1 they ought to respond to treatment with vitamin B_1 and they all do. For some time, in fact, before these New England doctors tried their quart a day plus treatment, other doctors had been giving B_1 to people with alcoholic and diabetic and interesting-condition neuritis, and in each case getting rid of the aches and pains. And then other doctors began wondering, if this little vitamin was good for all those troubles due to undernourished nerve ends, why mightn't it be good for other nerve troubles that nobody'd ever been able to do much with?

Some began trying it on shingles, that unpleasant disease that starts with intense pain along a nerve path and then develops into whole rows of horrid fever blisters following the trail of the nerve along the skin. And they found that shingles, which they might have expected to last for a matter of painful weeks, when treated with vitamin B_1 became a matter of much less painful days.

Other doctors have used B_1 to treat tic douloureux. Tic douloureux is that excruciating tri-facial neuralgia that you're apt to run across in detective stories as giving the suspect a legitimate right to take dope and contort his face and act in a generally suspicious manner. And the detective stories aren't exaggerating. I know of at least one man who committed suicide because the pain of it was so unbearable. Until recently the only really useful treatment has been a difficult operation that actually severed the offending nerve. But some doctors are reporting that shots of vitamin B_1 do a good deal to relieve the excruciating pain.

Another doctor I know has been using thiamin for migraine. Not for any very logical reason; migraine has been considered chiefly allergic, though nobody really knows. Not with any very logical system, he gives far, far larger doses of the stuff than you'd ever run across in any normal diet, larger amounts than any human body could possibly be deficient in. But nobody has proved that migraine is allergic. Migraine headaches might just as well be nervous, and perhaps they are. At least several very miserable people with migraine headaches whom this doctor has injected with tremendous doses of vitamin B_1 are sure of it, for their headaches have disappeared.

Anything as new as thiamin, especially anything that has done such spectacular things, as it has in the various neuritises, is bound to be used to death. Some authorities are advocating putting a small quantity of it in all liquor just to counteract any possible alcoholic neuritises or spitting lampposts, and not a bad idea either except that it might make too much of a virtue of drinking. Another authority with an adding-machine mind has calculated that exactly three million, forty-six thousand, seven hundred and twenty symptoms can be due to deficiency of the vitamin B complex in all its many combinations.

And No Harm Done

Most sensible doctors won't go that far, but a good many of them are beginning to think that a lot of our vague aches and pains may be from not enough thiamin in our diet. And they're probably right, for where would we get it? How many of us ever eat any rice but polished rice and how much brown or whole-wheat bread compared to the nice, refined white kind. Unless we have pernicious anemia we don't eat much liver compared to other meats. And as for yeast, we certainly don't get enough of that to amount to much. Maybe this idea of putting thiamin in liquor and more practically still in white bread, as one company has been advertising recently, isn't such a bad one. Particularly since, as far as anyone can find out, too much thiamin can't do you any harm even if you don't need it.

Animals have been cut off from thiamin and their digestions have been seen under X-rays to get all sluggish and torpid and then speed right up when they were given a shot of the stuff. Doctors are beginning to think that perhaps that bankers' ailment called Wall Street colic or LaSalle Street colic may not be as much a result of the hectic lives they lead as of the deficient lunches they eat—or drink. And lots of poor appetites seem to be just a vicious circle, the less you eat the less vitamin B_1 you get; the less B_1 you get the less you eat. At least many of the unexplained variety of poor appetites vanish under shots of vitamin B_1.

As for heart disease, well, it may seem a far cry from neuritis to an enlarged heart but the Chinese don't think so. As long as there has been beriberi there have been two kinds: dry beriberi, which

NOW MORE NECESSARY THAN EVER BEFORE

THE NATIONAL ENCYCLOPEDIA

Now at an Unbelievably Low Price

Now at its low price everyone can afford to own this modern authoritative Encyclopedia!

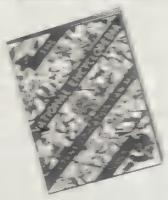
Never before has it been so necessary to be *armed with knowledge!* In these tumultuous times the only chance of world salvation, the only assurance of future security can come through understanding, through knowledge! Yet much of what you learned no more than a decade ago is *obsolete!* The need for new, up-to-date knowledge shouts from the housetops. But where can you find the answer?

HERE IS THE ANSWER

Thousands upon thousands of men and women have discovered that there *is* a key to the solution of the confusion and disturbing mysteries of this frightening world! They have found it in the great National Encyclopedia, which places at your fingertips a library of living, vital facts . . . literally gives you the answers to the maze of questions aroused in your mind by current events.

SUPREMELY USEFUL

Here is a work so modern and up-to-date that it covers all late world events and political changes, so comprehensive and thorough that it surveys the entire range of human knowledge, so useful that it is found in business offices, radio stations, newspaper offices and in the principal public university and school libraries throughout the country.



It is so universally accepted that its thousands of owners represent a complete cross-section of the American public.

SYMBOL OF OUR AGE

The National Encyclopedia is a symbol of our age, fresh, alive and supremely useful. It has sold with the rapidity of the best-seller contemporary novel, so perfectly is it in tune with what people want in a reference work. The National Encyclopedia is the ideal work for the American family, for every home with children of school age, and for every man and woman who can ill afford to be satisfied with anything other than the best in reference material.

Send TODAY for the full description of this superbly new Encyclopedia, with details of prices, terms, and types of bindings. This information will be sent you *free* and you will be placed under no obligation to purchase.

is polyneuritis, and wet beriberi, which is an enlarged heart with shortness of breath and a rapid pulse and general puffiness. Nobody can tell me why they both have the same name, but now what they seem to have in common is a crying need for thiamin. The aches and pains of dry beriberi vanish away under thiamin, and so does the enlarged heart of wet beriberi. Melts away, as one scientific writer poetically puts it, like snow under the summer sun. I have actually seen X-rays of a patient with this sort of tremendously enlarged heart taken before and after. The one taken after three weeks of thiamin dosing was amazingly smaller, right down to normal again, and with no digitalis, which is usually the first thing given in heart disease.

I can't explain these heart and digestive symptoms from thiamin deficiency as plausibly as I could the nerve symptoms. Hundreds of research workers are doing hundreds of experiments to try to find out the whys and wherefores: experiments with plants, with human tissue, with guinea pigs and with human guinea pigs. And all they can tell us is that thiamin, when it is ab into certain specific enzyn as catalysts to help cell promote growth. Which vague to me but will have morrow. They're probabl out a lot more about th next few years or even may find out that some of just been telling you abo after all, but they're almo to find out that a great m remarkable things are tru

the shine of their hide got to do with the way they pull?"

"I dunno." Sandy said. "Maybe a horse likes to look nice, same as a man."

Red roared with angry mirth at that, and in the days and weeks that followed he continued to ridicule Sandy's solicitude for his team. As though to prove his point, he somewhat neglected his own; yet that was a winter when a man needed a good team. They were cutting spruce and hemlock on the high ground north of the river, and every stick of it had to be hauled down to the landing to wait till the ice went out in the spring.

The men, routed out long before dawn, struck the first ax into the tall trees as soon as it was light enough to see. Camp was on the edge of the intervale, at the foot of the hill; but twice a day old Ike Marner, the cook, hauled a robust meal of pork and beans and biscuits and pie and coffee up to them, in a two-wheeled cart with a pair of birch poles lashed to the axle and trailing behind to hold the cart on the steep grade when the team stopped to breathe.

The hill was a quarter mile long, and it was a bad one. If it had been a few degrees steeper, Jock MacIlroy would have built a slide and let the great logs go down by gravity; but as it was, they used a snub line. This was a hawser a full three inches thick and long enough to reach from the top of the hill to the bottom, with some to spare. When a teamster reached the top of the pitch with his sled loaded high with logs, he stopped and took the end of the hawser and passed it around the load, throwing two or three half hitches so that it would draw tight and hold. With the bight of the line he laid four or five coils around a three-foot hemlock stump at the head of the grade, and then started his team down the hill. The weight of the heavy hawser kept a pressure on those coils around the stump sufficient to check the load.

EXCEPT on the hill itself, the road was glare ice, sprinkled every night; and on this glassy footing a team could move a tremendous load. But on the hill, there was no ice, and whenever snow fell the men cleared the worst of it away; and dirt and sand and small boughs were thrown in the way to give friction that helped check the heavy descending loads. The road down the hill ran as straight as possible; but left turn near the top, and gradual near the botto turns were well banked to to hold the heavy sleds pointed path.

The heavier the load came down the hill, but S that his own sled loads w reasonable bounds; and wore on, Red began to der excess of caution. Also b scure reasons it had bec to his own self-respect himself a better man every way, he handled loads, working his team t ing them cruelly hard.

ON a day in January, F from the cutting, st legged atop his tremend above the ground; and a post he checked the hor down. He threw the end around the load and mad he mounted the load aga whip to his horses, and the traces, their feet flyi the load down the hill.

The first pitch was They passed the first t into the steepest part of were halfway down it wh hawser jerk like a pluck felt the shock run th under his feet. Instant his horses, shouting at t but behind him the we parted, and suddenly t logs was sliding free.

There was another t descent below them. T massive burden gathe horses breaking into a r their heels, and Red jur a flying leap and lande and feet, sprawling in sled plunged on. The d raced to outrun it, but w ing hand upon the reins and the sled overtook th them scream, and the m below heard them scre at the cutting, half a m the high land, heard the piled into them, the ch the great logs cascaded fallen horses, smashin bloody pulp.

like a bull and rolled him in the snow; and then Jock MacIlroy was on top of them, spinning Sandy away while Red scrambled to his feet. Red was raging to get at Sandy, but Jock had his ax in his hand; and he said curtly:

"That's enough, Red." He called old Fergus MacConnell, whose team this had been. "Gentle those horses, Ferg," he said, "and take that load down. You'll drive from now on. Red, get your ax and go to swamping." He added flatly: "Or roll your bed and get out of camp!"

Some thought for a minute that Red would jump Jock again. He stood with lowering eyes, taut and scowling. But then Fergus tried to swing the team, and the nigh horse squealed and bit his mate and reared and straddled the traces; and half a dozen men leaped to steady them, and Red grinned maliciously.

"Go it, Ferg!" he called to the man who had displaced him on the load. "You're welcome to 'em, for all of me!"

He was laughing, but when he caught Sandy's eye he stopped laughing; for it was Sandy who had rolled him in the snow. "I'll teach you to keep yore hands off of me, farmer," he said grimly. "But that can wait a spell." He clambered on Ferg's load to ride down and fetch his ax; and the team headed away for the landing.

SANDY did not speak. He went on to get his load of logs. They were cutting a vein of big spruce, two feet and better at the butt, sawing the stuff to fourteen and sixteen feet where it fell. Sandy helped load four logs, and three atop them, and two, and one to cap the pile. He saw them snugly nested and chained. Ten logs of that size would have been too much load for some teams, but Sandy's team in Sandy's hands could handle them.

As far as the snubbing post at the head of the steep pitch he brought them briskly. The road was glare ice, banked at the edges with old snow long since packed and frozen hard. On the level they moved the sled easily; and for the occasional short upward slope Sandy gave them a flying start.

At the top of the hill he halted them. The snub line lay loosely coiled around the old hemlock stump, one end of it in sight four or five rods down the first pitch, the other end going on down the hill to where Fergus on his last descent had loosed it from his load when he reached the level intervale. Sandy hauled in the short end and bent it around his load and threw the hitches to hold it. He ordered the coils on the snubbing post, taking up what slack there was; then climbed up to stand poised on the single log which topped his load, eight or nine feet above the ground. He spoke to his horses, cheerfully yet briskly, gathering the reins.

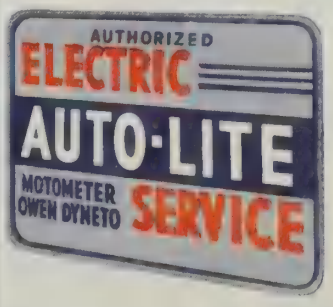
"So Blackie! Mike! Take it away!"

They chose their vantage with mincing hoofs, tightened the traces and threw their weight into it. The sled lurched forward, slewed a little sidewise, then started down the hill. Here there was no ice under them, and little snow; and they had at first to work to keep the sled moving, till the grade increased and helped them. The long end of the snub line, sliding up the hill as they went down, was on Sandy's left. He kept the team to the right to leave it clear.

As the grade increased, the road made an easy left turn to clear a boulder that had been too big to move. A young hemlock, three or four inches through, grew there and fended the snub line away from the boulder; and Sandy noticed as he approached the spot that the winter's work had worn that hemlock through. It was broken off since his last trip, and the line was running now against the ice that sheathed the side of the boulder. The hemlock must

Original Factory Parts Perform Better, *Save Money*

TWO simple steps can save you money on car repairs. Go to a reliable service man; insist on service parts built by the original equipment manufacturer.



This is particularly important when it affects the electrical system of your car.

More than half of America's car manufacturers standardize on Auto-Lite electrical equipment. To cut repair cost, eliminate the possibility of failure on the road, see the man in your neighborhood who displays an Auto-Lite sign. Because he is an automotive electrical expert... specially trained... equipped with accurate testing devices, he can put his finger on the part causing trouble and correct it. The Auto-Lite Service Sign is your guarantee of expert workmanship and original Auto-Lite parts at a fair price.

HIS BUSINESS is saving you money by keeping little troubles in your car from developing into big ones.

have fallen under the strain of the last descending load. Sandy made a mental note that something must be put to replace it before the line should begin to rasp against the naked boulder itself.

He saw Red, just below the turn, tramping back up the hill to the cutting with his ax over his shoulder. He hoped Red would lift a hand in greeting, but Red did not even look up as Sandy and the team went by.

Below the turn, the steepest part of the descent began. The sled slid almost of its own weight, and the horses needed only to give it a twitch now and then to keep it moving. Sandy guided them with a light, sure hand; a quiet word.

He was five or six rods below the turn when the sled under him vibrated to a sharp flip of the line; it lurched forward more sharply, then checked again. Sandy knew what had happened. Somewhere up the hill behind him, between him and the snub post, a strand in the hawser had parted.

THERE was still a chance that the remaining strands might hold, or that the sled might check sufficiently so that he could swing the horses sidewise off the road and twitch the sled around and bring it to a halt. He gathered the reins to take that chance if it came.

But it did not come. A second strand let go, and the sled plunged ahead as the third strand straightened. Then it too broke under the heavy strain, and the sled was free. It began inexorably to gather speed.

Sandy yelled sharply to the horses. He flipped the reins, and they felt the sled upon their heels and leaped into a headlong run. Sandy, high above them, might have jumped; but he did not. He settled his calks into the great log he rode and steadied Big Mike and Blackie with firm hands upon the reins and took his chance with them.

Within three rods, the sled was in full career, the horses racing headlong, hurling themselves down the sharp descent with an avalanche of death upon their heels. They tried to swerve aside, but Sandy held them in the road. If they swerved, the sled plunging straight on would whip them off their feet, roll them under and crush them utterly. Speed was their only chance, and Sandy's steadying hand upon the reins.

So they ran, and Sandy atop the load, crouching a little to hold his balance, spoke to them in low, pleading tones that yet were clear and bold, urging them on. The steepest part of the descent was perhaps twenty rods in length. Beyond that, the grade became progressively less as the road made out into the intervale for the half-mile pull to the landing by the river side. If they could keep ahead of the sled till the grade began to ease, they might win through; but till then any slackening of their pace, or a stumble by either one, and the sled would run them under as a liner runs down a helpless fisherman in a foggy night on the banks.

Sandy did not think of his own danger, though that was real enough. If the horses fell—or even if the chains which held the logs should break—he would be caught and crushed as easily as a fly; but he forgot that, intent only on doing all a man could do to help his team win through.

It seemed to him a long time before the grade flattened out ahead of them. After that there was still ten or twelve rods to go to reach the level intervale, but now the pace of the sled was no longer accelerating, and presently it would begin to slow down. Yet the horses by this time were running so fast, in blind and desperate flight from the sure destruction on their heels, that as the sled slowed they began to bring the traces taut again, to put some traction on the load. Sandy swung them around the last turn, and saw th of the wood ahead, and the i beyond; and then they burst the cover of the trees and hit t iced road across the level to the

The horses were still in ful and the sled here needed lit Its own momentum was so gr when it hit the ice it seemed ahead. Sandy began to gather t to check by ever so little, and w more than with hands, their race. The great pile of log landing seemed to leap towa In their panic they might plung into it, to be crushed by the hind; but Sandy little by littl them and he swung them at las soft snow, not deep, beside t The snow checked the sled traces lent their pull to Sandy reins. "Hush now, little man! Hush! Be easy! Have some sense, Sandy! You know well I'd never want to hurt you nor your team!"

THEY found the answer when they went up the trail to see. Where that small hemlock had been chafed through, letting the hawser rasp against the boulder, someone had tossed aside, in the fall when the camp was young, a bottle that had held rum. The bottle broke against the boulder, and the bottom half of it had been buried these weeks since in packed ice and snow till the sliding hawser wore the ice away and laid the keen edge bare. The broken glass had cut into the hemp in fifty places; and when the cut places slid around the snub post and took the weight of the load, these severed strands began the break that the weight of Sandy's load finished.

Sandy was contrite when he knew. "I'm sorry, Red. I was an awful fool to think you'd do a thing like that! Now I've busted your nose and all." He grinned at himself. "And I was a bigger fool to think I could handle you!"

Red chuckled. He was feeling fine! Lusty violence had purged the ugly humors out of him, and it was good to be in the right again, and—he had always loved this little man. "You nigh had me," he proudly confessed. "You were plumb numerous for a while. I didn't know if there was one of you or ten, and the church bells were ringing in my head!"

"You filled my dish!" said Sandy. "But I needed worse than I got, for blaming you at all. I'll find a way to make it up to you."

Red grinned and clapped the other's shoulder. "Why, that's easy done," he said. "Just let me stand up with you and Molly when the drive is down!"

You can't wear that to a picnic, dear. Keep it for a formal party where you don't take off your coat"

GEORGE SHELLHASE

There are approximately umpteen thousand people in this photograph of Coney Island beach. (You have our permission to count them, if you doubt our figure.)

There are approximately 100,000,000,000,000,000,000 grains of sand in Coney Island beach. (If you doubt it, we refer you to that delightful and intriguing book, *Mathematics and the Imagination.)*

But it really isn't very important, to us or to you, exactly how many people there are in the photograph, or how many grains of sand comprise Coney Island beach. In cases such as this, figures of the roughly-speaking or it-is-estimated variety do very well.

Not so in the case of Business and Industry!

Management needs accurate figures—on profit and loss, sales and markets, production and inventory—and it needs those figures fast. For figures—accurate, up to date and objectively interpreted—are the basis for many of Management's most important decisions.

That fact explains why Comptometer adding-calculating machines, and modern Comptometer methods of handling vital figure work, play such an essential role in the theater of American enterprise . . . why the phrase "Comptometer Economy" is becoming synonymous with *"more figure work handled in less time at lower cost."*

Felt & Tarrant Manufacturing Company, 1714 North Paulina Street, Chicago, Illinois.

"Their Finest Hour"

ANY dawning now, Hitler's invasion forces may sneak across the Channel or the North Sea or both and hammer at the walls of Britain's island fortress.

Hitler is said by some military authorities, although there are no trustworthy figures available for publication, to have as many as 36,000 to 70,000 planes, 225 divisions of soldiers (ten to twenty of them armored, with 450 tanks apiece); fleets of ingenious barges and deadly little torpedo boats; heavy complements of parachute troops and air-borne infantry; perhaps some tank-carrier planes; bombs of unheard-of explosive power, a silent airplane engine, aircraft-detection gadgets of all but human intelligence.

Against this array, the British from general report can pit an army of about 2,000,000 soldiers, 2,000,000 home guards, a Royal Air Force inferior in quantity but superior in quality to the Luftwaffe, a huge and intricate system of beach and coast defenses and most of the superb fighting ships of the British navy. Perhaps the British also have a "blue wonder" up their sleeves—a mechanical "blue wonder."

There is one "blue wonder" (Hitler's phrase) which the world knows the British have—their eternal courage and stubbornness; their downright mental inability to be frightened by bluff or propaganda or to know when they're licked. And it may be that that quality will win for them in the end.

As to that, we don't attempt to

How to Teach Democracy

LAWRENCEVILLE, famous prep school, announces a new course for all its fourth-formers—a course in the fundamentals of democracy.

That sounds bad at first: calls up memories of high-school textbooks in civics, than which earth knows no drier, to the best of our recollection. But the Alma Mater of Owen Johnson's Tennessee Shad, Doc MacNooder and Dink Stover doesn't plan this course to work out that way.

Lawrenceville intends henceforth to show its fourth-formers how democracy's essential wheels go around. There will be open forums, field work, outside reading, lectures by informed and interesting experts rather than by professional patriots, some social-service work—all designed to show the students how our democracy really works today, instead of pumping them full of hoary theories on how it ought to work.

It sounds good to us. This is obviously the way to propagandize for democracy inside a democracy. Make it interesting. Let the facts speak for themselves, and show the boys just how and why their lives are more livable in a democracy than they would be under some other kind of government. And above all, hire persons of imagination, vision and enthusiasm to do the teaching.

In which connection we remem
fession of a young reformed R
printed some months ago by our
league, The American Magazine.
the main reason why he had joi
munist party was that at no tim
been taught, either in school or
very things that Lawrenceville p
its students.

We expect to follow this exper
terest, we wish it every success.
it turns in the answer to the prob
make democracy come alive in t
hearts of the young people of at le
cratic nation.

Freedom for Saboteurs

IT APPEARS that our key labor law, the Wagner Act, can be so interpreted as to forbid employers to hire detectives to track down saboteurs in their own plants. That seems passing thick to us.

One of the original objects of the Wagner Act, of course, was to wipe out the labor-spy racket. That was and is an excellent object. The practice of hiring spies, finks, stool pigeons, etc., to bulldoze workers out of joining unions is a vicious practice. In its prime it worked perhaps a thousand injustices and tyrannies for each genuine labor faker or racketeer that it thwarted.

But when the Wagner Act is used to keep employers who are actually menaced by sabotage artists from hiring detectives to ferret out wreckers and jerk them into criminal court, that is going too far. That can't have been the intention of Congress when it adopted the Wagner Act. Now, with defense the
special No. 1 Item on the natio
Wagner Act loophole for sabot
through is intolerable.

Amendment of the act in th
Congress is strongly indicated—
rulings on the point by the Natio
lations Board. We can't see a
fooling around about it, either.
too critical for dilatory tactics.

Is it True what I Hear?

Is Plymouth actually the Lowest-Priced of "All Three" Leading Low-Priced Cars on Many Models?

1

Is it True that 4 out of 10 New Plymouth Buyers are Switching Cars—Trading in Other Makes?

2

Does the Old Saying "Look at All Three" mean More Than Ever Before to Thrifty New-Car Buyers?

3

Yes—IT'S ALL TRUE!

IT WILL PAY YOU to make a few comparisons...and ride in the beautiful new Plymouth...before you decide on any 1941 car! *You'll be money ahead!*

Plymouth's 117-inch wheelbase is longest of "All 3" low-priced cars. You enjoy a spacious Fashion-Tone Interior—and new smoothness on the road.

Plymouth's new High-Torque Performance with new power-gearing means less shifting. And you get the great new Safety Rim Wheels (exclusive with Plymouth in the low-price field)...designed to prevent a flat tire from rolling off the wheel.

You get an Oil Bath Air Cleaner, new High-Duty Engine Bearings, Front Coil Springs—on even lowest-priced models. See your Plymouth dealer! *Prices subject to change without notice.* Plymouth Division of Chrysler Corporation.

Tune in Major Bowes, C. B. S., Thurs., 9 to 10 P. M., E. S. T.

COVER REA IRVIN

ANY WEEK

TO OUR amazement we find that this is not the first time a threat of war has come to an unprepared America. But that's what comes of spending too much time in Washington, listening to too many politicians. Why, in 1917 one of the outstanding naval commanders of the day issued orders to an ensign to proceed to Square Twenty, wherever that was, and do something about submarines. We get the whole story from Mr. W. H. Thomas of Neosho, Missouri, and Mr. Thomas got it from the record. The ensign reported to the commander that the ship in which he was ordered to capture submarines was without guns—therefore would the commander install a gun or so at once. The commander became haughty—the guns were not needed; proceed at once, sir. Whereat the ensign went to the supply officer and made requisition for one dozen boat hooks. The supply officer, properly enough, wanted to know what the young man wanted twelve boat hooks for. Said the ensign: "I am ordered to report to station and look for subs. But the vessel has no guns and I am ordered to proceed without them. I am therefore ordering the boat hooks so that we will have something with which to catch the subs and bring them in."

AMONG others, Mr. Lewis Simons, of The Citadel, a military college in Charleston, South Carolina, makes protest against the place given the name of that school in our recent editorial By Bits and Pieces. As everybody recalls, the editorial urged the integration of our various military schools that our Army might break the officer bottleneck that's now worrying the general staff. The editorial said nothing about bottlenecked officers. Nor is that what The Citadel complains of. The trouble is context. The editor cited the schools in the following order: "V.M.I., Norwich, Culver, Shattuck, New Mexico M.I., New York Military Academy, The Citadel, Staunton, Augusta, etc." Says Mr. Simons: "Because of the tremendous circulation of Collier's, a definite harm has been done this institution by the place it was given in the editorial. Our 1,300 cadets are scandalized but I trust none of them will be discourteous in his effort to set right the editorial staff of Collier's." Thus far only two of the scandalized cadets have made any effort to set us right, both of them informing us as officers and gentlemen that the writer of that editorial is a tramp who would be the better for a smack in the kisser. So, adjusting our old school tie, we're sorry. The Citadel is a front-rank military college with deservedly lofty traditions.

THE moment we get time we shall consider the case of a young lady who confesses that she is "almost three years back on Deanna Durbin." She explains that she collects articles about Miss Durbin and photographs too. Three years ago this magazine published a piece about Miss Durbin, with photograph, and our young lady has just caught up with it. She'd like to have copies. "I have 1052 articles about Miss Durbin," she writes, "and 983 photographs and reproductions. I have three personal letters from her too. I hope I haven't got you confused."

A FRIEND of ours who's a member of a draft board received a reassuring letter from a young man whose number was getting pretty well up on the list of selectees: "Dear sir. I am an electrician who is very busy. If my number comes up and things are in bad shape and you can't wait till I get home at night, send somebody around to Kelly's on Front Street. I'll be working there for the next two weeks."

WE HAVE returned to Mr. Bert B. Hogan of Grand Rapids, Michigan, the sum of one dollar. We hope that his contribution eventually reaches the proper hands. We can't take the responsibility. "Please send this buck to the Greek army," writes Mr. Hogan. "Tell them it's from me and is to be used to buy ten scups coffee and ten pieces strumberry pie for the boys."

PERHAPS we'd better speak to our editorial writers. People are reading what they write. We haven't had such a week for weeks. There was one —Nova's Novel Notion; a plug for Mr. Lou Nova's thumbless boxing glove ideas. The idea seems to be that if there were no thumbs on boxing gloves, there would be no thumbs stuck in boxers' eyes. For some reason, boxers don't like to have thumbs stuck in their eyes. This is very silly and, according to the Honorable George H. Watson, mayor of Romantic Alta, Utah, and Big Brave of the Roaring Gulch Lode of the Great American Prospectors Association, very pantypants. We are, of course, using Mr. Watson's own words. "What good would a man without thumbs be in a fight anyway?" demands Mr. Watson. "The boys of Romantic Alta and Roaring Gulch spend two weeks getting their thumbs in shape before every meeting of the GAPA. I am now organizing a company of thumb fighters in case we have to fight Popeye Hitler. These boys won't want any mechan and they don't want ar out thumbs either. Yo been out here last electi zens had to be led h thumbed in. And fou southpaw fighters had thumbs reset for the Ch ties."

BEING patriotic, Mr Chawder of Oakland, C like to know "what par America will play in the It was while we were answer that we got a l Howard Keller of Ki suggesting that all con houses, go home and t take their places in W don't know whether it an improvement," sig "except that the wome to F.D.R. and that'll b admit that the noise v bad. I was wondering be like if Congress wa tirely of lady Senator V on the same subject M rich of Little Rock, Ar with a really startling suppose the Honorabl Long were still with us

AND speaking of Huey lusck of Fort Wayne, I that under the cover furor many of our r ing politicians will be be unable to resist t they spurned before th switched from them t "Nobody's paying an our governors, legisla local patriots, and for twenty-five years they says Mr. Bellusck. EACH CAN SAY

"I WAS A CLERK"

"I WAS A LINEMAN"

"I WAS A DRAFTSMAN"

RTY-EVEN years ago, in 1904, the presi-
of the American Telephone and Telegraph
pany went to work as a clerk in one of the
System companies.

bout that time, the 18 men who are now
ores ents of the Bell telephone companies
sta ing their careers. For, like the head
he System, they have worked many years in the business — an average of 38 years each. Each of them can say: "I was a clerk," "I was a lineman," "I was a draftsman" — and so on.

The "know how" is here—for the every-day job of running the telephone business or to serve you in emergency. Up-from-the-ranks management is doubly important these days.

BELL TELEPHONE SYSTEM

THE BELL SYSTEM IS DOING ITS PART IN THE COUNTRY'S PROGRAM OF NATIONAL DEFENSE

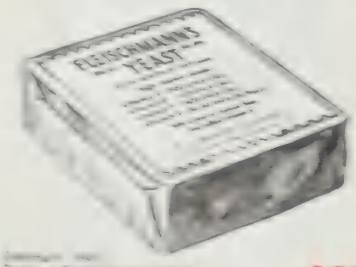
You'll like yeast this new way

BOB: Drinking it! . . . By golly, I got a notion to take it up again. I felt swell when I was eating yeast, but I never liked the taste.

SOPHY: Go ahead. Now you can stay with it long enough to get the good out of it . . . and there's more pleasin'. Tastes like yeast-fresh bread, easy to mix. What more do you want?

BOB: Sure! I always knew the authorities were right when they said "yeast is one of the richest sources of the amazing vitamin B complex," and "more vitamins" is my favorite motto.

SOPHY: But maybe you won't get enough of those vitamins. So try yeast first thing in the morning, last thing at night . . . And we'll bet you don't find a seat on top of the world!



MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a big glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way! It's quick, too . . . while business takes less than a minute!

Fleischmann's *Fresh* Yeast

DRINK IT . . . TO YOUR HEALTH!

Stewardess Margaret Mellon serves a C. & S. Air Lines passenger—food aloft matches that of the best restaurants nowadays

YOUR doctor has always told you that you eat too much. Your wife has always told you that you eat too quickly. It was inevitable that airline stewardesses—being trained nurses who, in their professional solicitude for your welfare aloft, usurp certain attributes of both physician and wife—would critically analyze your plane food. So now comes Miss Margaret Mellon to confirm the worst fears of the Missus and your family doctor.

Miss Mellon (she is "Miss American Aviation" to her publicity department because of a national-contest title she won) flies between Chicago and New Orleans—both well-known gourmet paradises—for C. & S. Air Lines. She has "timetabled" your eating habits in the air.

It takes the average traveler, Miss Mellon observes, only half an hour—or "100 miles," as they say in the air where time is calculated by distance—to finish off a whole meal, from bouillon to burps. The schedule:

Twenty-five miles for a bowl of soup—and dainty pecks at the olives, pickles, and celery with Roquefort.

Forty miles for the main dish—although spring chicken à la Louisianne might take a few miles longer than steak or lamb because of the bones to be picked.

Twenty miles for the salad. Meanwhile, of course, you're munching along on the rolls, corn sticks and butter.

Fifteen miles for the dessert—ice cream or gooseberry chiffon tart, or whatever.

One hundred miles is average. Miss Mellon reports with considerable misgivings that far too many of us reach the mints, toothpick and nap in 85 miles or less. She doesn't know quite what to say about one fellow who ate for 401 miles.

IT REMINDS us of the first time this problem of feeding customers was faced by American commercial aviation. That was back in the mid-twenties, when the old Western Air Express began to fly the so-called "Guggenheim Model Airway" from Los Angeles to San Francisco.

There were no stewardesses in those days and the management could turn to no one but pilots to get firsthand advice on what to serve in flight. Pilots are always hungry—those of 15 years ago especially so, and they arranged menus that would founder a fullback. Pea soup, breaded veal cutlets with boiled potatoes and thick gr... pie with store cheese. A d... too snack. There were no ... the planes; no way to keep th... SAFETY? There's

19 FEET OF GRIP

in every foot of this tread!

...new improved first-line "G-3" All-Weather . . . 20% longer-wearing . . . yet it costs you less per mile than ever before!

In these days of rising material costs, the ability of manufacturers to maintain values is being put to acid test.

Many are the solution to raise prices, or cut quality. But Goodyear is doing neither.

Instead, you pay less for the new edition of our famed first-line tire, "All-Weather—the world's standard of tire value—*but you get a better tire.*

How much better? Well, down the years we've been running leading makes of tires until they wore down to the fabric—with these results:

Under identical conditions our "G-3" quality construction averages 20% longer mileage than the popular first-line tires of 1939.

A 19 to 1 safety factor

But what this longer wear means to you in *safety* can be plainly seen, right in the "G-3" tread.

Look how those deep-cut diamonds slant across the tread; how their sharp edges bite in all directions to brake against both skidding and slipping.

Run a finger over it and you'll discover that all these sharp skid edges add up to more than NINETEEN feet of grip in every single foot of the All-Weather tread—nineteen feet of safety in every foot of tread.

That's a 19 to 1 safety factor—that will grip in any direction, as millions of car owners have learned in 30 years' experience.

STAR FEATURES of the first-line "G-3" All-Weather—WORLD STANDARD OF TIRE VALUE

ALL-WEATHER CENTER TRACTION—proved safest for a quarter century.

LONGER NON-SKID MILEAGE—from tougher thick flat tread—more rubber on the road.

QUICK STOPPING AND STARTING—deep non-skid blocks in center of tread for firm grip.

NO SLIP ON CURVES—heavy shoulder blocks resist sliding.

FORTIFIED TREAD—new improved rubber compound gives increased resistance to cuts and bruises.

GREATER BLOWOUT PROTECTION—new stronger higher-tensile Supertwist cord in every ply.

SMART APPEARANCE—prismed sidewalls, wide decorative ribs.

New low cost in mileage

How can we offer so much more value for less money? Because savings from new streamlined manufacturing and distribution methods are being given back to you in higher-quality tires.

This means you can still ride on safe, first-quality rubber without penny-pinching. See this great "G-3" All-Weather and you'll see why it's true *"You get the most for your money in a Goodyear!"*

All-Weather, Supertwist—T.M.'s The Goodyear Tire & Rubber Company

THE GREATEST NAME IN RUBBER

GOODYEAR

MORE PEOPLE RIDE ON GOODYEAR TIRES THAN ON ANY OTHER KIND

One by One they let him go— Danny had the double-O

OFFENSIVE BREATH—OFFENSIVE-LOOKING TEETH

Of course they dropped him! Offensive breath is bad enough, but offensive-looking teeth also? Well . . . that's the "Double O," and the combination is too much for any woman to put up with.

But why risk "Double O"? There are two trustworthy products that offer you a delightful double precaution against the frequent causes of this double offense.

One you know about—Listerine with its amazing antiseptic and deodorant power. Listerine Antiseptic is famous for its wonderful action against halitosis (bad breath) due to food fermentation in the mouth—the major cause, in the opinion of some authorities, of this condition.

The other is the new Listerine Tooth Paste. Here, at last, is a real aid against offensive-looking teeth. For 3 years our skilled experts worked to achieve this new, finer dentifrice, specially created to help restore lustre to dull enamel . . . personality to your smile.

You'll be literally astounded when you see how it goes to work on tooth surfaces . . . cleansing, brightening, gold-lustre! Why not see for yourself how much it does to bring out the true sparkle of teeth and smile?

If you want to put your best foot forward, use Listerine Tooth Paste and Listerine Antiseptic, night and morning, and before every social engagement. It's the ideal pair for oral care—the double precaution against the "Double O" (offensive breath and offensive teeth).

LAMBERT PHARMACAL CO., St. Louis, Mo.

KEEP UP WITH THE WORLD

By Freling Foster

Mexico still stages spectacles in which savage beasts fight to the death. Such combats, between bulls and lions, were presented in the city of Acapulco in the spring of 1940.

In some Latin-American countries, such as Bolivia, Costa Rica, Honduras and Nicaragua, telephone calls to and from the United States can be sent or received only in certain booths in certain cities.

One of the greatest feats in maritime history was performed by a Captain Samuel Samuels in the Atlantic in 1862, after his ship, the Dreadnought, had lost her rudder in a terrific gale. Unable to turn the vessel around, he succeeded in getting the two-hundred-foot clipper to the Azores, a distance of 182 miles, in fifty-two hours, steering her backward by manipulating the sails.—*By Amy Z. Krochmal, Washington, D. C.*

As late as the 1880's, freight rates on some American railroads were so high that the cost of sending a large shipment of nails from New York to San Francisco was greater than the cost of sending it to England and having it reshipped in a British vessel down around Cape Horn and up the Pacific Coast.—*By John P. Anderson, Worcester, Massachusetts.*

Two small pieces of United States territory can be reached by land only through Canada. One is a section of Washington, located on a British Columbia peninsula that projects into Puget Sound; the other is a section of Minnesota, located on a Manitoba peninsula that projects into Lake of the Woods.—*By Hilda Thordarson, Seattle, Washington.*

"*The* Little Brown Church in the Vale," located two miles outside of Nashua, Iowa, is so famous, through having been made the subject of a hymn, that it not only attracts a weekly average of eight hundred visitors, but also thirty weddings, excluding those of couples who bring their own minister to perform the ceremony.—*By John F. Myers, Des Moines, Iowa.*

Some tobacco auctioneers in the South gather such speed [illegible] have to be slowed down to the standard rate of 360 sales per hour, or an average of one every two seconds.—*By J. G. McNeely, Airy, North Carolina.*

The crumpled aluminum foil in some types of bulbs used in flashlight photographs is so extremely thin that 175 sheets would be required to make the thickness of one sheet of ordinary newspaper.—*By Albert Roberts, Watertown, Massachusetts.*

The world's largest [illegible] the Casa de Ventas [illegible] Aires. Owned and [illegible] the municipal government, employing more than [illegible] it has been known to [illegible] 500,000 loans outstanding at one time, among them [illegible] on 2,500 pianos and [illegible] machines.

...EW! Vegetables kept garden fresh behind glass!

Yes, a refrigerator with glass shelves—and a glass-enclosed Cold-mist Freshener to guard precious vitamins—typical of the 1941 Extras made possible by Kelvinator's new way of doing business.

...ow when I've seen women so thrilled as ... about the 1941 Kelvinators. And, I've ... refrigerators for years.

... instance, at the magnificent Moist-... el (illustrated) that keeps all foods fresh-... t has a brand-new kind of refrigerating system with cooling coils concealed within the walls of the refrigerator.

Shelves are of crystal-clear glass . . . a super-moist Cold-mist Freshener keeps vegetables garden fresh and protects precious vitamins.

...Kelvinator "Extra"— ...the new Cold-Ban"

...w Kelvinator's new, less expensive way ...doing business saves you up to $30 more

... year Kelvinator developed a new, less expensive ... of doing business—that saved buyers from $30 to ... each year previous year's prices—and sales were ... times those of the year before.

... this year Kelvinator has carried this program a step ...ther. Result: even lower prices (with savings up to ...over last year)—even better values—and more ...features than ever before.

...it any wonder that consumer groups both last year ...this year have hailed the new Kelvinator program ...courageous move in the public interest? Write ...Dept. C-1 for a beautiful full-color catalog.

Yet this Moist-Master Model . . . the newest and finest Kelvinator . . . costs no more than the ordinary refrigerator of a year or two ago.

And it is only one of nine beautiful, big Kelvinators you can choose from. Each offers a variety of "extras".

There's the shining Stainless Steel Cold-Ban that eliminates over 80 unsightly, hard-to-clean screwheads. It's an *exclusive* Kelvinator *extra*.

Moist-Master Model M-6—**$179.95***—Eight other models including 6¾ cubic foot SS-6—**$119.75***—And beautiful, completely equipped S-6—**$144.95***

And a Magic Shelf—another *exclusive* extra—gives you five different interior arrangements in a jiffy—makes extra room for tall bottles and bulky foods.

A Kelvinator "Extra"—"5-Way Magic Shelf"

Still *more extras!* A big Vegetable Bin for dry vegetables . . . big Moonstone Meat Chest . . . new Polar Light . . . oversize Crispers . . . the economical Polarsphere Sealed Unit. And extra! extra! Every "6 ft." model has actually 6¾ cubic feet of space.

And value? In cold figures, you save up to $30 *on these new Kelvinators*, thanks to Kelvinator's new, less expensive way of doing business.

We Kelvinator dealers are anxious to show you these big values. Won't you stop in soon?

HOME TOWN PLAY

An Old American Institution

THAT Pilgrim costume didn't fool us a bit. We knew Jim McBride, the hardware man, the minute he stepped before the footlights. Yet Jim had only to declaim his first few noble lines to have illusion and romance cloak us 'round with dreams.

WE COULD well believe that Nan Gimmick was the Chieftain's daughter for tonight; Joe Petz, our grocery clerk, a wily redskin; Tom Black, true to life, the horny-handed smith and charcoal burner...

NOW and then, as the play progressed, a friendly giggle would sweep through the house as the prompter's hoarse whisper could be heard from the wings; or when Tim Murphy's sword fell with a great clattering to the floor. But mostly the lordly strutting and great declaiming were taken in good part. And at just a tragic climax, as the muted strains of "Hearts and Flowers" rose from the pit, more than one furtive pocket handkerchief was seen to dab its owner's eyes.

ONE smiles today at memories like these. But it's a wistful smile. For you know now how rich in happiness the simple pleasures of those times really were. Thank goodness America still holds firmly to the grand things that have given it character . . . the old customs, the old songs, the old feasts and the foods that made them famous!

ITSELF a venerable old American institution, the famous House of Heinz has long played a leading role in bringing delicious "home talent" fare to millions of American families.

FOR a long time back, folks have recognized in our beans, our ketchup, our jellies and pickles the true old-fashioned home flavor they up to know and love. And you, today toothsome goodness in our many puddings, and rich, spicy minceme

YEAR after year, for more than thr we have been helping to set a good ican families—using the finest metho ingredients, the most treasured re find. We are proud of our role to a great nation. And we trust that children, too, will fondly recall th meals you serve today . . . just as yo look back to "Way Back When".

said in the hospital
your Doctor Corbett
ough was completely
dive about his work.
stor will show you
wron they all were

WAS admorning and they had
ed o into the corridor the
eled etcher with the blond girl
he ch ty ward on it. They were
o wo in an amphitheater when
perat on her, because students
terne would be there to observe.
such ornings there was always some confusion and for a moment the nurses had left the girl alone in the corridor. She was sitting on the stretcher and the bandage around her head didn't look unlike a fashionable turban except for the big lump of bandage behind the ear where they had gone into the mastoid. All she had on was a hospital gown and when the nurses left her she grew annoyed and a little uneasy there in the midst of so many men, and she made some effort to close the gap in the gown where her back showed.

The students and internes stood quietly by, the students self-conscious in their masks and talking through them unnecessarily. They all felt a little superior because they knew it was a charity patient, but some of them noticed how pretty the girl was, despite the slightly fixed quality of the muscles on one side of her face.

Corbett came along the hall, hurrying a little as he saw the girl on the stretcher. He was the senior resident in surgery at the hospital, an assured but pleasant man of about thirty. The chiefs of the medical center, who were not sentimental men, thought well of Corbett, and Haggerty, the chief in surgery, thought that Corbett might some day even be great. Corbett had fine, sensitive hands. They had one or two crooked fingers and didn't look like anything special but Haggerty and the others had seen them with a scalpel in the fingers.

NOW, coming along the corridor, Corbett noticed the girl's awkward attempt to close the gap in the gown. She had a fine back, he saw, thin but white and smooth. He felt sorry for her again, and told himself that he shouldn't feel that way. Not if he was going to operate on her this morning as Haggerty might want him to do. But she was a fine girl and he had liked her. On his rounds, when he came to her they would talk about horses—her brother was a gyp trainer at one of the New England tracks now—and what a bore the hospital was to her. She wanted to get out as quickly as she could.

The hospital seemed to fret her and they had operated the first time in an emergency and postponed this second one until she could be built up a little by diet; but she didn't seem to respond and Haggerty had said it would be better to get it over with. There was always

pressure on Haggerty to move charity patients along. He fought against the pressure when he was conscious of it; but when he wasn't, it affected him subtly.

Corbett dropped his hand to the girl's shoulder. He had forgotten her name for the moment. She turned as though struck, then smiled when she saw it was Corbett. "Take it easy," he said gently. "How do you feel?"

"I'm all right. I just wish it were over and I could get out of here."

"It'll be ten days or two weeks before you get out, even if no complications develop."

"I'll go haywire by then," the girl said, smiling a little. "What will you do then?"

"We won't mind. We don't have many people here as pretty as you."

"Trying to make me feel good?"

"No. . . . I wish you had more weight on you, but we don't seem to be able to put it on you with food."

"It's being shut up," she said.

"That's what we thought," he said. He noticed suddenly the others watching him, some with faint, cynical smiles. He became grave. He knew the way they were. It was only a little while since he had been one of them and he knew what apostles of doubt the new medical schools made of their students; made them so with design, teaching them to doubt, if they chose, their own teachers. The nurses were there, too, now, waiting for him to stop talking, waiting with faint, supercilious impatience as if they had never left the patient for a moment.

"All right," Corbett said to them.

"Are you and Dr. Haggerty going to the track today?" the girl said.

"We always do after operating," he said. "Unless there's some reason to stay around the hospital."

"Then don't forget about Barnstormer," she said. He's going today."

"I won't," Corbett said.

AS THEY wheeled her down the corridor, Corbett noticed her face change but he couldn't read it. He wished abruptly that he could have said more to her, something of consolation, perhaps. But consolation for what? he wondered. He recalled, almost impersonally, as he would the figures of a chart, that she had had no visitors since entering the hospital. And she had barely mentioned the brother in the East.

The wheeled stretcher and the nurses disappeared around a corner, the cloud of white coats attending. Corbett waited for Haggerty. He came down the hall, a big man in his fifties. He was all in white, a white skull cap on. Together, they walked toward the amphitheater.

"What do you think?" Corbett said.

"About what?"

"About this girl we're going to operate on?"

"Then say so. I don't know who you're talking about. We had two operations this morning and now we have this one. I don't know which one you're talking about."

"That's right," Corbett said. "Well, what do you think?"

"Sounds to me like you might like her or something."

"Don't be foolish."

"I don't think anything. She's apparently in about as good shape as we can get her, and that isn't good. Not bad, understand, but not good."

"You think we ought to operate, then?" Corbett said.

"What else? We've been trying for weeks to build her up [illegible] sult. And, meanwhile, t[illegible] that open wound in th[illegible] nerve gone. If we wait [illegible] nerve'll be entirely gone [illegible] muscles paralyzed for g[illegible]

THE corridors were [illegible] walked for a few s[illegible] speaking. Then Hagger[illegible] "You can't be sentimen[illegible] If a doctor's sentimenta[illegible] any place. rce. ere is his first dis-
, by able from London**

E W RE somewhere over the North Atlantic. Below us the sea w like hard, polished lava; ack, t acherous and almost evil. ad w a heavy overcast, gray rd. A the pilot lifted the ship to roug it to the quiet air above, fted ong the fuselage with the ushir noise of sand slithering on t ou notors turned with a full- d, in erturbable moan and so ied ey seemed, so sure of lves, hat each of us silently the illed hands that had made

navi tor was an earnest young n his early twenties who had l shy nd diffident on land but s no as self-assured and poised inter nder its master's gun. He e st with his sextant, made calcu tions on a pad of paper ade pencil point on the chart. rrow he said, "we will be in d," d he said "England" with ice.

exc s baggage and I envied the They ad something to do, all of The ilot, after he'd taken off, wat George. George was the atic iator—the gyropilot, and is early perfect. But every n a hile an unexpected wind- an draft or a down current the ontrols ever so slightly out mec nical hands and the flesh and blood pilot had to make minute corrections with four or five knobs on the instrument panel.

The navigator was the busiest man aboard. Our two radio operators never left their instruments, and the engineers watched those motors, one on duty, one off and asleep on the single bunk aft. I envied the younger of the two engineers. He was very young and when he slept he slept soundly and the flight was for him a great adventure. The rest of us had families to whom we'd written "last" letters. We wanted to live and we knew that we might not and there was no use doping ourselves with false heroics. We had twenty-four hours of flying ahead of us, through heavy weather and through German air patrols off the coast of England, and we were, except for that bright-eyed kid with the smooth face and sandy hair and clear blue eyes, cognizant of our danger.

It was cold in the big plane. The ship had none of the refinements of a transatlantic clipper. No heater, no soundproofing. We had donned soft flying suits, like overalls, and over these a windproof, waterproof jumper and a "Mae West"—life jacket—in case we crashed into the sea. We didn't bother about parachutes, figuring if we'd ever need them anywhere west of Land's End they wouldn't do us any good anyhow. Nobody could survive hitting that undulating slab of blue-black lava below.

I wish I could tell you more about those men in that ship or about the plane or where we started from and where we eventually landed, but I cannot. It isn't a matter of censorship, but I can't say more because to do so would expose those who fly behind us to death from the guns of Heinkels and Messerschmitts sent to intercept them. I should like to prove to you how brave and how skilled they were by telling you about the small things they did that proved their selflessness and their craftsmanship and their airmanship. But I can't. I'll say only that they weren't American pilots hired at one thousand dollars a month plus expenses to ferry American planes across to England, but just plain Englishmen doing a job.

What they do every day would have been epochal ten years ago; would have made Lindbergh's flight seem puny.

When there's nothing to keep your hands busy and when you know with cold, mechanical reasoning that you may die, you think. It's amazing what warm peace there is when you are able to face the possibility of death without a quiver in your diaphragm. You pack into every moment an exquisite enjoyment—you press your elbows close to yourself and feel the flex of your biceps. You open and shut your hand in front of your face and the warmth inside your flying suit is good to feel. You slide back the panel of the hood over the co-pilot's seat and glory in the zero wind whipping your face, and all the time you're thinking of small, familiar things —of the sounds a quarrelsome fire makes in a fireplace, the turmoil of children upstairs just before they go to bed, the tap of a dog's tail on the carpet, a table set with white linen and silver and crystal and the smell of earth in the spring.

You think of your wife, warm and dear in your arms, or of your son's quivering excitement when you gave him the thing he wanted most in life—a wire-haired pup. You think of your younger son and the feel of his pudgy arms about your neck and you smile to yourself as you remember how unaware he was you were leaving him.

You think of friends and how much they've meant to you and you wonder

Mr. Bildig's Bird

By Frank Condon

ILLUSTRATED BY EARL BLOSSOM

Something designed to lighten the solemnity of the times—the success story of a little man who hasn't got a chance to fail. Not after this

BALSAM MANOR is one of those suburban towns where every family is quite rich or comfortably well-to-do. Everything is glossy and well-kept—the streets are cleaned, sidewalks smooth, lawns green, houses neat and expensive.

Everyone knows everyone else, belongs to the same golf, social and business clubs, goes to the same dances and shares in a joyous social life in which there are no leaders or petty jealousies. They say it is the nicest town on the railroad. Its men are solid business leaders, and its ladies play bridge for the highest stakes on the line.

But there was one exception in Balsam Manor and that was Mr. Bildig. Bildig lived with his wife in a small gray house on Oak Street, a short street on the very edge of town. It would have been a back street in Hoboken. Mr. Bildig made fifty dollars a week, did not belong in Balsam Manor and was not known there but, years before, his father built this small home and lived in it and now it belonged to Bildig. He moved from the New York flat with alacrity and with his plump, cheery wife. They did not know that fifty dollars a week was unheard of in this town. They did know that now they had a small front yard, a back yard and a gate.

Mr. Bildig viewed life serenely, calmly and without emotion. He never got angry or got drunk, had no vices and was simple in his ways and orderly. He had wispy, thin hair and a blank countenance, from which smiled a pair of guileless eyes. He even liked his job in town and found nothing to complain about.

His job was writing figures on large, square sheets of yellow paper. The figures concerned prices and quotations on bottled goods. That's all Mr. Bildig knew about the business. Nor did he know what the firm bottled. He hadn't made a mistake in two years, so he felt that his job was secure.

For four years, he caught the eight-o'clock train into town and came home promptly at six. And nobody ever spoke to him. It wasn't that the club-car men were snobs. They just didn't know who he was, a situation which he accepted without any feeling whatever.

The cars filled up with the healthy, well-clad men of Balsam Manor, all going in to their day's business. They

shouted gaily, called George, Bill, Pete ar bridge, talked politics, had a fine time into where they made hast gagements and later ca phone.

Coming home at nig same thing and depart amid a hullabaloo of ch tion, gentlemen shouting ing merrily.

THEN one evening you aged nine, strolled in sat down with the family father was Larry Trent of his company.

"I was in Mr. Bildig announced, "and he's go The bird talks to him. bird, too. 'How are yo says."

Nobody paying any news, Edgar said it agai

We're in the Army Now

By Lieutenant General Hugh A. Drum, U.S.A.

, un ained men died essl in 1918. It won't en a ain. The Army ng share, but part e r ponsibility for ficie t fighting force nds on you whose on the home front

CNTY THREE years ago we sent o the iring line in France men o ha never fired a rifle. Men g th uniform of the United Arm vere thrown into the front men o had never shoved a clip ridge into a magazine. That desp ate foe might have no rest at an pportunity for immediate victory might be grasped, men who were only a few weeks away from the safe routine of civilian life were packed aboard transports, given a few days' rest, and rushed into battle in trucks and trains.

This was necessary, but costly in lives. Considering the short time we were in the first World War, our casualties were excessive. Had our armies been divisions of trained men, conditioned men, our casualty lists would have been very much lower. Untrained men, led by inexperienced officers, died because they didn't know how to protect themselves. They had raw courage and an undisciplined will to fight and that, because we had youth and numbers, won. But the price we paid was cruel. Inexperience and the lack of training in 1918 were unfortunate causes for excessive and unnecessary losses.

It is because this squandering of the lives of American boys must not happen again that the United States is now training its sons to fight. Whether they will have to fight, or where, is no question to be discussed here. If war is forced upon us we have no alternative other than to accept. Having accepted, we must have trained, disciplined, equipped men to give the challenger his answer.

I am writing to the mothers and fathers, the wives and sweethearts of the men who are now being trained to meet such an emergency. The new trainees have been quick to understand. True enough, all of the young men who have been drafted into service have not found the transition from civil to military life easy. You are receiving blue and homesick letters, which are to be expected when a young fellow first leaves the home fireside. To a certain extent the experiences are somewhat similar to those of a boy in his first year of boarding school. The trainee will have trouble, perhaps, adjusting himself to mass living, to the pranks, banter and even bullyragging of his comrades. He may object to what he regards as undue severity in drill and mess sergeants. Resentful, he is tempted to break military rules, to give away to excessive indulgences in near-by towns and to consort with certain so-called sporting groups which should be avoided as in civil life. Writing to you parents and others who are likely to worry about all this, let me assure you that special provisions are always available to meet these conditions.

(Continued on page 60)

Lieut. General Hugh A. Drum, commander of the First Army, chats with three brand-new selectees at his Governors Island headquarters

W. EUGENE SMITH

SKEETER FLEET

By Frank D. Morris

The Navy calls it a shakedown cruise, but the boys on our new motor torpedo boats bouncing around in the Caribbean call that an understatement. The idea is to find out if 4,000 horsepower is enough to tear these skimmers apart

SHORTLY after midnight a small, walnut-shaped boat slithered across New York harbor. Its one-man crew, a Captain Bushnell of the Revolutionary Army, took a last look about before closing the top half of the walnut, the boat's only hatch. He knew then he had enough fresh air to keep him alive a half-hour.

With a single oar pierced through the stern he sculled quietly toward a British ship of the line and slipped unnoticed under its poop. Next he lighted a candle, sending a soft glow upward through a glass port in the hatch. That was his working light as he reached overhead in his cramped quarters and started turning a crank. The crank revolved the boat's mast—a peculiar mast. The top end of it was threaded like a screw and, halfway down its length, attached like a crow's-nest, was a metal box—full of gunpowder.

As the captain cranked, the screw slowly buried itself in the hull of the Britisher. When he figured he had bored deeply enough for the deadly barnacle to hold, he detached the crank, set a crude clockwork mechanism on the metal box and sculled away to a safe listening post.

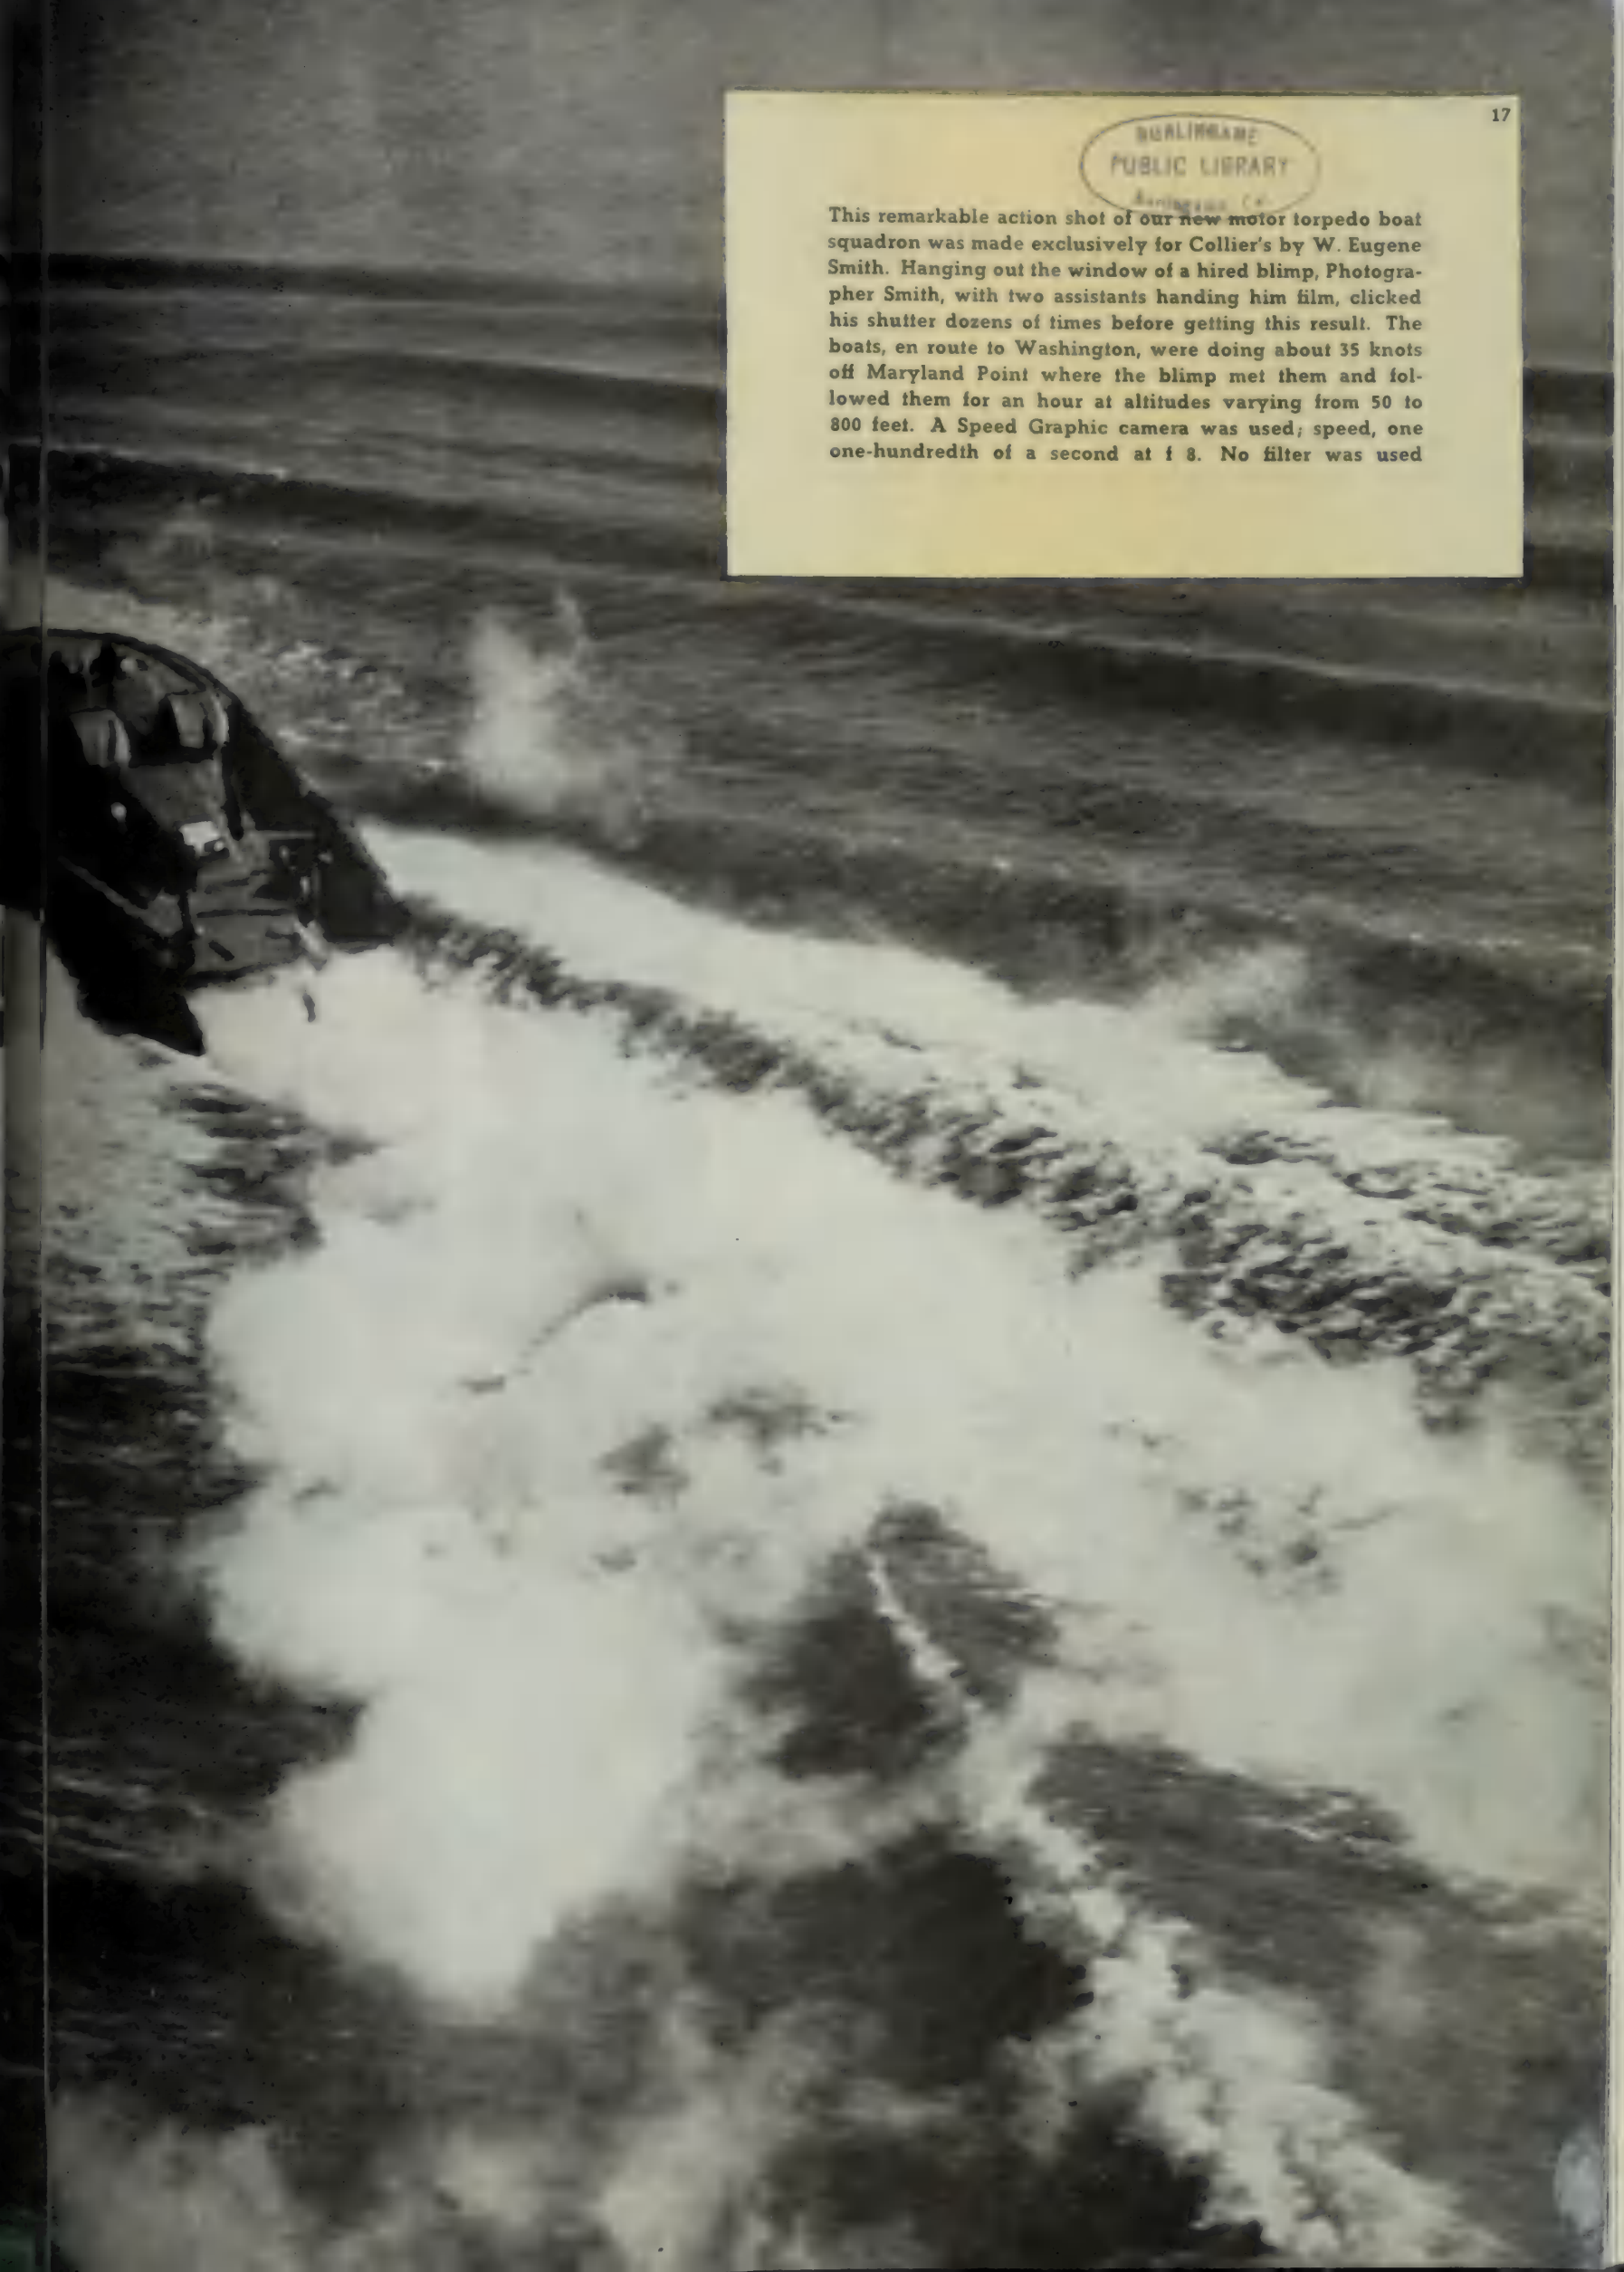
From then on history lets us down. The intrepid captain's homemade weapon did not send the British admiral and his flagship to visit Davy Jones. No, unfortunately, the screw business failed to hold and the box of gunpowder dropped harmlessly to the bottom of the harbor. Nevertheless, Captain Bushnell had earned his naval spurs as the first American torpedo hero.

On another dark night the Confederate ram Albemarle was lying at anchor off Charleston. The year was 1865, and just to forestall any Yankee monkeyshines, a cordon of floating logs had been strung around her anchorage.

Suddenly a warning cry from the crow's-nest sent the crew scurrying to their guns. The lookout had spotted a small, open launch steaming straight toward his ship at too much speed for the Albemarle's comfort. Jutting from the launch's bow, like a jousting pole, was a long spar tipped with a metal cylinder. Inside the cylinder was an unhealthy charge of explosive.

Without slackening her speed a whit the launch lunged at the log barricade; her bow curved heavenward as she hit it and swerved aside. Simultaneously the jousting pole was heaved directly at the Albemarle. Before any of her guns could be brought to bear on the attacker, the ram had a huge hole torn in her side by the exploding torpedo. A geyser of water tossed up by the blast also swamped the launch and both vessels sank immediately.

One survivor of this engagement promptly became a hero north of the Mason-Dixon line. He was Lieutenant Cushing, commander of the torpedo launch, and a grateful Union Navy made him, at 21, its youngest lieutenant commander.



When history reports on our next torpedo-boat daredevils, their names doubtless will be taken from the roster of a PT boat, the Navy's newest weapon. Some seventy candidates for medals slid their boats alongside Santee Dock at Annapolis one night not long ago after a breathless, record-breaking run from the Brooklyn Navy Yard. They had brought ten of our new motor torpedo boats safely into port after twelve hours of being battered around on the January Atlantic and in the choppy waters of Chesapeake Bay. Salt spray froze on decks, faces and clothes, but no one in the squadron minded this as long as they could hear the rhythmic roar of the motors astern, pushing them along at thirty-five knots.

The PT squadron was on the first leg of what is most appropriately called a shakedown cruise and, as you read this, they are still giving their boats and themselves the beating of their lives somewhere in the Caribbean.

At Annapolis they paused overnight, just long enough to gas up and give the crews some rest. The trim little fighters were berthed incongruously in the shadow of the Reina Mercedes, a naval matriarch we captured from the Spanish in 1898. Early the next morning, chins high, they roared off to Washington and tied up right under the snooty bow of President Roosevelt's official yacht, the Potomac. And while the navy-yard band is lining up on the dock in preparation for a formal inspection of the PT (patrol torpedo) boats, here's a good chance to see one for yourself.

Seventy feet *(Continued on page 55)*

BURLINGAME
PUBLIC LIBRARY

This remarkable action shot of our new motor torpedo boat squadron was made exclusively for Collier's by W. Eugene Smith. Hanging out the window of a hired blimp, Photographer Smith, with two assistants handing him film, clicked his shutter dozens of times before getting this result. The boats, en route to Washington, were doing about 35 knots off Maryland Point where the blimp met them and followed them for an hour at altitudes varying from 50 to 800 feet. A Speed Graphic camera was used; speed, one one-hundredth of a second at f 8. No filter was used

A week end of skiing with a proficient lady named Elyse. Only a champion could come up to her speed

STEVE ADAMS wrestled his skis and poles and duffel out of the taxi, and the uniformed doorman came to help him. Together they packed everything neatly in the rear of the longest, shiniest convertible Steve had ever seen, which was parked before the marquee. Then he turned around and Elyse was just coming out of the apartment house.

Grinning, he walked fast across the sidewalk. Elyse held out her hands, and as he came to her, Steve saw that she was as beautiful as ever—even more so than five years ago when he first fell in love with her—and that she would always be beautiful. Her features were strong and clear, exactly chiseled, with the clear, velvety tan of many expensive suns, and hair that was thick and heavy, like a smooth tassel of gold threads.

Unashamedly, with laughter on her lips, she walked into his arms, her hands against the back of his head as he kissed her. Steve said weakly: "Gosh, it's been a long six months!"

"But I always come back to you—don't I, darling?"

Soberly he held her away to look at her. "Yes," he said gruffly, "but when we're married you won't be away from me at all."

That startled her. She said, "Steve! That—that sounds like a—a *proposal!*"

"It is." His voice cracked in excitement, but they didn't laugh. He said, "They gave it to me, Elyse. Finally. Sales manager, good raise." This was his big surprise, and she was taking it big. Watching her face for an answer, he had utterly forgotten where they were, until she suddenly smiled wryly.

"I like privacy for this sort of thing!"

They got into the car, with Steve behind the wheel and headed north on Fifth Avenue. It was a bright, cold morning and to Steve the world was perfect. . . . He had come down from Dartmouth and gone into a large box company where he defied the New York tradition by remaining ever since, instead of changing jobs, like apartments, every October. And for five of those eight years he had been in love with Elyse, but she had too much money. Now it was different; he could manage his end of it.

At a stop light he said, "I still love you. The one habit I can't break."

"Don't ever try," she whispered, her glance slanting up at him. But something in her face disturbed Steve and he frowned. "You love me?"

Looking straight ahead, she slowly nodded. Yet he persisted, "You didn't get all involved in Hawaii?"

A fleeting unhappiness shaded her eyes. "No."

"Well, then," he breathed in relief. "Say 'Yes, Steve, I'll marry you,' like a good girl."

She said nothing. Horns blared behind them. He shifted and stepped on the gas, but when he could look again, her face was blurred with tears.

"Oh, Steve!" she said. "Steve, darling! Bless you. . . . I've played so long and I'm so horribly tired!"

Instinctively he patted her knee and at once her bright head came over against his shoulder. "Time to settle down," he suggested. "You've got to stop pulling yourself apart over every man that falls for you."

"Yes!" said Elyse. "Yes!"

He knew then there had been someone in Honolulu, but it was over, and it made no difference between them now. He thought compassionately: *You were always too sensitive, too sympathetic for your own good, Elyse.* . . . Many men had loved her and it never failed to touch her profoundly, causing a peculiar sort of anguish that afterward left her briefly exhausted. . . . He said, "Then it's all settled?"

She gave him a tremulous smile. "Only let me get my breath first, Steve. Until we get back to New York." She let it drop there, but he was satisfied. It meant she was ready to say yes, ready for a safe mooring. It was enough for now.

THEY came over the frozen roads as darkness cloaked the small hotel in Jackson village. Inside, it was too hot, and crowded with young people in ski clothes. Steve stood at the desk, writing down his name and Elyse's beneath it, while she stared expectantly into the adjacent bar and lounge, from which a wave of argument and laughter and music from a juke organ flooded out at them.

Steve accepted the two keys from the clerk. "What's it like in the Ravine, Joe?"

"Perfect!" said Joe. "You here for the Inferno?"

"Not me," Steve grinned. "My racing days are over." As he turned away, Elyse caught his arm excitedly.

"Steve, give me a quarter!" From the handful of coins he produced, she selected one, and walked across the lobby.

Two slot machines stood in the far corner and a man and a girl were play-

It was glorious. He was drunk with the thrill, possessed of a frenzy to keep her in sight

... Hannes came into the bar ... the juke box began a med... ...s waltzes, and all of a sud-den they were in each other's arms and they were dancing beautifully. Hannes was not tall, perhaps only five eight, but Steve recognized the dream build of the expert skier—incredibly broad shoulders and no hips at all. He and Elyse were exactly the same height, exactly as beautiful. Even their perfect ski costumes matched in impeccability.

Smithy looked at Steve. "There goes your girl," she said. "What are you going to do about it?"

Stung, Steve glared at her. "And there goes your man. What are *you* going to do about it?"

"He's of age," Smithy said. "Anyway, we're just friends. He's a refugee, busted, so he wants to teach skiing over here, because it's the best thing he does—"

"I can think of others."

She smiled at that, and while it wasn't like Elyse's, it was still a very good smile. She continued, "But you need a big build-up for a good job, so he's going into the Inferno race next Saturday."

"I wish him luck," said Steve.

The music stopped and Elyse and Hannes joined them, his eyes never leaving her, his fingers touching her shoulders as he held the chair for her. And excitement glowing in Elyse's face made her more beautiful than ever. There was a lot of talk, which didn't exactly include Steve, although it washed up against him in constant ebb and flow.

Smithy kicked him under the table. "I remember you now. Didn't you win the Inferno once?"

"Ouch," he said absently. Then: "Third. I never was really one of the top boys, Smithy. Too big, for one thing. And too scared most of the time, for another."

Smithy's glance darted at Elyse; then back to Steve. She said slyly, "And too lazy, maybe."

He half closed his eyes and looked at her.

After dinner he waited in the music room for Elyse and when she came in, he said, "Come sit here by the fire—I thought you'd never be able to shake them!"

"Oh," she said guiltily. "I told them we'd go down to the movies in Conway with them."

"Elyse," he said.

She caught his hand. "I'm so sorry. But poor Hannes has been through such hell, and he feels so strange and alone over here."

"What's the matter with Smithy?"

Elyse shook her head. "Smithy doesn't speak his language, Steve. He's just been staying with them in Boston because her father and Hannes' father had business dealings years ago."

Steve said, "He's in love with you."

Her eyes clouded with dark distress. Softly she whispered, "Oh, my dear! You're not going to be jealous—"

"No," he said, feeling helpless. "I just wanted to make sure you knew it."

"I'll tell him we can't go," Elyse offered.

He shook his head, forcing a grin. "No need to be rude. It's a good picture and I've seen it, but you go. And make my excuses. I've really got some letters to write."

Swiftly Elyse reached up and kissed him. "Dear Steve, you're always so kind and understanding—I don't know what I'd do without you."

Huskily he answered, "That's the point—you don't have to."

Again her lips touched his, lightly. "Night, dearest." Then she was gone. Steve lighted a cigarette and tried to read a magazine, but finally had to throw it down. He went out in the hall and started up the stairs just as Smithy was coming down. "Hey," he said, "you better hurry, hadn't you? I'm not going, myself. Letters to write—"

"I'm not going, too." Smithy frowned "They've left."

"Oh," said Steve.

"But I would have gone," she said slowly, "if I'd known you weren't chaperoning them."

Suspiciously, Steve remarked, "For anyone not supposed to be in love, you seem to do a lot of worrying about him."

Smithy flushed, retorting with sudden grimness, "I just don't want him to get hurt!"

"Yeah?" said Steve, and went past her and upstairs.

TUCKERMAN'S RAVINE is an awesome place. It is like a sugar bowl with one half missing, and it is more than a thousand feet from the bottom of the bowl up to the rim, which is called the Headwall. It had taken three hours of steady climbing for Steve and Elyse to cover the distance—three miles—from the Toll Road at the base of Mount Washington, up into the bowl. They stopped at the rock ledges two thirds of the way up the Headwall and sat down to rest. This was the place to stow superfluous gear; the place to smoke and meet people—a combined clearinghouse and gallery.

"My binding's loose," Elyse said. She looked very happy, and they had not mentioned last night at all. Hannes and Smithy had made a much earlier start, so he had had her all to himself. Steve knelt in the packed powder snow and took up the slack in the harness. When he was finished, he looked up at her shining face. "Gee, you're lovely!"

"Think so?"

"Um."

His eye caught a hurtling speck schussing the nearly perpendicular Headwall.

(Continued on page 51)

Steve said, "He's in love with you." Her eyes clouded. Softly she whispered, "Oh, my dear! You're not going to be jealous—"

Fate Doesn't Care

By Will F. Jenkins

ILLUSTRATED BY DAN SWEENEY

The dramatic story of a hunted man who comes face to face with his nemesis on a lifeless island

THE man had the battered and defiant air of one who feels that fate and chance make sport of him. Now, to be sure, the last of the storm clouds went scurrying over the horizon and the waves under his feet were merely monstrous. It was very early morning, and he was safe on a rocky island some fifty feet high and quite a hundred yards long. He was the sole survivor of the coastal steamer, as far as he could discover. But his expression was definitely suspicious as he looked down at the scrap of wave-swept beach which was the island's only landing place.

Foam-mottled green water swept back and forth, bearing bits of wreckage. On either side of the small beach the sea hit directly on the island's wall, creating thunderous impacts and towering fountains of spray and foam. Nothing could land living anywhere except here, but the man searched warily before he descended the cliff, using hands and feet together. His clothing was tattered and rent. His shirt was half torn from his body and his duck trousers had a long slit down one leg and only half of the other leg remaining. He had no shoes, or hat. On his left wrist a handcuff was locked fast, with its fellow dangling empty from a four-link chain.

He reached the beach and surveyed the surging water. There was a shipping crate floating awash. He waded for it, and it swept away, coquettishly. He stood stock-still, eying it. Presently it floated daringly near. He pounced, and waded back to fling it up on the narrow strip of wetted sand. There was a waterlogged cask which was not full and was not empty and might contain anything. He captured it by the same tactics. Something like a spar pounded up and down. But it was heavy and would be dangerous. He left it alone and went to the shipping crate. He tore off one of the flimsy boards such crates are made of. Cabbages. He thrust one inside his shirt and climbed up to the top of the island again.

The sun was definitely clear of the horizon, now, and from this fifty-foot height the sea was infinitely blue. Far away, a thin haze rose above the water —the smoke of a steamer below the horizon.

THE man on the island fumbled at the handcuff on his wrist, eying the smoke. Then he turned back to the island. He had been certain that there was no food or water on it, but now he made doubly sure. Presently he peeled off the outer, withered leaves of the cabbage he had salvaged. He filled his mouth with the crisper inner leaves, and chewed vigorously as he continued the survey of his situation. The ship from which he had come was under water, somewhere out on the shoals. A comparatively small boat, it had capsized after it struck, and it would be found best by looking for changes in waves that broke over it. There would be no survivors there! But the three pinnacles of stone, not so far from the wrecked ship—

The largest was fifteen or twenty feet above the wave tips and all of thirty feet wide. It streamed with wetness from the spray, but it was in some sense shelter from the sea. There was a mass of half-submerged broken rock about its base. The other two pinnacles were mere needles of stone that reared upward for ten feet and at most might furnish resting places for a few sea birds in calm weather.

He saw spouting water that might rise over the steamer's

In the course of a talk ...yllis is appalled by his cynicism, pacifism (attributable, she feels sure, to cowardice) and contempt for everything the Navy stands for. She gives the boy a piece of her mind, and leaves him. A short time later, she is at the Officers' Club when Roger Collins—following a heated altercation—calls Bert a "worthless, yellow pup," slaps him and knocks him down. Bert's father enters. Pop gives Roger a punch on the jaw. But Roger does not retaliate—he says, "I'm very sorry, sir," bows, and goes out. As he does so, Phyllis turns. Lieut. Commander Kirstell is beside her. *"I have a clue to our man,"* he says quietly.

IV

BEFORE I could say anything more, Lieut. Commander Kirstell remarked in a casual tone, "Could you arrange an errand in the village? I'll walk toward No. 1 gate and you can pick me up in your car."

"Very well," I said. trying not to show any excitement. "Right away?"

"Yes."

I motioned to Bosey, the colored boy who doubled as janitor and waiter at the club, and asked him to tell Mrs. McMatthews that we were out of cube sugar and I was going to the village for some.

Kirstell was silent until we had driven half a block from the yard. I was, by this time, sick with suspense. But I forced myself to talk about the crotchets of my four-year-old roadster. This Kirstell was a very cold fish, indeed. He sat looking at the road, completely relaxed and matter-of-course.

At long last: "I don't think we should discuss what I'm going to say with your father, Miss Hartney. It would deeply distress him, and I may be wrong."

"Just as you say," I replied.

I spoke calmly, but I wanted to shriek at him, "Who is it? Tell me his name!" First, however, he asked my permission to smoke and lighted a cigar, fiddling interminably with a penknife and lighter. Then, he had to consult some notes which he kept stuffed like paper money in a wallet. So when he did come out with it, the name sounded anticlimactic: "You know Bert Sedden?"

"*Bert*—oh yes—you think he—"

"Young Sedden came home on a visit without much notice in advance, didn't he?"

"Yes, but—"

"Have you met Mr. Prentice? He's one of the civilian engineers—"

"With Lieutenant Roberts. But how could Bert—"

"Just got an F.B.I. report on him. Bert is a pretty bad boy. He was a Communist spy until five or six months ago."

"Why, he told me he left the party a year ago!"

"Did he tell you that he and Prentice are good friends?"

"No."

"Or explain why he should have abruptly decided to visit his folks just after Prentice got here?"

"No, but—"

My voice quit on me. So this is it, I thought miserably. So Bert is our "officer spy" at Navy Station. Poor Pop and Mom. It will kill them; they will die of shame. Oh, Bert, you horrible little beast. I heard Kirstell's words as from a distance:

"The coincidence is all I have to go on thus far. We have no information at all about Prentice. He may be entirely innocent of any connection with young Sedden. It is the fact that he came here under secret orders and that Bert followed—may be significant, eh? I think it calls for a full investigation. Do you agree?"

Although I believed Bert capable of any infamy, treason not excluded, and had no very high opinion of Dutch Prentice, my loyalty to Pop and Mom stirred me to rebellion against the probable truth.

"The German radio mentioned an *officer*," I said.

"That could have been a trick."

"Yes—"

"An officer's son would be close enough to it for them to brag."

"I'm afraid that you are right," I said slowly. "But I love Pop and Mom Sedden. If this is true, it will break their hearts. I want to give Bert the benefit of every doubt."

(Continued on page 43)

"This woman was trying to get me drunk, sir!" Dutch said. Savvy looked at me with a little start of surprise and, perhaps, disapproval

School D

By Edwar

There was another loud explosion and he staggered and went to his knees

A SHORT SHORT STORY COMPLETE ON THIS PAGE ● ILLUSTRATED BY C. C.

ALMOST every night the planes roar over Oxford, which is northwest of London and on the way to Coventry and those big midland industrial cities. Sometimes the planes drop their bombs. Every now and then one falls on the Spessard School for Boys and does a lot of damage.

John-William didn't mind it at first. It was exciting for a ten-year-old to watch the searchlights and the antiaircraft and the explosions and the fires burning. After a while, though, after the novelty wore off a little, it got to be a nuisance. He had asked Mr. Gregg how long it was going to last, and he had written his mother, too, and asked her and, oddly enough, both their answers were the same: "When the war is won, John-William."

Sunday night was the time set aside each week for the boys to write home to their parents. It was dark out and drizzling this Sunday night as John-William left the dining hall and turned right toward the west wing of the dormitory. He hunched his shoulders to the cold and took several steps before he remembered. The west wing was no more. His room was a pile of rubble now where a bomb had sheared off the side of the building last week.

He turned left and followed the stream of boys returning through the dark to the east wing. He climbed the four flights of stairs to the attic storeroom that he shared temporarily with Alec Pembroke and Richard Hale. It was cold and drafty in the long halls and staircases. There were fireplaces in the rooms below but a small charcoal heater was all they had in the storeroom. It was a bare room with three chairs grouped about a single big table, three cots, three wash basins, an oil lamp and one window heavily curtained to keep the light from showing on the outside.

Pembroke and Hale were already at work on their letters, chewing on the ends of their pens. "What's there to say?" Pembroke looked up at John-William and frowned.

"You might ask your mother for another cake," Hale suggested. "The last one was very good, I thought."

John-William sat down in the third chair. He didn't take off his overcoat. "Did you write about the west wing?" he asked, and Pembroke nodded.

JOHN-WILLIAM had written his mother all about it the next day and in her return letter she had sounded a little provoked because he had lost all his clothing and all his books, though he didn't think it was his fault entirely. He really couldn't take everything down into the shelter when the bombs started falling.

Pembroke and Hale were still chewing on the ends of their pens by the time John-William had finished the first page of his letter. He told his mother about the new master who had taken Mr. Terrill's place when he joined the R.A.F. He was sorry to see Mr. Terrill go—

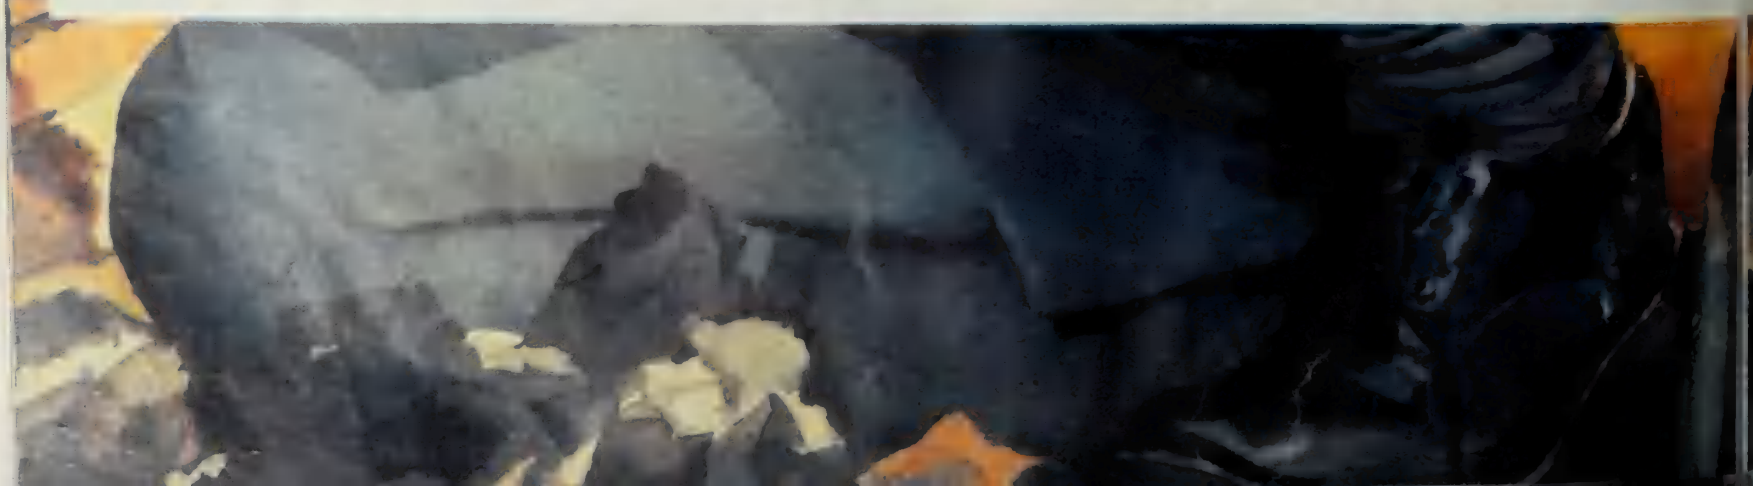
And then the sirens started blowing. The three boys looked at one another. And almost in the same breath they heard the planes. The roar of hundreds of motors like thunder, growing louder and louder until they seemed directly overhead.

Pembroke and Hale put down their pens and jumped to their feet. It was a strict rule of the school that all boys go to the shelter at the first alarm. They shouted something and, snatching up their caps, went out the door. John-William didn't look up. He was writing as fast as his hand could move back and forth across the page. He wanted to finish this letter.

Then the first explosion came. It wasn't very near but it shook the whole building and made the water pitchers dance in the basins. At the second explosion John-William rose to his feet, still writing. At the third, nearer this time, he gave up. He screwed the top on the ink bottle and crammed it and the pen in one pocket, stuffed the unfinished letter in the other pocket and, turning out the light, hurried downstairs. The corridors were deserted. He reached the ground floor and ran out into the night.

On the dormitory steps he stopped short, amazed. It was the biggest and noisiest raid they had had yet. The sky in every direction was aflame. Searchlights swept the clouds, stabbed through the smoke from scores of raging fires. The short flashes were from the antiaircraft guns; the longer flashes were the bombs exploding. The planes and the sirens and the guns and the explosions were deafening. John-William put his hands over his ears and started running across the yard.

Halfway across, the ground suddenly rose up in his face. There was a blinding flash of light and he felt himself being hurled backward through the air. He landed on his side, rolled over twice. For a moment he lay stunned, then he scrambled to his feet. He wa covered with dirt. It was in his hair id eye and mouth. It tasted gritty b een in teeth. Smoke burned his nos s.



Picking his way gingerly a nd the big crater in the middle of e yard. John-William ran past the c ng ba and into the field where the sl er was. There was another loud exp on be- hind him and he staggered ar went to his knees. But he rose quicki nd ran on and reached the shelter. Gregg was checking the list of boys. closed the big iron door behind them.

THE inside of the shelter wa ounded like the inside of a tube. re was little room. It was hot and fy and the hundred and fifty boys an nasters were sitting about on cots and irs an on the floor. There were ma ines to read, games to play. Someone ned on the wireless and they had mus

The sound of the bomb nd the roar of planes was muffled h in the shelter and after he had reg ed his wind a bit he sat down to fini his let- ter. It was all done except the nature and—oh, yes, he had almost gotten. At the bottom of the page h rote a short P. S.:

"And, please, Mummy, will u send me some gunpowder to help ebrate Guy Fawkes Day."

Very carefully he folded letter and slid it into an envelope. wrote the address on the cover and e it to Mr. Gregg for mailing after the id was over. Other boys were writing ir let- ters, too. Outside, the guns roa d.

China Sky

By Pearl S. Buck

ILLUSTRATED BY MARTHA SAWYERS

The Story Thus Far:

TEMPORARILY in charge of a hospital in the Chinese city of Chen-li while her chief is in America, Dr. Sara Durand carries on courageously—despite frequent bombings by Japanese airplanes. Her first real test comes when a noted Chinese guerrilla—Chen-ta, commonly known as "the Eagle"—brings in a seriously wounded Japanese prisoner. Assisted by Doctor Chung, of the men's ward, she operates. And the Japanese ("Mr. Yasuda," an officer of high rank) does not die.

Then Sara receives a crushing blow. The man she loves—Dr. Gray Thomison—returns from America *with his bride!* . . . From the first, Louise Thomison is miserable; she loathes the Chinese, she is terrified by the bombings. Also, she is lonely and bored—from time to time, she invites Harry Delafield, an attractive Englishman, to come over from a near-by port. . . .

Working through Doctor Chung (whom he bribes) Yasuda succeeds in inveigling Louise into getting his letters through, unopened. Assured by Chung that the letters are harmless, and that there will be no more bombings *of the hospital*, if they go through, Louise co-operates—quite innocently. And, to the mystification of everyone, there are no more attacks on the hospital! . . . The letters contain outlines of Chen-ta's battle plans, brought to Chung by his brother, Chung Third (one of Chen-ta's men). . . .

Two women are in love with Doctor Chung: Doctor Siu-mei and a nurse, Ya-ching. Regarding Ya-ching as just another woman, Chung amuses himself with her for a time, then drops her brutally. Unfortunately for Chung, Ya-ching knows too much. She knows that Chung is giving certain pills to Yasuda—pills that enable the Japanese to have frequent relapses. She knows about Chung's brother. . . .

Together, at the hospital Sara and Gray watch a tiny Chinese airplane bring down two Japanese aircraft. Overcome with joy, they throw their arms about each other. And suddenly Gray knows that he loves this woman—this young physician who has worked beside him for so many months. As he stands there holding Sara close, Gray bends and kisses her. The kiss ended, he does not take his arms away. Nor does Sara take hers away.

said the company e 'em the New York probably made the venty-five apiece for the costumes, instead of the original dollar six bits."

When the show was put on in Hollywood it cost $350 for scenery and $400 for the costumes—and almost didn't get on at all because of financial troubles. A lot of people headed by Florence Sage had organized the Hollywood Theater Alliance because they had a vague feeling "something ought to be done about something." The Federal Theater Project had shown that the town reeked with talent and that, further, there was an audience for medium-priced entertainment. So they got stuffed up with big ideas and rented the old Writers' Club on Sunset Boulevard for $300 a month and started hacking it into the semblance of a theater. Just as they were beginning to feel pretty righteous about this along came a little man who nudged them sharply with his thumb and said:

"How's about the rent this month?"

After that it became a race and a nightmare. The Alliance held a series of rent parties, at all of which they raised just enough money to make preparations for the next party. So they got donations and loans. They bothered their best friends; they became public menaces. Just a little dough for the rent; come on, come across. In the meantime they were tearing some extra insides out of the Writers' Club, which was merely an old rambling bungalow. But no matter how loudly the hammers rang or the members lamented, there would be a distant voice crying: "Rent. Rent. How's about the rent?"

The committee that finally put the

OUR NEW ARMY

Laundry prices seemed high to three privates at Camp Robinson, Arkansas, so they bought themselves a washing machine. At left, Paul Anderson and Robert McCracken operate the wringer while Harold Lynn rinses the shorts. All are with Headquarters Company, 69th Infantry, Kansas National Guard

MAYBE you'd like to take a whirl at an Army psychological test for mechanical aptitude. Easy. Get a friend to take apart a lot of doorbells, hinges, locks and mousetraps and mix up all the parts in a box. Your job is to try to reassemble the gadgets swiftly and efficiently. . . . How's your sensitivity of touch? To find out, take five small steel cylinders, varying in diameter so slightly that the difference can't be detected by sight, and try to sort them into proper order: largest one first, smallest last. . . . Then you might have a go at taking a round lead bar and hammering it into a square—without changing its length. . . . After that you can retire to the booby hatch.

The idea of these tests is that the Army doesn't want—any more than it can help—repetitions of World War I incidents, like the one about the tough top kick who spent half an hour explaining the workings of a rifle to a recruit only to find out he was lecturing a gunsmith.

●

FORT LEONARD WOOD, MISSOURI: This 7th Corps Area training center is climbing out of the Ozark mud and will be operating full blast within a month or two. Right now, 12,000 workmen are putting up and laying out 1,550 buildings and fifty-five miles of roads. When they've finished, the $30,000,000 camp will accommodate 37,500 men on its 65,000 acres. Greatest obstacle to construction is the mud—a thin layer of topsoil on a thick layer of clay on a bed of hardpan. The latter blocks drainage and the mud is so gooey that a workman run over by a truck wasn't seriously hurt; just pressed into the mud. Carpenters range from good workmen to dim-wits who haven't the faintest idea. A foreman asked one of the latter how long he had been on the job. "Hour and a half," replied the workman, examining a hammer with great interest. "How long you been a carpenter?" the foreman pursued. "Hour and a half," said the workman, laying down the hammer, baffled by its complexity.

●

CAMP JOSEPH T. ROBINSON, ARKANSAS: Boast of the post is that it has the best mud any army ever had the privilege of wallowing in, and there's a plan afoot to ship sample carloads to other camps. The reddish, sandy Camp Robinson product can easily be scraped off shoes and uniforms, and its gravel base so hastens water drainage that two hours after a heavy rain the terra is firma.

ROBINSON covers 39,000 acres containing rifle and pistol ranges, 6,000 tents, 500 wood buildings and 20,000 Nebraska, Kansas, Missouri and North Arkansas guardsmen. But there's no

"Streamlined smoking!—a basic new design, Colonel!"

● HERE'S THE MOST important cigarette improvement in 25 years — streamlined smoking.

It's Pall Mall—a cigarette deliberately designed for better smoking! Pall Mall is over 20 per cent longer than the old-style cigarette. And this additional length is important.

Because it travels the smoke further—the smoke reaches you cooler. Because it filters the smoke through more tobacco—the smoke is definitely milder.

Important, too, is BULKING.

Because this careful Pall Mall process mellows tobaccos as nothing else can.

In BULKING, the traditionally fine Pall Mall tobaccos acquire a new character. The delicate flavors blend together. All harshness is gradually softened. Pall Mall becomes a noticeably smoother cigarette.

The smoke of these fine tobaccos—enriched by BULKING, traveled and filtered through Pall Mall's greater length—gives you a combination of advantages no other cigarette can offer.

"Streamlined smoking!—a basic new design, Colonel!"

Prove it! Yourself, try Pall Mall critically.

"Fan Mail" IS POURING IN PRAISING HYDRA-MATIC DRIVE

"GREATEST DEVELOPMENT IN AUTOMOBILE HISTORY"

"I have driven my '90' Hydra-Matic Olds approximately 20,000 miles—on long, fast drives and hard ones. On one particular trip, I traveled a distance of 152 miles in 2 hours and 10 minutes with an average gasoline consumption of 18.1 miles per gallon. I consider Oldsmobile the greatest automobile built today and Hydra-Matic Drive the greatest development in the history of automobile manufacture."

H. G. G., TENNESSEE

"NEVER DREAMED DRIVING COULD BE SO MUCH FUN"

"I am nearly 70 and have been driving since cars came out—but I never dreamed there could be so much fun in driving till I stepped on the throttle of an Olds Hydra-Matic . . . Talk about power and get-away, I never saw anything like it!"

E. A. M., NEW MEXICO

"NO AMOUNT OF MONEY COU

"Have just returned from a 6,000 Olds Hydra-Matic Coupe. I could h the coast for a good deal more tha but no amount of money could buy could not get another."

MRS. A. B.

"WON'T LET ANYONE ELSE

"After two months, I am reminde bought my son his first electric train one else run it. You're too modest i Hydra-Matic Drive!"

"ALMOST TOO GOOD TO B

"I think Hydra-Matic Drive is the ment the automobile industry has years . . . it's almost too good to be

J. W., S

Oldsmobile Custom Cruiser 4-Door Sedan, Available as Either a Six or an Eight.

NEVER in Oldsmobile's 43-year history has any new development inspired such enthusiastic owner letters as Hydra-Matic Drive! From mountain regions, open plains and congested city areas, the "fan mail" is pouring in—voluntarily and unsolicited. Owners *everywhere* are unanimous in their endorsement of America's first car without a clutch pedal or gear shifter. Hydra-Matic Drive is the world's only combination of fluid coupling and 4-speed, fully-automatic transmission. It eliminates the clutch pedal *completely*—does away with manual shifting of gears. It steps up performance and saves on gas. And it's been *proved* in the hands of more than 80,000 owners. Try Hydra-Matic Drive today—and you'll never be satisfied with anything else!

It's ealthy if you don't take it too ." H gerty said, "and that's what a of k s have a tendency to do. Let's to t races. You need them today. don't know why you folded up in there." He spoke without malice, almost, as though to himself. When Corbett didn't speak, Haggerty went on: "The Martins will be glad to see you. They like you."

"I like the girl, Ellen," Corbett said. "But the old lady talks too much."

"No one's asking you to marry the old lady," Haggerty said.

"You'd think I was a tout," Corbett said, "the way the old lady hangs on me for what to bet. Hell, I don't know."

"You know the horses well," Haggerty said. "You've got a good mind for it. What do they call it, objective? That's it. To be a good gambler or a good doctor you got to be objective. Cold. It's nice. I have to work to be objective. You got it naturally."

Corbett didn't speak. Going down to the car, Haggerty noticed the younger man looked tired. He said, "We'll have to hurry if we're going to make the first race."

"We'll make it, all right."

"What do you mean?"

"You just like to drive fast."

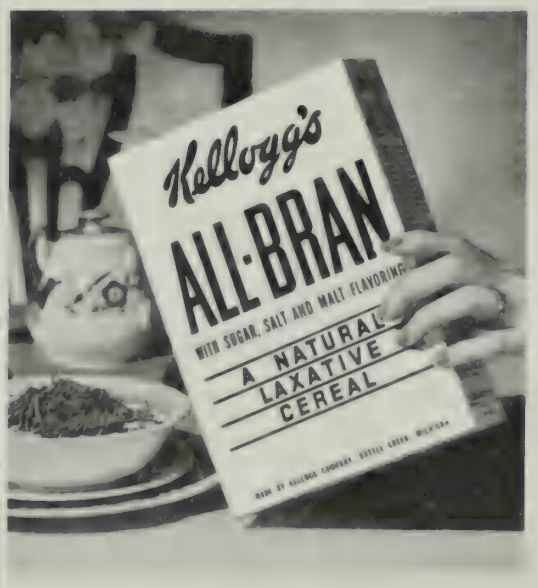
"Got to have some relaxation," Haggerty said. He liked to drive and, because when he was young he had been poor, he liked expensive cars. The big car they were in moved quickly and easily through traffic as if it were flexible, even sentient. The doctor's license, the deputy police commissioner's marker over it, got them waved on. It was a Saturday and a little crowded when they came to the suburban roads. A state policeman saw the car, saluted Haggerty, picked them up and led them, siren screaming, through the traffic.

"See," Haggerty said. Then, almost to himself: "I've come a long way."

Corbett nodded but didn't speak. He liked Haggerty. The chief's delight in the obvious was balanced by his delicacy in the operating room, and nothing he did could more than make Corbett laugh at him, indulgently as at a child.

While Haggerty parked the car, Corbett walked ahead and bought a form sheet. The first race was for two-year-

"He's even made up a poem about it—'Rickety Rax, Rickety Rax, tomorrow I work on my income tax'"



People differ about constipation

FIRST, there are those who always want to get it over with *quick*. "Take a good strong dose," they tell you. Only, like the hare in the fable, these people rarely win. They make endless stops and starts; never get at the heart of the trouble.

OTHERS SAY that quick results aren't enough. After all, history says the *tortoise* won the race. With constipation, as with any ailment, it's better to get at the *cause* and *correct* it—then you won't *have* to resort to emergency measures.

WE SAY that if your trouble is the common kind that's due to lack of proper "bulk" in the diet, this crunchy toasted cereal, KELLOGG'S ALL-BRAN, *will* go right to the cause and correct it. And by one of the pleasantest means you ever knew! But you must keep at it. Make ALL-BRAN your steady breakfast cereal, drink plenty of water, and see if you don't leave constipation miles behind!

Join the "Regulars" with Kellogg's ALL-BRAN

Scores again
with a brilliant new ink

"AMERICAN BLUE"

It's an entirely new ink, brilliant, deep toned and permanent, to add real distinction to your writing . . . It's smooth flowing, too—easy to start—it dries almost as quickly as you can write. And you'll like the attractive, colorful and timely "streamlined" bottle with wide mouth for easy dipping and filling.

NEW CUBE-WELL with large cube of ink and hard rubber base . . . self-starting pen that writes pages at one dipping.

old maidens at five-and-a-half furlongs. A horse named Pot Luck was in it; he had run only twice before and had shown early speed. Corbett thought it was reasonable to suppose he might stay this time. He'd been training well and you never knew about two-year-olds. He'd be a price.

Corbett went slowly through the clubhouse, reading the form. He came into the sun. It felt good on his face and neck. A bugle was sounding and he looked up. The horses were coming out, nervous, unsure, the boys keeping a firm hold on them. Pot Luck looked to be in good shape. He had the hindquarters of a sprinter, powerful and short-coupled. It wouldn't take him long to untrack. Someone called and Corbett looked up. Haggerty was with the Martins in their box.

"What do you like, Doctor?" Mr. Martin said, after the greetings.

"It's a scramble, but I think Pot Luck might be a good bet across the board."

"He was last both times out," Mr. Martin said.

"But he has early speed and he seems to have been training well. He might last this time."

"I have to go against you this time," Mr. Martin said. "I like the favorite, Abbeyville."

"I'm going with the doctor," Mrs. Martin said, smiling fondly at Corbett. The four-carat diamond on her finger winked in the sun. It was something, Corbett supposed, that she wore only one. He turned to the daughter. He liked her for being quiet. She had fine, clear skin, he saw; it looked good even in the strong sunlight. "Which do you like, Ellen?" he said.

"I just like to see them run," she said. He saw she was a nice-looking girl, although that hadn't been his memory of her; most girls with the kind of looks she had would be smiling a lot to give people the full benefit of those fine, high cheeks and the delicate way the skin crinkled around the good eyes.

"You ought to bet Pot Luck across," he said. "He's twenty-three to one. He ought to be about sixty. Someone's betting him."

"All right, if you are," she said.

Going down to get the tickets, he thought that her mamma had certainly given her instructions. Away from the fine skin and the quietness, he told himself, he was not impressed by her.

Pot Luck broke on top and led almost all the way. Fifty yards out he hung and Abbeyville, running at him all down the stretch, caught him on the wire.

"See," Mr. Martin said. "I liked the favorite."

"We'll get more money across the board than you will," Corbett said, smiling.

"That's a hell of a way to bet," Mr. Martin said. "But you certainly picked a long one out of the hat."

CORBETT had the second winner at nine to two and the third at ten to one. He was better than a hundred dollars ahead.

"This is certainly your day, Doctor," Mrs. Martin said.

"Who do you like in this one?" Mr. Martin said.

"There's a horse in it called Barnstormer. A girl the doctor and I operated on this morning gave me a tip. What's her name, Doctor?" Corbett said to Haggerty.

"I forget," Haggerty said.

"Well, we certainly have to bet on that, then," Mrs. Martin said.

"Not me," Mr. Martin said. "I never bet hunches or tips. I like the favorite."

Anderson, a good jockey, was up on the horse. He rated Barnstormer along in third place, moved into second place on the backstretch and, going into the far turn, went inside the favorite, took the lead and held it all the way in under a hand ride. The price was a big one. Corbett had him ten dollars across the board for himself and five for the girl in the hospital.

"He'd never have gotten through," Mr. Martin said, "if the boy on that favorite had been on the rail. As it is, I don't know why he didn't close in on Anderson when he tried to get through."

"Anderson waited until they were in front of a patrol judge," Corbett said. "The boy on the favorite wouldn't dare to come over on him in front of the judge."

They looked at him respectfully. Haggerty said, "Did you bet something for the kid at the hospital?"

"Five across. I'll wire and tell her."

"Better wire and ask how she is, first."

Corbett went downstairs and cashed the tickets. With what he had, the tens and twenties made a big roll. He went from the clubhouse to the telegraph office under the stands and sent a wire to the nurse in charge of the floor the ward was on. He still couldn't think of the girl's name, but since the other two operations he had assisted Haggerty with that day had been on men, he just asked in the wire about the condition of the girl they had operated on that day.

He went back up to the box. Ellen Martin smiled at him without speaking and he saw she was a very pretty girl. It wouldn't do any harm to see her now and then, he thought. As a resident at the hospital he was getting a hundred a month and the roll in his pocket made him feel powerful. It was the most money he had ever had.

"I'm going to go with you, this time," Mr. Martin said. "But I hope you like the favorite."

"He's the best horse in the race, but he's tailing off, I think. He won three straight and was second last out."

"But his workouts are good."

"Too good, maybe."

He had the winner again, the second choice, at five to two. He had horses in the money in the sixth and seventh races.

"You people are having dinner with us, you know," Mrs. Martin said.

"I have rounds to make," Haggerty said, "but Corbett has the r

March sometimes goes out like a lion—and ditto for some people's breath. Delicious WINT-O-GREEN LIFE SAVERS will make your breath mild as a lamb . . . Have some with you always.

The best way to treat a sweet tooth is to treat it to a tingly and succulent WINT-O-GREEN—it's so cool and so refreshing!

Next time you sight a maiden in distress (particularly after a big meal), rescue her with a CRYST-O-MINT LIFE SAVER... the tastiest, handiest, aid to digestion.

Everybody's breath offends sometimes after eating, drinking, or smoking. Let LIFE SAVERS save yours. 13 delicious mint and fruit flavors. Sold everywhere. 5¢.

$2500.00 IN CASH PRIZES!

Just tell us why you like WINT-O-GREEN Life Savers ...in 10 words or less.

1. Each week for *10 separate weekly contests*, 26 cash prizes will be awarded. 1st Prize: $100.00 cash; 5 prizes of $10.00 each; 20 prizes of $5.00.
2. Enter each weekly contest as many times as you wish. Contests end March 29th, 1941. Send entries to Life Savers Contest Editor, Port Chester, N. Y.
3. Include a Wint-O-Green Life Savers wrapper (5¢ package) or reasonable facsimile with *each* entry.
4. Wint-O-Green counts one word, Life Savers count two.
5. Prizes are awarded for answers best for advertising purposes, in opinion of the judges.
6. In case of tie, duplicate prizes will be given. Decisions of judges will be final. Contest open to residents of U. S. and Canada. All entries become property of Life Savers.
7. Each week's contest closes Saturday midnight. The date your entry is received at post office in Port Chester, N. Y., is official date of entry. Prize winners will be notified by mail.
8. Employees of Life Savers or their advertising agency, or their families may NOT enter.

stretch, too far away to give more than a hint of their individual motion. Silent and unfretful, with some of the mystical quality of a cloud, they moved in a dark mass topped by a flecking foam of color. At their head now, separated by less than daylight, a single horse ran, like the tip of a spearhead. As Corbett watched, this horse slowly, almost painfully, detached himself from the mass and moved out in front of it.

The horses bent into the far turn at a brief and bitter angle. Foreshortened as they came off it, they were a single mass again, coming quickly apart as they swung into the long stretch. The leader had two lengths, a length and a half. A black horse was at the leader's flank, the withers, the neck. Then the horses were galloping away again.

"Some day for long shots," Mr. Martin said. "I bet you had that one, Doctor Corbett?"

CORBETT looked at his ticket. He had it, all right. He had everything, he thought. He felt lousy. "I think I'd better go back to the hospital with you," he said to Haggerty.

"No, you go with Ellen. There's nothing you can do. I won't have an autopsy before tomorrow, probably. And I'm telling you what it was. Shock. Now you go along with Ellen."

"Maybe it was a hemorrhage."

"No," Haggerty said. "Shock. I know. It's one of those things. There's no need for *you* to feel too bad. *I* finished the operation."

It seemed to Corbett that nothing made sense, that they were talking at cross-purposes. *There was shock, all right.* He didn't speak. They were walking slowly in the scattering crowd going to the cars. Mr. and Mrs. Martin and Haggerty were ahead. The girl walked with Corbett. It was a little while before he noticed her.

"I'm sorry," she said.

"It's all right."

"I suppose it is nice that you do feel bad. One somehow gets the idea of a doctor's feeling impersonal about his patients, impersonal to the point of coldness as regards death."

"Oh, sometimes," he said. "Sometimes." He felt vague and as though harassed.

"But Dr. Haggerty said he finished the operation and wasn't much you could do. It's really not your fault. There's nothing you could have done."

No. Nothing. He looked up. They were at the Martins' car. Ellen was telling the chauffeur to take the train; he wanted to drive.

"I'd like to go back with Dr. Corbett," she said in a low voice. He was trying to control what he felt.

"And I say no," Mr. Martin said. "You go out."

When Haggerty got into the Martins' car, Corbett got in with Ellen and father were in front. The chauffeur's glass screen was on the rolling landscape, clumps of trees as they sat facing forward, their backs loosely and flatly opposite.

"You have good hands," he said. "The hands of a fine surgeon."

"The hands of a good doctor at home," he said.

"You mustn't talk that way. I wish there were something I could do. What makes it difficult is that it wasn't your fault."

He turned to her, his face wanting to hurt her. He wanted to hurt her because he felt so helpless and insensitive as he said, "I'm sorry it's not my fault," he said. He wanted to see the effect on her face. Her face seemed even paler as she looking at him and he knew she was crying without sound.

"I'm sorry," she said. "I'm sorry. I hardly knew her. You don't remember her name, even. What did you . . . liked her?"

"I don't know," he said. "I don't know myself. That's the way like being crazy."

They looked at each other. They would go, he knew, but it did not seem that way. He could believe there was no one else. Ellen put her arms around his face to draw it to her. She held him against the loss, against was wrong so often, in the kind of mind he was in. He'd been wrong about Ellen, let her hold him a little time.

"The board of directors decided you must learn to rumba, Captain, if you're to handle a Southern c

s father wanted him to be musician, but Louis Prisci began to draw in public school and has been at it ever since (see opposite page). Art school and two years of sketching in Mexico and South America smoothed his technique and he finally settled down in New York, to marry Artist Margot Cook (see page 56) whose conception of her husband's profile is depicted herewith. Their ambition is to see the world—when things calm down.

Wh rehearsals went on endlessly nside mothers, fathers and stray relatives waited patiently for their darings get through. Fay McKenzie, who plays Miss Hollywood in the revue, had particular trouble with her father, an old rouper himself.

"I can smell 'em a mile away," said Papa cKenzie flatly. "A turkey. It'll never open."

Wh the directors got through their day's ork, they had to spend the rest of the night getting people out of bed and p ting the bite on them for money. Sid Fuller and Ray Golden were particularly adept at lifting the wallets of such friends as they could back into alleys and make listen.

Wh opening day neared, Dannie Dare found a new face in his chorus—the young painter who knew the lines when the cast forgot them, one Angus Hopkins, a six-foot giant.

"The old story," says Dare. "I thought Gorney had hired him; Gorney thought Myers had signed him. He's one of the best guys in the company."

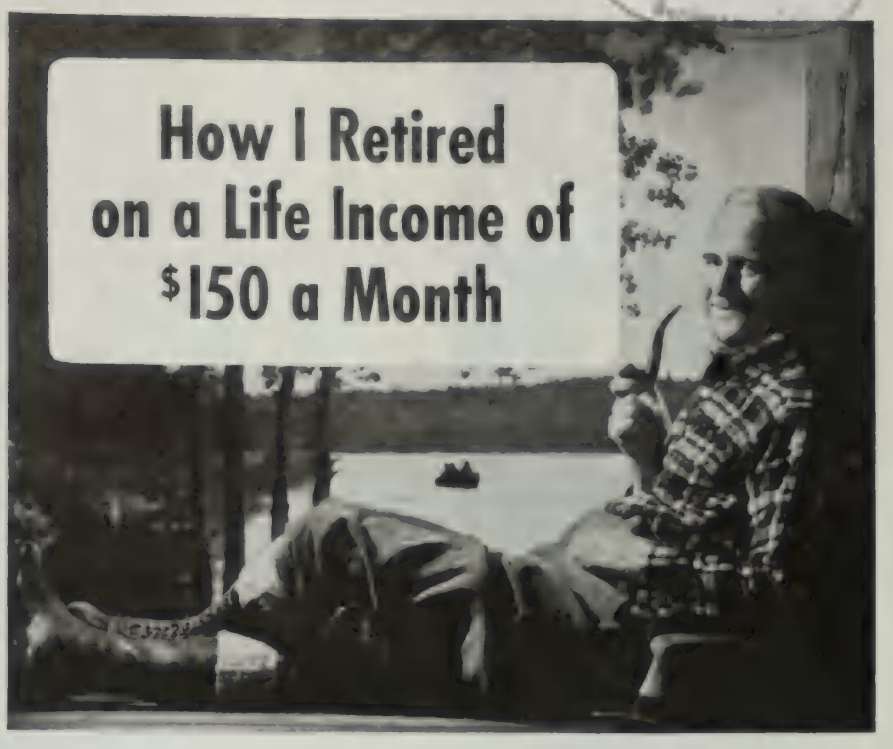
But just when everything was ready, disaster smacked them. . . . The fire department refused to let them open in their newly painted house. The troupe pranced down to city hall to see the mayor.

The mayor was too busy to see them, so they stood outside his office and sang The Bill of Rights, one of the eventual song hits of the show, to the mayor's secretary. She was properly moved and took them by the hand to the fire chief and asked him to do what he could for these nice young people. He said he'd come out and see a dress rehearsal of the show.

"Nice performance," the chief agreed after he had seen it—and then he kicked his foot right through the side of the building. "See? A fire hazard. You can't use it."

This was a real blow because the show had originally started out to be a sort of cabaret business with waiters wandering among the tables while the performance was going on. They even had a first-act curtain built around sandwiches and Hollywood drive-ins. In short they had no theater and none of that intimate sort was available and their money was now definitely gone. Faced with this disaster, the directors sped off into the night at the report that a theater might be available at Palm Springs. Their car suffered a broken axle at a point in the desert so far from human habitation that they were not heard from for thirty-six hours.

"It's all over," said the cast. "Even the guys that wrote it are running away from it."



As a last resort they found they could get the tiny theater of the Hollywood Assistance League for two weeks because it was the holiday season and it wasn't being used. When they picked on Christmas night to open, that was considered the last straw.

"A plain case of insanity," said Mr. McKenzie, father of the luscious Fay. "There'll never be a second performance."

Too Close for Comfort

He was nearly right. The notices next day were fair but nothing to get excited about, the theater was miles from anywhere and was hidden around a corner and word-of-mouth discussion was slow in getting started. On the second night the theater, seating 400, was only one third filled. The third night was no better, but one of the invited guests turned out to be Billy Wilkerson of the Hollywood Reporter. He wrote a column of elaborate praise and the fighting was all over. The theater was soon a sellout and when the Assistance League people began to ask plaintively when they could get their hall back, the show leased the Hollywood Playhouse, capacity 1,132, and began turning them away.

Since the twenty-four members of the cast double as principals and chorus, the changes of costume are rapid enough to confuse a candid cameraman and conditions were beautiful for brain concussions at the Assistance League, where there were only two small dressing rooms. It was here that the girls, acting in their role as a democratically organized faction of the show (and clinging rigorously to all the rights that sta-

To men of 40 who want to retire in 15 years

"FIFTEEN years ago I made a discovery that changed my life. I believe it will interest you.

"At that time, I was worried about myself and my future. I seemed to be living in a circle. I used to dream of being able to relax and enjoy life, without money worries. I longed for security.

"But that was 15 years ago. Now I have retired on a life income. I have no business worries—my security is guaranteed. I can work or play, as I like. Each month the postman hands me a check for $150 and I know that I will receive another $150 every month as long as I live.

"But dreams like that seemed hopeless. I wasn't rich. I probably never would be. Like millions of others, I would simply live and work and die—spend a lifetime making ends meet.

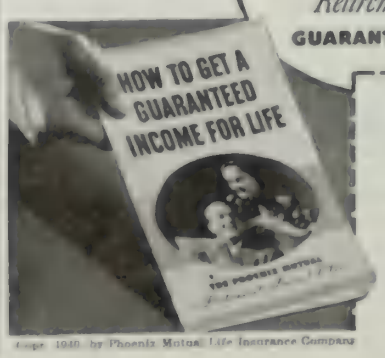
Here's What Happened

"My friends are envious. They want to know how it was possible. How, without being rich, I ever managed to retire on a life income. The answer is simple: When I was 40, I discovered the Phoenix Mutual Retirement Income Plan.

"The minute I read about this Plan I realized it was just what I needed. It showed me how to get an income for life beginning in 15 years. It showed me how to get immediate protection for my family in case I did not live until then. It even included a disability income for me if, before age 55, total disability stopped my earning power for six months or more.

"Best of all, the cost of this Plan was within reason. In fact, the Plan called for far less money than ordinary investment methods would require to get the same income.

"Today, at the comparatively early age of 55, I have the things I want lifelong security and freedom to do as I please. I can laugh at the worries that used to haunt me. With an income of $150 guaranteed me for life, I can be sure of comfort and happiness in the years ahead."



This story is typical. Wouldn't you like to make sure of your own future? Wouldn't you like to find out, for yourself, how the Phoenix Mutual Plan works? You can get the facts, without obligation, by sending for the booklet offered below.

Send for Free Booklet

Send the coupon and you will receive, by mail and without charge, a booklet which tells about the Phoenix Mutual Plan and how to qualify for it. This booklet explains how to get a life income of $10 to $200 a month or more, starting at age 55, 60, 65 or 70. It shows how the Plan can protect you against emergencies, and how you can fit the Plan to your own needs. Don't delay. Don't put it off. Send the coupon for your copy *now*.

ONLY ZENITH HAS THIS!

U. S. PATENT NO. 2164251
WAVEMAGNET
BUILT-IN MOVABLE FOR RECEPTION IN TRAINS, PLANES, AUTOS, ETC.
A NEW INVENTION—IT'S DIFFERENT

$29.95*

THE ONLY PORTABLE RADIO GUARANTEED TO PLAY WHERE OTHER PORTABLES FAIL . . . OR YOUR MONEY BACK

AT HOME OR AWAY, THE YEAR 'ROUND COMPANION

A most remarkable invention . . . the *Patented* Movable Wavemagnet in this new portable radio which you can carry in one hand, self-powered with a light, one-piece battery pack. Ordinarily it works without outside aerial, outside wires or ground.

LISTEN WHILE YOU TRAVEL . . . PLAY . . . OR WORK

Take this wonder portable where ordinary portables will not work efficiently; in a train, airplane, bus, ship, auto or any windowed building where metal construction *keeps out reception.* The secret of why it works while others fail is in the *Patented* Movable Wavemagnet, exclusive with Zenith.

Check up on your next train trip. See how many Zeniths are playing *well* . . . and how many other makes *fail* to do so. Your money back if *Zenith* fails.

WORKS ON LIGHT SOCKET OR BATTERY

If you want to save your battery, plug into any light socket . . . 110 volt AC or DC.

Earphones Solve Privacy Problems
Storage space for earphones . . . extra equipments for use at ball games, fights, or while travelling for privacy in reception without loud speaker. Listen with superior *Zenith* earphones or Bluthaphone. A boon to the hard of hearing, too.

In Airplane Cloth including strap here. The shape and size of an overnight bag styled like expensive luggage.

Under No Other Name But Zenith . . .
. . . can you obtain this radio or a portable that is, has, and does so many things! *Patented* Wavemagnet—built-in yet movable—combination battery *and* lighting current operation—loudspeaker *and* earphone reproduction—adjustable to varying conditions, reception at home or travelling. Don't buy until you see and hear the Zenith Universal Portable at authorized Zenith Dealers everywhere.

DeLuxe Edition in genuine cowhide . . . priced slightly higher than regular airplane cloth cover.

*Western prices slightly higher.

AGAIN A YEAR AHEAD
ZENITH
LONG DISTANCE RADIO
AMERICA'S OLDEST MANUFACTURER OF FINE RADIOS FOR THE HOME

tion can bring) posted an indignant notice on the bulletin board:

"Will Angus Hopkins kindly not take off his pants in the corridor?

"The Girls."

The cast votes on everything that happens to the show. When Jack Gilford, acting on advice from a drunk at the Café Society, came West with the thought that the company was waiting with open arms for him, he found that he could get into that choice delegation only if the cast wanted him. They gave him an audition, voted him in unanimously and he has been the mainstay of the show ever since. In addition to illustrating the anguish of a putt that just doesn't get up to the hole and the frenzy of a windshield wiper that tries to keep up with a gale, he does another act in which he tries to fight off sleep while listening to a long-winded visiting author. There are people who will go to their graves believing this is the most hilarious sketch ever done in an American revue.

Scared Into a Job

Then there was Virginia O'Brien. She showed up for one of the early auditions and said she was a singer. They asked her to prove it. She was so frightened she could hardly open her mouth and stood rigid, dead pan, and sang a hot torch tune. The laughter that followed could be heard over in Pasadena and she turned to leave.

"No, no, little Virginia," said the boys. "There is a Santa Claus and he has brought you to us and you will keep on doing your songs just that way and we will be very happy."

She was sensational, was signed by Metro, and was brought East by the Shuberts for Keep Off the Grass. Marion Colby took her place and is doing it now in New York. When a second company was formed in Hollywood after the first went on tour, a young Negro girl named Dorothy Dandrich did the number. Wild arguments sprang up all over town as to which was better—and certain families are still a-feudin'.

Bill Orr had been batting around Hollywood for several years before somebody headed him toward Meet the People, which was just casting. Metro had almost hired him to imitate a parrot, but there was a lady who did it better and he didn't get the job. The boys had been swearing that the one thing they wouldn't have was an imitator; this show wouldn't have an imitator. So they hired Bill because he was so good they couldn't help hiring him and he imitated F.D.R. and George Arliss and others and Warners' signed him almost immediately at one grand a week. He's still there, having left the show, and now the imitations are done by an enormously tall and talented lady named Elizabeth Talbot-Martin, who stops the show every night and brings on that usual fight in the families between Orr fans and Talbot-Martin addicts.

It is literally true that the show has become a cult wherever it has appeared. People go to it dozens of times and take it as an insult if all their friends haven't gone. The championship belongs to a Hollywood dentist, Dr. C. W. Solier. He came the opening night and liked the show so much he came the next night, and the next night, and all in all he and his wife have seen something like 187 performances on paid-for tickets. Toward the end of the doctor's run, the Alliance felt guilty about charging him and slipped him a pass or two, so he and Mrs. Solier got to be godfather and godmother of the show. They went up to San Francisco twice to see the show and then went on to Chicago for the opening. In Hollywood he got to be ashamed of being there all the time and used to wait till the house lights dimmed before sneaking in.

When the show toured, it carried twenty-seven people — not including eight mothers, four fathers and two wives. The youngest of the lot is Peggy Ryan, who has just turned sixteen. She has been in the movies and will be back in again if she ever gets through the stage where her voice sounds like a pipsqueak.

Although some of the sketches are very tart about political foibles the cast is not necessarily up on all the twists of international and national events. Eddie Johnson, the shorter membe that sings that biting tune Old South, was confused about a rhyme that coupled pellagra.

"Mr. Gorney," he said, lookin' but I can't find it. W Pellagra River?"

In addition to Jack Gilfo depends for comedy on a fab man with the fabulous name Weaver. He looks like son has been invented, and his ty verges on the supernatura overtones of catalepsy. In h he is exactly as wacky, sm with "Doodles" scrawled on stands and watches the Ti electric signs for hours, put gers to his ears and wiggling tervals to reveal his astonish

what he must do, she thought, and she could bear it somehow. Then he spoke:

"What shall we do, Sara?"

"Anything you think is best, Gray."

"No, not only what I think, Sara. How can I decide for—three?"

"Decide for two, that's all, Gray—you and Louise. I have decided for myself."

They looked at each other, honest eyes upon honest faces. Then he groaned:

"Why didn't I see it long ago—before I ever went away from you?"

She shook her head. She could not speak. She bent and kissed his hair and went quickly away.

. . . Louise in her pretty living room was enjoying herself. Harry Delafield had come to tea. She felt it a small triumph, for he had put her off twice with pleas of unexpected work. This morning his chit came asking if he could drop in this afternoon.

He had come rather early and they had sat through the raid feeling nearly perfectly safe and making signs to each other. In the silences between the explosions they talked a little, watchful of the next thudding boom.

He said, "I say, it's very strange the hospital's never hit any more."

She made a little face at him. "You know why it is—we have an important Japanese patient!"

"So I've heard," he said, and grinned at her daring. "I say, do you know the Jap?"

"Yes, he's quite nice," she said. "I take him flowers."

"You're nervy, aren't you?"

"How?"

"The Chinese have it in for who's nice to a Jap."

"It doesn't matter what the think of one," she said.

"Oh, I see," he replied.

The booming began again the room filled suddenly with They sprang up to go to the wi stood watching it.

"Lucky the wind's the other said.

"They usually get the fires she replied.

"Yes, and with buckets a hand pumps," he said. "One h mire them, you know."

But she did not answer thi watched until the flames bega down and only the black p slowly swirling smoke remai then the quiet wind began p

Things a man can trust

There are men and institutions that merit the name of "Old Faithful" as truly as does the remarkable geyser in Yellowstone National Park. In these times it is well to know them. It is a comforting thing to be certain that, whatever happens, we can count on them. To the more than two million policyholders of the New York Life Insurance Company, the feeling of confidence in their company is a priceless possession which has a solid foundation of integrity.

Since it was founded in 1845, almost one hundred years ago, this Company has met its every obligation, through panics, wars and epidemics. The Company operates under the most stringent laws for the protection of policyholders and adheres to the principle that "safety is always the first consideration." ★★★ It has always been a mutual company, has never had a stockholder, and pays dividends to policyholders only. ★★★ New York Life representatives have a unique incentive to render the best possible service to their clients under a special agency plan which promotes and rewards long continuity of service and benefits all concerned—the policyholder, the beneficiary, the agent and the Company.

Before you buy your next policy, talk with the New York Life representative in your community. He may be able to help you.

NEW YORK LIFE
INSURANCE COMPANY

A Mutual Company
Founded on April 12, 1845

51 Madison Avenue,
New York, N. Y.

Safety is always the first consideration . . . Nothing else is so important

away. They went back to their seats.

"I'm glad you were here," she said, smiling gently across the little fireside table. "I know we are safe here, but still I'm afraid."

"Then I'm glad I was here," he said. He took the cup of tea from her and their hands touched and they smiled at each other again. He felt reckless today because he felt safe. He was going to be moved to a higher post. He had come especially to tell her and then had put it off because it was so pleasant to feel safe enough to make a little gay love to her. It was perfectly safe, since now he had his promotion and would be going away. He was glad he had not let himself fall in love with her, but still it was exciting to realize he actually did love her a little, enough to make him feel sentimental and sorry to think there would be no more of these times.

"You're looking prettier than ever, Louise," he said.

She flung back her bright hair. "I'm hideous," she declared. "What wouldn't I give for a few hours at Armand's on my hair and my skin! I'm a fright."

"A lovely fright," he said, laughing. He put out his hand and lifted a curl of her hair. It was soft and he let it wind about his fingers, conscious of a certain teasing excitement in the act. Then she tossed her head and leaned back in her chair beyond his reach. She would wait for his lead, she thought, smiling. She was so restless, so pent up in this little house, so bored in this ruined, stupid city that she would take any excitement. But she was not prepared for what he said suddenly after a moment.

"I say, Louise—I have to go away, you know."

She leaned forward. "Oh, why, Harry?" she said.

"Orders," he said. "I'm going to move up a peg. It's a promotion."

HE WAS elated to see the disappointment upon the pretty face. Since he was going away, why shouldn't they perhaps— The pretty face turned hard under his eyes.

"If you go, I'll simply die I'll be so bored," she said bitterly.

He felt dashed. "I'm glad I've been of use," he said a trifle coldly.

She felt the coldness and put out her hand to him. "You've simply saved me," she said. "There hasn't been anyone I could—play with. I love so to play. I'm not a bit serious, Harry. I've always had a good time until I came here."

Something broke in two in him. One part thought, "Still, her husband's a decent sort," the other smiled at Louise, comprehending her very well.

"I know—I rather like a good time myself," he said.

They sat measuring each other with their eyes. How far did play go?

"Where are you going?" she asked, delaying answer to that question.

"To Peking," he said, accepting the delay.

"Shall you mind being in Japanese territory?" she asked.

"Not a bit," he said. "What do I care? Besides, it'll be jolly getting out of raids."

"I wish I were going," she said.

"I wish you were," he replied. "Especially Peking. There's jolly riding there in the western hills. We could have some fun. I'll miss you, Louise."

"Will you truly, Harry?"

"Cross my heart."

Their hands clung together now and neither pulled away.

"Do you know, Harry, I've often thought perhaps the Japanese weren't so bad as Gray thinks."

"Japan's rather decent," he admitted. "I've been there quite a lot."

"Have you? Do you think I'd like it?"

"I believe you would," he said; "everything's small and pretty and frightfully clean—not a bit like China. It's all organized, like Germany."

"I was in Germany once," she said, "and I had such a good time. I liked the way the men clicked their heels and kissed my hand."

"Well, you always know where you are there," he said easily, "and it's just the same in Japan. Here, of course, it's every fellow as he's able. They're rather corking, though—take that guerrilla chap, the Eagle they call him—"

"I hate it here," she cried out. "I don't dare tell Gray how much I hate it!"

"It is rather rotten for foreign women," he agreed. But what he was thinking was whether or not he would kiss her. It had been fearfully long since he had kissed a white woman. He began to pull her toward him ever so gently.

He sat down without bending, as he always did, to kiss her cheek. It would be absolutely impossible for him to touch her, he had decided.

"It's cold," she said. "I'll ring for hot."

SHE touched a small copper bell and Siao Fah came in decorously quiet. "Hot tea," she said over her shoulder.

"Me savvy," he said with dignity, taking up the pot.

"I was just telling—your wife," Harry said, not looking at Gray, as he knocked his pipe into an ash tray, "that I'm being sent up a peg."

"Not going away?" Gray asked.

"Yes—to Peking," Harry replied.

"I'm sorry for that," Gray said. He tried to gather into a focus his dazed thoughts. "I've wanted to tell you before how much I appreciate your mak-

"Don't you know anything besides I'll Never Smile Again?"

DAVE GERARD

And she did not resist. Would there be any excitement in this, she wondered? Both of them forgot everything except this moment. He was on his feet now and she rose gracefully to meet him, full of curiosity.

SIAO FAH on his three-legged stool, his eye at the keyhole, choked and when Little Pig came to ask him about gravy he gave him a push that sent him half across the kitchen floor.

"Don't ask me anything now!" he hissed without for an instant moving his eye. There was a long moment of intense concentration. Little Pig on the floor watched without daring to move. Then Siao Fah rose and dusted his hands.

"There," he said, "now I've seen it with my own eyes."

. . . Gray, coming in long after, found two quiet people by his fireside—Louise sat smoking one of Harry's English cigarettes and Harry was smoking his pipe. The cold tea things were on the table between them.

He was so relieved to find Louise not alone that he did not notice the quality of the silence into which he entered.

"Hello, Delafield," he said. "Glad to see you. Louise, pour me some tea, please."

ing some fun for Louise," he said. "I'm afraid she'll miss you." But nothing he said seemed real. "So will I," he added. Still it was not real.

"I'll miss—this," Harry said indistinctly. He lit a fresh pipe and the smoke choked in his throat. "Dash it, the chap's too decent for me to carry on behind his back," he thought remorsefully. He rose, anxious to say his goodbys while Gray was in the room. Siao Fah came in with the tea.

"Oh, stay for a fresh cup!" Louise begged.

"Thanks, no—I must go," he said.

"But we'll see you again?" Gray asked.

"Of course we will," Louise said. She pouted prettily, clinging a little to Harry's hand when he shook hers in his abrupt English fashion.

"Oh, yes—well, I hope so," Harry said. He drew his hand away hastily.

And a moment later he ran down the brick steps of the house and out to his waiting ricksha, not knowing whether he was most glad or sorry to know he was gone for good. The moment when his lips had met Louise's soft mouth had been sweet, but not quite sweet enough to risk the hurt to that tall, serious-faced husband of hers.

GIFT TO AMERICAN MOTORISTS

1600 miles of new roads every month!

—FROM THE NATION'S TRUCKING INDUSTRY

PLAN now on the grandest year of motoring you've ever had. Because—

Stretching out ahead of you are glorious new highways your wheels have never touched. Roads that take you over magnificent new scenic routes. Roads to state parks and picnic grounds. Roads to new camp sites—lakes—and fishing streams. Roads that make your car more enjoyable—more useful—whether you're traveling on business—or just for fun.

BUILT FOR YOU!

Many of these new highways will seldom be used by trucks, although trucks helped make their construction possible. In fact, truck taxes every month are enough to build 1,600 miles of modern roads. That's a tremendous contribution. Yet trucking does still more.

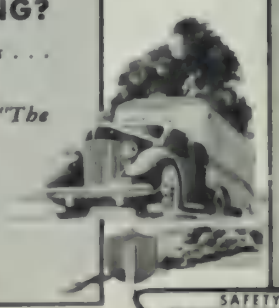
Trucks save you money on everything you eat—wear—buy!

You save directly—because no other form of transportation provides the overall speed — flexibility — and economy — of motor freight.

You save indirectly—because trucks make modern farming and modern production methods possible—*linking the assembly lines of factories together—reducing costs on farms—increasing efficiency all around.*

In the meantime — new highways—and better truck equipment—add vastly to our National Defense.

Can you think of any industry that gives you more?



EVER KNOW THIS ABOUT TRUCKING?

Motor freight competition has reduced all shipping costs . . . reflected in lowered prices to you.

More and more, motorists refer to truck drivers as "The Gentlemen of the Highway."

Trucking supports 3½ million American families.

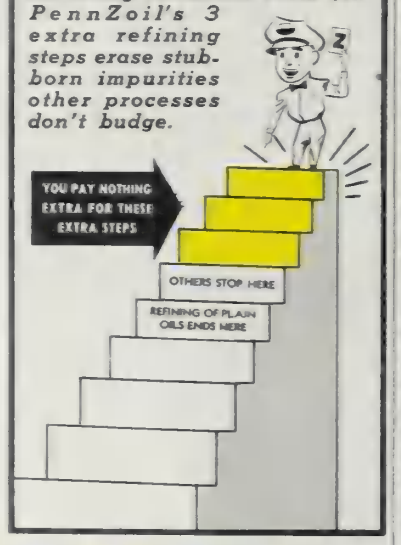
HOW TO BE

Lucky at Cars

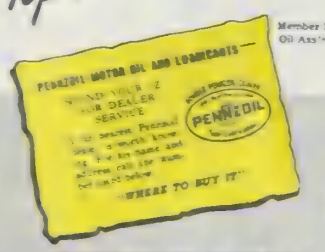
If you can't match the performance and economy of your "lucky" friends' cars . . . don't envy them. Join them!

Clean, tight engines are smooth, economical and snappy. Keep yours that way and you'll be a lucky driver, too!



HOW TO DO IT

Sludge makes engines dirty. Wear makes them loose. The kind of oil you use has a lot to do with both wear and sludge.



One Pennsylvania oil has a particular reputation for keeping motors clean and tight — wear-free and sludge-free — for their lucky owners. It's PennZoil. To get it, be sure you . . .

Why the "Z" Trumps Engine Trouble

It's hard to take some trouble-breeding elements from oil. PennZoil's 3 extra refining steps erase stubborn impurities other processes don't budge.

Sound the "Z" for this top PENN SYLVANIA OIL

said. He looked pleased. Ah, now, she was beginning to believe him! He went on, "He gives her a piece of paper. This she reads. Then she writes on her own paper and puts a stamp on the envelope and I take it to the post office."

"Still does this happen?" she asked.

"Still it does," he replied. He leaned forward. "Once I took one of these letters not to the post office but to Thomison doctor and he read it. But what can he do with his woman? She is like a fox, that woman! As soon as she talks he listens and believes her. So still there are the letters."

"But what—"

Siao Fah shrugged and coughed behind his hand. "What does she say? How do I know what a woman says? I have never demeaned myself to listen to one." It occurred to him that now he was talking to a woman and he excused himself hastily: "You, Durand doctor, are not a woman. You are only a doctor."

A WISTFUL pang shot through her. "Perhaps you are right," she said humbly. Out of the mouths of fools and sucklings, she thought—then she put herself away. Chung and Yasuda, Chung and letters—links were coming together into a strange chain in her mind. But Louise?

She inquired of Siao Fah, "Is there anything else you have to say?"

He scratched his head. "Is that not a good deal?" he asked.

"A great deal, perhaps, and perhaps —nothing," she retorted. She motioned Siao Fah away and he opened the door and slipped through it like a shadow.

Alone in her room she went to bed but not to sleep. In the intense silence of the night she lay, thinking and thinking of Louise. What had Louise to do with Chung? She had never seen them even speak to each other. Yet they had spoken often. And what had Chung to do with Yasuda beyond what he should have as a doctor?

Her mind refused the absurd possibility of intrigue. And yet there was this strange safety in which they lived these horrible days. Yasuda and safety, safety perhaps because of Yasuda? She had heard the rumors among the Chinese and had rejected them. But now, link upon link, the chain in her mind grew longer. All possibilities—nothing proved, she told herself strongly. She had an accursed imagination that loved to run ahead. She must not run after it. Let her wait and see. Wait she must, for to whom could she talk? Not Gray, if Louise were a link in that chain; not Siu-mei, who loved Chung!

"I wish I could get hold of that Eagle, Chen-ta," she thought suddenly. "I'd get him to take Yasuda away. Then we'd see."

The more she thought of it the more she wanted the thing done. If Yasuda went, whatever had been built upon his presence would tumble. Thought hardened to determination, and with determination she drifted toward sleep. Across that drifting she heard out of the night's silence the cry of a woman's voice in the street calling the soul of her dying child to come home, come home.

"Oh, the poor mother!" she sighed, and slept, as the voice died in the distance.

"GRAY is jealous," Louise told herself a dozen times through that long evening. "And frightened, maybe," she added, watching him. Why else was he irritable and then humbly sorry and eager to make amends?

"Don't mind anything I say or do," he told her brusquely after dinner. "I have one of those heads of mine." He stretched himself on the sofa and closed his eyes.

"Poor Gray," she said gently. She lay back in her chair living ov afternoon. Perhaps after a little in love with Harry? C that she wished she were too, and so with him? She long brooding over this. N wanted, what she must hav away from this fearful hol her life had fallen. It was young and beautiful Americ be locked up in a ruined C It was not enough simply bombed. There was more mere physical safety. If Gr with her, well enough. He would be best. But if he we must go alone.

"Gray!" she said.

"Yes?" He did not open h

"Gray, let's get out!"

"Get out?" he repeated. his eyes now to stare at her.

"Yes. I'm just—fed up. stay any longer, Gray." He gan to burn. "I hate this hate everything here. I tr anything, but I can't go on f this."

"Is it because Delafiel Louise?"

His voice was so gentle t confounded and could not he went on: "Tell me, Louis could understand that."

"No—no, it isn't," she sai least, truly I don't think it is haps his going makes me more to—go—home, but—h him, if that's what you mear

"I've thought for a long t you did—like each other," h same tired, gentle voice. " you that Siao Fah brought once that you'd written to didn't want to read it—then to. Then I told Sara—"

"You told Sara!" she crie

"I had to, again," he said

"That explains everythin furiously. "Her coming he me that day—her saying preciate you. You should h me, Gray. I'd have told yo Harry has given me some fu He's made this place a little That's all."

"That night," Gray said came in ready to speak to y that was the night you said a child. Nothing else see tant after that. It would ha insult then to speak of the le it away."

SO THAT, she thought, e mystery of the lost letter come to her angry and distu The guerrillas had surprised garrison because the lett reached the person it was m told her. She felt herself ta trigue. But she had not plan —only some sort of escape ing, and those horrible h shelter among disgusting p trigue frightened her. She must get away! Gray was s thing:

"Then you said you coul child here in Chen-li. Yo that is. It wasn't right."

"No, I won't," she said sha

"But recently I've bee would you anywhere? Wasn other—plan to get away?" this out, miserably conscious secret. He had never had a life before and he could not Either he must tell Louise t must go away from Sara a secret. As soon as he cou make up his mind what w them all—not just for him. free.

"No, it wasn't," Louise s beastly you are, Gray!"

She took a cigarette an

...le quick puffs. "Gray, I'll ...ou let me. Let's go home ...Yo... We'll have a real house, ... a baby. I do want it so." ...quivering as she spoke. ...She, ...earing these words, leaped ...er ch... r and ran over to him and ...ers... upon him, crying and ...g to... ther.

"Gray, do you mean—Gray, will you really? Oh, darling, darling, darling!"

He let her cry and laugh and fondle his hands and face and then he said, "You do love me?"

"Oh, I *love* you!" she cried.

"If I—go," he said indistinctly, "you must—love me very much."

"Oh, I will!" she cried. She jumped up and whirled about the room laughing and dancing, and he lay watching her, his hand over his eyes again. Now that he made a decision, his mind was clearing. Sara would understand that he must give Louise her chance. He had to be fair to Louise first, or everything else would be wrong. If he and Sara should—think of each other first, his conscience would be forever gnawing at him. He'd have taken something for himself at the expense of another whom he had promised—to cherish. Sara would understand him. Sara was so strong. She would be patient with him, and bear it and go on with her work. Besides, no one, nothing, could take from them the knowledge of what was between them, which was so much more than love.

Under his hand he closed his eyes and saw Sara's face as it had been this afternoon, upturned to his kiss—her brave and beautiful face! . . .

AT THE keyhole Siao Fah watched Louise with stupefaction. He had been prepared to enjoy seeing her beaten at least when Thomison doctor came home and saw that other man sitting in his own chair before the fireplace and with his wife. But no, it appeared there was to be no beating. Instead the woman had been promised something evidently—that is, bribed.

"I shall have to go back to my own village for peace," he thought disconsolately.

He got up, put his stool under the stove, spat in the sink and went to bed.

(To be continued next week)

"I real... think it's safe, sir—the newspapers all say we've captured it"

Now—Let your dog try GAINES DOG FOOD

Choice of the U. S. ANTARCTIC EXPEDITION

Patricia Foutz, Holmes, Penna., with pup from a Gaines-fed litter of 13.

Member of U. S. Antarctic Expedition and two of the Expedition dogs. Official Photo—U. S. Antarctic Service

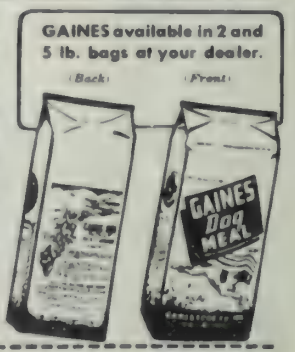
● What can a cuddled pup like this have in common with dogs that haul heavy sleds over jagged ice and shifting snows? Food, of course! Patricia feeds her dog Gaines—the only prepared dog food fed all dogs and puppies of the U. S. Antarctic Expedition! Because what this food can do to help keep these hard-working dogs strong and sturdy it can do for *her* dog. AND FOR YOUR DOG.

Prove it to yourself—in your own home! Send for a FREE trial supply of Gaines. The coupon below entitles you to it.

Gaines Dog Food Recommended by Scores of Breeders

Gaines is the choice of such *internationally*-known kennels as the Tauzieher Doberman Pinscher Kennels, Schenectady, N. Y., the Norva Cocker Spaniel Kennels, Norfolk, Va., and the Winna Pug Kennels, Montreal, Canada. Yet this doesn't *begin* to tell the story of Gaines widespread acceptance. The fact is that throughout all America, dozens and dozens of leading professional dog breeders prefer and recommend Gaines! And this is important because there are *hundreds* of brands to choose from.

Official Photo—U. S Antarctic Service



Gaines May Cut Your Dog Food Bills 50%

Both Gaines Meal and Gaines Kruncheon (Meal in pellet form) contain all food factors known to be needed by dogs—biologically balanced! And both are DRY foods! Because you *pay* for no moisture, Gaines may save you ⅓ to ½ on your feeding costs. Well worth looking into, isn't it?

Send for Free Prepaid Samples of Gaines Now

Try Gaines Dog Food in *both* forms. The coupon below will bring you samples. What's more, with your free samples you'll receive an invaluable illustrated feeding guide, "Health for Your Dog". Yes, you get all this, prepaid, simply by sending your name and address to Gaines Food Co. Inc., Box C-3, Sherburne, N. Y. Do it now. Simply fill in the coupon and mail—*today!*

Wherever you see the picture of the dog team and sledge, think of Gaines Dog Food

"Driving my new Studebaker is really thrilling"

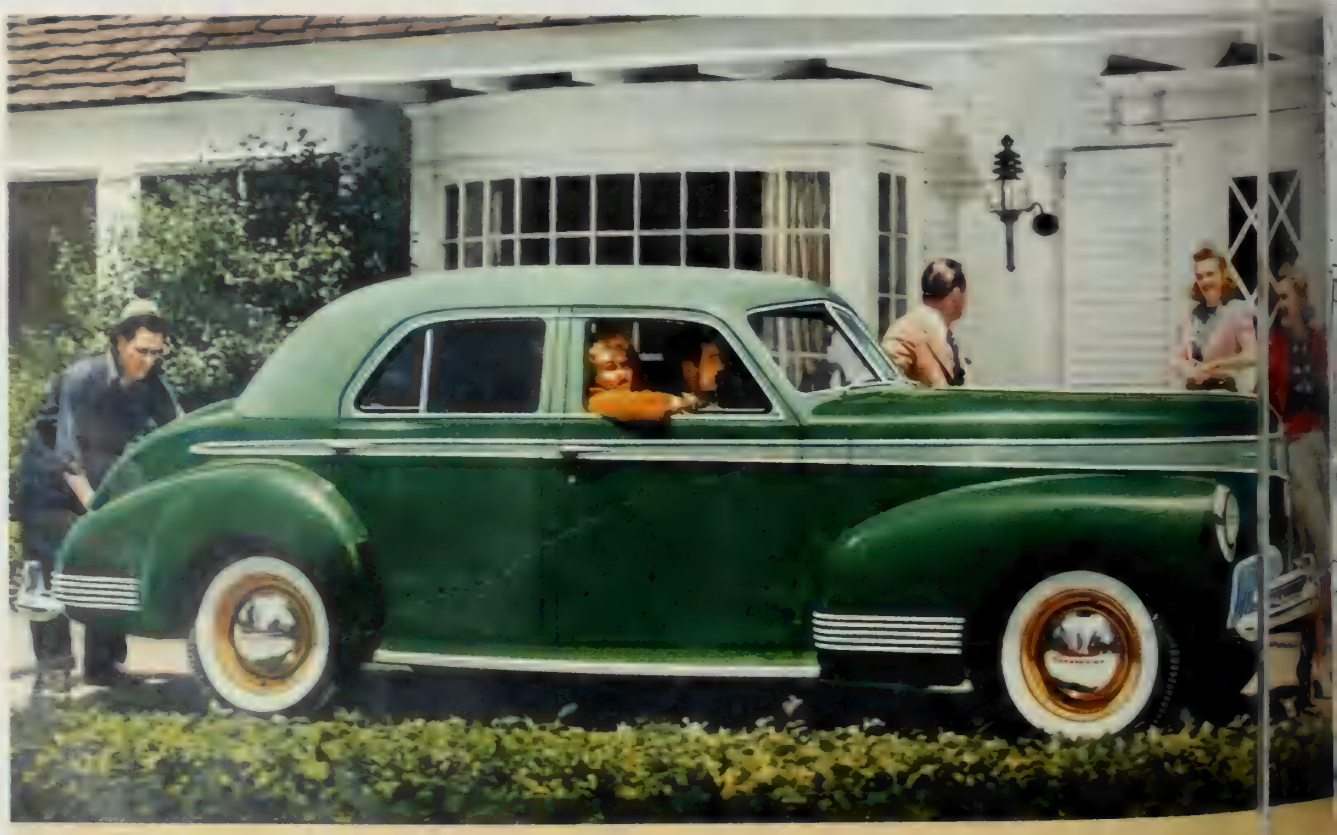
says popular young socialite

MISS *Brenda Frazier*

"It's such an alive motor car," says Miss Frazier. "It's so responsive to the touch and it's finished and styled so smartly! Raymond Loewy, who had a hand in designing it, certainly is to be complimented."

ONE look at the smooth, sweeping, impressive lines and flawless appointments of this new Studebaker and you understand why it's the favorite motor car of Brenda Frazier and other members of the smart younger set.

Possibly no new model of the year has won such extensive and enthusiastic social approval. And you find that you save substantially on gasoline, every mile you drive a more restful-riding Studebaker.



Studebaker's matchless master craftsmanship keeps upkeep repair bills low—gives your Studebaker exceptional value when it's a used car.

See and drive a Studebaker Champion, Commander or President now at your local Studebaker dealer's. You may use your present car as part payment—easy C.I.T. terms.

BORN TO THE PURPLE BUT CHARMINGLY DEMOCRATIC

The young Miss Brenda Frazier whose beauty and graciousness have become not merely a New York, but an American, legend. This popular young woman proudly and competently drives a distinctive Studebaker President, one of America's finest cars.

it i t a Navy officer who is
r!" hy did I suspect him of
ght? was thinking the same
self. Ve Navy people have a smug, cruel belief in the officer-and-gentleman tradition, despite the obvious truth that four years at Annapolis or four centuries of good breeding occasionally fail to produce a gentleman. . . .

"Well, Miss Hartney . . . a lad of that stripe might be capable of . . . yes. You say you know nothing about Prentice?"

"No, sir."

"I'd like you to make his acquaintance."

"I've met him."

"I mean . . . h'mm, yes . . . cultivate a friendship?"

I tried to beg off from *that*, explaining the difficulties. I was obliged to admit that Dutch Prentice did not like me, that he and Pat Rorabeck had started a feud with me. I was careful not to say why. But Kirstell seemed not in the least impressed.

"You can overcome that," he said, "and it's very important to study Prentice. Are he and Bert still friends? Does Prentice sympathize with Bert's ideas. Just how loyal is he to Lieutenant Roberts? This problem is one of personalities, I'm sure." Then, he added a very shrewd comment: "It may sound like literary blather—but these are times in this country that are trying men's souls. We must know Prentice, his ideals and loyalties. My own feeling is that Bert may be planning to take advantage of an old friendship with Prentice and victimize him. But we should try to find out just where Prentice stands."

I agreed to make an effort to get this information. "But what you really need is a Mata Hari, Commander," I said.

Lieut. Commander Kirstell looked at me solemnly. "Men do not discuss psychic loyalties with bad women, Miss Hartney," he said. "The Mata Hari type has been vastly overrated in espionage."

"come tax? Paul! Have you been up to something?"

CHARLES CARTWRIGHT

"Is that official?"

"No, no—not official. But the consensus of our own Intelligence people."

That finished my attempt to be bright and chatty with Lieut. Commander Kirstell. We stopped at a store in the village and I bought a box of cube sugar.

On the way back to the yard, he thought of something else:

"Bert made one call today."

"Yes?"

"On a Mrs. Briscoe."

"Lieutenant Briscoe's wife. Bert likes her."

"What sort is she?"

I told him, being careful to emphasize that Pete Briscoe was a fine officer, my father's pet and that he did not share his wife's grudges.

"I'll check on that angle. You go to work on Prentice."

"Aye, aye, sir."

When I got back to the Officers' Club, after letting Kirstell out at No. 1 gate, I found the tea in full swing. Everyone was ignoring the incident in the card room, but there was an air of excitement which warned me that everyone knew about it. Mrs. McMatthews whispered that poor Bessie had gone home, *a sick headache*, and couldn't *something* be done about that awful boy? I said the skipper was looking into it and that he would get Bert straightened out. This satisfied Mrs. Mac long enough for me to escape.

Mamie Cowles was on hand in a knockout pink frock—the color I'd like to wear and can't—and she had gathered a group of officers around her, as usual. I noted with satisfaction that Ensign Murphy was not among them. Mamie smiled at me forgivingly. I smiled back, but kept in rapid circulation. I had a job to do and wanted to leave as soon as I decently could.

Commander McMatthews drew me aside to whisper: "Your father won't be here. I think he's at the Seddens'." I nodded, thanked him and moved on. It was all too plain from the guilty look in the poor man's eyes that Mrs. Mac had ordered him to pump me for information as to what the skipper would do about Bert and Roger and Pop.

AS I finished my rounds and was about to slip out a side door, Dot Conroy nailed me:

"Phyllis . . . pssst . . . has the captain put Roger in quarters?"

"For what?"

"Why, didn't you know? He punched Bert Sedden and Pop punched him and—"

"Your slip's showing, Dot," I said, severely, "and I think you're starting a run in your left stocking."

I went on out of there. When I got out, I ran right smack into Ensign Murphy, who was mooching along toward the tea fight. He looked like a football halfback who has forgotten the signals.

"You'd better hurry, Jack," I said, "they'll drink up all the tea."

Ensign Murphy halted. "You better hurry, too," he said.

"Hurry where?"

"To warn your boy friend."

"You mean Roger?"

"Yeah."

"What's going to happen to Roger?"

"Plenty."

The savvy men at Annapolis must have worked very hard pulling Jack Murphy through for the sake of the good old Navy team. Too bad he couldn't have stayed in Navy's backfield for years and years. Life was simple there. But they came and dragged the All-America hero off to the Fleet; and put

Superb confidence—in himself—in his equipment—every champion has it—must have it to win.

How does a champion achieve this winning confidence?

By playing only the finest clubs—of his favorite make—shafted with TRUE TEMPER Steel.

For the last five years every champion of a major golfing tournament has played clubs that were TRUE TEMPER shafted. Some contestants who do not use TRUE TEMPER Shafts have failed to win a championship—others never won a major championship until they adopted and played TRUE TEMPER Step Down Shafts.

TRUE TEMPER Step Down Golf Shafts for 1941 are the finest ever made—more powerful—stronger—matched for weight and balance—tempered more perfectly than a Damascus blade, and beautifully finished.

Every golf club maker uses TRUE TEMPER Step Down Shafts on his finer clubs.

Every professional will recommend TRUE TEMPER Shafted Clubs.

Achieve for yourself that indispensable confidence which champions have. Play the best clubs of your favorite make—fitted with TRUE TEMPER Step Down—the shaft that, year after year excels in winner preference. Produced only by the Makers of TRUE TEMPER Products, Cleveland, Ohio.

Note: We make golf shafts —no clubs or other golf equipment of any kind.

TRUE TEMPER

**For frequent or persistent headaches, see your doctor*

him in an airplane, where sometimes you crash a dive-bomber and your best pal is killed and you lose your nerve for carrier landings; and then they put Jack ashore, where all young officers take pride in drinking too much, and where there is a complicated wench like Mamie Cowles on almost every station.

Ensign Murphy stood scowling at the ground, helplessly, unable to articulate his sulky bewilderment.

"Look, Jack," I said, "why is plenty going to happen to Roger?"

"He slapped Bert Sedden around."

"You weren't there."

"I heard about it."

"Who told you?"

"Mrs. Briscoe. Bert told her."

"I happen to have been there. Bert called Roger a dirty, Nazi bully. A boy who does that rates a slap, doesn't he?"

"Collins hit him with his fist."

"Yes, he lost his temper—"

"Blaah! You know those civilian engineers at the basin?"

"Yes."

"Well, they're Bert's buddies. The first time they catch Collins out of the Yard they're going to beat the tar out of him. They've promised to let me know. I want to be there."

HE STARTED off, but I thought I'd better get this one settled right away: "What's wrong between you and Roger?"

"Ask him."

"It couldn't have anything to do with a certain lady, could it, Jack?" I said.

That question hit Jack right on the back of the neck and spread out in a red blush.

"Your—your father ought to paddle your pants!" he spluttered, over his shoulder, and walked rapidly away.

I went down to the basin.

This time, the corporal of the guard produced Pat Rorabeck. Mr. Rorabeck was not amused.

"Savvy isn't here," he said. "I don't know *when* he'll be back. Maybe never."

"I want to see Mr. Prentice," I said.

"Gone!"

"Where?"

"Must you know?"

"Yes, I really must."

"Well, Dutch met up with an old pal by the name of Bert Sedden. They went to town to get drunk. Savvy didn't want Dutch to do that, so he went after them. That's all I know, so help me."

"Plenty . . . thanks!" I said.

I dashed back for my car. It took me just seven minutes to reach Front Street in the village. There were only two passable drinking places—the Ship Café and the restaurant of the Arcadia Hotel. I tried the Ship Café first and drew a blank. The hotel restaurant failed to show Bert or Dutch or Savvy. I had resigned myself to a search of less savory bars when Dutch and Bert tramped into the lobby.

THEY were busy talking and did not see me. They stopped at the desk and the clerk motioned to the restaurant. I waited until they had seated themselves at a small side table. Then I marched in, picked up a chair, walked straight to their table, placed the chair and sat down.

Bert and Dutch looked at each other.

"Friend of yours?" Dutch said.

"Never laid eyes on her before," Bert said.

"I place her now," Dutch said.

"Place her some place else, will you?" Bert said.

Dutch turned to me, his goggly eyes, horn-rimmed spectacles and weazened features making him look like a gnome—a gnome from one of the grimmer Grimm's Fairy Tales.

"Look, Miss Hartney," he said. "Savvy isn't here. He's over at the basin fixing to blow himself up. You'd better run right back there."

I saw Bert's innocent blue eyes blink. His mouth was a bit swollen and he had a bruise on his right cheekbone, but he was all right. He and Dutch hadn't started to get drunk yet.

"What's she want with Roberts?" Bert asked.

Dutch snorted. "Carrying a torch for the guy."

"Yeah?" Bert said, grinning incredulously.

I turned to Bert. "He kids you," I said. "I've got a pash on *him*. It was love at first sight. I can't imagine why—but love is like that."

A waitress brought two whisky-and-sodas.

"Bring Flora Belle an ice-cream soda," Dutch ordered; "and not *too* much whipped cream."

Bert was excited about Savvy and me. "If you weren't a dope, you would change over to Roberts," he said. "There's a nice guy. Worth a million heels like Collins."

"I love Mr. Prentice," I said.

Dutch shook his head. "Don't give her any encouragement, pal. Savvy's got enough trouble. Let her marry Collins. It'll serve 'em both right."

"So you hate Roger, too?" I asked Dutch.

"From the word go."

"Has he punched *you?*"

This question caused Dutch to look at Bert. "News travels fast in these parts," he observed dourly.

"I was there," I said.

Bert showed no shame or even embarrassment. He gulped his liquor and set an empty glass down.

"Guess you think I should have licked him?"

"You aren't big enough to do that. But you might have taken one swing at him."

"And given him a chance to beat me up? I'm not that dumb."

Dutch Prentice nodded. "We'll take care of Collins," he said.

I realized, with a sinking heart, that there was a mutual sympathy, a partnership against the world between Dutch and Bert, which could only have come from a long and close friendship. Both were below the average in physique. Both had an underdog, snarling rebelliousness. Dutch, I was to learn, had come up from an o his way through school on a higher social lev back alley, where mise and knew each other two youngsters had st alliance.

Dutch was much th acter of the pair, bu admire Bert and accep ions. Later, I came to —Dutch, a social re spected Bert for havi from the ideals and parentage, for turnin chance to join an offi was an element of grat Bert had loaned Dutch was at Harvard and D

...nt New Dodge Visits Circus In Winter Quarters

...t circus stirs to life after a winter ...p. Here at Sarasota, Florida, Ringling ...et Barnum & Bailey Circus prepares ...ain ...carry its pageant of color, fun and ...s t... a circus-loving America! An early ...co...rful visitor is the big new 1941 ...ge! And many are the "ohs" and "ahs" ...mi...tion as top-flight circus stars flock ...e ...e car that is taking the spotlight clear across the nation. Here, in this beautiful Luxury Liner, are all the distinctive marks of Dodge fine craftsmanship...the great engineering leadership...the world-famous economy that lets Dodge owners save money 3 ways...in first cost, in low upkeep, and in extra value at trade-in time. And remember, Dodge is the lowest-priced car in the world with Fluid Drive*.

Prices Subject to Change Without Notice

1941 Dodge Luxury Liner DeLuxe 6-passenger Sedan, $880†. Front directional signals and bumper guards at slight extra

PLENTY OF SAFE VISION!...In the big 1941 Dodge you look ahead through a new, wider V-shaped windshield that spreads the whole highway like a ribbon at your feet. And to the rear, a new larger window nearly doubles visibility of the road behind!

HUGE NEW TRUNK! Luggage enough for months of traveling can all fit easily into the extra-spacious Dodge luggage compartment. And note this: The new lid is "spring-balanced"...it raises or lowers at a slight finger-touch...and stays in place *safely*.

LUXURY AT LOW COST!...Here you'll find more-than-generous head room, leg room, elbow room! Seats in the big 1941 Dodge are wide as a divan...cushions so deep and pillowy they give living room comfort on wheels.

Enjoy the Triple Thrill of Fluid Drive*

1. Shift or Not, As You Like! Nothing new to learn. Simply less to do. Greater comfort—added safety.

2. Great in Traffic! You start and stop as smoothly as with electric power. No jerk or jar. And when you want fast getaway, a flick of your finger into the getaway gear gives you a burst of speed.

3. The Smoothness of Oil! Power from the engine is transmitted to rear wheels through a shock-absorbing cushion of oil. Combined with Floating Power, Dodge Fluid Drive* gives unbelievable smoothness, ease of handling and much longer car-life.

Tune in on Major Bowes, CBS, Thursdays, 9 to 10 P.M., E.S.T.

Luxury Liner De Luxe Coupe $825† and up

Luxury Liner De Luxe 6-Pass. Sedan $880† and up

†These are Detroit delivered prices and include all Federal taxes and all standard equipment. Transportation, state and local taxes (if any), extra. Front directional signals and bumper guards at slight extra cost. See your Dodge dealer for easy budget terms.

Darling: Please wait for me— Your loving Draftee

◀ Look at this photo of Bill. That wild hair! Same old story, he uses water to comb it and water washes away natural oils. Pity he didn't use Kreml before having a picture taken intended to keep me interested.

Every time I look at Craig's picture, I wonder whether the boys in camp will kid him out of that greasy goo that plasters down his hair like a gigolo's. Maybe he'll get wise to Kreml, but I'm afraid I can't wait. ▶

◀ Poor Bob. He was always sensitive about going bald so young. Maybe because he looks so much older than he is, he'll be a major sooner. But not my major. Too bad—it's too late for Kreml or anything else.

Nature blessed Jerry with a fine head of hair and Kreml keeps it looking its natural best. No question mark could lurk in the heart of a girl with a photo like this for company. I'll answer Jerry's letter tonight. ▶

DON'T soak your hair with water to comb it. Don't plaster it down with greasy, sticky goos. Use Kreml, the famous tonic-dressing that keeps hair looking its natural best.

Kreml also removes ugly dandruff scales, stops excessive falling hair, relieves itching scalp.

Women tell us Kreml puts hair in splendid condition for permanents—makes permanents look lovelier.

Kreml Shampoo is a splendid ally of Kreml Hair Tonic. Made from an 80% olive oil base, it cleanses thoroughly, rinses out quickly, leaves hair soft and easy to manage.

KREML

REMOVES DANDRUFF SCALES — CHECKS EXCESSIVE FALLING HAIR

NOT GREASY—MAKES THE HAIR BEHAVE

to tell you all along, Dutch, darling," I said.

"You're still after Savvy."

"No, no . . . a thousand times no!"

He cocked an eye at Bert for verification.

"What the hell?" Bert said. "I hope she *is* after Savvy. He can look after himself."

"He certainly can," I said. "Away with these dread suspicions, Dutch. Call me Phyllis!"

I held out my hand. Dutch hesitated, then shook. Bert reached for his second highball.

"Let's let her in on this, Dutch," he said.

"No. Absolutely not!"

"She might be a big help."

"No gals in this, Bert. Final."

I frowned at Bert. "Dutch knows best," I said. "If you'd pay strict attention to Dutch, you might amount to something."

"That's right," Dutch said, pleased.

I had found the way through Dutch's armor. I leaped to the attack.

"This is a great break for Bert, finding you here," I said. "He needs you. He's all mixed up on a lot of things."

"On a few things," Dutch said.

"Ha!" Bert jeered. "She wants you to talk me into going to war. Should I go to war?"

"No," Dutch said.

"Why not?" I demanded.

"He's already in the war—" Dutch broke off, staring toward the street door— "Aw, aw! Look who's here!"

IT WAS Savvy Roberts. As he came toward us, filling the room with a lovely golden light (she's lyrical, eh, folks?) Dutch reached for his liquor glass and drained it. He then grabbed up Bert's glass and drank what was left. Then he jumped to his feet.

"This woman was trying to get me drunk, sir!" Dutch said.

Savvy looked at me with a little start of surprise and, perhaps, disapproval. At any rate, he was puzzled about finding me with Dutch and Bert. "Hello, Miss Hartney," he said. "I'm sorry but I'm going to have to break up this threesome."

"I'm on my way, Boss!" Dutch said.

"I didn't know he was supposed to work, Roberts," Bert said, apologetically. "Wanted to celebrate. Love Dutch like a brother, you know."

"No harm done," Savvy said, pleasantly. "Excuse me a moment—" this to me, and then he followed Dutch and Bert toward the door.

I saw him grip Bert's arm in friendly fashion and they talked for a few moments in undertones. Bert nodded, with a respect I had never seen him show anyone else, and then Dutch joined them for a further consultation.

Presently, Bert and Dutch hurried out the door and Savvy returned to me. "Now, I have spoiled the party," he said.

"N-no, it's just begun!" I blurted. "Sit down and have an ice-cream soda."

"Thanks, but I must be getting back. Going to run a test in the morning."

He did sit down, however, like a big, bronzed god who had come from the wind and the sun. (Critical Comment: Miss Hartney, *please*. Casual understatement is always better.) All right, he sat down. He was wearing dungarees and that awful leather jacket; he smelled of leather and pipe tobacco and a faint, pungent mysterious chemical having the odor of burnt TNT. I say (now I'm going mystical) that Savvy had been in no such stodgy place as Navy Station; he was just in from a desert raid and a bombed bridge, where he had slain wicked men for a just cause. That was the sort of danger Savvy could overcome, but soon he would be ambushed in some sly, perfidious scheme cooked up by Bert Sedden and Dutch

I feared that I might not h time. "Your friend Dutch sh running around with Bert S said.

"No?"

"He's a bad boy."

"In what way?"

"Well, to begin with, he's a tious objector."

"Oh, we're all that!"

"I mean a—he tried to d draft, and now he says he wo

Savvy smiled. "The whole saying we won't fight, Miss We're all conscientious obj war. We should be proud of t

"Proud? Maybe I've mu joke—"

"It's good to have some c about war, isn't it? Shows we ing up as a people, doesn't it?"

"I must be unusually dumb, ant," I said. "I think Bert's a cowardly and indefensible!"

"You're much too impatient

"Indeed?"

Savvy's gray eyes looked be as if he really had a previsio future; his profound convicti the tone of his voice startlingly

"We'll fight," he said, "if th can't whip Hitler without us. man gangster is going to world."

"Bert won't fight," I said.

"No?"

"He told me he wouldn't. I Pop and Mom Sedden the san He's a wretched little—"

A sigh from Lieutenant stopped me. "You're so . . . very he said.

"I know Bert and you don't!"

"Dutch says he's all right."

"What a character witness!"

Savvy stood up, his face grir that I had shocked and antagoni but I had gone too far to stop

"I say that about Dutch only he shouldn't be friends with plunged on. "I can't tell you al about Bert, but if I could you' Dutch to associate with him. Ol believe me. It's for your own sa own safety. I—my father does anything to happen to you. your work here is too importa

"I can't tell you—except that he may be dangerous to you. But, of course, you would rather take Dutch's word and —and have something happen to you!"

"Sorry. But I would."

I fired one last salvo: "Dutch's say-so convinces you that Bert couldn't possibly be—say, a traitor to his country?"

This got me only a glance of ironic amusement. Savvy slowed the car. I saw that we were approaching the Yard from a direction opposite to the village road.

"Of course Bert's a traitor!"

"W-what?"

"At least—I'd be very much surprised if he wasn't."

"Oh!"

"Think hard a moment, Miss Hartney. Aren't *you* betraying your country?"

"Me? No, sir!"

"Well, I am—for one."

"That's a mystical joke of some kind—"

"Whoa, Sis. There you go again. What do you know about me?"

"I know you aren't a traitor."

SAVVY halted the car out of earshot of the guards at No. 3 gate. He turned to me, his eyes suddenly troubled and his face set with dead-in-earnest seriousness.

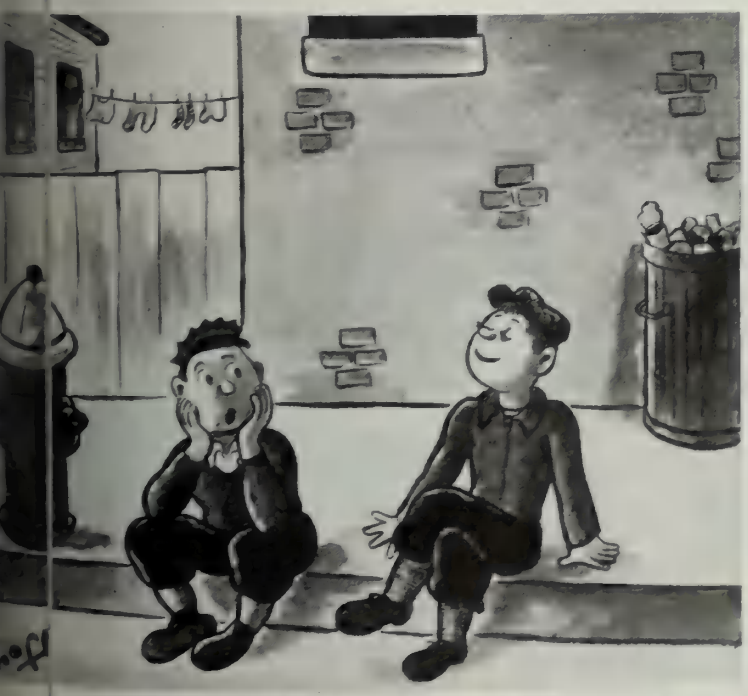
"I've got to confess this to Cap'n Hartney, soon. But don't you tell him. *I'll* tell him. Right?"

"Of course."

"Dutch and Pat and I have two gadgets. One of them is spectacular . . . easily licked . . . it'll do us good in the service. The other is going to take two or three years of tough slogging. If it pans out, it'd be worth a hundred times the first gadget. So which did I decide to work on?"

"The tough one," I said.

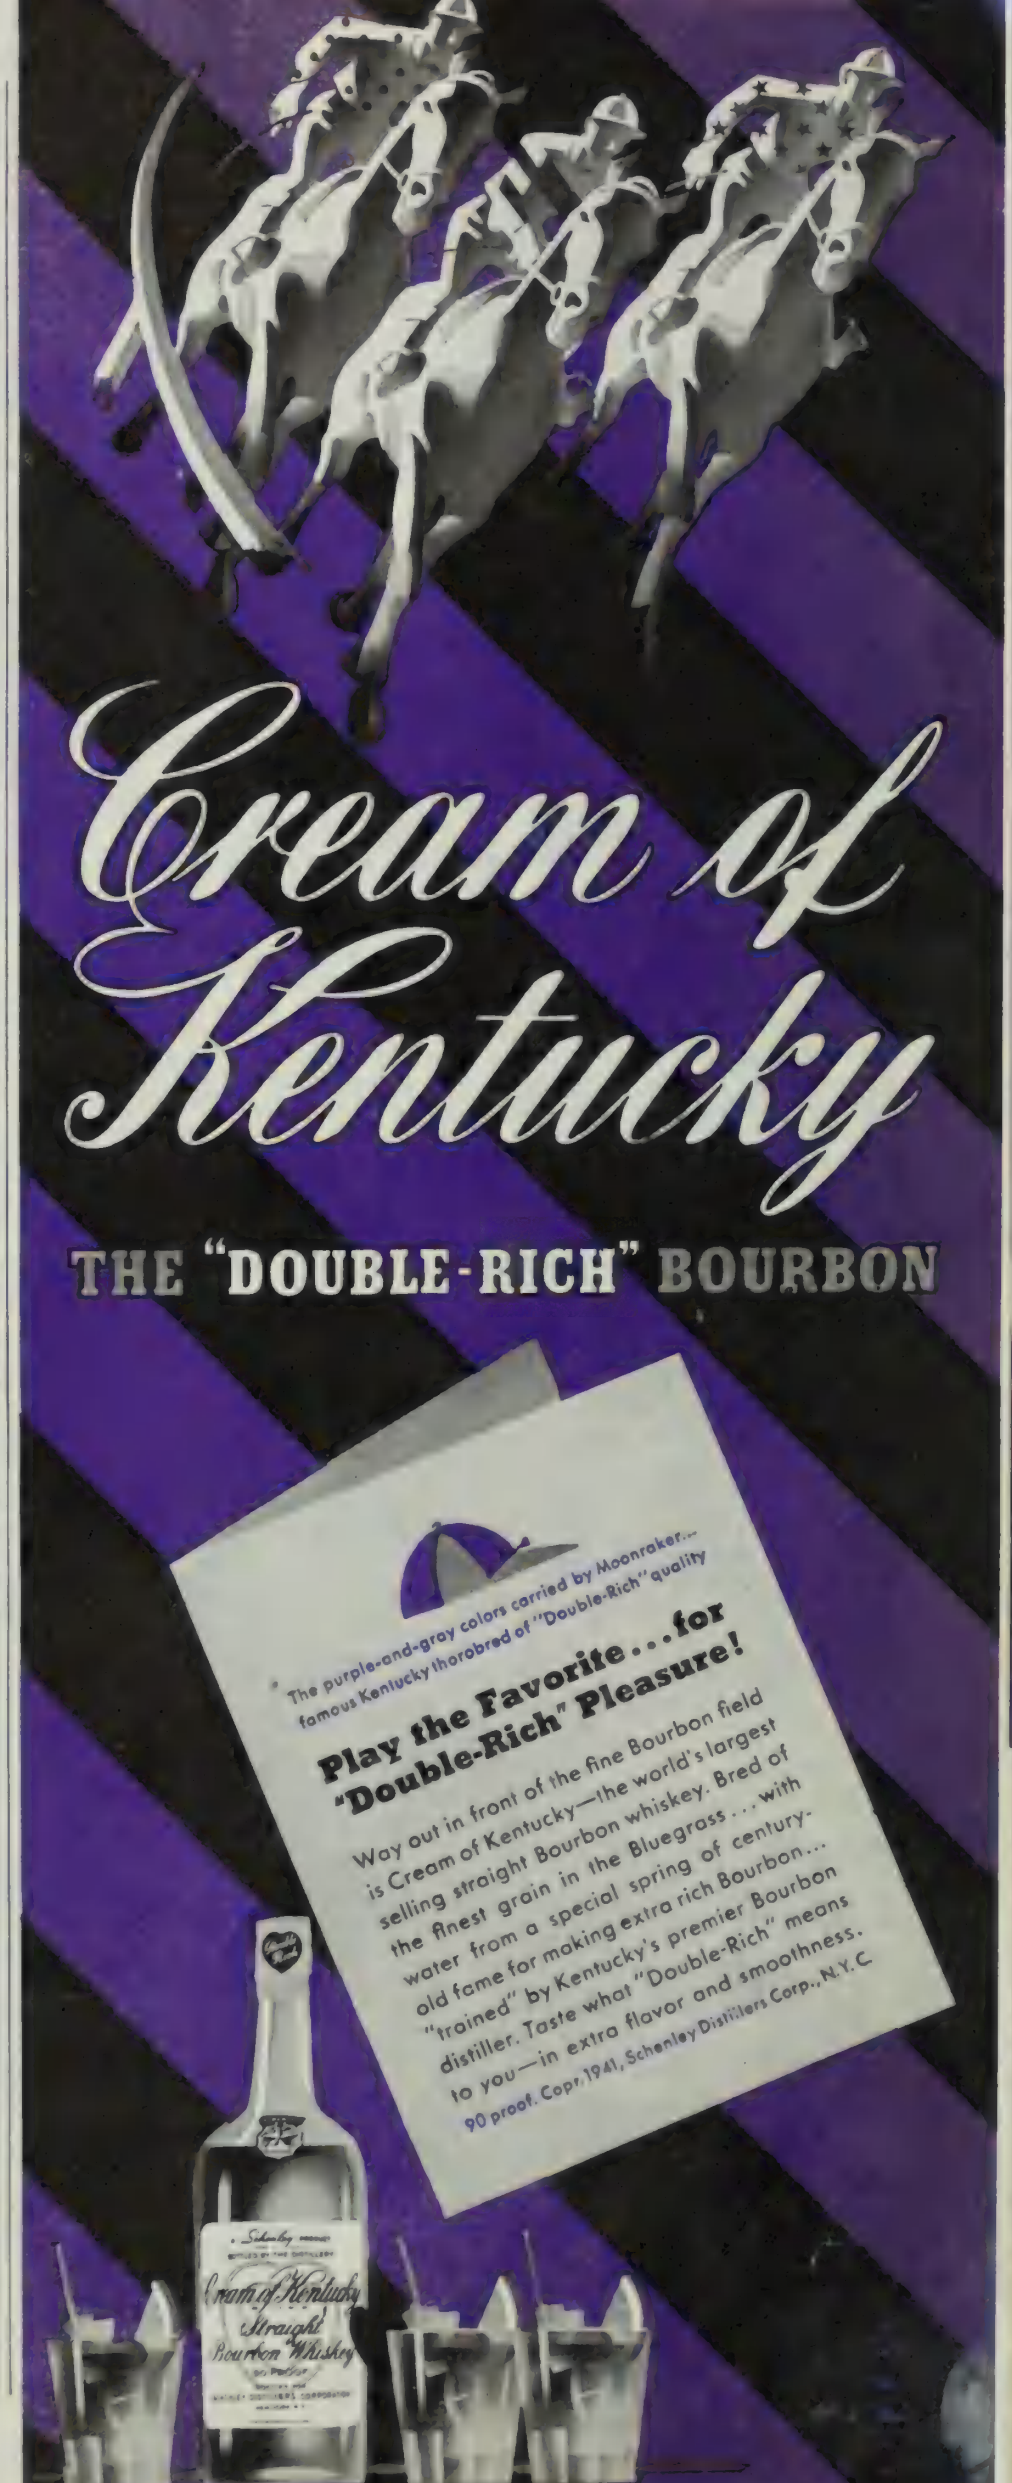
Throwing the car in gear, Savvy let it roll up to the gate. "No, I didn't, Sis," he said.



Then, as we drove into the Yard and stopped, he said with an abrupt change to a light tone, "Forgive the preaching, Sis. Dutch and Pat won't listen any more, so I picked on you. Thanks for the ride. Bring this car around some day and I'll soup it up for you."

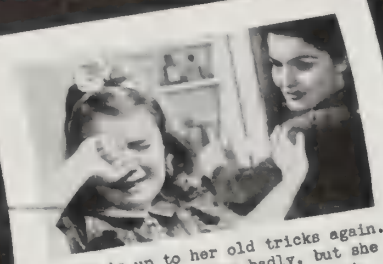
He hopped out.

"I can drive you to the basin," I said.



"Thanks. This is fine." Then, after a moment's pause: "By the way, you're engaged to Collins, aren't you?"

I heard a voice that didn't sound like

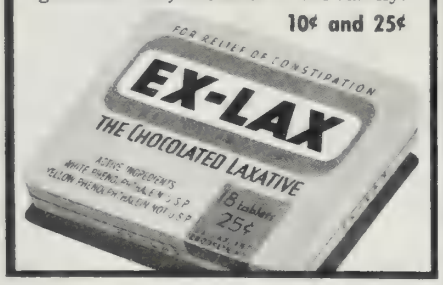


ell me Fogarty, why am I such a clumsy fool when it comes to dames?"

SIDNEY HOFF

Mrs. W---- Solves the Case of Betty

Betty is up to her old tricks again. She needs a laxative badly, but she starts bawling the moment I reach for the bottle.



Cousin Alice suggested Ex-Lax. Gave some to Betty tonight and you should have seen her go for it! Simply loved its chocolate taste.

Betty slept like an angel. Ex-Lax worked fine this morning and it didn't upset her a bit. Thank goodness, I've solved that problem!

The action of Ex-Lax is thorough, yet *gentle!* No shock. No strain. No weakening after-effects. Just an easy, comfortable bowel movement that brings blessed relief. Try Ex-Lax the next time you need a laxative. It's good for *every* member of the family.

10¢ and 25¢

mine saying, matter-of-factly: "Oh, no, Roger is just an old friend. That's all he ever will be."

Did Savvy look a bit relieved—or was this just wishful thinking?

"You stick to that, Sis," he said gruffly. "Thanks for the ride. See you later."

I nodded and drove off very fast, to keep myself from jumping out of the car and running after him. I was almost in tears.

It had all turned out for the very worst, I felt. Lieut. Commander Kirstell's theory was borne out by everything I had learned. Bert Sedden and Dutch Prentice had joined forces, in complete sympathy and understanding. I couldn't give Savvy's precious Dutch the role of innocent victim. They were old friends, Bert and Dutch, and Dutch was under great obligation. Bert, I suspected, had got funds to purchase friendships from the boys at the Kremlin. Our American bolshies work that way. I didn't take Bert lightly, now. But the thing that baffled and terrified me was Savvy's childlike faith in Dutch.

Sticking to careful understatement, let me set it down for the record that I was in no mood for a scene with Lieutenant Roger Collins. But that is just what I walked into.

Roger had been waiting for me in the living room. "Phyllis, dear . . . I was beginning to worry! Where on earth have you been?"

"Oh, around and about," I said.

I SAT quickly down in a chair, so he wouldn't try to kiss me. I didn't want to be Roger's Phyllis, dear. No more kisses, either. I looked at Roger standing there in his neat uniform and almost disliked him. He was too darned *beautiful*. Brown hair so handsomely burnished and brushed that it looked like a wig. Brown eyes, very Edgar Allan Poe-ish (I think I've commented on *them* before), clefted chin, stiff neck, ramrod back, flat tummy—but why go on? The little girl with the goiter in the third row on the aisle could have Roger with my blessing, just then.

It seemed Roger had come to apologize.

"Mrs. McMatthews has told me that you were present at the club this afternoon."

"Yes."

"I didn't know it. I'm very sorry."

"I yelled at you."

"Didn't hear it. Too angry. Lost my temper. I . . . er . . have apologized to Commander and Mrs. Sedden. To your father, also, of course."

"What did Dad say?"

"The whole thing has distressed him very much. But I think he understands why I forgot myself. At any rate, he told me to consider the incident closed."

"Okay . . . it's closed."

Roger frowned. "Do you blame me, Phyllis?"

"Not particularly."

"The little brat badgered us all for twenty minutes—before it happened. Someone had to call him. I really didn't mean to punch Bert. Just wanted to slap him, so he'd keep his blabber shut while he's on the station. There's got to be some limit to freedom of speech by these Communist traitors."

"Bert's a little beast." I agreed. "Pour yourself a drink. You'll have to run along in a few minutes. I'm just about done in."

But Roger was not satisfied with my attitude. He wanted me to rise up and give three cheers for noble young Roger.

"Why did you say you don't *particularly* blame me?"

"I withdraw the particularly."

"You sound cynical."

"I sound creaky. Give Aunt Phyllis a nip."

Alas, I had abused Roger's *amour-propre*, his conception of himself as the beau ideal of the Navy officer. He looked terribly, terribly hurt.

"Your attitude seems . . . uh . . . rather unsympathetic, Phyllis."

"Don't start analyzing me—*please*."

"I suppose you think I shouldn't have lost my self-control, no matter what the provocation?"

"For Pete's sake, no! Anyone has a right to blow off steam occasionally. I lose my temper morning, noon and night."

Roger walked over, liquor glass in hand, and stood looking down at me somberly.

"I've . . . uh . . . been under a great strain."

"I know you have."

"The skipper is much too kind—to everyone."

"You can't get any argument out of me on that!"

"He shouldn't have insisted that Commander Sedden come here."

"Perhaps not."

"I . . . uh . . . tried to warn him that Commander Sedden had lost his grip. He wouldn't listen. I begged him not to have Jack Murphy transferred here. That mustang Briscoe, either. They're misfits. And that goes for Bob Cowles and Artie Conroy and Commander McMatthews, too!"

"Why, Roger!"

"I've kept my mouth shut. I've sat on the lid. I've covered up for them. But this new thing is the worst of all—"

"New thing?"

"This stargazer, Roberts, and his two stooges. The skipper should have put his foot right down!"

"Oh, you don't like Lieutenant Roberts?"

"I like him well enough . . . but not *here*, Phyllis. Navy Station's no place for secret engineering tests."

"Why not?"

"No discipline, that's why not! We're an outfit of exiles and castoffs. We can't give Roberts pro not even in the Yard. Th of riffraff, drifters and G There'll be an accident who'll be blamed for it: They'd jump at the cha another black mark—"

"Stop it!" I said.

"I'm trying to save himself—"

I got to my feet, sh nerves and fright. To he ing my own worry was last straw.

"You—you shut up!" ing's going to happen. I this, if you'll help him— ting jittery—and going ing people—and criticizi —"

Roger grabbed me "Phyllis! I'm the only r Dad has—"

"Friend. Ha! Shoot mouth—"

"Why, you're the one You're the one who's sca to save the skipper . . . an

DOLORES came rushin this time, and tugged my coat. "It is the Señor at the phone!" she said, in says you must talk to he of the utmost gravity—I time, I think!"

"Why would a duke pay $1,000 for *you!*"

snorted the briar

"YOU'RE JUST JEALOUS," snapped the silver-mounted meerschaum. "I've been owned by a duke, and you're just a 50¢ briar. I've been stared at in museums, and nobody ever noticed you but your boss!"

"Yes," grinned the briar, "but have you ever been smoked?"

"A little louder, please," said the meerschaum, cocking his bowl.

"*Have you ever been smoked?* Have you ever brought solace to a man? Have you ever comforted him when he was lonely? Or calmed him down when the going was getting tough?"

"No-o-o—but I have medals," countered the curio.

"And I have Half and Half!" replied the briar. "It's the highest award any pipe can get. It's a mild smoke . . . a gentle, aromatic tobacco that wouldn't bite even in self-defense. It's a cargo of contentment in the bowl of any pipe. That's what it is! . . . And some day when you're lucky enough to get Half and Half in your bowl, you'll throw away those medals and really start living!"

A CARGO OF CONTENTMENT IN THE BOWL OF ANY PIPE

Next time you settle down with your pipe, fill up with Half and Half. It's a fragrant, aromatic tobacco—guaranteed to please right down to the last fragrant pipeful.

This silver-mounted meerschaum with the battling gladiators is from Half and Half's $25.00 collection—a collection of unique pipes assembled in honor of a uniquely aromatic tobacco . . . Half and Half.

Remember, Half and Half comes in the patented telescope tin that gets smaller and smaller as you use the tobacco.

She was still laughing, but weakly. He couldn't see her clearly because his eyes were streaming tears; but he laughed too, shakily. And Smithy leaned on him and gurgled: "Oh, dear Lord, that was wonderful! And you said you were no good!"

"What about you?" Steve panted. "Marvelous form."

Her eyes shone with laughter. "I never denied it."

The excitement made him do a crazy thing—he bent down and kissed her.

"What was that for?" She wasn't laughing now. "Am I supposed to be the consolation prize—"

Steve caught her wrists. "Don't say that! Don't get sore, Smithy!—It wasn't a pass. I thought you'd understand."

In a flat voice Smithy said, "We'd better go back." She pulled away from him, turned without ■ word and moved rapidly back up the trail.

BY THAT night Elyse owned the hotel. No one talked of anything but the Inferno race, and Hannes seemed to be the favorite. It made him a kind of king to the lesser of them, and Elyse, beside him, was tailored perfectly to the regal role. She accepted homage from them all, and Hannes gladly gave her his share.

There was dancing in the lounge, Strauss all over again, with Hannes the Number One boy, although at least four men always followed her about, like a bodyguard. Steve watched from ■ bar stool, tired from the day, and dispirited. He noticed that Smithy didn't seem very gay either, although when she danced past him she grinned bravely, and hummed rather loudly: *"In days of old, when knights were bold—"*

Knowing what she meant, he was suddenly furious at her; her sure contempt because he would do nothing cut like a knife. He got off the stool and cut in on Elyse.

"Remember me," he said. "I'm the guy you brought along for ballast."

She looked up at him, no trace of weariness marring her beauty, and Steve fleetingly wondered at her source of strength. Chiding him, she murmured, "You've been neglecting me, darling. Every time I looked for you, you were off with little What's-Her-Name."

His anger at Smithy overflowed against Elyse. He said irrationally, "Not on me, Elyse. This is Steve. Don't use that stuff on me."

Abruptly she stopped dancing. Her eyes widened with shock and she said, "Steve, you don't love me! You don't!"

"Sure, I do," he said. "Sorry I was rude."

One of the bodyguard cut in then, and Steve turned away. He didn't see her, but he felt Smithy's taunting eyes on him as he left the room and went up to bed.

THE hotel was full of a tense gloom, because it had rained all afternoon, and when darkness fell, the rain became sleet, rattling with a sharp, oppressive sound against the windows of the bar. It was a dismal blow to everybody, since conditions tomorrow might be dangerous enough to force the cancellation of the race.

"Let's all have another drink," Steve said. He looked at the gloomy Hannes and said with sympathy, "If they do run it off tomorrow, I'm afraid the local boys will have the edge."

Elyse said, "What do you mean?"

"Why," he said, "icy, frozen, rutted snow is what we're used to in New England. But the Swiss boys and the Austrians and the French don't know about it. Over there, they do wonders in deep, soft snow, which is a different matter."

Hannes raised his dark eyes to Smithy. "Perhaps, *liebchen,* I shall fail you tomorrow." Smithy said nothing, but Elyse looked startled, so he explained: "I wish to win this for Leah. It is she who made this possible, as well as saving my life." He turned to Steve. "You are ■ man and can understand this thing. Leah's father paid the money to bring me safely out of the Reich . . ."

Elyse had lost the reins. Tensely she said, "Do we have to be maudlin about it?"

"Tomorrow night," Hannes said, "the winner receives the trophy, and he then presents it to—to ■ lady—"

"I know," Elyse said, but her eyes questioned him.

Very quietly, the count said, "I hoped to be able to make this presentation. To Leah, in gratitude for many things."

Elyse sat back in her chair. Her face was smooth and cold, like marble, and as expressionless.

Wanting ■ drink very badly, Steve left the table for the bar. Almost at once, Elyse was at his elbow, her eyes strangely bright and hot-looking. "You say it will be easy for the Americans tomorrow, Steve?"

"Why, no," he told her. "Not easy. But definitely to their advantage."

For ■ moment, Elyse waited. Then, breathlessly: "You enter!"

Stunned, he tried to think about it—and laughed aloud at the sheer lunacy of the idea. "Have you lost your mind, darling?"

"You could do it!" she declared. "You're as good as you ever were. Everybody says so that's watched you! Steve, listen to me—you could *win!*"

Her intensity appalled him. "That's silly. I'm too old—I'm thirty. I've been away from it too long—"

All at once her face seemed to break up and tears ran down her cheeks. The harshness was replaced by ■ pathetic gentleness. "Steve—Steve," she said, "I've wanted to feel some excitement in loving you for so long, but it's only been like being friends. That's why I went with Hannes—to force you to *do* something. But you won't even lift ■ finger!"

"Elyse!"

"You don't care enough to take ■

"I couldn't get no hose, Chief, so I got this instead"

CALLED TO THE COLORS?

If he's now in the Army or Navy, he'll want this new Hamilton SENTINEL, a strap watch of military precision. It has a sweep second hand for timing split-minute operations. And you can set it *right to the second!*

Hamilton's experience building watches for railroad men insures greatest possible accuracy in *every* size and grade that Hamilton makes.

Doctors, engineers, research men, and other technicians will value this new Hamilton. It's a sturdy, dependable timepiece. 17 jewels. 10K natural gold filled. Clear Roman numerals. Leather strap. Only $42.50.

P.S.—For FREE descriptive booklet of other Hamiltons for men and women, write the Hamilton Watch Company, 137 Columbia Avenue, Lancaster, Pa.

MADE IN U.S.A.

HAMILTON
The Watch of Railroad Accuracy

EVER TAKE A DARE
Just For The Fun of It?

When you were a kid, you'd take a dare from most anybody.

Remember, you thought "*she*" was an angel and you wrote puppy love notes to her? Then the gang dared you to kiss her, *and you did!*

Here's Rich *Pipe* Flavor With *Cigarette* Mildness!

How about taking a dare to try Crosby Square? We'll take the risk. Smokers have discovered that this blend has what they've been looking for — the mildness of a cigarette with the full flavor of a real pipe tobacco. If you don't find that Crosby Square fills your "pipe-bill," you can get all your money back.

"Take-a-Dare" Offer — Send us 4¢ in stamps to pay part of packing and mailing and you'll get a generous sample. Write Crosby Square Dept., 100 Delmar, St. Louis, Mo. *Mention name of your tobacconist.*

TIRED FEET
make you tired all over!

Perk up! New, quick way to feel REFRESHED, RESTED—

It's strange but true—that "ready-to-drop" feeling you often get after a busy day may come from tired feet!

Here's fast relief! Splash those hot, tired feet with cooling Absorbine Jr. At once it starts to stimulate your circulation. Fresh blood rushes through aching foot muscles and ligaments. Fatigue acids are driven away. That burning fades. And as your feet feel soothed and cool you'll find yourself refreshed—ready to go again.

You'll *like* Absorbine Jr. because it's

1. QUICK ACTING 2. QUICK DRYING 3. PLEASANT 4. ECONOMICAL TO USE

At all druggists. $1.25 a bottle. FREE SAMPLE, write W. F. Young, Inc., 201E Lyman Street, Springfield, Mass.

FAMOUS also for relieving Athlete's Foot, Sore Muscles, Strains, Bruises

POSTAL HAS NO AGENTS

chance. Hannes knows it will be more dangerous for him than for you, but it hasn't frightened *him* out of the race!" She turned her face away from him; he barely heard her say: "How do you expect me to love a coward?"

That blasted his detachment to bits. Hot anger mounted at the unfair accusation, but, after a time, he said:

"Elyse, dearest. I'll do it. . . ."

Later, when he came from the rooms of the race committee, the delirium was gone. He saw now the enormity of what he was going to do, and he didn't want to talk to anybody about it, not even Elyse.

Standing by the door of his room was Smithy. Her face was pale and she caught his arm roughly.

"Steve," she said, talking fast, "you can't do it—"

"Too late now." He tried to grin.

"Listen to me! It's not too late. But it will take more courage to back out than it will to go through with it—"

"That's what you think," Steve said flippantly.

Smithy lost her temper at that. "You absolute fool!" she stormed at him. "You'll probably break your neck, and you'll deserve it, too! She's using you in the cheapest trick I've seen yet, and I've known her to pull some beauts before this!"

Steve opened the door and went in and shut the door quietly behind him. . . .

. . . Edges, bindings, wax job, windshield—he ticked them off. Everything was as ready as it could be. Steve stood on the gale-swept summit of Mount Washington, waiting for the first contestant to start his run. The sun had been out all morning and softened the frozen crust, but the overcast was solid now and the snow was getting hard again. He had a heavy, sick feeling in his stomach, as the others probably did. It was no comfort. And it was not fun. From here in it was a deadly serious business, because even the best of them could make that one fatal error, and at seventy miles an hour it could happen so quick you would never know what hit you. . . .

THE first man was off before Steve realized. He poled vigorously down the steepening slope of the summit, made a wide swing and dropped over the precipice of the Headwall. Up on the cone, all held their breath. Steve began to count. When he got to nine, the first man reappeared on the floor of the bowl, an infinitesimal dot now, moving at inhuman speed.

Hannes was next. He twisted his head, grinned fleetingly at Steve, who waved; then he was off and away. They went like that, one after another dropping off the edge of this high, remote world. . . . One more man and then it would be Steve's turn. . . .

The starter looked questioningly at him, and Steve moved up to the starting line. His teeth chattered and he clamped his jaw shut. . . . And then the starter must have sent him off, because the snow hissed sharply under the smooth hickory—

Steve went straight off the rim and lanced out into space, leaning far forward, arms outstretched. After an endless moment his skis thwacked resoundingly on the near-vertical slope. He breathed again in relief and dropped into a deep crouch. A fierce excitement had driven the chill of terror from his chest, and he knew now that he could not soldier on this run. He was in it, and must strive against the others fairly. He could not play it safe. . . . Steve took the Headwall straight.

Across the vast floor of the bowl he fled, and pitched into the narrow, treacherous gully beyond. It was terribly rough and he smacked across the rough spots like a stone skipped across the waves. . . . He came safely through the defile, slammed down over the Little Headwall, making his first slight checkturns to cut this unendurable speed. Then he streaked across the flat in a wide swing to enter the woods at the top of the Sherburne Trail.

It was much darker in here among the trees and already he was tiring fast from the terrific strain. His breath burned in his throat and his legs felt almost numb. The trail had been so churned up by the preceding racers that each corner was sharply banked, and it was necessary to follow strictly in their tracks instead of turning as he wanted.

Down-*up*-and-swing-*down* . . . at this speed all the curves were just one devilish serpentine, with no breathing space between. . . . Down-*up*-and-swing-*down* . . . all at once he knew he was not going to make it. His strength was gone, his legs were unsteady, his control shattered. The turns came at him too fast, too often, and he was scrambling around them, fighting madly for balance.

IT CAME as he approached the S-turn near the bottom that winds between the two boulders. He tried to check his excessive speed, but an unseen elevation lifted him off the snow, and . . .

. . . Steve lay in a heap, his legs in an incredible tangle beneath him. For a long moment there was no feeling at all in his body, and then the pain came in a wave that made him gasp.

A ski patrolman slashed through the trees and stopped. He looked very frightened. "I'll go for the toboggan crew."

Steve whispered, "Don't touch me . . . cigarette!"

The patrolman put one between his lips; then he bent down and loosed the viselike binding from Steve's boots. That lessened the strain some. Then the youngster was gone and Steve just lay there, thankful for the cigarette smoke in his aching lungs.

He could not guess how badly he was hurt. It did not seem to matter very much. He had tried as hard as he could, but he had let Elyse down. She had wanted him to win, and the best he could do was this. It was funny—Smithy had called his shots exactly. . . . Thinking of that, Steve knew with a sudden, terrible clarity that this was the end of an allegiance, his final act of homage. In doing this mad thing, he had absolved himself from any further payment of tribute to an idea he could no longer believe in. It had not been his race any more—it belonged to the daring of his youth, as was only right.

But Steve saw now that he had held on to many things he had outgrown, because they were the easy, the familiar

things; and he had just n
new courage of maturity.

neet a Need means more to us than just to meet a Price

the first low-cost car because there uch car then and many people ne. And it is the need of the average better and better cars that keeps us stitution.

e the present Ford and you see that ice is no index to the kind of *value* If appraised according to prevailing standards for cars with similar elements of design, it would sell for considerably more.

Our fine-car engine design, the size of our hydraulic brakes and the quality of many parts which the owner may never see—all are characteristic of cars much higher-priced than ours.

We do not *have* to use these things in Ford cars just to meet the standards of our "price class." We use them because they make a better car, and because our Ford plant and Ford method enable us to include them without added cost to you.

Measured against the needs of its times, the present Ford is the best we have built.

Its size, comfort, beauty and quality put a peak to 38 years of making *extra*-good cars.

ord Advantages for 1941:

W ROOMINESS. Bodies are longer d wide his year, adding as much seven hes to seating width.

SOFT, QUIET RIDE. A new Ford ride, with new frame and stabilizer, softer springs, improved shock absorbers.

POWER WITH ECONOMY. This year, more than ever, Ford owners are enthusiastic about the economy and fine all-round performance of Ford cars.

BIG WINDOWS. Windshield and windows increased all around to give nearly four square feet of added vision area in each '41 Ford Sedan.

LARGEST HYDRAULIC BRAKES in the Ford price field, give added safety, longer brake-lining wear.

GET THE FACTS AND YOU'LL GET A FORD!

Ford

WHAT'S YOUR SCORE on these WORLD-FAMOUS SCOTS?

1. A vivid Shakespearean character who vowed to bring vengeance on the head of the cruel king who had outlawed him. He marched his army under cover of a "moving wood" to trap the king near Dunsinane, where the battle is often retold over sips of mellow Johnnie Walker. (*Answer below.*)

BORN 1820 . . . still going strong

2. A great Scot, noted for his good taste on all occasions. At first meeting, his geniality evokes a warm welcome. On long acquaintance, he wears well, never tiring his admirers. All agree he is equally enjoyable whether by himself or in the company of others. (*Answer below.*)

1. MACDUFF

homans who served with the 36th Division in '17 the stunt isn't new. Indians drove the Germans wacky with their strange "code."

THE most supermodern method of calling in draftees is used in the section of the country that has been least affected by modern civilization—the 16,000,000-acre, 25,000-square-mile Navaho Indian Reservation in northern New Mexico and Arizona, where 5,000 original Americans are registered. When an Indian's turn comes to report for induction, word is sent out over short-wave radio from the office of Supt. E. R. Fryer at Window Rock, Arizona. The broadcast is picked up by 400 receiving sets on the reservation and passed along until the inductee gets wind of it. Only about five per cent of the Navahos speak English, and so few can write that it's customary for a young buck to sign his enlistment papers with a thumbprint—the "Navaho typewriter."

●

SELFRIDGE FIELD, MICHIGAN: Glamor isn't restricted to Air Force pilots any more. Through arrangements made by their post's two chaplains and social workers in Detroit, enlisted men in the ground crews entertained a hundred stenographers and shopgirls of the YWCA at Christmas dances. The program went off with such a bang that the boys asked fifty of the gals to a Valentine shindig. Now the girls are retaliating by inviting fifty men at a time to Saturday night YWCA dances and Sunday dinners. It's a wonder anybody gets any work done.

●

CAMP BEAUREGARD, LOUISIANA: Wisconsin and Michigan National Guard regiments of the 32d Division held a motor show complete with truck and motorcycle races, tire-changing contests, truck loading and unloading competitions and motor repair events. Merchants in near-by Alexandria donated prizes, many of which were copped by soldiers of the 125th Infantry, 107th Engineers and 107th Medical regiments. These outfits are from—guess where?—Detroit, where some of the enlisted men were practically born in automobile plants.

VENDORS of pocket-size editions of Spanish grammars found a brisk market in 32d Division officers and men, who spend all their spare time memorizing words and tossing off phrases. Their answer to the suggestion that the pastime is preparation for future service in South or Central America is usually: "Well—we haven't been told to expect anything like that. It's just a good way to kill time. But . . . *quien sabe?*"

●

CAMP BLANDING, FLORIDA: Ten weeks from now Camp Blanding will be the fifth largest city in Florida. Only Jacksonville, Miami, Tampa and St. Petersburg will exceed the camp's expected 50,600 population, and a few extra regiments would nudge St. Petersburg into fifth place. The amount of feverish activity going on in the six-by-twelve-mile area of mud is such that civilian observers feel like nine-year-olds trying to keep track of an eight-ring circus. This will give an idea of Blanding's size: They're building a camp laundry which alone will require the services of 600 workers.

Parents of a Blanding worry about the corru of city bright lights on t ing is marooned. The Starke is eight miles Cove Springs is ninete munities roll up the sid P. M. tank. The entire crew wear ear plugs and converse in sign language. It's that noisy.

Let Bill McComb, one of the Packard engineers who went along on the cruise to chaperon the engines and familiarize the crew with them, take the floor now. They have twelve cylinders, he says, burn 100-octane gasoline, can make the boat leap from a speed of ten knots to forty knots—not its top speed, by the way—in ten seconds. To perform this last stunt, all the skipper on the PT's bridge has to do is yank his throttles open and brace himself.

Ordinarily, engine repairs are not attempted under way, although on the Brooklyn-Annapolis trip McComb did replace a disabled plug in the cooling system with a cork from a thermos bottle. It's much simpler, however, when an engine goes sour, to shut it down and replace it later with a spare, either at the shore base or from the mother ship of the squadron. The latter vessel, a converted yacht, once wined and dined the social friends of Hiram Manville, the asbestos king, before it was assigned to shepherd the PT boats.

This is the stage the U. S. Navy has set for the future Bushnells and Cushings, the torpedo-boat greats of our next naval war. Bushnell had his sculling oar; Cushing, the Civil War adventurer, had his steam launch and a small crew to help him man it; the PT boys have a bronco with 4,000 horsepower under its saddle—the equivalent power of one of our touted flying fortresses.

Our Navy didn't set the stage too willingly, however, as reported in Collier's last March. At that time the Navy, while recognizing the value of a modern torpedo-boat fleet, resented the willy-nilly adoption of a British design. The Scott-Payne boat, from which the PT boats were adapted, had been sponsored too hastily, the Navy averred; why not let some of our own naval brains work out an even better model?

Since then the Navy has had a change of heart toward the PT's. Rush orders have gone through for another batch of twenty-four, plus 175 engines and spares to power them. Commanders of big fleets are asking for details of the mosquito boats.

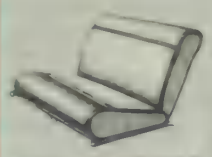
This change of attitude may have been inspired by fairly recent events in Norway, Dunkirk and the Mediterranean, when naval and invasion tactics changed overnight. Small, fast boats —and plenty of them—was the new order. And while the Navy awaits the completion of its three fleets of big-ship defenders, it isn't overlooking harbor defense. If you can get by the triple marine guard at your nearest navy yard you will find abundant evidence of this in the strange assortment of pleasure craft we've been buying up—millionaire's yachts, offshore schooners, even 30-foot cabin cruisers. They're all being converted into battleship-gray tenders and patrol boats.

So, within the short space of twelve months, the sleek PT boats seem to have won prominent space in our all-out national-defense program. And this shakedown cruise probably will decide whether they hold that space permanently. Not that the Navy expects miracles of them. The usefulness of the mosquito fleet, in fact, is summed up realistically by the young, doughty squadron commander, Lieutenant E. C. Caldwell, thus: "Listen, the PT boat is strictly an opportunist weapon. It will never replace the battleship, the cruiser, the submarine or the destroyer. But give us a dark night, a fairly smooth sea and

GET A BIRD'S-EYE VIEW OF AMERICA IN YOUR OWN NEW

AERONCA

YOU CAN FLY YOUR AERONCA FOR ONLY 1 1/10¢ PER MILE



LITTLE NICETIES LIKE THESE MAKE FLYING A PLEASURE

Smartly styled wheel for leg room and vision.

Spacious compartment for gloves, purse, maps, etc.

Extra wide adjustable seat, richly upholstered.

Extremely wide safety swing doors, very convenient.

THERE's a bright new world awaiting you, up where the blue begins. And, it's yours for the taking — in this new low-priced, easy-to-fly, easy-to-own Aeronca. The Super Chief was built expressly for you . . . built to bring the pleasure of flying within the reach of almost everyone. You needn't be wealthy, because an Aeronca costs no more than a medium-priced car. And, you can operate an Aeronca for very little — actually only 1 1/10¢ per mile. You needn't have previous flying experience, because anybody who can drive a car can fly an Aeronca. It's really that simple.

Why not discover for yourself how safe . . . how easy . . . how much fun it is to fly an Aeronca. Once you have taken a flight in the new Super Chief and seen how easy it is to handle, how smoothly it responds to the slightest touch of the controls, you won't be able to wait until you can get your hands on the wheel and fly it yourself. And, remember, an Aeronca practically lands "on a dime." Any open field or pasture will serve as an airport for your Aeronca Super Chief. And that sturdy Aeronca Oleo landing gear will make every landing *smooth as silk*.

FREE DEMONSTRATION . . . FREE FLIGHT INSTRUCTION
Don't put off another day, one of the great moments of your life. See your Aeronca dealer. He's waiting to give you a free demonstration flight in the new Aeronca Super Chief and to tell you all about Aeronca's free instruction offer, small down payment and easy terms. Make a date with an Aeronca today.

AERONCA FLYING CLUB PLAN . . . FREE . . . Form an Aeronca Flying Club with your friends and neighbors. Send for a free copy of the Aeronca Flying Club Plan which gives facts and figures on how to form a flying club.

FREE CATALOG—Send, today, for big colorful catalog which pictures and describes the new 1941 low-priced Aeroncas. Ask for the name of your nearest Aeronca dealer. Write . . . AERONCA AIRCRAFT CORPORATION, S-3 MUNICIPAL AIRPORT, MIDDLETOWN, OHIO.

ONLY AERONCA HAS ALL THESE FEATURES:
New streamlined beauty . . . new two-toned custom interior . . . new larger and more comfortable cabin . . . new soundproofing insulation for greater quiet . . . new unobstructed visibility . . . new roomy luggage compartment . . . new cabin temperature control . . . new centralized control panel . . . new easy-opening safety cowl that lifts up like a motor car's hood . . . new longer cruising range . . . new higher cruising speed.

AERONCA AIRPLANES

AMERICA'S FIRST LOW-PRICED AIRPLANE

an enemy ship lurking offshore. That's all we need. Acting singly or in squadron, our mosquito boats can steal out at high speed to within striking distance of the target, let go with torpedoes and be well on the way back to port before the enemy knows what hit him."

That is the principal tactical theory of the only new weapon our Navy has developed out of the current war. Each PT boat put into the water is a $223,000 gamble that it or one of its mates may some day—or some dark, calm night—send to the bottom a battleship or cruiser costing millions.

The U. S. mosquito boats are so brand-new we have no actual battle record to judge them by. So our tacticians are guided necessarily by the past performance of British, Italian, French and German torpedo craft of this general type. A study of that composite record reveals one startling item: In the first World War prototypes of the PT boats sank or put out of action five battleships. Italian boats accounted for three Austrian dreadnoughts and that's the reason the name of Rizzo is well up on the list of Italian naval heroes. Rizzo was commander of the torpedo carrier that scored a direct and fatal hit on Franz Josef's pride, the St. Stephen. Again in 1919, when the British were battling the Russian Communists after the revolution, torpedo-boat raids on Kronstadt knocked out two capital ships, a cruiser and two destroyers, while only two of the raiders were lost.

Hit-and-Run Tactics

Britain is operating dozens of modern torpedo boats in the current war, Germany is reported to have a fleet of several hundred. Most of the German boats are low-lying launches, about fifty feet long, mounting a small-caliber cannon and two torpedoes.

Nazi torpedo boats were active in the invasion of Norway last spring, protecting transports and supply ships and chasing off defense craft. One of the latter, an antiquated Norwegian torpedo boat, was sunk in a fjord. Later, describing operations in the North Sea on May 10th, the German admiralty announced: "A German torpedo boat sank an enemy destroyer with a torpedo shot." For that deed the mosquito boat's skipper got his picture in all the papers and made a special trip to Berlin to have Hitler pin a *Ritterkreuz* on his chest.

When the Nazis subsequently seized Dutch and French ports, the maneuvers of their torpedo boats multiplied. While the battle of Flanders was raging, they reportedly bagged another destroyer and their harassing of the Dunkirk *évacués* is summed up in another official list of enemy craft destroyed. It reads, "Between May 10th and June 24th, six enemy destroyers, two submarines, one auxiliary cruiser, two transports, three armed steamers and one airplane."

British torpedo boats also were conspicuous in the evacuation of Dunkirk. Their speed and smallness made difficult targets for German bombs and machine guns. One of them, the last boat to leave Dunkirk, ferried 150 men across safely although she was holed on the water line forward.

More recently they have reversed the process, carrying suicide squads of raiders across the Channel at night and landing them at isolated points on the French coast. Upon landing the raiders put on a noisy show, intended mainly to destroy enemy morale, then re-embarked—if they were lucky.

It was three British junior officers, incidentally, who first thought up the modern hit-and-run torpedo boat. In 1915 Lieutenants Hampden, Bremmer and Anson put their heads together and decided that small, shallow-draft speedboats could skim safely across the mine-infested Channel and take pot shots at German ships in North Sea bases. They sold the idea to Commodore Tyrwhitt, commanding at Harwich, and eventually a dozen torpedo boats of 4½ tons (our modern PT's are 35 tons) were built. They were forty feet long, carried a suicide crew of just two junior officers and hit 33 knots.

The boat had no torpedo tubes but carried its "fish" in a trough at the stern. In action the torpedo was launched backward over the stern; when it plunked into the water, its compressed-air motor hurtled it forward, *aimed directly at the boat it had just left.*

Well, the young officers soon solved that problem. At the moment of launching, they set the speed of the boat enough knots faster than the speed of the torpedo so that the tail couldn't catch up with the dog.

These British pioneers put on a very creditable show, laying smoke screens for larger attacking ships, planting mines and rescuing crews of downed R.A.F. planes. Two of their later models, 55 feet long and carrying two torpedoes, were responsible for that torpedo-boat victory in 1919 at Kronstadt.

Our own modern torpedo-boat pioneers, those young huskies currently barking their shins and their skulls on the sharp, salty corners of the Caribbean, are also getting their training the hard way. They know by now that when a PT boat is hitting it up in dirty weather they must "ride the boat," become a part of the hull itself, stay glued to a bulkhead or stanchion. They know how vulnerable their water bronco's skin is to a floating log or hunk of driftwood and they've seen propellers banged into

sisted Horace, "a very called a Satin Burger. all blackbird."

e a word of it," said Greenspoon, who'd been trying to read. "Has anybody ever heard the bird talk?"

Whereupon Horace told him in detail and Greenspoon put down his paper and looked at Bildig more carefully.

In the preceding three years he had never noticed Bildig any more than if he had been a water cup. Now he did, although in five minutes he had forgotten Horace Jones' fishy tale.

Greenspoon was a businessman who selected his department heads by studying their habits and character. Nobody could pick his head men but himself and that's why he was successful, as he told everybody.

"I have made a success of my affairs," he would say in any company, "by studying men. I've studied hundreds and my key men are all sound. Not everybody can do it, of course. I just have the knack."

MEANTIME, Rex Stover, asparagus king of Lower New York, addressed himself amiably to Mr. Bildig and finally wound up by asking Bildig over to his house for dinner.

"I have a couple of kids who love birds," Stover said heartily. "Come over and bring your bird and we'll have him talk for the children and my wife. You're married, Bildig?"

"Yes, sir, I am."

"Bring your wife. Simple little dinner. No evening clothes. How about Thursday night, at seven?"

"Very nice indeed," said Bildig,

"This one is ninety-five dollars an ounce, and five cents deposit on the bottle" MARGOT COOK

31 POINT NUMBERS

We've got Your Number!

31 point numbers—31 point styles from which to choose! Like say No. 2442, the biggest-selling stub point in the Esterbrook fountain-pen line. Or No. 2556, with the finest of pellet-points, especially popular with accountants. Or No. 1555, Gregg-Approved, for stenographers.

Not just fine, medium and broad with a limited choice on either side of those classifications, but 31 points covering the entire range of writing style and writing demand. These points are renewable, too, at 25c and up. Some are cushioned with smooth, long-wearing osmiridium.

Here, then, is the Esterbrook fountain pen at a dollar and up, in black or colors . . . the pen that renews its youth after months or years of service. We've got your number . . . the right point for the way you write. Find it at your stationer's. Then ask to see the Non-jamming Repeater Push Pencil, to match your pen, $1 up. The Esterbrook Pen Co., Camden, N. J.

WORLD'S LEADING PEN MAKERS . . . SINCE 1858

Esterbrook

RENEW-POINT FOUNTAIN PEN

CHOOSE YOUR NUMBER FROM THE POINT CHART AT YOUR STATIONER'S OR PEN DEALER'S

Don't wait for car radiators to overheat, and cause expensive damage. Clean out rust, sludge and scale. It's easy with 10c worth of Sani-Flush. (25c for the largest truck or tractor.)

Do the job yourself—or have your service station do it. Plain water isn't enough. Insist on Sani-Flush. Can't harm aluminum cylinder heads. It's used in most bathrooms for cleaning toilet bowls. (*Directions on can.*) Sold by grocery, drug, hardware and 5-and-10c stores. 10c and 25c sizes. The Hygienic Products Co., Canton, Ohio.

SALICON TABLETS

The choice above all other preparations by the Surgeon General of the Mass. State Guard and his Medical Officers at the time of the terrible epidemic in 1918. They achieved outstanding results from its use. Get Salicon immediately. All druggists have it.

WAKE UP YOUR LIVER BILE— WITHOUT CALOMEL

—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pints of liquid bile onto the food you swallow every day. If this bile is not flowing freely, your food may not digest. You get constipated. You feel sour, sunk and the world looks punk.

It takes those good, old Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Take as directed. Amazing in making bile flow freely. Ask for Carter's Little Liver Pills. 10¢ and 25¢.

calmly. And on Thursday evening he and Mrs. Bildig ventured out to their first dinner in Balsam Manor. Bildig carried Peewee on his arm and the Rex Stovers treated them fine. The children made a great fuss over the Satin Burger. They talked to him, although he didn't talk back. Bildig had him do a few parlor tricks, fly up to a picture frame and come back to his wrist. He even talked to Peewee, but the bird did not respond. He made the usual chirping, indiscriminate sounds of a small bird, cackled and cocked an eye at the Stovers, who kept listening in vain for him to say, "I feel fine tonight and will have some beer."

Bildig explained patiently that strangers embarrassed Peewee. It was a poor night for the bird but a grand one for Mrs. Bildig. She laughed heartily and ate too much pudding.

Two or three other families followed Stover's lead and Bildig took his wife and bird, and a pleasant evening followed—but nobody could understand what Peewee was saying.

And thus Bildig came to know some of the residents of Balsam Manor. People nodded to him on the streets and on the morning train he was even invited to join the bridge games. He smilingly declined all invitations, as he didn't play games and those club-car stakes always made him shiver, anyhow. He changed none of his habits, worked in his garden, fixed the old car and scraped through on fifty a week—and expected no change.

Nor did one occur until Greenspoon spoke to him later on, on the run into town. Greenspoon had been staring at him with a preoccupied look, like a fat snake looking over a baby bunny, and you could see that the selective brain was at work. He called over to Bildig and asked him to sit down.

"Mr. Bildig," said the town's leading factory owner, "I've been looking you over lately. I've been analyzing your character."

"You have?" said Bildig. "That surprises me indeed, Mr. Greenspoon."

"It naturally would. When I become interested in a man, I give him a mental going over. I go after him and see what he is and he never knows it. When I have him nailed in my mind, I speak up."

"A very good idea," said Bildig, who was again beginning to fret about his morning Times.

"Bildig," said the other, "how much money do you make?"

"Fifty dollars a week."

"It's hardly enough for Balsam Manor," fumed the big man. "You can't scratch by on that and I know it. That's why I'm going to give you a better job and pay you thirty-five hundred to start."

MR. BILDIG looked startled and seized the arm of his seat. "Thirty-five hundred!" he exclaimed. "Why, you don't even know me, Mr. Greenspoon. I'm only a price clerk with the bottling concern. How do you know I would be of any use to you?"

"How do I know?" Greenspoon roared. "Because I am a specialist in picking men. I want you for the head of our screen and frames department. The old head has been gone five months and you're the new man, if you'll take the job."

"I certainly will take it," cried Bildig, "and I'll do my very best."

"I know you will—your character tells me that, and I have no need to know your experience. You can see I've been looking you over."

"Yes, sir, and I hope I make good."

"You will. You will. Another thing—I rather like your habit of putting a few dollars away in the savings bank. Fine habit. These things all add together in my mind and I've yet to pick a poor department head."

Bildig didn't quite understand about the savings bank. He never had excess funds to put anywhere, but he had to let it pass. They were coming into Grand Central.

On the night train to Balsam Manor, Greenspoon again sat beside Horace Jones. "This will interest you, Horace," he began. "I'm going to give Bildig a job. Been studying the man. He's made for us."

"That's excellent," said Horace heartily. "I hope you pay him more money than he gets now. I think he's had a hard time of it."

"Certainly will. A thousand more a year to begin. And another thing, Horace. Your comments about him had something to do with my decision."

"How's that?"

"Well, about his orderly, quiet ways. Cool head and putting a little in Burger's Savings Bank every week."

"I never said anything about his putting money in the bank." Horace turned in his seat, a little puzzled.

"Oh, yes, you did, this very morning. You said he saved and put it in Burger's."

"Listen, Greenspoon, I never said a thing about Bildig's financial affairs. I know nothing of the man. I merely said he had a bird called a Burger."

"Weren't you talking to me about Bildig this morning?"

"I was. We were talking about that bird he's got."

"Bird?"

"Yes, a Satin Burger. Bird talks."

"You didn't tell me—"

"I told you nothing except he had a bird. Keep your ears open, Greenspoon. I don't see how you run six factories."

"Well, it doesn't matter much. He's the man I want. I never make a mistake."

MR. BILDIG formally notified the bottlers that he would be finishing in two weeks to take a better job and his office survived the shock nicely. Greenspoon invited him to dinner on Saturday night.

"And bring your little bird," boomed his new employer. "Have him talk to us. I've got four boys."

So the Bildigs sallied forth on Saturday, met Mrs. Greenspoon, put Peewee through his antics and listened to Greenspoon discuss himself and his methods. The bird talked poorly and only Bildig could hear him and that by putting his head on the table close to Peewee's bill.

…pewriter time in your office, let your typist decide! First, because she …al… knows what make suits her style of typing best . . . the one on which …d…*etter* work for you—and do it *faster*.

Second, because every alert, intelligent young woman of business *deserves* a voice in the selection of her typewriter. And shows greater loyalty to that employer who is considerate enough to respect her wishes in this so important matter.

Only your secretary knows the answer to this one

…typ…iter should you buy?

…i't …en *try* to answer this question, Mr. …ye. Let your *secretary* decide!

…y …d't we say, "Give her a Royal"? We …ke to! If she's given a free hand to pick …ach…e she likes best, the one that stands …ges… the one that produces the best work …e …inces are—she'll pick a Royal! We're …onfi…nt of its superiority in *every* respect.

… in…ance. The Royal is actually *easier to* …. …e can't give you *figures* on this, of

…e, …cept to point out that the all-time …l re…d was made on a Royal . . . that it's …er…on over 20,000 schools where typing is …ht.

…ut w…*an* give you a few of the reasons *why* Royal is an easier-writing machine. Only Royal has MAGIC* Margin, which enables a girl to change and set margin stops with a flick of the finger. Only Royal has Touch Control*, with which she has only to twirl a dial to adjust key tension exactly to her particular pressure. Changing ribbons, too, is only a matter of moments on a Royal. No messy fingers!

And there's far *less eye and nerve strain* on a Royal. For example. No flashing type bars blur her eyes. On the Royal, they flash unseen. And the carriage doesn't pop up and clatter when the shift key is struck. The Royal has a quiet, *bob-less* shift. Royal's exclusive Finger-comfort keys absorb light, save fingernails. While the no-glare finish eliminates dancing light reflections, saves eyestrain.

This one favor we ask. It costs you nothing. Simply phone your local Royal office and ask for a free "desk test." A new Royal will be left in your office on trial. No high pressure. We'll let the machine supply that. See for yourself that a Royal will save your girl's time and effort, mean more typewriter for your money, better and faster work for you!

Try This At Bedtime Tonight

HERE'S that new "morning freshness" idea you hear so much about these days. A simple plan that thousands are following religiously—for clear-eyed morning "sparkle" and energetic days.

What they do is take a cup of *new, improved* Ovaltine each night at bedtime . . . not only to foster restful sleep itself—but also to replenish vitality *while* they sleep.

How It Acts

First: When taken just before going to bed, the new Ovaltine has the power to relieve that feeling of nervous tension, thus conditioning the mind for sleep.

Second: It provides a specialized form of nourishment designed to prevent certain common types of digestive unrest. These conditions, according to medical authority, may be a cause of 50% of all night-time tossing.

Third: Ovaltine also furnishes certain food elements to replenish vitality—rebuild worn-out muscle, nerve and body cells while you sleep.

The new, improved Ovaltine has recently been enriched with greater amounts of protecting minerals and Vitamins A, B and D. It is a *scientific* food-concentrate designed to accomplish specific nutritional results for those who are rundown, nervous and under par or who sleep poorly.

These are not mere "statements" or "claims." In a 3-year scientific investigation, the majority found that, when they took Ovaltine regularly at bedtime, they definitely felt *more refreshed* in the morning.

For the sake of your health, your nerves, and particularly your appearance—why not try taking the *new, improved* Ovaltine regularly—begin tonight? See if it doesn't help you to wake up feeling far fresher in the mornings.

Mail for Free Samples

OVALTINE, Dept. S41-C-3

THE PROTECTING FOOD-DRINK

We're in the Army Now

Continued from page 15

Local commanders are assisted therein by the chaplains, the morale officers, the welfare hostesses. While these guardians of your boy's morale are not always successful, the records indicate desired results far above the average in any civil community. In near-by towns, welfare organizations such as the Y. M. C. A., the Knights of Columbus, the Jewish Welfare Board and like groups do a lot to make the rough and lonely moments more pleasant. Theirs is not a too-severe task either. The vast majority of our soldiers ask no more than a fair chance to be decent, loyal and hard-working.

We are not attempting to coddle your young man; you wouldn't want the Army to do that. Nor is it our aim to treat him at once as the recruit who must be beaten into a hard-boiled soldier without delay. Special efforts are made to control near-by vice resorts by co-operation with city and state authorities. Where this fails, wise commanders rule dives and similar resorts "off limits" or out of bounds. For years the Army has led in group control against venereal diseases. All applicants for enlistment and all trainees are examined that we may be sure that none comes into the Army infected. Line commanders and medical officers have definite responsibility to guard their men against such diseases. Their leadership qualities are judged in part on the success they achieve along these lines. The trainee who renders himself unfit for duty by contracting a venereal disease is punished. And he is medically treated, promptly and efficiently.

All this, you may be sure, is definitely a part of the business of making a soldier above the average in character, physique, morale, team consciousness. It is the responsibility of us who are entrusted with the work of training your young man to defend himself, defend you and the America that we love, to approach all tasks cheerfully, be they pleasant or unpleasant. Properly trained, he will go forth determined in war or peace to overcome obstacles. If we do our part as it is our duty to do it, he will be assured of a happy, interesting and instructive service. He will learn the true meaning of comradeship. He will make lasting, loyal friends. He will come through a stronger, clearer-minded, more self-reliant man.

The Jest That Saved the Day

I remember Taytay, a small town north of Manila in the Philippine Islands. That was where I first was introduced to enemy bullets. General Otis, commander in the Philippines, had staged this early battle with the Filipino insurgent leader Aguinaldo, hopeful of driving him from the country surrounding Manila. My captain was sick. My first lieutenant was away on other duty. The lot of leading a company of about a hundred men fell upon me, a second lieutenant aged nineteen. We advanced through thick woods to open rice fields. Then suddenly a volley of Mauser bullets whistled overhead. All of us dropped in bewilderment behind a rice dike.

While only two men were killed, the immediate psychological effect was appalling until an old first sergeant—Feldcamp—passed along the line shouting: "What's the matter with you guys? That's nothing but tropical bumble bees."

Maybe you don't think that remark particularly witty. But it snapped us out of our bewilderment. A laugh started. Before anyone realized what we were doing, we w charging with the bayo the enemy. I mentic merely because soon a begins the new soldier stand just what happen tay. The recollection plus my father's favorit the best out of the wors influenced my own for service in our Army.

I ask you to believ sermonizing. The busi dier is a stern one. Fur not very different from face if he is to win ir walks of life present defi human and mechanical. conception of Army life, ings play an unduly la read only of the excep frequently giving a fant say, the hard-boiled s tyrannical rule or of the of some individual air p infantryman. Except ir receive from the trainee or nothing of the humdr business of acquiring sl dling of weapons and th hardships and the per that make the man the soldier the man.

He weapons (the rifle for ex- facility in movement. It such days may be the hard- w man. He is being turned abruptly from the easygoing ways of peace into the mass living, moving and interdependence of the soldier. He will fret, perhaps, at what seem to him to be absurdities. Presently he will learn that the Army employs no magic, that its aim is not to be acquired overnight, nor without trial and error. The composition of the Army's new personnel, a cross section of democracy, does not blend nor boil without some overheating. The bright lad's place is sometimes occupied by a dull one.

The trainee's privacy is deeply invaded. He will live in dormitories, in small groups in tents or eventually in small wood barracks. He will stoke the stove, scrub the floors, make beds, clean windows, clean the lavatories. His life is radically changed. His uniform may not be the romantic thing he has pictured. It may not fit him as well as his civilian clothes did. But he'll come to know that the new uniform is more practical than the old for field service. However, the soldier can fight in any garment, provided his shoes fit him and provided that he is dressed properly to meet the climatic conditions he lives in. We shall see to it that his clothes in general fit him. Pride in appearance and general neatness and comfort of dress are an incentive to ambition and help make a good soldier.

After this basic training, your soldier will pass to broader fields. He will join a designated branch of the service. If he is indicated for specialization—cook, baker, chauffeur, radio operator or so on—he will be sent to school where he'll learn how it is done in the Army. If he is cast for straight soldiering he learns it in orderly ranks. It is true enough, alas, that his unit may not be fully armed nor equipped with all the implements of modern warfare. Remember this: America is now building up its Army after many years of neglect of our national defenses. Rotation in training will be necessary for many months until modern weapons are produced for our new Army. And remember too—you who chafe or you who wonder why we are modern army on paper only just now—remember that it is better that we lack all the modern arms that we need now, rather than after war comes.

No good soldier wants to be cried over. He'll do his own grumbling but resent having it done for him. He knows when he's being treated fairly, when his noncoms and officers are competent. He knows that he'll be rewarded for good work and punished for breaking regulations. It's no life for a weakling, although it has made many weakling a strong man. If he is sent to the guardhouse he is not there as criminal in jail. The Army promptly eliminates criminals and turns them over for confinement in federal prisons. When Army discipline is mentioned the public has come to picture tough, hardboiled sergeants and the brusque, bewhiskered, cursing, tobacco-chewing Colonel Martinet. Those days are gone forever. In

Three rings (and an aerial act)

Over half a million new chins are singing..

THE NEW SCHICK WITH THE 2-M HEAD FOR 30% FASTER SHAVES IS WINNING THE GREATEST WELCOME IN HISTORY.

A new all-American male chorus that has swelled to half a million happy voices in a few months is singing the praises of Schick Shaver's new 2-M *Hollow-Ground* Shearing Head.

Men do like its 30% faster, smoother shave—freedom at last from nicks, cuts, scrapes or burns.

Beards may be fuzzy to rough, skins tender to tough—they're all one to this sensational new whisker-whipper.

The new enthusiasts join the millions Schick has already introduced to the joy and convenience of electric shaving.

Why not give *your* face a pleasant surprise? Try the new Schick Shaver for 30 days. If you don't *want* to keep it, your dealer will refund your money.

SCHICK DRY SHAVER, INC., STAMFORD, CONN., U.S.A.

ONLY SCHICK OFFERS:

• NEW 2-M SHEARING HEAD—hollow-ground to arch the skin surface—makes the whiskers stand up to be cut off. That's why it gives close shaves 30% quicker, easier, *better*. • FLYING SHUTTLE SHEARER—powered by an improved, faster motor—performing more than 14,000 shaving operations per minute. • WHISK-ITS—to catch all beard clippings. No other shaver offers this feature. • BRAND-NEW STYLING by Raymond Loewy—world-famous designer.

Schick prices now start as low as $9.95 *—for the popular* SCHICK CAPTAIN *complete with straight Speed King Head and Whisk-Its.*

NEW SCHICK FLYER—*styled in handsome burgundy plastic with silver-colored Whisk-Its and packed in genuine leather case, $12.50.*

NEW SCHICK COLONEL—*executed in rich ivory plastic, with gold-colored Whisk-Its. Packed in simulated alligator case, $15.00 (or, packed in de luxe Dress Kit, $17.50).*

Many dealers offer easy payment terms!

Born in March? *Drop a birthday hint for a new Schick shaver!*

ATTENTION, SCHICK OWNERS!... *Get this 2-M Head for your shaver!*

We made this marvelous new 2-M Head so that it can be used on any of the millions of Schick Shavers now in use!

And it's yours for only $3.00! You get the new head expertly fitted, and the whole shaver inspected, cleaned, lubricated, and adjusted free of charge. Simply take your shaver to your nearest dealer—or send it to the factory in Stamford—or take it to a Schick Shaver Service Office in:

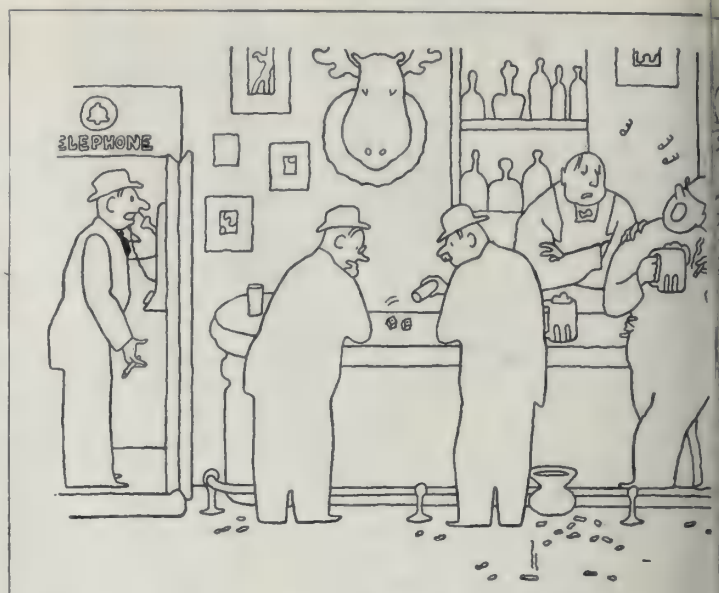
the Colonial wars, on the Western plains, in the Indian wars, perhaps such methods were necessary to control the mercenary soldier. But this Army represents a nation in arms. Modern discipline conforms to the higher quality of the men in the modern ranks. It corresponds closely to the discipline that is essential in any public community, indeed in the family home. That home or that civil community without discipline is frequently a sorry place. Life there is seldom if ever happy. More criminals are produced than men. Army discipline has a much higher purpose than to force obedience through fear of punishment.

As I've said before, the trainee is not to be coddled. Nor does he want to be. There will be times when authority will have to be tough, but in most cases an intelligent understanding produces effective results. This new Army wants to develop willingness, enthusiasm, fair play and a fair division of burdens and sacrifices. We are free men, fighting for that which enables us to be free.



And yet the life will not be unrelentingly stern. The soldier in this Army will have access to athletics, the movies, sight-seeing trips. The new soldier will receive visitors during his time off—usually half of Wednesday and Saturday and all of Sunday. Chaplains will hold services—all creeds. The camp libraries will offer intellectual relaxation. In the recreation buildings there are dances, games, social gatherings. There are post exchanges, very much like the small-town store. They are run for the benefit of the soldier, who may purchase what he wants at minimum prices, on monthly credit. Liquor, except for light beer, is prohibited, and the prohibition is made to work. All sales profits are returned to the men through their unit commander, who may spend them for athletic paraphernalia, amusements and additions to the unit mess.

Understanding—Not Force

In no other army in the world is as much attention given to medical care, food and contentment of troops. The food is excellent in quality and quantity. High standards of cooking exist in all old Regular units, but are acquired slowly in newly formed units. The Army trains cooks and bakers, as well as thousands of other specialists. Bakers' and cooks' schools train and send to camps men who are especially qualified to handle the Army ration and to prepare the best meals. Commanding officers are taught the value of these factors not only from a human viewpoint, but also as an important element in developing the spirit essential to combat success.

Nor is the new soldier the only man in the Army who must learn solid truths. The efficient leader will cultivate in his men the habit of learning the reasons back of all methods and actions. Thus discipline—the authoritative individual control to secure collective results—is gained more by a clear understanding by the men themselves than by force and punishment.

Five months or so of such training as I have tried to describe should make the trainee a well-rounded individual soldier who has absorbed the true family tradition of his small unit. It is on the soundness and efficiency of the smaller unit that the efficiency and success of the whole depends. The principles of sound organization in military life are not much different from the same fundamentals in civil enterprise. Don't forget that. Team action under leaders who know their jobs, in whom the men have faith, wins battles, campaigns and wars as well as profits. In modern warfare, rifle groups, machine-gun sections, tank units, mortar groups, artillery, air forces and antiaircraft batteries must

"That rattle, dear? Oh, that's just the adding machine those drunks farther along the bar are the office

be interlocked and intelligently tied into team action. And when the individual soldier is presently molded into this pattern he becomes the means whereby his higher officers and their staffs learn to maneuver and supply large forces—learn how to do it, too, without making unnecessary sacrifice of life and imposing undue hardship on the men.

What the trainee is now learning has come from close observation of what has happened and is happening in Europe. We have learned that the small military unit is frequently placed very much on its own. These small groups, on their own initiative, will seep through enemy strong points. They will outflank enemy resistance and infiltrate to great depths as the Germans did in the Low Countries and France, as England has done in Africa. Thus they will disorganize the enemy's command, disrupt his supply system, win local victories. We have seen what these small actions do to the armies on which they are effected.

Having learned the basic lessons of offensive defense, the trainee will find himself understanding the large military problems in which he participates—the maneuverings of divisions, corps and armies. Properly trained, his mind receptive, his body fit, he will be a soldier by the time his year of service is finished. It won't be easy. There will be lots of nightwork, much marching. There'll be times when the platoon leader, urging his men forward for these last few miles in a tough day, will probably yell: "Come on, come on. Pick 'em up, pick 'em up." And, my boy, you'll probably come back with something like: "Yeah? You pick 'em up. I can just about put 'em down." But we old-timers can tell you something. We know, and you'll know, that if you're a good soldier, under good leaders, you'll belong to a group in which you're going to take high pride. And that pride means morale. You'll pick 'em up and you'll put 'em down, and you'll curse that comrade who doesn't, because you're not going to let any other outfit shine above your own. In all our military traditions and history there has been nothing finer than the pride the soldier has had in his regiment. Men have died for their regiments, for its honor, its traditions, its reputation. Died for their country? Certainly. But it was the pride in their outfit, the eagerness to fight for its traditions, that sent them into the enemy's lines. Old-fashioned? Pride is never old-fashioned. You'll learn that, my lad. And you who stay behind, who have your soldier in the Army, you will learn it too.

This new Army needs leaders. The trainee wil plenty of opportunity f noncom grades and t He will be observed by for capable squad and If he has the qualities competent officer, they v encouraged and rewa strated individual wort the time-honored syste service and seniority. C Schools will be open to men. Today's corporal ership qualities equal lieutenant's. Unit comm of their trust will take p ing good men. Likewise, missioned officers a uni more the unit's comma tion is enhanced.

It's a Job for Ev yone

We Fly a Bomber to England

Continued from page 13

whether you touched their lives as intimately as they've touched yours, and suddenly you realize that it isn't important if you have, but only important that you've had the joy of knowing them and of feeling between yourself and them those bonds that hold men to men and women to men and suddenly you are very happy.

Suspended at night under the star-punctured sky in a planet all your own—a planet with wings and motors—without sense of motion, you think of all these things. I did. And I thought of the England to which I was returning and wondered what I would find.

I had left England in December, 1939, during the prelude to war in the days when they called it the phony war and the second Bore War. Headlines marched across my memory—the headlines of more than a year that told of bombs and fire and death, and I wondered whether I would find an England.

How Badly Hurt is Britain?

When I left England to go to Holland to watch fat, unaware Dutchmen smother in smug unawareness, there had been sandbags in the streets and paper strips across windows, and men and women grumbling about the black-out and wondering why they had to go to war at all. I wondered what months had done to them, but most of all about how badly hurt England was and whether I would find my friends there.

My picture of what England would be like after weeks of irksome broadcasts and the chatter of columnists who couldn't agree about what America should do in this war was badly confused. But one thing I knew. This was that I'd be happy in England, where they don't ask a man where his father was born, where it is necessary only to share an idea with Englishmen to belong. People like to belong. Back home I had begun not to belong. I could go along with isolationists but not with their reasons for isolation. I could be one with interventionists but not when they justified their interventionism with clichés about common heritages and common culture and common language.

In England all you had to believe was that one idea, one concept, is in the balance in the war. That is that England fights for preservation of the principle that man has the right to criticize, to debate, to argue with complete freedom. England is fighting to preserve the right of Senators Wheeler and LaFollette to say what they please.

We plowed on through the night, the motors imparting life to the metal of our ship. Daybreak found us bouncing in head winds. We climbed into rare air and we thought our lungs would collapse. More than ever I wanted to do something—contribute in some way to keeping that ship of ours in the air and headed toward England, but there was nothing a reporter could do except keep out of the way in those cramped quarters.

I tried to sleep but it was no use. I watched the navigator. For hours I watched him work. The radio was useless—Germans might pick up our signals, take bearings on us and intercept us—and England would be without a plane and five or six lives would be lost. Our lives, important only to us and to those they touched.

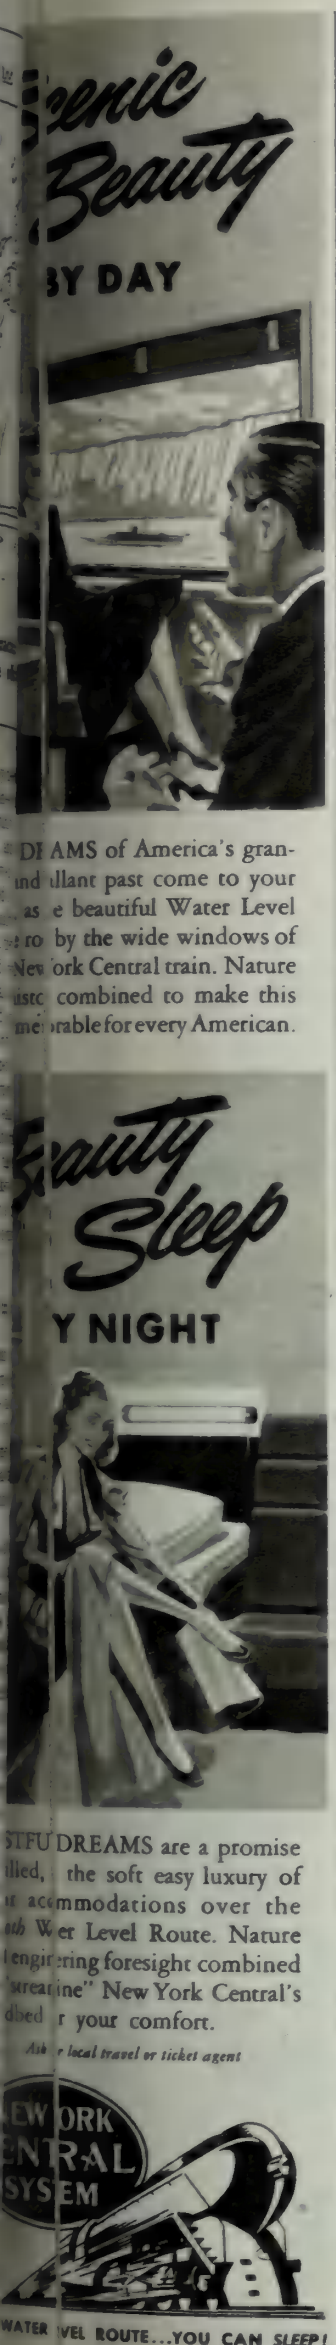
But the navigator knew his job. Off England, we hit an overcast so dense it might have been a snowbank, and you couldn't see anything but a desert of whiteness streaming in ribbons from the propellers.

Then the navigator said to the pilot, "Okay. Down we go," and we dropped down through the thick mist alive with the light of the morning sun. We searched for enemy planes and were almost disappointed that there were none. And then we saw England, brown and rolling and green in places, and everybody lighted cigarettes except the engineer, who was too near the gas tanks. The navigator was a boy again. His job was done, and suddenly he looked very tired.

There's a lot I could tell you about where we landed and how we were met but I can't. I can say this, however: Hitler will have enormous difficulty invading England. He'll be met at the coast by a British civil servant, with so many forms to fill, so many questions to answer he'll give up the idea of entering England.

The plane's crew went to sleep. I couldn't. I had to get to London. Late the same afternoon I took a train across England. The countryside that rolled past my window might have been Maryland or New Jersey covered by snow. The trees had the same silhouettes and the people were like our people, but the moment I saw them and talked with them I knew more than a year of war had changed them. Grim they seemed, how utterly convinced they were right and Hitler wrong!

Usually reticent, they warmed when they spotted me for an American, and I was one of them and I felt glad. The sleeper conductor, who looked like Churchill, was worried that an air raid might interfere with his train's journey and delay us getting into London, but there was no raid. When he brought my tea in the morning and later when he helped me with my bags, we became great friends though we didn't talk much. He said wasn't it a "shyme" about those "Eyetalians?" He said it was a "shyme" they hadn't been able to put up a better show. He was sorry, he was, for they're such nice people, but those bloody Germans—well, they were - - - - - -. He was probably sixty, but there was that indestructible quality about him that is British. I like to think that we Americans alone of all the other peoples of the world have that same quality.



All's Calm in London

From Paddington Station to the Savoy Hotel I squirmed and twisted in the taxicab to see what Hitler had done to London. There were no wounds to see and for one ephemeral moment I had the illusion of awakening from a bad dream. There hadn't been a war. I was waking up in the same taxi I took from Paddington years ago, when I had come up from Rome to escape from the monotony of Mussolini's speeches and the pall of propaganda. The futile paper strips across the windows were gone. Sandbags were gone. London was herself again. It was Sunday morning and London slept and there were no uniforms to be seen, and then I saw a bobby who wore a "battle bowler" and I was back in reality with the thump of falling out of bed in a dream.

I realized it was Sunday and that London was asleep, but it seemed to me instead that London prayed.

I walked about in the streets near my hotel—up the Strand and up Fleet Street that Hitler hates because for years the Street has talked back to him.

He hasn't hurt Fleet Street nor the

Strand, except a little here and there. No more steak and kidney pie at the old Cheshire Cheese, where Dickens sat and Johnson argued and Boswell fawned. It's gone. The place where I used to buy my pipes is gone too, but the old streets are there yet.

You can walk for blocks in any direction in London and see no scars of bombs, and if you're one of those who makes up his mind too quickly you'll say, "Why, it was worse in Madrid—London's not been hurt at all," and then you come to the docks and to St. Paul's and it hits you in the pit of the stomach that London has been hurt and badly.

No, don't believe those stories that the war has changed England but little. There's change here, all right, and if you are sensitive to atmosphere at all you feel it even when you can't see it. When war began it was fought by the few. It's every man's war now, from the most hidebound Tory through the school-tie boys down on through the smallest man and woman in the nation. They're fighting for survival, not merely victory, and they're fighting with a calm, cold desperation that quivers beneath their customary equanimity. It doesn't take long to see and feel it.

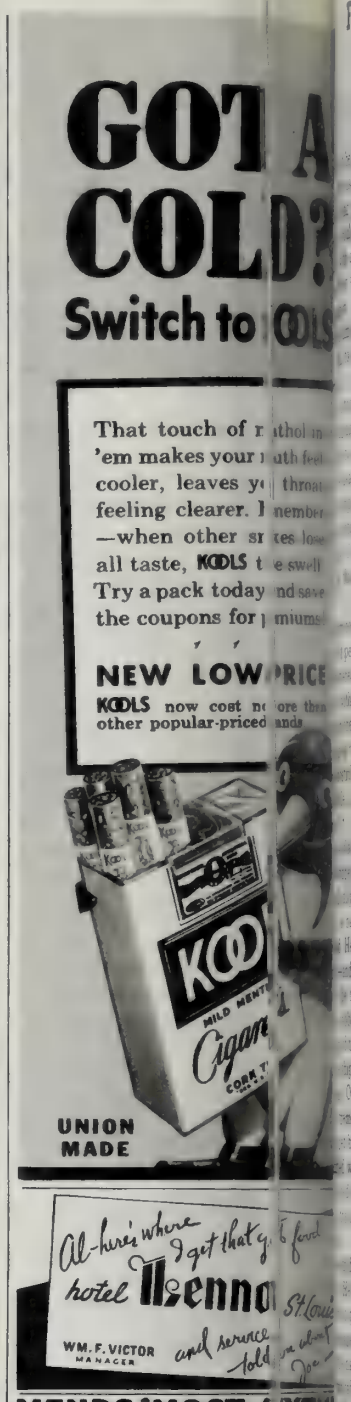
This is the People's War

Of course, if you hang about the bars of the Savoy and Dorchester—oases for those who are largely sitting out the war—you don't get it. But dip down underneath into the tube shelters where men and women and children are heaped, into the Isle of Dogs and Lambeth and Limehouse, and you know that this has become the people's war.

It is possible that they who are fighting this war will be betrayed when it is all over but it is not probable. They've got their men in the government this time.

Profiteers? I hear there are some but it's not like the old war. They count their profits in thousands of pounds where it was in millions before. There's an excess profits law which practically confiscates any profits over and above a certain legal limit.

You see that the war has turned England inside out, shaken it onto a table where everyone can see what was wrong with her social structure. The social revolution began when they evacuated children out of the London area and found them ill-fed, poorly clothed and diseased. Sir Hugh Walpole, the novelist, told me then that Britishers would remake England and would set right the evils that had existed for hundreds of years—evils so vile they produced the literature of Dickens. I wondered, then. Sir Hugh stood in his library surrounded by Gauguins and Matisses and busts by Epstein, whom he fancies very much. He looked out from his Piccadilly windows over a green park when he said that, a lifetime ago—about fifteen months ago.



But he was right. They've remade England and if there can be said to be any good in war that's a small gain already.

And it is further proof of what has happened to England that when and if conscription of female labor comes Lady Dribblepuss won't get any preferences. She'll go to work the same as Nellie Hawkins. If that kind of conscription comes it will even include the nuns in the convents.

England has come a long, long way since Dunkirk. Her defenses, they tell me, are impregnable in the sense at least that Germany will never conquer England. Her morale is magnificent. Occasionally you turn a rock and find a defeatist. But anybody here will tell you that to prevent a German conquest of Britain is not enough. There must be victory and if there is no victory then the prerogative of senators to speak their minds will be gone. And how would they like that?

"Separate checks, please" LEONARD DOVE

Fate Doesn't Care

heat ew terrible. But the man ued t work on the lock. As the oppe to the horizon, the last of any-t es-twisted nails broke off utside he keyhole.

man alked stiffly to the end of land d stared savagely about orizon Darkness raced across the and t stars came out. The man back nd forth in the darkness. nly h stopped short. His breath red th ugh his nostrils. He fell on his hands and knees and groped about on the stony soil. Presently he made an inarticulate small sound, and metal clanked. And then the man was a hunched, squatted small heap in the darkness, and his right arm moved rythmically, and through the pounding rumble of the surf there came the steady rasp-rasp-rasp of stone upon metal.

That noise continued. Stars that were overhead moved westward and slowly began to descend. The noise kept on and kept on and kept on. . . .

When dawn came the man still squatted on the rock, rubbing a sliver of stone back and forth, with a feverish intensity, across one small spot on the handcuff about his wrist. . . .

When the light was bright enough, he looked. At the spot where he had concentrated, the locking bar of the handcuff was thinner by perhaps the half of an eighth of an inch.

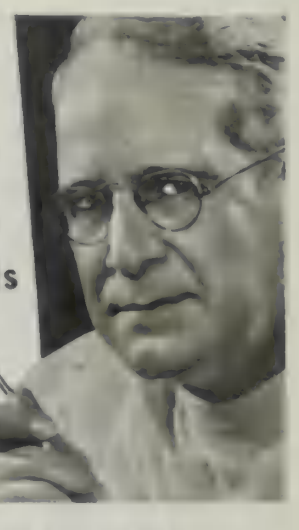
The man got to his feet and staggered to the edge of the island's top to stare, level-eyed, over the sea.

He saw a steamer. It was startlingly near. It was no more than six or seven miles from the island. But it was headed down the coast. And every turn of its screw carried it farther away.

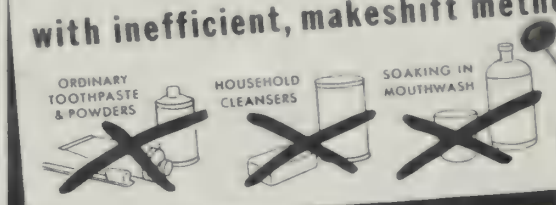
The man stood still, watching, while the steamer went on and on, and at last sank below the horizon. When it was surely gone the man looked at the largest of the three pinnacles, and saw nothing but plunging surf and sea birds. He squatted down to rub at the handcuff again.

BY NOON even his calloused fingers were rasped to raw flesh by the succession of stones he had used. He clambered down to the beach and soaked himself in the sea. It cooled him a little. He looked at the rubbed place. The steel was monstrously hard, and the stone as horribly soft. The rubbed spot was undoubtedly deeper, but it looked like just a little more than the half of an eighth of an inch.

Back to the top of the island. And now there were two small tufts of smoke that showed against the horizon. Two steamers keeping well out to sea as they passed this known and charted danger.



But the man stared fiercely all around the edge of the sea and then looked defiantly up into the blue, as if challenging something which had found his antics amusing to continue its effort to break him. And he stared longest and most fiercely of all at the largest of the three pinnacles of rock perhaps a sea mile from where he stood. There was something among the rocks. . . .



He went back to his rubbing. During the afternoon he suddenly rose and climbed down to the beach again. He dipped the stone in sea water and then in dry sand. He essayed to use the sand as an abrasive to increase the cutting power of the rock. He tried it again and again. But the rate of cutting of the steel did not increase.

He rubbed all during the afternoon, chewing upon the cabbage leaves and looking ever more gaunt and hollow-eyed and defiant. The sun set, and still the rasping sound went on. The night air grew chill, though the rocks gave off heat for a long time. Then the man suddenly stopped his work. There was a little silence. He evidently felt with his finger for evidence of results. Suddenly there was a savage clanging of metal upon stone, as if in utter, despairing bitterness he had battered the handcuff furiously against the rock of the island.

Next morning it was clear that he had

YOU CAN'T CLEAN

done just that. The handcuff was tighter about his wrist. He had hit it violently against the stone, and it had slipped forward a few notches and locked itself in the new position.

When the sun warmed him he rose stiffly. His glance about the horizon was almost perfunctory. Blue. Blue. Blue. White foam where seas broke on separate rocks, and acres of white where they pounded over the reeflike shoal—studded with sharp stones—which made futile any hope of swimming to the mainland. The three pinnacles.

Something moved about the base of the largest. It crawled weakly on hands and knees. It was a man. Alive. Somehow, in some fashion, there had been another survivor of the wreck of the coastal steamer. That other survivor had landed alive behind the largest of the three pinnacles. He was alive there now. He had been sheltering in some crevice during the daytime, to hide from the sun which would suck the juices from his body. And this was the third day after the wreck, and a vessel of some sort would come soon to hunt for traces of the missing steamer. It was not possible that the men on the searching vessel would fail to find this other man, or that he would fail to know the man on the island for a condemned murderer.

The man on the island went down and bathed, and climbed up again—and that was all. Once, toward noon, he halfheartedly picked up a rock and ground at the cut in the handcuff, which was not quite an eighth of an inch in depth. But he abandoned it again.

WHEN sundown came, he stood in something like apathy and looked at the sea and sky and at the largest pinnacle. He could see the man there, moving clumsily, busy at some task that the man on the island could not imagine. He did not try. He watched without curiosity until darkness fell.

During the night he lay and stared up at the stars. There was no longer defiance in his eyes but a certain quiet scorn. Fate or chance or the universe had made sport of him. First it had caused his doom for the doing of a thing all men approved, but would not concede his right to do. Then it had saved him out of a chaotic sea and offered him the bait of hope. And now it had mockingly shown him that even that hope had been a delusion.

When dawn came for the fourth time he looked out over the sea almost with indifference. There was a smoke to the southward which was close in to shore. That would be a searching vessel, most likely. There was smoke to the westward, far out at sea. Wind thuttered. Sea birds flapped. Surf pounded and roared and splashed. And then the man looked at the pinnacle.

Something was floating away from it. An extraordinary and pathetic melange of tiny bits of flotsam, patched together to form something like a raft. In its middle there appeared the head and shoulders of a man. The man on the island stared blankly. He could have left the island a dozen times over, but he knew of the shoal with its sharp rocks and pounding surf, and that any floating thing would be torn to shreds upon its knifelike rocks. The man from the pinnacle, obviously, did not. He had never been able to climb high enough to see more than the island and perhaps the top of the mainland to the east. He had assembled every possible scrap of buoyancy, and now trusted himself to the waves in blind ignorance that a searching vessel was even now on the way to rescue him.

The man on the island stood up. He moved toward the cliff top. With a sudden savage energy he swung down to the beach. There was a heavy spar awash at the edge of the water. He had made no attempt to use it hitherto. Now he strained terribly to free it from the sand—to get it afloat—to start it in motion as at once a hindrance and a help when he struck out for the pitiful, futile raft.

As he fought the waves, his expression was that of a man who is filled with a passionate scorn. He reached the spot upon the water where he should have intercepted the man of the pinnacle. Instead, he came upon flotsam. Two or three bits of floating stuff, broken away from the rest. He heaved himself half out of water by the buoyancy of the spar. He saw the raft was disintegrating. It had been held together by twisted strips of cloth. Half or more than half had practically dissolved away. The man from the pinnacle floated limply, tied to the remnant of his float, but only half above the surface. He seemed to be unconscious, but the man from the island saw bubbles come out of his mouth as water surged over him. He paddled savagely toward the spot.

Heading back to the beach with the unconscious man drawn precariously over the spar, a flame of triumph was in his eyes. Fate and chance had made sport of the pair of them, but in helping this man he struck back. He continued to strike back when he hauled his man ashore and rolled him over the hastily up-ended cask, and then worked grimly to bring him back to life. He felt a furious satisfaction when the man breathed.

Later, he got the still unconscious man up to the top of the island. There was a broken leg to be attended to. That was why the man of the pinnacle had never walked, but only crawled painfully and slowly. The man of the island looked keenly to southward. Yes. The inshore smoke was very obviously that of a small vessel watching the mainland for signs of wreckage. He turned again to the unconscious man.

And he saw—it was odd, perhaps, that he had not noticed it before—a bit of metal attached to the other man's tattered garments. It was a badge. An official badge. A police badge of the city where he was to have been landed on his way to execution.

He stared at it and his hands clenched. More mockery. True deputy who'd had hi another man entirely.

The man of the isl pale under the scorc His hands quivered su bled among the other found it. A key ring, belt by a chain. A cylinder-lock keys. tag. And a small key takable. A handcuff k

The man of the isla keyhole of the lock fitted. With extraor turned it. It worked opened. He peeled it fr threw it violently into

THEN he stared dc whose life he had sa came quickly. Everyth Roll this man, still u the edge of the cliff an to suspect or identify suggest that he migh merely a survivor of t ship. Just roll this ma fore the already-visibl came up. It would give a victory, to be sure, b

But then the man clenched his hands a chance observe no rules they are all-powerful. knew him could be—a bility—on the wharf w ship docked and coul then and there. Or so him on the street. E now, fate or chance co and he would be helple

But now—now he h He'd cheated somethi satisfaction of its mali a blow at fate. And I tempted to withdraw improvise splints for And presently, when t opened his eyes, and w tled to discover himsel man of the island thre to grin savagely and the sky.

The rescue ship picke about sundown. And for even the fraction of ecutions or prisons or even of handcuffs. N later.

My Patient, Hitler

By Dr. Eduard Bloch, as told to J. D. Ratcliff

In 1938 Adolf Hitler returned triumphantly to Linz, the city of his boyhood, after an absence of thirty years

What does a doctor think when he sees one of his patients grow into the persecutor of his race? Here are the unique adventures of a Jew who had earned the "undying gratitude" of Adolf Hitler

II

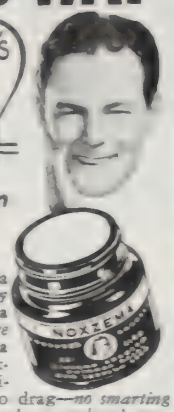
MOST immediately after his mother's funeral Hitler left for Vienna to attempt once more as an artist. His growth to manhood had been a painful experience for the boy who lived within himself. But more trying days were coming. As the family was, he had at least assured food and shelter while living at home. This couldn't be said of the years in Vienna. Hitler was entirely engrossed with the business of keeping body and soul together.

All through something of his life Hitler—how he worked as a hodcarrier on building-construction jobs until the men threatened to push him off the scaffold. And we know that he shoveled snow and took any other job he could find. During this period, for three years in fact, Hitler lived in a man's world, the equivalent of a flophouse in any large American city. It was here that he began to dream of a world remade to his pattern.

While living in the hostel, surrounded by the human dregs of the large city, Hitler says, "I became dissatisfied with myself for the first time in my life." This dissatisfaction with himself was followed by dissatisfaction with everything about him—and the desire to alter things to his own liking.

The vitriol of hate began to creep through his body. The grim realities of the life he lived encouraged him to hate the government, labor unions, the very men he lived with. But he had not yet begun to hate the Jews.

During this period he took time out to send me a penny post card. On the back was a message: "From Vienna I send you my greetings. Yours, always faithfully, Adolf Hitler." It was a small thing, yet I appreciated it. I had spent a great deal of time treating the Hitler family and it was nice to know that this effort on my part had not been forgotten.



Official Nazi publications also record that I received one of Hitler's paintings—a small landscape. If I did I am not aware of it. But it is quite possible that he sent me one and that I have forgotten the matter. In Austria patients frequently send paintings or other gifts to their physicians as a mark of gratitude. Even now I have half a dozen of these oils and water colors which I have saved; but none painted by Hitler among them.

I did, however, preserve one piece of Hitler's art work. This came during the period in Vienna when he was painting post cards, posters, etc., making enough money to support himself. This was the one time in his life that Hitler was able to make successful use of his talent.

He would paint these cards and dry

SHAVE THE NEW PAINLESS WAY

BARBERS KNOW WHAT'S GOOD—A BIT OF NOXZEMA BEFORE LATHERING

Famous medicated cream softens beard—soothes sensitive skin

● If you have a tough beard and a tender skin, try the trick used by scores of barbers. Just apply a little *medicated* Noxzema *before* lathering—or use it alone as a latherless shave. See how Noxzema soothes and protects sensitive skin . . . no razor pull—no drag—*no smarting after-shave irritation.* And notice how *cool* and *comfortable* your skin feels.

Start shaving the new Noxzema way *today.* For a limited time you can get a generous 25¢ trial jar of Noxzema for only 19¢ at any drug or department store.

them in front of a hot fire, which would give them a rather pleasing antique quality. Then other inmates of the hostel would peddle them. Today in Germany the few remaining samples of this work are more highly prized and sought after than the works of Picasso, Gauguin and Cézanne!

Hitler sent me one of these cards. It showed a hooded Capuchin monk hoisting a glass of bubbling champagne. Under the picture was a caption: "Prosit Neujahr—A toast to the New Year." On the reverse side he had written a message: "The Hitler family sends you the best wishes for a Happy New Year. In everlasting thankfulness, Adolf Hitler."

Why I put these cards aside to be saved, I do not know. Possibly it was because of the impression made upon me by that unhappy boy. Even today I cannot help thinking of him in terms of his grief and not in terms of what he has done to the world.

Those postal cards had a curious history. They indicate the extent to which Hitler has captured the imagination of some people. A rich Viennese industrialist—I do not know his name because he dealt through an intermediary—later made me an astonishing offer. He wanted to buy those two cards and was willing to pay 20,000 marks for them! I rejected the offer on the ground that I could not ethically make such a sale.

There is still another story in those two cards. Seventeen days after the collapse of the Schuschnigg government and the occupation of Austria by German troops, an agent of the Gestapo called at my home. At the time I was making a professional call, but my wife received him.

"Retained for Safekeeping"

"I am informed," he said, "that you have some souvenirs of the Fuehrer. I should like to see them." Acting sensibly, my wife made no protest. She didn't wish to have her home torn apart as so many Jewish homes had been. She found the two cards and handed them over. The agent scribbled a receipt which read: "Certificate for the safekeeping of two post cards (one of them painted by the hand of Adolf Hitler) confiscated in the house of Dr. Eduard Bloch." It was signed by the agent, named Groemer, who was previously unknown to us. He said I was to come to headquarters the following morning.

Almost as soon as the Nazis entered the city the Gestapo took over the small hotel in *Gesellenhausstrasse* formerly patronized by traveling clergymen. I went to this place and was received almost immediately. I was greeted courteously by Dr. Rasch, head of the local bureau. I asked him why these bits of property had been taken.

Those were busy days for the Gestapo. There were many things to be looked after in a town of 120,000 people. It developed that Dr. Rasch was not familiar with my case. He asked if I were under suspicion for any political activity unfavorable to the Nazis. I replied that I was not: that I was a professional man with no political connections.

Apparently as an afterthought, he asked if I were a non-Aryan. I answered without compromise: "I am a 100 per cent Jew." The change that came over him was instantaneous. Previously he had been businesslike but courteous. Now he became distant.

The cards, he said, would be retained for safekeeping. Then he dismissed me, neither rising nor shaking hands as he had when I entered. So far as I know the cards are still in the hands of the Gestapo. I never saw them again.

When he left for Vienna, Adolf Hitler was destined to disappear from our lives for a great many years. He had no friends in Linz to whom he might return to visit and few with whom he might exchange correspondence. So, it was much later that we learned of his wretched poverty in those days, and of his subsequent moving to Munich in 1912.

No news came back of the way in which he fell on his knees and thanked God when war was declared in 1914; and no news of his war service as a corporal with the 16th Bavarian Reserve Infantry. We heard nothing of his being wounded and gassed. Not until the beginning of his political career in 1920 were we again to get news of this quiet, polite boy who grew up among us.

Could This Be Adolf?

Occasionally the local newspapers would run items about the group of political supporters that Hitler was gathering about himself in Munich; stories of their hatred of the Jews, of the Versailles Peace, of nearly everything else. But no particular importance was attached to these activities. Not until twenty people died in the beer-hall putsch of November 8, 1923, did Hitler achieve local notoriety. Was it possible, I asked myself, that the man behind these things was the quiet boy I had known—the son of the gentle Klara Hitler?

Eventually even the mention of Hitler's name in the Austrian press was prohibited; still we continued to get word-of-mouth news of our former townsman: stories of the persecutions he had launched; of German rearmament; of war to come. This smuggled news reached responsive ears. A local Nazi party sprang up.

In theory such a party could not exist; it had been outlawed by the government. In practice authorities gave it their blessings. Denied uniforms, local Nazis adopted methods of identifying themselves to everyone. They wore white stockings. On their coats they wore a small wild flower, very much like the American daisy, and at Christmas time they burned blue candles in their homes.

We all knew these things, but nothing was done. From time to time local authorities would find a Nazi flag on Klara Hitler's grave in Leonding, and would remove it without ceremony. Still, the gathering storm in Germany seemed remote.

It was quite a while before I got any firsthand word from Ad

You Have Always Wanted Them!

Now You Can Have Them!

Read How You Can Have The Harvard Classics At An Extraordinarily Low Price and On Most Liberal Terms

Here is the greatest chance ever offered to own Dr. Eliot's Five-Foot Shelf of Books. Now this supreme library can be had at a cost per volume one-third the price of current fiction.

DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS (The Harvard Classics)

Dr. Eliot, Harvard's most distinguished President, has brought together in The Harvard Classics from his lifetime of study the pure gold of the world's literature. Dr. Eliot realized the need of a library offering everyone the culture which a university strives to give. THE FIVE-FOOT SHELF OF BOOKS is the magnificent result of his inspiration and knowledge. These volumes are the criterion of all literary selection. Through them people have found that the classics are far from dull—but intensely stirring—contain lively, stimulating modern thought with vital application to our everyday life.

NEVER BEFORE SUCH A BARGAIN

Brentano's, the famous booksellers, recently stated that for only the partial contents of The Harvard Classics in ordinary clothbound editions, the cost would be $402.00—yet in a beautiful edition, handsomely printed and illustrated, and uniformly bound, you can obtain these superlative writings at a fraction of that cost.

THIS COUPON ENTITLES YOU TO FREE BOOKLET

Send for the famous book, FIFTEEN MINUTES A DAY. It is yours without obligation and without cost.

about the popularity of *Anschluss* with Germany. The people favored it. They greeted the onrushing tide of German troops with flowers, cheers and songs. Church bells rang. Austrian troops and police fraternized with the invaders and there was general rejoicing.

The public square in Linz, a block from my home, was a turmoil. All afternoon it rang with the Horst Wessel song and Deutschland ueber Alles. Planes droned overhead, and advance units of the German army were given deafening cheers. Finally the radio announced that Hitler was in Linz.

Advance instructions had been given to the townspeople. All windows along the procession route were to be closed. Each should be lighted. I stood at the window of my home facing Landstrasse. Hitler would pass before me.

The Hero Returns

Soon the procession arrived—the great, black Mercedes car, a six-wheeled affair, flanked by motorcycles. The frail boy I had treated so often, and whom I had not seen for thirty years—stood in the car. I had accorded him only kindness; what was he now to do to the people I loved? I peered over the heads of the crowd at Adolf Hitler.

It was a moment of tense excitement. For years Hitler had been denied the right to visit the country of his birth. Now that country belonged to him. The elation that he felt was written on his features. He smiled, waved, gave the Nazi salute to the people that crowded the street. Then, for a moment he glanced up at my window. I doubt that he saw me, but he must have had a moment of reflection. Here was the home of the *Edeljude* who had diagnosed his mother's fatal cancer; here was the consultation room of the man who had treated his sisters; here was the place he had gone as a boy to have his minor ailments attended.

It was a brief moment. Then the procession was gone. It moved slowly into the town square—once Franz Josef Platz, soon to be renamed Adolf Hitler Platz. He spoke from the balcony of the town hall. I listened on the radio. Historic words: Germany and Austria were now one.

Hitler established himself in the Weinzinger Hotel, particularly requesting an apartment with a view of the Poestling Mountain. This scene had been visible from the windows of the modest apartment where he spent his boyhood.

The following day he called in a few old acquaintances: Oberhummer, a local party functionary; Kubitschek, the musician; Liedel, the watchmaker; Dr. Huemer, his former history teacher. It was understandable that he couldn't ask me, a Jew, to such a meeting; yet he did inquire after me. For a while I thought of asking for an audience, then decided this would be unwise.

Hitler arrived Saturday evening. Sunday he visited his mother's grave, and reviewed local Nazis as they marched before him. Not equipped with uniforms, they wore knickerbockers, ski pants or leather shorts. On Monday Hitler departed for Vienna.

Soon we were brought to a sharp realization of how different things were to be. There were 700 Jews in Linz. Shops, homes and offices of all these people were marked with the yellow-paper banners now visible throughout Germany, *JUDE*—Jew.

The first suggestion that I was to receive special favors came one day when the local Gestapo telephoned. I was to remove the yellow signs from my office and home. Then a second thing happened: My landlord, an Aryan, went to Gestapo headquarters to ask if I were to be allowed to remain in my apartment. "We wouldn't matter," he was told. "I by Berlin." Hitler, app membered. Then some that made me doubt.

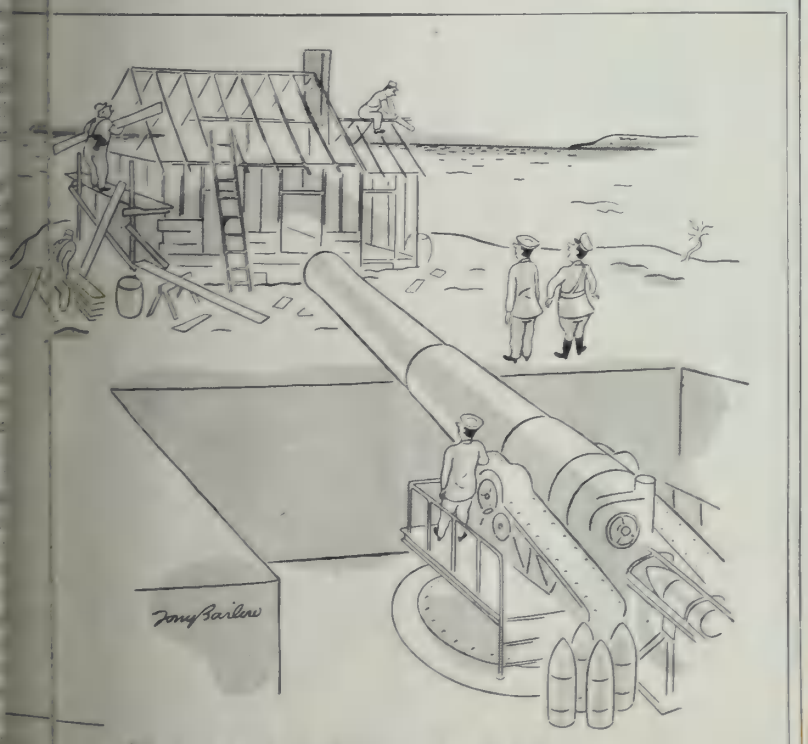
ssi Each time he has stayed
We zinger Hotel.

On the second visit the proprietor of the hotel was informed that Hitler's presence in town was not to be announced; that he would make his inspection tour in the morning. Delighted at having such an important personage in his house, the proprietor could not resist boasting. He telephoned several friends to give them the news. For this breach of discipline he paid heavily. His hotel was confiscated.

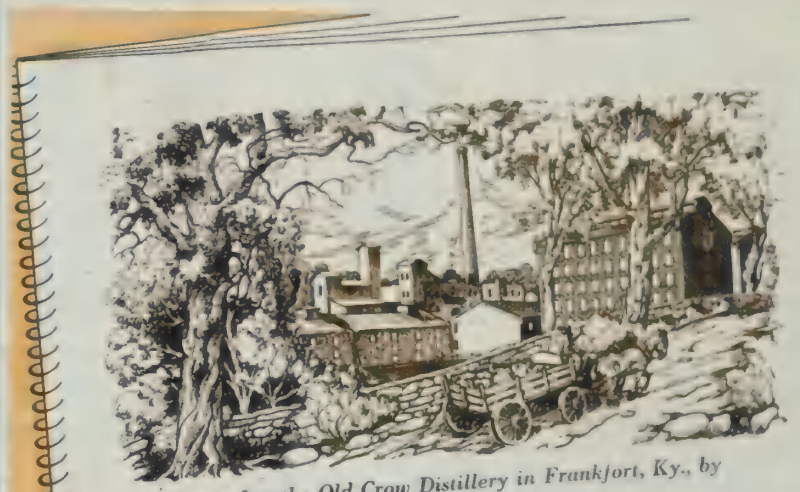
Many times I have been approached by Hitler biographers for notes on his youth. In most instances I have refused to speak. But I did talk to one of these men. He was a pleasant middle-aged gentleman from Vienna, who came from the government department headed by Rudolf Hess, of the Nazi inner circle. He was writing an official biography. I gave him such details as I could recall, and my medical records which he subsequently sent to Nazi party headquarters in Munich. He stayed in Linz and Braunau for several weeks; then the project terminated abruptly. I was told he had been sent to the silence of the concentration camp. Why, I do not know.

When it finally became my turn to leave Linz for America I knew that it would be impossible for me to take my savings with me. But the Gestapo had one more favor for me. I was to be allowed to take sixteen marks from the country instead of the customary ten!



The Nazi organization of physicians gave me a letter, of what value I do not know, which states that I was "worthy of recommendation." It went on to say that, because of my "character, medical knowledge and readiness to help the sick," I had won "the appreciation and esteem of my fellow men."

A party official suggested that I was expected to show some gratitude for all these favors. Perhaps a letter to the Fuehrer? Before I left Linz on a cold, foggy November morning, I wrote it. I wonder if it was ever received. It read:



"Your Excellency:

"Before passing the border I want to express my thanks for the protection which I have received. In material poverty I am now leaving the town where I have lived for forty-one years; but I leave conscious of having lived in the most exact fulfillment of my duty. At sixty-nine I will start my life anew in a strange country where my daughter is working hard to support her family.

"Yours faithfully,
"Eduard Bloch."

"Good Lord—I always thought that property belonged to the government!" TONY BARLOW

The Hit-Run Error

THERE used to be a theory that hit-run drivers' consciences would torture the tar out of them for the rest of their lives after they had run down and killed or maimed somebody and taken it on the lam without reporting the accident or rushing the victim to a hospital, and that this inner torment would be punishment enough.

Maybe; but this pleasing theory hasn't cut down the yearly hit-run fatality and injury totals so that anybody could notice it. Most hit-run drivers seem to cope manfully with their consciences. Naturally they don't tell other people what miseries their souls endure, if any. So it looks as if conscience as a hit-run curb is out.

Anyway, there were about 1,450 hit-run fatalities in the United States last year, plus more than 20,000 efforts to run out on accidents causing personal injury, plus more than 300,000 attempted skips-without-trace from accidents where property alone was damaged.

We feel entitled to hope that the news reported in Myron M. Stearns' article, "Catching Hit-Runs," in a recent issue of Collier's may help considerably in turning back the hit-run tide.

The gist of Mr. Stearns' news was this: that because of better and better police and detective work on these cases almost all over the country, it is becoming more and more of an error all the time to hit and run.

Some of the stories Mr. Stearns told would spark a gleam of admiration in the eyes of Hercule Poirot or Sherlock Holmes. Bits of paint or shreds of tire or fragments of windshield found near the scene of the accident have frequently led to the arrest of the hit-runner days or weeks later; the spectroscope is a wicked weapon in the hands of a John Law who knows its uses; so is horse sense applied to various quirks of human nature under stress of fear and excitement; so is the old reliable fingerprint procedure.

The most dramatic result of this fast-growing police expertness in hit-run detection is that 4,186 serious-accident hit-runners were caught in one year, out of a total of 5,499, in the widely separated cities of Dayton, Knoxville, Miami, Louisville, Detroit and Greenwich, Conn. Evanston, Ill., caught 94% of its hit-runners.

It always was and always will be the decent, honorable and humane thing to stop when you've been unlucky enough to hit somebody, do everything you can to repair the damage, and face what music may come thereafter. It is becoming more and more the common-sense thing, as more and more hit-runners are tracked down.

If judges everywhere will take to cooperating with police by soaking convicted hit-runners plenty in the way of both fines and jail sentences, we ought to make real progress in the next few years in cutting these highway atrocities to the irreducible minimum.

The Answer to Str es

FROM William M. Leiserson of th Nation Relations Board comes a detailed n for the strike problem through the prese natio gency.

Dr. Leiserson is against extreme sche s for or curtailing the right to strike. So, we t eve. who has more than a superficial knowled of relations. The gist of the Leiserson sug stion extend throughout United States indu the principle of the Railway Labor Act.

That principle, the mainspring whic nakes work so well, is the waiting period betw h the of workers' indignation boils up over som eal or injustice and the time an actual strike oc s. Dur period, RLA experience has shown, passi are likely to cool off on both sides; and befor at per a fair settlement is extremely likely to be ached.

Can't we get going on such an arr gement soon? There should be appropriate en ing leg after which labor, capital and governmer hould bringing order and good will out of t present of strike threats, hurried settlements, asional strikes, etc.—all to the accompaniment confus inflammatory screams from extremist by nders.

As we've said before, we believe labo being as otic as anybody else, will welcome any fa lan for strikes to a minimum while this emerge lasts.

nc his Smile is Bright and Winning—thanks
rgely to his Faithful, Everyday use of Ipana and Massage.

Let Ipana and Massage help make your smile more sparkling... by aiding you to have healthier gums as well as brighter teeth

Q. *Why are children today apt to have brighter teeth and firmer gums than their parents?*

A. Because nowadays many children are taught in their classrooms a significant dental lesson that many parents still have to learn . . . the great importance of *gum massage* to bright, sparkling teeth.

Q. *What happens if gums are neglected?*

A. Neglected gums tend to become weak and tender . . . for today's soft, creamy foods deny them the exercise they need for health. And, often, gums signal their weakness with that warning tinge of "pink" on your tooth brush.

Q. *Does "pink tooth brush" indicate serious trouble?*

A. That is for your dentist to decide. He may merely say that your gums need stimulation and work. And, like so many dentists these days, he may suggest "the healthful stimulation of Ipana Tooth Paste and massage."

Q. *How often should gums be massaged?*

A. Faithfully, every day. Each time you brush your teeth massage a little extra Ipana onto your gums. For Ipana Tooth Paste is specially designed to do more than clean teeth to brilliant, natural lustre. With massage, this unique dentifrice aids the gums to better health. That is why this sensible dental habit of Ipana and massage is a great aid not only in helping you to have firmer gums and brighter teeth . . . but also in protecting you against "pink tooth brush."

ANY WEEK

THE most startling news we've received this week is that hell has been abolished. It happened in 1923, the result of seventeen years of prayer and negotiation by Aaron the Peacemaker, otherwise Mr. Aaron Miller, pastor of the Clothespin Church, Indianapolis, Indiana. Apparently Mr. Hitler got word before we did and proceeded to prove what philosophers have long contended—that if there were no hell, some guy would make one. We'd like to regard the tidings Mr. Miller sends us as good news, but we're having trouble. We're particularly doubtful about the benefits growing out of that part of Mr. Miller's notice that "God took Satan out of hell arm in arm and sin will gradually disappear." This strikes savagely at our bread and butter, it having been our work for years to take wild journalistic swings at sin while admittedly committing a few choice ones ourselves. Moreover, Mr. Miller has taken quite a chunk of joy out of life—the thrill of breaking the moral law and artfully hoping to get away with it. There will be people, of course, who will not agree that Mr. Miller has made God and the devil tolerant of each other and we think that we'll string along with them. Nevertheless, we're trying to be broad-minded and the next time we're in Indianapolis we're going around to the Clothespin Church and talk to Mr. Miller about it.

PERHAPS we mistook certain signs for mere incidental phenomena. The new courtliness that is being absorbed by the lads in the Civilian Conservation Corps, for example. We ran across this while reading Sho-Me, the magazine of the Missouri district of the CCC. The Corps calls it Everyday Etiquette and we may as well give you a few of the more elegant rules. As for Making Up or Manicuring in Public: "For men this is naturally of no significance. For women, please don't. Better to look a little unglamorous than to advertise that your charm is synthetic." The next item is about Double Callers: "Have some regard for the lady's feelings. The first caller should bow himself out gracefully unless he was on location by appointment. The anteroom to a lady's boudoir is no place for a fight." Then comes the CCC ruling on Assistance with Accouterments: "Always assist your feminine companion with her coat —even if you're mad at her. As for your own coat, and if there is no butler or waiter to perform the rites, you should undertake the task unabetted by the lady." And there's another on Theater Entrances: "If there is an usher the proper chronology is (1) usher, (2) lady and (3) you. If there is no usher, you go first, particularly if the seats are not reserved."

WE ARE chided by Dr. Jacob B. Adler of Brooklyn, New York, for publishing a photograph of a college student resting one of his feet on a textbook titled The American Government—one of the illustrations for our recent shoe-style pronouncement, Feet First. The doctor says The American Government "is not the proper thing to step on." We are reprimanded by a large part of the population of the Uncompahgre Valley because we printed a desire of one of our friends to live in the valley because of its peace and tranquillity. The place is better even than we thought. From Mrs. Edna W. Rawson, secretary of the Montrose County (Colorado) Chamber of Commerce, we learn that the valley has "chapters of the A.A.U.W., the D.A.R., is well represented in Who's Who, and you can find F.F.V.'s but no Reds or fifth columnists." A lady in Philadelphia, Pennsylvania, wishes us to investigate conditions in "an Army which drafted my son and, although it is well-known to the officers, permits his comrades to call him Stinky." A Christian gentleman informs us that he has trapped us. He has long suspected us of being "pro-Nazi and anti-Christ." And now he knows that we are, because some fifth columnist in this office has declined his offer to conduct a "weekly church page" in this magazine. Three in a row like that take a lot out of a guy. But the next letter is from our Hollywood agent, Mr. Richard English, who has discovered that Mr. Alex Gottlieb, who recently finished a movie for Universal Pictures—Buck Private—is building a house. The house has a cornerstone. In the cornerstone are the newspaper reviews of Buck Private. But our luck immediately flopped back to the dark side: Large numbers of you are bawling us out for writing that Charlotte Cushman, the American actress, died in 1776. The lady died in 1876. We wrote it right but the printer must have been thinking of the Lend Lease Bill's purely coincidentally patriotic number. This is the first time we've ever got into a squabble about the year of Charlotte Cushman's death but we suppose that it was inevitable that we should have got around to it eventually. Finally, we'd like Mr. Jerome F. Nuslet, of Bayonne, New Jersey, to know that we don't care what rabbits weigh. Mr. Nuslet claims that somebody in this magazine said that he saw rabbits weighing twenty-eight pounds. Mr. Nuslet says he didn't. Inasmuch as we have to be careful [illegible] language in this depart[illegible] have to imagine what [illegible] what rabbits weigh.

IT IS with some regret th[illegible] Mrs. Julia Gatherun of [illegible] bama, that we can't tell [illegible] the vast army of war [illegible] and experts to believe. CREATORS OF FAMOUS CIGARETTES FOR 93 YEARS. ALWAYS UNDER THE PHILIP MORRIS NAME

Short bits of yarn fastened to wing surfaces help test pilo to determine airflow and stalling point of new fighter plan

THE winning of industrial spurs has made names upon the map of the United States—Oneida, Hershey, Bessemer, Gary, Universal City. Dozens more. Now aviation, youngest and most exciting and debated industry, gets its first atlas recognition.

The Long Island Railroad has established and scheduled a new station: "Republic, New York."

This is named for the company that manufactures one of the Army's newest fighters—the Republic "Lancer," P-43. According to Army methods of designating ships, P-43 means this is the 43d standard model of a pursuit type that has entered the Air Corps Service.

HALF a dollar's worth of ordinary knitting yarn of the kind your wife uses for household jobs, and thirty cents' worth of the sort of adhesive tape she uses to seal the packages you mail for her, play an essential role in the testing of modern fighting aircraft.

Hundreds of short bits of the yarn are pasted in orderly design to the tops of the wings, until at first glimpse you wonder if either a barber or a herd of goats shouldn't be added to the hangar staff.

The test pilot from his seat observes the behavior of this "hair coat" in the course of his studies, in flight, of the "stalling" and "airflow" characteristics of a new plane.

As you know, a plane's forward speed relative to the air produces "lift" and other forces necessary to control flight. Stalling is the condition when you lose forward speed and consequently lift. Gravity is the strongest "force" then operating upon your plane, which "falls" until it regains speed. Sensitive pilots feel a stall first in their t'other ends. That is why old-timers say you "fly by the seat of your pants."

Skill in detecting the approach of stalls, and in preventing or correcting for them, also thorough cataloguing of stall features and experiences, all go toward building up safety in the air. Therefore, to know the exact speed at which any given type of airplane will stall is of the utmost importance in assaying its nature.

In normal straight and level flight, then, with the airflow coming over the leading, or front, edge of the wings and proceeding smoothly over them toward their trailing, or rear, edge, the yarn tufts will flow toward the tail. Just as, for example, strings tied to t a boat which is chugging u against the current would cl hull and flow toward the stern

Stalls may occur along the e edge, or in different places o ferent times; for instance, end or tip of the wing first. A when the test pilot maneuve to produce a stall, he can te cise instant and location of it tion of the yarn. The little over, from back to front, be direction of the airflow over has changed. It's as though the river started to back up.

By correlating the stall dat speed and other factors sho instrument panel at the sam the pilot builds up knowlec plane's traits.

Bomber Pilot Eric Walsh spent his leave with Quentin Reynolds in London. While Quent worked Walsh got a few lessons in bombing—receiving end

BOMBER PILOT

By Quentin Reynolds

Young Eric had dropped hundreds of bombs, yet he didn't know how a bomb explosion sounded. Our London correspondent introduces another hero of the Royal Air Force

VAS the first time the kid had been Lond since the blitz began. I'd t him when I was visiting a coastal nand ation and had told him to with e if he ever got to London. ry ga him a leave and he headed rd th big city. We had dinner in staura t three stories below the t sur e and it was very quiet. we w t to bed. The kid woke me t thr in the morning and he d wo ed.

ow c you sleep," he said, "with bom falling all around?"

at pu led me. The scream of a wak you up, all right. But there no b bs falling now. High above could ear the drone of airplanes and the guns were blasting, but there were no bombs.

"Listen to them," the kid said excitedly. "They're dropping all over."

Then I realized what was wrong with the kid. He hadn't been in London. He hadn't heard our nightly concerts. He hadn't heard any bombs fall.

"Listen, kid," I explained patiently, "they are not bombs you are hearing. They are guns—big guns. They don't sound anything like bombs."

"Guns?" He was incredulous.

"You are a bomber pilot, kid. How many bombs have you dropped in the past seven months?"

"I don't know," he said. "Eight or nine hundred, I guess."

"And don't you know the difference between the sound of a gun and a bomb?"

"I never heard a bomb explode," he said miserably. "If I drop 'em when I'm diving at full throttle the noise of the motor kills everything else. When we do ordinary precision bombing we're a mile away before the bomb lands. I never heard a bomb explode."

"Well, stick around, kid, you will. Now get back to sleep. I'll wake you up if a bomb drops."

The kid went back to sleep. Three nights later we had a very bad time in London. They gave London a real shellacking. But now the kid knew about bombs—or thought he did. I was working and he was reading a book. One dropped pretty close. It was followed by five more—Jerry had dropped a stick of six. All close.

"That's enough, kid," I told him. "Let's go down to the bar and have a drink. We're on the fifth floor. If they're dropping them that close we're too high up. Let's go down below until it cools off."

The kid laughed. "They weren't bombs, sucker. They were guns. Big guns. Can't you tell the difference between a gun and a bomb?"

Just then another one whistled down. It started very high and you could follow it all the way down. It landed just at the back of my apartment house and the whole building swayed. We just sat there taking it. And then the lights went out.

"Maybe you were right," the kid said. "Maybe they were bombs."

We went down below and they had candles there and not all of the bottles were broken. So we sat down and had a couple of drinks and the kid got to talking. He got to talking about Toronto, where he came from, and about his father who was a shoe manufacturer and about his brother Arch, "best damn"

(Continued on page 71)

Home-Town Boy

By Naomi Lane Babson

ILLUSTRATED BY GILBERT DARLING

The horse and the girl were man killers. He knew about the horse, but the girl was a big surprise

FROM the top of the hill Rusty Reed could see the Jerris valley spread out as flat as a floor with the green lines of the cottonwoods and willows marking the watercourses. Seen from here the village was almost hidden in trees, but he remembered the wide main street down there and the narrow, dusty side streets; he could call to mind mighty near every building in the place from the schoolhouse where he'd finished his education clear to the last gas station on the West Yellowstone Highway.

Up to about a year ago the valley had been home to Rusty, as much as he could ever claim to have a home. He'd stayed better than six years with old Mr. Walters at the Lazy-Y, ever since he was thirteen or so, and back of that was only the orphanage: long, dull days and weeks and years, as gray in memory as the oatmeal porridge they used to get for breakfast every morning. After the home, anybody would've liked the ranch: the only wonder was he hadn't stayed contented there, instead of getting the itch to leave and try a different kind of life.

The jaloppy was hot. Doing all right, though, for a forty-dollar bus. When Rusty pulled to the side of the road and stopped the engine he still heard wheezy gurgles deep inside. "Calm yourself, old lady," he said, and got out to look at the horse in the homemade trailer, a four-year-old pinto mare, not much on looks, but a top cow pony when she chose to be. She was his own, a gift from Mr. Walters long ago, and she had helped him break a record for calf roping, down in Texas, but right now, with her ears laid back and her eyes rolling, she looked unhappy and malevolent both. "You also calm yourself, Patchwork," he said. "We're almost there."

He rolled a cigarette and lit it; smoke rose up in a tiny cloud and lost itself against the illimitable blue sky. The air was so clear today that even the mountains looked flattened out under the vast dome over them. "A large order of weather," Rusty thought. "Swell for the rodeo."

Last year it had been different. Last year the Jerris rodeo had been almost rained out and, one way of looking at it, that was what had put him here today. Because a lot of the boys walked out before last year's show, the purses not being big enough to make them risk their necks on the slick mud of the field—not with shows coming on in bigger towns where there was a chance for real dough.

But Rusty stayed, being a local boy, and only out for the fun of it, at that time. It wasn't till he won first money and heard the cheers and the clapping, and felt the deep, warm prickle of pride starting somewhere in his midriff that he got other notions. In the end he'd given up his job at the Lazy-Y and started following the rodeos, drifting toward the south as winter came along. He had been clear to Mexico, and now was nearly home again, but not to stay. There was excitement in this life, the thrill of danger, the chance of big prize money if a guy was lucky.

"You poor darn' fool," was all old Walters said. "I planned things nice for you."

He meant it, too. Walters was square all right. He'd treated Rusty princely ever since he took him from the orphanage to do chores for his board and finish schooling. He started paying wages a year before he had to;

...e knew that Plain Jane liked his looks and the kind of strength ...e felt in him; a spark of excitement crackled between them

he'd given him the colt, and then—"planned nice." That meant the old man knew about Loretta and was willing. Suddenly Rusty was thinking of the cabin by the creek, the way the willows grew around it, shutting it off from the bunkhouse and the big ranch house, too, making a kind of private little yard. Loretta had looked at the cabin once—she said it would be cute with a flower garden out in front and some red window curtains. . . .

Rusty's lips puckered up into a soundless whistle; he stepped on the glowing cigarette butt in the road, climbed into the car again and started down the hill. He guessed he could do better for a girl than any two-room log cabin.

But not just yet. He hadn't much of anything to show for his winter's work; he had been in the money only a few times. Fellow has to get a start, he thought, going downhill in low because his brakes weren't anything to pin blue ribbons on. . . . He hadn't done so bad, either, even if not as well as he'd have liked. Breaking the calf-roping record—that was something. Give him a little luck and he'd make the big shows yet. Madison Square Garden . . . Maybe the movies. Such things could happen, so why not to him? If it was flowers Loretta wanted, Hollywood ought to be the place for her.

HE WAS in town now and the wide main street looked gaudy and unreal, thanks to the carnival element brought in by the rodeo. Street booths were getting trimmed up, ready for evening trade, and there were a lot of out-of-town cars around. From one of them a voice was shouting through a loudspeaker, talking up the cowboy dance that night, and Rusty thought about Loretta again, and he looked toward the cafe as he went by, wondering whether she was on the job, but he didn't want to stop till he had made camp.

A mile the other side of town he found the place he wanted, a little meadow with water running through it, and plenty of grass for Patchwork. It was off the highway, just enough hidden so most people didn't even see it, which suited him to a T. But while he was getting Patchwork out of the trailer another car turned down from the main road.

"Room for two?" the driver asked.

"It ain't my property," Rusty began, then his look changed and he grinned a welcome. "Chuck Barrus, ain't it? Sure, come on. They's lots of room."

Because Chuck was a real guy and no mistake about it. He'd stuck till the whistle blew on more bucking broncos than Rusty could call to mind right at the moment; he could've been right up there at the top if he'd gone out for it, but he always claimed he hated the business and meant to quit while he still had a backbone.

"Thought you were signing off, here a year ago?" Rusty said.

"Sure was." Chuck climbed stiffly out of his car and stretched himself. "Long trek from Miles City," he said, and then returned to the question: "Sure was going to quit. But the fact is, I got hitched last summer, and she's in the hospital now with a boy—nine-pounder, he was! And, uh—if I'm lucky, we can use the money."

"Well, I bet," Rusty agreed. The words seemed less than adequate to the big announcement, so he went on after a moment: "Another little broncobuster come to town."

"Not if I have the say, there ain't," Chuck declared. "I'd a darn' sight sooner see him herding sheep."

"Yeah, you would!"

"Why not? It's better than raising up another Little Willy."

There was a moment's silence and, without wanting to, Rusty found himself remembering Willy Stokes, a near champ rider of some years ago. Folks said that Little Willy had broken every bone in his body and some of them twice, besides scrambling all the wits he ever had. Nowadays no one would mount him but he turned up at rodeos just the same, and hung around the chutes cadging for small change, drinks and cigarettes; sometimes he was allowed to pull an act—clown stuff of one kind or another. Last year they'd had him riding on a goat.

"I see you got your own pony," Chuck said. "Calf roping, eh?"

"That's right."

"Riding broncs, too?"

"Not this time. I'm one of these here specialists." But Chuck was smart enough to see through that, and know that a fellow might not always want to pay two entrance fees.

After the pinto was cared for, cleaning up took a while. Rusty had a new shirt to wear and a new silk handkerchief; his wide-brimmed hat was in the back of the car. When he was ready at last he took a squint in the windshield mirror, and couldn't honestly proclaim himself dissatisfied. "Going to eat?" he asked.

But Chuck already had a campfire started and was taking tins of food and a frying pan from his car. "It's cheaper this way, big boy, which you'll find out if you stay long in this game."

There were a sight more cars in town by the time Rusty got back there; so many of them around the restaurant that he had to park almost a block away. For a minute he thought how it was in normal times, in the winter say, twenty or thirty below zero, snow creaking underfoot, all the windows frosted, and the red and blue neon lights at the drugstore looking garish and unimportant underneath the stars. Something stirred in him, kind of a pang like homesickness. Pushing the screen door open, he went into the café.

HIS eyes found Loretta right away and she saw him, too, but she was busy with a customer and could only give him one of her long, slow looks and a little, tucked-in smile before she turned away. He found an empty place and let recaptured memories possess him for a spell. Everything was familiar here, the tan and yellow woodwork, and the clean, scrubbed table tops, the shelf of cigarettes and candy behind the cash register, the sign that said, "We only own the joint, you give the orders." In one of the booths he still could see the initial-carving job some of them had done after a high-school party a year or two ago. That was before Loretta went to work: she had been one of the crowd that night and it was the first time they had ever paired off together. Abruptly she was beside him, holding a menu card, a tall, stout, quiet girl, flushed now from hurrying. Her hair was just as brown and soft as he remembered and her eyes as steady.

"Hi-ya," he said. "You get my post card?"

"Sure. Why wouldn't I? The mails still run. . . . Pot roast is the best tonight."

"Okay. Say, what about the dance?"

"I got to work till twelve."

"Twelve's early."

"Not for me," she said.

Their eyes met. There was suddenly more between them than an argument over a dance—there was Loretta's unvoiced disapproval of his new way of life, her liking for quiet, simple things and the place where she was born, set against his nervous restlessness and wandering ambition. "Aw, come on. Let's have some fun."

She shook her head. "I can't tonight."

"Okay," he said, "if that's the way you want it." Fun went out of him and he

A Letter to Americans

By Charles A. Lindbergh

Charles A. Lindbergh, Lone Eagle of the transatlantic flight, asks searching questions in this eloquent article. Although Collier's does not agree with Mr. Lindbergh about the wisdom of aiding Britain, we take pleasure in presenting his powerful statement of the isolationists' position

Editor, Collier's

In California, a Lockheed bomber starts its trip to England—part of the "all aid short of war" that Mr. Lindbergh opposes

I ADDRESS this letter to every man and woman in America who is opposed to our country's entry into the European war. I write because we are being led toward that war with ever-increasing rapidity, and by every conceivable subterfuge. While our leaders have shouted for peace, they have constantly directed us toward war, until even now we are seriously involved.

I write to ask your immediate aid in maintaining the independent American destiny our forefathers established. I write to warn you that the men who entice us on to war have no more idea of how that war can be won than the governments of France and England had when they declared war on Germany. The interventionists call on us to fight, and then their responsibility ends. They offer no feasible plan for victory.

The situation in America today is alarmingly similar to that of France and England in the years prior to this war. There, as here, people let their emotions get the better of their judgment; and they had the same unwillingness to face realities. Both countries had refused to take part in a European readjustment while there was still time to make it peacefully. Both had refused to make the sacrifice that was essential for adequate rearmament. They, too, had cultivated the philosophy that it was necessary to defend someone else in order to defend themselves. How they could defend anyone else if they were unable to defend themselves, they apparently did not consider any more than we are considering today.

Their failure is now obvious, and stands out clearly before us. The imposition of "sanctions" did not save Abyssinia: but it threw Italy into the arms of Germany and sowed the seeds for the Axis. The threat of war by England and France did not save Poland; but it forced Germany and Russia into an alliance and precipitated a disastrous war. Adjustments that should have been made in peace and moderation were finally brought by war and resulted in immoderation. The failure to face realities in peace brought the curse of war on Europe. The failure to face the realities of war brought defeat to France and devastation to England.

WHEN the last war ended, the victorious Allies had two courses open to them. They could either have assisted Germany back onto her feet as a self-respecting nation, or they could have kept her in a weakened condition by the use of military force. But they followed neither of these policies. England and France wavered back and forth between the two, while the United States withdrew her armies and her politics to the Western Hemisphere — avowedly forever.

During the years immediately succeeding the last war, Germany was held down with an iron heel. The terms of Versailles were the terms of a military victory, and when Germany defaulted on her payment of reparations, French troops occupied the Ruhr. But during the following two decades, I
cided to disarm, while Fra

n would break upon the
. In England, there was no
volution, but the people of
had never adjusted them-
selves to the tempo of this modern era. Their minds were still attuned to the speed of sail rather than to that of aircraft. The way of life in England was ideal for times of peace, but fatal for a modern war. In Germany, on the other hand, one found a nation that had risen from the prostration of a previous defeat—a nation less tolerant, less satisfied, than its neighbors; a nation fully trained for war, and nurtured on the philosophy that right is inseparable from might.

The true facts of the European situation had been hidden from the people of England and France. They were not adequately informed either of Germany's strength or of their own weakness. Politicians and idealists harangued them about stopping aggression, about defending freedom and democracy, about maintaining their way of life, but the realities of modern warfare—the elements that spell failure or success—were seldom discussed. The orators shouted: "We must stop Hitler." The newspapers echoed: "Down with the Nazi regime." The people of France and England resigned themselves to the inevitability of war. But not a single man told how to break the Siegfried Line.

I can best illustrate the attitude in the democracies of Europe by telling you of a conversation I had one evening with a French businessman on the outskirts of Paris. He had been talking for nearly an hour about the inevitability of war, and why German aggression must be stopped. He advocated a declaration of war by France.

"What would your first move be?" I asked him.

"We must fight the Germans," he replied.

"But how?" I asked him. "Do you think the French army can break the Siegfried Line?"

He looked startled, then sank back into his chair. "Oh, I don't know about that," he answered. "That's up to the military men."

A WEEK or two later, I was having lunch with one of those military men—a general in the French army. I asked him if he felt that the Siegfried Line could be broken.

"No," he replied, "I don't think so." And then added: "But if it could, the cost would be too high."

"What's the answer then?" I asked. for the war drums were beating loudly.

He shrugged his shoulders. "If only they had let us attack when we wanted to," he said. "When we could have won, the people would not fight. And now, when we cannot win, they want war."

France waited until it was too late. England waited until it was too late. We in America have waited until it is too late; and yet we step closer and closer to the war, as though hypnotized by its bombing and its fury. Like France and England in 1939, we are unprepared today. We have not as many thoroughly modern fighting planes in our Army and Navy combined as Germany produces in a single week; and our Army is deplorably lacking in such essential items as tanks and antitank cannon. We have not made the sacrifice necessary for adequate rearmament. We, too, have cultivated the philosophy that it is essential to defend someone else in order to defend ourselves. *Our* politicians and idealists harangue *us* about defending freedom and democracy, and our way of life. *They* are now shouting, "We must stop Hitler." *Our* newspapers echo "Down with the Nazi regime." But not one feasible plan has been offered us for an invasion of the continent of Europe. With the disaster of France and England fresh before us, we are following the selfsame path.

We, in America, are being led to war by a group of interventionists, and foreign interests, against the will of a majority of our people. Every poll of public opinion has shown that from 80 per cent to 95 per cent of Americans are opposed to entering this war. Both the Republican and Democratic parties were forced to incorporate antiwar planks in their platforms. Both presidential candidates were compelled to take a stand against our intervention. Yet today, although no one has made an attempt to attack us, we already have one foot in the war. We have even now entangled "our peace and prosperity in the toils of European ambition, rivalship, interest, humor and caprice."

(FOR THOMAS

Charles A. Lindbergh

WHAT has happened to us? How was this condition brought about? The procedure has not been dissimilar to that which took us into the last war. When hostilities in Europe began, it was fully realized by the foreign interests and interventionists in this country that the great majority of Americans stood firmly opposed to entering the conflict. These interventionists knew that it was useless for them to advocate openly a declaration of war by America. They therefore adopted a more subtle plan. They believed that while the people of the United States would not agree to a declaration of war, we could be beguiled into supporting steps that would inevitably lead to war. Consequently, instead of advocating war, they advocated steps which they called "short of war"—steps which have already entangled us, and which will leave us no alternative to war if we continue to take them. The policy of the interventionists has been, from the beginning, to support every movement that would lead us in the direction of war, and to oppose every movement that would not—always under their mask of "aid short of war." I have listened more than once to interventionists in America discuss the question of what steps "short of war" would take us into war most quickly.

To be specific, soon after war was

Informally Yours

By Henry L. Jackson

THE people who Emilypost men's cloaks and suits say it's all right now to wear your country week-end clothes to business. Within reason, of course. No play suits, no flannel shirts, no knit ties, no rope-sole shoes. But lightweight tweeds and gabardines—okay.

Informal flannel and covert suits become citified when you dignify them with the right accessories, dressy business shirts and regular town hats. There's one concession you can make, however, to the flora and fauna of East Milkstop: neckwear may be gay, colorful.

Keep the coat and pants in the same family. The odd jacket is an acceptable uniform for a station wagon, but on the hard city sidewalks, uh-uh!

The single-breasted suit is best for this semisports, double-action use. Try a Glen Urquhart pattern, with a bright overplaid, or a striped flannel. An easy-fitting suit in solid colors will give variety to your summer wardrobe.

For the cool of the evening, a covert topcoat will keep you comfortable in town or country, but be sure it's a loose, casual model—not form-fitting. And if the country air is a few degrees cooler than the city, blend a sweater into your ensemble.

For pampering pigeons or any other informal town activity—the office, for instance—you won't go wrong with semisports clothes. The covert topcoat at the left is casual, easy-fitting. So is the suit at the right, a lightweight worsted flannel. The inset photographs show the effects achieved by various color combinations: No. 1, blue-and-white striped broadcloth shirt, electric blue foulard tie with a white overall pattern, blue-gray chalk-stripe suit, all set off by the olive drab of the topcoat. No. 2, pale yellow broadcloth shirt with navy-spotted, corn-color tie blue-bordered handkerchief and gray-blue su

PHOTOGRAPHS FOR COLLIER'S BY IFOR THOMAS

Study in mutual approval. The young week-end loafer at the left has eased into a gabardine suit, an oxford shirt, a foulard tie and a drink on the house. The other guest is completely at ease in a Glen plaid. Close-up No. 5, silver-gray twill shirt with blue wool tie and blue foulard handkerchief, all matching up with the gray plaid with blue overplaid. No. 6, yellow oxford shirt with white stripes, parchment tie with contrasting color, natural color gabardine suit

Unscheduled event in the life of two guys going places on a fine spring day. That ticket is bound to wind up in style, in either the double- or single-breasted semisports suit, which won't ease the pain a bit. Insets give you the color combinations: No. 3 shows the effect of a tan Glen plaid shirt with harmonizing striped tie and foulard handkerchief, plus a natural-color lightweight wool sweater. Suit is natural covert. No. 4 sets against the natural-color Shetland herringbone suit a tan-and-white candy-striped oxford shirt, a brown, red and yellow India silk tie, complementary handkerchief

At the Officers' Club, Lieutenant Roger Collins, Captain Hartney's aide, knocks Bert Sedden down, after listening to some of his pacifistic utterances. Bert does not defend himself but his father enters and, realizing what has happened, gives Roger a punch on the jaw—a punch which the lieutenant acknowledges with an "I'm very sorry, sir." He bows and leaves the club.

Both Kirstell and Phyllis witness the incident. And Kirstell strongly suspects that Bert is the man he is after. He instructs Phyllis to see as much as she can of Prentice, who, according to headquarters, is one of Bert's friends.

Phyllis soon learns that the two men are close friends—and have been for a long time. She discovers that they think in much the same terms. So the name of Dutch Prentice goes on her suspect list. But Savvy Roberts—to whom she is strongly attracted—assures her that both Bert and Dutch are all right, trustworthy. Phyllis believes Savvy is being duped by Dutch.

Mrs. McMatthews, a gossip, telephones Phyllis. She says that "that Briscoe woman" (an officer's wife) is spreading the news that a traitor is at large at the post, and that certain persons are trying to frame her husband—to get him out of the service.

V

THERE are times when any woman must feel grateful for that ancient heritage of her sex—the ability to lie easily and without an instant's hesitation.

"What nonsense, Mrs. Mac," I said. "You shouldn't even repeat such tommyrot!"

"But she's *telling* it, Phyllis—"

"She won't tell it any more. I'll guarantee that! If you hear anyone quote Mrs. Briscoe, say it is a contemptible falsehood. The woman must have lost her mind!"

"*I've* said all along she was crazy—"

"Loony! Out of her head. Stark mad."

"Your father must *take definite action*—"

"He will. Don't worry. Goodby, Mrs. Mac."

"But, *Phyllis*—"

I put down the receiver and turned from the phone to find Roger at my elbow.

"What's that Briscoe woman done now?"

"Oh, nothing . . . just some more mean gossip . . . I'll fix *her!*"

"Who's she after?"

"A catfight with some of the women," I said, desperately. "You've got to run along, Roger. I want to clean up for dinner."

Roger still wanted to play Sir Galahad. "I think I know what it is," he said. "I'll have a talk with Briscoe."

"No, no—you keep out of it—"

Fortunately, my father walked in the front door just then.

"Hullo, Dad," I said, quickly. "Roger is just leaving, so don't ask him to stay and have a drink. He's had one and I want to get rid of him!"

Roger grinned. "That's plain language, isn't it, sir?" he said.

The skipper smiled at Roger and slapped him on the arm with fond indulgence. "Go, my boy," he said, "an order is an order!"

"Right, sir!" Then: "Roberts insists on starting that test at four in the morning."

"Very well. I'll be there."

"An ungodly hour. Why don't you ask him to—"

"No, it's all right. The Jap fishing boats won't be so thick."

"Aye, aye, sir. See you later, Phyllis!"

The skipper looked at me, the deep lines of his face crinkling quizzically. "On pins and needles, eh, Phyl?"

"Yes, sir!"

"Well?"

"Come in here—where we can shut the door!"

He followed me into the library. I shut the door and, standing with my back against it, blurted out what Mrs. McMatthews had said.

RED PANTS AIN'T N

By Roark Bradford

ILLUSTRATED BY WILLIAM MEADE PRINCE

The two times in his life when B'r Charlie tried to o of thinking, the Lord had to act quickly to save

PEOPLE who rated B'r Charlie as a "strickly no-good" were not entirely accurate in their estimate of the one-legged preaching blacksmith of Little Bee Bend plantation. Giles, the foreman, admitted B'r Charlie could sharpen a plowpoint better than anybody in the Red River bottoms, provided he devoted his entire attention to the job. And the Widow Duck conceded there were moments in the life of her pastor when he gave his whole soul to the unselfish betterment of mankind.

"O' cou'se," she would add, "no good ever come f'm B'r Charlie's thinkin', but to give de devil his jues, sometimes B'r Charlie do set down and do his best."

The trouble with B'r Charlie's mental efforts was the fact that his brain was not nearly as sharp as were the plowpoints he hammered on his anvil. From long practice he could tell by the ring of the metal, the feel of the hammer as it struck and the smell of the heat from the forge when a point was ready to be ducked into the cooling tub and dropped into the box, ready for use. But when his brain was at work, B'r Charlie got no instinctive reaction. There was no beaten trail over which a thought could travel, picking up slickness and maturity as it rolled through mental pools of experience until it emerged a complete, well-rounded idea. A thought in B'r Charlie's mind bumped through the uncharted wilderness of unused cells until it died of weariness or emerged dented and twisted out of all semblance to a thought.

People still laughed at the last time B'r Charlie had tried to think. It was back yonder before the government got interested in cotton raising. The price was four cents a pound and times were so tight that a man had to work a vegetable garden in addition to his crop if he wanted to have enough to eat. The bossman was constantly urging everybody to take care of the mules and plows because there was no money for replacements; and Giles was demanding a full day's work "in high gear" from everybody on the place.

"Hit takes a heap er fo'-cent cotton to buy sixteen-cent meat," Giles had explained.

B'R CHARLIE had caught the spirit. Although keeping the plowpoints sharpened occupied his full day, he was seized with a feeling of inactivity. He wanted to help. For a whole week he had goaded his mind for an idea with which he could battle the tight times. Then, suddenly it came—complete in detail. It concerned a big cottonwood tree in front of his own cabin.

The tree had stood for half a century, providing cool shade in summer and a windbreak in winter, and had harmed nothing. It occurred to B'r Charlie that a storm might come and of the tree against the forcing the bossman to s new roofing. To circu possible catastrophe an for the bossman, B'r C down the tree. It fell a lie's house and wrecked man was enraged; and G B'r Charlie's life. But th understanding the good ceded, and B'r Charlie remain on the place, on do no more thinking.

And now, after seven Charlie was destined to t

He came to the door of shop to catch a breath o breeze and to allow the growing cotton to sweep t from his eyes. Everywh mules were plowing an children were hoeing. Gi in a lather, galloping fro workers to another; h adjusted or making a women to keep them gooc hard working.

B'r Charlie knew the fie of grass, but he knew tha ference to Giles.

"Hit liable to rain any t man pointed out. "And ready for de rain. Whup befo' hit sprouts and den hurt you."

B'R CHARLIE looked plowpoints and shook was not nearly filled. It be full by sundown or Gile to know why not. B'r Ch felt low in his mind.

The prospect of thinki planation for Giles was en him feel low, but oddly, occurred to him. Instead half aloud: "All dis work Giles yellin' for mo'! M swim!"

His mental processes rupted by a young wo through his line of visi dressed in a pair of red that billowed far out in t too snugly at the waist an ended in bell-bottom legs ment was a slow-rolling than a walk.

B'r Charlie gulped. "Y yelled. "Whyn't you git h off dem red over-halls a dress?"

"Dese ain't no over-ha objected. "Dese is what playin' suit."

"De way you was cuttin yo' strut," B'r Charlie tol look like you was fixin' t was steppin' like you mea

The girl dug a toe into th was jest goin' home to git s for Mamma," she said. "I t Mamma tole me to go ho supper on account er I wa'n good out yonder in de field

B'r Charlie squinted at you Sissy Lewis' gal?" he

dollars, and rented a type-
ree months. With the ma-
free booklet explaining the

touch system. In two weeks Riskin had mastered it.

After grammar school, he went to work, and by the time he was fifteen he had risen to the position of office-boy-secretary to Joe Golden, which job lasted until he wrote that letter. His next job was another office-boy-secretary spot in a shirt manufacturer's office, and, grotesque as it may sound, this was the job that brought him into the movie business.

One day his boss called him in, and said: "Some of my friends and I have invested money in some comedies to be released by Famous Players-Lasky. You're always telling jokes. Come on up and look at a professional's jokes."

The Amateur Disagrees

All the backers looked, and unanimously agreed that these were probably the funniest two-reelers ever filmed. Only one small voice in the back of the room was raised in disagreement. It belonged to Riskin, who said:

"They smell. A moron could write better, a blind man could direct better and as far as the acting is concerned I could be funnier. Famous Players-Lasky will throw you all out on your ears when you show these to them."

His boss was very tolerant. "Bob," he said, "you're just a young kid. You shouldn't be so positive in your opinions. These men are all older than you, and more mature in their judgment."

Riskin shrugged his shoulders, and said: "To me, they still smell."

Famous Players-Lasky agreed with him and refused the shorts the next day. Now, the shirt people were in a dither. They had told all their friends that they were in the movie business, and they would be laughingstocks when it was discovered that they couldn't even get their pictures released. They decided to form a new company to make short comedies.

A production genius was needed. Well, who was the only person who said the first batch was no good? Young Riskin. So, at seventeen, Bob became executive producer of a company making two-reel comedies. They were family comedies, starring Victor Moore and his then wife, the late Erma Littlefield.

He knew that he would have to look older than he did in order to command respect, so he grew a mustache. But there was one spot on his lips where the mustache wouldn't grow, so he darkened it with mascara.

In two years, Bob wrote and produced 104 comedies. Our 1917 Orson Welles then joined the Navy, which accounts for him until Armistice Day.

After the war, Riskin confidently expected to be snapped up by the movies, or by the legitimate theater. Both fields studiously ignored him. The closest he could get to the theater was bumming a bed at the Green Room Club, the poor man's Friars Club of those days. Among others who shared the attic with him were the late Louis Wolheim, Jimmy

Jasper asks his waitress for a dance. They have three more dances and Jasper asks her if he can see her next day

Steamer, Steamer

By James B. C[illegible]

ILLUSTRATED BY GILBE[illegible]

There is no provisi[illegible] for romance in the Navy [illegible] program. Do not we[illegible] for the boys, however. The[illegible] doing all right by t[illegible]

OLD Roarty on our ship is the [illegible] communications, and I'm [illegible] class, under him, which means [illegible] feels like sounding off about somethin[illegible] to lend an ear.

He's a great one for books out [illegible] aboard ship and going to movies when [illegible] erty. We're with the Fleet at Hampton [illegible] ing to be reviewed by the President, a [illegible] peering through our office air port and [illegible] same time about the movie he saw in [illegible] last time ashore.

"It was loaded to the armor belt wi[illegible] says Roarty. "With admirals and saluti[illegible] boys and bosun's pipes, foreign spies [illegible] munition plants and a handsome young [illegible] ing tenor to a glamorous young creatu[illegible] moon."

"An ensign yowling up at the mo[illegible] better ashore than with a Navy crew a[illegible] I say to that.

"Romance," says Roarty, "could be [illegible] hereabouts. Some time, you might ta[illegible] the coxon of Number Two steamer."

Our ship's steamers are tied up to th[illegible] just outside our office air port, and N[illegible] steamer is the captain's private boat. Ja[illegible] is her coxon, and he's always acting as i[illegible] second-class in the first year of his [illegible] something in Navy history.

"What about Jasper?" I say; "besides [illegible] polishing the brightwork and washing in[illegible] of his steamer like he's bidding for [illegible] from the skipper for keeping his steam[illegible] condition."

"Jasper isn't bidding for compliments. [illegible] Navy blood in him," says Roarty.

"Navy blood?" I say.

"Navy blood," says Roarty, "urging n[illegible] duty always. Jasper's father is Admiral [illegible] tired. I was shipmates with him a nu[illegible] disciplinarian, but a good officer. Jasper [illegible] was making grand records on the playing [illegible] college, but he was also AWOL so many [illegible] the study halls to suit the admiral, and n[illegible] a hitch in the Navy might restore Jasper [illegible] values of life; and so there's Jasper out [illegible] and not a soul aboard knowing he's an a[illegible] except myself and the skipper. And it [illegible] the skipper, and now I'm telling you."

To which I say, "There's been admira[illegible] listed in the Navy before Jasper, and [illegible] romance in it now?"

Roarty don't answer. He is busting to [illegible] pointing to a big power yacht steaming [illegible] She's all white lower sides, and all ma[illegible] chromium or whatever it is topside, an[illegible] tonnage of a light cruiser.

Jasper looks up from his brightwork [illegible] away he goes excited. "In a few minutes [illegible] Jasper. "I'll be taking the skipper in to th[illegible] on my way back I'll slip alongside tha[illegible] play boat and I'll have a talk with some[illegible] her, and it won't be any bedside talk."

Jasper turns back to his brightwork, a[illegible] Roarty. "I'm still looking around to se[illegible] and where is it?"

"It's in the making," says Roarty. "Wh[illegible] lay into North River. Jasper takes in a[illegible] lunches that shoregoing people rig up [illegible] jackets sometimes. The waitresses were [illegible] and well-to-do ones, but there was no re[illegible] was which, being all dressed like milkma[illegible] the lunch there's dancing. (Continued o[illegible]

China Sky

By Pearl S. Buck

ILLUSTRATED BY MARTHA SAWYERS

Thus Far:

ge of a hospital in China when ray Thomison, goes to America for his work, Sara Durand, a an, has a curious experience: ted Chinese guerrilla, who is wn as "the Eagle," brings in a ded prisoner—Yasuda, a Japa- high rank—*and insists that his* Puzzled by Chen-ta's interest in re, Sara operates; and the Japa- lie.

ung physician receives a crush- y Thomison (with whom she is) returns from America, bring- is bride—"Louise." . . . From se—terrified by the daily air to which the hospital is sub- ched; and, because her husband es much of Harry Delafield, an ishman. . . .

clever man. Working through (who is in charge of the men's eeds in inveigling Louise into ers through the censors. After letters is received by Yasuda's mbings cease; and Louise (who that the Japanese will not attack the hospital if they know Yasuda is there) believes that she is doing a good deed. Unfortunately, Yasuda's letters contain details of Chen-ta's battle plans brought in by one of Chen-ta's men: Chung's brother, Chung Third.

Gray Thomison's cook, Siao Fah, does not trust Louise. Watching her through numerous keyholes, he presently learns of the letter business; and he sees enough to feel sure that Louise and Delafield are enjoying a clandestine romance. Not sure whether he should report all he has learned to "Thomison doctor," he asks Sara to advise him.

Sara, in a difficult position, does not commit herself—she evades the cook's questions adroitly. . . . Again and again, Louise implores her husband to take her home—or, at least, out of China. By this time, Gray knows that he loves a woman who is far finer and stronger than the girl he has married—by this time, he is in love with Doctor Sara Durand. Nevertheless, in a moment of weakness one night, he yields to Louise, promises to take her away. As they talk, Siao Fah is at the keyhole of their room. What he overhears astounds him.

IX

e the yellow pills," Yasuda laughing. "She will do anything for me!"

ing rose in her slow, sleepy seemed always to be aware d Yasuda, after long watch- d come to believe that she id as she looked. Indeed, aid she was. "Besides, she th me," Chung had added,

Ya-ching poured tea into a bowl and handed it to Yasuda. Then she took a small, brown bottle out of the table drawer and shook two pills into the palm of her hand.

"Not with your hand, filthy hag!" Yasuda screamed in quick rage. "How many times must I tell you?"

"Ah, I am so stupid," she murmured. She threw the pills into the waste basket, for once regretting her stupidity. It had taken her some time and much care to make these pills which looked exactly like the real ones. One would have said flour and water could be mixed easily enough, but the yellow was a strange shade. She had had a hard time even with sulphur, and only at last had she found a harmless dye. Harmless it had to be, for Yasuda must not confuse her with a new illness.

She shook two more pills into a bowl and he swallowed them with tea. Though he was now so familiar with the effect of the depressant which Chung gave him he could never avoid a curious and hateful feeling of terror while he waited for it to begin. He glanced nervously about the room.

"I shall sleep," he told Ya-ching. "Open the window a little more." Soon the oppression in his chest would begin. "Where are my papers?" he asked next.

"Here—under your pillow," she replied.

She watched him closely, seeming to be indifferent to all he did. He composed himself and lay back on his pillows and closed his eyes. She thought, watching him, had he taken the real drug, he would now have been turning ashen, his nails blue. There was no change. He lay waiting. Then he opened his eyes.

"You may leave the room," he said suddenly. "I prefer to be alone while I sleep." He dreaded the last sinking into unconsciousness. He could never be quite sure that he did not speak. If he did, probably it was in his own tongue, but still he preferred to be alone. She moved slowly and heavily to the door. "But come back in an hour to see that all is well with me," he commanded her. He closed his eyes. "I will simply pretend I am going into ordinary sleep," he thought, strengthening himself.

"So," she agreed carelessly, and shut the door upon him.

In the corridor she quickened her flat-footed pace. She had an hour of her own. The question was, should she use it to tell Siu-mei now, or should she wait until after the hour and go in and prove for her own eyes that Yasuda was himself, and so that the pills that Chung gave him were a poison? She could not, however she thought about it, imagine why Yasuda would be willing to take a poison, but if he were, if it were a poison, then Chung had intention in it with Yasuda.

She skirted cautiously about the door of Siu-mei's small office. A very little would have put her off. Had a patient been there, had there been danger of Chung's passing—but Chung she knew had gone to a foreign hotel at the port for a feast. This was his free day. She had seen him go, as she saw and knew everything he did in one way and another. And there were no patients in the hospital except two beggars in the charity ward. She stood tiptoe and pressed her nose against the slightly frosted glass in the door of Siu-mei's office. By staring hard against the light of the window within, she could see Siu-mei's dim shape, alone. She opened the door and peered in. It was true—Siu-mei was alone. The thing was decided.

Siu-mei looked up and saw her standing back against the door. "What is it, Ya-ching?" she asked.

The girl had not come to her since the night she had come to tell of her trouble. She had thought of speaking to Chung of that night to ask his help for the girl

ey were within a mile of the mountaintop to her: "Rest now, Daughter. And mend . handsome young man is waiting up there"

OUR NEW ARMY

Peak load of mail delivered to Fort Bragg, North Carolina, soldiers is 34,000 pieces daily. Incompletely addressed letters and packages force clerks like 1st Class Pvt. Earl B. Bond of H.Q. M.P. Co. (below) to comb file of 45,000 names, cause three-week bottlenecks in sorting and delivering

PHOTOGRAPHS FOR COLLIER'S BY RALPH MORSE AND HARRY PENNINGTON, JR.

POSTAL PROBLEM. The Eastern Seaboard mail is one of the Army's major headaches right now. Some of the soldiers at Fort Benning, Georgia, and Fort Bragg, North Carolina, haven't received letters and parcels sent to them three weeks ago. Trouble is, the men were rushed through New Jersey's Fort Dix so fast they hardly had time to give their correspondents new and complete addresses. Consequently, mail sent to Dix is readdressed merely to Fort Bragg or Benning where clerks, compelled to thumb rosters of 45,000 names to find each man's company and regiment, are quietly going nuts.

FORT LEWIS, WASHINGTON. Company B, 163d (Montana) Infantry, would like a chance to mind its own business. All but six or seven of the men are Indians; and when some astute Army publicity man tipped the press off to the "swell feature story," reporters, photographers and newsreelmen swarmed and cavorted. Reporters seemed disappointed at the lack of feathered headdresses, beads and moccasins; one wanted to hire some outfits from a Tacoma store and stage a war dance. A photographer persuaded an Indian to pose peeking around the edge of a tent as if about to scalp somebody. The other Indians sat stolidly by, obviously unamused. They'd willingly have done the manual of arms or something, but this Redskin stuff sickened them to a considerable degree.

Many of the Indians look scholarly in glasses; half a dozen are college graduates; more than half can punch a typewriter with dexterity. Most are members of the Sioux nation from the reservation in northeastern Montana about 70 miles east of Fort Peck. They like the freedom at Fort Lewis. The half- and quarter-bloods can buy beer in taverns, not being recognized in khaki as Indians. Only way they can be differentiated from whites is by a slight variation of their 41st (Sunset) Division insignia—and we won't tell. No use gypping them out of their beer.

IN ONE day through the Fort Lewis reception center passed selectees Goebels, Chamberlain and Winston A. Churchill. The Army discreetly kept them separated.

IT'S high time we settled the question about who wakes up the bugler. Bugler Harold L. Enz of Forest Grove, Oregon, explains it very simply: "The fireman wakes me . . . and he's up all night." A bugler has probably the longest day—5:45 A. M. to 11 P. M.—of any soldier, but not the hardest. Every other day he puts away his bugle and serves as message runner, which frees him from a lot of field training; and by virtue of his job he never has to peel spuds or massage greasy pots and pans. Army regulations give him three months to learn sixty calls. Bugler Enz has blown as many as eighteen in one day.

FORT BRAGG, NORTH CAROLIN bugler who unwittingly caused Pvt. to turn blue. The way it happened was, was lying on his cot one recent nigh applying a soothing balm to his sore ch nose and penning a letter home, wher sounded. Hurriedly, Pvt. Gilchrist rea more blob of ointment, missed the jar by inches—and swept the ink bottle up into Gilchrist, from Ireland's County Carl brogue that could be cut with a knife ar parcel post; but the language he is said ployed that night as he raced to the lat blue ink rapidly drying on his chest and have been shipped anywhere, even by fr

"There you are, Captain, what did I tell you—I—" There was another detonation. The agent stared at Dorsaux. Then both legs sagged at ce

CAPTAIN DORSAUX considered with approval the young man who had entered the squadron's office. A very handsome chap, tall and wiry, a soldiery silhouette in the pilot's uniform. Dorsaux had spoken a few words with him when he had reported for duty on his arrival in Morocco. He had watched him work, knew that he was a competent flier. It was too bad that such men could no longer be employed usefully, that because of the armistice their youth and energy must be wasted.

"You wish to speak to me, Launay?"

"Yes, Captain."

"Well, go ahead." Dorsaux prepared his little speech, for he expected the usual request for permission to go to Casablanca or Rabat for the day. As his whole squadron was confined to the field for a fortnight, because of a row between some of his younger pilots and officers of the Italian Armistice Commission in a hotel bar, no exception could be made.

"My captain will understand at once from this—" Launay placed a card bearing his name on the table. "Military Intelligence, Special Mission."

"Oh, a cop." Dorsaux murmured with a disappointed smile.

"An agent of the Military Intelligence." The young man's face lighted with amusement. "Placed here especially to watch for attempts to desert with government material." He showed a sealed envelope. "I don't dare use the telephone, for the operators listen in and would warn those involved. I ask you to see that this is dispatched to Rabat headquarters at once, by special messenger."

"May I ask what it's about?"

"One of the Amiot bombers is due for a check-up flight—"

"This afternoon, I know. Lieutenant Gondral's the pilot."

"Right, Captain. I have learned that the machine will be fueled for a longer flight, that seven additional men will board her at the last moment, and that the plane will head for Gibraltar. That will make the fourteenth machine this month, some seventy fliers gone over to the British. The Italian Commission is sure to protest to Vichy."

DORSAUX'S smile held a trace of disdain. "I cannot say I like your methods, Launay, and—"

"I was warned that I might not obtain full co-operation from you, Captain," Launay said quietly. "And I was instructed to remind you that you have a wife and two children in France, that your parents are in the occupied zone. They may be held responsible."

Dorsaux was a stocky man, about thirty-two, with thick dark hair and red cheeks. The blood left his face. "Are you French, Launay? I mean really French?"

"Yes, Captain." The pilot flushed a bit. "That is why I serve as I do. We must side with the strongest, use their methods to clean house and rebuild a solid state."

"What will be done to those poor chaps?"

"They will be intercepted and brought down by a loyal machine. An example is needed, Captain. The courts-martial have been acquitting such deserters right and left, despite the government's decree. I must ask you to detain me here on some pretext, as I was supposed to go along. Don't fear, the full quota will be aboard, for there's a waiting list. They're guilty; they intend to desert. Two of them have brothers already flying for the British. Probably bombing our ports. An example *must* be made."

"I understand that," Dorsaux approved. "But I'd like to save as many of those young fools as possible. Gondral seems to be their leader. Suppose something happened to him at departure? We'd save lives—and preserve an expensive machine."

"True, Captain. But how could Gondral be disposed of without the others?"

"Can you shoot straight?"

"I'm an excellent shot, Captain."

"All right. I suppose that the passengers will not run for the plane until the motors are started. Well, you must arrange to be the last man, and instead of climbing in, you'll shoot Gondral at the controls. His guilt will be evident, plane fueled for a long flight, unauthorized passengers with baggage. . . .You won't hesitate to shoot at the last moment?"

"No, Captain. It's my job, one man's life is not important," Launay smiled grimly. "We are all learning the latest method."

"*You will not miss?*"

"I couldn't—at the distance. A few feet."

"Those easy shots are the easiest to miss." Dorsaux laughed, indicated the picture of a pretty girl directly behind him on the wall. "Overconfidence. One night, four of us got to arguing about shooting. There was another picture there, a head almost life-size. We stood by the door, fifteen feet away. Only one of us hit it on the first shot."

"I beg your pardon, Captain," Launay smiled calmly, "but you must have been —well, happy!" He took the automatic pistol from the holster, raised his arm, aimed, smiled again. "Couldn't miss!"

"One says that," Dorsaux laughed gently, "and then one miss- know, for I lost money back belief."

And it nself was the girl's father. r finds that out, he writes to Joel to explain that while it is true he's an enlisted man in the Navy, he is no fortune hunter having a spending allowance for himself of a thousand dollars a month and a five-million-dollar trust fund coming to him when he is twenty-five. What does that faraway look on your smush mean?"

"I was wondering," I answer, "why he didn't make it five hundred million, him and Rockefeller Center."

"He made it five millions," says Roarty, "because five millions it is—from his mother's side of the family. And that big white yacht is the Girl Muriel, and Muriel is the girl's name, and this day should see something doing for Jasper's romance."

By and by, Jasper takes the skipper to the beach in the Number Two steamer, and then heads for the Girl Muriel. But by this time she has hoisted her anchor and is heading out to sea. Jasper runs alongside her before she can get speed up, and through our air port Roarty and me can see him gesturing and almost hear him speaking his mind to a big man topside.

THE Muriel keeps on out to sea. Pretty soon she's logging plenty of knots and leaving the Number Two steamer behind.

Jasper comes back to the ship and ties up to the boat boom. Roarty asks him what happened, and Jasper says:

"Is he tough! I asked him if he got my letter, and he roars back, 'Yes, I got your letter! And so you want to marry my daughter!' I tell him I do, and what's wrong with that, and he goes on to tell me. He hollers down at me that he isn't standing for his daughter being married to a somebody who's liable to be ordered overnight to China or the Philippines or some coral island in the middle of the South Seas, and she not be seeing him for three or four years again."

"Was Muriel anywhere around?" asks Roarty.

Jasper lets out a kind of moan: "I saw her smiling down from the wheelhouse at me, but she's gone from me now, and where d' y' suppose the yacht is headed for, Roarty?"

"Where would any big yacht be headed for after the Christmas holidays?" says Roarty. "And cheer up, boy, an inner voice is telling me that we

How's your "Pep Appeal"? —by Davis

The Lawyer: Gentlemen of the Jury, there comes a time in every man's life when...

The Lawyer: How was I, sweetie?

His Daughter: Very logical, Dad. But where's that old fire—you know, that old zip, zest and zowie? You need more *pep appeal!* I'll bet you're not getting all your vitamins.

Daughter: There, my learned Mr. Counsel for the Defense, is your first lesson in getting your vitamins. A dee-licious cereal called KELLOGG'S PEP that's extra-rich in the two vitamins that are least abundant, and thus more needed, in ordinary diets.

The Lawyer: Hold on a minute! With all that vitamin talk, why didn't you tell me it tastes good too? Why this is the most delicious cereal I ever tasted!

The Lawyer: Gentlemen of the Jury, now that counsel for the defense has discovered vitamins and KELLOGG'S PEP, before long things are going to be different around here.

Daughter: Well, where there's pep there's hope!

Vitamins for pep! *Kellogg's* Pep for vitamins!

Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

"How a kind word ruin my beezness"

1. Everyone takes the siesta in the heat of the day, except I, poor Juan. While all are asleep, the shops are closed. Except my shop, where I sell pottery to the American tourists for ten times what it costs in America.

2. An American senorita comes one afternoon to buy the pottery. "How is it that you do not take the *siesta?*" she asked, speaking that strange language which I have heard called Highschool Spanish. "Ah, *senorita,*" I sighed, "I cannot sleep!"

3. "It is the coffee!" I explained. "I love the coffee. I cannot resist it. But when I drink it with the lunch, then all afternoon I am wide awake!" She nodded. "It is good business to be open when other shops are closed!"

4. "I would give all the beezness for a good *siesta!*" I cried. "Then you should drink Sanka Coffee," she said. "It's 97% caffein-free, and *can't* keep you awake!" "It is an American trick!" I scoffed. "How can it be *good* coffee?"

5. "It's wonderful! A blend of fine Central and South American coffees!" she replied. "And the Council on Foods of the American Medical Association says: 'Sanka Coffee is free from caffein effect, and can be used when other coffee has been forbidden!' "

6. So in gratitude I charge her only *five* times what the pottery is worth. Later, I try Sanka Coffee. Delicious. And I *sleep* each day during the afternoon. My pottery beezness, he is ruin but *ah, amigo* . . . how I enjoy the *siesta!*

SANKA COFFEE

REAL COFFEE . . . 97% CAFFEIN-FREE

TUNE IN . . . "WE, THE PEOPLE"—Tuesday evening. See your paper for time and station.

may be meeting up with her in some tropic port before the winter is over."

That afternoon the President reviews the Fleet, and next morning we sail for our winter naval base. It's all useful work there, and a healthy outdoor life, but after three months of it steady the scuttle-butt gossipers are asking one another ain't it time they made a liberty in some nice tropic port.

The topsiders ain't always dumb. A liberty is declared, and our ship and the Missalama sail for Belloporto. We get radio advices before we sail of an earthquake, and hidden reefs along the coast north of Belloporto, so we keep clear of the coast line and arrive off the harbor of Belloporto.

It's a lovely tropic morning and a lovely city to look at with its blue- and pink- and cream- and chocolate-colored walls of houses and the red-tiled roofs above them.

OUR ship comes to moorings, and the ship's boats are lowered over the side, and the next thing is Jasper looking through our air port and moaning to Roarty that it's six months now since he saw Muriel, and in all that time not a line from her.

"She's still under age, and her father doubtless made her promise not to write to you," says Roarty.

Jasper moves away from the air port, and I ask Roarty why he's encouraging him to remember the girl instead of forgetting her.

"You're a yeoman," says Roarty, "and not the worst one in the Fleet, but it wouldn't reduce your efficiency a bit if you were to look up from your typewriter now and then and take notice of what's going on around you. For weeks now, our radio lads have been picking up messages out of the air and passing them to me. The Girl Muriel will be stopping at Belloporto on her way north, and to my notion that's no mere coincidence."

"You think Joel is relenting?" I say.

"Gosh, no! Not Joel! But things can happen in spite of him. The Muriel should be here by dark."

That afternoon a bunch of our wardroom officers are invited to have dinner with some classmates on the Missalama. Now we have watch officers who are always afraid they'll be needing all the ship's steamers for the ship's regular business, so our wardroom crowd ask the skipper if they can have his steamer to take them over and bring them back later. The skipper tells them to help themselves.

At half past five, Jasper takes our wardroom officers to the Missalama. At dark all the ship's steamers except Number Two are hoisted aboard for the night.

Steamer crews usually come aboard the ship to kill time when they know they're not going to be hailed soon for a duty call. Jasper comes into the office with his special pal Cadigan to moan to Roarty about his girl. They are still there when a radio messenger sticks his head in the office door, and sings out: "Say, Roarty! The Girl Muriel is coming to anchor on the south side of the harbor."

Right away Jasper gets excited, and says he's going aboard the Muriel. Roarty asks him how he expects to get aboard with Joel and his deck force standing by the gangway to heave him back into the harbor.

"I'll slip under his bow and climb aboard by his anchor chain," says Jasper.

"I have a better plan," says Roarty. "The skipper and myself are old shipmates, and he was your father's executive officer one time. I'll talk him into going aboard the Muriel in the morning and saying the right word to Joel about you."

"Yeah? And will Joel h morning?" says Jasper. how he slipped out to se Roads? If he finds out m he'll get under way even i dle of the night. I'm goin d' y' say, Caddie? You w

Wings

Illustrated: Two smart WINGS on the Raleigh last. Antique tan for town. White suede and tan for sport. Each $7.75. Other Walk-Overs from $6.75 to $12.50 (slightly higher west) Geo. E. Keith Company, Brockton, Mass.

Missalama. "A personal signal to you, sir, from our officers on the Missalama," says the quartermaster to Emmer.

"Speak out! What is it?" says Emmer.

"The signal says they had the captain's permission for the use of Number Two steamer and now where is she?"

"Answer message received," says Emmer.

"What could possibly have happened to my steamer?" says the skipper to Roarty.

Roarty ponders that one and says, "Could it be her engine broke down, sir?"

"If that is so, she will be drifting somewhere about the harbor," says the skipper, and orders Emmer to turn on the searchlights.

The lights make pretty pictures playing on the blue-and-green water, but they don't bring any drifting steamer into view.

The quartermaster reports a Missalama signal asking if the officer of the watch has dropped dead.

"Ignore it," says Emmer.

The skipper by now is saying he doesn't give a hoot about losing his steamer, but those two lads drifting around in the rising wind and sea—and reefs handy—he doesn't like the idea, and he orders the ship to get under way. So we up-anchor and head out the harbor with our searchlights playing ahead and to both beams.

I don't see any Muriel to anchor as we steam out, and I ask Roarty what he makes of that.

"And no Number Two steamer, either," answers Roarty. "Joel is a tough hombre. I wouldn't put it past him to kidnap Jasper and his steamer and dump him and Cadigan on some uninhabited island."

Outside the harbor the ship heads to the north, keeping clear of the land, of course. Wind and sea are making, and inshore our searchlights disclose white water breaking over the hidden reefs. The quartermaster reports another signal from the Missalama. This time our officers are asking what's the idea putting out to sea and leaving them marooned on another ship?

"No answer," says Emmer.

WE STEAM along, and by and by we sight a big white hull off our inshore bow. We head in and soon we see she's laying across a reef with her back broken. The sailing lights of a small steamer are close by the white hull. It's the Girl Muriel on the reef, and our Number Two steamer standing by her. We lay off in the safe water, and pretty soon our Number Two is making her way between the reefs and heading for us.

Her deck and her cabin companionway are jammed with people. She rounds to under our quarter, and there's Jasper at her tiller. And standing close by him is a girl.

"Romance, there it is!" whispers Roarty, which I agree to, if Jasper can explain how he come to be there with the skipper's steamer.

Our port ladder is rigged, and the rescued people come piling aboard. A big man in evening clothes and with a voice of authority—Joel, of course—informs our skipper that his yacht is a total wreck on a reef that was not marked on any chart he had, and why is that? Shouldn't somebody in Washington be hauled over the coals for that?

"Suppose we let that lay for now," says our skipper, and orders his mess attendants to make the admiral's cabin ready for Miss Apperson, and to put a cot in his own cabin for Mr. Apperson. He then passes the word to our executive officer to see that the Muriel's officers and crew are made comfortable for the night. Mr. Emmer at the same time is ordering the Number Two hoisted aboard and Hallen and Cadigan not to turn in yet awhile.

Roarty and me go below and there's Jasper waiting in our office to tell how before he could get alongside the Muriel she was headed out to sea. She heads north along the coast, and Jasper right away thinks of those hidden reefs and puts after her. Cadigan gives Number Two everything she has, but the Muriel draws away and keeps drawing away till she piles high up on a reef.

"Number Two, of course," adds Jasper, "doesn't draw any water to talk about. So I let her feel her way in between the white spots marking the reefs, and I slip her to the lee side of the Muriel and take her people off."

"Didn't Joel recognize you?"

"The Muriel's lights were out of commission," says Jasper. "It was all dark."

"But you had to give orders. Didn't Joel recognize your voice?"

"In my two interviews with Joel," said Jasper, "he did all the talking."

"But Muriel knew you?"

Jasper grinned.

The skipper's orderly comes along then to say that the captain wants to see Hallen on the quarterdeck.

Roarty follows Jasper up the ladder and I follow Roarty.

Joel is talking when we get near enough to hear. "I don't mind losing my yacht," he's saying; "I can have another one built. And now, Captain, a few words for the cool competence of the young man in command of that little steamer. I would like to thank him personally. And to reward him and the other chap in a substantial way."

"Forget the reward," says the skipper. "And here is the young man himself. Coxon Hallen, step forward."

"Hallen?" says Joel, squinting at Jasper. "Did you say Hallen, Captain?" He has another squint at Jasper and submerges. And he doesn't come up for air until the skipper is well under way telling that Coxon Hallen comes of an old naval family and that he himself served under his father, the admiral, now retired.

Mr. Emmer still has the watch, and he's eying Jasper like he's only waiting a chance to ask him how Number Two steamer happened to be out among those reefs, and Jasper catches Emmer's eye and draws himself up like a man facing a firing squad; but silence is the order of the day aboard a big ship of war while the captain is talking. And the skipper goes on to say:

"There was the situation, Mr. Apperson. My steamer is gone, and none of us able to guess what happened to her until my Chief Yeoman of Communications Roarty figured [illegible] had parted her boom lash[illegible] off on the tide with her [illegible] down. But her machinis[illegible] her engine working agai[illegible] was in working order w[illegible] sighted Mr. Apperson's y[illegible] Hallen?"

"It was in working or[illegible] says Jasper, with one eye [illegible]

"Now most coxons w[illegible] turned to their ship for o[illegible] tunately for you, Mr. Ap[illegible] Hallen has initiative. It is[illegible] Does Hallen return to h[illegible] There isn't time. He puts[illegible] —well, you know the rest."

Joel looks as if he want[illegible] thing to Jasper, but he doe[illegible] to start and the skipper g[illegible] "That's all, Hallen. And [illegible] am not overlooking his pa[illegible] cue of Mr. Apperson's crew[illegible]

"Aye, aye, sir."

JASPER goes below to [illegible] and Roarty and me go b[illegible] in. Next morning we are [illegible] early and through the ai[illegible] Jasper turning the skipp[illegible] loose from the boom. Ro[illegible] where to so early, and Jas[illegible] says, "Going off watch last [illegible] Emmer forgot to inform hi[illegible] officers over on the Missal[illegible] ing over to get them now."

"I'd like to be standin[illegible] what they have to say to [illegible] they're back aboard." [illegible] "Also I'd like—"

What stops him is a vo[illegible] passageway saying, "There [illegible] man Roarty, miss."

It's the skipper's orde[illegible] and in the doorway is the [illegible] She smiles at Roarty and [illegible] her, and they start in talkin[illegible] old pals. As I get it fro[illegible] they've been writing to eac[illegible] Jasper since before Ham[illegible] After a while she says, "Wh[illegible] Mister Roarty?"

"It's a rating," says Roar[illegible] do no harm to an enlisted [illegible] hoping for a commission, [illegible] tell your dad that."

Off she goes, and Roarty [illegible] saying, "There's your her[illegible] d' y' think of her?"

To which I say, "She ha[illegible] voice and a pleasant sm[illegible] shape will do, and she isn't [illegible] but I wouldn't call her glam[illegible]

"You can think up th[illegible] things to say!" says Ro[illegible] sensible man spending h[illegible] away from home wants a [illegible] for a wife?"

"What's this I hear about a new automatic gear shift?"

An Important Safety Message!

THERE HAVE BEEN four great inventions of immense importance to greater safety in motoring. The first was the Safety-Steel Body. The second was the Hydraulic Brake. The third was Safety Glass.

The fourth, offered for the first time this year on the new Plymouth, Dodge, De Soto, and Chrysler Cars *exclusively*, is a new Safety Rim Wheel.

As every motorist knows, a flat tire can cause trouble when you are traveling along the road.

This patented new Safety Rim Wheel is designed to prevent a tire from twisting, or crushing down into the center of the rim, or rolling off the wheel, in case of a blowout or puncture.

With an ordinary wheel, a flat tire may be "chewed up" quickly unless the car is brought to a stop in a short distance.

The important point is, with this new Safety Rim Wheel, the tire is held in place and you have more time to slow down and stop your car more safely, and with less damage to the tire. Test drivers, experimenting with blowouts, give glowing testimony. They say you are hardly conscious of having a blowout on either front or rear wheels until you slow the car down to stop it.

This new safeguard against the effects of a puncture or blowout should be good news to all motorists.

Chrysler Corporation pioneered Hydraulic Brakes, popularized the Safety-Steel Body, was one of the first users of Safety Glass, and is now proud to make this new and vastly important contribution to greater safety in motoring.

Safety Rim Wheels not only mean more safety for you and your family, but also for others on the road. Already, nearly 2,000,000 of these new Safety Rim Wheels are in use.

You get Safety Rim Wheels on the new 1941 Plymouth, Dodge, De Soto and Chrysler Cars *only—and you pay nothing extra for them!*

CHRYSLER CORPORATION

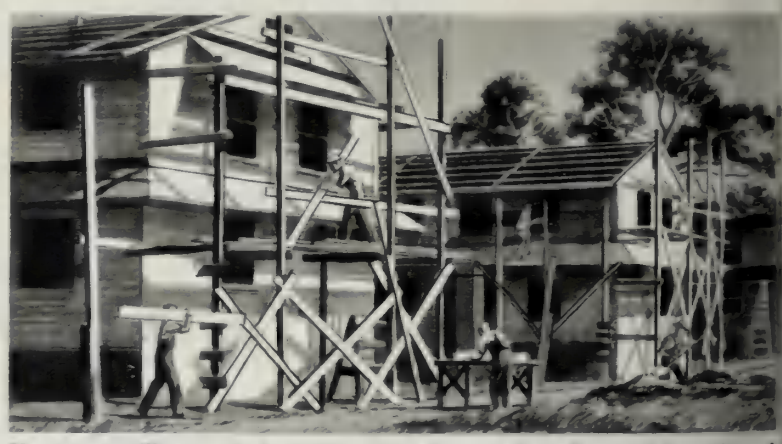
RAILROADS ARE *READY*

A factual report to the American people

What if the country is called upon to meet a real emergency this year — or next? How will our rail transportation system meet its responsibilities? How does the American railroad performance of 1941 compare with that during the World War?



A thoughtful public, facing a dangerous world situation coolly and realistically, is entitled to ask such questions, and equally entitled to honest answers. Here they are:

Bigger locomotives pull more freight. Unqualified statements that railroads have fewer locomotives and cars than in 1917 are mea ingless. Today's locomotives average half again more powerful. Today's better freight cars hold a fifth more and travel 64% fast

It can't happen again! In 1917 ports and terminals were congested and transportation was slowed down because freight cars were used not to move goods but to store them. On just one order, 40 miles of cars clogged the tracks for weeks until a shipyard got ready to unload them. That won't happen again because close teamwork by the railroads, shippers and government agencies now keeps cars moving and gets them unloaded promptly.

Housing a million men. For the new army camps, the railroads delivered nearl board feet of lumber—75,000 carloads—in 6 recent months. Work was never held of any railroad failure to deliver materials. Cars were loaded and unloaded promp pers and contractors. There was not the least interruption of regular rail traffic.

★ ★

Railroad efficiency more t
That is the net result of la and cars, longer trains, fast better signals, streamline greatly improved operatir In the peak year of 1929, hauled 8¼ million more freight than they did in 1 they had 60,000 fewer ca fewer locomotives.

Whatever the demand — America's railroads, despite the hard times of recent years, are keeping fully prepared to meet the nation's transportation needs.

ASSOCIATION OF AMERICAN RAILROADS, WASHINGTON,

P.S. PERFECT SHIPPING — A national campaign each APRIL to promote good packing, secure loading and careful handling of ALL shipments — sponsored by Shippers Advisory Boards. Avoid loss and damage. We can't afford to waste our national resources.

Home-Town Boy

Continued from page 13

d empty, with a taste in his that after too many beers. So e kind of welcome a fellow then. Loretta went off, came with a well-filled plate, and ith it a timid peace offering. be working tomorrow, any-

I will," he said.

ed up then: "If you call it

was time for Rusty's pie, the vaitress served him, and he hope Loretta would see his nding there untouched after At first he meant to take the on back to camp, but he met from the Lazy-Y and it was to stop and gas a little, then ey had to have a beer.

," Rusty said, the first three , and by and by he was feel- ain and mellow, and he would willing to forgive Loretta, sn't there. But a lot of other e, some of them dudes from ches in the mountains, and a girl who called herself Plain aken charge of Rusty. She n, he thought, though not , either. She had black hair own to her shoulders, and a e-cornered face, with big and soft, crushed-looking de for kissing. And the way seemed as if she knew it. the kind of perfume she was even the smell of cigarettes , though he never would've at if it had been Loretta.

y with her called Arthur, a tight, pink mouth under a mustache, kept saying, "We now," and Plain Jane would ne, I hope to tell you. I'm nderful time. Why do you e West, anyway?"

They went from Oscar's Place down to Hell Roaring Bar, and from there to Mag's Last Chance; they stopped at all the carnival booths to shoot wooden ducks, and pop balloons, and throw balls at a sad-faced darky with a woolly wig and flaring, painted lips. Arthur paid for everything, and carried the two big dolls and the teddy bear they won, and Rusty knew they knew he didn't have much money. Part of his mind was cold and clear as glass; through it he could see how this thing was to them—to Jane: Wild West stuff, half an adventure, half a joke. She would be home again, back there in the East telling about it, laughing. *Oh, those cowboys!* Okay, then. He'd have his laugh, too, wouldn't he? Something to boast about to guys like Chuck or Spike Poland from the Lazy-Y. Maybe he would. . . .

Because there was more than that to it for both of them. There was the littleness of her, the thin, little fingers clutched in his, the way she hung on his arm so close and sweet with the smell of her hair in his nostrils, while Mag's cowboy quartet was singing The Last Trail. Maybe he hadn't been to college, and he might not have much money—not right at the moment—all the same he knew that Plain Jane liked his looks and the kind of strength she felt in him; a spark of excitement and desire crackled between them. Heck, it took more to make a man than clothes and grammar and a wad of folding money—Jane knew that. His arm was frankly around her when they went into the dance hall some time after midnight.

Arthur got rid of his dolls and teddy bear and cut in before they were halfway around the floor:

"Jane, no fooling, we have to go. The station wagon's waiting—all the rest are out there."

"Oh, gee!" Jane said. "What an awful

"The hour we spend in the park every afternoon does Freddy so much good!"

You'll like yeast this new way

PETE: You're sure full of the old whoop-de-do! Been eating yeast again?
MILDRED: No . . . drinking it! Fleischmann's Yeast in tomato juice is simply divine!

PETE: Baby, you hit the jack-pot there! I remember how swell life looked when I was eating yeast.
MILDRED: Well, you'll never have to leave it again. It's delicious in tomato juice . . . tastes like oven-fresh bread, and the longer I stay with it, the more I like it.

PETE: O.K., I'll give it another whirl. I always knew the experts were right when they said "yeast is one of the richest natural sources of the amazing vitamin B complex."
MILDRED: Oh, that's been proved long ago. But maybe you're not getting enough of these vitamins. Drink yeast first thing in the morning, last thing at night . . . See if the world doesn't get brighter!

MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's Fresh Yeast

ALL CARS ALIKE ?

Not By a Jugful!

HERE'S ONE THAT'S *DIFFERENT* IN 5 IMPORTANT WAYS . . . 1941 HUDSON

"All Cars Alike In SAFETY?" "Not On Your Tintype!"

Just take a look at the picture. It shows Hudson getting the Safety Engineering Magazine Trophy for safest body design of any 1941 car, *with the first perfect score any car ever made.* Then look at Hudson's brakes—husky big hydraulics, and the *only* hydraulics with a reserve *mechanical* system that takes hold *automatically* from the same foot pedal if ever needed. That's a difference which, in some sudden emergency, might be worth more than any amount of money you can name. No wonder they call Hudson *"America's Safest Car"!*

"All Cars Alike In ECONOMY?" "Not For My Money!"

You can bet there's a difference in economy. Look at that big, 92-horsepower Hudson Six that stood competitors on their heads in the 1941 Gilmore Grand Canyon Economy Run. Picture shows this Hudson getting the Gilmore Economy Cup for its price class. Most miles per gallon of any entry except two of the shortest, lowest-powered cars in the entire run! And over 20 miles per gallon for the 128-horsepower Hudson Eight! And Hudson's more than 150 official performance and endurance records show there's just as big a difference in *performance.* For going places and saving money, too, you just can't beat a Hudson.

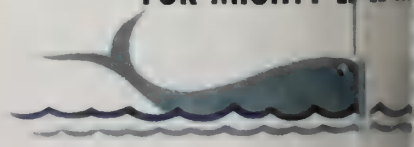
"All Cars Alike In DI ING" "No n You

Drive without ever usin e cl

Start, go, stop and back up, in a Hud with tive Drive—your "clutch foot" has no g to about easier ways to drive—here's the s, and less than any other feature that lets you rget pedal.* You'll find that a Hudson's a l ey to to shift, too. Overdrive? You bet Huds has none better, and it gives you a lot of e fun economy, too.

**Only $27.50 extra, installed at ory.*

"All Cars Alike In BEAUTY?" "Come Again, Brother!"



Like a green car? Then—in a Hudson—you get an interior that carries out that color scheme in harmonizing tones of green, even to such things as carpets and floor mats. Brown or tan? The interior's in harmonizing tones of the same color. There's still a third choice in tones of gray. You'll be surprised how much this complete color harmony—Hudson calls it Symphonic Styling—adds to the looks of a car; *and it costs nothing extra.*

"All Cars Alike In COMFORT?" "Tell It To The Marines!"

Your ride in a Hudson is the smoothest thing you can find on four wheels. And no wonder! You can't get better springs than Hudson uses—big coil ones in front, extra long leaf ones in back. Every Hudson is a real 6-passenger car (see picture). And, if you want real conditioned air—no drafts, no stale, fume-loaded air, no fogged windows even when it's raining or freezing—just try Hudson's Weather-Master. It keeps you warm in winter, cool in summer. It's the last word in all-year comfort!

A WHALE OF A LOT O CAR FOR MIGHTY LI LE M

ty's eyes went hunting Loretta,
it wa Plain Jane he saw, leaning
out of the station wagon, her Stetson pushed far back on her dark curls, and her shirt open at the neck showing her tanned, flat little chest.

"Hi-ya, cowboy?"

He swung his hat, and his skin went tight again, his muscles rippling under it, and he was filled with strength and pride and hope. Top money today, or know the reason why. . . . He left Patchwork in the field behind the grandstand till it was time for her to work, and went along inside. There was going to be a crowd all right; the bleachers were filling fast and the grandstand, too.

He crossed over to a corner near the chutes where he saw Chuck Barrus and other guys he knew. Last year's bulldogging champ was there, sunburned and cocky, wearing a dark blue pullover and a silver-studded belt, with his levis very low on his hips. "Yare, I do too mean thirteen seconds," he said. Rusty shook hands with Lucius Minifree, who ran the Jerris show and a string of other smallish rodeos.

Little Willy came along and begged a cigarette, and rolled his eyes toward the bottle that went from hand to hand, but nobody offered him a drink. When the liquor came Rusty's way he shook his head; his nerves didn't need any stiffening, he was keen enough. Chuck wasn't drinking either, Rusty noticed.

Pick-up men were riding up and down, looking smart in their wide hats and checked silk shirts, but how they looked wasn't important: the thing that counted was how fast they could get a guy off a bucking horse in case of trouble. Rusty heard talk about a bronc called Devil Heels that was said to be a killer. "You won't catch me up on that one," Jim Peabody declared; "not if I have to forfeit my entrance money." It wasn't anything to Rusty; he wasn't riding broncs, but he hoped Chuck Barrus wouldn't have bad luck. Minifree had no business bringing in a vicious horse just for the extra bit of thrill in it. Suddenly the loud-speaker blared, the show was starting, and Rusty saw Jane just coming into the grandstand with a bunch of dudes. He had already picked Loretta out right up above him in the bleachers, looking hot in a red-flowered dress. Bonnie was with her and they both were careful not to see him.

Chuck was the first man up. He had already gone over to the chute and waited, poised, for the saddling to be finished. The way they ran things here, bronc riders opened the show, and then they'd have the other stunts, bulldogging, calf-roping, trick riding and what not, and then more broncs, so that the spice of excitement lasted clear to the end, because bronc riding got the biggest hand.

"Chute Four," the announcer cried. "Chute Number Four! Chuck Barrus coming out on Dynamite."

But something had gone wrong. The gate swung back a little slowly and the bronc twisted sideways against it, scraping Chuck's leg, so that he lost the stirrup and had to pull leather right away or he would've been off, and it burned Rusty up to hear the sound of booing from the grandstand. By gosh, he thought, they wasn't the ones that had to do it. Pick-up men had cornered Dynamite, and Chuck was down, walking back to his place with a swaggering pretense of unconcern, but Rusty knew he must be thinking about his wife and the unpaid hospital bills and what not.

"Tough," he said.

Right on the word, however, the loud-speaker blared again, announcing that the fault had been inside the chute: "Chuck Barrus to have a remount. . . . The judges vote a second chance for Chuck. Now in Chute One. . . . Chute One. . . . Ken Hawley on Crazy Boy. Now coming out."

HEAT, dust and noise, good acts and poor ones, cheers and booing. The champ had broken the bulldogging record again and looked chestier than ever; a girl did stunt riding on a creamy palomino; a man with a silk hat and a big, false nose prodded a sulky and mangy buffalo through some stupid tricks. Time went slow and then too fast and all at once they were driving in roping calves, thin as shadows, quick as fleas and Rusty, with a tight knot in his middle, went to fetch Patchwork. . . .

"Next calf roper will be Rusty Reed, one of our home-town boys. . . . A big hand now, for a home-town boy. . . ."

Then the calf was out and running like a streak, and he was after it, and everything was smooth and easy the way it ought to be. Not a breath wasted, not a motion. His rope went where he wanted it, and Patchwork stiffened, holding it taut, wheeling slowly round the calf; Rusty was on the ground and running, a couple of seconds more and he would be done—and boy, had he been fast! Right that instant somebody in the bleachers let off a firecracker and Patchwork bolted, dragging the calf behind her like a kite. Nobody could've caught up with them, though Rusty tried it, running head down against the waves of laughter that beat on him, against a clear voice from the grandstand crying, "Get a cowboy!"

Patchwork got clear away from everyone and out of the enclosure; she was halfway across the field behind it before she quit and let Rusty come up to her and free the half-choked calf. "You . . ." he said softly. "You . . ." But it wasn't the pony's fault, not really, and all he wished was he could have five minutes alone with whoever threw that cracker. Going back in, he felt his shoulders swinging with the same swagger he'd noticed earlier on Chuck and all the losers. Heck with it, anyway, he thought.

Chuck gave him a kind of half grin that was better than words. "You ought to have another go, by rights."

"Fat chance," Rusty said, "after the laugh I fetched. Forget it, will ya? . . . When you getting your remount?"

"Any time now."

"Don't let him give you Devil Heels."

"He's out of it. Wouldn't nobody ride him. Nobody that much interested in suicide."

"That so?" Rusty turned the information over in his mind, and after a little he went away from there, looking for Minifree which took a while because the fat man didn't mean to see him. Cornered at last, he spoke right up, getting his word in first and quickly:

"No griping, Reed. The decisions are

*†Reg. U. S. Pat. Off.

O.K., Connie! But first... check up on your breath!

Connie, like so many others, has bad breath and doesn't know it. That's the tragedy of this common fault—you rarely suspect it in yourself.

Yet dentists say... → "Tests show that 9 out of 10 people have bad breath. That's why dentists recommend Colgate Dental Cream. For Colgate's active penetrating foam gets into the hidden crevices between teeth ... helps clean out decaying food particles and stop the stagnant saliva odors that cause much bad breath."

See how much brighter your teeth are? Feel that penetrating foam refreshing your whole mouth? And don't you enjoy Colgate's tangy flavor? Such a pleasant way to combat bad breath!

Play Safe! TWICE A DAY—AND BEFORE EVERY DATE—USE COLGATE DENTAL CREAM

up to the judges, and I don't have—"

"I ain't here to complain," Rusty broke in. "Not that I couldn't raise a fuss about them fireworks if I wanted. But that's finished. I need some money, howsumever, and I want you to let me up on Devil Heels."

"Too late," Minifree said. "You ain't entered for bronc riding, and the boys won't stand for it."

"Yeah. But I don't mean for prize money. I mean an exhibition ride."

"How much?"

"Ten dollars," Rusty said. "If I stay on."

SOMETHING that might have been compunction moved behind Minifree's small eyes. "Ten bucks if you stay on or not," he said. "Got a couple of remounts coming up and then we'll let you finish off the show."

"Oke," Rusty said, and a cold lump sat suddenly in his belly. What was it Chuck had said? "I'm getting out while I've still got a backbone." A drink would've tasted all right now, but Rusty didn't have one. He went across for a bottle of soda, lukewarm but better than nothing, and while he stood there by the stand Loretta came along carrying two empty bottles for an excuse, but both of them knew she had been watching him and had followed.

"Hi-ya," Rusty murmured.

"Hi-ya."

And something went between them more than words. It was comfortable and pleasant to walk back toward the bleachers with Loretta by his side.

"You got a bad break," she said.

"Seems so." He didn't tell her then about his ride because he was going to show her; he was going to show the whole of them. When he got back to the chutes Chuck Barrus was going after his remount, and Rusty wished him better luck this time.

"You bet you," Chuck agreed with grim determination.

No use, though. It wasn't Chuck's lucky day. He made a pretty ride and stuck on good almost to the whistle, then all of a sudden off he went head foremost, rolled over once and then lay still with the breath knocked out of him, and had to be carried off. Don't think about it, Rusty told himself, because they were already saddling Devil Heels, and from what the talk had been you didn't get a chance to roll out of the way of that one.

"All ready now!" the loud-speaker bellowed. "Ready for Rusty Reed's exhibition ride on Devil Heels—the devil's horse."

But first Minifree raised a laugh by sending out Little Willy mounted backward on a mule. He got bucked off and kicked, and stood there spitting blood and a broken tooth.

"Oke," a voice said, and he went down quick, the gate swung back, and Devil Heels was out there bucking. Four feet together and a backbone like a hoop, and when you fall try to fall clear, try to get away from those devil heels. Going off was no disgrace; nobody could ever stay up on this one. Sweat came on Rusty's face, cold as big drops of rain. "Don't pull leather," he said out loud, but he couldn't hear himself, let alone anyone else hearing above the noise there was, a low, murmuring roar, half applause and half suspense. Suddenly it was over. He was still up and Devil Heels went prancing around as sweet as pie, a bronc that never had even dreamed of bucking.

Rusty took off his hat and waved it high and handsome. "Cowboy! Cowboy!" they were yelling. It was nice. He looked toward the grandstand, feeling good. Then he was down and back in his corner again, saying "Aw, shucks," but not believing it. The show was over, and folks crowded him some. Little Willy appeared with his

heavy money; this was had not been burdened with before. The money had fattened his wallet so that it threatened the careful drape of his coat.

Willy left the change of his twenty on the bar. He said, "Let's have it again, pal." He pushed his glass out with his fingers and gestured to the boys. He was telling a story about Bing Crosby. One of the boys, a guy—well, let us say a chap—who dressed as neat as Willy, simply loved the story; you could see it in his face the way he loved the story, and he said, "What's Crosby like off stage? Did Lew say that? I mean when he's not readin' from the script."

"Bing? Off stage? Why the man's a sweetheart. Greatest trouper in the world. Democratic? Well, let me tell you there should be more characters like Bing. He was playing golf with Lew—there was Bing and Lew and Franchot Tone—and somebody—I don't remember who it was—a guy come up. A bum, Lew said, a guy whose pants was held together with a pin. The guy says, 'Bing. Look, Bing. You got a dollar on you, Bing?' Bing stops. He was about to make a shot. But you would think this bum was maybe Darryl Zanuck from the way—"

Willy told the story. He invented it, but it was, after all, the kind of thing that Crosby would have done. It was a story that wrung hearts out like a beer rag. The man behind the bar paused in the mixing of the drinks. Two of the waiters stopped, to put their eager faces over shoulders in the group surrounding Willy. Max Kaplan, lord of this magnificence, this Club 18, this Lindy's, this smart spot and hot spot of the Bronx,

"All right, who'll start the ball rolling?"

It's the SMOOTH

And Chrysler Engines with Fluid Drive give the smoothest pull in the world!

ASK any old-time track coach! He'll tell you it's the smooth pulling team that wins the tug-of-war. Even the biggest "beef-eaters" can't win on a pull, a tug, relax-jerk basis!

Just so in a car! The tremendous power of Chrysler's Spitfire engines is even more effective power because it is delivered through *Fluid Drive* . . . the smoothest drive ever put into an automobile!

That's why Chrysler owners—even after long experience with *Fluid Drive*—continue to be astonished at the feats their cars can perform.

A man from Minnesota writes, in complete amazement, of sailing through snow drifts in high that other cars couldn't blast through in low. A plantation-country South[illegible] at the way his Chrysler pulls through the deepest [illegible] out his touching the gearshift lever.

A lady driver describes an all-day trip throug[illegible] mountains in a sleet storm. "Everybody told me [illegible] says. "Nobody could believe that my Chrysler coul[illegible] icy hills without ever slipping once!"

The plain fact of the matter is that any power [illegible]

Replace your dull windshield wiper blades today—with

RAIN-MASTER
REG. U. S. PAT. OFF.
Blades

Your windshield wiper blades — like razor blades — go dull with use. Oil-film rots their wiping edges . . . usually in 5 to 10 thousand miles. Then they smear . . . half blinding you to dangers met in every storm. Why risk a costly smash-up? . . . when less than a dollar gets you a new pair of keen-edged ANCO "Rain-Master" blades (put on for you quickly) at almost any good service station. Patented design. Now original equipment on many high grade cars. Don't trust your memory this time. Tear this out and put it with your pocket money . . . to remind you to buy a pair of "Rain-Master" Blades next time you buy gas. You'll feel lots safer.

Made by THE ANDERSON CO., Gary, Ind.

was very touched. Max was a man who liked to mingle with the great.

"Mrs. Kay and I are going to Miami," Mr. Kaplan said, as though the words of Willy had helped to make the decision. "Well, when we can get away. Perhaps this month or maybe next month, Willy. We'll look Lew up at the—"

"At The Sandman," Willy said. "Just ask anybody. There's a million Broadway joints at the Beach. Just ask anybody. Lew will hand you the place, Max."

"Be nice to see Lew again," Max said. "It must be seven years since I seen Lew."

LATER, in the washroom, adjusting the complex turns of the Windsor knot in his necktie, and then combing his hair with meticulous care, Willy gave thought to Miami and to the intended adventure of Max and Mrs. Kaplan. It was a relief that Lew was working, and in a high-class Florida spot. Willy had not known of this until a friend, out at the plant in Jersey, had shown him a Broadway column of a recent date, clipped from a page of the Brooklyn Daily Argus. Willy's friend was a commuter, too. The Broadway column said, down in the middle of the second paragraph—Willy had it photostated in his mind—the column said, "Lew Longo, M. C. at Miami's newest hilarity house, The Sandman, quips this nifty . . ."

It went on to quip the nifty. It was not a nifty that would paralyze the population overnight. But at least it told Willy that Lew was working in a smart club in Miami and he told his friend that Lew gave his better gags to Winchell.

"I never see your brother's name in Winchell's column," said his friend.

Which doesn't matter now. You take Miami, Willy thought. You take the sunshine and the velvet nights, the music and the flowers, and the horses running at the track, the—what was that?—oh, yes, the beautiful flamingos—and the Broadway people in their summer clothes: Lew and Eddie Cantor, Harry Richman and the boys from Fifty-second Street. Max Kaplan and his wife would walk in there like anybody else. They would be sitting at a table while the show was going on and Lew might say—because those places in Miami, they are intimate and smart—he'd say, "I want that you should know a little lady from my own home town, the Bronx—Mrs. Shirley Kaplan. Shirley, take a bow!"

AND then, of course, he'd do the same for Max, but first of all, if he recalled correctly, Lew would request a big hand for the little lady. He would introduce them to celebrities, of course; celebrities are merely flies on the salami in Miami. Max and Shirley would remember it and they would talk about it, all of them together, through a lot of evenings at the restaurant, and that picture of Lew, above the bar, would have the full significance it used to have. Max and Shirley would come back all brown and healthy-looking, just like everyone who went to Florida—like the real big shots.

Willy had rather whitish skin that would not let him, in the wintertime, look quite so much like Georgie Raft as he would have cared to look. But if a guy went to Miami in the wintertime this problem was dissolved like salt and beer. And if your brother was the M. C. at a "house of hilarity" like The Sandman, you could learn firsthand the manners and the humor of the great, instead of rolling your own for the boys back home.

Seven hundred dollars is a large bag of potatoes, and the round-trip fare is not so very much, and he was tired, in need of rest and recreation . . . he owed it to himself. He could get leave of absence for three weeks, a month. Just cough a bit, just thump your chest, just tell them you were sick. . . .

WILLY went de luxe, and in the club car smoked a thirty-cent cigar and thought about the wondrous days ahead of him.

He arrived in the evening and checked his luggage at the station. He had some supper, though his stomach was too filled with happiness to have much room for solid food besides. The Miami lights were as brilliant as the Broadway lights. He took a little time to look around. The only thing, the only honest thing to do, of course, would be to go straight to The Sandman and announce himself to Lew. It had been seven years since he'd seen Lew. It would have been different if they'd had a common home. But Lew had been trouping a long time now—vaudeville, Hollywood, and nobody knows where else. Willy, on the other hand, had lived with his aunt and uncle and there was no closer contact than a Christmas card to bridge the long time Lew had been away.

He called a taxi and climbed inside; he said, "The Sandman."

"I never heard of it," the driver said. "Is it in Miami or Miami Beach?"

They went into a drugstore and consulted a phone book and the driver learned the location of The Sandman. "It's an expensive ride," he said.

Willy asked him how much and was shocked to learn how much and then the cab got under way. They drove across a causeway from the city of Miami, with the strings of lights along the concrete structure mirrored in the waters of Biscayne Bay.

They drove north, along the beach, and it seemed as they went the buildings dwindled in magnificence; the big hotels had vanished and it wasn't quite so elegant as it had been before. And then the taxi stopped, and Willy, looking, saw a neon sign that said The Sandman, and beneath the sign, in less impressive lettering, testimony to the biggest hamburger sandwich in Miami Beach for only a dime. Willy was ill and speechless, but then it did say, on the wall of this one-story structure . . . Music, Dancing, Nightly . . . Entertainment . . . No Cover Charge At Any Time . . .

Willy got out of the cab a driver. There was music c within. The place looked cl was a blue-and-white-strip that was pretty, even if there doorman. Willy walked insi lady with a pencil in her h hat. She told him, "You d check. I'll remember you which wasn't such a trick, were no more than fifteen p place.

The Sandman wasn't There was a bandstand, wi phone, and room enough to h or four-piece band. But the empty. There were zebra agonal across the wood parti separate booths, for class. a dance floor, little bigger liard table, with two coup slowly to the music from a nograph. And then there w with a towel across his arm, along in easy waltz time. H the mugs of beer and caug ond chorus of the tune the was playing. He sang nasal a certain competence and f his hands clasped in dramat tion.

THIS was brother Lew. H thinned and he was stou used to be. The song was M could tell that Lew had be once. The people all appl and Lew picked up the beer did a comic little jig. His apr He got a laugh. He had a the corner of his mouth anc tell that he was not an ordin he was featured; he had th liberties.

Now the three-piece band and climbed up on the st watched Lew disappear into He sat conspicuously in the things, resolved that he'd n situation if he hid behind a Lew discovered him. The t to play. Not good. Not bad

Willy kept watching the kit He saw them open abrupt appear at a rapid, swinging a fat omelet on a plate, a gestures to amuse the custon wished that he were home.

Lew put the omelet clapped his hands and did ar dance step. He looked ov

THE BEER THAT MADE MILWAUKEE

DID YOU KNOW THIS ABOUT BEER?

The subtle aroma that has made beer the favorite drink of millions of people comes largely from hops. The tiny yellow pollen of the hops flowers gives beer its pleasing tang, its distinctively different bouquet.

Hops are like all other flowers. Some are better than others. And it takes years and years of experience to be able to tell which hops will yield the finest flavor. The experience of the men who select and buy hops for Schlitz ranges up to 50 years. They are as familiar with the hop crops of the world as you are with the grocery stores in your neighhorhood. Naturally, they buy only the choicest hops that the world affords.

Schlitz gathers its hops at their fresh-best and rushes them into huge, specially-built, scientifically controlled warehouses where their tender bouquet is zealously guarded until they are ready to go into the beer.

But even with these finest of hops, a touch of genius is still required to produce the perfect flavor. Too many hops means a harsh, bitter taste; too few, a flat, uninspired flavor. The brewmasters at Schlitz (aged artisans all) call their magnificent result the "mellow median." How it is achieved is a Schlitz secret.

You're in for a grand experience when you have a bottle of this *even finer* Schlitz. Its famous flavor has won world-wide patronage from millions who love fine beer. Yes, if you really want to find out how gloriously good beer can be . . . *you owe yourself a bottle of Schlitz.* Have one today.

Oh, that. That was nice of sn't it? Givin' me a plug like pt you thought The Sandman -class joint. Er—excuse me. Willy. I got a number comin' up Just a little bilge pot I wrote myself."

Lew took off his apron and somebody threw him a fireman's hat. The drums were already rolling and the piano player blew a siren. Lew galloped wildly up to the bandstand and fell deliberately, brutally on the seat of his pants. It was an old routine from Lew's fine days in vaudeville. It had been funny then, but didn't seem to Willy very funny now.

Lew came back, all out of breath, and sat down long enough to comb his hair. Willy said, "It was all right, Lew," and smiled to show it was all right.

"Oh, it stinks," Lew said. "It's all right for a joint like this."

"You're gettin' by," said Willy. "What the hell—you know the way show business is." Willy spoke as one who knew about such things firsthand.

"It's only for a little while," Lew said. "Things haven't been so good, but I've got a couple things lined up."

"You have?"

"Well, I seen Billy Kent the other day. You know Billy Kent? Books bands, books acts, books anything. Billy's got Victor and Verina, down at the Hurricane House. He's got the headliners all over the place. He's down here now. Well, Billy says to me the other day, he says, 'Lew . . .'"

Lew talked along, his confidence increasing while he held a sympathetic ear and Willy thought how much it sounded like the little dreams he dreamed himself at Kaplan's bar up in the Bronx, about the things that Crosby said to Lew, and of the things that Lew, in turn, would say to Eddie Cantor.

Lew got up to tell a funny story. Well, it was a story. It was a molded gag that could not hide its age, no matter with what skill it was unfolded.

Later, when The Sandman had closed for the night, Lew said it would be foolish for Willy to stay at one of the large hotels. "So whatta you get? You get a bed. Listen, for the prices they charge you should take the bed home." So Willy, discouraged, gathered his bags from the place he had checked them and took them along to Lew's little room. It was quite a squeeze in the single bed.

Lew went through the array of suits and haberdashery. He tried a white suit on and said the thing would fit if the sleeves were shortened the slightest bit. Willy thought, well, after all, the guy's my brother.

Lew said, "Frankly, kid—how do you do it? A guy who works with a wrench can't afford to live on your scale, Willy. You sure the cops ain't lookin' for you?"

Willy explained he had no business with the police at any time and that his fortune came through honest sweat and a turn of luck in a game of dice.

"A gambler, huh? A chip off the old block, huh? How much money you got, Willy?"

Willy said he had about four hundred dollars left, besides his ticket home, de luxe. The job was always waiting, Willy said. Sometimes you feel that you deserve a good time, Lew, that's all.

Lew said the Longos were all gamblers, every single one of them. When Papa was alive he'd gamble you which nostril he had stuck the snuff in. Lew said he knew a horse at Hialeah. It was a special horse that they'd been saving. This was just the time. Tomorrow was the time. "This horse is so hot you can smell his hair burning, Willy. You can smell him from here."

They went to Hialeah and the sun was shining. Lew looked great in Willy's suit. The sun shone in the calm lake in the center of the running track. The sun shone down on everyone. It was Miami at its best. The horses fought the reins and danced up beautifully and nervously to take their places in the starting stalls. The colors on the jockeys were as brilliant as the flowers that were everywhere. Lew said, "This dog can't lose. We'll play him fifty dollars straight," although Willy could not understand just whom he meant by "We."

WELL, the horse was fourth, but there would be another animal just as torrid in the second race. Horse racing is a gamble, it was understood. You got to spend money to make money. Willy looked up from the entries and he saw that they were standing next to Harry Richman.

He said to Lew, "There's Harry Richman."

Mr. Richman turned around and Willy grinned and Lew said, "Hello, Harry."

Harry said, "Hello. Why, hello," and generously took the proffered hand, though Willy knew, from the man's surprise, he did not know Lew from the grandstand or the second horse from the rail.

The second horse from the rail was Lew's and Willy's horse. This horse ran fifth. And then there was another horse.

Lew said, when they got home, when Lew was changing his clothes to go to work, "Can't understand it, kid. That last horse had no right to miss. That horse was hot."

Willy said, "I know. His hair was burning. You can smell him from here. You think I can't? Let's close the window, Lew."

"Oh—a wise guy." Lew dressed silently and didn't say a word until Willy had softened him with kinder remarks.

Willy wished more fervently than ever that he hadn't ventured to Miami. But he could not go back to the Bronx. Not for a while, at least. He'd said that he'd be gone for several weeks. He'd said that he'd be sitting around with Lew and Jessel, Cantor, Richman, all the smart set cracking wise in the hot spots in Miami. He felt quite ill. He knew the reckoning would come when Max and Mrs. Kaplan came to see Lew

"markable, truly remarkable! The instant we have need of progressive school graduate, Mr. Dodgitt, we'll let you know"

at The Sandman later in the season.

Having no money, he went often to the beach, and acquired the lovely coat of tan that he had wanted. If you cared to, you could walk along the shore and mingle with the big shots. But it didn't matter now. Perhaps it was a better thing to be yourself. He swam in the ocean and slept on the sand. Most times he slept, and when it was time to go back to the Bronx, Lew said to him, "You been a great pal, kid; I mean it from the heart."

They were sitting in The Sandman and Lew's act would soon be on, and Willy thought he'd miss it if he could. "I gotta get to the train, Lew." Willy dug inside his coat, produced the gags he had thought up—and written down—in the past few years, the stand-bys that had laid them low in Kaplan's.

"What you got there, kid?"

Willy looked them over slowly. They had once been very dear to him. "Kind of a hobby, Lew," he said. "I thought that maybe you could use them. They're not much good, but anyway they haven't been used before."

WILLY didn't go to Kaplan's for the longest time, because the day that he got home he found a post card from the Kaplans, postmarked Jacksonville. The card said they were going to Miami Beach, and that they certainly would not forget to say hello to Lew.

Consequently, Willy stayed away. But not forever. A man can't leave his friends behind him, all his good and trusted friends, because they've caught him in the act of shooting off his mouth.

He went warily to Kaplan's. Max and Mrs. K. were back, it was explained. They had a great time in Miami, said the man behind the bar.

Willy let it go at that, and then Max came up from the kitchen and some of Willy's pals arrived. Max said, "Willy! Where have you been, Willy?"

All the boys were glad to see him. Willy wondered why. "The guy's as brown as a berry. You look perfectly marvelous, Willy," they told him, and that was very nice.

Max said, "Have a drink, Willy. Where you been hidin'?"

"No place, Max. I just be busy

"Too busy to come in and see your pals?"

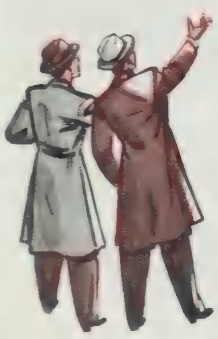
Willy just grinned. He ga no ex- planations. He was on guard he talk would soon be of Miami, b maybe Max was understanding. M e Max was diplomatic. After all, he s a guy. He was not the kind to b it guy.

But Max got happily to rk. He said, "I seen Lew."

From this point I'm suppo d to fo a handspring, Willy thought. ou can 'im, huh?"

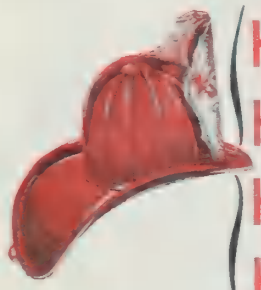
"What a time? What a char er that Lew! Willy, I never realized w much you look like your brother."

One of the boys, one of th egulars who'd not been in since Ma stum- from Florida, but was familia with his deeds of Lew by word of W y, said "You saw Lew, Max? You s there?"



Max said, "What a time? er has at the—at the—"

"At The Sandman," said th guy.



"No. I see him last week. He's not at The Sandman any more. e does make that stop. Lew's at th -what the name of it?—you know, t fancy place, the million-dollar p e—the Hurricane House, that's it. e only went in there about ten days o. The agent—Billy Kent—signed hi up and put him in there. Lew is kil g them down there. I tell you they e Lew down there."

Willy stood stiff and listeni Willy said nothing. Max hit Will on the chest. "And with the same ol gags he is killing them, Willy. The s e one you been tellin' us for years. ou go to give Lew credit. That one out the two Jewish boys and the por oine?— terrific!" Kaplan said. "And at kill me," Max continued, "is tha Lew—like the nerve of him—he sa to me before the show, 'I got a new s. Max I want you should catch.' Why he ma is a laugh a minute."

Willy, with numb fingers, pu ve dol- lars on the bar. It was the on five b had. He looked at his hair co in the mirror and rearranged the fo of his tie. "What are you drinking, x?" he said. "See what the boys will ve."

"This is only a rough sketch"

China Sky

Continued from page 23

d th n had not. After all, it was Ya-ng's ecret and heavy enough for her pea without others knowing of it yet. Ya-ing came slowly to the desk hou answering. She put her hand o h bosom, still without a word, and ug out two small folded squares of per. Then she opened them. Her ids iu-mei noticed, were pretty—tty nd quick, too. In an instant the pers ere open. They contained the ne ng, small, round, yellow pills.

"Wh do you put these before me?" -mi asked, astonished. Then she s as nished at Ya-ching's look. The nd, at face was awake with inner iter nt. The thick lips trembled.

"Th -and this," Ya-ching muttered, ntir at the papers, "are not the ne."

"The look the same," Siu-mei said rly.

"I m le these," Ya-ching said. She ntes o one paper. "He made those." po ed to the other.

"Wh he?" Siu-mei asked.

"Chu doctor," Ya-ching said.

ORD ODING fell upon Siu-mei but she shed it away. "What of that?" ask l, feigning carelessness.

"The —his—he gives to the Japa-e," -ching said. "And then he al-ys g s to sleep. Have you not seen w he eps? His body is half dead and bre n stops and his eyes roll in."

"Wh ? When does this happen?" Siu-me sked sharply.

"Eve day, at least once," Ya-ching plied.

"Wh "

"How o I know? A nurse is not told."

The o women looked at each other.

"How ong has this gone on?" Siu-mei ed. he sat motionless, her two ds c ched. She was stiff with fore-ding ow. It was no longer to be shed way by any strength she had.

"For onths," Ya-ching replied.

"And ou have said nothing!" Siu-i cri . She leaped to her feet. Oh, e mu find defense for him whom she ed! You come to me now, ready th y r accusations! I ask you—om d you accuse?"

Ya-ching hesitated. She had thought e mi t not yet tell the whole. If e on told a part, that part with ich s had nothing to do, if she told ly en gh to make him suffer, it might enou revenge, and still in the fu-re sh might have some sort of con-sed h e. But hope for what? For w as e stood thus face to face with u-me he saw how beautiful she was. ere w a face which if a man had he uld wi no other, those black eyes e sha of apricots, the moth eye-ows, s mouth red as a pomegranate all th old phrases for woman's beauty owdened mind as she saw them come ue in u-mei's face. What folly any ope o ers!

"I ac se—the man who's responsible r thi she said, and pointed to her elly.

Siu-mi gasped out her relief. "Oh," he sig d, "oh—oh, is that all! Oh, I as afra d, for a moment!"

"You ere afraid it was Chung doc-or." Y ching said in her harsh, flat oice. ou are right—it is he."

She t Siu-mei's eyes, she waited in er spe less silence, while these words went hme to Siu-mei's brain.

"I dot believe you," Siu-mei stam-mered. Her mouth was stiff and she ould n go on. Her tongue was too dry o wet r lips.

"It is e," Ya-ching said. "Why do I accuse n? Because he pushed me out of his door with his foot." She felt in her bosom again and brought out a scrap of faded blue cloth.

"Here is another thing," she said. "I tore this from the sleeve of his younger brother, who is a guerrilla in the Eagle's band. But this brother comes and goes with messages to his elder brother. From whom, I do not know. And why, I cannot tell you. But they are messages like this—'The Sha-Wu Mountains.'"

"How do you know this?" Siu-mei whispered.

"I saw him enter his elder brother's room one night," Ya-ching replied, "and so another night, not long since. I laid hold of him and frightened him. I told him the evil his elder brother did was known and he had better not come in lest he be caught in it. And so he gave me the message and escaped my hand. But I held his sleeve and tore this out of it."

Siu-mei could not speak. She sat staring at these things before her. And Ya-ching went on in the same dull and heavy voice:

"What one thing has to do with another, I do not know. I am not clever enough to know the meaning even of what I see." She paused and went on again. "There is a third thing. These," she pointed to one paper, "I gave the Japanese to eat today. Go in and see for yourself if he is well or ill. If he is well, then what I have said is somewhat proved—though what the meaning of the proof is—that, too, I do not know." She sighed, belched a little as she gazed at Siu-mei, and looked vacantly about the room. "I suffer a good deal now with my stomach," she said plaintively. "Nothing I eat feeds me." She wiped her mouth with her apron. "Tell me," she said, "is it true that a child like mine always kills its mother?"

"I don't know," Siu-mei said. "Ask me nothing—leave me alone."

YA-CHING turned obediently and then stood at the door. "I have heard old women tell it so," she said sadly. "In one way or another, they say, such a child always kills its mother." She went away then, padding down the bare corridors in her cloth shoes. And Siu-mei sat staring at those things before her for a while, and biting her thumbnail until the quick began to bleed. Then she took up those things and put them in her bosom and rose from her chair.

"I must know the truth," she thought. "I must know it whatever it is."

Yasuda first, she made up her mind quickly. But she would find Sara to go with her for strength into Yasuda's presence. "Oh, I will tell her everything!" she thought. "I can bear it better if someone knows!"

But Sara was not in her rooms and Sara was not in the garden. Sara was nowhere to be found. Siu-mei searching one room after another could not find her. Out in the side courtyard under an orange tree she found the amah and the baby, playing placidly in the mild air.

"Where is Durand doctor?" Siu-mei cried.

"She went out of the front gate after she ate this morning," the amah replied. She clucked at the baby proudly. "See this one's new tooth, Ling doctor! She bit a gash in my finger—look!"

"Wicked one," Siu-mei said without looking. "Tell me, did Durand doctor go out all alone?"

"Alone," the amah replied.

"Carrying nothing?"

"Her medicine case as she always does."

"And saying nothing?"

..but then Jim turned my tears into

CHEERS!

JIM: "Fine thing to come home to *this!* Can't even see to read! Daphne, if you take the bulb from my lamp again . . . I'll . . ."

ME: (sobbing) "Well . . . how could I get dinner? . . . if you hadn't forgotten to get bulbs . . . I asked you *yesterday!*"

JIM: "Say! All those G-E MAZDA lamps for only 89c?"

MAN: (at store) "Yes, siree! And they're brighter than ever! G-E MAZDA Lamps sure give you a lot for your money."

JIM: "Ahh! That's more like it! There's nothing like having enough light for easy seeing!"

ME: "Darling, you're *so* thoughtful! When I see those spare G-E MAZDA lamps on the shelf, I could cheer! Now we'll always have the right size bulbs for better light."

DON'T THROW AWAY YOUR OLD SHOES

"Only to bid me squeeze an orange for this little meat dumpling when the sun is halfway between the wall and the top of the orange tree—oh, my mother, it is there now!" The amah rose and rushed away, the baby in her arms.

"She would go to the streets ruined yesterday," Siu-mei thought quickly. "She will be there and I will find her." She ran across the court as she thought and saw Gray, walking slowly toward the hospital, his head bent.

"Why, he looks ill!" she thought. But she ran on, down the steps and out of the gate, and then in the street walked quietly and swiftly among the broken bricks and gaping holes. Workingmen were filling and mending and they paused as she passed and then went on again.

BUT she had not far to go before she saw Sara, and with Sara a ragged, black-faced crowd of thirty or more men, women and children. Ahead of them Sara marched, her face stern, her feet tempered to the shuffling, halting footsteps of those following her.

Siu-mei hurried to her. "Now what do you do?" she asked.

"These are our guests," Sara said firmly. "We have empty rooms and empty beds and idle hands and this morning I could bear it no longer. I went out and found homeless ones."

They were beggars, Siu-mei saw quickly, the desperate poor who do not care who feeds them or what shelters them. They were wounded and some were burned in yesterday's great fire. These were they who lived in mat sheds, hovels which were gone in one instant's blaze.

"We'll fill the hospital somehow," Sara said recklessly. "I can't stand it empty any more. I've got to have work." She quickened her steps and all the wretched crowd gathered their rags together and hastened theirs.

"I have not eaten in four days," one muttered.

"I? I cannot count the days since I saw food," another wailed.

"You will be fed," Sara promised.

Siu-mei fell in with her and Sara seized her hand and, hand in hand, they entered the hospital gate and the crowd swarmed up the steps to the door.

"Now, Siu-mei," Sara said restlessly, "not a moment is to be lost. There's a job here. Take them into the clinic for preliminaries. There's smallpox among them, if I'm not mistaken."

The door of Gray's office opened and he stood there staring. "My God!" he said.

"These are patients," Sara said with a hard brightness.

"You went out and raked them in," he said.

Her lips quivered. "I have to work," she said pleadingly. His own white face made her heart ache. But she was helpless to do anything for him, wasn't she? So she must work.

HE LOOKED at her tender face. For a grown woman she had the tenderest, most uncovered face he had ever seen. That was because she never thought about herself or how she looked.

"I'll be along," he said quietly, "in a moment."

He went back into his office and began to scrub his hands. He need not tell her at once. Now he would put off telling her that he had decided to go away. There were all those people she had found God knows where—wrecks of more than war. He sighed. Of course he'd have to tell her and tell her today. Louise was already looking up steamers and talking about a plane to take them out of Chen-li. He encouraged the idea of a plane grimly. There was always a good chance of those one-motored things cracking up against the mountains between Chen-li and the sea. He dried his hands thoroughly. Then he remembered Yasuda. He'd better just have a look at the fellow before he plunged into the human mess waiting for him in the clinic. . . .

Yasuda was sound asleep. Somehow he had simply fallen asleep. His breathing was easy, his muscles were supple. He opened his eyes suddenly, aware of having been waked. A moment before he had thought drowsily that someone was in the room, but then hearing nothing he had slept on. Now the door opened and shut and he heard it. Two people stood at his bed. He wet his dry lips with his tongue. Something was wrong. He felt perfectly well. The drug had not worked! He stared and saw the Chinese female doctor and Thomison, the American, and he tried to smile.

"You are better this morning," Gray said in surprise.

"Much better," Siu-mei murmured. Her face went completely white. Then to her astonishment she felt her head whirl, the light of the morning went black before her eyes and she fell across the bed.

"She has fainted," Yasuda cried. Without knowing what he did he leaped out of bed and in his hospital sleeping pajamas ran to the ewer and dipped a towel into the water and ran back to Siu-mei, clucking with his tongue against the roof of his mouth and wiping her face and slapping her hands with the wet end of the towel. It was done in an instant. Then he remembered himself. He stole a sick look at Gray. And he saw Gray standing there, tall and stern, the amazement on his face changing rapidly to certainty.

"You are very strong for a sick man, Mr. Yasuda."

Mr. Yasuda giggled. "I? Yes, please, thank you—" In his agitation his voice trailed off into a squeak. He looked at Siu-mei helplessly and saw her eyes beginning to open, and he threw the towel under the bed and crept into bed and pulled the covers up to his chin and lay looking at Gray, the frightened smile on his face.

Siu-mei struggled to her feet. "Oh," she sighed, "I never fainted before."

"You could not have chosen a better time," Gray said distinctly. "Come, let us go."

He took Siu-mei's arm as she spoke and led her to the door with him. Then he paused and took out the key. When they had gone out he paused once more and locked the door. Then he turned to Siu-mei.

"You had better go and rest," he said.

"I cannot," she replied. "I must tell you a matter. It is why I fainted—so stupidly, I know, but I could r —that he was all right. Bu

"He certainly was," Gray sa into my office then." He le his office and closed the doc her into an easy chair and po water into a glass and gave

"Tell me quietly and as you he said.

She sipped the water a mor she put it down, and gatherin all the strength of her soul, she what Ya-ching had told her.

"Then," Gray said, when through, "the sooner we sen away the better."

"Yes," she said.

"And he—Chung—he must

"Yes," she said again. Then look broke. "I cannot—will y go to the Eagle, Thomison d tell him that he can come fo if you will, do—the other."

"Certainly I will," Gray sa not fitting for you. But how c to the Eagle?"

"My father knows the way," "He has been there and he w me."

"Go then," Gray said, "as you can."

"Now," Siu-mei said, "no *he* comes back. I must neve again!"

"Now," Gray agreed.

She slipped from the room minutes later he saw her hurr the steps of the hospital and great gate. . . .

IN HIS bed Yasuda lay an until he could bear it no m he got up and tiptoed across to the door and tried it. It w as he had feared. He went t dow and looked out. The high up and the court below To leap would be folly if only a leg; if worse, it would b way even to die. Better to many pills than lie mangled!

He was a good Buddhist a spected the wholeness of th body. So he went over to t and took out the pills and po into his hand. There were o left and as he examined them once that they were frauds. ones were hard pellets like cl he could crush—who had d Chung—Chung had betrayed heard a footstep and he rushed his bed and feigned sleep. tried the door, found it locked away. He opened his eyes an ing at Chung, the traitor. So al this Chinese had been betra while he took his money! Al

"Let's buy it, dear. In your spare time you can putter around fixing it up"

STEEL is a Sissy!

AC Insulators are fired at heat that melts steel

It's plenty hot inside the engine of your car. But it is *far* hotter in the great ovens in which AC spark plug insulators are fired. In fact, the standard temperature inside those ovens is so high that steel would quickly become fluid.

This firing process is only one of hundreds of operations which result in spark plugs of a quality and capacity for peak performance second to none.

That result,—peak performance,—is the one most important thing about spark plugs to the manufacturers of cars and trucks. And it must be *reliable* performance, proved decisively in the endless, punishing tests to which those manufacturers subject plugs.

So, there is great significance in the fact that *more AC's* are used as standard factory equipment on new cars and trucks than *any other* make of spark plugs.

When you replace your plugs, get AC's always. Thus, you'll always get complete reliability and peak performance.

New AC's every 10,000 miles will more than pay for themselves

AC SPARK PLUGS

DIRTY PLUGS ROB YOU OF GAS!

Dirty plugs cause a gas loss as high as 1 gallon in every 10 you buy. So, have yours cleaned and regapped every 4,000 miles,—5c a plug.

Get Plugs Cleaned where you see this Sign

were liars and traitors! He would get out somehow and back to his own people and tell them that it was true, all Chinese were liars and traitors.

In his helpless rage he thought of his own country, his good faithful wife and his honorable old parents, his four little children and his lovely garden and he began to sob. Perhaps he would never see them again. By this time he was wailing softly in a sort of madness of rage at Chung, who had betrayed him.

"It is your fault, sir," he said to an imaginary Chung standing before him. "If I am compelled to commit a crime and kill you, it is your fault and I am guiltless."

He sat up cross-legged on his bed and squared his elbows. His face was now the color of red wine. His eyeballs protruded with the force of his glare as he watched the door.

"I am a tiger trapped," he chanted softly, deliriously. "I am a strong Japanese tiger!" . . .

Chung ran up the steps of the hospital gaily. He had had an excellent feast. The wine was extraordinary. Besides, he had done what he had planned to do among his fellows. They knew, now, that the patriotic duty of all far-seeing Chinese was to make peace with Japan on any terms.

He and Yasuda had talked this over clearly many times. Later, of course, though he never told this to Yasuda, when the Chinese were strong and thoroughly modernized they would throw the Japanese out with all the other foreigners. He foresaw infinite possibilities ahead for power. To use people, that was the secret, he told himself, smoothing down his hair before the mirror in his office, to use people as he now used Louise and his brother and Ya-ching, and, for that matter, Yasuda himself. He thought with satisfaction of Siu-mei. In that day to come when he was a powerful and important man she would be worthy of a place beside him as his beautiful wife.

HE LEFT the office feeling very content with himself. This war, he was thinking, was actually turning to his advantage. He would go first to Yasuda and tell him how successful he had been in persuading his friends. So he went down the corridor and turned the handle of Yasuda's door and to his surprise it was locked.

Who would lock this door? He had a master key on the key ring in his pocket but he paused a moment before he used it and listened. Then he turned the key quickly in the lock and went in.

Something sprang at him from the bed, a knot of concentrated fury flung against him, slammed the door shut behind him with its impact and bore him down. He struggled against it, clawing and scratching and kicking, but the thing was digging in his entrails and clutching at his throat. He was nothing before this ball of iron. He felt his head bent far back and heard the loud click-clack of his own breaking neck. Then he knew no more. . . .

Ya-ching, coming back again to Yasuda's room, opened the door softly, now, and saw that last backward thrust. She cried out, shut the door and locked it and took away the key and ran through the corridors to the cubicle which was her own room. She did not hesitate for one moment. Chung was dead, so what reason had she now for accusation? What reason even to stay here any longer where he was not?

She found a large, blue cotton handkerchief and into it she packed quickly all her belongings. There was almost nothing—her one good suit of dark clothes she put on. Her old mother had made them for her when she came to Chen-li to find work as a serving-maid. They had told her here that foreigners paid good wages and so she had come to the hospital and begun as a scrubbing woman. She had worn uniforms ever since, except for the red silk gown she had bought to wear for *him*. She put this in hastily, and her wooden comb and her foreign toothbrush, and then she tied the handkerchief and crept out, down the back stairs, out of the back court.

Everybody was busy with the beggars Durand doctor had brought in. They had grown used to idleness in the hospital and everybody was grumbling about having to clean and cook for beggars. She ran for the back gate and went out into the narrow alley that led to the street that went down to the river. There at the river it was easy to find a boat going up the rapids to the next town and from there she could walk across country to her own village. What she would do then, she did not know. They would not welcome her nor the extra mouth she brought with her.

But she never reached her village. Who that had known Ya-ching could ever tell what became of her? The boat was crowded with people weary of the dangers of Chen-li. She had to squeeze herself into the edge of the crowd and the boards of the small junk were slippery and wet. They said that the pock-marked girl sat on her bundle at the very edge of the deck and there was nothing for her to hold to when in the midst of the rapids the junk heaved to one side. She slipped off before any hand could catch her, and the rapids covered her. Useless it was to endanger them all by stopping in that dangerous place. Besides, who had courage to rescue a creature snatched by the river god?

People looked at one another and murmured. "Doubtless she had committed some crime and the gods punished her."

"Doubtless it was so," they told one another; "a girl traveling alone, and with child."

They opened her bundle and looked but there was nothing to tell her name, so what could they do with the garments except divide them? "I will take that red thing," a woman screamed, and she put out her strong, brown arm and tore it out of the hands of three others. "Give me the handkerchief," a toothless old woman cried, so they let her have this last thing and she took it and tied it over her head and was pleased. "The sun was hot on me," she remarked, "but the gods help the good." . . .

But Ya-ching's scream at his door had waked Yasuda out of his fury. [illegible] his head, then he got up, trem[illegible] tle. He suddenly felt cold [illegible] The Chinese was dead. He h[illegible] gotten that trick of jujitsu, th[illegible] he had learned it as a young n[illegible] never thought to use it on a [illegible] creature. But this he had [illegible] pelled to do. Had he not [illegible] pelled? He shivered and wo[illegible] he had not been a prisoner a[illegible] mies, it would not have been [illegible] But when the one man who [illegible] trusted proved traitor, there [illegible] ing to do but kill him.

"A-mit-ah-ba!" he mur[illegible] Buddha.

Only now did it occur to hi[illegible] was the moment for escape. [illegible] the door—locked! But how [illegible] locked? It had been open—it [illegible] been open when the Chines[illegible] There had been no time for [illegible] a fever he felt through Chu[illegible] ing. There was no key—not[illegible] letter. He threw the letter [illegible] picked it up again and put [illegible] pocket. It was one of the let[illegible] ready for the white woman to[illegible] had better keep it. So then h[illegible] prisoner! And there was this [illegible] eyes ran over the small roo[illegible] was no place to hide the body [illegible] thought of something. Chu[illegible] was almost directly above his [illegible] floor. He could throw the b[illegible] the window. It would fall [illegible] court below. Who would k[illegible] which window it had fallen w[illegible] crushed upon the tiles belo[illegible] broken?

STRONG with his need, [illegible] Chung's body, graceful eve[illegible] the head hanging strangely lil[illegible] broken at the stalk. He stagg[illegible] window and looked out. The[illegible] a person to be seen. It was ti[illegible] noon meal, the best possible [illegible] what he had to do. He gath[illegible] self together and flung the bo[illegible] was gone. NO MATTER WHAT STYLE YOU WANT, KROEHLER MAKES IT

IF you like your paint jobs to last, here's something it will pay you to remember:

Paints made of pure white lead resist weather better. It's a pretty safe rule: *the more white lead, the better the paint! You can't, for example, get a more durable paint than one made with 100% pure white lead.*

White lead comes by its durability naturally. It is made from lead—and like lead, stands up against any weather. Heat waves, cold snaps, rain, snow—it stands them all without cracking and scaling.

Thus white lead paint jobs keep their good looks longer. The paint wears slowly, cleanly and evenly.

That means, too, when repainting time comes, there's no make-ready expense, no burning and scraping. The surface is always ready for the brush.

Best of all, white lead costs no more than regular quality paints. In reality, no other paint gives you so much for so little. It goes far, lasts long, keeps its looks. It's one case where the best is really cheapest.

LEAD INDUSTRIES ASSOCIATION

FOR MODERN UP-TO-THE-MINUTE PAINT STYLING HIRE AN EXPERT PAINTER

The decorative coloring now in vogue demands the hand of a craftsman — a man whose skilled workmanship lends lasting beauty to his job.

COLORS AND HOW TO USE THEM

You'll find a lot of helpful information on mixing popular hues in a booklet, "WHAT TO EXPECT FROM WHITE LEAD PAINT." It's free. Send for your copy now.

You're money ahead when you paint with White Lead

ASK YOUR DEALER ABOUT THIS. In addition to the regular paste form, pure white lead is now available as a ready-to-brush paint in convenient, popular-size containers, at paint dealers' everywhere.

his garden and his little children and his wife and his old parents.

"Return me, O Buddha, in peace to those who wait for me!" And thus praying, he waited.

UPON the thousand stone steps of the mountain Siu-mei climbed steadily upward. Behind her the chair bearers swung her empty sedan chair. Never, they agreed, had they hired themselves better than to this girl who walked endlessly on her own two feet. Old Mr. Ling, sitting tilted up in his own sedan still farther behind, watched Siu-mei anxiously.

"Spare yourself!" he called to her.

But she called back, "I am better if I am walking in this sun and wind!"

She went on steadily and he watched her, tenderness in his eyes. All would be well for this beloved child of his, he was thinking. The gods were knowing. They had ways to heal the hearts of the young and the good.

"Drink tea!" he called loudly at a small wayside tea shop tucked into the crevice of the cliff.

The chair coolies let him down grunting. "There is iron in this old sir," one said jovially to another. "I never knew a thin old man to weigh like a fat one before," another said.

Mr. Ling laughed and threw them some copper coins. "I grow very heavy each time we come near a tea shop," he said. Then they all laughed.

Siu-mei, seating herself at one of the rough, small bamboo tables, smiled without hearing. Mr. Ling sat down beside her and handed her his fan. The wind had suddenly died down.

"It must be well after noon," he said, squinting upward at the sun. "We will be there in another two hours."

She did not answer and he sat peaceably drinking his tea. Whatever the gods designed it was well. There was design in this moment upon the mountain, design, he thought half smiling, in the color that sun and wind were putting upon Siu-mei's cheeks. He looked at her, an old man long past caring for such things, but still he was pleased that his only daughter was very beautiful.

"She was too pale when she came home this morning," he th

hair. The wind has blown it into a tangle. And a handsome young man is waiting up there."

He smiled at her, daring to tease her, and she caught that teasing look and turned away. But he was well pleased. For she obeyed him and when the coolies lowered the chair she stepped in, and he saw her later when the gates of the Eagle's encampment were in sight, mending her hair and making it neat and looking at herself secretly in the mirror of a small foreign handbag she carried. He laughed to himself, the quiet laughter of a wise old man. In a few weeks, in a few days perhaps, when he teased her she would pout instead of turning away, and then when he teased her she would smile and then blush, and so a better love would begin. He felt wonderfully content.

"How well the gods manage for us all" he remarked to the universe about him. . . .

As for Chen-ta, he had had no idea of the fortune now drawing near him. He had come back to the mountain two days before, bringing all his men back with him to prepare for a great secret attack upon the enemy at a spearhead they had made by pushing into a village within twenty miles of Chen-li. He was putting all his strength into this attack and his eyes were on Chung Third night and day. It would have been easy to have the man killed, but foolish, for while he was alive and free he would reveal the whole of what Chen-ta now suspected to be a vast secret. So he kept the man alive and near him so he could not run away and sweating with uncertainty and fear.

Thus when the green flag flew the Eagle was there on his mountain, and now his men, always watchful on the path, sent word that guests were coming—two sedans. They were at first still too far off to see who they were, so he waited in his main court, eating oranges and drinking wine. Then it was told him who they were.

"The honored old Ling," his man said, scraping the dust with his bare toe, "and his daughter."

"Not that one herself!" he shouted.

"Which?" the man said stupidly.

"The beautiful one, fool!" Chen-ta bellowed.

"This is one certainly worth a man's eyes," the man retorted, "for I saw her myself."

Chen-ta leaped to his feet and ran for his own rooms. "And I sitting here like a lout!" he roared. "In dust and dirt and orange skins!"

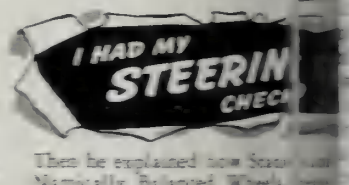
HE YELLED for hot water and foreign soap and for his barber and for his good new clothes and leather shoes and his new wrist watch he had taken from a Japanese captain not long since, and everybody ran about to serve him, thinking him mad.

But he had himself clean and at his best in the little time left, and the courtyard swept and new tea and wine and little cakes ready, and when it was cried at the gates that they were come he stood up and the sun shone on his dark handsome face and he looked like a king.

"Like a king," Mr. Ling thought. But he did not say so. He merely came forward, walking in the swaying way that old scholars walk, his robes swinging from side to side, to make his greeting. And when this was done he nodded to Siu-mei as at some small thing he had brought along.

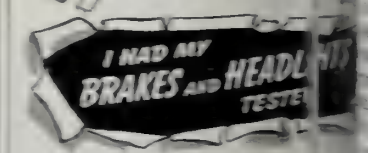
"This one," he said to the Eagle, "is my solitary, negligible child whom you have seen."

Then he stepped back to enjoy himself. And what he enjoyed were these two, standing face to face, looking at each other, as if for the first time they saw what they were.



(To be concluded next week)

"Tell your boys to stick right behind me and I'll get you through"



I went looking for a Free Four Leaf Clover . . . and found the best precision safety test and correction equipment in town! First thing that Bear trained me about was the Bear Wheel Balancer, that precision machine which finds many defects that cause hard steering, shimmy, side-sway, tire wear and skiddiness. So . . .

Then he explained how Sco Matically Balanced Wheels mileage as much as 50% shimmy and unsafe steering- how the flashing the Bear Dy-Na Balancer detected anced condition up per hour. So . . .

Then my Bear man explained lights and Brake Testing Se the Bear Headlight Tester not lights aimed but also beam elevation—all of which are headlights that are safe and driving a pleasure, how the Tester works on a r exclusive, more a rate test principle. . .

Sure was Lucky for me . . . to drive a really safe car . . . a bigger kick out of driving t night . . . and I'm saving mon I drive . . . That's why I say

ye, sir."

Commander Kirstell had not his ffice at the shipyard. He said wou come at once.

HE I got back to the library, my fat was pacing the floor. It hurt to hin o troubled and so bewildered. lt li cursing Navy Station and ev- one it. The admirals who had lishe Dad to this measly little Yard I su eeded better than they knew; wa real punishment station. He tra ed himself to think in terms men d ships and guns—bold stra- ic ic s with the breadth of oceans co nents for their scope. They cor mned him to struggle with a twi d, wayward human hearts. I've id . . . er . . . a rather trying ion th Pop and Mom."

It m t have been," I said. Mom as the right of it. Says Pop er derstood that boy. He was kish d studious—Pop wanted him shoo ducks and quail. Mom says it ha horror of killing. Pop thought was rely cowardice. Adds up to a chic nflict, doesn't it?"

My h t sank. Mom had got to work the pper with her sentimentality. had ulled the wool right over his .

Mom just a doting mother," I said. The sper looked at me in surprise. ou do t agree?"

No, ! I've known Bert since we re ch ren. He's an utter no-good." We a ied the point, painfully. My her s med entirely unable to think Bert anything but a mischievous oolbo the son of old and dear ends.

I was ery glad when the doorbell a Dolores announced Lieut. mmar r Kirstell.

He ca in, looking stolid and calm, fact at he wore his uniform mak- him eem more the typical officer less e sleuth.

My fa er quickly explained what had ppene I was prepared to have Kir- ll's g turned on me, questioning, if h suspected me of having be- yed o secret to Mrs. Briscoe he kept e ma ificently. The skipper looked m righ in the eye and said: "Phyllis as mu surprised about this as we Co ander."

Kirste nodded. "I think I know who ld Mr Briscoe," he said, his tone vel an old.

The sper halted. "Eh? You do?" I start to warn Kirstell, thinking he d mad a mistake, but his next words ld me at I was wrong.

"This ll come as a shock to you, sir," said. But I suspect young Sedden." How ould that be? How would he ve kn n?"

"I thi he's the lad, sir."

"Bert dden? Bosh!"

"I could be mistaken, of course."

"That youngster . . . a traitor? Really—"

Lieut. Commander Kirstell looked so unhappy that I went to his rescue.

"It's what I was trying to tell you, Dad," I said. "We didn't want to upset you with suspicions until the case looked pretty clear."

Then, I hurriedly sketched what Kirstell had told me about Bert and what I had learned on my own account that afternoon.

As soon as I ran out of breath, my father said, "That's interesting . . . that's interesting . . ."

He took a slow turn about the room.

Lieut. Commander Kirstell said, "I would suggest, sir, that Mrs. Briscoe be questioned at once. She should certainly be muzzled before gossip spreads over the whole station."

My father frowned. "Wouldn't it be more diplomatic to talk to Briscoe, rather than his wife?"

This was the tip-off that I would have to take charge of things. Even a lieutenant commander in Intelligence can't get tough with a four-striper. R.H.I.P. (translated: rank hath its privileges) is the sacred cow of the Navy.

"Look, Dad," I said, "I know how cruel this will be to Pop and Mom. But the kindest thing for everybody is to get this mystery solved as soon as possible."

"You're right, Phyl. I—I—just can't believe—"

"We'll soon know," I said. "Obviously, Commander Kirstell isn't the one to question Mrs. Briscoe. He's supposed to be a constructor at the shipyard. So it's my job. Right?"

"You couldn't do anything with Mrs. Briscoe."

I could not forbear to grin. "Wrong, sir!" I said. "That woman is my meat. I can get the truth out of her in five minutes!"

The skipper sighed. "Very well. If it must be done."

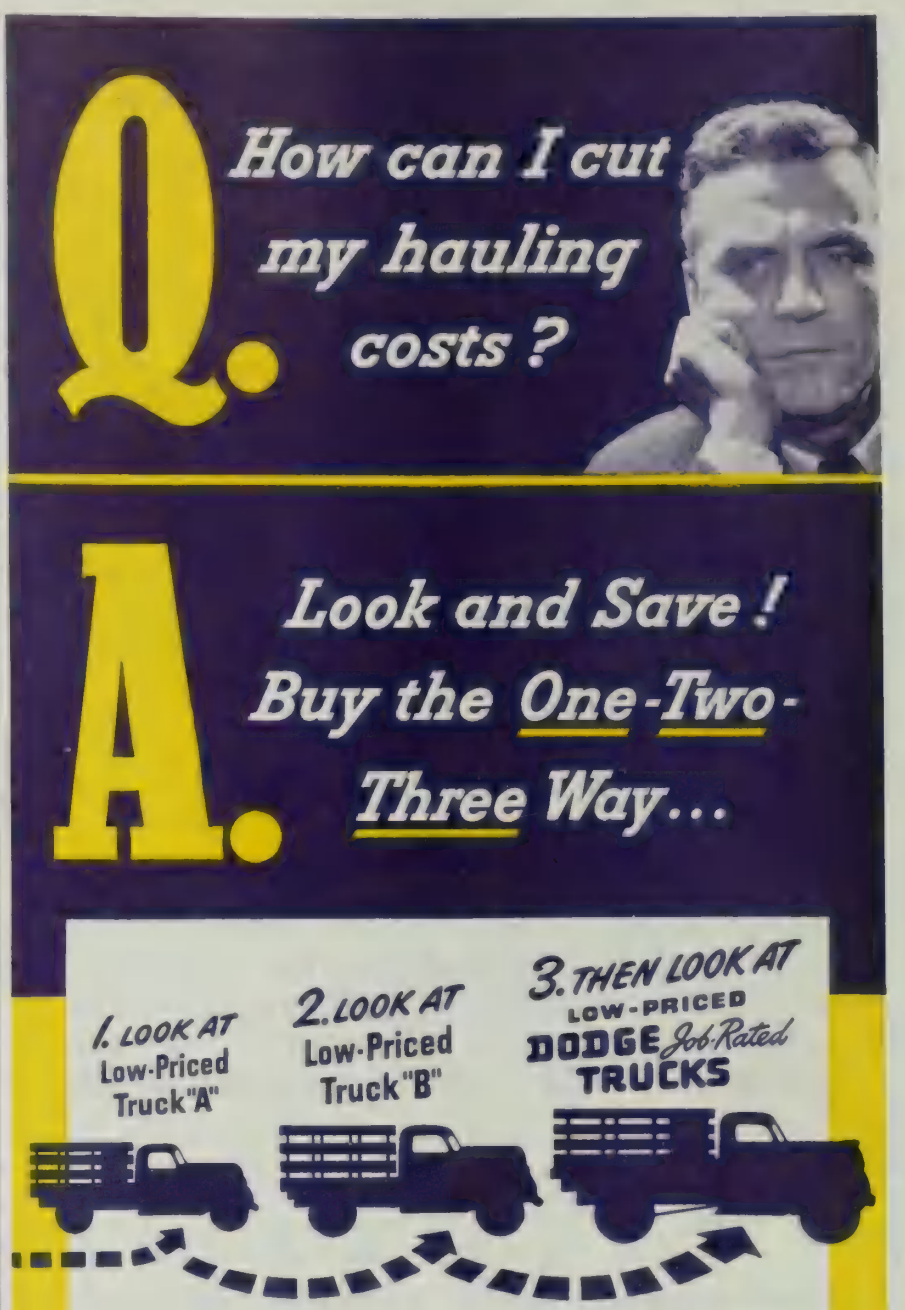
I TURNED to Lieut. Commander Kirstell: "Anything you want to know besides the name of the person who told her about our traitor?"

Kirstell consulted his notes: "Whether she knows there is an Intelligence man here . . . and if I have been identified . . . and how many people she has told . . . and, of course, she's got to be shut up immediately."

"I'll put the fear of Cap'n Hartney into her," I promised. "And, Dad, you've got to back me up. Also, you should phone and get Pete away from the house."

"He has duty, I believe."

I jammed on my hat and put on my coat, Kirstell assisting. He followed me to the front door. "Good girl," he said, "I'll try to keep the Cap'n bucked up until you get back."



"I won't be long," I said.

I marched across the parade ground in a cool and lethal fury. We would all be ready for an explosion if Mrs. Briscoe had blabbed too much. What a nice morsel of gossip to make the rounds at Navy Station just now. Oh, dammit, I thought, I must really lay that big floozie out this time. The devil sharpen my tongue and feed me words that snip and cut and sting and burn!

Alas, I was given no opportunity to show off my blistering wit and genius for cross-examination. Mrs. Briscoe opened the door. "I'm glad you've come, dearie!" she said.

"Oh . . . you are?"

She pulled me into the hall and hastily shut the door. She was dressed in

HERE'S a suggestion that's as free as the air you breathe. And it can save you some money . . . maybe a lot of money!

Buy your trucks the one-two-three way! In other words, before you lay your money on the line for any truck, look at Dodge Job-Rated trucks.

COMPARE TRUCKS—Check and compare all important truck features. Be sure they're the *right* quality and the *right* size in the truck you buy . . . built for the job . . . to stay on the job . . . to save you money!

They will be *right* in a Dodge *Job-Rated* truck . . . because that's what "Job-Rated" means . . . trucks *built to fit the job!*

When you pay for quality, *get quality* . . . Dodge quality . . . *built-to-last quality* . . . in design, materials and workmanship.

COMPARE PRICES—You don't have to pay extra money for such a truck, because Dodge *Job-Rated* trucks are priced with the lowest. See your Dodge dealer for a "good deal," too . . . liberal trade-in allowance, easy budget terms.

TRUCK-TRAILER METHOD OF HAULING!

ESSEX WIRE CORPORATION NOW HAULS THREE TIMES AS MUCH PER TRIP . . SAVES MONEY . . REDUCES INVENTORIES . . GETS GREATER OPERATING FLEXIBILITY . . IS ABLE TO GIVE BETTER SERVICE TO CUSTOMERS

Faced with the necessity of lowering its hauling costs, the Essex Wire Corporation experimented back in 1932 with its first Fruehauf Trailer. The move proved sound from the start and as the Company expanded—which it rapidly did—so, too, did its fleet of Fruehauf Trailers until fifteen are now in service.

★ ★ ★

Bigger Loads—By using Trailers, the Essex Corporation finds it possible to *pull* far larger loads than could be *carried* with trucks of the same size. A truck will easily pull three times the load that it can carry. This results in important savings since fewer trucks are required to handle the same tonnage.

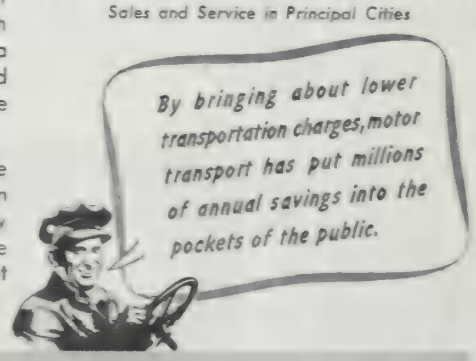
More Flexible—Essex has been able to maintain more flexible service between the main plant at Detroit and branch plants and warehouses throughout the Middle West. Largely this is the result of Truck-Trailer operation. In many industries one truck serves three to five Trailers, permitting simultaneous loading, unloading and hauling.

Smaller Inventories—Essex has found it possible to reduce inventories at branch plants, since, at a moment's notice, a Truck-Trailer can be *economically* routed with a capacity load to the point where stocks are needed.

Prompt Delivery To Customers—The Essex Corporation has frequently been able in emergencies to render unusually prompt service to customers, due to the extreme flexibility of its inter-plant Truck-Trailer hauling system. Stocks can be quickly moved from plant to plant for customer's convenience or delivered direct to destination.

YOU SAVE IN EVERY WAY

It's easy to see why Truck-Trailers are being used with such success in more than 100 lines of business.



Your investment is less, operating and upkeep costs are lower and replacement costs are less. Owners report savings of from 30% to 60%.

Why not look into the Truck-Trailer method of hauling? A phone call will bring a trained Fruehauf man with all the facts.

"Engineered Transportation"

red silk lounging pajamas and had a cigarette in a long holder. She had been weeping and looked scared, almost panicky.

"I just this moment started to dress to go see your father. They're trying to frame Pete!"

"No-no!"

"It may be safe in here"—pulling me through a wood-beaded jalousie into what looked like a Chinese opium den. —"though Gawd knows. They may have dictaphones planted on us!"

MRS. BRISCOE'S taste in home décor was dramatic, running to imitation jade lamps with shades made from armadillo shells, long-legged dolls sitting in corners, imitation butterflies pinned to the window curtains and a veritable labyrinth of teakwood screens.

"Sit on the sofa here, honey," Mrs. Briscoe said. "I'm so jittery I can't rest, myself. Oh, the dirty so-and-sos. So-and-sos, every man jack of them! But they won't get away with it. I'm going to squawk to every senator in Congress, that's what!"

"I'm sorry . . . I didn't *quite*—"

"There! You see how I am? A nervous wreck, ever since Bert told me. I couldn't believe it, at first. I knew they hated Pete, but in my worst opinion of their dirty ways I didn't think they'd try *this*. A traitor . . . that's what they say Pete is! Can you tie that? Yeah, a traitor!"

"That's silly—"

"It's a lot of things, but it ain't silly, kid. Framing a fine, clean boy that worked his way up from the ranks—"

"Bert told you?"

"Yeah, you see—"

"And who did he say was going to accuse Mr. Briscoe of being a traitor?"

"That's the hell of it. I couldn't get that out of him. If a person knew exactly what louse she's got to fight—but I know! Why do I kid myself? They're all in on it—Collins, McMatthews, Cowles, Conroy, Davis—they don't fool *me*."

I tried a smile and a shrug. "I'm astonished that you'd listen to Bert Sedden, Mrs. Briscoe—"

"He was drunk, see? What a boy tells you when he's drunk he means. He come in here from town about an hour ago. He had a load. He drank some more while he was here. Oh, it's true all right, Miss Phyllis!"

"Bert was just talking."

"Just talking, hunh?"

"Of course. Even if such an absurd thing had any truth in it, how would Bert know?"

"I might've known you'd defend them. Annapolis people can do no wrong, hunh?"

"I don't say that—"

"You know what *I* did? Soon as I could get rid of Bert—even before I told Pete—I went straight over to your darling, pure Mrs. Cowles' house. I looked her straight in the eye and told her she wasn't going to get away with this. And if ever a woman looked guilty *she* did."

"Have you told anyone else off?"

"Not yet!"

I got to my feet. "Well, Mrs. Briscoe," I said, "Mrs. Cowles told Mrs. Mac, so it's probably all over the station by now."

"So what? So I guess I should lay down before something like this and say nothing, hunh?"

"In the first place, Bert was lying."

"A boy don't lie when he's drunk."

"My father has heard this silly gossip."

"It ain't gossip—"

"He says there's not a word of truth in it. Do you doubt my father's word?"

"Your Dad don't know what they're up to—"

"I'll tell him that!"

"Oh, no—"

"Dad has been the best husband ever had in the Se Briscoe."

"Don't think I ain't grat Dad is—"

"But you want to call him

"I never said that! I said-

"Cap'n Hartney denies tl is trying to frame Lieutena Is that good enough for yo it?"

"Yes, but—"

"Put on your coat. We'll my house and you can re you've said to the cap'n."

That pulled the props from Briscoe. When these holy te unstuck and fall apart they r Mrs. Briscoe collapsed on a love seat and started to b needed to do was to stand ov drop coals of fire like these: all my father has done for "Taking the word of a dru Communist" . . . "If I told P he'd leave you!" . . . "If I tolc I don't know what *he'd* do!"

Pete Briscoe's big, brunet and moaned and denied and finally reaching the point said, "Just let's forget the w eyed thing, Miss Phyllis. I and talked out of turn again. it was."

"You believe the cap'n?"

"'Course I do!"

"If anyone asks you about deny it?"

"Yes. Sure. I will!"

"Okay. Now tell me just more—what were Bert's exa

"You mean . . . about the b

"Yes. Just what did he sa

"Well, he said Navy officer a pain, all except Pete and I Roberts, the new one at the said the rest of them were lousy snobs. Then, he laugh funny—like drunks do and sai a pal of mine, Josie, so I wan you. They're hunting for a tr They'll try to pin it on Pete. I do to have an Academy mar to be a traitor.' That's just said, in so many words. But w to get more dope he shut up lik

"Where's Bert now?"

"He said Commander Se kicked him out, so he was goin to the hotel."

I LET go with the final broad . . . and told you this yarn even," I said. "He knew you Annapolis people and that right out and blab. I thought brighter than that."

Mrs. Briscoe dried her e fooled me, Miss Phyllis," with a sudden, honest hum made her almost likable. "I knew that's the one thing I be of all along—them framing P sure took the bait."

I held out my hand. "You'l any more gossip?"

"I'll do better than that. I'l over and apologize to Mrs. C say I didn't mean it!"

"Swell!"

She followed me through door to the porch.

"I-I'm sure glad that traito a phony, Miss Phyllis!" she "It'd be terrible."

There was something in th Mrs. Briscoe's voice that pu But I was in too much of a hu back to Kirstell and the sic close analysis at the moment. Mrs. Briscoe, we smiled at ea sweetly and I hurried off acros rade ground.

Dores, ah, Dolores of the angels! ... lease ... rgive her and us. Sincerely,

DENT ROBERTS

"Ees love, no?"

I quickly refolded the note and stuffed it in my pocket. "In ... way . . . but yes," I said.

Dolores rolled her eyes and clasped her hands. "I have prayed for you, Señorita!" she said in Spanish. "To five saints. I have also talked with Lieutenant Robert about you. He considers you beautiful but immature. It is a question of impressing him with your maturity. If you could but manage accidentally to disrobe—"

"Dolores!"

"You are angry with your slave who loves you?"

"Go put the soup on!"

"You think of soup—oh, oh—"

"*Si, si*—I think of soup. Begone, you shameless wench!"

"Pah! That pretty-faced stick of ... wooden soldier still has you deceived."

"Soup . . . soup, hurry!"

"You are to marry the Lieutenant Robert! I will myself slit that other one's throat, before I permit you to marry him!"

"Shut up!"

But Dolores, reckless because my father was absent, kept after me all the while I struggled to eat some dinner. I was sullenly silent, angry at Dolores for going down to the basin with gifts and pestering Savvy Roberts; but too preoccupied with thoughts of what might be happening in the skipper's office for argument. Dolores rattled on, informing me that Dutch and Pat were nice young men, in ... wicked, godless, immoral way; that neither would be above an attempt at seduction; that The Man, the Lieutenant Robert, would protect her as he protected all women; that something must be done, but immediately, to impress Lieutenant Robert with the fact that I was a grown-up girl. And so on, and so on.

I suffered all this and an agony of suspense besides, for about an hour.

Then I went over to the skipper's office.

My father was alone at his desk. He had been studying ... sheaf of reports.

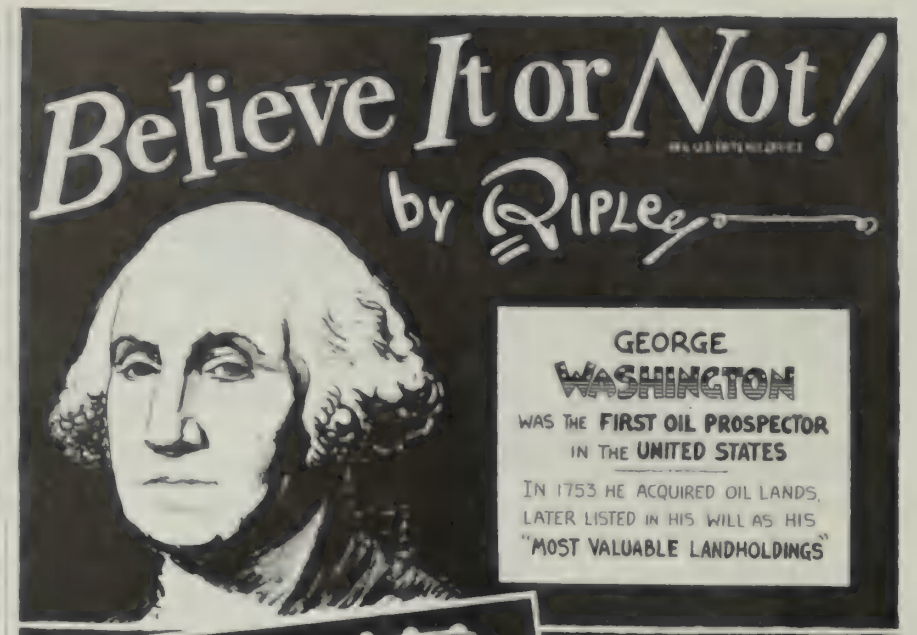
"I—I couldn't sit at home any longer, Dad," I said.

"Nothing has happened. They can't find Bert."

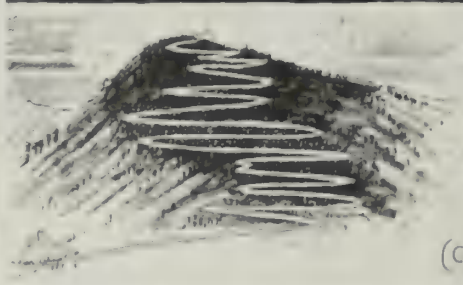
"Not at the Arcadia Hotel?"

"No. Commander Kirstell has gone to the village to make ... thorough search."

"Mom might know. Shall I go over there?"



"No, no—we'll keep Mom and Pop out of this. I think the boy has skipped."



But I knew better. "He's hiding somewhere," I said. "He'll try to interfere with Lieutenant Roberts. They sent him here to do just that."

The skipper was startled. He got up

and walked to a window. I pressed my point eagerly.

"You've got to call off that test, Dad!" I said. "Either that or tell Lieutenant Roberts what we know about Bert. It isn't human . . . it isn't fair. What if Bert has sabotaged this gadget? He—he'll be—killed—"

"That's a bit extreme."

"It's not! You know something ghastly might happen!"

"Well . . . I'll ask Commander Kirstell."

"Kirstell! A heartless, cold-blooded—"

My father looked at me.

"You show a good deal of feeling," he said. "Are you interested in young Roberts?"

"Yes," I said.

"In love with him?"

"I think I must be."

"What about Roger?"

"I'm fond of him . . . but that's all."

"Has . . . er . . . Roberts . . . shown any interest in you?"

"No, sir."

The skipper sighed and patted my shoulder. "Navy Station is getting to be . . . quite a problem, Phyl," he said. "But we'll—"

A knock at the door interrupted him.

"Come!"

THE door opened and Pop Sedden shuffled in. He was in uniform, cap in hand.

"Oh . . . good evening, Pop!" my father said.

Pop moved slowly toward us, his eyes watery and his mustache twitching. He looked like a beaten, tired out old man.

"Here, Pop—" I said. "sit down."

He made a gesture with his hand, keeping his eyes on my father.

"Joe," he said. "I understand you're looking for a traitor on this station."

My father is a miserably poor liar. He hesitated only an instant, but that was too long.

"Oh, Pop!" I said. "Have you heard that silly gossip?"

"Nothing in it, nothing in it at all, Pop," my father said.

Pop did not believe us. "I think there is, Joe."

"Nonsense . . . can't understand how such a yarn ever got started—"

"It was Mrs. Briscoe," I said. "You know how she is, Pop. Anything to start trouble—"

Shaking his head, Pop continued to peer into my father's face.

"It is very hard for me to say this, Joe. But I think . . . my son . . . is the traitor. His mother has just confessed to me . . . that . . . that he worked as a Russian spy . . . in the East."

"Oh, now, Pop—"

"Naturally, our long friendship would make you reluctant to suspect Bert. But I do not want you to embarrass . . . any officer here . . . until you have thoroughly investigated . . . my son. I'm sure . . . that you will find him . . . guilty. I . . . I am sorry . . . he has brought this disgrace . . . on us all. He is no longer my—"

Pop turned toward the door. He put on his cap, using both hands—and they were shaking.

My father hurried after him. Pop shrugged off the arm my father tried to place around his shoulders.

"No . . . no . . . please, sir—" Pop said, brokenly.

He walked quickly out of the room.

The skipper turned to me. "I'm going with Pop," he said. "We'll have a talk."

I stopped him, saying, "You'd only make it worse. Your sympathy convicts Bert. Don't you see that? Leave Pop a little hope that we may all be wrong."

Wincing, my father nodded. "You go talk to Mom."

"What good would that do? She'd know I was lying. And if Bert isn't guilty, she'd never forgive me for showing that I thought he was."

(Hindsight Note: My father's instinct was the right and decent one here. Deeply as the Seddens' tragedy affected me, I was more concerned with what I felt was an impending tragedy at the basin. I was hysterically afraid Savvy Roberts would be killed.)

Thus, instead of seeking some way to ease the shock for Pop and Mom, I drove furiously and selfishly at the skipper on the point of calling off the rocket-engine test. I demanded that he send an order to the basin right then and there.

My father, a little ashamed of me, pretended to pluck something off the sleeve of my coat, saying gruffly, "Here, put this in your pocket."

"What is it?" I asked.

"Your heart," my father said.

But I got redheaded mad and sobbed out, "You send that order! Send it . . . send it!"

The skipper hugged me and gave me a quiet lecture on self-control. Then, he added: "I'll go down and talk to Roberts."

"I'm going too!" I said.

I was a spoiled brat and should have had my pants paddled and been sent home to bed. But my father is a patient, kindly man and, by this time, I had convinced him of the danger to Savvy.

He let me tag along.

This time there was no waiting at the canvas barrier fence. The guard came to salute, my father said, "Good evening, Benson," and we stepped inside the holy of holies. It was a balmy, moonlit night with no wind and a calm sea. The basin water had scarcely a ripple. Arc lamps rigged around a small wooden landing stage near the boat shed made the scene almost as bright as day.

Savvy and Pat and Dutch were tinkering on something that looked like a big speedboat, except that it had a peculiar, ungainly nose and a very broad beam. I felt an immediate distrust of this contraption.

As we approached, a corporal in charge of the guard at the boat shed snapped, "'Tenshun!" and there was a metallic clatter of rifles. Savvy warned. He jumped thwart to the landing stage forward to greet us.

"Good evening, Cap'n, sir! Miss Phyllis!"

"Hullo," I said, sulkily.

My father and Savvy were same height, and they left darkness far below.

"How is it coming, Lieuten

"She's all ready to go, sir ant Collins thought four o'c early—a later time will do a

"Let it stand."

"Very well, sir."

THE skipper walked onto t stage. Savvy and I follow and Pat, in greasy dungarees from their work, spoke to t politely, ignored me and went ing.

(Dee Philosophical Musing: Men are the damnedest, sneakiest animals on earth, determined to escape their real responsibilities even to the point of courting death. Why did my own father do this to me? He did it because he couldn't face telling Savvy about Bert Sedden and exposing Savvy's precious friend, Dutch. Why did Savvy do this to me? Because he was beginning to suspect that I had designs on him, that's why. And he wanted to escape to the arms of his swishy-skirted "wife," that treacherous, dangerous rocket-boat. You know one of the reasons why men won't stop having wars? Because war is the great escape from women and the responsibilities women want them to share.)

There were two tall, handsome men in that nasty, wretched boat. They were the only two men I really cared a hoot about in this world.

"Oh, no, you don't!" I said.

I stepped right into that boat and sat down. "If you go, I go!" I announced.

THIS move flabbergasted my father. He did not want a tearful scene and knew I was quite capable of emoting all over the place. Moreover, he had taken the position that Savvy's boat was not dangerous—had not Savvy, an officer and a brother, assured him it was as safe as a ferryboat?—so he could not reverse himself, now, and order me out on that score.

"Lieutenant Roberts has not invited you, my dear," was the best my father could do.

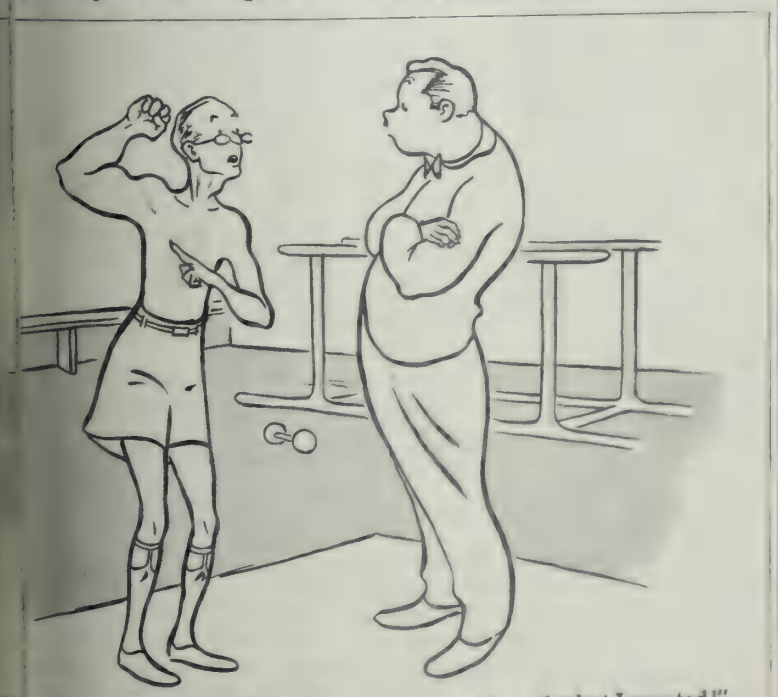
"Invite me, Lieutenant!" I said.

Savvy looked at my father as if to ask: "How could a man like you have a daughter like *her?*"

Then, ashamed of showing any resentment over a cause so trivial, he grinned. "There's really no danger, sir," he said. "So with your permission, I will invite Miss Phyllis."

"All right," my father said, grimly.

"You are invited," Savvy said.



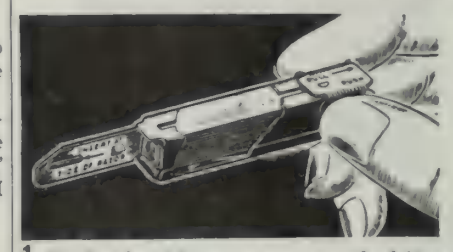
"Oh, thank you, sir!" I said.

He helped me into a Mae West, not gently, his strong hands impatient and cinching the buckles tight.

"Let go the lines!"

There was a prefatory, spluttery rumble from the engine and we moved slowly toward the narrow canal which was the basin's exit to Coot Bay and the sea.

As the first female to witness Roberts' Rocket Propulsion Principle in action, I should like to rise to this historic occasion and describe my experience in deathless words. But I was in no mood



"I developed this one myself to give you some idea of what I wanted!"

MORNING "UPSETTING" EXERCISES
Every Man Can Avoid!

1. Takes Razor apart. 2. Removes old blade. 3. Drops razor part.
4. Reaches in cabinet and fumbles through package for a new blade. 5. Gingerly extracts the paper-thin blade from its fussy wrapping. 6. Puts blade in razor—screws up parts—ready to shave at long last.

Do you go through all these waste motions and "bathroom gymnastics" every morning? Well, you don't need to! The Schick Injector Razor automatic blade change takes all the fuss and fumble out of shaving.

1. Blades for this razor come packed in a clever Injector Cartridge. Your hands never touch them. When it's time to change blade, just insert Injector in razor.

2. An easy pull and push on the Injector and it's all done. Old blade shoots out and fresh one slides in quick as a wink. There is nothing to take apart!

Perfected solid "tooth-free" guide bar with roughened grip surface stretches and flattens the skin ahead of blade, "timing" each whisker to pop up out of natural hair pit right in front of blade edge. Whisker is shaved clean at base without scraping the skin. No nicks, or irritation.

NEW KIT, complete with the 1941 one-piece Schick Injector Razor, cartridge of 12 double-thick Schick Blades in rich-looking black plastic case with built-in used blade receptacle.

$1.00

Simple, modern construction shows in the new razor's sleek appearance. It's so well balanced you'll find yourself holding it at the correct angle without giving it a thought. Contains greatest improvements in safety razor design in past 35 years.

British Columbia

THE VACATION-LAND THAT WAS EVERYTHING!

for lyric prose. I knew my father was angry with me; that Savvy considered me a nuisance.

The boat behaved all right until we crossed the bay, nosed through the breakwater rollers and were headed into God's big, wide ocean. Then Savvy must have pinched his star-spangled girl friend on the bustle because, whooooosh—we took off. The doors of a blast furnace seemed to open on either side and below us. There was a terrifying roar and we appeared to be riding on a giant roller coaster, the rails of which were blue flame. The boat sank into a trough, all right, and a slip stream of white water rose higher than the gunwales on either side. That water shot astern as if two big fire-hose nozzles were firing it back from our bow. The spindrift stung my face like birdshot.

I ducked and slid toward the center of the thwart and huddled there, waiting for death. My father was up forward with Savvy. They had a glass windshield to protect them, the selfish brutes. My father did turn several times to see if I was still there. Oh, I was still there, with the bombs bursting in air and the rockets' red glare. . . .

"*A hundred and ten knots*—think of it, Phyl!"

"Am I entirely bald?"

"Bald?"

"My scalp feels numb—like after the tomahawk has done its worst."

"Shake you up much, Miss Phyllis?"

"Ha! Isn't that my liver you're standing on?"

"I thought she was very steady, sir?"

"Like a rock, Roberts. Beautiful gun platform! For mosquito boats, you're in right now! If you can drive a destroyer—and the dumb bunnies will let you try it—you've got something tremendous. I congratulate you!"

"The engine is mostly Dutch's and Pat's, sir. I just adapted it."

"A magnificent job!"

"Thank you, sir. Will you tell them that?"

"You bet I will!"

WE WERE back, safe and sound, at the basin landing. But my knees still shook, all my bones continued to vibrate and I couldn't get that roaring sound out of my head. Lieutenant Roberts kindly assisted very mature, creaky Aunt Phyllis to the landing stage. Dutch and Pat were still at sea in the crash-boat. We had left them miles behind.

Savvy, excited by my father's praise, could not forbear to crow a little: "You see? It didn't blow up! Safe as a garbage scow!"

"Mister," I said, "you are a genius. I have just died a thousand deaths—but you are definitely a genius. There's only one thing lacking."

"Yes?"

"Have you a rocking chair in that tent?"

Savvy laughed and invited the skipper and me to have some coffee. My father thought it was a good idea.

We went to Savvy's tent. He had a China boy named Edward, who slept and cooked, apparently, in the boathouse. Edward hustled off to get the coffee. There was no rocking chair. I collapsed on Savvy's cot. Savvy and the skipper gave me only perfunctory attention. I thought that Savvy might at least have offered to help me out of the Mae West life preserver. But he and the skipper had much man-talk to make, oh, much man-talk.

My father said that, of course, putting Savvy's engine in a mosquito boat was only a subterfuge. It would impress the admirals and Congress with its practicality. They would officially accept the design and vote money. But the real future of rocket-engine propulsion was in the air. Savvy enthusiastically agreed. He said Pat, who was the chemist of the triumvirate, was [illegible] the fuel problem. Pat had it [illegible] licked, too. Solidified gas w[illegible] fuel. Five hundred pounds [illegible] would give a bomber fourtee[illegible] miles' range.

That was victory and e[illegible] father said. No more big su[illegible] but a Navy in the air. Just [illegible] dive bombers would superse[illegible] tillery, so would enormou[illegible] planes make the battleship ol[illegible] the admirals couldn't see it. [illegible] right on sinking a hundred [illegible] each battlewagon. Savvy [illegible] edly agreed. However, he [illegible] had to sneak up on the ad[illegible] Congress. A conception of w[illegible] the airplane as the decisive [illegible] light, fast surface craft as [illegible] was much too advanced for a[illegible] congressmen.

(Disloyalty Note: I believe[illegible] try is rich enough and powe[illegible] to have plenty of every kind [illegible] battleships included. My [illegible] Savvy might just possibly be [illegible] as most dreamers are.)

THE skipper turned to me, [illegible] lighted with his ardent dis[illegible] see, Phyl? Here's a lad w[illegible] enough to do it! He'll teach [illegible] he's through!"

I am a realist. I couldn't e[illegible] Navy Station by way of a sl[illegible] a rocket-scooter and those "p[illegible] the purple twilight." I wa[illegible] about Bert and Pop and M[illegible] and Dutch and the whole me[illegible]

Standing up, I said, "Lieut[illegible] erts had better lie low until [illegible] miral. You don't last long in [illegible] Navy if they find out you wa[illegible] 'em new tricks."

This got me a look of [illegible] Savvy. "How young to be a [illegible] said.

"I'm older than either of y[illegible]

My father laughed. Savvy [illegible] head. "A strange girl child, s[illegible] very lenient with her, you kn[illegible]

"And she with me, Robert[illegible]

I don't know what this w[illegible] led to—probably a fight betw[illegible] and me, because I was fed u[illegible] little-girl stuff—but two th[illegible] pened in rapid succession.

Pat Rorabeck appeared a[illegible] of the tent. He was holdi[illegible] minum cylinder, about a fo[illegible] his hands. "This isn't ours, is i[illegible] he asked.

Savvy took the thing from P[illegible] no," he said. "Where di[illegible] up?"

With a glum, dead-pan fa[illegible] plied, "Found it under the ga[illegible]

"In the boat?"

"Yeah."

"It's a bomb!" I said. "Quicl[illegible] it in the water!"

But Savvy wouldn't do th[illegible] He had to shake the cylinder [illegible] and shake it some more, th[illegible] over in his hands and look fo[illegible] The skipper and Pat looked a[illegible] with grim, set faces. My fath[illegible] hand on my arm and nodded [illegible] go outside.

"The heck with being so [illegible] said. "I'm scared! Here, gir[illegible]

I snatched the cylinder out [illegible] hands. Starting through the [illegible] way, I ran into Lieutenant R[illegible] lins. "Cap'n here?" he dema[illegible]

"Look out—it's a bomb!" I[illegible]

I threw the thing toward t[illegible] But it landed in the grass sev[illegible] short. I flinched, expecting an [illegible]

The only thing that expl[illegible] Roger's voice: "Sorry, sir. I th[illegible] better come at once. Comma[illegible] den has disappeared. His boa[illegible] ing. Mrs. Sedden thinks he [illegible] himself."

(To be continued next w[illegible])

military jujitsu based on the principle of using the opponent's strength to outtoss him. A Judo-trained 120-pounder is supposed to be able to flip a 200-pounder over his shoulder without even breathing hard. Unlike wrestling, Judo is worked from an upright position, and the thrower uses holds based on the assumption that the throwee is wearing clothes.

Judo found a place in the training schedule of Second Division M.P.'s when Major Wayne C. Smith decided it was much more practical than wrestling. A 168-pounder who rose from West Point ranks, Major Smith bagged the Academy's 124-pound wrestling title, later (weight 134) took top honors in his division at Southeast Olympic tryouts. He learned Judo while stationed with the 15th Infantry in Tientsin, China, ten years ago. Written descriptions of Judo seem a bit vague, but perhaps you can make something out of this: Grasp your attacker's left arm and right coat lapel, twist him slightly, pivot, shove your hip into his side, and—using his left arm as a lever—casually spin him over your shoulder. Somewhere in the middle of this your foot plays a part but we didn't quite get it. Maybe you just try to keep it on the ground.

FORT BLISS, TEXAS. Some of the boys in the 260th Coast Artillery (Antiaircraft), which made the longest motorized jaunt in Army history—recently described herein by Jim Marshall—became so accustomed to rough riding that they've made it their favorite outdoor sport. Second Lieutenants John W. Fisher and George Yow use an automobile to chase jack rabbits across the desert; they take turns driving while one crouches on the running board and pops away with a .22.

CAMP EDWARDS, MASSACHUSETTS. Peter E. Pratt of Milton loudly calls the attention of all who will listen to the fact that he's a buck private. Last summer he signed up for the V7 Naval Reserve Officers' Training School, passed a physical examination and went on a month's shakedown cruise on the U.S.S. Wyoming to Guantanamo Bay, Cuba. On board he was given a second physical exam, and his teeth flunked him. He volunteered for a year in the Army and is now at Camp Edwards. "You will please tell any Navy men you meet," he says between the clenched teeth that tossed him out of Uncle Sam's first line of defense, "that they may address me as Private Pratt."

●

FORT ANDREWS, BOSTON. The Army is a family matter to the McBournie family of Dorchester. They're all on Paddocks Island, headquarters for the 241st Coast Artillery. Papa is Master Sgt. Hector T. McBournie, in charge of headquarters battery's radio communications. Son Hector, Jr., is a corporal in the same battery. Mamma Alice is hostess at officers' mess, and Daughter Alice assists her.

AFTER twenty years of sleeping in the sun, New England's coastal forts are bristling. With six months of training, the Coast Artillerymen lead the way in the defense scheme. ...ants ...ar I was hoein'. So I wanted
to git out and strut whar de mens c'd look at me, too. So I tole Mamma I was ailin' and dat was a lie."

"And a lie is a sin!"

"But dey gonter git done choppin' befo' sundown," Maw-reen argued, "and what little I c'd do didn't matter, one way er de yuther."

"Maybe," B'r Charlie said, "hit ain't such a bad sin, at dat, 'scusin' how dey gonter git done choppin', anyhow. But you git on home and start supper. And you better pray a lick er two, for dat lie. Hit might not er been no sin-lie, but a little prayin' won't hurt you, on account er dat was a hot-lookin' strut, Daughter."

Maw-reen left and B'r Charlie returned to his forge. He caught a plowpoint in the tongs, buried it in the coals and began to turn the fan. But he was preoccupied. His mind was struggling with a fact and a thought. The fact was a young girl had practically committed a sin by lying, and the thought was that the girl was not wholly to blame.

"Satan is *raley* to blame," B'r Charlie mumbled uncertainly. Though he knew if all the blame for sin were laid on Satan, there would be no need for a preacher whose function was to rant against sinners.

IT WAS too complicated; B'r Charlie's brain practically broke into a sweat as he wrestled with the problem. Meanwhile, the plowpoint had turned red and then white from the blast of forced heat.

"Dem red pants made her lie," B'r Charlie mused, "and dat makes dem de sin. But how a preacher gonter pour de sperrit on a pair er red pants?"

He continued turning the fan and trying to think. The answer came like a bolt from the sky. "Work!" B'r Charlie decided. "Too much work is a sin! Dat's hit!"

It would have been impossible for B'r Charlie to have explained the mental processes by which he had arrived at this conclusion, though among the factors he had considered was that back in the time of four-cent cotton, no woman had had enough money to buy red pants. And now with cotton at ten cents and Giles still making everybody work in high gear just the same, women had plenty of money to waste on red pants.

"And dat is a sin!" B'r Charlie was convinced. "De Lawd might er runned up de price er cotton, but ole Satan

EMBLEMS OF EXCELLENCE

GOLDEN GLOVES. This emblem, shown at the right, is a nationally recognized symbol of excellence in the amateur ring. It is awarded to the champion of each weight class in the annual Golden Gloves Boxing Tournament. To become a "Golden Glover" a young boxer must prove his ability by fighting his way up through a series of elimination bouts. He has to be better than good!

ETHYL EMBLEM. There is an award for excellence in gasolines too. It is the Ethyl emblem. Gasoline in a pump which bears this emblem has to be better than good! It must be "tops" in anti-knock (octane) rating and all-round quality. Ethyl means a cooler-running engine in summer; extra power and smoothness throughout the year. When you stop to buy gasoline, the Ethyl emblem tells you which pump contains the best.

ETHYL GASOLINE CORPORATION, NEW YORK CITY

"I got 6 pairs of gorgeous hose with what I saved on CLOPAY window shades"

You, too, can save amazingly... just by seeing CLOPAYS at the "5 and 10"

● "I don't know which thrilled me more—getting all the hose I needed, or finding these window-shade values. Why, I can hardly tell my 15c* CLOPAY Lintones from costly linen cloth shades! And as for the 25c* oil-finish CLOPAY washables—they're just amazing! You can actually scrub them—keep them new-looking for months—even years! They won't ravel, pinhole or crack."

See for yourself; almost every 5c and 10c store and most neighborhood stores carry the CLOPAY line. Good-looking, durable shades, starting at 10c. You'll save the money to buy that nice "extra" you want, replacing shades at all your windows with CLOPAYS! FREE!—book of 49 color and pattern swatches; write CLOPAY CORP., 1225 Clopay Square, Cincinnati, Ohio.

*Prices quoted are for 36" x 6' size, ready to attach to rollers; mounted on rollers, 10c to 15c extra.

And Here's More MONEY-SAVING NEWS!

VENETIAN BLIND COST CUT IN HALF!

Here's American industry's latest value miracle—CLOPAY Venetian Blinds at $1.49 to $1.98. Features of the costliest kind: washable—with lustrous baked-on enamel-paint finish: Easy-action tilt: lock at any height; easy to hang as window shades. See CLOPAY venetians at department, 5c-$1, paint and neighborhood stores. Write for booklet, sample slat, name of nearest store.

CLOPAY All-American Values In WINDOW SHADES and BLINDS

makes Giles keep ev'ybody workin' too hard, and workin' too hard is a sin."

He removed the white-hot plowpoint from the fire and laid it on the anvil. Even before his hammer touched it, he realized "all de metals" were burned out. He tapped the edge experimentally and the ring of the steel confirmed it. He cooled the point and pitched it on the scrap pile. "And anybody which works dat hard," he concluded, "is a sinner."

He looked in the box of sharpened plowpoints and felt a righteous glow of pride in the fact that the box was not full. "Dat," he told himself complacently, "is on account er I ain't no sinner. Half a box er p'ints is plenty enough, wid cotton at ten cents."

The missionary spirit seized him and he went to the field where the women were chopping cotton under the leadership of the Widow Duck. He had discovered a new morality and he was eager to spread the light.

He came sauntering up casually and gave a pleasant "howdy" to everybody.

"How come you ain't at de shop?" the Widow Duck demanded sourly. "You must be gittin' spry to git dat box full er plowp'ints all dis long befo' sundown."

B'r Charlie evaded a direct reply. "Religion," he stated, "is a all-day and all-night business. You got to let yo' light so shine."

"Well, dat's 'Amen' tawk, B'r Charlie," the Widow Duck agreed.

It was a good start, B'r Charlie decided. He developed the idea: "Religion is like de polish on yo' shoe. 'Cause efn yo' shoes ain't polished, won't nobody look at 'em, and you might as well go barefooted."

"My religion," the Widow Duck argued, "is like de sucker on de pump. Efn a pump ain't got no sucker, hit can't git no water outn de well. And efn I ain't got no religion, I can't git no sweet pleasure outn choppin' my cotton crop clean for my Redeemer."

"Amen," B'r Charlie responded automatically. But the Widow Duck's words had sapped a heap of confidence from him. He observed the crops looked mighty clean and he predicted plenty of blooms and squares by June 'teenth.

AT THAT moment, Giles galloped up. "What you doin' so far f'm taw?" Giles demanded. "You got dat box full up wid sharp plowp'ints already?"

B'r Charlie gulped. In his mind he pictured himself as standing at the forks of a road. One led to sinfulness, overwork, lying, and an eternity of punching chunks in hell. The other way led to a leisurely life with no girls running around in red pants and an everlasting rocking-chair seat at the Welcome Table.

"Yassuh, hit's full," B'r Charlie said, taking the right road.

The foreman was off toward the hayfield as B'r Charlie stood in a daze, his mind whirling in the enormity of his lie, and his conscience hurling accusations at him. He turned pleadingly to the Widow Duck.

"Dat box ain't full," he said miserably. "Dat falsehood jest slipped outn my mouf."

The Widow Duck snorted. "Falsehood de dog's foot! You jest stood up flat-footed and tole yo'se'f a natchal lie."

"Yassum, but Mis' Duck," B'r Charlie floundered, "you see hit go like dis: I was standin' in de shop do', studdin' my mind, and de fust thing I knowed, hyar come Sissy's Maw-reen down de turnrow, wearin' red pants and jest a-cuttin' de dust."

Sissy moved toward the preacher, bringing her hoe with her.

"I paid cash money for Maw-reen's red pants," she told B'r Charlie, "and what I pays my cash money for ain't no skin offn yo' back."

The Widow Duck closed in from the other side. She was not Sissy's part of the argum one of her own, namely, t the pastor of her church fr himself before the sisters, barrassing complications v tation foreman.

"Giles got fifteen culti the Widow Duck told B'r (ev'y cultivator gonter ne p'ints, come sunup tomorr figgers down to 'bout a bo

B'r Charlie's mouth flap the words would not come

"And you knows good Widow Duck warned, " enough sharp p'ints, Gile you offn Little Bee."

"So," said B'r Charlie sa little hope of ever being "Maw-reen come a'twis'in turnrow."

"You's a lie!" Sissy "Maw-reen was ailin', a twis' when she ain't ailin come I spunt th'ee dollar for dem red pants. Jest like she was twis'in', and d kin find herse'f a husband.

B'R CHARLIE recognize nals when he saw th there was hostility on both And because he couldn't h doggedly, "And den Maw bore a false witness and h dry f'm de baptizin' I gi'ed

Dust and dirt
damage engines, too!

YOU certainly wouldn't stand for anyone putting dirty oil in your crankcase; yet oil gets dirty as you drive — unless your oil filter is on the job, trapping the dirt in the filter element.

When your oil shows dirty on the dip-stick, it's a signal that the filter element should be replaced at once. It's like putting a new blade in your razor. Of course, when you do replace, be sure you get a genuine Purolator element! The cost is small — $1 to $2.75.

leg and crutch functioned on the way to the blacksmith shop. Not a thought came into his mind, not an emotion stirred his heart. Not until his tongs had clasped a plowpoint and shoved it into the smoldering fire did his mind and spirit show an indication of life. A repetition of the old feeling came over him.

"Workin' like dis," he told himself stubbornly, "is doin' a sin."

He knew the Widow Duck was telling the truth about what Giles would do to him when he ran short of plowpoints. And he knew that Sissy had acted with maternal justification. But the belief that he was blameless stayed with him. He simply had been misunderstood all around.

However, he went to work with determination. He put his hand on the fan crank and tried to turn it. His muscles refused. Sadly he dragged the plowpoint from the forge and dropped it to the ground. He went to the door and gazed skyward. The sun was still an hour high and shining brightly through the clear heavens.

B'r Charlie sat down and prayed. He did not take the trouble to close his eyes or to kneel.

"Lawd," said B'r Charlie, "You see hit's like dis. When cotton was only fo' cents a pound, ev'ybody worked in high gears to make enough to eat. But dey didn't had no red pants for de womens. Now, maybe red pants ain't no sin. I don't know 'bout dat, Lawd."

B'r Charlie bogged down and stared dumbly toward the setting sun. Time passed. B'r Charlie's mind ached with effort. Presently, gray clouds began to assemble over the sun, sending out rainbow streaks of light. Then the clouds turned darker and the sun hid behind them. A streak of lightning cleaved the heavens, followed by a clap of thunder.

B'r Charlie sniffed. "A late May shower in de middle er June," he commented.

THE rain came with a quick, torrential downpour, but instead of passing quickly, it settled into a steady hard June rain.

Men and teams streamed to the barn from the fields, and the women scurried homeward. The soft, dry earth drank water for a while, but it was not long before water was running from the middles into the ditches.

Giles, hat pulled down and slicker collar turned up, appeared. B'r Charlie noted that the foreman's horse traveled in a lazy fox trot, an indication that Giles was in a relaxed good humor.

"Dis look like a June rain fo' true, B'r Charlie," the foreman called.

"Hit do dat, Mist' Giles," B'r Charlie agreed.

Giles stopped his horse. "Hit might rain like dis all night or all week. Hit don't make me no diff'unce, 'cause us was ready for hit. And by de time hit git dry enough to work agin, de cotton gonter be too big to plow."

"Yassuh, hit will dat," admitted the blacksmith.

"Dat suit me," Giles said happily, "'cause de mules need de rest and hit won't hurt de people. And hit won't hurt de cotton and hit'll do de cawn good."

"Hit will dat."

"So in de next two-three days, when you sort er git yo' wind, you kin start gittin' dem cotton wagons in shape. No hurry, 'cause us won't need 'em to de last er next month. But I wants 'em ready when I needs 'em. Onderstand?"

"Yassuh, Mist' Giles," said B'r Charlie.

After closing his shop for the night, B'r Charlie wrapped up his head with a sack and started home in the rain. As he passed Sissy's cabin, he was hailed.

"Maw-reen," Sissy announced, "done got her a man. One er h name er Henry. Dey aimec ried up when cotton pickir but I tole 'em hit wa'n't no r So dey gonter git married up on in and say de words."

When B'r Charlie reach last, the Widow Duck was s porch, a small pail in her ha

"I brang you over a litt to eat," she said. "I figgere be a little late gittin' home yo' own supper."

"Thanky kindly, Mis' Du Charlie, but he was puzzled. Duck ever was kind to h seldom brought him food.

...had finished school he got a ...rk in a broker's office. Later ...tched to the floor of the min... ...ge and then he sold bonds for (if you want the facts) T. H. Harrison and Company. His older brother Arch, meanwhile, was roaming all over the world and the letters he wrote back from places like Singapore and Tangiers and Rio stirred the imagination of the kid. Then Arch landed in England and in his next letter he said that he had joined the R.A.F. Finally, he had passed his preliminary training and then came the day when he wrote to say that he had got his wings.

That was enough for Eric. War clouds were in the sky. Eric had never been in an airplane but those letters from Brother Arch had made him thoroughly dissatisfied with selling bonds.

He was accepted and he sailed for England. He passed his medical test and then they took him up. He had to survive this initial test or else take the next boat back. He climbed into the rear cockpit of a two-seater Tiger Moth and a moment later he was air-borne. The pilot took him up and then he did a few stall turns; he dived and he climbed and then he did a loop.

"They give you the works that first day," the kid explained, "to see if you can take it. I wasn't up two minutes before I knew that this was for me. I'd never do anything but fly."

After twelve hours in the Tiger Moth they let him solo. Now he felt that he was a pilot. But no, there was something else. He had to have fifty hours in the Tiger Moth and he had to attend ground school and learn about motors. From there he was sent north to Lincolnshire. Here he had to master more highly powered airplanes and here, too, he had to learn to "act and behave like an officer."

He wore a pilot's uniform but he didn't have his wings yet. To get them he had to pass a difficult written examination. Finally, when he had about two hundred hours, they sent him to the west country to learn about the heavy twin-motored aircraft. In addition he studied navigation and gunnery and bombing

the uch of a concert violinist ging instrument to pitch, the ce ma will tune the carburetion. Trouble at this point can be costly in loss of power and loss of mileage. The carburetor handles about 70 gallons of gas and 100,000 cubic feet of air every 1,000 miles. You can't afford to have such an important device even slightly out of whack, any more than you can afford not to use high-test gasoline.

Before leaving this "department," the winter oils and lubricants should be replaced with summer grades. The oil filter should be given a nice fresh, clean element and the air filter should be cleaned. Finally, the exhaust system should be checked to see that there are no leaks or poor connections.

The Running Gear

The wheel alignment is an important part of the Spring Tune-up. Wheels get knocked out of line in the regular course of travel—but winter roads deliver the worst blows. Alignment and balance are scientifically checked by the service man and when the wheels are put back to their original factory specifications, you get greater tire mileage along with easier steering and more pleasant riding.

The Cooling System

By all means, see that the anti-freeze is drained out of the cooling system and the inside of the radiator cleaned. But don't stop there. See that the fan belt, radiator hose and gaskets are in good condition to carry you through the summer.

Safety and Protection

Under this classification, you will have the brakes tested and balanced. You will want your lights adjusted, cleaned and renewed, if necessary. You will want the tires checked for anti-skid tread and for the condition of the tubes. Finally, you will want this tuned-up car to look as good as it runs and this calls for the scientific cleaning of the finish, plus waxing and polishing to give it both beauty and protection.

The Complete Job

Practically all places that service automobiles are prepared to render a complete Spring Tune-up at a reasonable price. See your service man now for Preventive Service.

P.S.

PREVENTIVE SERVICE

Sponsored by Collier's for Motor Car Owners

Send for the booklet "Questions and Answers on Spring Tune-up." It tells you the inside story of your automobile. Enclose 6 cents to cover cost of handling and mailing. Address Preventive Service, Collier's, 250 Park Avenue, New York City.

PAN-AMERICAN Clippers, with millions of flying-miles to their credit, have used Wolf's Head Motor Oil exclusively for over 11 years. Inside those giant power-plants, Wolf's Head keeps all the whirling metals *apart* . . . in order to keep the engine *together*.

The same protection is yours when you use Wolf's Head in your car. The particular quality of Wolf's Head makes such a vast difference in the upkeep of an automobile that Wolf's Head can guarantee the car-buyer against repair bills to lubricated parts during the first 30,000 miles! Ask your car-dealer how *you* can get this unusual protection. Wolf's Head Oil Refining Co., Oil City, Pa., New York, N.Y.

tactics and similar adjuncts to the pilot's trade in wartime. Then came the great day when he had mastered the twin-motored airplanes and he had passed his written examination. They gave him his wings.

Came September 3, 1939. War was declared. Eric longed to hop into a kite and soar into battle. He had his wings, didn't he? He was surprised to find out that he was still only a beginner. He was sent somewhere else for advanced courses. Five months of it there with both classroom and flying instructions for eight hours a day. Thirteen subjects had to be mastered.

"Really, advanced navigation, coding, ship recognition, signaling, maps, charts, photography, reconnaissance, methods of recognizing harbors; there were others, too," the kid explained. "It all comes in handy now."

The kid was now a full-fledged pilot. The R.A.F. had given him a year's time. It had given him the best instruction possible. All he would have to do from now on would be to apply the knowledge that had been imparted to him. He was sent to a command in Scotland. Then Germany marched into Norway—and the war was on. The kid (and thousands like him) was ready.

The kid will never forget his first combat flight. For a while he had to act as copilot. On this fateful morning even the commanding officer was a little excited. The Scharnhorst, the German battle cruiser, had been located off the coast of Norway. This was the target for the day. One flight of three took off. They never found the Scharnhorst.

Then the second flight, under the command of Squadron Leader Feeny, took off. Eric was in this flight. Feeny was a good man. He led them right to the target. The Scharnhorst was off Bergen and she was escorted by six destroyers.

"We were at 11,000 feet," the kid says, remembering it as though it were yesterday. "The destroyers started throwing ack-ack up at us. It burst all around. We flew right through it and dropped our bombs across the Scharnhorst. Then we started looking for clouds. They were a long way off. Forty-five Messerschmitts came from nowhere. That's a lot of Messerschmitts.

"By now we three were separated. It was every man for himself. We beetled off fast for those clouds. Two Messerschmitts came at us dead ahead. They missed us and, as they passed, our gunner sent in a burst at one. Then we were in the clouds. We made our landfall all right. Squadron Leader Feeny's plane? It was shot up badly and crashed when it landed, but nobody was hurt."

It wasn't long before Pilot Officer Eric Walsh was on his own. He was now a copilot. The coastal command has long range and a variety of duties. It meets and protects convoys; it does reconnaissance work; it does anti-submarine patrol; it bombs certain parts occupied by Germany. Before long Eric had done all of these things. Then came the greatest thrill of all.

"We got word that a submarine was giving trouble to convoys," Eric says. "It had done a lot of damage to a lot of shipping. Day after day we went out looking for it. Then one day at dusk, I saw it. I had the submarine, that's why he didn't see me. The sea was very rough. We were a thousand feet and I dove fast to 500 feet and dropped the bombs. I dropped a string of four right across her. The sub sank. I was past the sub but my rear gunner saw the bombs explode right on each side. We got that one all right."

It's Simple—Don't Take Chances

It's routine now with Eric. He's shifted to nightwork. It's a cinch, he says, compared with day bombing. Now he goes over Norway bombing a group shipping on the coast, bombing ports like Stavanger and Bergen and Lister. It's a cinch at night unless the weather is bad.

"It isn't much fun then," Eric says. "It's easy to get lost over the fjords, and on the way home we listen to music from the German radio. It's good music, too."

When he joined his squadron he was the kid of the outfit. Only one of the senior officers have gone. Now Eric is the veteran.

"No reason to get killed," Eric says earnestly. "Just don't take chances. I'm coming out of this war and going to get a job flying a big transport plane. I don't take chances."

"Sure, kid," I told him. "You don't take any chances."

"Calvin, guess what the postman brought you today!"

A Letter to Americans

There is certainly no r of our fighting on Germany's and er propaganda in America een ratively ineffective.

be ecific again, you will re- ber at even before hostilities nence factual statements con- ng th growing military strength erma were bitterly attacked by ro-British press. Those of us who he gr th of the German air force severely assailed because of the ts we ade describing it, although repo now turn out to have been t unf givably conservative. Then, recall hat when the Germans in- vaded Austria, it was claimed by the propagandists that their mechanized divisions broke down: that the workmanship on their tanks, trucks, engines, etc., was too inferior to operate successfully in a major war. German aircraft were said to be weakly constructed; there was a shortage of pilots, raw materials and fuel. We were told that Germany did not have sufficient food to wage a war. And in addition to all this, internal conditions were said to be so bad that the German people would start a revolution rather than fight again.

IF YOU question the accuracy of my statement that we have been misinformed through propaganda, I ask you to glance through our daily newspapers since the war began. If you are pressed for time, take any one of the major campaigns—Poland, Finland, Norway, Holland, Belgium and France. You will find that we, in America, were misinformed about these campaigns until the actual military position made it impossible to hide the facts any longer. Do you remember when we were informed over the radio that the French army had penetrated the Siegfried Line in five different places? Do you recall the headlines of battles raging on the western front during the winter of 1939-40—battles we now know were never fought? Were we told how desperate the Finnish position was before the final breakthrough of the Russian army? Do you remember how, after reading day after day of Allied successes in Norway, and how Germany had put her neck in a noose, we were startled by the announcement that the Allies were evacuating all of their forces? Who was it said the Maginot Line was impregnable; that bombing planes were no match for the British navy; that England had the submarine menace well in hand, and had already "won the battle of the air"?

The propagandists who made these claims do not bother to explain them. They know that people forget quickly, and they are too busy leading us along with new fallacies. They must confuse America's desire to aid England with our desire to stay out of the war. They must convince our people that England is winning the war in Europe, even though she has lost every major engagement in which she participated—that all she needs is more help than we have, up to that moment, given her; and that if we *should* get into the war, it would not be necessary to send troops. They must build up the element of fear in America. They must persuade us that if England loses, we are not strong enough to defend ourselves; that we may be invaded by aircraft from the Greenland ice cap, or even by transatlantic parachute troops descending on our city streets. They have already led us far along the road to war—the same road that we traveled in 1917; then too at their behest.

But there is one all-important difference between the European war when we entered it in 1917, and the European war today. It is this difference which must be brought to the attention of every American, for the entire future of our nation hangs upon it. It is, that when we entered the last war we could see how victory could be won, but today we cannot. In 1917, the Central Powers were fighting France and Great Britain in the west, Russia in the east, and Italy in the south. The German armies had already suffered severe reverses. Even Japan had entered the war on the Allied side.

In 1941, however, we face an entirely

It's all ready to smoke when you buy it . . . tastes MILD and fragrant as soon as you light it

Can you imagine a pipe that really starts right off being *mellow*, with no such thing as *breaking-in?* Well, that's what the honey-treatment does, in Imperial . . . the sage honey that's sprayed and brushed into the bowl. While you can't taste the honey (because its flavor is discreetly "blended" in the smoke-flavor) it's gentler, milder, more fragrant and mellow! And right away, the honey makes a soft, flavory cake, in this imported Mediterranean Briar . . . that gives every smoke that mellow goodness you expect *only* from an expensive pipe you've smoked for years! (There's a swell "inside-story" in Imperial, too. An invention in the stem that's a double-condensor, and little bowl-reamer, too!) Get Imperial today . . . *it's the best-smoking pipe you can buy for $1.50!*

The famous $1 Yello-Bole that introduced the honey-cured smoke to pipe smokers and convinced them *there's more pleasure in a good pipe!* It's the best smoking pipe $1 will buy. This is the Medium Billiard shape at all dealers!

YELLO-BOLE $1

different situation. Germany has conquered France. She has an alliance with Italy, Russia and Japan—three hundred million people. Her armies control the coast of Europe from Spain to the Arctic Ocean. British shipping losses are already of the utmost seriousness, and the major ports and industrial centers of England have been heavily bombed.

The fact is that America is not in a position to wage a successful war in Europe under present conditions. We, ourselves, are not prepared, and even if we were, where would we send our soldiers to fight? How are we to force a landing on the European continent against the prepared positions of the strongest military power in the world? If the British, French and Belgian armies combined could not hold the fortifications they had spent years in building along the German border, how can we be expected to cross the Atlantic Ocean and invade the continent of Europe against the opposition of the same army, navy and air force that thrust the British fleet from the coast of Norway, and broke the Maginot Line?

The people who shouted for England and France to declare war in 1939 called for suicide and defeat. Because of their hysteria and blindness, the bravest men of France and England marched to disaster and to death. While the intellectuals of Europe preached of Christianity, democracy and idealism, they threw a wave of human flesh against a fortified concrete line—without adequate guns, or tanks, or aircraft even for defense, to say nothing of attack.

Has this attitude of life succeeded? Has it gained freedom for France or security for England? Has it stamped out aggression or heightened civilization? Has democracy gained or has it lost through such leadership? These are questions that we in America must answer. With failure in Europe before our eyes, shall we follow this same course? Shall we throw ourselves into war in a fervor of idealism, shouting about how we think the world *should* be run? Or shall we discuss calmly how our objectives can be accomplished, and *adequately* prepare ourselves to reach them?

PERSONALLY, I believe that by our withdrawal from Europe after the last war, and our failure to prepare for this one many years ago, we are already committed to a policy of military "isolation." I believe that if we abandon this policy at the present time, we are courting national disaster, just as France and England courted disaster when they, unprepared, declared war over the German invasion of Poland. A nation cannot change overnight from an attitude of peace to an attitude of war. It takes many years of planning and preparation before great military strength can be attained. I believe it is not any longer a question of what we *wish* to do in this war, but rather one of what we *can* do. I believe that for us to enter the conflict in Europe at this time would result in defeat and humiliation. If we are to enter such a conflict successfully, then we must prepare for it not for one year or for two, but for ten years or for twenty as Germany has done.

On the other hand, I believe that we can build a military and commercial position on this continent that is impregnable to attack, and which will force other nations to trade with us, if through expediency alone. Even if America intended eventually to dominate the entire world, as some people now seem to want us to do, I would say that our first step should be to consolidate our defenses at home, so that we could prepare ourselves in safety for our adventures beyond the seas.

Every difficulty we would have in invading Europe would be an advantage for us in defending America. Our armies would be fighting on home soil, our Navy would be close to its bases, our air force could strike with its utmost effect. It would be the enemy's problem, not ours, to cross the ocean with millions of troops and their supplies, to pass by our submarines, our battleships, and our bombing planes, and to force a landing on American shores against the guns of our coast artillery and our Army.

When England could not hold the coast of Norway against the German air force; when the British navy dared not remain in the Skagerrak, or even permanently in the North Sea; when the German military machine, after crashing through the Maginot Line and routing the French army and the British expeditionary force, has been held up for nine months by twenty-five miles of English Channel—how is any navy to approach the shores of America and land an invading army against the combined resistance of our military forces?

THERE has been much discussion of an air invasion of America. This is partially due to propaganda, partially to hysteria and partially, I believe, to a misconception of the so-called "air invasions" of Norway and Holland by the German air force. Personally, although I think the effectiveness of military aviation is still underestimated, I do not believe there is the slightest danger of a purely air invasion of America now, or at any time we can now foresee. To begin with, the distance across the oceans is far too great to permit the air transport of armies large enough to invade us successfully, even if one assumes that they had a place to land unopposed by our own military forces. But, aside from the question of distance, we should be reassured by the fact that there has never been a successful invasion by air alone. The outstanding examples of the use of aviation for invasion of enemy territory occurred during the German occupations of Norway and Holland. But in each of these instances, the landing of troops by air was carried on simultaneously with the movement of ground and naval forces on a major scale. The maximum number of troops that could have been transported and supplied by air would have been ineffective without the immediate support of a ground army. If air invasion alone could be successful, it would have been used by the Germans against England many months ago.

But what about the northern routes, cry the alarmists; won't we be invaded by way of Greenland and Alaska, where the distances between land are short? Possibly the best answer to this question is in the form of another: Why, if these northern routes are so advantageous, do you suppose the commercial airlines to Europe and Asia prefer the great over-water distances farther south? The answer is that ice and fog and bitter cold still force men southward in their quests of commerce and of war. Except in adventure and exploration, men follow the routes which offer the greatest safety and require the least effort—and these are not in the north.

Of all the transatlantic air routes, the simplest to fly is the one that lies between Africa and South America. This fact is being used today in much of the war propaganda we hear. German airplanes, we are told, will fly to Africa by the thousands, hop across the ocean to South America, refuel and fly up and invade the United States.

Leaving aside the problems that would have to be solved in Europe and Africa before thousands of German airplanes could take off on such a venture,

sider what preparations would
e made for their arrival in

England declared in Europe. We
uld not e wasting our time arguing
ut whe er it is cheaper to defend
ourselves e than to defend ourselves.
should t be conscripting our youth
a foreign war they do not wish to
t. We should all be marching to-
gether toward one clear and commonly accepted goal—the independent destiny of America. If we desire unity and strength among our people, we must turn our eyes back from these everlasting wars of Europe—back to our own country, to the clear horizons of a great American future. Let us learn from the errors made by the democracies abroad, and not repeat them. Let us give thanks to the generations of Americans before us who won and maintained the independence of our nation against far greater dangers than we face today. Let us dedicate ourselves to guarding that independence that we may pass it on to the future in even greater security than we received it from the past. It is by building our own strength and character at home—not by crusading abroad—that we can contribute most to civilization throughout the world.

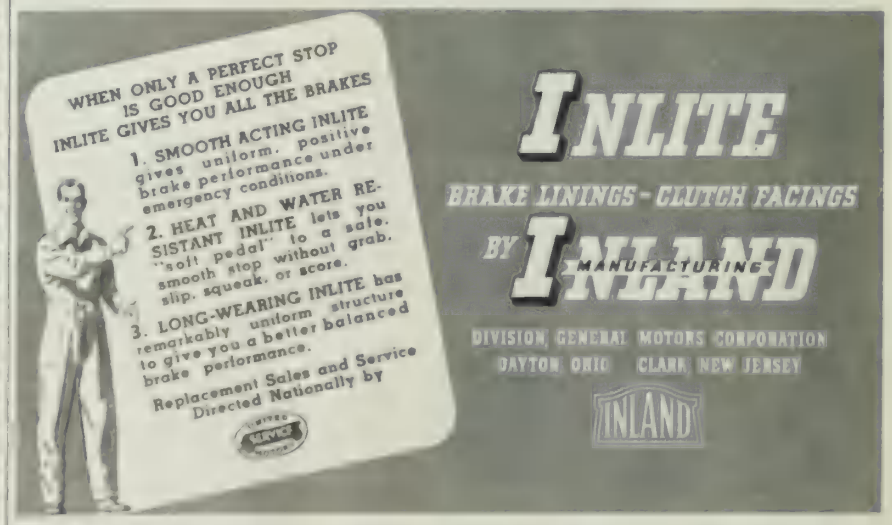
If you believe that we should not enter this war, your help is needed vitally by those of us who stand against our intervention. The policy of our nation is still influenced by the desires of its people. You can help us by organizing mass meetings against our entry into the war. You can help by attending such mass meetings. You can help by writing to your congressmen, to your senator and to your local newspaper, telling them of your views. Such letters have more influence than most people realize. But if you stand with us against war, you must act now or it will be forever too late. It is not enough to write once. Write every time an issue arises—several letters each week until this crisis has passed. Demand of your representatives that they oppose our entry into the war and be on guard against these steps that will inevitably lead us to it. It is worth all the effort we can give. Our future, our children's future, our country's future, all that we hold worth while is in the balance.

I HAVE one last request, and then this letter is ended. Before you make your final decision, reason through for yourself what war would mean to this country. Demand a practical plan from those who preach of defending democracy throughout the world. Ask them to explain how we are to invade successfully the continent of Europe—how we are to impose our ideology on the peoples of Germany, Russia, Italy and Japan combined against us. Insist on an answer that is clear—couched in terms of soldiers killed and years of war. Stop them from telling you what *should be done*, and make them demonstrate to you what we have the *ability to do*. Ask them to define our war aims: our plan of defense and of attack. And if someone says that such questions must be left to "experts," ask them: To what experts? To the same experts who, for the last twenty years, led France to defeat and England to ruin? To the same experts who have created the greatest national debt in American history, and still left us a nation unprepared in the midst of a world at war? To the same experts who failed either to maintain peace or to prepare for war? No, such leadership will never make us a strong and victorious nation. It will not carry us successfully through these periods of war and crises. If our American ideals are to survive, it will not be through the narcotic of a foreign war, but through a reawakening of the spirit that brought this nation into existence. It will be only if you, and I, and people like us, take the reins in hand once more, as our forefathers have done in times of crisis.

The future of America, of our way of life and of western civilization itself lies not so much in the outcome of these wars abroad as in the action that *we* take *now* here in our own country. In this action, your help is urgently and immediately needed.

INLITE TAKES HOLD and Death Takes a Holiday

3500 POUNDS OF STEEL-ON-WHEELS start down the steepest test hill ever built . . . disaster is a split-second away until Inlite Brake Lining takes hold and death takes a holiday, as the test driver safely stops the car with his foot brake alone.



PICTURE THE SETTING of this thrilling brake lining test recently conducted on the steepest test hill ever built. Here is a hill that's too steep to walk up or down . . . too steep for a passenger car to climb . . . a hill with more than twice the grade of any hill that you are likely to face in normal driving.

Suddenly, the dare-devil test driver heads the car for somewhere below. Disaster is a split-second away . . . until Inlite Brake Lining takes hold as the fearless driver stops the car with his foot brake alone.

This spectacular Inlite demonstration proves why great automobile makers depend on Inlite. You can do likewise!

Don't take chances on your brakes! Have them checked today by your neighborhood garageman, brake serviceman or car dealer. Ask him to install on your car the same Inlite top-quality brake lining that's original factory equipment on 1941 passenger cars and trucks.

Remember, when only a perfect stop is good enough, Inlite gives you all the brakes. Get Inlite under your feet and go safely every day.

Give Your Family all the brakes, with INLITE BRAKE LININGS

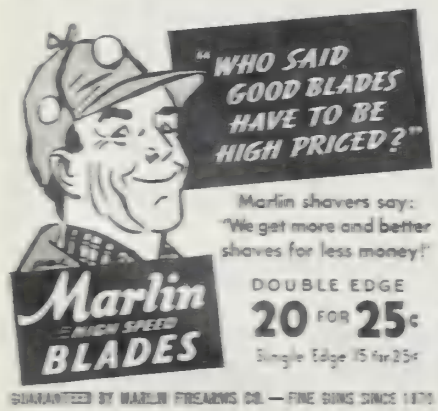
When you remove anti-freeze—clean out rust, scale and sediment too! Water circulates freely. You may save expensive trouble. Just use 10c worth of Sani-Flush. (25c for the largest truck or tractor.)

Do the job yourself—or have your service station do it. Plain water isn't enough. Insist on Sani-Flush. Can't harm aluminum cylinder heads. It's used in most bathrooms for cleaning toilet bowls. (*Directions on can.*) Sold by grocery, drug, hardware and 5-and-10c stores. 10c and 25c sizes. The Hygienic Products Co., Canton, Ohio.

Sani-Flush
CLEANS OUT RADIATORS

MANY NEVER SUSPECT CAUSE OF BACKACHES

This Old Treatment Often Brings Happy Relief



Many sufferers relieve nagging backache quickly once they discover that the real cause of their trouble may be tired kidneys.

The kidneys are Nature's chief way of taking the excess acids and waste out of the blood. They help most people pass about 3 pints a day.

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

Foulproof Taylor

By Dan Parker

James Taylor pre... tises one claim ... "Made Farley," a... puts the foolpro... cap—and Taylor—...

DID I ever tell you how I saved boxing, Lord forgive me, and put Franklin D. Roosevelt in the White House?" asks Foulproof Taylor. "No? Well, I'll tell you. It was like this:"

And then, although you didn't ask him, the self-confessed savior of boxing and maker of Presidents will tell you anyway. He also will tell you about his inventions: A foulproof device for boxers, a foulproof cap for ballplayers, a foulproof skullcap for hockey players and a foulproof brassière for girls who play softball.

James Phillip Taylor is an intense little man in his early fifties with keen, blue eyes, a shock of silver-gray hair that stands up like a Zulu's and an indomitable spirit. He has a firm conviction that there is a huge conspiracy to defeat his one-man campaign to make the world foulproof.

A persecution complex may account for this state of mind but there is really something to Foulproof's claim that he saved a sport and made a President. Like the ammunition China gets over the Burma Road, this may be farfetched. But Taylor really helped to save boxing in New York State back in 1930 when the foul ending of the Sharkey-Schmeling heavyweight-championship bout threatened to kill the fight racket. And, in doing so, he helped to make Jim Farley a national figure. In turn, Farley made Franklin D. Roosevelt President of the United States. Therefore, Foulproof Taylor put Roosevelt in the White House. Q. E. D.

Foulproof was born in Manchester, England, the son of an Irish telegrapher and an American mother from Columbus, Ohio. A telegrapher by trade and in his youth a big-league soccer player with the Manchester City Reserves, Taylor has never boxed nor has boxing had anything to do with his invention of the device that saved it.

'Twas while twittering in the chorus of the Metropolitan opera as a male canary in 1926 that Taylor found his true life's mission. In one of the scenes of an opera in which he sang and brandished a spear menacingly at a baritone, Foulproof was "roughed up" at every performance and finally injured. For self-protection, thereafter, he wore a shock-absorbing device of his own invention, hastily contrived in the cellar workshop of his home in Flatbush. The wave of fouls which came at the crest of the boxing boom in the late 1920's gave Foulproof his cue, sending him on the trail of a fortune that so far has eluded him.

Fouled by Misfortune

After a dozen years in the business of making the world foulproof, he has made several lawyers and a rival for the foulproof business rich, but he still retains his amateur standing, with nothing to show for his efforts but several scrapbooks loaded with goofy publicity.

Taylor has been fouled 10,000 times at his own request. He has been crowned with baseball bats wielded by some of the nation's leading sluggers. 'LL ALWAYS BE GLAD YOU BOUGHT A GENERAL ELECTRIC

The Truth About Today's Refrigerators !

MATTER what reliable make of electric refrigerator you choose today, you'll get value for your dollars than ever before.

FOR TODAY'S good electrical refrigerators are an example of mechanical perfection as human ingenuity, skill, science and experience have produced. They're more than twice as efficient as refrigerators of ten years ago, yet cost about half as much—so little that almost every family can afford the best in modern refrigeration.

WHATEVER make you choose, be sure to: (1) get a refrigerator that's big enough for your needs; too many of the early purchasers have had to add for more storage space. (2) Get a refrigerator that's completely equipped—for the little conveniences become very, very important multiplied over the years of use. (3) Get a refrigerator that's made by a reputable, experienced manufacturer, for actually it must outwear the mechanical life of many automobiles. (4) Ask your neighbors, shop carefully, and get all the facts, for you won't be buying a refrigerator again very soon if you choose wisely. (5) Remember that in refrigerators as in most other things, you get what you pay for—so the best model you can afford is your best investment.

★ NATURALLY we'd like to see you buy a General Electric, for we believe it's the finest machine ever built. Of course, we're prejudiced—but be sure you look at a G-E before you make up your mind.

★ MAYBE we build the G-E Refrigerator so well, because we have had a lot of experience as the largest builder of electrical conveniences. We do know that we offer, in this refrigerator, features tested by time and a mechanism that's just about tops in the engineering world.

★ G-E WAS FIRST with an all-steel cabinet—first with the sealed mechanism—first with many other vital improvements. Its record for low cost, dependable service is unsurpassed. And according to recent surveys it is *preferred by more people than any other refrigerator!* We try hard to give people their money's worth and to keep our prices low. A General Electric is priced no higher than other good refrigerators—as little as $114.95* buys a big 6 cu. ft. model. We believe G-E *actually costs less than any other refrigerator over the years!*

* Local and state taxes, if any, additional. Prices slightly higher in the West and South. See your nearest General Electric dealer.

GENERAL ELECTRIC

Set your expectations *high*, then take the wheel!

IT WOULD BE A GOOD IDEA if people who come to see and drive a Ford could first see and drive some cars that sell for much more money. Then they would understand more clearly the place the Ford car holds today.

Then they would quickly realize that today's Ford is more like the high-priced cars than it is like the cars which sell at the Ford price. The reason for this lies in the history of the Ford car itself. The Ford car was built in the first place to make it possible for the man of average means to own an automobile.

Then, to make the Ford car finer, year by year, we borrowed for it more and more of the proven features of more expensive cars. To these, Ford engineers applied Ford methods and Ford resources in the big Ford plant, until ways were found to put these features in our cars and still retain the low [illegible]

You get the results when you d[rive a] Ford today. Your touch on the st[eering] loose smooth, fine-car power. Your [foot rests] the pedal of a fine-car clutch. Y[ou] flick a gearshift of accepted fine-car [pe]scores of unseen fine-car parts co[me] do your bidding.

Set your expectations *high*, then [our]

Some Ford Advantages for 1941:

NEW ROOMINESS. Bodies are longer and wider this year, adding as much as seven inches to seating width.

SOFT, QUIET RIDE. A new Ford ride, with new frame and stabilizer, softer springs, improved shock absorbers.

POWER WITH ECONOMY. This year, more than ever, Ford owners are enthusiastic about the economy and fine all-round performance of Ford cars.

BIG WINDOWS. Windshield and windows increased all around to give nearly four square feet of added vision area in each '41 Ford Sedan.

LARGEST HYDRAULIC BRAKES in the Ford price field, give added safety, longer brake-lining wear.

GET THE FACTS AND YOU'LL GET A FORD!

Ford

…efore Taylor invented the foul-…athing suit.

Fr… the Azores, Taylor came to New …ork. Although he had learned only the …ont…ntal code in Europe, he got a job …mm…ately as a Morse code operator. This …as tantamount to a New York …ucti…eer getting a job at his trade in …the… In such a situation, Foulproof …ost …any jobs. But Foulproof was …oun…nd fancy-free, so he became a …ove… Boy. Wh… Foulproof landed a job in a …ckely… atchman's shack at Manhattan …each… where the transatlantic cables …ame t… ore, he found so much time on …is ha… s that he took the opera job. …For th… e years, Taylor handled both …obs w… out a hitch.

…Just… bout that time came an epi-…emic … fouls in boxing. Foulproof read …f this… ire situation and in a flash the …dea o… his lifetime came to him. He …ould … Orpheus, poor bloke, shift for …ymsel… nd devote the rest of his career to the Herculean task of saving boxing. Oddly enough, boxing showed no interest in Foulproof's resolve. In fact, it ignored him. Foulproof Taylor was a hard man to ignore, though. He would come bustling into a gymnasium and demand that the nearest boxer foul him. Since fighters were being well paid to foul opponents in that era, they would merely curl their lips into a sneer and hiss: "Sca-ram!"

At the office of the New York State Athletic Commission, Secretary Bashful Bertie Stand still points pridefully to the groove on one of the benches in the waiting room.

"Foulproof Taylor wore that one," says Bertie. "Yes, sir! He sat there day after day for two years, waiting for Jim Farley to see him. Never got discouraged, either."

Our hero well remembers June 13, 1930, the day after the first Sharkey-Schmeling heavyweight-championship fight, in which Schmeling had won the title while claiming foul, on the flat of his back. Foulproof received a telegram sent collect, mind you, by Secretary Stand. If there's anything a telegraph operator hates more than a teleprinter, it's a collect telegram. This was the first and only one Foulproof ever received and he was so burned up he looked at the calendar and saw it was Friday the 13th! It is a sad commentary on the development of the human mind that, despite what happened as a consequence of Foulproof Taylor's collect telegram, there are still some people around who insist that Friday the 13th is an unlucky day.

Paying the messenger a reluctant quarter and giving him a tip (never to bet on horse races or accept collect telegrams) Taylor tore open the envelope feverishly and found himself summoned to a meeting of the New York State Athletic Commission. Abandoning his telegraph key in the middle of a dot, Taylor dashed off to the offices of the commission.

Big Jim Farley didn't beat about the bush. No sooner had Foulproof shoved his gray-thatched noggin inside the door and dropped a curtsy than Farley commanded: "Taylor, we want you to save boxing."

"At your service, me lord," replied Taylor humbly.

"But first you've got to prove your protector is foulproof," said Farley. "So, as a special favor to you, we're going to let you be fouled for one solid hour by four leading heavyweights."

"My country calls and I respond with pleasure," said Foulproof.

During the next few days, Foulproof was fouled in several clubs—by Yale Okun, Bob Olin, Jack DeMave and Jack Renault, four professional bruisers. While boxing-commission inspectors looked on and kept tally, the burly fighters hit the comparatively frail little telegraph operator with every foul blow known to the boxing racket. But the hundreds of blows that landed didn't hurt Foulproof a bit, although his back was raw from rope burns after the demonstration. The test had proved everything that Taylor had been trying to tell the boxing commission, which wouldn't listen to him, for two long years. It convinced the commission that any boxer, properly protected, who claimed that foul blows had hurt him was faking.

The effect of Taylor's demonstration was profound. The New York commission immediately enacted a "No Foul" rule, under the provisions of which no fighter could enter the ring unless equipped with a regulation protector and no bout could end in a foul. Anyone claiming a foul would be counted out.

Although the rule was ridiculed by other boxing commissions here and abroad and by fight racketeers who had profited from the long train of phony foul endings, it quickly vindicated itself and the New York commission by putting an abrupt end to the foul evil. In states that had ridiculed the New York rule the foul ending continued, forcing the commissions in many of them to adopt the new rule.

But Athletes Are Stubborn

There's hardly a sport now for which our hero hasn't invented some foulproof device. One of his extra-special numbers is a foulproof cap for ballplayers. Whenever a player is beaned in the big leagues, Taylor grabs one of his rubber caps and a baseball bat and dashes off to the nearest newspaper office.

In the middle of an edition, Taylor will burst into the sports editor's sanctum and cry, "I sye, 'it me over the blawrsted 'ead with it! Come on, mytey! Don't be a blinkin' sissy!"

Sports editors don't argue with him any more. They take the bat, step back five paces, then bring the claymore down on his rubber-protected conk with the force of a trip hammer. Taylor's knees will buckle under him, he will grow green and purple around the gills, his eyes will become crossed, dandruff will fall in showers on his shoulders and, finally, his store teeth will become dislodged. Then, gasping for breath and doing a Leon Errol, he'll force a wan smile and pipe up feebly: "What's the matter wi' you? Ain't you got any strength? Gi' me another belt. A real 'ard one this time, mytey!"

No matter how often Foulproof is biffed on the bean by a baseball bat, ballplayers, an ornery lot who frown on innovations even more so than their club owners, refuse to buy any of his caps or even wear them if their clubs buy them.

The Foulproof Taylor foulproof helmet for football players created quite a dent in a concrete wall at Fordham University not long ago, but so far it hasn't even scratched the surface of the market. According to the latest census returns, not one Taylor headguard was being worn in intercollegiate football. This despite the demonstration by Foulproof at Fordham, before the entire football squad and about fifteen members of the faculty.

On another occasion, Foulproof

"Looks like a planned job, eh, Eddie?" HARRY HAENIGSEN

A SPECIAL PREPARATION FOR SHAVING

FOR THE 1 MAN IN 7 WHO SHAVES DAILY

It Needs No Brush Not Greasy or Sticky

Modern life now demands at least 1 man in 7 shave *every day*. This daily shaving often causes razor scrape—irritation.

To help men solve this problem, we perfected Glider—a rich, soothing cream—not greasy or sticky.

BUFFER BETWEEN BLADE AND SKIN

You first wash your face thoroughly with hot water and soap to remove grit and oily sebum that collects on whiskers every 24 hours. Then spread on Glider quickly and easily with your fingers. Never a brush. Instantly Glider forms a protective layer between the edge of your blade and the sensitive surface of your skin. It enables razor to remove each completely softened whisker at the skin line *without scraping or irritating the skin.*

ESPECIALLY FOR THE 1 MAN IN 7 WHO SHAVES DAILY

For men in responsible positions—doctors, lawyers, businessmen and others who must shave *every day*—Glider is invaluable. It eliminates the dangers frequent shaving may have for the tender face and leaves your skin smoother, cleaner. Glider has been developed by The J. B. Williams Co., who have been making fine shaving preparations for over 100 years.

TRY A TUBE AT OUR EXPENSE—We're so positive that *Glider* will give you more shaving comfort than anything you've ever used that we'll send you a generous tube ABSOLUTELY *FREE*. No stamps—no cartons—no dimes. Just send your name and address to The J. B. Williams Co., Dept. EG-3, Glastonbury, Conn. On this FREE trial test, we rest our case entirely. Don't delay—send in a penny post card today for your free tube of *Glider*. Offer good in U. S. A. and Canada only.

FASCINATING BOOK—FREE

An interesting book, "How to Make a Man" tells about Dr. Eliot's Harvard Classics ... and how you may have the greatest library in little more than the average person spends for newspapers.

Also, telling the secrets of success, which better read, better-prepared men are going to. Tells the first step even—no thing to write. Simply mail the coupon below and read another page.

Send for the famous book, FIFTEEN MINUTES A DAY. It is free, without obligation and without cost.

crashed through three lines of secretaries to reach the inner sanctum of Berman Macfadden, the big nav-carrot-and-spinach man whose especial pride is his copious crop of hair. The last secretary between Foulmrod and the great man was about to give him the old whole-wheat heave-ho when Berman glanced up from an editorial on muscle bending he was writing and caught sight of the gentleman with the shock of grey hair standing a half foot above his scalp. Berman was fascinated.

"Let him come in," said Macfadden. Thereupon, Foulmrod recited the speech about his device which he had been rehearsing for fourteen days. Macfadden listened to the spiel as if spellbound. He even gulped to Foulmrod. Taylor had it on thick. He spit his infinitives, doubled his negatives, mixed his metaphor and scrambled his syntax. Finally, after boiling down what he had to say to a couple of hundred thousand well-chosen words, the inventor blurted out: "Well sir, what do you think of the protector?"

"What protector?" asked Editor Macfadden, as if suddenly awakening from a trance. "Never mind about the protector. Tell me, how did you ever raise such a beautiful crop of hair?"

It's a Bloody Shyme

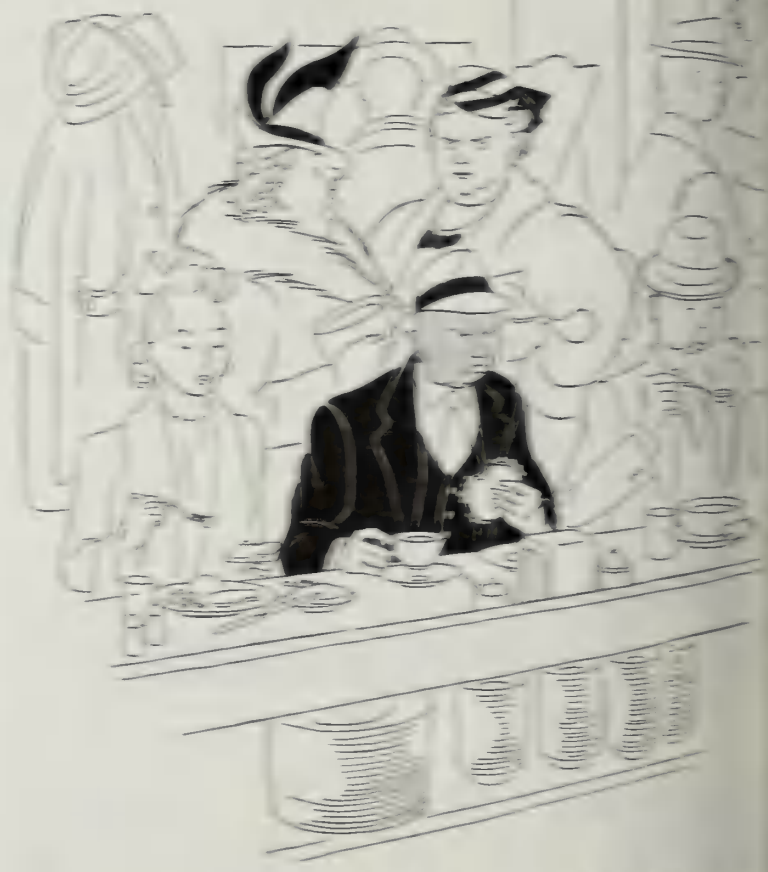
The question was indeed pertinent. Once, Foulmrod had no more hair than the ordinary mat. But since he started using his noggin as a target for various types of rou shots his hair has sprouted like weeds after a July shower. Where his thatch formerly was soft and pliable now it stands up like an army of patriots during the rendition of the National Anthem. It is Taylor's theory that the rough treatment he submits himself to including wal burning, stimulates the functions of the glands that control the growth o hair causing his scalp to take on the qualities of a Zulu s

Any mat who elects Presid has the laws of the land change consider himself a personage of importance. But Taylor feels a sense of frustration. It's his ambition to strut into Madison Garden some night and be gr by cheering crowds as Foulmrod the bloke who saved boxing. H finds himself thrown out of the —where he's willing to pay t mind you.

"It's a bloody shyme!" se proof. "They're all the way Roosevelt in the White House doesn't ever buy one of my p in the last campyne when sm thrown foul punches!"

Perhaps the reason that t benefactor of mankind will n able to raise wealling s that h brave actus at heart, rather than nessmat. This s best illustrate of his recent international tran The Atlantic Clipper brought h ar order, accompanied by a m for three pounds from Dublin for one of his protectors. T boxer who sent the order enclos proof to ship his product by ret per. Taylor packed his protector r to the Clipper office and gave shipping clerk.

"How much to Dublin," he asked.



The clerk weighed it an "Thirty-one dollars sir."

"Okay," said Foulmrod pe amount of his bank roll.

The sale had brought Foul ther dollars at a mere cost of th dollars for shipping expenses.

"You didn't make much or t did you, Foulmrod?" asked a

"Blimey, I didn't," admitted ventor. "But I had good luck a game the night before and was tonight. I'm obliged the bloke is After all, my old gent came f there."

"I always put out a fast eater to wait behind"

ssey dward G. Robinson, Lee Tracy F k McHugh. During those ths be nights they couldn't raise pou of a cheap meal far outnumnd t nights they could.

bout the time Calvin Coolidge d. Bob promoted himself a job ning series of shorts romanticizing ing of muscles. The series, ed F ts and Follies, showed in every t t the "guy with the biggest ades ts the pretty girl." To show bo honest Riskin is, after he ved make the series, he went to a ; eve day to build his own biceps. still rcises more than most Hollycame y playing tennis every day he t no set of a picture.

acts d Follies lasted for about a t an he pictures were getting Risnow re in a great hurry. At that t. B decided that there was more ney t be made working for himself t fo meone else, so he and his ther, verett, went hunting for an m." finance the production of a w Bo ad written. They found one, proc ed the show, with moderate resu r five years, he and Everett t on gether, digging up angels and hum moderate successes.

He to Impress Hollywood

hey d all kinds of shows, from She Ca ay No, a farce, to a serious n dr a called The Mud Turtle. y ev did a revival of The Bells, famo melodrama made famous by ny Ir g. On almost every one of a sh s, they made a little money. emp to get too far out in front he sh ff—but enough to keep just mot his menacing grasp.

hat riod ended abruptly with dow 1939, when the fading figures Wall eet's stock tickers translated mew into obituaries. Bob was as ng d financially as anyone else. Just a much as anyone else in the fut— he had. Broke, and hungry n he cided to go to Hollywood as ther Hollywood decided otherwise. At wo d meet fellows he had hired ther ers, and they'd show him conin fro Hollywood studios for $300 eek $400 a week, and he wasn't sure. He was puzzled. He knew mo e talent than they had.

e dec d that the only way to get to lywoo was to get a brand-new, shiny stud He took a play he had just sent it to the New York ofof one f the studios. In a few days, mail him and asked what he thou fo the script.

pho went dead in Riskin's hand. Sweet ecause the story editor had g up few minutes later, the edicalled ack, got Bob on the phone.

you a few minutes ago, but some aniac on the phone. I know you—because you're sane. If you b. I can get you $2,500 for play."

Bob hung up. After that, went the kitchen and finished the of cuits and the bottle of milk stood etween him and a total abgone id, and he waited . . . and said. The next day the studio called. "Okay, we'll go as high as b decided to battle it out the dio's story editor, face to He alked into the editor's office. that g t said: "I've got great news you—the West Coast says to go as $ 0 for your play!"

Look." aid Riskin, whose only possession in the world at the moment was the Forest Hills commutation ticket in his pocket, "stop wasting my time and yours. The price is—no, wait—I'll come down on my price. If you'll close immediately, I'll sacrifice the play for $40,000!"

The story editor had an apoplectic moment, and then said: "You have really blown your topper. I couldn't get you more than $10,000 for this if you were my own brother."

"Well, I guess there's no sense discussing it any further. Mail the script back to me, will you? I'd take it with me, but I have an important tennis date."

Bob began a long, long walk down the corridor from the editor's office to the elevator. He wanted to look back, and wait for a call to return, but he knew he couldn't show any weakness, so he walked right to the elevators. He pushed the button and, in a moment, an elevator appeared.

"Down?" asked the elevator boy.

"No—up," lied the stalling Riskin, his ears on the alert for the slightest call of his name.

He let that elevator go, and then another one, and he sagged inside as he realized that he had gone one step too far in the haggling. Just as the doors of the third elevator opened for him, the story editor's secretary came running out, and asked him if he'd mind coming back for just one more minute!

He walked back slowly, lest his jellied knees betray him. Inside the editor's office, he turned down the next offer of $20,000—and finally accepted a compromise of $30,000 for the script.

I didn't get that tale from Riskin, but from the story editor, who still holds the same job, with the same studio.

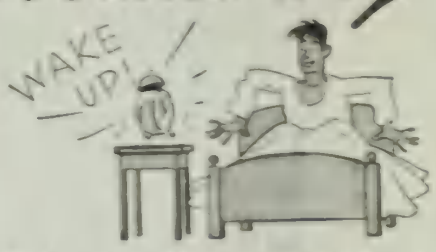
The name of that script was Illicit, and, strangely enough, it starred Barbara Stanwyck, who also stars in Meet John Doe. Along with the sale of Illicit for $30,000 came sales of two of his other scripts. Now, the shoe was on the other foot—and Hollywood wanted him, because he was a success. A success where four weeks before he had been an abject failure. Now studio representatives were knocking one another down trying to sign the same fellow whose phone calls they'd been ducking.

Columbia Pictures looked like a good place, so he asked them for twice what any other writer on that lot was getting. Because he was so successful, he got it, and went to work.

The Fight That Made History

Columbia had bought one of the three plays, a farce about Aimee Semple McPherson titled Bless You, Sister! Shortly after he reported to Columbia, he was called into the president's office along with the rest of the staff for a story conference. Soon, a short, dark fellow in a black sweater started to outline a story. Bob turned to his neighbor in the next chair, and asked: "Who's that?"

Through the corner of his mouth, the neighbor whispered: "Capra."



Riskin shrugged his shoulders, and settled back to listen. When the little guy was halfway through, Riskin suddenly realized that the story he was telling was, with some minor changes, his own Bless You, Sister!

He listened, and when Capra finished, the executive producer said: "Since this was Mr. Riskin's play, we'll call on him first for suggestions. Mr. Riskin."

This was Bob's first utterance, official or otherwise, since his arrival: "I wrote that play. My brother and I were stupid

The most important day in your life

We mean today. The past is gone, the future uncertain. That leaves the present. There are only two things you can do with the present: (1) Enjoy it. (2) Use it to prepare for the future. So:

1. When you take a vacation, take a *real* one—not a prosaic close-to-home affair. By cutting loose and taking that "someday" Southern California vacation *this year* while you can, you'll do more than have a wonderful time.

You'll enrich your whole life with a storehouse of happy memories that nobody can ever take from you. Palm-fringed Pacific beaches. Santa Catalina. Bright days, *cool* nights. Missions. Fiestas. Mountain peaks and flowering valleys of oranges and grapes. Hollywood's night-time diversions and celebrities. Natural wonders, ages old. Industries like movies, radio, oil and airplanes, as new as tomorrow.

2. But more than that, you'll see this America of ours en route. You'll gain a new perspective on events and on yourself. You'll go back refreshed, invigorated—for the tasks ahead.

Faster Travel! Lower Costs!

Ordinary 2-week Vacation is Ample!

TODAY, even from New York, Southern California is just overnight by plane, as little as 2 business days by train, 4 to 7 by auto or bus. And living costs here average 22.8% under those of 20 other leading U. S. resorts. Accommodations for every budget in Los Angeles, Beverly Hills, Glendale, Pasadena, Pomona, Hollywood, Santa Monica, Long Beach, and other cities of Los Angeles County and its neighbors.

FREE: *Automatic Trip Planner*

For your Southern California trip: new unique book, answers all your questions. Lavishly illustrated. Crammed with impartial facts available only through this non-profit community organization. Get your free copy by return mail.

When you arrive, step into our Tourist Information Bureau, 505 West Sixth Street, Los Angeles. Literature, maps, guidance—26 helpful services—all *free.*

ALL-YEAR CLUB OF SOUTHERN CALIFORNIA

Come to California for a glorious vacation. Advise anyone not to come seeking employment, lest he be disappointed; but for tourists, the attractions are unlimited.

250 Park Avenue, New York, N. Y.

enough to produce it on Broadway. It cost us almost every cent we had. If you intend to make a picture of it, it proves only one thing: You're even more stupid than we were." And he sat down.

For a few seconds, there was a heavy silence as the heresy just uttered seeped in. Then Capra, who loves a good argument, got back to his feet, looked at Bob, and asked: "Why?"

From there on, the invective flowed faster than wine at a wedding. When the dust of battle settled, Capra and Riskin were firm friends. That was the first meeting of the historic pair who have turned out a smash picture every year since '33—without a flop.

Riskin didn't work with Capra on that Bless You, Sister, but when Capra was ready to make his next picture, he asked for a Riskin script, and that started the partnership. The script was Platinum Blonde, the late Jean Harlow's second picture.

As work was being finished on that, one of the producers came to Bob and said: "I'm going to New York tomorrow, and I'll be gone about three weeks. When I get back, see if you can have a story for me about banking."

Bob thought he was being ribbed, but he decided that for the money they were paying him, they could rib him every day but payday. He had heard about Dr. Giannini, the financial maestro whose baton waves over the Bank of America, and he went to see him. Being an interesting man who believed in lending money on a man's character if he didn't have the ordinary bank's idea of security, the doctor became the inspiration for the leading personality in the second Riskin-Capra picture, American Madness.

When Bob and Capra wanted to borrow money to set up Frank Capra Productions, Incorporated, Riskin thought for a while, and then marched off to see Dr. Giannini, where he got the necessary money. I think I told you earlier that the man never wastes an experience. See what I mean?

The Businessman-Artist

Riskin is a kind of typewriting Bing Crosby. He owns and breeds his own horses, which do not win any more often than Crosby's. Like Bing, though, he is in the game for the kick he gets out of it. His next horse has already had its name picked out for it. Bob is going to call it "The Gamut," so he can say to his friends: "I'm going to run 'The Gamut' today." *Simple pleasures delight complex minds*—Confucius.

After horse racing and te favorite diversion is stud po those who lose to him week af say he is a good player. He a music (not swing), home-fried p and blondes. His only known writing introspective poetry, b considerate enough not to sh anybody, which is the way friends and influence people.

He has, in addition to his talent, an executive ability tha most people, because writers ar posed to be executives. Gradua president of Vitagraph, Warne ers' sales organization, said to working out the Meet John D tribution problem with Riskin

"He's one of the best busine ever ran into. He has a perfect analysis. He's as good figu sales angles as he is figuring ou He takes nothing for granted why every detail in the deal is is as clear as the details in his

An incident that took place wi John Doe was being shot illustr kin's fidelity to detail. There mammoth outdoor scene which at Wrigley Field, in Los Angel a convention, and each state sented. Fifteen thousand ext jammed into the field that ni state placards all over the in outfield and the grandstands.

Riskin was watching the shoot the press box, and just before t eras were to start rolling he p the phone hurriedly, called Ca asked him to hold the cameras

"Look at that sign behind hi Bob said. "It's spelled 'Dele the sign. Just pull it, and we going without it."

In 1939, Bob left Columbia an executive job with Sam Gold he longed to get back with Ca as Capra longed to get back w When Capra's contract was up lumbia, the pair formed Fran Productions, Incorporated, and now making pictures with t money—or, at least, with mo rowed on their own signatures.

They made a deal with Warn ers to release their first picture, the current Meet John Doe, an is any indication of what we ca from this pair working on their moviegoers can throw our ha air and not care whether they e down again.

"I could have had a dozen dates since I've been standing here

The Boss is a different man since we changed to silence!

1 **"No!" bellowed the Boss,** when his wife suggested a new refrigerator. "Can't afford it in the first place, and besides—" "Can't afford *not* to have it," broke in his wife. "Our noisy old thing's not only hard on the nerves, but the repair bills are ruining our budget. But I know one that's different. Come and see!"

2 **"Not a sound . . . and lasts longer,"** explained the salesman. "Servel Electrolux simply can't cause a rumpus or wear. It hasn't a single moving part in its freezing system. A tiny gas flame does the work. And that's *all!*" "Well, I'll be doggoned," says the Boss. "Mister, you've got *something* here!"

os! People who've had experience with other makes of automatic refrigerators are quick to say that Servel has all those big operating advantages they want *most* . . . has all the latest worthwhile convenience too. Survey after survey shows that, of owners of other-type refrigerators, the swing is to Servel Electrolux for their *next* automatic.

4 **"Silence means savings," smiles the Boss,** pleased as punch with our new Servel. "Have you noticed, honey," he says to his wife the other night, "it's costing just a few cents a day for refrigeration since we changed to Servel?" "You bet I have," she grins, "and I've noticed too, my pet, that you're a different man since we changed. Eh, Scottie?"

Stays silent...lasts longer

SERVEL
ELECTROLUX

State Barriers vs. Union Defense

COLLIER'S has had fairly frequent occasion to pay editorial respects—in reverse—to interstate trade barriers.

We mean the disguised tariffs which state and even some city or county politicians have been erecting these ten years or so along their bailiwicks' borders. They are actual tariffs, though they are masked in every way imaginable. Sometimes they are called inspection fees, sometimes travel taxes or weight limitations or health measures or almost anything else you can think of.

Tariffs they are, though, one and all, levied in the hope of sweating a mean little profit or advantage out of neighboring states, and levied in plain violation of the spirit of the Federal Constitution. The Constitution's framers' idea was that this was to be a great free-trade area, instead of a balkanized conglomeration of independent principalities.

These robber devices' hampering effect on interstate business has been bad enough, for business and consumers alike. But now they are found to be eating like termites into the national-defense effort as well. Some instances, borrowed from Paul T. Truitt, authority on interstate trade barriers:

On Oct. 6, 1940, two truckloads of khaki denim, each load 10,030 pounds, left Atlanta for South Bend, Ind. They were stopped at Elizabethtown, Ky., for about a half day. Fines were collected because the truckloads exceeded the Kentucky limit of 6,000 to 8,000 pounds. To get the khaki through Kentucky at all, the truck operators had to send extra trucks to take the excess loads. . . .

Shipments of large airplane parts, materials and tools between Los Angeles and Seattle are chronically delayed one day or more by (1) California's "sanitary information stoppage," and (2) Oregon's measurement of equipment regulations. . . .

Trucks recently loaded at Chicago with shipments of small arms for Army maneuvers at C[a]... Coy, Wis., were not permitted to enter W[i]... because they lacked Wisconsin license pl[a]...

Material for percussion caps, shipped f[r]... Huron, Mich., to St. Louis, Mo., runs int[o] ... annual trailer charge in the city of St. L[ouis]—... an alternative charge of $4.50 for one ... truck to stay in the city twenty-four hour...

Those are samples of what the pear... politicians have been preparing for us du... g the years of their supposedly smart nippi... at interstate trade for fancied local profit. ...ey've been too smart for their own good. They ... been far too smart for the nation's good. N... their supersmartness is hampering the defe... program, at a time when every minute cou...

Those interstate barriers must com... own. If the states, counties and cities mai... ning them won't knock them down, the fede... government had better do it—in a hurry.

A Sales Tax for Defense

WE'RE familiar with the old argument about how sales taxes bear down heaviest on the poor, and will therefore most likely move the poor to revolt, so we shouldn't have a federal sales tax to raise defense billions.

The catch in the argument is that many states and cities already have sales taxes and the promised horrors haven't materialized.

Further, the federal government itself levies a lot of sales taxes—on theater tickets, cosmetics, tobacco, etc., etc., though it ...ndly calls many of them excise taxes.

We've got to get up those billions for ...ense. Why not levy a general, small federal s... s tax, exempting only food and clothing?

How's Your Hospitality?

IF YOU happen to be in any one of the many towns and cities whither our new soldiers and sailors flock during their few hours free from training and duty, you are thrilled at sight of lads, so young, so fresh, so lighthearted in the face of their great adventure. A grand lot they are, representing the best of America.

What do you imagine they do in their hours of freedom? What can they do? Where can they go for entertainment or rest? What has your community done to make them welcome or to provide facilities for them?

Most towns and cities will have to respond, "Not much." Of course there are movies. Business provided that recreation. The boy on leave can go to a movie house to get out of the rain or even to see a picture. He can go to a beer parlor or to some less wholesome place that offers hospitality at a price. But where can he go when he has seen the picture or when he doesn't want a glass of beer?

In too many places all he can do is walk the streets or sit in a park. That is too dreary for the vigorous youth. In time the Army and Navy will develop recreation facilities but much time will be needed. Meanwhile hundreds of thousands wander about, bored and aimless.

The decent people who live in the areas near the camps and ports have a marvelous opportunity to offer hospitality to these young warriors so suddenly mobilized. Home ...clubs, recreation places can be opened to them. Comfortable places in which a man can wri... a letter, read, take a bath, or best of all ta... to his own kind, can be established. Not m... expenditure is required—just a little i... ative and organization.

Collier's would like to hear from th... who have already begun to offer hospitality ... soldiers and sailors. For the letter th... best describes the accomplishment of or... community in taking care of its new neigh... rs we will pay $100. Send your letters to th...
